Year-round sports of water lovers are boating and excellent fishing for bass, white perch, sausage pike, bream, and channel cat, which have been weighed in at 120 pounds. Lake Ferguson is only 1 of 5 large lakes within 20 miles of the city. Other popular sports are deer, duck, and quail hunting; golf, riding, trapshooting and archery, football, and other seasonal sports. Greenville's citizens are justifiably proud of their community, which offers abundant opportunity for earning a living and a gentle southern climate in which to play and enjoy life.

Hodding Carter, editor of Greenville's daily Delta Democrat Times, Pulitzer prizewinner, author, lecturer, and civic leader, is of national prominence. Many of his books and magazine articles have been circulated throughout America and in European and other foreign countries. In Southern Legacy he wrote in 1949 of Greenville:

"In its strenuous past and its hopeful present, Greenville is the South in microcosm, though it does not share the more ancient heritage of the southeastern seaboard. Only a little more than a century ago the sites of Greenville and our surrounding small towns and plantations were soggy cypress swamps, hidden from the sun. Here was and is the frontier of the South.

"The people who came to this swampland and cleared and drained and planted it * * * bore mostly English and Scotch-Irish names, with a scattering of German and south-Irish stock * * * from the seaboard States or Kentucky or Tennessee. Here they settled where the land had been built up from swamps by silt deposits from centuries of the river's overflow."

Marginal Seas of Alaska

EXTENSION OF REMARKS
OF
HON. THOMAS M. PELLY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 18, 1957

Mr. PELLY. Mr. Speaker, since my appearance on statehood for Alaska befor the appropriate subcommittee of the House Committee on Interior and Insular Affairs, I have received a good deal of mail from Alaska as well as from my own district and the State of Washington.

Because of my frank statement that a temporary commonwealth status would be preferable to statehood for Alaska, naturally there has been some differences of opinion as to this point. But I will say 98 percent of the opinions expressed in such letters are in complete support of my views. With exemption from Federal income taxes under commonwealth the people and business firms of Alaska would retain the $45 million which now goes into the Treasury of the United States. A part of this would be available for self-government and the adequate management, conservation, protection, and development of Alaska's resources. Payrolls could be established by attracting new venture capital for investment under a tax incentive program. But of equal importance, Alaska could afford research and proper regulation of her resources and in particular of her fisheries, which is now financed and administered by the Federal Government. Under statehood Alaska's economy could not possibly afford so much money.

Thus, Mr. Speaker, I desire to make my position clear. Under commonwealth status I favor self-management of the Alaska fisheries. However, under statehood I support retention of Federal control until such time as Alaska could afford to do the job herself.

Under questioning of the members of the subcommittee, when I testified, the point was raised as to whether or not under the Constitution the Federal Government could legally withhold control of the fisheries. In this connection I include for the RECORD a legal memorandum concerning the marginal seas of Alaska which was prepared by Edward W. Allen, an eminent member of the Washington State bar and past and present member of various international fishery commissions.

I have urged safeguards for the rights of nonresidents. The memorandum which follows concludes that any provision limiting the new State in its control over fisheries would not be unconstitutional because of the so-called equal-footing clause. I hope Members of Congress will study this brief:

MEMORANDUM CONCERNING MARGINAL SEAS OF ALASKA

May Congress, in enacting an enabling act for the admission of the Territory of Alaska as a sister State in the Union, withhold, either temporarily or permanently, control over migratory fish in the marginal sea of the new State?

The question involves the assertion that new States must be admitted upon an equal footing with existing States. The United States constitutional provision is (art. 4, sec. 3) that "New States may be admitted by the Congress into the Union * * *." It goes on briefly to prohibit carving up a State without its consent or forcing States to join.

There is nothing in this language about equal footing. This is a matter of judicial construction, probably basically sound, but subject to reconciliation with other features of our governmental structure. It does not interfere with the Federal Government exercising its own unrestricted power differently in different States, nor does it apply to Federal proprietorship. Furthermore, the Federal Government has latent powers, so that while it may permit a State to exercise jurisdiction in a particular field, this jurisdiction can be superseded when the Federal Government sees fit to act.

Under numerous decisions it has been pointed out that the Federal Government has such latent powers with reference to the marginal sea, and since the decision of *United States* v. *California* (332 U. S. 19; L. ed. 1889 (1947)), it has been made clear that because of the proprietory rights of the Federal Government, as well as its sovereign power, equal footing is not involved. This was a case wherein the United State brought action against the State of California for a declaration of the rights of the United States to lands, minerals, and other things of value underlying the Pacific Ocean, lying seaward of the ordinary low-water mark on the coast of California and outside of the inland waters of the State. The issue as stated by the Supreme Court, at page 29, was:

"Whether the State or the Federal Government has the paramount right and power to determine in the first instance when, how, and by what agencies, foreign or domestic, the oil and other resources of the soil of the marginal sea, known or hereafter discovered, may be exploited."

The holding of the Court was stated at page 38 to be as follows:

"Now that the question is here, we decide for the reasons we have stated that California is not the owner of the 3-mile marginal belt along its coast, and that the Federal Government rather than the State has paramount rights in and power over that belt, an incident to which is full dominion over the resources of the soil under that water area, including oil."

The Court further stated, at pages 35–36:

"The State is not equipped in our constitutional system with the powers or the facilities for exercising the responsibilities which would be concomitant with the dominion which it seeks. Conceding that the State has been authorized to exercise local police power functions in the part of the marginal belt within its declared boundaries, these do not detract from the Federal Government's paramount rights in and power over this area."

In commenting upon the holdings of prior Supreme Court decisions pertaining to a

State's right to regulate or control the taking of fish or other resources from its territorial waters, the Court said, at pages 37–38:

"But the opinion in that case was concerned with the State's power to regulate and conserve within its territorial waters, not with its exercise of the right to use and deplete resources which might be of national and international importance. And there was no argument there, nor did this Court decide, whether the Federal Government owned or had paramount rights in the soil under the gulf waters. That this question remained undecided is evidenced by *Skiriotes* v. *Florida* (313 U. S. 69, 75, 85 L. ed. 1193, 61 S. Ct. 924), where we had occasion to speak of Florida's power over sponge fishing in its territorial waters. Through Mr. Chief Justice Hughes we said: 'It is also clear that Florida has an interest in the proper maintenance of the sponge fishery and that the State statute so far as applied to conduct within the territorial waters of Florida, in the absence of conflicting Federal legislation, is within the police power of the State.' "

In 1950, the Court decided the case of *United States* v. *Louisiana* (339 U. S. 699, 94 L. Ed. 1216), which involved a suit by the United States identical for all practical purposes to the suit involving the State of California. The Court held that national rights were paramount in the marginal sea lying off the shores of the State of Louisiana. Such paramount rights were held to extend to the ocean seaward of the marginal belt.

In passing upon the issues presented, the Court stated, at page 704:

"We lay aside such cases as *Toomer* v. *Witsell* (334 U. S. 385, 393, 92 L. Ed. 1460, 1469, 68 L. Ct. 1156), where a State's regulation of coastal waters below the low-water mark collides with the interests of a person not acting on behalf of or under the authority of the United States. The question here is not the power of a State to use the marginal sea or to regulate its use in absence of a conflicting Federal policy; it is the power of a State to deny the paramount authority which the United States seeks to assert over the area in question."

One month subsequent to the decision in the Louisiana case, supra, the Supreme Court decided the case of *United States* v. *Texas* (339, U. S. 707, 94 L. Ed. 1221). This case involved a similar dispute between the United States and the State of Texas. Of the three cases, California, Louisiana, and Texas, the Texas case is perhaps the most definitive with respect to the effect of the "equal footing" clause as it pertains to the admission of a State to the Union. On this point the Court declared, at pages 717–718:

"The "equal footing" clause, we hold, works the same way in the converse situation presented by this case. It negatives any implied, special limitation of any of the paramount powers of the United States in favor of a State. Texas prior to her admission was a Republic. We assume that as a Republic she had not only full sovereignty over the marginal sea but ownership of it, of the land underlying it, and of all the riches which it held. In other words we assume that it then had the dominium and imperium in and over this belt which the United States now claims. When Texas came into the Union, she ceased to be an independent nation. She then became a sister State on an "equal footing" with all the other States. That act concededly entailed a relinquishment of some of her sovereignty. The United States then took her place as respects foreign commerce, the waging of war, the making of treaties, defense of the shores, and the like. In external affairs the United States became the sole and exclusive spokesman for the Nation. We hold that as an incident to the transfer of that sovereignty any claim that Texas may have had to the marginal sea was relinquished to the United States."

Of particular importance is the following statement of the Court dealing with the extent to which the Federal Government has paramount rights in the marginal sea:

"Today the controversy is over oil. Tomorrow it may be over some other substance or mineral or perhaps the bed of the ocean itself. If the property, whatever it may be, lies seaward of low-water mark, its use, disposition, management, and control involve national interests and national responsibilities. That is the source of national rights in it. Such is the rationale of the California decision which we have applied to Louisiana's case."

In 1953 Congress passed the Submerged Lands Act (43 U. S. C., secs. 1301 et seq.) wherein the Government ceded to several of the States, the marginal seas and, in some cases, greater areas, bordering those States.

The Submerged Lands Act was challenged as an unconstitutional exercise of the power of Congress to dispose of public lands in the cases of *Alabama* v. *Texas* and *Rhode Island* v. *Louisiana* (347 U. S. 272, 98 L. Ed. 689 (1954)).

In a per curiam decision, the Court determined that, under article 4, section 3, of the United States Constitution, Congress had the power to dispose of any kind of property, including marginal seas, which belonged to the United States. The concurring and dissenting opinions in the *Alabama* v. *Texas* case are of aid in defining the scope of the California, Louisiana, and Texas, supra, decisions.

Justice Reed, in concurring, stated at page 274:

"While this Court did not hold in express terms in the Texas, Louisiana, and California cases that the area in question belonged to the United States as proprietor, it did hold that 'the Federal Government rather than the State has paramount rights in and power over that belt, an incident to which is full dominion over the resources of the soil under that water area, including oil' (332 U. S. at 38, 39). This incident is a property right and Congress had unlimited power to dispose of it."

Justice Black, in dissenting, stated at page 280:

"The Constitution does give Congress power to dispose of and regulate 'Territory or other property belonging to the United States.' This power, where it applied, has been declared to be unlimited. Congress, the Court has said, 'may deal with such lands precisely as a private individual may deal with his farming property,' *Camfield* v. *United States* (167 U. S. 518, 524, 42 L. ed. 260, 262, 17 S. Ct. 864). Of course, this authorized Congress at will to sell or dispose of property it owns as property. It could produce oil from the ocean and sell that property. It could have that oil produced by its agents. But I have difficulty in believing that any State can be granted power under our Constitution to exact tribute from any other State that wants to take oil or fish from the ocean which is the common 'property' of all."

Justice Douglas, in dissenting, stated at page 282:

"Thus we are dealing here with incidents of national sovereignty. The marginal sea is not an oil well; it is more than a mass of water; it is a protective belt for the entire Nation over which the United States must exercise exclusive and paramount authority. The authority over it can no more be abdicated than any of the other great powers of the Federal Government. It is to be exercised for the benefit of the whole. As Mr. Justice Black aptly states in his dissent in these cases, 'In ocean waters bordering our country, if nowhere else, day-to-day national power—complete, undivided, flexible, and immediately available—is an essential attribute of Federal sovereignty' " and at page 283:

"If it were necessary for Texas to surrender all her property and political rights in the marginal sea in order to enter the Union on an 'equal footing' with the other States, pray how can she get back some of those rights and still remain on an 'equal footing' with the other States? That is the unresolved question in these cases. That is the question which points up the grievances of Alabama and Rhode Island. For what Texas (and a few other States) obtain by the present act of Congress is what we held the equal footing clause forbade them to retain. The equal footing clause, in other words, prevents one State from laying claim to a part of the national domain from which the other States are excluded (399 U. S. pp. 719, 720). Today we permit that precise inequality among the States which we earlier said was precluded by the equal footing clause."

In *Toomer* v. *Witsell* (334, 385, 92 L. ed. 1460), a case decided 1 year after the California, supra, decision, defendant brought an action to enjoin the enforcement of a South Carolina statute governing commercial shrimp fishing in the 3-mile maritime belt off the cost of the State. The shrimp involved were migratory. The defendants urged, inter alia, that, by virtue of the California, supra, decision, South Carolina had no jurisdiction over coastal waters beyond the low-water mark. In answer to this contention, the court stated, at page 393:

"Here appellants seem to concede, and correctly so, that such is neither the holding nor the implication of that case; for in deciding that the United States, where it asserted its claim, had paramount rights in the 3-mile belt, the court pointedly quoted and supplied emphasis to a statement in *Skiriotes* v. *Florida* (313 U. S. 69, 75, 85 L. ed. 1193, 1199, 61 S. Ct. 924 (1941)), that 'it is also clear that Florida has an interest in the proper maintenance of the sponge fishery and that the [State] statute so far as applied to conduce within the territorial waters of Florida, in the absence of conflicting Federal legislation, is within the police power of the State.'

"Since the present case evinces no conflict between South Carolina's regulatory scheme and any assertion of Federal power, the district court properly concluded that the State has sufficient interests in the shrimp fishery within 3 miles of its coast so that it may exercise its police power to protect and regulate that fishery."

Although the question has not been adequately pursued by the Supreme Court, it is believed that a sound argument, if necessary, might be made in favor of Federal jurisdiction of migratory fish apart from its asserted paramount right of control based on ownership or international expediency. In the Toomer case, for instance—while not making this point—the Court does say (92 L. ed. 1474, pp. 401–403):

"First, the McCready case related to fish which would remain in Virginia until removed by man. The present case, on the other hand, deals with free-swimming fish which migrate through the waters of several States and are off the coast of South Carolina only temporarily."

"Indeed, only 15 years after the McCready decision, a unanimous Court indicated that the rule of that case might not apply to free-swimming fish. The fact that it is activity in the 3-mile belt which the South Carolina statute regulates is of equal relevance in considering the applicability of the ownership doctrine. While *United States* v. *California* (332 U. S. 19, 91 L. Ed. 1889, 67 S. Ct. 1658 (1947)), as indicated above, does not preclude all State regulation of activity in the marginal sea, the case does hold that neither the Thirteen Original Colonies nor their successor States separately acquired ownership of the 3-mile belt."

An action similar to that in the Toomer case, supra, was brought to the attention of the Supreme Court in *Skiriotes* v. *Florida* (313 U. S. 69, 85 L. Ed. 1193 (1941)). There defendant appealed from a denial by the Supreme Court of Florida of a writ of certiorari to review a judgment of conviction for violation of a State statute forbidding the use of diving apparatus in the taking of sponges from the territorial waters of the State. The decision of the Florida court was affirmed by the Supreme Court.

The Court stated at page 75:

"It is also clear that Florida has an interest in the proper maintenance of the sponge fishery and that the statute so far as applied to conduct within the territorial waters of Florida, in the absence of conflicting Federal legislation, is within the police power of the State."

It should be noted that in almost every case, both before as well as since the California case, the Supreme Court when it sustained any State control within the marginal sea carefully guarded itself by pointing out that this was in the absence of the Federal Government having exercised control. The clear inference is what is definitely stated in the California decision that the Federal Government has the right and power to assume control and thereby exclude the State.

It should also be noted that this Federal power is sustained upon two principles: (1) That the State is not equipped in our constitutional system with the powers or the facilities for exercising the responsibilities which it seeks; and (2) this incident is a property right and Congress has unlimited power to dispose of it.

As a property right there can be no possible application of the equal-footing concept. Hence Congress could grant Texas 12 miles and California 3 and enabling acts differ with reference to public and Indian lands.

On the responsibility side there is strong, logical, and current reason for considering Alaskan ocean fisheries on their own distinctive merits. A special situation is presented. Alaska is not only in the most critical location from a security standpoint by its proximity to Asia, but the research being conducted by the International North Pacific Fisheries Commission indicates a commingling of Asian and Alaskan fish. These fish migrate between the marginal sea and the high seas. Their management to be most effective should be embrasive. It should be by that branch of government competent both to handle the entire situation and vested with the jurisdiction over international affairs.

Employment of the Handicapped: A Community Responsibility

EXTENSION OF REMARKS

OF

HON. WILLIAM A. DAWSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 30, 1957

Mr. DAWSON of Utah. Mr. Speaker, it gives me a great deal of pride to announce to the Members of the House of Representatives that Miss Sharon Garrett, a student of the Judge Memorial School in Salt Lake City, Utah, has won first place in the 1957 national essay contest conducted by the President's Committee on Employment of the Physically Handicapped. In order that the Members of Congress can benefit from Miss Garrett's outstanding observations, I am inserting at this point in the RECORD, a copy of her prize-winning essay:

EMPLOYMENT OF THE HANDICAPPED: A COMMUNITY RESPONSIBILITY—THE FIVE AGES OF PHYSICALLY HANDICAPPED MAN

(By Sharon Garrett, Judge Memorial High School, Salt Lake City, Utah)

I cannot get excited over works that preach or teach, but I'd like to set down, as simply as possible, some short chronicles which might have been written by 5 men—or rather, by 4 men and 1 child. These have lived in different ages, in different stations, in different parts of the world. But they had one thing in common.

The first speaks extermination.

"My name is Cleisthenes, but they call me the one-who-is-lame. The reason I am alive is that my father is Solon, one of Sparta's lawmakers, and my mother is Lydia, the strong willed.

"When a boy child is born in Sparta, he is taken out into the night and left there till dawn. If he survives the weather and the wolves, he is considered fit to be a future citizen of our great state.

"I was a sickly child, born with a clubfoot, but Mother loved me and hid me away till I was strong enough to survive; then my father used his influence.

"But even now, I know that I cannot live. They talk of me as a misfit. They say I constitute a danger to the safety of a militarized state and to the economic well-being of my fellow Spartans.

"I am afraid of what they will do. They do not understand who are not cursed of the gods.

The second speaks ridicule.

"I live in ninth-century France, the jester to a feudal lord. My sharp wit and honey'd tongue have often kept my master in a good mood. But more often it is the unwill'd contortion of me, his humped-backed fool, that keeps the court in a merry humor. I curse the shortsightedness of him and his court, for my treatment is less than of a dog. But, as the royal fool must have his flattery, this crookbacked fool must have his trencher and ale. And so I stay."

The third speaks (in an asylum) injustice.

"I own a piece of the sky. It's true that it is only a small piece—very small—and true I have no right to own anything. But I think that since no one else sees just this particular chunk of blue or regards it so constantly, it must be mine. These poor, mad devils here with me surely do not want it; they can only pluck at their chains and howl.

"Oh, don't think I really belong here with them, but it's quite customary to put crippled people in dungeons with the insane.

"I'm not bitter that I'm in here; I wouldn't be of use anywhere now. But I keep thinking about that printer's machine which brother-in-law Caxton brought from Holland; you don't need legs to set type.

"It's too late for me, but I hope that this renaissance, this rebirth of interest in the humanities, will bring also an interest in us who must remain in places like this."

The fourth, physical and custodial care, speaks eduction.

"I was born in Bremerhaven in 1820. My father could well afford the care I needed, and still do need. Shortly after my disability was discovered, he placed me here in this home in Munich which offers both care and education for the disabled."

"But there was not always this opportunity. In the last century, organized social interest in the welfare of disabled persons was barely getting underway. In 1780, for example, only one institution, in Orbe, Switzerland, offered physical and custodial care to people like me, and there was no chance for education until recently."

"I'm glad I live in this century—but all people need to do something, and I get awfully tired of sitting."

And the fifth speaks total rehabilitation.

"I am an American veteran of the Korean war. None of that sitting around for me. People of my century have realized that care and education are not enough. They know that society must prepare the disabled to become self-supporting. This realization resulted in the State-Federal vocational rehabilitation program in 1920. Since then, thousands of disabled persons just like me have become useful, productive members of their communities."

"And do you know what? They actually have surveys saying that, for many reasons, we are often more useful workers than many ablebodied men. Among other things, we are said to have greater appreciation for jobs because they are so hard for us to come by, and so we work harder to keep them. Absenteeism is less, and our accident rate is lower."

"Some companies are now hiring us exclusively, and the Federal Government is even making a policy of accepting our applications in atomic research work."

"Say, you'll have to excuse me, it's my turn to apply for that job. I surely hope my interviewer has been reading those surveys, too."

After thousands of years in the dark, humanity is just now coming into a renaissance in which prejudice, so far as physical handicaps are concerned, will be nonexistent. But our century is not yet unhampered by prejudice, nor will it be until that vet, or any other handicapped person, can walk with all confidence into an office—and come out with the job.

But it is only through our communities, through the cooperation of church and social organizations, clubs, and schools, radio, television and newspapers, and of organizations that have already discovered the value of the handicapped worker, that this achievement can be realized. There must be positive action by each segment of the community to influence every potential employer toward the conviction that it really does pay to hire the handicapped. Only when there is a universal consciousness and awareness that employment of the disabled is a community responsibility, will we truly have attained the fifth age of physically handicapped man—total rehabilitation.

Poland's Independence Day

EXTENSION OF REMARKS

OF

HON. FLORENCE P. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 26, 1957

Mrs. DWYER. Mr. Speaker, it is only fitting that we in the Congress of the United States join this week with the courageous, freedom-loving people of Poland in the commemoration of the 166th anniversary of Polish independence.

It was on May 3, 1791, that the Polish people enacted one of the first and most progressive European democratic constitutions. It was a constitution forged by a proud and devout people from the fires of rebellion against tyranny. It was a manifestation of the unconquerable spirit of a people who sent such patriots as Pulaski and Kosciusko to aid the American colonies in their fight for freedom.

And though Poland too often has felt the fury of freedom-crushing invaders, this spirit of liberty, which through the years has molded a bond of spiritual kinship between our countries, has never died.

This year there is a special significance to Poland's Independence Day which all the free world should recognize. During the past year the Posnan riots in Poland and the revolution in Hungary demonstrated dramatically the total bankruptcy of the Kremlin's policies behind the Iron Curtain.

In Poland, by raising their voices on the streets of Posnan in righteous demand for bread, freedom, and the withdrawal of the Soviet Army from their homeland, the Polish people exposed to the world the economic ruin incubated by communism.

Their demands for bread showed that Poland, under communism's collectivization experiment, was unable to feed her own people.

The demands of the Posnan workers for freedom—freedom of worship, freedom of the individual, freedom of enterprise, and freedom from fear—showed how wholeheartedly they rejected Soviet control of Poland and Communist dictatorship.

Their demands for withdrawal of Soviet troops from their soil showed that the Polish people had no desire to be a part of Moscow's military machine.

Perhaps most important, the revolt of the workers in Posnan clearly exposed the fallacy of the worldwide Communist propaganda—that communism is the rule of peasants and workers, the Utopia of the masses.

Indeed, the Posnan uprisings have brought during the past year a degree of freedom to Poland. Her people can breathe more freely. Cardinal Wyszynski, Poland's beloved anti-Communist Catholic leader, was freed from prison, and wider religious freedom was given to the people. Her pro-Moscow government was replaced by a national Communist government dedicated to Polish interests. The dreaded secret police were curbed and freedom of the press was partially restored.

The spark of rebellion against godless tyranny which flared on the streets of Posnan has, during the past year, spread to other subjugated peoples behind the Iron Curtain. Revolt exploded in Hungary. News of unrest reaches us from Czechoslovakia, Lithuania, China, and even from the Soviet Union.

In Poland, this spark of freedom has grown to a point where—for the first time since the Soviet Union took over the country—the Polish people this week will be permitted to privately commemorate, by decree of the Warsaw government, their May 3 Independence Day.

As they celebrate this day, the eyes of the Polish people are turned hopefully to the West, particularly to the United States.

This is understandable, for Poland has strong historical, cultural, and spiritual ties with the Western World. Her roots are especially deep in America, where the tide of Polish immigration through the years has served to enrich our culture in every field of human endeavor. Indeed, our 7 million Polish-Americans today can look with pride on the heritage they and their forefathers have brought to our land.

With the Polish people looking toward America for political, moral, and economic support, the Governments of Poland and the United States for several months have been seeking to negotiate some form of emergency aid.

There is no question that Poland, with its economy devastated by the years of Soviet exploitation and mismanagement, needs technical and economic assistance.

There are, however, several serious questions which must be considered in acting on such requests for assistance.

First, the Warsaw government is Communist, even though it has sought to divorce itself from Moscow control. Thus, in helping Poland at this time, would we be using our resources to strengthen Moscow and the Communist cause?

Second, would American aid to Poland at this time provoke Russian wrath against the Polish people, and lead to a ruthless stamping out by the Kremlin of the few freedoms that have been won during the past year?

These are questions which we in Congress must consider in taking action on any assistance for the Polish people.

But we also must consider, with open minds, the other side of the story; we cannot close our hearts and our minds to these facts:

Poland's 28 million people, who turn to us now in their time of need, are unshakably Catholic, proudly nationalistic and bitterly anti-Russian. They have no common bonds or sympathies with the Kremlin, nor with the 1,500,000 members of the Polish Communist Party who ruled their lives with blueprints supplied by Moscow.

They are, however, trapped by geography. Poland is encircled by the Soviet Union's military and political bloc. Successful armed rebellion is impossible. But, in the long view of history, the Communist system of government forced on Poland by the might of the Russian army is only transitory. Poland as a nation successfully rejected Russian subjugation in the past; and, with the devotion to freedom of the Polish people, she will overcome Communist oppression this time.

Already, Poland has won back certain of these freedoms. Given more time, and moral as well as material support, I believe the Polish people eventually will move farther and farther along the road to complete independence.

There is no doubt that this situation involves certain calculated risks. The Polish people, who have aroused Russian antagonism to a breaking point, already have taken a risk by turning to us for help. If we turn our backs on them, we—in turn—will be facing the risk of forcing the desperate Polish people to turn back to the Soviet orbit for help, and thus sealing off the first critical fissures in the Iron Curtain.

As I stated recently in an address before the Polish National Alliance Women's Department in Chicago, I do not believe that we can afford to be too impatient, or too demanding, as much as our hearts weep for the people of Poland. I believe, for the welfare of our own people and for the people of Poland, that we must proceed cautiously.

I believe—as President Eisenhower believes, and as he and the State Department have clearly indicated—that we should take cautious steps to strengthen Poland's independence. I believe, in weighing both the good and the bad factors, that it is essential to extend to the Polish people a judicious measure of the aid they need so desperately.

If the giving of such aid will help the Polish people pry themselves loose from the Soviet grip, and to develop a society along their own lines, it will be worth the price. If American aid assists or speeds the process of liberalization, it will be the cheapest and most effective—as well as the most humane—offensive the United States can mount in the cold war.

It is my hope that, in observing Polish Independence Day this year, the Congress not only will extend expressions of sympathy and friendship, but also will take steps toward the formulation of a policy which can bring about eventual realization of the dream of freedom that has been reborn behind the Iron Curtain.

The Blue Ridge Parkway

EXTENSION OF REMARKS

OF

HON. CHARLES RAPER JONAS

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 30, 1957

Mr. JONAS. Mr. Speaker, under leave to extend my remarks in the Appendix, I include the following joint resolution which was recently adopted by the General Assembly of North Carolina:

Senate Joint Resolution 234

Joint resolution memorializing the Secretary of the Interior to issue a directive terminating plans for expansion of certain facilities on the Blue Ridge Parkway, and petitioning the members of the North Carolina congressional delegation to assist in securing such directive

Whereas the National Park Service has announced a 10-year program contemplating the expenditure of $4 million for the expansion of tourists' accommodations on the Blue Ridge Parkway; and

Whereas representative organizations and citizens in towns and communities adjacent to the Blue Ridge Parkway in North Carolina have conducted a survey and study of existing facilities for lodging and eating, located conveniently for serving parkway tourists; and have determined that such existing accommodations, built and operated by private capital, are sufficient in quality and adequate in number to properly serve the traveling public in this vicinity; and

Whereas the expansion program of the parkway service would amount to an unfair and unjust competitive advantage against private enterprise, when such additional accommodations on the parkway are not justified, or essential; and

Whereas there appears to be a need for the posting of information and directions

on the parkway, so as to acquaint the parkway tourists with the location of available tourists' facilities and accommodations; and

Whereas a great segment of the economy of the northwestern portion of North Carolina, as well as State revenues, would be seriously impaired and adversely affected, if the referred to $4 million expansion program on the parkway becomes a reality; and

Whereas the North Carolina Highway and Public Works Commission acquired, by purchase and otherwise, at the expense of the taxpayers of North Carolina in excess of $1 million, the right of way through the State of North Carolina, for the building of the Blue Ridge Parkway and gave said right of way, without compensation, for the use of the National Park Service in the construction of said parkway: Now, therefore, be it

Resolved by the senate (the house of representatives concurring):

SECTION 1. That the General Assembly of North Carolina do memorialize the Secretary of the Interior of the United States to issue a directive to the National Park Service to cease and desist from its announced expansion of concession facilities on the Blue Ridge Parkway within the confines of the State of North Carolina, until such time as it has been clearly demonstrated and definitely established that private enterprise is not supplying the parkway traveling public with sufficient and adequate accommodations in the form of overnight lodging and eating facilities.

SEC. 2. That North Carolina's 2 Senators and 12 Congressmen be respectfully petitioned to request the Secretary of the Interior to issue the directive referred to in section 1 hereof.

SEC. 3 .That copies of this resolution and the record of its adoption be transmitted to the Secretary of the Interior of the United States and the 14 Members of the North Carolina congressional delegation.

SEC. 4. This resolution shall be in full force and effect from and after its ratification.

In the general assembly read 3 times and ratified, this the 24th day of April 1957.

L. E. BARNHARDT,
President of the Senate.
J. K. DOUGHTON,
Speaker of the House of Representatives.

Examined and found correct.

PAUL STONER
(For Committee).

Senator Byrd's Service

EXTENSION OF REMARKS
OF
HON. WATKINS M. ABBITT
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 30, 1957

Mr. ABBITT. Mr. Speaker, under leave to extend my remarks, I would like to call attention of the Members of the House to a fine editorial which appeared in the Mobile Register, of Mobile, Ala., on April 9, entitled "Senator BYRD's Service."

This editorial refers to my recent insertion in the CONGRESSIONAL RECORD which included Senator BYRD's excellent speech before the Richmond, Va., Kiwanis Club in which he pointed to many of the dangers which face our people as a result of Federal encroachment on the rights of our people. Nationwide recognition has been paid to the Senator's valiant efforts in behalf of economy and the preservation of our way of life.

I wish to include herewith the Mobile editorial as I feel it pays fine recognition to a truly great American and one whose worth to the Nation will never be fully realized in our time.

The editorial follows:

SENATOR BYRD'S SERVICE

One of his home State colleagues in Congress has said some highly complimentary things of United States Senator HARRY F. BYRD, of Virginia.

Representative WATKINS M. ABBITT, praising the Senator as one of the outstanding Americans of today, also said this of him:

"The people of America are fortunate, indeed, to have in the United State Senate during these trying times a man who is dedicated to the preservation of the American way of life; a man who is fearless, courageous, and willing to make whatever sacrifices are necessary to try to steer our ship of state back on the course charted for it by our Founding Fathers."

Countless numbers of Virginians and other Americans will give immediate endorsement to these words of tribute to the senior Senator from the Old Dominion State.

Senator BYRD qualifies as a real statesman. He has rendered and continues to render distinguished service—priceless service—to the people of the United States.

This country could use, and indeed urgently needs, many more men of his stature in public life.

With the forthrightness that is characteristic of him, Senator BYRD struck powerful blows at the invasion and usurpation of States rights in a recent address in Richmond.

Much of what he said on that occasion holds particular interest to the South because its traditional racial customs are endangered by political decisions of the United States Supreme Court and threatened by so-called civil rights bills now before Congress.

"Strike down the power of States to control their own affairs, and concentrate all power in Washington, and you strike at the heart of what makes this Nation great," Senator BYRD warned.

In commenting on the United States Supreme Court decision against racially segregated public schools, the Senator said:

"To me the decision of the Supreme Court abolishing segregation and compelling integration in State and local public-school systems was a vicious and destructive invasion of States rights.

"It set aside all previous decisions by the Supreme Court on the subject. * * *

"This vicious recent decision did violence to State constitutions and laws, and even to Federal laws which provided segregation in the District of Columbia schools. * * *

"It would strike down a way of life in the United States which has been developed over a period of 160 years and, if enforced, it will destroy our great public-school system."

Senator BYRD was equally outspoken in expressing his opinion of the pending civil-rights bills, which he denounced as punitive legislation to punish the South.

He especially called attention to a bill that would establish in Washington a special bureau which would send its agents into the South and originate suits against southerners.

When agents of this anti-South bureau originated cases against southern people, he said, "they would be tried in Federal courts without jury, subjected to contempt of court proceedings, and so forth."

As his fellow Virginian, Congressman ABBITT, pointed out, Senator BYRD understands well the necessity of preserving the rights of the people and the sovereignty of our States.

Moreover, he is a stalwart, active figure in the struggle to preserve these cherished and vital blessings. His service in this cause alone has been such as to give him the eminence of statesmanship. His service has been outstanding in other respects, too, however. A particularly notable example has been his fight for sound fiscal practices in the Federal Government.

Senator BYRD's work in behalf of the country and its people has earned for him all the acclaim he has received, and much more.

Airlines Offer Own Safety Plan

EXTENSION OF REMARKS
OF
HON. ALBERT H. BOSCH
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 9, 1957

Mr. BOSCH. Mr. Speaker, all of the evidence accumulated over the years clearly indicates that action is necessary to protect the air traveler as well as the people who live in the areas surrounding our large airports. It is interesting to note that since the drive by the Government to perfect the safety regulations as well as to prevent violations of Civil Aeronautics Administration and Civil Aeronautics Board regulations private airlines recognize that there is a definite need for revision and amendment; yes, and even legislative action to bring about greater safety rules for the heavily traveled air routes, particularly in the cities surrounding large airports.

Mr. Speaker, in my congressional district is located the world's largest international airport, to wit, Idlewild. I have, under date of January 14, 1957, reintroduced three bills which, in my considered opinion and as a matter of record from the hearings had on similar bills during the 84th Congress, would go a long way in bringing about greater safety and also demonstrate that Congress is willing to assume the responsibility for the welfare of the people who live in the vicinity of such airports. I urge early action on H. R. 2854, H. R. 2855, and H. R. 2856.

Under leave to extend my remarks, I include a release from the United Press regarding plans proposed by the Nation's scheduled airlines:

AIRLINES OFFER OWN SAFETY PLAN—CONTROLS PLANES ABOVE 9,500 FEET

WASHINGTON, April 29.—The Nation's scheduled airlines jumped the gun on the Government today and proposed their own air-safety rules for the world's most heavily traveled area—the golden triangle of New York, Washington, and Chicago.

The proposed rules would go into effect July 1, far in advance of similar air traffic control plans announced by Federal officials. The industry pilots' proposal was drawn up by experts of the Air Transport Association and the Airline Pilots Association, the 12,000-member pilots' union.

MUST FOLLOW AIRWAYS

If approved by the airlines involved and the ALPA executive board, the plan would:

Require all scheduled airline flights in the triangle to operate on insrument flight rules (IFR) above 9,500 feet, thus putting them under monitoring and guidance of Federal air-traffic control centers.

Ban off-airways flights in the triangle for airliners flying above 9,500 feet. This would put every flight above that altitude into federally designated airways.

Require every crew flying the triangle to file flight plans with traffic-control centers for trips to be made at a 9,500-foot altitude or higher.

VISUAL FLIGHT IN CLIMBING

Permit pilots to fly under visual flight rules only when climbing or descending to and from the 9,500 altitude. (VFR allows pilots to fly at any altitude so long as visibility remains good and places on them the burden of avoiding other traffic.)

Present Civil Aeronautics Administration rules require mandatory IFR flights only for planes above 24,000 feet. The CAA hopes to lower the ceiling to 15,000 feet early in 1958 for the entire country and for military and private aircraft as well as commercial.

The President's Aviation Facilities Planning Group has envisioned all traffic above 10,000 feet as operating in controlled airspace by 1965.

The ATA-ALPA plan in effect would speed up portions of the Government's own air safety plans affecting commercial planes by at least 6 months. The industry pilots group which worked out the triangle proposal said the CAA could handle the increased number of instrument flights with its present equipment and personnel.

Little Chamber Orchestra of Portland, Oreg., To Give May Day Concert

EXTENSION OF REMARKS
OF
HON. EDITH GREEN
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mrs. GREEN of Oregon. Mr. Speaker, on Wednesday evening, May 1, Members of Congress and their staffs, Government officials, and the people of Washington are cordially invited to attend a concert by the Little Chamber Orchestra of Portland, Oreg. The May Day concert will be held at the Department of Agriculture Thomas Jefferson Memorial Auditorium, 14th and Independence SW., and will start at 8 p. m.

The Little Chamber Orchestra represents an outstanding cultural achievement of my city. Following their Washington concert the orchestra will board an Air Force plane for Europe and start on their international good will concert sponsored by the Department of State and the Department of Defense. While in Europe the Little Chamber Orchestra will participate in the famed Bergen Music Festival and will visit some 16 European and African countries in 2 months.

The 16 all-woman orchestra under the direction of Boris Sirpo, has won international fame during their last two Government-sponsored international tours. Time magazine described their 1955 overseas tour as the triumphal tour—the kind of stuff that winsome movies are made of—they played with fire and discipline that astonished their listerners—and played everything without a sheet of music.

Sixteen talented young women musicians make up the chamber orchestra, and the young women range from 17 to 29—the majority of them are students at one of the six colleges in Portland.

The distinguished music critic of the Washington Post and Times Herald, Paul Hume, in his column in that paper of April 29, describes the forthcoming concert as follows:

This Wednesday at 8 p. m., in the Jefferson Auditorium of the Agriculture Department, the Oregon State Society, with pardonable pride, announces a concert of superb chamber music to be played by the Little Chamber Orchestra of Portland, Oreg. Under the direction of Boris Sirpo, the all-girl orchestra lists music by Geminiani, Vivaldi, Stamitz, Dittersdorf, Bach, Tansman, Bartok, and Paul Juon. This is a fine list, and the program is open to the public without charge. The young ladies have visited abroad in previous years, and their concert here is the beginning of another international tour, under the auspices of the Departments of State and Defense.

On behalf of myself and the other Members of the Oregon congressional delegation, I extend an invitation to the concert. I am sure that those present will be rewarded by an outstanding evening of music.

A Joint Resolution Requesting the Federal Government To Refrain From Enacting New Grant-Aid Programs and To Reexamine All Such Existing Programs

EXTENSION OF REMARKS
OF
HON. CHARLES RAPER JONAS
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. JONAS. Mr. Speaker, under leave granted to extend my remarks in the Appendix, I include the following resolution which was recently adopted by the North Carolina House of Representatives. The secretary of state advises me that this resolution is still pending in the State senate. The fact that it was adopted by the house of representatives indicates its importance, and I include it for the information of the Members:

Whereas the State of North Carolina stands high among the States in the payment of taxes to the Federal Government; and

Whereas through Federal grant-in-aid programs the Federal Government by extravagant and unnecessary spending is forcing North Carolina also to spend extravagantly to match and thus obtain back part of its own money; and

Whereas North Carolina citizens pay income and other taxes which go to Washington and are returned in part to North Carolina under Federal grant-in-aid programs in amounts reduced by bureaucratic overhead, creating the false impression that the State is getting something for nothing; and

Whereas in returning funds to North Carolina the Federal Government ties strings to the use of these funds which interfere with local government, complicate the enactment of State legislation and force the State to spend in fields it believes unwarranted; and

Whereas it is common knowledge that local projects financed in part by Federal funds usually cost excessively because of unnecessary Federal requirements; and

Whereas the North Carolina Legislature feels that its citizens know better than the Federal Government how to spend the citizens' money and that local government is more capable and efficient than the Federal Government in managing local programs: Now, therefore, be it

Resolved by the members of the North Carolina Legislature in the 1957 session assembled:

SECTION 1. That the Federal Government refrain from enacting new grant-aid programs and reexamine all such existing programs and end or reduce their costs wherever possible.

SEC. 2. That copies of this resolution be transmitted to the President of the United States, the Vice President of the United States as President of the Senate of the United States, to the Speaker of the House of Representatives of the United States, and to each Member from North Carolina in the Senate of the United States and in the House of Representatives of the United States.

SEC. 3. That copies of this resolution be transmitted to the presiding officers of the legislature of the other 47 States for their information and consideration.

SEC. 4. That this resolution be in full force and effect from and after its ratification.

Why A. T. & T. Should Split Its Stock: An Address by Judge Jonah J. Goldstein

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. ANFUSO. Mr. Speaker, my good friend, Judge Jonah J. Goldstein, is known far and wide as a leading citizen of New York, an able scholar in the law profession for over a half century, and one who graced the bench in New York for about a quarter of a century and distinguished himself as a great jurist. He is also well known for his activities as president of the Grand Street Boys' Foundation.

At the annual meeting of the stockholders of A. T. & T., of whom he is one, Judge Goldstein delivered a very enlightening address in support of the proposal to split up the company's stock at the ratio of 4 for 1. At this meeting, held on April 17, 1957, Judge Goldstein brought out many points which should be of great interest to management and businessmen in general, to shareholders, to labor, and to the public at large.

Let me refer very briefly to only a few of these points:

That there are no employee representatives on the company's billion-dollar pension fund;

That millions of dollars are spent in useless and extravagant advertising;

That if management were more interested in saving than in spending, there

would be more dividends to stockholders and less need for increased rates to the public.

Mr. Speaker, I believe it will be in the public interest to reprint this address in the RECORD, and I invite all my colleagues to read it. Under leave to extend my remarks, I request that Judge Goldstein's address be inserted in the RECORD.

The address follows:

REMARKS OF JONAH J. GOLDSTEIN, PRESIDENT OF THE GRAND STREET BOYS' FOUNDATION, AT ANNUAL MEETING OF A. T. & T., APRIL 17, 1957

Because of time limitation, I can only touch the high spots and ask you to think before you vote.

If you summarize management's objection to the proposal of the Grand Street Boys' Foundation for a 4-to-1 stock split, it amounts to "vote against, because father knows best."

Management urges us to have faith and confidence in the officers and directors.

Confidence and faith does not mean that we should blindfold ourselves, thus losing sight of what is going on.

A. T. & T. directors and officers are just human men of business, subject to human frailties.

Their self-imposed halos are too tight and interfere with their thinking as to what is best for shareholders, whose servants they should be, instead of playing the role of masters, whose decisions cannot be questioned because "father knows best."

Tradition in business is not sacrosanct. If it were, we would be in the horse-and-buggy stage instead of the automobile and the jet-plane age.

We, the share owners, and not the officers and directors, are legally and morally entitled to the role of "father knows best."

There is no reason why a person who wants to invest $5,000, $10,000, or $15,000 in A. T. & T. stock should have to be an odd-lot buyer, paying one-fourth point more when buying and getting one-fourth point less when selling. An odd-lot buyer is one who buys or sells less than 100 shares.

Management urges us to have confidence in them and to vote against the suggested 4-to-1 stock split. As Governor Smith, whose secretary I was in 1911, so often said, "Let's look at the record." The record shows the total ownership of the 19 directors to be 6,459 shares—fewer shares than they held last year. They were given rights to buy, as were we, but they sold the rights, instead of increasing their holdings. Does this show their confidence in the stock?

The notice sent us for this meeting shows that our company has 19 directors, including officers. Of these, there are 12 each of whom owns less than 200 shares.

The president, Mr. Kappel, who has been with the company for many years, owns 161 shares. Does this show confidence in the shares they manage and through which they seek to perpetuate their control?

Mr. Page, a director for 24 years, owns 170 shares. In addition to his director's fees of $12,800 for 1956, he also gets $25,000 a year as a consultant. Do his small holdings show confidence in A. T. & T. stock?

Mr. Parkinson, a director for 17 years, who, the press reported, resigned as president of Equitable Life when he was criticized for giving Equitable Life advertising to his son, owns 130 shares. Does this show his confidence in A. T. & T. stock?

A quick glance at the notice of the annual meeting sent to each one of us will show how often this lack of confidence in our stock is reflected in the directors' small ownership of A. T. & T. stock. Clearly, their stock holdings give them little interest in the dividends they receive from such little holdings.

These self-assumed criers of "father knows best" tell us, the shareholders, that a stock split "could encourage speculation and be damaging to its investment character."

Cleo F. Craig, chairman of A. T. & T.'s board, is also a director of United States Steel, which has split its stock several times. Why did he vote for the stock split in United States Steel and against the split in A. T. & T.?

Are the directors of General Electric, Standard Oil of New Jersey, General Motors, Bethlehem Steel, Sears, Roebuck, and General Telephone & Telegraph nitwits and incompetnet directors, when they split their stock not once, but several times?

General Telephone & Telegraph, a midget, compared to the giant A. T. & T., split its stock and its dividends have risen from 55 cents a share to $1.80—more than a 300 percent increase in 18 years, while A. T. & T. has not increased its dividend in 35 years and never split stock.

With our money, the New York Telephone Co., owned by A. T. & T., ran paid ads, headed "It's Happened Since 1940."

Box No. 1 of that ad, showed that wool suits are up 124 percent.

Box No. 2 that potatoes are up 131 percent.

Box No. 3 that bread is up 130 percent.

Box No. 4. "But the price of phone service is up 20 percent."

There should have been a fifth box, devoted to the forgotten shareholders, whose dividends are now the same as in 1940, in fact, the same since 1922.

All of us know how much less $9 will buy in 1957 than in 1922.

You drop a dime instead of a nickel into the coinbox to make a telephone call, the income to A. T. & T. is doubled, the officers' salaries and pensions are increased but the shareholder is told, by the self-designated "Father knows best": "We, your guardians, are running your company, in your interest, and it is to your interest that you get in 1956 the same $9 as you did in 1922." This does not make sense.

As human beings, with human frailties, directors, with few shares, will profit in other ways than by dividends. It is cheaper and better for them, but not for the shareholders.

No one is ever a loser because he is a director of A. T. & T., or any other large corporation. It ill becomes them to play the role of self-sacrificing citizens, battling to continue to serve at personal sacrifice.

We are told by "Father knows best" that it is better to have directors owning few shares, than directors with substantial holdings. Th ereason that "Father" gives is that he thinks it is more desirable to have directors who, because of small holdings, will be thinking impersonally in making company decisions. In the language of Governor Smith: "bologny is bologny, no matter how thin you slice it!" Small ownership of stock by directors is as bad as absentee landlordism. As owners of few shares, they are not interested in what you or they get as dividends. Perhaps they profit in other ways, such as directors' fees, steering large loans to A. T. & T. and Western Electric from favored banks, placing advertising, etc.

A. T. & T. and Western Electric, which it owns, carry large bank balances, on which no interest is paid, but pay interest on bank loans. Banks prosper through interest on good bank loans—their profit is the difference between what they pay and what they get. I repeat, no one is ever a loser because he is a director at A. T. & T., or any other large corporation.

We are asked to have blind faith in these directors, who, since 1913, have syphoned out over $2¼ billion for a pension fund. I repeat, billions not millions. These 2¼ billion came out of earnings that did not go to shareholders.

The only reference, by management, to pensions in the notice of the annual meeting, is the following:

"The pension plan applies to all employees alike. The proposed ceiling ($25,000 a year) would seriously reduce the incentive of younger people in the business."

In the language of the sidewalks of New York: "Who's kidding who?" and, I add: "Quit your kidding!"

How can anyone seriously urge that younger people in A. T. & T. would not regard a salary, such as Mr. Craig's, of $257,200, plus the suggested limit pension of $25,000 as an inadequate incentive?

Mr. Gifford gets a pension of $91,700, less one-half of his social security. The retired employee, getting an A. T. & T. pension of $150 a month, who earns over $100 a month elsewhere, has deducted from his A. T. & T. pension, the same one-half of his social security, even though he gets no social security, because he has implemented his small pension with outside earnings. This is an A. T. & T. deduction, not a Government deduction. This kind of equality is like comparing half of a flea to half of an elephant and raises serious questions of the morals and ethics of this A. T. & T. practice of short-changing old-timers' small pensions this way. I do not object to employees' pensions; my objection is to pensions of $91,700 a year, necessitating large sums taken from earnings to provide for such extravagant pensions.

There is no employee representative on the 2¼ billion pension fund. It is just as wrong for management to be in sole control as it is for labor to be in sole control, and this warrants a look-see by a Senate watchdog committee.

Blind faith is asked in those who run business so autocratically and, to a large extent, for the collateral benefit of themselves and not the stockholders.

Many millions are spent yearly in useless and extravagant advertising. The standard commission for placing advertising is 15 percent. Who gets this commission? Does a company without competition, which has a legal monopoly, require a coast-to-coast television program, Telephone Time, the cost of which, in 1956, was $3,645,928? (This figure is not a guess; it was supplied to me in writing by S. Whitney Landon, the secretary of our company.)

These television broadcasts have nothing to do with telephones. One of them recently was on the life of the ex-prizefighter Benny Leonard. The television drama on March 31 was about a commandant of a 17th century Canadian fort in Indian Territory, jokingly leaving his teenage daughter in charge when he traveled to Montreal. Why waste this money, or is it because some favored one gets the commission?

Expensive, full-page ads appeared in the Saturday Evening Post and other expensive advertising media, telling what Western Electric manufactures. These ads are a waste of A. T. & T. shareholders' money, because Western Electric's only customers are A. T. & T. and the Government and any waste of Western Electric's funds reduces Western Electric's profits, all of which goes to A. T. & T. The Western Electric advertising in 1956 cost $1,440,000. This figure was supplied to me, as was the expense item of the television program Telephone Time, by the secretary of our company.

The annual report, on page 30, lumps advertising, with costs of business relations with customers, public telephone commissions, etc., all in the sum of $529,811,847—over a half a billion of good money.

I have mentioned but two items of wasteful advertising, totalling over $5 million. There is, undoubtedly, more extravagant and useless advertising, on which a commission is paid. There is no legitimate excuse for such extravagant waste.

If father knows best, let him tell us. Why this waste?

The majority of stockholders are women and there is no sex to brains. There are smart women, as well as smart men.

If father knows best, why hasn't he kept pace with the times, by putting a woman on the board of directors?

Now as to competent and good-thinking management, why did not management spin off Western Electric from A. T. & T., by giving A. T. & T. shareholders shares in Western Electric, instead of doing what they did?

Western Electric is wholly controlled by A. T. & T. When Government complained about this, management entered into a consent decree, giving up valuable exclusive, Western Electric and A. T. & T. patent rights and limiting its business to A. T. & T. and Government.

Under the law, Western Electric is not controlled as to profits and earnings. Separating Western Electric and A. T. & T., by giving A. T. & T. stockholders shares in Western Electric, would have satisfied the Government and benefited the A. T. & T. stockholders. "Father" knowing best, did not even consult the stockholders, but did it on its own. "Father" thought it best to control Western Electric, instead of turning it over to A. T. & T. stockholders. At least, management, owning 6,459 shares, should have consulted all shareholders, for their opinion, before taking the action it did. There was no hurry since the Government suit was started in 1949 and the agreement was not concluded until January 24, 1956 (7 years later).

In passing, I urge that management look into the sale of new and good useable material, which is being sold as junk by companies that make up A. T. & T. I am assured such investigation will result in substantial savings.

A dollar saved is as good as a dollar earned.

After being a judge for 25 years, I get a pension. During my 25 years of service, I had a choice of paying into a pension fund, or passing it up and getting more salary. I paid into the pension fund each of those 25 years.

Mr. Gifford, who gets $91,700 as yearly pension, did not pay 1 cent into the pension fund.

The Annual Report tells us that over $162 million were taken out of 1956 earnings and transferred to the Employees' Service Pensions Fund. If extravagant pensions, like $91,700, were not given, there would be no need for taking out of earnings so stupendous a sum of over $162 million in 1 year.

We, the shareholders, pay for these extravagant pensions and, unnecessary, wasteful, advertising. The more millions wasted, the less there is for dividends. The less waste, the less need there will be for increased rates. Waste can profit no one, except those who handle the waste.

In my 25 years as a judge and over 50 years as a lawyer, I have had experience in checking facts. By studying the surface facts, it is my considered opinion that management, if it were more interested in saving, than in spending, there would be more dividends and less need for increased rates.

I know, as well as "Father" does, that a 4-to-1 stock split does not in and by itself increase dividends. It is the first step in that direction so that "Father" will learn that he is not infallible about knowing best.

We, the stockholders, should refuse to be treated as incompetents or infants.

If the directors won't take their halos off, let us do so and thus remove the interference with constructive thinking for shareholders' benefit.

The 1957 Fact Book, issued by the New York Stock Exchange, lists 85 stocks on the New York Stock Exchange which split 5 for 1, 4 for 1, 3 for 1, 2½ for 1, and 2 for 1 in 1956.

If stock splits were good enough for General Electric, General Motors, United States Steel, Bethlehem Steel, Crucible Steel, Standard Oil of New Jersey, General Telephone and Telegraph and many others, then there is no valid reason why our A. T. & T., long overdue stock split, should be longer delayed.

Spring is here. Housecleaning is in order. Let's start by sweeping away the cobwebs of "no splits for A. T. & T."

Out of Bondage—One by One

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 30, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a very thought-provoking editorial which appeared in the Christian Science Monitor, Boston, on April 29, 1957.

The editorial follows:

OUT OF BONDAGE—ONE BY ONE

(By Carlyle Morgan)

WEST BERLIN.—"Coexistence" has a strange and faraway sound in these barracklike rooms with cold green walls and battered desks where refugees from East Germany seek acknowledgment of their citizenship in the West German Federal Republic. So does talk about the Soviet "smile." It is not simply a matter of these things having ended with the suppression of the Hungarian revolt. Many of the stories that unfold here, ordinarily before a trio of West German inspectors, began before the genial-looking Mr. Khruschchev came to power. They have continued since, apparently unaffected in their courses by the changes of regime at Moscow.

Here is one such story, of a man who looks like and thinks like and could be one of your next-door neighbors.

Let's call him Fred, as friends might in the United States or Britain. To use his German name might endanger the family he has left behind in Communist-ruled East Germany.

Fred is one of the more attractive refugees waiting clearance at this camp in West Berlin. His strong, intelligent face, with somewhat irregular features and alert gray eyes, supports his statement that he was a teacher in the Eastern Zone when the Communists took over. His big, brawny hands confirm his further testimony that he has since worked as a common laborer.

But Fred has known a still more rigorous schooling. He served a prison sentence of 4 years with hard labor and is one of the few jailed refugees who managed to keep the actual document in which the Communist authorities indicted him. To western eyes this reads like a cruel fantasy.

Originally Fred had been charged with conspiring to send plans of an important industrial establishment to West Germany. When the East German authorities could not make this stick, they charged him with generalities such as antisocial attitudes and criticism of the regime, collaboration with imperialists, and so forth. For this Fred got a presumably lighter sentence than he would have for the original charge.

How did Fred get into so much trouble? The authorities at the camp must get these things clear.

Well, in the first place, Fred was one of those schoolteachers who found it hard to give a Marxist slant to their classroom work, or to grade examination papers according to the students' adaptability to Communist indoctrination. Pressed to do this, he gave up his post and got the only other job he could—heavy manual labor.

In search of better pay he moved to another equally heavy line of work. There his education caused him to recognize a condition and report it to the management and he was promoted to the theoretical department of the industry. Here unfortunately his knowledge brought him into conflict with the views of some of the managers who were Communist appointed. And what began as a professional argument soon took on political significance.

As Fred talks to the West German inspectors his eyes brighten, his powerful hands move easily and surely with the gestures he must have used often in his classroom. The questioning now centers on one curious thing about his case: He stayed in East Germany for a whole year after being released from prison. Why did he not come to West Berlin sooner?

Fred points out that he had always lived in the eastern part of Germany, near the town where he taught school and later worked as a laborer. His family and only friends live there. His children have playmates there. To uproot the family would mean taking the risk of not being able to find work readily in a new environment, of being caught by border guards, and of exposing his wife and children to penalties.

So, for the sake of his family he had kept quiet and gone on with his work for the last year.

"Then why," asks an inspector, "have you come to West Berlin now?"

Because, Fred explains, he had been going to pieces under the unremitting pressures he felt upon him in his home town. He dared not talk to anyone at work or in the street or shops. Yet people—were they friends or not?—constantly tried to engage him in conversation and to ask his opinions, about his work, about the regime, about the news. Then the mayor of his town began to act in a way that indicated he knew Fred was being watched by the authorities.

Not only was there no future for Fred or his family in East Germany any more—Fred began to fear more and more that he would be arrested again on nobody could guess what charges.

It was Fred's wife who had clinched the decision that he should go to West Berlin. She had pleaded with him to go because she felt he was losing all self-respect, all confidence as a man, and was indeed approaching a total breakdown.

At last Fred had agreed with his wife that he should go to West Germany and that when he had found work there the family should try to reach him.

As Fred finished his testimony his eyes searched the faces of the inspectors as if to see if he had made any statements that might go against him. He seemed to expect cross-examination and to fear ridicule. When the inspectors kindly told him to leave the room so they could consider his case, which to them seemed a worthy one, he suddenly burst out crying and hurried into the hall.

By the time he was called back to hear the inspectors' decision he had composed himself and received the good news with a somewhat bewildered gratitude that was still not lacking in dignity.

For more than 10 years now the flow of refugees through this chink in the Iron Curtain has continued. They come to the camp as a rule with no possessions of any kind. Even to travel on the subway from East Berlin to West Berlin with baggage would probably cause detainment by the Communist authorities. So the refugees travel with it, often 1 by 1, among the

Berliners on their way to and from work between the two sectors of the city.

That may be how Fred's family will come to him later, maybe 1 by 1, on the last stage of a perilous journey to freedom, and to a haven for their self-respect and individuality.

Critics in Glass Houses

EXTENSION OF REMARKS
OF
HON. GEORGE M. RHODES
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. RHODES of Pennsylvania. Mr. Speaker, under leave to extend my remarks in the Appendix, I include an article by Mr. Al Hayes, president of the International Association of Machinists and chairman of the AFL-CIO ethical practices committee. Mr. Hayes discusses the problems posed by recent revelations of the Senate investigating committee and suggests a number of steps which can be taken to assist the labor movement in its fight against crime and communism. The article, which appeared in the April 25, 1957, issue of the Machinist, is as follows:

CRITICS IN GLASS HOUSES—LABOR'S WAR AGAINST CRIME AND COMMUNISM

The present leadership of the AFL-CIO is dedicated to the task of doing everything within its power to rid itself of all corrupting and perverting persons and influences and of maintaining itself upon the high ethical plane which its very nature demands. I say this without reservation and without equivocation. At the same time, I maintain that the labor movement has cause to be critical of other segments of our society in their attitudes and activities which bear directly or indirectly upon the question of ethical practices within the labor movement.

First of all, I am extremely critical of many spokesmen from business and industry, from the public press and from high places in Government for their attitude toward corruption in the labor movement. I would remind many of them of the old admonition about the danger of people living in glass houses throwing stones.

UNCONCERN FOR OWN HOUSES

Perhaps moral indignation, like charity, should begin at home. Corruption, as I have noted before, is a disease which infects society at large, and its manifestation in the labor movement is merely a part of the total picture. I cannot accept with good grace much of the criticism which emanates from others who show far less concern for cleaning their own houses than the labor movement has shown.

What shall we say, for example, of a labor critic from industry when recent events show that a leading corporation has been making use of the services of a keeper of call girls for the entertinment of its sales force and to assist them in making sales to prospective customers?

What shall we say of embezzlement of hundreds of thousands, yes, $1 million or more, on the part of industry, which scarcely gets mention in our Nation's press?

By what right does a member of the medical profession condemn labor in view of the medical profession's record of mercenary diagnosis and treatment, commercial operations, and fee splitting? And the legal profession is hardly in a position to criticise anyone with its ambulance chasers, collusive deals, and exploitation of misery and misfortune.

By what authority to the editors and publishers of the public press pontificate on matters of high morals when their loose, and sometimes deliberate, mishandling of news stories blackens the reputation of innocent people, causes the crowd to prejudge the guilt of alleged criminals, and condemn its defamed victims to a choice between a miserable existence or a self-shortened life?

And by what constitutional authority do holders of public office attain the right to condemn others when many of them have reached their present position by subterfuge, slander, and sellout?

Organized labor in America desires the cooperation of the community at large in the important job of weeding out the racketeers and Communists which still remain within its ranks.

But I strongly doubt the sincerity of many of those who make evidence of alleged misdoing in the labor movement an excuse for high moral indignation and public abuse. They have no desire to aid labor in its determination to set and maintain high ethical practices in its official family. They are interested only in seizing upon those cases of corruption and communism which are uncovered, exaggerating them and proclaiming them abroad in an attempt to defame and weaken organized labor.

What can others do to assist us in maintaining high ethical standards?

First of all, society in general can attempt to adopt a more objective attitude toward labor's ethical problems. As long as certain segments of our society persist in misusing examples of wrongdoing in the labor movement to smear organized labor as a whole and to cultivate within the general public a false concept of labor's place in our society, our job is made more difficult and our opportunities for continuing to contribute to the general welfare and progress of our country are being undermined.

Second, a great contribution can be made to labor's particular problem by a more widely expressed concern with corruption, racketeering, communism, etc., in general. It is unreasonable to expect the labor movement, or any other single group in our society, to maintain a clean house when society at large is infected. But for some unknown reason labor officials are judged differently than industry or business officials.

A $50,000 or $150,000 salary for an official of business or industry is a sign of success, but a $35,000 to $50,000 salary for a union official is considered "milking the union."

A man is not born to office in the labor movement; indeed, he is not born to membership in a labor union, and often his character is molded and his habits are formed long before he even applies for membership. He is a product of the local society into which he was born and in which he grew, and usually his conduct as a union member and later as a union official is a reflection of his early social and economic training. If he does wrong, he reflects discredit upon the office with which he was entrusted, but it was not the office which corrupted him.

The labor movement does not corrupt, it has been corrupted. Labor is determined to rid itself of the corrupting elements and it will do the job in spite of those hypocritical, self-appointed critics who gleefully grasp every opportunity to besmirch its name and character.

We do believe that management, the public press, and legislative investigating committees can make certain changes in their current atttiudes and activities which will assist labor greatly in the job of establishing and maintaining high standards of ethical practices in the conduct of its affairs.

HOW MANAGEMENT CAN HELP

Management has an important part to play. Many of the undesirable elements and practices which have crept into the labor movement are the direct results of management's activities. Historically it is a fact that corrupt and racketeering individuals have been deliberately planted in labor unions by employers, for the purpose of weakening the ability of their employees to bargain collectively.

More important, some of management's extreme tactics in seeking to prevent organization have given the gangster element an opportunity to gain positions of leadership in unions as a defensive measure. And I am sorry to say that management frequently shows a preference for dealing with the type of labor leader who ridicules democratic procedures and is inclined to corruption or communism. The highly cooperative attitude of Communist-dominated unions during the wartime alliance of the United States and the Soviet Union seemingly endeared such leadership to some employers, and the protective attitude of such employers has been a serious impediment to the labor movement in ridding itself of Communists in high places in some unions.

Other managements have seemed to prefer doing business with the dictatorial type of union leader. The type who doesn't bother with such democratic procedures as the ratification of agreements—even a 5-year agreement—by his union's members. The type who settles things over the table in a businesslike manner to the liking of management and whose members take what he gives them without question.

In spite of the fact that the right of employees to organize and to bargain collectively has been established under the law of our land for more than two decades now, there are employers who look upon unions and collective bargaining as undesirable, as proper targets for abuse.

Such an attitude on the part of an employer tends to foster the rise of similar conduct among his employees and tends to invite the service of those elements in our society which make a career of lawlessness and corruption. The employer who bargains and who treats other proper union activities in good faith and fairness does much to foster the development of sound and democratic unionism. And that type of unionism is the best defense against corruption and communism.

ROLE OF PRESS

The press, too, can contribute to the job of maintaining high standards of ethics in the labor movement. It is not doing so today. The banner headlines with which it treats stories of corruption and communism in the labor movement, its utter failure to publish information regarding the constructive role which labor plays in community life, its constant editorial condemnation of labor—all combine to give the public a completely false picture of the place of labor in our national life. And if the public-opinion polls which our newspapers and magazines love to feature prove anything, they prove the success of the press in miseducating the public.

When it comes to legislative investigations into alleged corruption in the labor movement, the position of the American Federation of Labor and the Congress of Industrial Organizations was made unmistakably clear in the executive council statement on January 28 of this year. I doubt that any other segment of our society has ever made a more open and forthright pledge of cooperation. This does not mean, however, that we give carte blanche to legislative committees. We expect such committees to adhere to their primary function in the conduct of their investigations, that is to develop information which will enable them to recommend legislation which is necessary to correct the abuses concerned. When they stray from this function, they are subject to criticism.

management, if the press, if our legislators are serious in their desire to help labor out what corruption exists within its ks, they will have to put an end to many their current practices which, deliberately otherwise, are misleading the public as to e nature of the American labor movement d the extent of corruption in its ranks; if eir motives are not ulterior, they will ac- all the truth and effectively cooperate ith us in cleaning house.

If they persist in their present courses, ey will lead us and those who understand d wish to help us, to the inevitable conclu- n that they are interested not in helping bor but in using the current crop of ad- se publicity either to deliberately defame or to make us victims to their own petty hibitions for personal publicity or increased rculation.

NEED FOR UNPREJUDICED FACTS

I am becoming very much concerned that e net result of the mishandling of infor- tion concerning corruption in organized bor is going to end not in helping labor to tablish and maintain standards of high hics, but to weakening the labor movement a whole. I am concerned as a union offi- al. I am concerned, too, as an American tizen. In our system of free, competitive terprise, organized labor occupies an es- ntial place. Without its influence roughout the history of our economic and litical development, we would not now be joying the consumption which underpins r great industrial system, and we would t now be enjoying the advanced demo- atic and social practices which make our tion a beacon of hope for many oppressed d liberty-seeking peoples of the world to- y.

The hue and cry over labor racketeering, ndled by current congressional investiga- ons and fed by a circulation-hungry press but one facet of a resurgence of antiunion- m which may do our country's labor move- ent and our country itself irreparable rm. What we need is some calm, dispas- nate thought, unimpeded by prejudice d unswayed by those with personal axes to rind. However, this is not easy of accom- lishment. The propaganda against and the isinformation about organized labor has en effective. Millions of our citizens who o not know the facts and who are not in a sition to get the facts, have already been rejudiced by a merciless press.

Organized labor will no doubt be hurt. embers of unions and their families, as well nonunion members and their families, will l be hurt, and their injury will be reflected versely in every segment of our society. y reduction in the increased purchasing ower which we must have in the future to aintain a vibrant, progressing economy will ot only injure the very persons who are re- ponsible for it, but will hurt the innocent well.

Statement by the American Jewish Committee on Discriminatory Practices by the Saudi Arabian Government

EXTENSION OF REMARKS
OF
HON. LEONARD FARBSTEIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 6, 1957

Mr. FARBSTEIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement issued by the American Jewish Committee on April 24, 1957. It was occasioned by Secretary of State Dulles' assertion in his press conference on April 23 that the continued exclusion of American personnel of the Jewish faith from the Dhahran Airbase in Saudi Arabia was occasioned largely, or partly at least, because of New York Mayor Robert Wagner's refusal to greet King Saud in January of this year:

STATEMENT BY AMERICAN JEWISH COMMITTEE ON DISCRIMINATORY PRACTICES BY THE SAUDI ARABIAN GOVERNMENT, APRIL 24, 1957

We are amazed by the statement in Washington yesterday by Secretary of State Dulles that Saudi Arabia's continued exclusion of American personnel of the Jewish faith from the Dhahran Airbase was partly at least attributable to Mayor Robert Wagner's refusal to greet King Saud on his arrival in New York last January. The merits of the action taken by Mayor Wagner is, of course, not the issue to which we are addressing ourselves at this time.

This new explanation for a practice of exclusion by Saudi Arabia that began more than 6 years ago, and continues undiminished, conflicts with the history of the recent negotiations by the State Department, for renewal of the lease on that base. Secretary Dulles has employed an irrelevant circumstance rather than acknowledging our own Government's failure to prevent assaults on American citizenship.

For more than 6 years, the United States Government has acquiesced in a flagrant policy of discrimination by the Arab States against American citizens of the Jewish faith. Our Government has negotiated treaties with Saudi Arabia which explicitly exclude Americans from that country on the basis of their religious beliefs. The American Jewish Committee is firmly convinced that such acquiescence in discrimination by a foreign government is tantamount to our Government upholding discriminatory policies.

The American Jewish Committee, therefore, was in constant communication with the State Department for nearly a year before the latest negotiations were concluded. We urged it upon our government that it is not now, and never has been, in accord with the traditions of American foreign policy to lend support to or otherwise justify discrimination by other countries against American citizens. This view was clearly reflected in the resolution adopted unanimously by the United States Senate on July 26, 1956, in which the "sense of the Senate" was expressed "that it regards any such distinctions directed against United States citizens as incompatible with the relation that should exist among friendly nations."

The American Jewish Committee has been continually assured that our Government would attempt to persuade Saudi Arabia to abandon its discriminatory policy. Yet, even before King Saud arrived in this country, we were informed that there would be little hope of success.

Mr. Dulles is also quoted as having said that King Saud insisted on continuing the prohibition against American personnel of the Jewish faith because "discrimination (by New York City) would be fought with discrimination" (by Saudi Arabia).

This, too, is at sharp variance with the explanation offered in a letter written to the Washington representative of the American Jewish Committee, on February 25, 1957, following King Saud's visit to this country, by William M. Rountree, Assistant Secretary of State for Middle Eastern and South Asian Affairs. He asserted that "the representatives of Saudi Arabia explained that their regulations were not intended to discriminate against citizens of another country because of religion, but were related to the tensions arising from the Arab-Israel dispute. The hope was expressed that Saudi Arabia would be able, as these tensions were eased, to eliminate restrictions arising from them."

We certainly do not accept as true the explanation offered by the representatives of Saudi Arabia that the discrimination against American Jews is not based upon religious affiliation. Nor are we convinced that Saudi Arabia will eliminate those restrictions in the absence of insistence by our own Government.

It has become equally apparent that the Saudi Arabian intransigence on this score during the more recent negotiations for renewal of the Dhaharan Air Base was in keeping with the earlier policies, in which—both directly and indirectly—the American Government has acquiesced.

Head of Chamber Backs United States Agency

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 30, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an article which appeared in the New York Times on April 29, 1957:

HEAD OF CHAMBER BACKS UNITED STATES AGENCY—COLEMAN STRESSES NEED FOR BUSINESS LIAISON OFFICE, WHICH FACED BUDGET CUT

WASHINGTON, April 28.—John S. Coleman, president of the United States Chamber of Commerce, said today the organization was not "against everything" in its campaign to persuade Congress to cut the Federal budget.

It would be tragic to lose the Business and Defense Service Administration, the Commerce Department's business liaison branch, he commented in an interview on the eve of the chamber's 45th annual meeting.

The industry divisions of the administration would be eliminated by a $3,500,000 budget cut approved by the House of Representatives. Sinclair Weeks, Secretary of Commerce, has asked the Senate to restore almost all of it. The cut has disturbed the Government's mobilization planners as much as it has businessmen.

CALLED GO-BETWEEN

Mr. Coleman called the administration the basis of industrial mobilization for war and the go-between for business and Government. It is a small item and should be reinstated, he emphasized.

Asked if he thought Congress had gone too far with other cuts, he said he could not think of any others.

The Business and Defense Services Administration handles much of Government industry planning for a war emergency. It administers priorities for scarce materials. Its industry divisions are headed by businessmen on leave from their companies. Its nonmobilization work is to pass information and opinion between Government and industry.

Mr. Coleman is president of the Burroughs Corporation of Detroit, electronic equipment manufacturers. Before his chamber activity, he was known for his work on behalf of liberalized foreign-trade policies. His 1-year term ends with this meeting.

The chamber is making intensive efforts for budget reductions. It is the country's most representative business organization. About 2,500,000 businessmen belong to its 3,300 affiliated chambers and trade associations.

Several thousand members will attend the 3 days of sessions on taxes, the postal deficit, housing, agriculture, education, business leadership, foreign policy, and other matters.

Mr. Coleman, who is 59 years old, said he traveled 75,000 miles the last year trying to get local people all over the United States to measure the things they wanted against the national welfare.

He said he had been chiding businessmen to pay more attention to the affairs of their own locality and of the Nation, and to be vocal with their own employees first of all.

"We have to think globally," he stressed.

On the controversy over limiting oil imports, Mr. Coleman said, "I don't see why we don't cap our own wells and import the foreign oil while it's available." The security argument for curbs is that imports discourage domestic exploration.

Discussing the domestic economy, Mr. Coleman said that to an industrialist, the upward trend of prices doesn't look like inflation, it looks like an evergrowing economy.

The Right-To-Work Hoax

EXTENSION OF REMARKS
OF
HON. GEORGE M. RHODES
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. RHODES of Pennsylvania. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include an article by Mel Sacks in Textile Labor entitled "The Right-To-Work Hoax: Stairway to Poverty":

The State of Indiana has succumbed to "right to work." The 1st industrial center and the 18th in a rollcall of stricken States, Indiana fell before the poisoned arrows of big-business and reactionary-farm groups.

Spurred on by their success, these hate-labor groups are now hatching plans to trap Connecticut, Vermont, New Hampshire, and Maryland. They hope the Senate's probe of labor racketeering will bait the trap.

American workers, of course, are the chief victims of right-to-work laws. All of America, however, will suffer from the shrunken payrolls and reduced consumer power washed away by this tidal wave of union busting.

Cancerlike, right-to-work laws appear innocent at first glance. They masquerade behind a facade of fine-sounding words. But sometimes words don't mean what they seem to. Everybody believes in rights and everybody wants work. But when workers lift the curtain off the words "right to work" they get a bleak picture of lower wages, longer hours and insecurity.

How did this double-talk legislation get into so many State books?

Who were the back-door fathers of these laws, often conceived in secrecy and frequently delivered as riders to unrelated bills?

The first right-to-work law originated in Florida. In 1939, the Associated Industries, Florida affiliate of the National Association of Manufacturers, began to press hard for restrictive labor legislation. In 1941, the American Farm Bureau Federation and the National Council of Farmer Cooperatives, employers of low-wage farm labor, also jumped on the open shop bandwagon.

The movement gained real momentum in the midst of wartime hysteria and was designed to stop unions from enrolling newly hired workers in defense industries. Such workers enjoyed the same high standards older union members had to struggle to win. Yet when they were asked to help pay the freight for such gains through initiation fees and dues, employers urged them to resist.

Always on the lookout for new and improved ways of walloping unions, big business groups saw that a campaign to pit worker against worker, under the guise of the right to work without joining a union, was tailor-made for them.

In Tom Watson, Florida's attorney general, they found their architect. In 1941, 1 month after he had been elected with labor support, Watson spoke out for the open shop. Shortly afterward he advocated a bill to ban the closed shop on all public projects.

In support of this bill he charged that at Camp Blanding many workers were forced to pay union dues at hiring time and then were laid off 6 weeks later. He submitted no proof. What's more, not a single worker was produced to back his charge and to claim a refund of his dues. Fortunately, the bill died in the House Labor Committee.

Despite this setback, Watson and his backers continued to build up their strength. They decided to abandon Federal action and push their plan on the State level in Florida. A smokescreen of publicity was blown over the State. Unions were charged with impeding the war effort, racketeering and curtailing the rights of individual workers.

By August 1944 Watson and State Representative Joe Jenkins, who had sponsored an unsuccessful open-ship bill in 1939, got a charter for a statewide right-to-work committee. W. L. Storey, chairman of the Farm Bureau's labor committee, was installed as president. The buddy-buddy deal between Florida big business and big farmers was in the open. Another group, the Florida Voters for Constitutional Government, pitched in, too. In fact, everybody got into the act except Florida's workers.

The Miami Citzen pointed out that the leaders came from "the backward, low-wage sections of the State where the lumber and turpentine interests rule their workers like barons of old, and laborers received little or nothing for working in groves and on the farm."

A constitutional amendment banning union security provisions was finally passed in Florida's general election November 7, 1944. The open-shoppers collared 55 percent of the vote. Where city support was almost evenly split, the rural areas supported the amendment 2 to 1.

Following a Federal district court ruling that the statute was not self-enforcing, but required an enabling act, Attorney General Watson went to Washington. He scoured Government labor relations agencies, requesting them not to award union security on public projects. But the Federal agencies refused to go alone.

Shortly afterward, Watson filed suit against several firms for having closed-shop contracts, but lost.

Watson also brought the threat of vigilantes into the picture. A private goon squad, the Veterans' Industrial Association, organized as union wreckers in Arkansas, was imported.

Watson later broke with this group because they were opposed to all labor, whereas he claimed he only fought the closed shop. For a while, Watson led the Federated Workers of America, a group whose purpose was to set up open-shop unions on a national basis. This died but the "wreck" law remained.

Right-to-work laws have been in effect long enough in 17 States to permit evaluation. It is noteworthy that those saddled with the law have average per capita incomes of only $1,400 a year. The national average is $2,000.

In right-to-work States union organizing efforts have been strangled. The rug has been pulled out from under job security. Workers grasp at almost any miserable wage offered them.

Instead of being friends and neighbors, workers become deadly competitors forced by economic distress to throw themselves into a cheap labor market.

Right-to-work States are pocked with poverty. They offer an object lesson to workers in union shop States because a study of right-to-work in action shouts out: "Don't let this happen to you."

The Lord & Taylor Award

EXTENSION OF REMARKS
OF
HON. STERLING COLE
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. COLE. Mr. Speaker, for the past 20 years, Lord & Taylor, one of the outstanding department stores of New York City, in recognition of some current event or development of humanitarian significance, has established an annual award to which certain individuals identified with the activity concerned have been recognized and a substantial monetary donation given to a deserving charitable organization. This year the award was based upon the theme of the peaceful atom. Certain individuals identified with the atomic program were cited and the monetary award of $10,000 was given to the Sloan-Kettering Institute for Cancer Research.

The address of Miss Dorothy Shaver, president of Lord & Taylor, served to dramatize the myriad of uses for the peaceful atom and was so impressive to me as I listened to it as the accompaniment to the cinematic presentation that I feel it merits inclusion in CONGRESSIONAL RECORD.

The address follows:

ADDRESS BY MISS DOROTHY SHAVER, PRESIDENT OF LORD & TAYLOR, AT THE 20TH LORD & TAYLOR AWARD LUNCHEON, APRIL 12, 1957

It is my great pleasure to welcome you to the 20th Lord & Taylor award luncheon.

The Lord & Taylor award is held in the belief that business in a democracy has a responsibility to contribute to the humanitarian well-being and enlightenment of the community and Nation. Presented as a public service, the award seeks to renew our faith in our present world as in our future through the recognition of the achievements of the modern pioneer, whether his frontier be a laboratory, a studio, or an office.

Today it is our privilege and our challenge to be living in an era of great discovery, a discovery that is to shape the character of our times. It is the knowledge of the power of the atom. Its towering prominence on the landscape of our age is still partially obscured. That mankind is assembled at the foot of a great new and fertile power for good, there is no doubt.

Awareness of the immensity of the force contained in the atom first exploded over the hearts and minds of men in a deathly warning. Still haunting the human imagination is the destruction of Hiroshima. We now know this same force as one of our greatest powers for peace. It is the dedicated purpose of this program to shed further light on the promise of atomic energy for the betterment of mankind.

We are keenly aware that only the trained scientific mind can truly grasp the intricacies of the atom. We, as laymen in science, can only marvel at the meaning of this dis-

very and pay humble tribute to the daring
the brilliance of the minds that are
ting our atomic age.

THE ANSWER OF THE ATOM

Man in the universe is man whirling to a
rhm he cannot feel, obeying laws he does
comprehend, participant in a pattern
can barely perceive, citizen of space that
no end. To man, a part and yet an
erver of this scene, the unknown has
ays been a challenge, truth the ever-
ght goal.

A transient in eternity, man seeks to make
his own. He watches, questions, concludes
y to doubt again—and slowly, he learns.
In our time, using the knowledge accumu-
ed through history, as man observed he
ard a new sound in the universe, a sound
t has always existed had he learned to
en—the secret sound of life. It was the
nd of atomic radiation. This was the
e that guided man's thought to the great
overy of the power of the atom.

From the end of the 19th century when
was first perceived, scientists have explored
s persistent radiant beam. In 1939 the
m was finally split and there was released
earth a power of an intensity never before
t. Unleashed for man was the enormous
ding force of nature—the source of life.
The quest for this knowledge had been
g—truth often neglected. The atom,
ling the searching mind by its obscurity,
hidden for 25 centuries. Its existence
s first conceived in the fifth century B. C.
the Greek philosopher, Democritus, who
lared that matter is formed of invisibly
all particles, which he called atoms, mean-
something that cannot be cut.

This astounding insight was put aside for
0 years by the dominance of Aristotle's
mpellingly simple explanation that matter
s made up of elements that could be
n and felt rather than of tiny bits of
visible matter.

This false assumption of the physical
rld was first questioned by Galileo who
thstood the ridicule of his time for his
lief that principles must be tested by ex-
riments. So started the modern scientific
e.

Working with intellectual freedom, the
neer scientists of the 1600's, 1700's, and
00's constructed the framework of physi-
l laws and principles on which today
ientists stand. From primitive laboratories
across Europe came the great truths
t have given our age its pattern—the
w of motion, the nature of matter, the
gnetic attraction within elements.

With the discovery of natural radioactivity
1896 by the French scientist, Becquerel, a
pid chain reaction of atomic discoveries
llowed: from Thompson of England, the
ctron ushering in the electronic age; from
erre and Marie Curie of France, the isola-
n of radium and polonium; from Albert
nstein of Germany, the theory of the
uivalence of mass and energy and the
neral theory of relativity; from Ruther-
rd of England, the theory of radioactive
cay, of the atomic nucleus and the first
clear reaction; from Bohr of Denmark,
e theory of atomic structure; from Ernest
wrence of the United States, the develop-
nt of the cyclotron; from Fermi of Italy,
e development of atomic fission. From
ese and many others came the knowledge
hich we now possess of the universal na-
re of matter and the structure of the atom.

The lightest atom, hydrogen, has a single
oton in its nucleus and an electron that
cles it like a planet. Within suns, hydro-
n atoms fuse together and are joined by
o neutrons. The result is a completely
w element, helium, whose two protons at-
ct a pair of circling electrons. Helium,
turn, becomes the heavier element, lith-
m as more particles join its nucleus. Thus,
e by one, all the 92 elements were forged in
ellar fires until the heaviest atom of all,
uranium, was created. Uranium has a nucleus of 92 protons and nearly twice as many neutrons that is held together by stellar energy. It is this energy that man has learned to liberate.

"When a neutron strikes a uranium nucleus, it is absorbed. Under the strain of the added particle, the nucleus grows unstable and splits in two with a burst of energy, releasing more neutrons. In a mass of uranium, the neutrons released by one fission travel on to produce further fissions, liberating more and more energy in an intense chain reaction. This same energy will eventually light our cities, run our factories, and power our ships and planes."

The pulse of our Nation's life depends on power. Factories, farms, cities, the great agents of transportation—each demands power. The lifeline to all the dynamic enterprises of our society, power holds the key to our future growth as well as to our present strength.

Even with America's great natural resources, there are areas where our power is inadequate. By 1975 cheap coal will be scarce and power costs will rise. Our oil consumption has reached a fantastic peak and continues to grow. In Europe, reserves of coal and availability of oil are critical today. In the countries of Asia and Africa, power resources are frequently lacking and demand, springing from newly awakened economies, has vastly increased. To fail in meeting this urgent need would be to fail humanity's future.

The energy contained in world reserves of uranium is over 20 times that contained in the reserves of oil and coal. The power of the uranium atom released in reactors is the best answer now available to the challenge.

"As uranium slugs are pushed into a reactor and the controls adjusted, uranium atoms begin to fission and the chain reaction builds up, producing heat. It is this heat that makes atomic power possible. A liquid pumped through the reactor is heated as it flows around the hot rods. Passing over water-carrying pipes, the liquid imparts its heat to the water, turning it to steam. Thus, a reactor makes steam—steam to run the powerful turbine that turns the generator to produce electricity. Then the electricity passes through transmission lines and on toward the world of man to light his cities and lighten his labor with the energy recovered from suns that were born and died billions of years ago.

"But in addition to power, a reactor can also produce radioisotopes. Elements, inserted into a reactor become radioactive. Thus normal iodine becomes transformed into an iodine radioisotope. And so on with many elements, enabling them to perform new and vital tasks."

This year will mark the opening of the first full-scale commercial nuclear power-plant in the United States. Located at Shippingport, Pa., this first structure on the new frontier is the American power industry's pledge to the future.

Atomic power holds the promise of driving the engines of ships, planes, trains, and rockets, giving a new dimension to their range. Today we have witnessed the amazing performance of the first atomic-powered vessel, the submarine *Nautilus* which made naval history by sailing 2 years without refueling. We see it as a symbol of navigation of the future.

Since uranium is not inexhaustible, one of the great promises for limitless power in the future rests in fusing atoms. Light-weight atoms are made to collide with such force as to unite them, releasing the violent solar energy that has given life to the earth. The problem of controlling this kind of atomic fire is one of science's current frontiers. The Atomic Energy Commission has just announced that a large experimental device, to be known as the stellarator, will be built at Princeton University for the study of controlled fusion reaction. This device would approximate the heat of atomic fires raging at millions of degrees deep in the sun's core, creating for man the same power that lights the universe.

Key to a Nation's prosperity and high standard of living is its industrial strength. American industry, whose progressive attitudes have been the mainspring of its phenomenal achievements, has been quick to find uses for the atom. Last year, even in this pioneer period, industrial savings directly attributable to radioisotopes are estimated at half a billion dollars. Approximately 1,400 companies are at present using the new power of the atom.

The hypersensitivity of the atom has given industry a new tool which produces extraordinary efficiency. Atomic tracers test wear on machines to a degree never before possible, detect hidden flaws in fabrics and castings, and measure the thickness of metals and paper to fantastic degrees of accuracy.

The vast oil industry, with its complex of pipelines that carry vital petroleum across the length and breadth of this country was one of the first to put the magical atom to work. By using a small amount of radioactive material as a marker, different shipments of oil can be identified, vastly improving efficiency. These same tracers are used as superhuman eyes that spot breaks in transcontinental and local pipelines, saving labor, time, and needless effort.

Manufacturers of drugs are now employing radioisotopes for more effective sterilization of medical supplies. And so it goes—from steel to oil, from plastics to paper to fabrics to foods—every industry is looking to the atom for the answer to new and promising methods of production. Marking our modern landscape are new research centers where engineers and scientists are probing, searching, experimenting with the power which has made this an atomic age.

The specter of hunger has haunted more than two-thirds of the world's people for centuries. Today fast-growing populations have brought the problem of food supply in some parts of the world to a stage of crisis.

Plant disease and insect pests sweep with regularly across all lands, bringing needless waste of precious food. No nation is immune but some have learned the means of fighting.

The atomic biologist has brought new and powerful weapons to this fight. Radioactive isotopes are used to acquire greater understanding of the life processes of plants so that we may learn their essential requirements. As radiation causes mutation, breeding experiments aimed at creating more productive and disease-resistant strains have been vastly speeded. Radiation can alter plant chromosomes which contain the invisible genes that govern the cell's growth, enabling scientists to learn more fully their influence on the development of plant life. New rust-resistant hybrids of oats and wheat and a new higher-yield peanut strain are already among the tangible achievements of the atomic biologist.

One vast new field of research is the preservation of food by radiation. Exposed to it, potatoes can be stored for years without sprouting. Because radiation destroys living cells, scientists are using it to kill the bacteria that spoil food. Samples of meat are placed inside a lead cask and exposed to radioactive cobalt. Today irradiated meat remains fresh for weeks. Some day it may last for years as fresh as the day it was packaged.

Of all the fervent hopes of mankind, none is more deeply felt than the desire for health—freedom from that tyranny that enters like a stranger and stays unwelcome to do violence, to threaten, or to kill.

In the struggle to free men from illness the atom is a revolutionary weapon. Its value to our medical understanding has been compared to the value of the microscope.

Radioisotopes have opened new doors for medical research and treatment. One of the most valuable of these isotopes, radioactive iodine, has been used with great success in the treatment of thyroid disease. These isotopes are carefully stored in lead vaults to assure protection from accumulated radiation which would prove harmful to technicians. Since an overactive thyroid will take up more iodine than a normal thyroid, radioactive iodine can swiftly and accurately diagnose the trouble. An atomic solution is prepared by remote control appartus—a device called the master-slave. Watching his movements by means of mirrors, the technician draws up the iodine and transfers a measured amount into a paper cup. Water is then added and the patient drinks the atomic cocktail. Above the suspect gland, a radiation counter moves back and forth detecting the iodine's radiation and recording the spots where the disease is concentrated. This accurate diagnosis will lead to early and effective treatment.

The blinking of a warning light indicates another priceless isotope at work—Cobalt 60. Mounted inside a rotating cylinder, the cobalt's penetrating radiation bombards with special accuracy a tumor deep in the patient's body. Malignant cells may be destroyed by its powerful rays as dials keep careful count of the radiation received.

In case of brain tumors which X-rays cannot detect, radioarsenic tracers reveal the exact size and position of the tumor. Its successful removal is achieved by using a special atomic probe. The probe's sensitivity to radiation signals the tumor's precise location to the surgeon during the operation, enabling its complete removal.

In the new world of atomic medicine, guns are used to cure. This gun is loaded with radioactive gold seeds. Using a potato as a facsimile of a cancer, gold seeds are shot from the gun into the desired position simply by pulling the trigger. Radiation from the gold works to destroy malignancy. Removal of the seeds is unnecessary.

The invisible rays of the radiant atom are telling the story of the mysteries of human life with a clarity and precision never before revealed. New light is being shed on the workings of the body and the evolutionary changes during its life span. The atom gives new hope for answers to many of the enigmas of illness.

We have seen a power that can reach out to the mystery and agony of illness and give a deeper knowledge that can bring new life.

We have seen a power that can release humanity from centuries-old subservience to nature by supplying superhuman energy.

We have seen a power that can cut waste and error from the huge enterprise of industry by a sensitivity 1,000 times greater than man's.

We have seen a power that can fight pestilence and blight by creating new and better food for the hungry of the world.

A new freedom has come to man, so vast that we see only fragments of its total meaning, so powerful that it brings humility as well as hope, so essential that it has become the symbol of our future.

Into deserts and darkness, through ravaged fields and forests, into the grappling anxiety of poverty, into the torment of disease, the answer of the atom will be hea[rd]

PRESENTATION OF CITATIONS—THE HONORABLE W. STERLING COLE

A born leader, active in many fields, the man we now salute has brought his vision and high intelligence to the service of his country as a member of the Joint Committee on Atomic Energy since its creation in 1946. He served as its dynamic chairman during the 83d Congress and is at present its ranking Republican Member. As coauthor of the Atomic Energy Act of 1954, he helped to set the legal foundation of all atomic activities in this country. His shining clarity of thought has been brought to bear on international problems arising from this atomic age. At this crucial stage in the development of peaceful atomic power we are proud to honor this knowledgeable legislator from our own State of New York, United States Representative W. STERLING COLE.

AMBASSADOR JAMES J. WADSWORTH

In 1953 President Eisenhower set the cornerstone for international atomic cooperation in his famous statement before the United Nations. He urged the establishment of an international organization devoted to the peaceful uses of atomic energy, to "serve the needs rather than the fears of mankind."

The man who was appointed by the President to foster this policy at the United Nations is a veteran of 19 years of Government service. Member of a family of distinguished public servants, he served ably as chairman of the United States delegation at the 87-nation Conference on the Statute of International Atomic Energy Agency. We now proudly present a man of impressive achievements, the distinguished Deputy United States Representative to the United Nations, our representative on the peaceful uses of atomic power, Ambasador James J. Wadsworth.

DR. LLOYD V. BERKNER

We in New York live close to a center of atomic discovery, the Brookhaven National Laboratory located in Long Island. Those who run this laboratory search for the signposts of the new atomic age. Living in a world apart, our future is their present. They pursue the peaceful potential of the atom for medicine, biology, chemistry, physics, and nuclear engineering.

The high responsibility for directing this work has been placed with nine of our eastern universities. The educator selected to guide the activity on the atomic frontier has a many faceted personality; member of the first Byrd antarctic expedition and winner of the Congressional Gold Medal, his brilliant scientific mind has been called into play by the State, Navy, and Defense Departments. It is not surprising that the associated universities has selected this long-time adventurer in science as its president to direct the Brookhaven National Laboratory. We are honored to have with us today, Dr. Lloyd V. Berkner.

DR. HENRY D. SMYTH

We cannot point to the advances made in the atomic field without paying tribute to the men who have devoted their lives to scientific research. These are the men who chart their course by unseen stars, who toil to achieve the miracles they may never see. Representing the best scientific tradition, our next awardee has played a continuing role in the development of atomic energy. Author of the internationally famous report evaluating atomic achievements as of 1945, a former Commissioner of the Atomic Energy Commission, he is the present chairman of the science and research board at Princeton University under whom some of our most promising atomic research is taking place. It is my great privilege to salute Dr. Henry Smyth.

COMMISSIONER HAROLD S. VANCE

One cannot think of atomic energy without paying tribute to the United States Atomic Energy Commission, the Government agency which bears the responsibility for encouraging, directing, and inspiring the entire atomic energy field. Like the nucleus of an atom, the Atomic Energy Commission holds the central position in this pioneer period of atomic activity, coordinating the work of the scientist, educator, and industrialist.

It is singularly appropriate to this occasion that we hear from 1 of the 5 Commissioners who direct the essential work of the Atomic Energy Commission, a man who has already achieved the mark of success in the head of a large and vital corporation. He has brought a keen business mind and a penetrating intelligence to the service of his country in this vital new field. I am proud to introduce to you the Honorable Harold S. Vance, who has come from Washington, D. C. to address us today.

GWILYM A. PRICE

No company more successfully represents the ingenuity and brilliance for which American industry is famous than the Westinghouse Electric Corp. and its dynamic atomic-energy program. Starting in this new field in 1948 with a few employees, its success in learning the secrets of atomic power has been such that it now employs over 6,000 people in its atomic-energy division.

Under the leadership of one of America's greatest industrialists, the Westinghouse Corp. has produced two of our foremost current achievements in atomic power and holds the plans for many more. First to translate atomic power into sea power, Westinghouse built the atomic furnace that drives the first atomic submarine, the U. S. S. *Nautilus*. First to establish atomic power as a major source for electricity in this country, Westinghouse designed and constructed, under contract to the AEC, the nuclear reactor for America's first full-scale commercial atomic powerplant located at Shippingport, Pa.

Our next distinguished citizen is a man with vision, with determination to learn the secrets of an unproved power, with the courage to tackle the unknown. We salute the president and chairman of the board of the Westinghouse Electric Corp., Mr. Gwilym A. Price.

ALFRED IDDLES

American industry, always alert to new potentials, early met the compelling demand for information on atomic energy by establishing a private information organization, the Atomic Industrial Forum.

It is the good fortune of the 500 industries which are members of the forum to be led by a man whose broad experience and wisdom give him a unique understanding of the needs of industry in an atomic age.

As its president, he led Babcock & Wilcox in building the nuclear portion of the Consolidated Edison plant at Indian Point, on the Hudson, which will give New Yorkers their first electric power from atomic energy.

One of the country's most prominent engineers, long a key figure in the development of the power field, it is our great honor to cite a man who truly represents American industry's belief in the promise of the atom, president of the Atomic Industrial Forum, Mr. Alfred Iddles.

PRESENTATION OF AWARD TO SLOAN-KETTERING INSTITUTE FOR CANCER RESEARCH

The inscription above the Sloan-Kettering Institute for Cancer Research says fittingly "Within these walls a few labor unceasingly that many may live"—a phrase which applies aptly to its distinguished director. Few men of science have his liveliness of mind, his warmth of personality, his originality of thought. His achievements in the field of medical research are impressive. It is with hope and faith in the new power of the atom to advance our struggle against illness that we give this year's monetary award of $10,000 to the Sloan-Kettering Institute to be used to augment its great research endeavor. We are deeply honored to have with us the man whose public-spirited generosity established and sustains this institute, Mr. Alfred P. Sloan, Jr., and also the president of this institute, Mr. Frank A. Howard. And now it is my great pleasure to introduce Dr. Cornelius P. Rhoads, director of the Sloan-Kettering Institute, master in medicine and dedicated humanitarian, who will accept this gift.

Libel and Slander on Television

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. ANFUSO. Mr. Speaker, as a rule parents rejoice when their children follow in their footsteps. I am a lawyer by profession, and was privileged to serve on the bench in New York. Now my son is studying the same profession, to which he hopes to devote himself in life. My son, Victor L. Anfuso, Jr., is a freshman at St. John's University School of Law in Brooklyn, N. Y., and is serving on the editorial board of the school's Law Review.

In the May issue of St. John's Law Review is published a study written by my son—his first study of this type—dealing with torts, libel and slander, in which he maintains that oral extemporaneous remarks over television can be held as libelous. It involves two famous New York restaurateurs, Toots Shor, of the restaurant of the same name, and Sherman Billingsley, of the Stork Club. This is an area which until now has hardly been explored. His study should prove of considerable interest and great value to the many people associated, directly or indirectly, with the television industry, and to the legal profession generally.

Mr. Speaker, under leave to extend my remarks, I wish to insert this brief study in the RECORD:

Torts—libel and slander—oral extemporaneous remarks over television held libelous: Plaintiff brought an action for libel alleging extemporaneous defamatory statements over defendant-television broadcasting station by defendant-master of ceremonies as to his being deeply in debt. Defendants made a motion to dismiss contending that a complaint which alleges false oral remarks does not state a cause of action in libel. The court in denying the motion held that an allegation of extemporaneous oral defamatory remarks over television is sufficient to constitute a cause of action in libel. *Shor* v. *Billingsley* (— Misc. 2d —, 158 N. Y. S. 2d 476 (Sup. Ct. 1957)).

Traditionally defamation has been separated into two categories according to the form of dissemination chosen, slander being oral and libel being written.[1] For oral defamation, with certain exceptions,[2] special damages have to be established,[3] while for a writing, by nature more permanent and durable, damage is presumed.[4] Libel has been further extended to include all communications by sight, e. g., a picture,[5] caricature,[6] or effigy.[7]

However, courts and the State legislatures seem to be either in hopeless disagreement or indecision [8] as to which form to apply to new technological developments. Defamation by motion pictures has been consistently classified as libel,[9] but no such uniformity exists where false remarks were broadcast over radio or television. Some courts, applying the classic distinctions of form, categorized defamatory statements read from a script as libel,[10] and extemporaneous remarks as slander.[11] In another group of cases the form used was not decisive since recovery, in any case, could be granted without proof of special damages. Thus, where the remarks were actionable per se, either reflecting upon the integrity of a public official,[12] imputing the commission of a crime,[13] or injuring the plaintiff in his business,[14] the courts refused to classify the defamation. One Pennsylvania court would not distinguish between libel and slander with relation to the modern electronic media since the wide range of dissemination possible is equally present whether the utterance is oral or written.[15] Various State statutes [16] are in disagreement as to whether defamation over the air waves constitutes libel or slander; while in England, by statute, any defamatory broadcast is considered libel.[17]

Some jurisdictions have generally limited the liability of a broadcasting station as a disseminator of defamation, demanding only a high standard of preventive care. If the remarks were extemporaneous,[18] or there was no right of censorship over a defamatory political speech,[19] the station was relieved of responsibility. Liability could be imposed, however, when there was some method of control not utilized, as a failure to censor a defamatory script.[20] Conversely, in other States the element of control is not relevant in deciding the question of liability. Thus, in Sorensen *v.* Wood,[21] the fact that a broadcaster was precluded by act of Congress [22] from censoring a political speech, was held not to constitute a defense. The Court declared liability to be comparable to that of a newspaper,[23] observing that a radio station had no "privilege to join and assist a libel." [24] Since then, 26 States [25] have adopted statutes absolving the station from liability for defamatory remarks made by a political candidate, while several States [26] make it contingent upon the exercise of due care.

New York has followed the formal distinctions between libel and slander in both radio and television so that only statements delivered from a script are libelous.[27] Some lack of due care [28] or disregard of control, such as rebroadcasting the defamation,[29] seems to be sufficient to extend liability to the broadcaster. Station owners have not been held responsible for interpolated defamatory comments,[30] a mere coincidental allusion to the plaintiff by television scenery [31] or, by statute, for a defamatory political broadcast.[32]

The instant case, declaring the permanence of form concept [33] not to be a restrictive doctrine, is the first to extend the principle of libel to oral remarks. The Court contended that any broadcast, regardless of form, has a greater potential for harm than a writing, and therefore is more properly placed in the libel area. It was further stated that legislation is not needed to change the rule since defamation is basically a common-law action. No mention is made of the extent of liability of the defendant-broadcaster for a seemingly uncontrollable remark, save that a good cause of action is stated against it.

In examining the case in relation to the judicial development of the law, it would seem to sanction a contradiction in terms. No longer need a libel be considered as written, and a slander as spoken, defamation.[34] This is in direct violation of the dictum laid down in *Locke v. Gibbons*,[35] and followed by all jurisdictions save two,[36] that our courts cannot legislate to eradicate the long-established distinctions between libel and slander.[37]

While it is true that damage from defamatory statements can almost be presumed to occur over the modern electronic media, it would seem more logical to include oral defamation by radio or television as a category of slander per se.[38] Another solution might be to discard the outmoded forms and make one action for defamation with certain categories exempt from proof of special damages. The legislature and not the courts would seem the best method of correcting a field of our law rapidly becoming confused and divided by contradiction.

LAWS AND RULES FOR PUBLICATION OF THE CONGRESSIONAL RECORD

CODE OF LAWS OF THE UNITED STATES

TITLE 44, SECTION 181. CONGRESSIONAL RECORD; ARRANGEMENT, STYLE, CONTENTS, AND INDEXES.—The Joint Committee on Printing shall have control of the arrangement and style of the CONGRESSIONAL RECORD, and while providing that it shall be substantially a verbatim report of proceedings shall take all needed action for the reduction of unnecessary bulk, and shall provide for the publication of an index of the CONGRESSIONAL RECORD semimonthly during the sessions of Congress and at the close thereof. (Jan. 12, 1895, c. 23, § 13, 28 Stat. 603.)

TITLE 44, SECTION 182b. SAME; ILLUSTRATIONS, MAPS, DIAGRAMS.—No maps, diagrams, or illustrations may be inserted in the RECORD without the approval of the Joint Committee on Printing. (June 20, 1936, c. 630, § 2, 49 Stat. 1546.)

Pursuant to the foregoing statute and in order to provide for the prompt publication and delivery of the CONGRESSIONAL RECORD the Joint Committee on Printing has adopted the following rules, to which the attention of Senators, Representatives, and Delegates is respectfully invited:

1. *Arrangement of the daily Record.*—The Public Printer will arrange the contents of the daily RECORD as follows: First, the Senate proceedings; second, the House proceedings; third, the Appendix: *Provided*, That when the proceedings of the Senate are not received in time to follow this arrangement, the Public Printer may begin the RECORD with the House proceedings. The proceedings of each House and the Appendix shall each begin a new page, with appropriate headings centered thereon.

2. *Type and style.*—The Public Printer shall print the report of the proceedings and debates of the Senate and House of Representatives, as furnished by the Official Reporters of the CONGRESSIONAL RECORD, in 7½-point type; and all matter included in the remarks or speeches of Members of Congress, other than their own words, and all reports, documents, and other matter authorized to be inserted in the RECORD shall be printed in 6½-point type; and all rollcalls shall be printed in 6-point type. No italic or black type nor words in capitals or small capitals shall be used for emphasis or prominence; nor will unusual indentions be permitted. These restrictions do not apply to the printing of or quotations from historical, official, or legal documents or papers of which a literal reproduction is necessary.

3. *Return of manuscript.*—When manuscript is submitted to Members for revision it should be returned to the Government Printing Office not later than 9 o'clock p. m. in order to insure publication in the RECORD issued on the following morning; and if all of said manuscript is not furnished at the time specified, the Public Printer is authorized to withhold it from the RECORD for 1 day. In no case will a speech be printed in the RECORD of the day of its delivery if the manuscript is furnished later than 12 o'clock midnight.

4. *Tabular matter.*—The manuscript of speeches containing tabular statements to be published in the RECORD shall be in the hands of the Public Printer not later than 7 o'clock p. m., to insure publication the following morning.

5. *Proof furnished.*—Proofs of "leave to print" and advance speeches will not be furnished the day the manuscript is received but will be submitted the following day, whenever possible to do so without causing delay in the publication of the regular proceedings of Congress. Advance speeches shall be set in the RECORD style of type, and not more than six sets of proofs may be furnished to Members without charge.

6. *Notation of withheld remarks.*—If manuscript or proofs have not been returned in time for publication in the proceedings, the Public Printer will insert the words "Mr. ——— addressed the Senate (House or Committee). His remarks will appear hereafter in the Appendix," and proceed with the printing of the RECORD.

7. *Thirty-day limit.*—The Public Printer shall not publish in the CONGRESSIONAL RECORD any speech or extension of remarks which has been withheld for a period exceeding 30 calendar days from the date when its printing was authorized: *Provided*, That at the expiration of each session of Congress the time limit herein fixed shall be 10 days, unless otherwise ordered by the committee.

8. *Corrections.*—The permanent RECORD is made up for printing and binding 30 days after each daily publication is issued; therefore all corrections must be sent to the Public Printer within that time: *Provided*, That upon the final adjournment of each session of Congress the time limit shall be 10 days, unless otherwise ordered by the committee: *Provided further*, That no Member of Congress shall be entitled to make more than one revision. Any revision shall consist only of corrections of the original copy and shall not include deletions of correct material, substitutions for correct material, or additions of new subject matter.

9. The Public Printer shall not publish in the CONGRESSIONAL RECORD the full report or print of any committee or subcommittee when said report or print has been previously printed. This rule shall not be construed to apply to conference reports.

10. *Appendix to daily Record.*—When either House has granted leave to print (1) a speech not delivered in either House, (2) a newspaper or magazine article, or (3) any other matter not germane to the proceedings, the same shall be published in the Appendix except in cases of duplication. In such cases only the first item received in the Government Printing Office will be printed. This rule shall not apply to quotations which form part of a speech of a Member, or to an authorized extension of his own remarks: *Provided*, That no address, speech, or article delivered or released subsequently to the final adjournment of a session of Congress may be printed in the CONGRESSIONAL RECORD.

11. *Estimate of cost.*—No extraneous matter in excess of two pages in any one instance may be printed in the CONGRESSIONAL RECORD by a Member under leave to print or to extend his remarks unless the manuscript is accompanied by an estimate in writing from the Public Printer of the probable cost of publishing the same, which estimate of cost must be announced by the Member when such leave is requested; but this rule shall not apply to excerpts from letters, telegrams, or articles presented in connection with a speech delivered in the course of debate or to communications from State legislatures, addresses or articles by the President and the members of his Cabinet, the Vice President, or a Member of Congress. For the purposes of this regulation, any one article printed in two or more parts, with or without individual headings, shall be considered as a single extension and the two-page rule shall apply. The Public Printer or the Official Reporters of the House or Senate shall return to the Member of the respective House any matter submitted for the CONGRESSIONAL RECORD which is in contravention of this paragraph.

12. *Official Reporters.*—The Official Reporters of each House shall indicate on the manuscript and prepare headings for all matter to be printed in the Appendix, and shall make suitable reference thereto at the proper place in the proceedings.

High Cost of Handling Chronic Drinkers

EXTENSION OF REMARKS
OF
HON. RICHARD L. NEUBERGER
OF OREGON
IN THE SENATE OF THE UNITED STATES
Wednesday, May 1, 1957

Mr. NEUBERGER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an article entitled "The High Cost of Handling Chronic Drinkers," which appeared in the April 19, 1957, issue of U. S. News & World Report.

Mr. President, programs for the care of repeater alcoholics impose a heavy financial burden upon city governments. For instance, the U. S. News & World Report story draws upon police records of a major American city to describe the case history—and cost—of 1 drunk, a man 54 years old, who has been jailed 235 times in the last 32 years. During these 3 decades the city paid $45,373 in police and court costs, jail keep, and hospital care for this habitual alcoholic, while obtaining only $510 in fines.

This typical case can be multiplied by tens of thousands in cities throughout the United States. The total direct and indirect costs of handing drunks may run into millions of dollars annually in large metropolitan areas. The loss in human resources throughout the United States is incalculable.

Many cities are now experimenting with rehabilitation programs which it is hoped will decrease the number of repeat drunk offenses. I believe that this program represents a forward-looking approach to a continuing problem. Such a plan will not only lower total city operating costs, but will assist in restoring to beneficial service men and women who might otherwise spend their lives shuttling back and forth between a bar and a city jail.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE HIGH COST OF HANDLING CHRONIC DRINKERS

On a chill, rainy day in March, a busload of prisoners, just released from the District of Columbia Work House, was hauled into Washington and let out at the bus' usual unloading point, a mile west of the Capitol.

Here was John A., 54, broke and threadbare, with no job, no family, no home. He shuffled off toward the business district, mooching dimes. By the time he reached his favorite cheap bar he had panhandled enough money to get drunk. Before midnight police arrested him.

Once more, John A. had stumbled into the revolving door of Skid Row—he had been drunk, arrested, sentenced, and had served his time, gone begging, and got drunk again.

PLAGUE OF CITIES

John A. is one of the repeater alcoholics who plague American cities. The cost of keeping just one such drunk off the streets during a lifetime of drinking is shown in chart A. After all this money is spent, the man is still a chronic drunk, repeating his performance over and over.

The common drunk is getting more attention because he is costly at a time when cities are trying to bring costs of government under control.

Each major city across the country now spends from $1 million to several million dollars a year to take care of drunks. The case of John A. is only one of hundreds of thousands.

The number of chronic alcoholics in the United States is put at nearly 5 million by the Yale Center of Alcoholic Studies. About 1.1 million have pursued liquor so long that they suffer mental or physical ailments because of it.

BURDEN FOR POLICE

More than 1.1 million people—60 percent of those arrested for all causes in United States cities and towns—are hauled in annually on charges associated with heavy drinking: drunkenness, drunken driving, disorderly conduct, and vagrancy. Among those arrested are thousands of repeaters.

City officials find that jails are jammed, courts are clogged, police forces are overburdened. New jails, more judges, larger police forces, all add to municipal budgets.

Indirect costs of chronic alcoholics are piled upon these direct charges. The drunk levies upon the citizen by panhandling. He resorts to petty thievery to finance booze. He seldom supports his family; consequently, relief payments are made from public funds.

City after city now is digging into the problem of the drunk—Boston, Philadelphia, Washington, Detroit, Chicago, San Francisco, Los Angeles, New Orleans, and others. Judges and local bar associations are joining city administrators in a search for more effective ways of handling drunks.

A businessman, David B. Karrick, started the newest and one of the most thorough examinations of the drunk problem in a city. Mr. Karrick, appointed one of the three Commissioners of the District of Columbia, found the Capital's prison facilities overcrowded. There was a prospect of having to spend up to $10 million for more jail space.

CAN LOAD BE CUT?

Rather than ask Congress for the money—since Congress is, in effect, Washington's city council—Mr. Karrick headed an investigating committee to find out whether the jail load could be reduced. The report of his committee, just published shows this situation in the Nation's Capital:

"Nearly 40,000 arrests for intoxication were made by the Metropolitan Police during the fiscal year 1956. More than 16,000 of these arrests resulted in commitment to our prisons, where the daily average drunk population exceeds 1,200. Many of these who are incarcerated leave wives and children destitue and entirely dependent upon subsitence payments by the Department of Public Welfare. * * *

"The costs to the taxpayer are enormous. Estimates, prepared on direct costs only, show that police processing of drunks cost $360,000 a year; court salaries involved, $76,000 a year; incarceration in prison, $1,204,000 a year. In addition, the alcoholic rehabilitation program costs $75,000 annually and the psychiatric services of the D. C. General Hospital cost $80,000 a year.

"Chronic alcoholics, therefore, are costing the taxpayers of the District almost $2 million a year."

ARREST-COMMIT POLICY

Public policy in the national capital is to try to keep all drunks off the streets through arrest. Those who can post bond or pay fines—more than half—are allowed to do so. Most others are sent to the workhouse—most of them under sentences ranging from 10 to 30 days. This is the revolving door method resulting in a workhouse population of which 85 percent are alcoholics.

Most of these chronic alcoholics in jail are past 40 years of age, but the Commissioner's committee reports: "The ages of those arrested show that a growing number of younger people, between 25 and 35 years of age, are being arrested for public drunkenness."

Looking to the future, the committee says: "The life expectancy of these individuals is long, and unless we are able to curb their delinquency at this stage, the taxpayers of the District of Columbia will have to house, feed and clothe many of these individuals for many, many years to come."

SAN FRANCISCO'S STORY

The cost of relief is demonstrated in San Francisco, where police now are arresting some 44,000 drunks a year. Homeless derelicts—single men without families—cost San Francisco more than $700,000 a year in relief payments alone. These alcoholics receive vouchers for food and rent, but many peddle the vouchers for cash to buy more alcohol. They prefer fortified wines—more kick for the money—but will drink vanilla extract, bay rum, rubbing alcohol or squeezings from canned heat.

These problems are facing almost all major cities in the United States. Alcoholics are costly now; they threaten to increase in numbers in the future and to become even more costly.

Most cities are just beginning to explore the size and cost of their burden of alcoholics and to experiment with curative methods of reducing this burden.

New methods of handling drunks, based on long-term commitment and curative treatment in place of repeated short jail sentences, are receiving increasing attention from authorities at all levels of government. These plans are coming mainly from businessmen, lawyers, doctors, police chiefs, and judges, rather than from those who are primarily reformers.

An experimental trend toward medical and psychiatric treatment of alcoholics is becoming more pronounced. The idea is to retrieve some of the derelicts from Skid Row, catch others in early stages and prevent them from becoming Skid Row cases.

No city has any hope that the problem can be wiped out; many officials do believe that, through treatment of the alcoholic, it can be reduced now and kept to lower levels in the future.

STRESS ON RESEARCH

This belief is based upon growing agreement among doctors, psychiatrists, and officials that alcoholism is a disease. It seems to afflict 1 drinker out of each 14.

Why some become alcoholics and others do not is still a matter of study. Mental upsets or an enzyme that reacts to alcohol in the chemical processes of the body are suggested by some researchers as possible reasons.

Congress is providing funds for research into the reasons for alcoholism, under direction of the National Institutes of Health.

As a result of the city investigation in Washington, drawing attention to the problem right on the doorstep of Congress, there is now talk of an investigation by a Senate committee. The idea would be to expose the extent and cost of the problem through national publicity, and to recommend whether the Federal Government should lay out more money either for research or for curative treatment.

SUCCESSFUL TESTS

States and cities, however, are doing a lot of their own digging.

More than 30 States have established commissions to see what can be done about treating alcoholics in mental hospitals or in outpatient clinics.

Curative treatment is being carried out mainly by cities, and only a few have gone beyond small-scale operations. Evidence from these pilot-plant experiments indicates that 20 to 25 percent of Skid Row habitués can be rehabilitated. In selected groups of drinkers treated before reaching the Skid Row stage, rates of cure have run as high as 75 percent.

Washington municipal courts have paroled more than 1,200 hopeful cases to Alcoholics Anonymous in the past 11 years. Of these, 95 percent have not been arrested since, and about 65 percent have achieved permanent sobriety.

Washington now plans to ask Congress to permit commitment for treatment up to 1 year. Drunks who can pay fines will not be let off, instead will be required to take treatment. Relatives will be permitted to commit an alcoholic for treatment even if he has not been arrested. Some Skid Row drunks will be provided with a "halfway house"—food and shelter after treatment, while they work for a living before being shoved out on their own.

REHABILITATION PROGRESS

California has concentrated more than other areas on the drunk problem because surveys showed it to be the State with the highest rate of alcoholism.

An Adult Guidance Center in San Francisco, to provide outpatient treatment and advice, has treated 6,000 people since 1951. A sampling of patients, including Skid Row derelicts and drunken seamen, showed that 25 percent stayed sober after treatment, and 70 percent earn a living without relief aid.

Los Angeles, shocked over drunk arrests that in some years have exceeded 100,000, voted $2 million in bonds to set up an alcoholic-rehabilitation center in 1954. It is run by the police department, costs $600,000 a year to operate, has room for 600 inmates and is to be expanded to a capacity of 1,500 patients.

A checkup on more than 3,000 patients who had been treated showed that 86 percent did not need to be sent back and the remaining 14 percent were rearrested only one-fourth as often as they had been before treatment.

COST OF TREATMENT

The treatment is proving a costly investment where it is being tried extensively. Looking at such expenditures as that in Los Angeles, some officials foresee the possibility that drunk clinics and hospitals will be set up on a large scale. These same officials believe that on a long-term basis the cost of treatment may be less than the cost of more and more jails.

Drunks, whether treated or jailed, will remain an item of big expense on city budgets.

CHART A

CASE HISTORY AND COST OF A DRUNK—FROM POLICE RECORDS OF A MAJOR AMERICAN CITY

Subject: A man 54 years old who has been jailed 285 times in the last 32 years and is in jail now. He studied accounting as a youth, has worked intermittently as a clerk, printer, cook, carpenter, driver, plumber, painter, laborer.

Cost to city to date:

Police and court costs, at $60 per sentence	$17,100
Jail keep, at $2.86 per day	26,873
Hospital care, during 140 days' treatment of delirium tremens, other ailments	1,400
Total	45,373
Less 52 fines paid by subject	510
Net cost to date	44,863

Address by Hon. Herman E. Talmadge, of Georgia

EXTENSION OF REMARKS
OF
HON. HARRY FLOOD BYRD
OF VIRGINIA
IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a very fine address made by the Senator from Georgia [Mr. TALMADGE] before the Kiwanis Club of Richmond, Va., on April 29.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS OF UNITED STATES SENATOR HERMAN TALMADGE, OF GEORGIA, BEFORE THE KIWANIS CLUB OF RICHMOND, VA.

President Welch, distinguished guests and my friends of the Richmond, Va., Kiwanis Club, your thoughtful invitation for me to speak to you today was an unexpected honor. It is one which I accepted with pleasure and satisfaction because of the close bonds of kinship and friendship which have existed between your own Commonwealth and my home State of Georgia throughout the whole course of our history.

Since the days of my youth I have looked to the State of Virginia and the city of Richmond with admiration and respect.

Representative government was born in Virginia.

Virginia's sons wrought the first constitutional republic for this Commonwealth.

Virginians wrote the Declaration of Independence and the Constitution.

And, of fond remembrance to southern people, Richmond is revered as one of the hallowed capitals of the Confederacy.

Georgia is proud to have shared your heritage and your history.

The forebears of many of our citizens came to Georgia from Virginia.

In many ways, during the past 180 years, the governments of both States have shown remarkable parallels in their development. This similarity is particularly striking today both in organizational structure and in programs being carried forward.

On a number of important occasions, your distinguished and respected senior Senator, Hon. HARRY F. BYRD, has spoken in Georgia, and he is greatly admired by the people of my State. I, personally, have been an admirer for many years of his outstanding record as a farmer, a publisher, an administrator, a sound, honest, and courageous public official and a statesman of renown.

I should like to pay the highest tribute possible to Senator BYRD and to your able junior Senator, A. WILLIS ROBERTSON. Both of these fine gentlemen have been most kind and helpful to me in my initial service in the Senate, for which I am deeply grateful.

And, I might add, that during my service as Governor of Georgia my associations with your chief executives—Governors Tuck and Battle—were most pleasant and rewarding.

Your present Governor, Hon. Thomas B. Stanley, is highly regarded throughout the South and the Nation for his leadership, his firmness on basic issues and his steadfast adherence to constitutional processes.

I commend you on the distinction and ability of your chosen leaders.

We, in Georgia, are grateful for their help, support and counsel in the fight to preserve our form of government in this country.

Virginia today is the No. 1 target of those who would destroy home rule and local self-government in this Nation. But I am confident that the people of Virginia will stand firm and meet this challenge in the tradition of Patrick Henry, George Washington, Thomas Jefferson, James Madison, James Monroe, Robert E. Lee, Woodrow Wilson and the other great leaders this States has given to the Nation and to the world.

My friends, I want to take this opportunity of discussing with you the most deadly threat ever to confront us.

That is, the steady and vicious attacks now being waged on two broad fronts, the end objective of which is the destruction of representative government in this country.

These attacks, clever and calculated in design, are twofold.

One is aimed at destroying constitutional processes and the protective safeguards of freedom they afford.

The other is aimed at destroying the Nation through internal bankruptcy.

Should either attack succeed, it will succeed with finality.

The attack on constitutional government goes to the very heart of our existence as a Nation.

That is true because once we lose our precious rights under that instrument, we cannot defend ourselves against any other threats, either from within or from without.

What threats have been posed to constitutional government in the last few years?

We have seen the United States Supreme Court, in a series of partisan political decisions, deliberately ignore the Constitution of the United States and substitute impractical and unproved theories for established law and precedent as the basis for its rulings.

We have seen the Federal judiciary invade and seek to obliterate the reserved rights of the States in many fields of their internal activity.

The Court has sought to prohibit the 17 Southern States from operating their public school systems in the manner they determine to be in the best interests of their citizens.

The Court has sought to outlaw sedition laws in 12 States, Alaska, and Hawaii.

The Court has forced Federal regulation of natural gas production in 30 States.

The Court has sought to limit the power of States and cities to discharge employees when they plead the fifth amendment against self-incrimination.

The Court has sought to usurp State authority in cases of criminal appeals.

These decisions are unconstitutional.

They are not the law of the land, as some falsely insist.

They are the judge-made law of force and force alone.

It is not the people of the South who defy the Constitution; rather, it is they who uphold it.

When a Federal district judge, acting under this doctrine of force, issues a blanket edict under which anyone exercising his freedom of speech can be haled into court and fined for criminal contempt without a jury trial, then, I say to you, it is time for us to take stock as to where we, as a nation, are headed. It should be the signal for the

restoration and reassertion of our cherished constitutional rights.

We will never submit to this unlawful and unconstitutional judicial tyranny.

We will resist its imposition with all the strength at our command.

We are not going to sit idly by while freedom of speech is destroyed and thought control is imposed on the people of this Nation.

We are not going to sit idly by while an unconstitutional, arbitrary, and illegal extension of Federal judicial power is attempted.

This is not only an attack on the rights of the States to govern their own affairs but also a gross abuse of judicial processes imperiling the civil liberties of every American citizen.

Equally dangerous to the liberties of all the people of the whole United States is the so-called omnibus civil-rights bill now pending before Congress.

This diabolical six-point program is a grave threat to our traditional concept of constitutional government.

If it is enacted, an army of Federal agents will swarm over every State, harassing and intimidating the people and usurping the functions of local law-enforcement authorities.

The so-called civil-rights commission which would be established by this legislation would have authority to summon on 24 hours' notice anyone from any part of the United States to any place it might designate to defend himself against charges of which he was totally ignorant prior to the receipt of the subpena.

Under the bill, the Attorney General of the United States would be empowered to represent private individuals and to bring legal actions and suits in their names whether they desire to go into court or not.

Still another section would write into law a provision overturning the legal doctrine of the ages requiring an exhaustion of administrative remedies as a prerequisite to judicial relief.

It is regrettable that the Congress is wasting its time and energies on such a measure.

The same effort applied along constructive lines to develop the human and natural resources of this great country; to stimulate new job opportunities; and to provide decent housing and more effective governmental services for the masses of our people—would result in the advancement of real civil rights and human security for minorities and majorities alike.

By this method, and by this method only, can we bring needed social and economic improvement.

Certainly, it is foolish to suggest that we can do it by destroying fundamental constitutional rights of every citizen.

Every fledgling lawyer knows that the real civil rights of every citizen of this country are contained in the first 10 amendments to the Constitution.

These 10 amendments have been known since the beginning of this Nation as the Bill of Rights.

They are written in plain, unmistakable language.

From them spring all the rights necessary for the preservation of life, liberty, and the pursuit of happiness.

I cannot emphasize too strongly the serious nature and far-reaching implications of this proposal.

It shall be my purpose to cooperate fully with your Senators and all those of like mind in the fight to prevent these measures from being foisted on the American people.

Another dangerous proposal is that of limiting debate in the United States Senate.

For all practical purposes there has been unlimited freedom of discussion on all issues in the United States Senate since the year 1807.

The present rule XXII, under which the imposition of cloture is permitted in the Senate, was adopted in 1917 and was revised in 1949. It provides for cutting off debate only after an affirmative vote of two-thirds of the Senators duly chosen and sworn.

This provision affords an adequate safeguard against abuse of the privilege of free speech and at the same time helps to maintain the delicate balance of powers afforded under our form of government.

The right of a Senator to present all of the facts in connection with an issue, to turn the light of truth, justice and fairness on that issue, goes to the very heart of the protection of minorities.

As long as the United States Senate remains a free and unfettered forum, as long as a vigorous and determined minority of Senators can present all of the facts concerning any measure, the rights of the people of this country will be more nearly secure.

So, we have seen, that through unconstitutional usurpation of power by the Federal courts, through proposed "force bill" legislation, through efforts to alter the longstanding rules of the United States Senate and through a myriad of similar devices, our system of government, as wrought by the Founding Fathers, is under sustained attack.

Not being able to carry their point under the system, its enemies have set out to destroy the system itself.

Of course, you and I know that if they succeed, they would not only destroy the greatest country on earth, but themselves in the process.

I am convinced, too, that the irresponsible fiscal policies being followed by our Government are a threat to our national existence.

Being such a threat, there is always the danger that a great deal of our spending may be prompted, without full justification, by those who would hasten the day of our insolvency.

Senator BYRD for many years has raised what appeared at times to be a lone voice against waste and extravagance in the Federal Establishment. Now, his legions are growing on the groundswell of a grassroots demand to cut nonessential spending.

During the last decade our Nation has shown the greatest growth of any period in its history.

Yet this growth is being imperiled by profligate spending policies.

The brave pronouncement of stabilizing the cost of living has fallen by the wayside.

During the coming fiscal year, the Federal Government expects to collect in taxes out of the people of this country the stupendous total of 75.8 billions of dollars.

This means that about one-sixth of the gross national product of the country will be paid in Federal taxes.

One wonders how long this Nation will survive such a drain on its economy.

The policy of hard money for the people and easy money for bureaucrats does not make sense to me.

There is no reason why the Federal budget should be any greater than that of 1955–56, which totaled $66.5 billion. By all economic yardsticks, it should be less.

The inflated $71.8 billion spending bill currently pending before Congress can be cut at least $5½ billion without impairing national defense or curtailing a single program of essential services affecting the masses of the people.

The only really effective way to trim Government spending—and I learned from experience as governor of a State—is through across-the-board budget reductions and refusal to inaugurate new spending programs. With the exception of defense and debt interest requirements, such a formula is needed to cope with the present Federal budgetary situation.

I favor such a cut of 6 percent which would save $1,584,000,000.

Additionally, I think the budget should be cut in four other ways. The first would be the discontinuation of all foreign economic aid—saving $1,800,000,000. The next would be the elimination of all but $1 billion of foreign military aid—saving $1,600,000,000. Thirdly, I would not enact the proposed program of Federal aid for education—saving $451,000,000. And, finally, I would reduce propaganda spending by $85,000,000—making a grand total budget cut of $5,520,000,000.

The across-the-board cuts could be absorbed almost entirely through a reduction in administrative costs, through institution of economy and more efficient practices and through streamlined methods without detriment to essential Federal services.

In fact, many agencies and departments are carrying over large amounts of money from year to year.

Tremendous defense and other savings could be realized through a continuing congressional review of all unexpended appropriations to determine their validity in the light of present conditions.

As far as the services themselves are concerned, appropriations to them should be determined in light of the latest technological advances as well as through a concerted effort to eliminate duplication and to reduce manpower through full utilization of latest developments and ideas in weapons and tactics.

In the field of foreign spending, the time has come for a thorough and sifting examination of each foreign economic aid proposal and for the same careful scrutiny of each and every military assistance project, to insure that the American taxpayer is getting his money's worth in national security.

Our government has grown so large and its activities become so extensive that no one disputes the fact that there is much waste in its operations.

My view is that the best way to eliminate this waste is through reducing appropriations.

By eliminating useless and nonessential spending, we can assure a continued balance of the Federal budget and make possible an immediate reduction in Federal income taxes of as much as 10 percent.

I am proud to associate myself with your senior Senator in his efforts to secure for the American people a sounder and more realistic Federal budget. I am optimistic that, as long last, his crusade in the interest of the oppressed taxpayer will this year be crowned with at least a measure of success.

I say with all candor that unless the present policy of Federal spending is held in check, all hope of a tax cut at any time in the future will vanish and we will be confronted with another round of Federal tax increases and more likely the imposition of additional new taxes.

I do not believe the American people will stand for this, but we are headed in that direction.

It is said that unless we in the United States scrap our archaic and outmoded conceptions of constitution law; unless we destroy trial by jury and other safeguards under the Bill of Rights; unless we adopt all manner of measures regulating human morals, racial and religious conduct; unless we discard our valued and long-established institutions; unless we scatter our wealth and resources to the four corners of the earth and unless we surrender our national pride and sovereignty, that Russia will exploit these failures or shortcomings against us.

Now, I ask, Who cares what Moscow thinks, says, or does?

It would be of little value to anyone if, in recklessly seeking to appease other countries, we destroyed our own.

If we make our policies to meet Communist criticism or propaganda, we should abolish private enterprise, representative Gov-

ernment, private schools, independent courts and every other institution of our society.

That brings to mind a legitimate question: Just whom are we trying to impress with our panicky and unstable policies?

By destroying our heritage, are we trying to impress some of the South American countries where military juntas preside over the life or death of every citizen?

Are we trying to impress the Communist butchers who tied the hands of American soldiers behind their backs and machinegunned them into a common grave?

Are we trying to impress the potentates of the Middle East in whose domains slavery is still the practice and maiming of the body is punishment for a minor infraction of the law?

Are we trying to impress the tribal chieftains of Africa?

Are we trying to impress the dictator Nasser who knows no law but force?

Are we trying to impress Nehru and members of his Congress Party of India where in the most recent election the caste system, sacred cows, communalism, and astrology were the issues foremost before the people?

Now, when this Nation reaches the place that her leaders are more concerned about what a foreign Communist propaganda agency does or says than they are about preserving the internal structure of our Government, than they are about protecting the rights and liberties of our people, than they are about maintaining the solvency and sovereignty of our Nation, than they are about upholding the reserved rights of the States and the people, then, my friends, we are in bad trouble and had better assert ourselves.

For once the flame of liberty afforded under our present form of government has flickered and gone out, it will never again shed its light and warmth over this land of ours.

Then it will be too late to lament over what once was or what might have been.

In conclusion, I make this observation.

Sometimes we may be justified in feeling frustrated with the policies of our Government.

But we must never sell America short nor should we discount the loyalty, courage, honesty, ability, and sincerity of purpose of the American people.

They have demonstrated again and again their intense determination to meet and to overcome whatever challenges may confront them.

Because of this, I am confident that this Nation will survive in spite of all the mistakes of its governmental leaders may make.

I hold fealty for both my State and my Nation.

In no instance has there been any conflict or problem for me for I know, as every loyal American knows, what is best for my State also is best for the country as a whole.

Washington needs to pause for reflection and for a reevaluation to realize fully once again from whence comes all freedom, all equality, all strength, all integrity, all security, and all those other precious attributes identified with our growth as a nation.

There must be a complete return and a sincere rededication to the fundamental teachings of the Holy Writ.

There must be a renewed respect for the true meaning of the Constitution and a respect for law as it is written.

There must be a practical recognition of the fundamental laws of nature.

There must be an instillment of sound business practices into the government.

And, there must be a solid determination on the part of all public servants to keep faith with the people.

Americans must be freed of the attendant evils of bureaucracy, red tape, intimidation and tyranny so that our people may once again be masters of their own destiny.

As for me, and the future of this country, I put my faith in Almighty God and in the sound judgment of my countrymen as we work shoulder-to-shoulder for right and justice.

To this concept, I am pledged.

To this concept, I give my energy and devotion.

Labor's Responsibility to Freedom

EXTENSION OF REMARKS

OF

HON. BARRY GOLDWATER

OF ARIZONA

IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. GOLDWATER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address I made this morning to the United States Chamber of Commerce.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LABOR'S RESPONSIBILITY TO FREEDOM

(Address of Senator BARRY GOLDWATER before the United States Chamber of Commerce, Washington, D. C., May 1, 1957)

A reference to your program will disclose that the subject of this discussion is Labor's Responsibility to Freedom. I do not intend to adhere to that rather confined topic because I feel that all of us have responsibilities to freedom, not labor alone; and, while certain leaders of labor today are doing more, I feel, to destroy some of the tenets of our freedom, I believe that all of us should pause at this time in our history and ask ourselves, "What are we doing toward our responsibilities to freedom?"

In proceeding to discuss this topic with you today, I intend to outline not only the responsibility of the leaders of labor to freedom, but also to touch upon what I feel is the responsibility of business and professional people to this same magnificent blessing.

Who is the enemy of freedom? If freedom is our thesis what is the antithesis? A philosophy of government, or of business, or of labor? None of these segments of society are any particular menace to freedom until they make power and authority their goal.

Any group which seeks to impose its will upon a single unwilling citizen through the exercise of unrestrained power outside the law, or by the corruption of the law, is the enemy of freedom. Power itself is the enemy of freedom.

Lord Acton once said: "Power tends to corrupt and absolute power corrupts absolutely."

History reveals the greatest violence to freedom has always been done by men or institutions who made power the supreme goal of their life. Power is invariably created as a collective effort and then exercised by one or two individuals using the power of the collective to enforce their personal wills to achieve their personal ambitions and goals.

Organization into like-minded groups with a common aspiration has produced much that is good in America. Our service clubs, our trade associations, our kids on the sandlots playing little league baseball, our political parties, and our trade unions—were all organized in an effort to unite like-minded men so that a goal beyond the reach or ability of any single individual might be obtained through collective effort.

I heartily subscribe to labor's trade-union principle. Trade unions sincerely concerned with bettering working conditions, with improving the skill of artisans, with preserving the integrity of a trade or a craft, have made a magnificent contribution to our 20th century society. In our Nation the dignity of honest labor has always been respected. No man has ever presumed to look down upon another because of his occupation, and I pray such a day will never come.

I went to school with a carpenter's son, the watchmaker's boy was my dear friend, and the captain of our football team was the son of a blacksmith. The fathers of these men were valiant servants of freedom.

They went to Cuba with Teddy Roosevelt. They built the railroads across the western plains. They harnessed the rivers and made the valleys green.

Their lifetimes of honest toil set a standard for the working man in America which is today besmirched and tarnished and dragged in the mud by certain labor leaders who have made absolute power their only goal, who defy the law, who employ violence and brutality to enforce their will upon those free workers who dare to rebel against the all-powerful union boss.

Freedom is menaced today by those leaders of organized labor who have renounced their historic responsibility to their union members and established political power as the total objective of their organizations.

The objective of labor organizations, as recognized in the Clayton Act of 1914, and in numerous pieces of legislation since that time, is collective bargaining and attainment of better hours and better wages for the working men and women of America. With those purposes, no American can find fault. Rather, all should encourage their advancement.

Today, however, certain leaders of labor bring to the bargaining table, not only the strength of their arguments, to which they are entitled, but they are able to place by their side and at their backs the power of politics. Mr. Reuther constantly cries out against big business and against the monopoly of big business. He decries any effort other than his own to find political favor through pressure upon the political parties of America. Yet, through the use of his almost limitless millions of dollars, and his likewise almost limitless manpower, he has practically dominated one political party and, in my opinion, has ceased to be a leader of labor and has become, instead, a leader of politics.

This constitutes a usurpation of power and, as I have said before, power is dangerous in the hands of anyone, be it management or be it labor.

Let's take a look at the power that certain leaders of labor have been able to amass in the labor field.

In 1955 Mr. Walter Reuther, commenting on the merger of the AFL–CIO said: "This will make labor one of the most powerful forces in the Nation."

Mr. George Meany said: "It goes without saying that labor unity will provide a more effective instrument for political action."

President Charles Schultz, of the Wisconsion CIO, had this to say: "Most of the membership realizes that political action is the right arm of collective bargaining." And then he added: "We know that if we had a Democratic governor in Wisconsin the Kohler strike would have been won."

In the Senate of the United States the McClellan committee, of which I happen to be a member, is currently investigating alleged tieups between the leaders of organized labor and racketeers and vice. With great piety Mr. Walter Reuther has called for a cleanup inside labor. He has, by inference, condemned those leaders who have used union funds for their personal benefit.

May I emphasize that it was the misuse of union funds which produced these wails of anguish from Mr. Reuther? And may

I suggest that the freedom of the individual and the safety of the individual is far more valuable than all the moneys in all the union treasuries in all the world.

In the single instance of the strike against Kohler in Wisconsin, Mr. Reuther and the UAW have done more damage and violence to freedom than was accomplished by all the peculiar financial transactions of Mr. Dave Beck.

The strike against Kohler has been given only passing attention by the liberal press of our Nation. It is perhaps hardly newsworthy because these same tactics of brutality and violence have been used so many times in the past.

If not newsworthy, the actions of the UAW against Kohler are certainly worth reporting as a typical example of the lawlessness of a power-hungry labor union determined to impose its will upon the free workers of an industrial plant.

On April 5, 1954, a group of Mr. Reuther's Automobile Worker's Union members went out on strike against the Kohler Co., of Kohler, Wis., a manufacturer of plumbing fixtures and fittings. Following a back-to-work movement the plant was reopened. Today that strike is still in progress. The issue at stake is union control of employment at the Kohler plant.

The union first asked for a strict union shop—this, despite a Wisconsin right-to-work law. It finally said it would settle for maintenance of membership clause, one which would require that union members maintain their membership in order to keep their jobs. Herbert Kohler, the company head, believes in the right to work for any man and has refused to surrender to the union.

Mr. Walter Reuther dispatched Emil Mazey, secretary-treasury of the UAW–CIO, to the Kohler plant to run the strike. Mazey took with him a collection of union thugs. One of his associates was William Paul Vinson, a 27-year-old, 6-foot, 200-pound organization expert.

William Paul Vinson slipped up behind 50-year-old, 140-pound, Willard Van Ouwerk, who, with his wife, had been shopping in Sheboygan, and struck Van Ouwerk from behind, knocked him unconscious, kicked him, and trampled him, sending him to the hospital with internal injuries, a crushed chest, a pierced right lung, and four fractured ribs.

This, may I emphasize, was an assault upon a free American who had never done any harm to William Paul Vinson or to Emil Mazey or to Mr. Walter Reuther. Mr. Van Ouwerk's great offense was that he had refused to join the union and strike the plant.

In the course of time Vinson was brought to trial before a jury of 4 women and 8 men. Vinson was identified by five witnesses as the perpetrator of that vicious attack. The jury found him guilty and a circuit court judge of the State of Wisconsin sentenced him to serve 2 years in the State penitentiary.

The union's reaction to this orderly process of law was authorized by Mr. Emil Mazey.

Mr. Mazey castigated the judge, questioned his integrity and his ability, and then ordered union members to stay away from three small grocery stores because the judge owned a small amount of stock in these American businesses.

The strike at Kohler continues. The union under the direction of Mr. Walter Reuther, and through his lieutenant, Mr. Mazey, has used every method ever employed to win a strike. It has used violence, it has brought in goons to instill fear. More than 700 acts of violence and vandalism against nonstrikers, including brutal beatings, shotgun blasts into windows of homes, dynamiting of homes have been reported since the strike began.

And Mr. Walter Reuther's union has spent more than $12 million of union funds in an attempt to win this strike.

The issue has gone far beyond any desire to win a strike. Mr. Don Rand, international representative of the UAW and one of Mr. Reuther's boys, recently made this statement: "It seems to me it is almost sinful to have any labor dispute degenerate to the point this one has where we actually have to wreck the company—that's what we're doing, wrecking the company."

In the name of freedom, I ask you—does Mr. Reuther have to wreck the company to satisfy his lust for personal power over the employees of the Kohler plant? It is almost sinful, says Mr. Rand, to destroy an American business and the jobs of American working men because the American business will not surrender its freedom to the dictates of Mr. Walter Reuther.

And how is the union going about its efforts to destroy the Kohler Co.?

Well, they sent in goon squads to incite riots at Sheboygan, Wis., to prevent a supplier of English ceramic clay from unloading his vessel for transshipment to the Kohler plant.

Then the union used its power and influence to prevent the unloading of that vessel at Milwaukee.

In the name of freedom I ask you—is this America? Where force and violence can be used with impunity to destroy the peace, to impose the will of one man upon a community or upon a manufacturing plant.

In this strike we see the long strong arm of the political power of Mr. Reuther. Unfortunately nine governmental bodies in this free Republic have succumbed to union pressure and have enacted legislation to create a compulsory boycott of the Kohler products.

Oh, the union wasn't quite so direct as to ask these governmental bodies to enact an embargo against the purchase or installation of the Kohler products specifically. No, they are much cleverer than that. They secured the enactment of legislation to prevent the installation of products from any plant which was being struck by a union.

I ask you, how could Lincoln Park, and River Rouge, Mich., or Bristol or New Britain, Conn., or the Massachusetts House of Representatives, or Boston or Lynn or Worcester, Mass., or Los Angeles County, Calif., so desert the principal of freedom as to bow down to the will of this one man, Walter Reuther, and his ruthless, determined attempt to rule or ruin the Kohler plant?

"How?" I have asked. Political power is the answer, and power in the hands of any man is not good.

Let me cite another example, a report in the Chicago Tribune of July 29, 1955. On that day Angelo Inciso, an ex-convict and top man of local 286, of the AFL workers, served notice upon Rear Adm. Daniel V. Gallery, Chief of the Naval Air Reserve Training, that union pickets were prepared to stop all truck deliveries into Glenview Naval Air Station.

Trucks were stopped and there was no incoming traffic. Now why was this union picketing the naval station? Not because of any action taken by naval authorities or Navy suppliers, but because four sailors on permanent duty at the station had been working nights when off duty at a small electronic shop.

Perhaps the sailors had wives and children. It's just possible that they thought they were free to earn a few extra dollars to supplement their Navy pay, to buy necessities or conveniences for their wives, their children, or themselves. But this did not suit the concept of America nourished by Angelo Inciso, union boss and ex-convict.

Who won this battle? The union won the battle, and the then Under Secretary of the Navy, personally telephoned the base to give his orders to instruct the four sailors to give up their employment.

Oh, yes, Mr. Walter Reuther believes in freedom. He and the members of his union are quick to stand upon their rights as American citizens whenever and wherever their brutal tactics of absolute power have been questioned or criticized.

Mr. Walter Reuther also believes in freedom to spend the money collected from union members in any fashion he may desire, and Mr. Reuther insists that freedom encompasses his right to spend union dues money for political purposes at any level.

Mr. Reuther defends his spending of compulsory dues money for political purposes by saying that they do not spend this money in national elections, but use only contributed money. Mr. Reuther ignores the moral error in this practice while, at the same time, speaking from every platform about the moral rightness or wrongness of issues. I ask him, "What is morally right about spending the dues money of members of one political faith to defeat candidates of that same faith?"

It makes no difference whether this money is spent at the national level, the State level, the county level, or the local level. It is morally wrong and Mr. Reuther knows it. Yet, he continues to do it.

Why? Because money can bring him political power, particularly when this money is coupled with the thousands of men he can put in the field for political purposes. Mr. Reuther proclaims that he is a stanch protector of freedom, but Mr. Reuther denies the political freedom of his own members.

Mr. Reuther believes in the right and freedom of Mr. Emil Mazey to openly castigate a duly elected judge of the courts of the State of Wisconsin.

And Mr. Reuther undoubtedly believes in the freedom of Mr. Mazey to order a boycott on a grocery chain in order to do some injury to the judge who presided at that trial.

Mr. Reuther believes in the freedom of Jim McDevitt to appear at a banquet given in honor of four convicted union leaders in Scranton, Pa.

Mr. Reuther believes in freedom—his freedom to use political force to obtain the ordinances which have been enacted to penalize the sale of Kohler products in those nine communities.

And we can assume that Mr. Reuther would defend the freedom of his bully boy, William Paul Vinson, to assault a 150-pound peaceful nonstriker and send him to the hospital for 22 days.

And we can assume that Mr. Reuther would defend his freedom to dispatch 400 union "toughs" to the town of Clinton, a town, mind you, with only 1,600 population.

Mr. Emil Mazey took these 400 union muscle men to Clinton. Mr. Walter Reuther would defend his freedom to use political power to prevent the extradition of a unionist who was accused of an assault on a nonstriker and then fled to Michigan to escape prosecution.

Mr. Reuther speaks loudly in the name of freedom. He speaks out against big business and the dangers of their monopoly. But he carefully ignores the monopoly and the power of that monopoly in politics which he himself has created. For example, at the Democratic National Convention in 1956 there were over 200 delegates who were not just rank-and-file union members but who were leaders in the labor movement.

Now, I don't decry union members or union officials being delegates to national conventions. In fact, the Republican convention had over 60 who were rank-and-file members of the union movement. But when Mr. Reuther can dispatch over 200 delegates to a convention, I suggest to you that that is the breeding of power of the worst kind.

Mr. Walter Reuther would defend his freedom to instruct every paid employee of the UAW in Michigan to get out and work for the Democrats—and to recruit hundreds of additional workers and pay them with union funds.

Mr. Reuther would defend his freedom to ask men to leave their jobs and work for a political party, and these men are paid out of union dues—dues, mind you, that were collected from members of both parties. One thousand, five hundred and eighty men worked for an undisclosed number of days at a salary of $20 per day, plus $5 expenses, which, by my calculations, totals $37,000 a day. These men were employed to impose and enforce Mr. Reuther's political will upon the free voters of Wayne County.

Mr. Reuther urges that organized labor take the leadership in world affairs. Is he suggesting that the man at the lathe, or the man with the wrench, or the man at the drawing board, drop his tools, don striped trousers and become the leader in world affairs? Or, isn't he saying, in fact, that the labor leaders, such as himself, should assume that world leadership?

Mr. Reuther believes in the political and economic philosophy of the Americans for Democratic Action. He believes in and is a member of the Committee of the "Conference of Economic Progress," an organization that believes wholeheartedly in the Federal Government controlling our economic system.

Mr. Reuther believes in a liberal program for America. Not the kind of liberal program that the true liberals of history have espoused, but a liberal program based upon Federal control and Federal domination of our lives. Another of our great labor leaders, Mr. Meany, has echoed this belief, although it is difficult for me to believe that George Meany believes in the economic or political philosophy of Mr. Reuther. Mr. Meany said, "While the 85th Congress will not be predominantly liberal, we now have renewed hope for accomplishing that objective in 1958."

Before that, on November 25, 1955, Mr. Meany said: "It goes without saying that labor unity will provide a more effective instrument in political action. Our major objective is to elect strong, liberal majorities in Congress."

What right do Mr. Reuther or Mr. Meany have to stand up and speak for 16 million Americans, on the assumption that the labor movement will elect a liberal Congress?

I know working people. I employ people. I have worked with people all of my life, and I don't think the working people of this country want the kind of liberalism that Mr. Reuther espouses any more than they want outright socialism. But, on the other hand, what Mr. Reuther preaches is socialism.

Power is the root of evil. Power is the enemy of liberty. And here we have a most obvious example of a man's personal desire for political power being exhibited across America. Mr. Reuther said on November 30, 1955, "With the forthcoming merger of the CIO and AFL * * * will make labor one of the most powerful forces in the Nation."

Now, if he wants to use that power for collective-bargaining purposes, then he is within the limits of his constitutional and moral rights. But if he persists in using that power as he has been, to control a political party, in an effort to control the politics of America—then he is out of bounds.

You may doubt the far-reaching effects of this political power. If you do, let me read you a short sentence or two from the report of the executive council of the American Federation of Labor for the year 1953. This statement was made in connection with the recommittal to the committee of a bill which would have amended the Taft-Hartley Act in certain respects. Among those amendments was one that I had proposed which would give the States more power in settling labor disputes. Here is the long, strong arm of the union leaders reaching into the Senate of the United States, and I quote: "We, therefore, permitted the debate to continue for a couple days and then Senators X and Y presented fair labor practice amendments. This, of course, put the southerners on the spot because they were obliged to oppose this and it also did the same for the Republicans who, as a party, are supposed to favor the proposal. The A. F. of L. was opposed to a FEPC proposal being added to a labor bill. We then made arrangements with Senator Z to offer the motion to recommit before any amendments were voted on and as all factions were fearful and more or less confused, they voted to recommit the bill, 50 to 42."

Mr. Reuther believes that it is perfectly all right for labor to flex its political muscles in the Senate of the United States but he thinks, at the same time, that it is wrong for businessmen or professional men to do the same thing. I don't condone this practice. In fact, I regret that any group in America, whether it be labor or business, has the political power to go to the floor of the Senate and disturb the normal operations of that body. I mention this to you only to show you the extent to which the political power of these men has grown through their immoral use of dues money and manpower.

May I suggest that Mr. Walter Reuther is free to exercise his talents as a leader of a true trade-union movement in the United States? He is also free to enter politics and to utilize his talent for organization in either political party or form a new one.

May I suggest that Mr. Walter Reuther's present program of exploiting the labor-union movement to create a machine for personal political power is an affront to freedom and a challenge to every citizen in our Nation?

Now is the time for the working men of America to rise up against this cynical perversion of the union movement by certain labor leaders.

Now is the time for the working men and women of America to reaffirm their faith in the freedom and integrity and importance of the individual.

Now is the time for every citizen of this free Republic to renounce and condemn those who seek to fashion machines of absolute power.

Now is the time to reject and renounce that collectivist philosophy which regards man as too weak or too stupid to care for himself and proposes that man can only meet his destiny through the machinery of an all-powerful organization.

I suggest to Mr. Reuther this morning that he seriously and carefully ponder the position in which he finds himself. He can be a leader of labor and obtain for labor, through collective bargaining, those things to which they are entitled, or he can become the leader of a political movement. I suggest that he cannot be both at the same time because if he tries to do this he most certainly will destroy the very house for which he speaks in such passionate terms—the house of labor.

A political party cannot be a bargaining agent in this free country. A political party cannot dictate the terms under which labor and management will work. That is only done in Communist Russia and in Red China and in the other countries dominated by the Communist doctrine. Let Mr. Reuther remember, and forever remember, that the American people abhor power centralized in any one person or group of persons, and that they will not stand for a continuation of his trying to be, at one and the same time, a leader of labor and a leader of a political party.

The labor movement can be jeopardized—yes, seriously injured—if Mr. Reuther continues to misuse union funds for political purposes and continues to use the collective strength of these organizations to impose his political will upon the people of this country. When organized labor takes on the appearance of an overall political party, it invites opposition where none might otherwise develop. If organized labor wants to abandon its historic role and become a political party, that is the right of its members so to decide, but it is not the right of one man to impose his will upon the Nation's political scene as representing the will of his membership.

Let me, in conclusion, touch upon what I feel is your responsibility to freedom. You, the business people of this country, have neglected your responsibility to the defense of the free enterprise system. You have done this to the extent that young people across America actually fear our profit system, instead of respecting it as the creator of much of our economic success. You have been afraid, up until reent years, to take stands on issues, issues that affect not only you, but the entire country.

You are to be commended for having changed that "head in the sand" attitude. The business people of America have a great reluctance, even today, to engage in politics with either party, preferring, as I have heard many of you say, to keep clear of politics because of business reasons.

Let me tell you something: while you pussy foot and hide, there are organized groups of people in this country who are determined to impose their Socialist views upon the minds of America. So, lose your fear of political participation and join with all Americans to the end that a healthy political climate will be maintained in this country.

Yes, all of us have a responsibility to freedom. As Benjamin Franklin told a woman on emerging from the constitutional convention when she asked, "What have you given us?"—"We have given you freedom, if you can keep it."

Fredom cannot be kept by governments only, because Governments under our concepts were created to be the servant of the people. Only you, the citizens of America, through your neglect of Government and political forces, can destroy our freedom. Only you, by pursuing the material more than the spiritual, and ignoring the latter, can destroy the freedoms of America.

Let the voice of your conscience speak out against those who would cynically employ brutality and terror to enfore their will on free men.

Now is the time for a passionate devotion to those standards of individual integrity which made this Nation great.

Now is the time when you and I must join together to give to this land we love and to all human beings, wherever they may be, a new birth of freedom, under God.

The Great Giveaway Praised

EXTENSION OF REMARKS

OF

HON. HERMAN E. TALMADGE

OF GEORGIA

IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. TALMADGE. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD the reviews of Eugene W. Castle's new book The Great Giveaway, as published in the April 4, 1957, issue of the Los Angeles Times and the April 11, 1957, issue of the New York World-Telegram and Sun.

There being no objection, the reviews were ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times of April 4, 1957]

THE BOOK REPORT

(By Robert R. Kirsch)

Consider, in this season of income taxes, the sum of $55 billion. It is a sum worth

considering: If all the farmers worked 2 years, the total value of the crops and products they brought to market would not equal this amount; all the consumer debts in the United States, including notes held by banks, come to little more than half of $55 billion; it is nearly twice as much as all Americans paid in 1955 individual Federal income taxes.

Yet $55 billion has been the cost so far of America's foreign-aid program. And billions more will be added in this year's budget. The long-range plans for foreign aid will cost further billions.

It is high time, according to Eugene W. Castle, author of The Great Giveaway (Regnery: $3.50), that Americans ask some basic questions about foreign aid: "What have we done? How have we done it? At what cost? With what results?"

Mr. Castle, an experienced newsman and observer of public affairs, suggests some pointed answers to these questions. You may disagree with some or all of them but you should be aware of the impressive facts he presents in support of his viewpoint. In any case, after the expenditure of $55 billion, we ought to take a long, hard look at what the Marshall plan and mutual-security program have accomplished, and, look at alternative policies to foreign aid.

On the credit side of the ledger, Mr. Castle views the lend-lease program and the Marshall plan as having been vindicated by worthwhile results, although he has some misgivings about the administration of both programs. Lend-lease, he says, was "in an historical emergency * * * our only feasible alternative to abjection."

"Although we probably blundered into the Marshall plan, rather than planned it, it was a plus achievement," he writes. It aided a Western Europe "which was a red scar of economic disintegration. * * * An economic pulmotor was needed to restore the breathing process. * * * The Marshall plan billions supplied that pulmotor. * * * But the Marshall plan was probably the last of the necessary programs."

But even the Marshall plan, the author says, should have taught us some important lessons. There were mistakes of both emphasis and administration. The nations we helped showed ill-disguised resentment of American postwar policies. We should have become aware of the backlash of the experience in terms of a truism as old as man—you cannot purchase friendship or respect. The beneficiary can be hostile to the benefactor.

Still, even this is not the most important consideration. It is Castle's belief that you cannot begin to evaluate the foreign aid program without investigating and questioning the entire foreign policy of the United States. Thus far, no far-reaching inquiry has been possible. Foreign aid has been sold as a magic nostrum to insure peace. The question is, will it insure peace? And what will its staggering burden do to the economy and society of the United States?

He lists the dangers of the foreign aid program as presently carried out:

The aid program is haphazard and crisis-ridden, improvised step by step to meet existing or fancied emergencies.. Inevitably, a point is reached where a policy, helpful perhaps in the teeth of an emergency, becomes hurtful as a permanent American commitment.

The aid program is a distinct deterrent to * * * a rational foreign policy since every move is first predicated upon the giving of money.

The burden of the aid program has an inflationary and debilitating effect on our national economy, sapping our substance and national wealth, placing ever-increasing demands on the American taxpayer.

These points may or may not strike a sympathetic chord in your own thinking but they must be considered by every thinking American. This book could be the start of a national debate as crucial as any in this country since pre-Civil War days.

[From the New York World-Telegram and Sun of April 11, 1957]

CASTLE RAPS BIG GIVEAWAY OF UNITED STATES CASH

American tax dollars have provided dress suits for Grecian undertakers, public baths for Egyptian camel-drivers and iceboxes for Eskimos. They have built roads that go nowhere and villages nobody wants to live in. They also have financed foreign plants to compete with American industry.

Those charges are recited in a slashing attack on foreign aid by Eugene W. Castle in The Great Giveaway, to be published April 15 by the Regnery Co., Chicago. Mr. Castle, founder of Castle Films, devotes a large portion of his book to criticizing President Eisenhower and his administration.

DIVIDES BLAME

Assailing the expenditure of $60 billion on foreign aid during the last decade, Mr. Castle accuses Democrats and Republicans alike of following the same star. He says: "Its every twinkle spells out 'spend freely for foreign aid.' By the light of that star, Franklin Roosevelt led the Nation. Harry Truman followed, and to him the light was brighter. As they trod, so treads Dwight Eisenhower, the most liberal of the trio.

"The opposite numbers in politics followed the same will-o'-the-wisp beckoning. Wendell Willkie, Thomas Dewey, and Adlai Stevenson have been one-worlders all in the golden light of mutual security."

Mr. Castle charges that every investigation of foreign aid expenditures has been a whitewash. He describes a congressional probe, headed by Representative JAMES P. RICHARDS, Democrat, of South Carolina, as a "lovefest of believers," and charges that its membership was "carefully handpicked for their pronounced proaid sentiments."

He claims that the White House was so pleased with the favorable report of the Richards Committee "that President Eisenhower appointed its chairman * * * as his ambassador to head the new American mission to dispense $400 million of foreign aid funds in the Middle East."

In a blistering assault on helping neutralist nations, he states: "The idea that our money can purchase the allegiance of neutralists or potential enemy nations is a trap for confused minds. There is something seductive about the belief that we can substitute subsidization for statesmanship. It seems to be an easy way out * * * we cannot buy lasting friendship or an easy peace."

BUYING OUR WAY

He adds that "in today's setting the task of evolving a workable American foreign policy * * * requires the highest and most courageous type of statesmanship. But we are not exhibiting such statesmanship when we attempt to buy our way out of difficult international situations."

Mr. Castle also levels his guns on the United States Information Agency, which is directly under the White House. He describes it as a "$140 million-a-year cave of winds, politically created and maintained."

He claims it "has harmed instead of helped the thinking of millions of foreigners who were once our friends; but it has been a veritable master at the art of mind-conditioning the American people at home."

CAN'T WIN

Mr. Castle charges that "we have sent our dollars marching sixty billion strong over the world's far lands in quest of mutual security. The prize, like a will o' the wisp, has eluded us. The world is still in turmoil and danger. There is no security, mutual or otherwise."

In investigating foreign aid, he says, "the taxpaying American citizen learns grimly that he can never win. The practical men who champion our aid program see to it that the sucker never gets his proverbial break. He must play the game, with the foreign-aiders, with a stacked deck of cards. When foreign aid is investigated it is only the yes men who are heard."

Economic Assistance for Indians

EXTENSION OF REMARKS

OF

HON. MILTON R. YOUNG

OF NORTH DAKOTA

IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. YOUNG. Mr. President, on behalf of my distinguished colleague [Mr. LANGER] and myself, I ask unanimous consent that there be printed in the Appendix of the RECORD the testimony of the Honorable John Hart, executive director of the North Dakota Indian Affairs Commission, given before the United States Senate Subcommittee on Indian Affairs on March 27, 1957. Mr. Hart appeared in support of S. 809, which would provide economic assistance and urge the establishment of industry on or near Indian reservations.

Mr. Hart has been one of the leading exponents of the theory that opportunity for gainful employment for the Indian people will go a long way in correcting many of the serious problems that confront our Indian people.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

STATEMENT OF JOHN HART, EXECUTIVE DIRECTOR, NORTH DAKOTA INDIAN AFFAIRS COMMISSION

Mr. HART. Mr. Chairman, I had been hopeful of hearing the report of the Department of the Interior on this bill before testifying.

Senator CHURCH. Mr. Hart, if you would prefer to defer your testimony until after the other witnesses have testified, I would be happy to accommodate your request.

Mr. HART. It is immaterial. It is just a matter of information. There might have been something I could eliminate.

Senator CHURCH. You may go ahead now. If there is anything you would like to add after you have heard the other testimony, if you will advise me I will see to it that you are given an additional opportunity to testify.

Mr. HART. Thank you very much.

The North Dakota Indian Affairs Commission approved the purpose of this act in attempting to encourage industrial development on and adjacent to Indian reservations.

If there is any answer to the economically depressed Indian area problem, it is expertly planned, judiciously financed industrial development.

In solving this problem we need to utilize to the fullest the available experience of government in the field of industrial development and industrial financing.

To settle for less than the best experience we have available in government in each of these fields, industrial development and industrial financing, will not solve economic problems.

It will only delay the solution. Our hope is that this is not just another program to rehabilitate our Indians. Many Indians do

not want to be rehabilitated again. They just want steady employment near their homeland.

Therefore, we sincerely and most respectfully request that this committee consider the following suggestions with a view in mind of effectuating the long-term objective of this bill.

Senator CHURCH. Mr. Hart, at this point before you detail the suggestions that you are going to present to the committee, I wonder if you would, for purposes of the record, identify yourself and your experience in Indian affairs and your connection with Indian problems.

Mr. HART. My name is John Hart. I live at Rollette, N. Dak. By profession I am an attorney.

I served as county attorney out of Rollette County in North Dakota two terms, a total of 4 years. The county I served as county attorney contains approximately one-half of the Indian people in the State of North Dakota.

I am presently employed on a part-time basis and have been for the last 7 years as executive director of the North Dakota Indian Affairs Commission.

The North Dakota Indian Affairs Commission is an official agency of the State government created and financed by the Legislature of the State of North Dakota.

The commission is composed of the heads of the various departments of the State of North Dakota, the chairman of the board of county commissioners of all of the counties having Indian reservations.

The chairman of the board is an ex-officio chairman, that is, the Governor. No members are appointed. All members of the commission serve by virtue of having other positions in State government.

I am also a member of the American Development Industrial Council which may mean something and it may not, sir.

Senator CHURCH. Approximately how many Indians are there in the county in which you once served as prosecuting attorney?

Mr. HART. Approximately 5,000, sir.

Senator CHURCH. How long did you serve as prosecuting attorney?

Mr. HART. One term before the war and one term after the war.

Senator CHURCH. Thank you very much. I think that that information will be helpful as part of the record. Now you may continue.

We believe our suggestions are worthy of serious consideration. Our first suggestion is that paragraphs 1, 2, and 3, of subsection A, of section 2, be amended, in effect providing that the Small Business Administration be the gift or loaning agency in implementing the purpose of this act.

In making this suggestion we are not unmindful of the history of the Government effort on behalf of the Indians. We are not unmindful of the large sums of money Congress has appropriated in an effort to help the Indian people. We are not mindful of the sacred and almost unlimited obligation of the Government to economically provide effective assistance to Indian people.

We again are not unmindful of our past failures and we are not pointing the finger of shame at anyone or any agency of the Government.

We are responsible for our past failures; the Bureau of Indian Affairs is our Government's acknowledged expert and specializes in the field of Indian affairs.

At this point and for the purpose of this bill, it is not a specialist in the field of Indian affairs that is needed. What is needed is an agency specializing in the field of industrial financing.

Fortunately, the Government has such an experienced and specialized agency in the Small Business Administration. In making loans to tribes we desire that Congress utilize the best experience available in Government in order to where it is humanly possible prevent failures of ventures which could result in tribal income being mortgaged for the next generation and thereby crippling future tribal effort.

An Indian tribe paying off a bad business loan in my part of the country, called paying for a dead horse, may and probably will retard this laudable effort of the Bureau of Indian Affairs in getting its feet wet in the highly competitive field of attracting industry.

Senator CHURCH. I understand from your testimony that it is your recommendation, Mr. Hart, that such public money as may be made available should this bill pass for loans to Indian tribes to facilitate the construction of businesses on or near the tribal lands, ought to be made through the Small Business Administration, or ought to be made under the supervision of the Small Business Administration rather than the Bureau of Indian Affairs?

Mr. HART. Yes, sir. We feel that the Bureau of Indian Affairs is an expert in the field of Indian affairs, but the essential thing that is needed here is experience and judgment in industrial financing.

We believe that the Small Business Administration has all that experience, has the technicians available so that these loans that are made to tribes will be made on the best business basis available.

One of my fears is that if the tribe gets a heavy loan, the thing fails, the tribe can be crippled in the future as to all of its efforts.

We feel that the chances of failure are going to be less if the industrial financing phase is done by the Small Business Administration.

Senator CHURCH. I understand.

Mr. HART. It is a matter of where they have the specialists and have the judgment to guard against the defects, we feel.

Mr. GAMBLE. Mr. Hart, are you familiar with Senate bill 964, commonly known as the Area Redevelopment Act?

Mr. HART. I am familiar with two bills. One is a Republican bill and one is a Democratic bill.

Mr. GAMBLE. This was a bill introduced by Senator DOUGLAS. It is almost identical with legislation that was passed by the Senate last year.

Mr. HART. I am somewhat familiar with it, sir.

Mr. GAMBLE. Are you familiar with section 9 of that bill?

Mr. HART. I was familiar with it last year, sir. I am not at the moment familiar with it.

Senator CHURCH. Owing to the fact that the bells indicated a live quorum, I am going to have to recess the hearing for the time being in order that I can go over to the Senate floor.

I will return as quickly as possible and we can take up your testimony from that point.

I am sorry for the delay.

Mr. HART. Thank you, sir.

(A short recess was taken.)

Senator CHURCH. The hearing will be in order.

I think that we will be subject to a series of calls throughout the course of the hearing. Though this is regrettable, I think we will have to look forward to other interruptions.

Now, Mr. Hart, you were testifying at the time that the recess was called. Will you be good enough to take up your testimony at the point of interruption, please?

Mr. HART. Thank you, Senator.

Again we base our recommendations on our belief that the encouragement of industry does not require a specialist or a specialized agency in the field of Indian affairs, but does most importantly require a specialist and a specialized and an experienced agency in industrial development or area development, or in attracting industries or whatever you wish to call it.

The idea of industrial development on or adjacent to Indian reservations is gaining momentum. The least the people of the United States can do is to place this responsibility for guidance and technical information and necessary assistance under the direction of the one agency of the Government that fortunately has the necessary experience available.

In this truly important movement we cannot settle for anything less than the best.

It is our belief that from the Department of the Interior's report dated April 24, 1956, on Senate Joint Resolution 83, a copy of which I wish to present, the Department of the Interior would welcome Congress utilizing the experience now possessed by the industrial development experts in the Office of Area Development, Department of Commerce, by charging that Office with the primary responsibility for the objectives sought by this act.

The Commissioner of Indian Affairs and the Secretary of the Interior gave active support to Congress utilizing the experience and technical personnel of the Public Health Service in the highly technical field of medical care of Indian people because experience and technical training was needed to do that important and up to then neglected job.

Specialists in the field of Indian affairs are not the answer to the health needs of Indians. We believe specialists in the field of Indian affairs are not the primary need in developing the idea of industrial development on or adjacent to Indian reservations.

Meat and potatoes and bread and butter and decent housing is needed and will be supplied if the employment is steady and near the Indian's homeland.

We have no comment on section 4 authorizing $200 million. We are not experienced in industrial financing. We are not industrial development specialists with the necessary experience to properly evaluate the cost and financial need.

Perhaps more than $200 million is needed, but we will gladly defer our inexperienced theories to those who have experience and training and who can properly appraise this need.

In closing I would like to take one more moment of the committee's time to reemphasize the historical importance of the subject being considered today by reading three paragraphs from the report of North Dakota Indian Affairs Commission:

"The industrial development approach has stirred up the imagination of tribal groups, local communities, and those who are interested in the welfare of Indians, including American Indian Affairs, Inc., and most religious groups directly connected with missionary work among Indian people.

"It is the considered opinion of the Commission that the industrial development idea of the Government is closer to the historical solution of economic problems of the reservation Indians than any other program advanced by the Government thus far.

"The advantage of the Indian people being able to live in their ancestral homeland while at the same time being able to provide by their own labor the necessities of life for themselves and their families is obvious. This type of assistance eliminates many of the disadvantages that are found in regular welfare programs or in unearned income type of programs.

"It results in the growth of human dignity, self-respect, and self-confidence. It results in those being employed being put on an economically equal basis with the non-Indian people of the community where employment is on a nonsegregated basis. It encourages people to associate with non-Indian people in their day-by-day work relations in turn in an evolutionary manner, destroys those antagonistic racial felings which in some cases exist between individuals of economic or social groups."

Although I spend a lot of time needling the Bureau of Indian Affairs, I would like the record to show that the North Dakota Indian Affairs Commission admires the courage of the Commissioner of Indian Affairs in recommending repeal of the discriminatory Indian liquor law and in working hard and determinedly in transferring the responsibility for the Indians' health to the Public Health Service.

Perhaps more than the two items is his courageous attacking of the highly competive field of attempting to encourage industry on and adejacent to our Indian reservations. The courageous step has been taken.

The serious problem before this committee, as we see it, is effective implementation of the effort. I do sincerely thank the committee for your time and attention and as a remembrance I am giving you a fine jewel bearing made by the Turtle Mountain Chippewa Indians.

We refer to this as the Langer jewel bearing plant. This industry employs approximately 75 or 80 percent Indian people. It is nonsegregated. It is located geographically to give all possible advantages to the Indian people, but they are not hired on the basis of being Indian or non-Indian. They are hired on the basis of people.

We believe that the social results have been very worthy.

Senator CHURCH. Thank you very much, Mr. Hart. I assume that this jewel bearing now becomes the property of the Government?

Mr. HART. It was the property of the Government. It now becomes your property.

Senator CHURCH. First of all, let me ask you, Mr. Hart, if the letter, copy of the letter you handed me a few minutes ago addressed to Senator MAGNUSON from the Assistant Secretary of the Interior, is meant to be included in the record?

Mr. HART. Yes, sir; it is merely a matter showing the Bureau of Indian Affairs at one time approved the idea of assistance of another department and we believe it sustains the point of view that we have.

Senator CHURCH. Very well.

The letter will be included in the record at this point.

Depletion of Oregon Timber

EXTENSION OF REMARKS
OF

HON. RICHARD L. NEUBERGER
OF OREGON

IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. NEUBERGER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a cogent editorial from the Oregon Labor Press of April 19, 1957, entitled "Who Will Rescue Oregon When Our Timber Is Gone?" I also ask permission to include an interview with me by Paul Hauser which appeared in the Oregonian, of Portland, Oreg., for April 21, 1957.

This interview describes some of my views on the unfortunate economic situation which has brought Oregon's average incomes on a downhill slide during the past 10 years, in relation to the national average.

I present this material for the attention of the Senate so that other Senators can study some of the economic problems affecting a major region of the Nation—the Pacific Northwest. These problems require national solution, and they demand new policies from the Eisenhower administration; namely, an end to the hard-money program and a return to the Bonneville low-cost-power program.

There being no objection, the article and editorial were ordered to be printed in the RECORD, as follows:

[From the Oregon Labor Press of April 19, 1957]

WHO WILL RESCUE OREGON WHEN OUR TIMBER IS GONE?

Statistics may be dull, but they can be wonderfully revealing.

A monthly statistical bulletin is issued by the Oregon State Unemployment Compensation Commission. It's full of graphs and charts and tables and percentages and averages. They're not very inspiring to read, but often they reveal vital information that can't be found anywhere else.

This month's bulletin is especially interesting because its cold statistics actually reveal why it's so tough to find a job in Oregon today and why Oregon seems to have slumped into an economic recession while other States enjoy greater prosperity.

First of all, the bulletin reveals that 48,100 Oregonians were looking for work during the first week of April, as compared with 42,200 a year ago. More alarmingly, the commission sees little indication of the usual spring gains in lumber, logging, and other seasonal occupations.

More than 40 percent of Oregon's jobless are in the lumber and logging industry. No one denies that Oregon's unemployment crisis is the direct result of the slump in the lumber and plywood market.

The Eisenhower administration decreed a policy of hard money and high interest rates. As a result, the profits of banks are at an alltime high, but home building is at its lowest level since 1949. Fewer houses mean less demand for lumber. The lumber industry is hard hit—and so is Oregon, the Nation's leading lumber State.

When lumber slumps, Oregon slumps. The dangerous and frightening degree to which Oregon's prosperity depends upon the lumber industry is revealed by these figures from the State statistical bulletin:

Almost one-quarter (24.2 percent) of all workers in Oregon are employed in lumber and wood products. No other State depends upon lumber to any such degree.

California is a close second to Oregon in the production of wood products—but less than 2 percent of all California workers are employed in this industry. Washington ranks third in lumber production but only 9.2 percent of Washington's workers depend upon lumber for their weekly paychecks.

In short, Oregon's entire economy depends to an alarming degree upon an industry that has three very serious shortcomings:

1. Employment in lumber and logging is highly seasonal, with long winter layoffs. Dependable year-around payrolls are found only in a small part of the wood-products industry.

2. Full employment in the lumber industry seems to depend upon hundreds of small mills and fringe operators who can be shut down by a small drop in price or demand for lumber or plywood.

3. Oregon's prime stands of timber soon will be gone. The lumber industry has cut its way steadily southward, starting on Puget Sound half a century ago. Now it is rapidly chewing up the last great stands of Douglas fir in southern Oregon.

What will happen when Oregon's last stands of prime timber are gone? Our neighboring State of Washington set an example of good luck or good management when her timber began to disappear. Washington's dwindling lumber jobs were replaced with year-round payrolls in aircraft at Boeing, in atomic energy at Hanford and in aluminum in many cities, large and small.

In other words, low-cost Federal power saved the payrolls of the State of Washington. For low-cost power is essential to aircraft, aluminum and atomic energy.

But will there be enough new low-cost power from Federal dams to work a similar economic transformation in Oregon? The answer is "No"—unless the Eisenhower administration's giveaway at Hells Canyon can be stopped and its antipublic power policies can be reversed.

That's why organized labor in Oregon is fighting to save Hells Canyon, fighting for full Federal development of our rivers. We're trying to save our jobs and the future of our State.

We want to make the best possible use of falling water—the only major resource we'll have left when the best timber is gone.

We want to reverse the economic trend that began in 1947, when Oregon's per capita income was $202 ahead of the national average. Last year the incomes of Oregon citizens had dropped $10 below the national average.

[From the Oregonian, Portland, Oreg., of April 21, 1957]

NEUBERGER RUES PAYROLL DECLINE, SEES CHEAP POWER AS ONLY REMEDY

(By Paul Hauser)

Senator RICHARD L. NEUBERGER is concerned that Oregon is on a downhill trip on the payroll escalator and sees buildup of an available bulk of low cost power sufficient to attract new industries as the only hope of changing direction.

NEUBERGER arrived in Portland Saturday for a week-long stay during Congress' Easter recess and met the press at his home, 1910 Southwest Clifton Street.

"I don't think I can stress enough the serious economic situation confronting Oregon," said the Senator. He pointed out that in 1947 per capita income of Oregonians was $202 above the national average and has since sunk to $13 below.

"We've been coming down the escalator for 10 years," he said.

PAYROLL NEEDS CITED

"Unless Oregon gets some new basic year-around payrolls we're going to have real difficulty maintaining the school standards, the educational standards and the welfare standards we've been accustomed to."

But NEUBERGER foresees only "some slight chance" that Congress will find any money at all in the current controversial budget for a start next year on the 1-million kilowatt John Day Dam. None was provided in the President's budget and it's 10 times as difficult to put in than to cut out.

Lack of unanimity on such major projects, the Senator said, is "the monkey on our back in the Northwest."

GOOD PROGRAMS SUFFER

"When some other part of the country is working for a Federal project you see an enormous unified effort * * * but most of the opposition to the great Federal projects in the Northwest comes from our country."

Senator NEUBERGER said he fears that many small but worthwhile programs in fields of health and school aid will suffer in the current hysteria over the budget.

He noted that funds for cancer research were cut back in the administration's budget.

"Actually they ought to be multiplied 10 times for a real crash program such as developed atomic energy."

Foreign aid, a program with "no friends," is likely to suffer as well, but NEUBERGER, who has back up President Eisenhower's foreign-aid program as a bulwark of peace, said he would hate to think of placing the United States in a category of a country willing to be "profligate with soldiers but stingy with dollars."

DOUBLE STANDARD FEARED

NEUBERGER spoke again of his conviction that great campaign funds are leading to "a hopeless double standard of morality in Government."

"How can we say a little bureaucrat is hopelessly committed when he accepts a deep freeze, and yet allow governors and Senators to accept tens of thousands as campaign contributions?"

Senator NEUBERGER and others are working on bills which would provide Federal financing of congressional campaigns, limiting individual contributions to $100, and giving income tax credit up to $10 for individual contributions to political parties.

SYSTEM CALLED WRONG

NEUBERGER said he believes the present system of political campaign financing is leading to freezing of the Democratic Party as the party of labor and the Republican Party as the party of business. He thinks it "inherently wrong" either way.

"My whole basic belief is that a man should not enter public office obligated either to organized labor or to corporations or businesses."

NEUBERGER will discuss a set of 6 standards for labor unions at his first public appearance of 7 scheduled this week before the Portland Central Labor Council, Monday night.

Keep Up This Budget Cutting

EXTENSION OF REMARKS
OF
HON. HERMAN E. TALMADGE
OF GEORGIA
IN THE SENATE OF THE UNITED STATES
Wednesday, May 1, 1957

Mr. TALMADGE. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "Keep Up This Budget Cutting," published in the Metropolitan Herald of Atlanta, Ga., for April 17, 1957.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

KEEP UP THIS BUDGET CUTTING

Congress continues to cut away at President Eisenhower's recordbreaking peacetime budget and rightfully so. The national debt stands at approximately $275 billion. The interest on the debt is almost $7½ billion annually, more than it cost to operate the entire Federal Government in 1937 under Franklin Roosevelt.

Congressman JAMES DAVIS points out this week that the Federal bureaucrats in the executive department continue to enlarge and expand their agencies by hiring new employees. Federal civilian employment in the executive department is now 2,390,000 and the Federal payroll has reached an all-time record of more than $12 billion a year.

The Fifth District Congressman also warned the House that the payroll was being increased daily despite efforts of Congress to halt the hiring of additional employees.

No wonder the bureaucrats are screaming about the budget cuts by Congress. However, it will take the continued backing of the taxpayers themselves to make these cuts stick. Congress needs the support of every one of us in this fight.

Incidentally, this week's issue of the U. S. News & World Report tells us that the United States State Department sent a Negro jazz musician to Europe last year with a guaranteed salary of $2,150 per week—and at the taxpayers' expense. When called on the carpet by Congress for this, a Department spokesman said "It was well worth the expense." Incidentally, this is more than the President of the United States makes.

The time is long past time for Federal bureaus and departments to be forced to practice strict economy in every phase of governmental service—jazz musicians notwithstanding.

It is time to stop this foolishness. It is time for a change in Washington.

Admission of Members of United States Armed Forces to the Dhahran Airbase

EXTENSION OF REMARKS
OF
HON. JACOB K. JAVITS
OF NEW YORK
IN THE SENATE OF THE UNITED STATES
Wednesday, May 1, 1957

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an exchange of correspondence with the State Department on the subject of the admission of members of the United States Armed Forces to the Dhahran Airbase, in view of the restrictive provisions—with which I thoroughly disagree—on the part of the Government of Saudi Arabia; and also an editorial on the same subject published on April 25, 1957, in the New York Times.

There being no objection, the correspondence and editorial were ordered to be printed in the RECORD, as follows:

TEXT OF A LETTER DATED APRIL 17 FROM THE DEPARTMENT OF STATE TO SENATOR JACOB K. JAVITS

DEAR SENATOR JAVITS: I have received your letter of April 9, 1957, to the Acting Secretary, enclosing the statement which you made on that date before the Senate on our relations with Saudi Arabia. We appreciate the opportunity to review your remarks on this subject and, in response to your request, to provide comments on points raised.

As you point out, the various interested agencies of the Government consider the retention of the United States rights at the Dhahran Airfield of importance to our national security. The recent significant round-the-world flight of B–52 aircraft refueled, for example, over Dhahran.

Our recent discussions with Saudi Arabian representatives here were concerned with arrangements which would continue the United States rights at the airfield under the agreement of June 18, 1951. The text of this agreement, including its recognition of the sovereignty of Saudi Arabia over the airfield and the right of that Government to require visas of all persons entering Saudi Arabia, was not at issue.

We did, however, during these discussions express our special concern over restrictions on the admission of persons of the Jewish faith into Saudi Arabia. The representatives of Saudi Arabia explained that their regulations were not intended to discriminate against citizens of another country on the basis of religion, but were related to the tensions arising from the Arab-Israel dispute. The hope was expressed that Saudi Arabia would be able, as these tensions were eased, to eliminate restrictions arising from them. The Department will continue to take every appropriate opportunity to emphasize the continuing concern of the United States over the existence of these restrictions.

We can assure you that, whenever the question of slavery arises and there is firm evidence of its practice, the United States makes known its opposition to the continuance of this practice. We do not consider, however, that complete agreement with the United States on all matters is a prerequisite for cooperation in essential areas of foreign affairs.

We also note your remarks concerning King Saud's relations with President Nasser of Egypt. It is true that Saudi Arabia has associated itself with Egypt in aspects within the framework of Arab regional policy. At the same time, King Saud has emphasized his opposition to communism and his close friendship with and support for the United States. I know that you will agree with this attitude on the part of the ruler of a key Middle Eastern country is of considerable significance.

We believe that the recent visit of King Saud to this country was successful in creating greater understanding between the two Governments. We will continue to exert efforts to resolve those areas of disagreement which may still exist between us.

Sincerely yours,

ROBERT C. HILL,
Assistant Secretary.

TEXT OF A LETTER DATED APRIL 18 FROM SENATOR JAVITS TO THE DEPARTMENT OF STATE

DEAR MR. SECRETARY: Receipt is acknowledged of the Department's letter of April 17 regarding relations with Saudi Arabia. I note the following key phrases: in respect of the barring of United States soldiers of Jewish faith from our base at Dhahran that "The Department will continue to take every appropriate opportunity to emphasize the continuing concern of the United States over the existence of these restrictions." With respect to the fact that Saudi Arabia is backing Colonel Nasser's particular brand of Mideast chauvinism with heavy overtones of Kremlin manipulation, the Department says: "It is true that Saudi Arabia has associated itself with Egypt in aspects within the frame work of Arab regional policy. At the same time, King Saud has emphasized his opposition to communism and his close friendship with and support for the United States." I must dissent from the conclusion that either of these statements represents an adequate United States position. The Department should be taking much firmer steps than apparently are being taken or contemplated in respect of both of these urgent issues.

To allow the discrimination against United States soldiers—as well as United States citizens—by the government of Saudi Arabia because of their Jewish faith is a grave retreat from the highest American traditions and principles. It is an intolerable situation which began in the previous administraton in June 1952 and continues into this administration. It is contrary to the policy adopted by the United States in the early 1900's in its relation with Russia, and it is contrary to Senate Resolution 323, adopted on July 26 last, protesting such discrimination. It certainly cannot be reconciled with the Department's statement that King Saud has emphasized "his close friendship with and support for the United States."

I can see no fair reason for our Government's tolerating any connection between "the tensions arising from the Arab-Israel dispute" and the barring of United States soldiers from a United States base, contrary to American tradition and practice, and I believe that the Department should allow of no such connection.

Saudi Arabia has recently joined Egypt in seeking to bar peaceful international shipping from the Gulf of Aqaba in direct opposition to the findings of our country that these were international waters available to all for peaceful commerce. This represents

far closer association in actions disruptive of United States policy and international peace than the Department apparently recognizes in his statement: "that Saudi Arabia has associated itself with Egypt in aspects within the framework of Arab regional policy."

On the contrary, considering the assumptions encouraged by both the United States and the United Nations under which a withdrawal of Israel's forces recently took place, this action on the part of Saudi Arabia can only complicate the situation for our country and again endanger international peace. This stand by Saudi Arabia is certainly not an evidence of "close friendship with and support for the United States."

I do not get the impression from the Department's letter that there will be a determined and continuous effort to undo the injustices which I have described above, with clear notice to the Government of Saudi Arabia that the actions set forth above are not tolerable within the friendship which is professed toward the United States on the part of Saudi Arabia, and cannot be continued indefinitely.

A 5-year extension of the United States right to use the Dhahran Air Base may be justified on security grounds, and in that I have the greatest respect for the judgment of our President; but to tolerate the barring of United States soldiers from the Dhahran Base or Saudi Arabia's backing of Colonel Nasser and his defiance of the United Nations and the whole free world is contrary to the interests of the United States and of peace, is intolerable, and the Department's policy should not allow of it for an indefinite future.

Respectfully,

JACOB K. JAVITS.

[From the New York Times of April 25, 1957]

AMERICANS IN ARABIA

The refusal of the Saudi Arabian Government to admit American citizens of the Jewish faith extends even to American soldiers manning the air base at Dhahran under the recently renegotiated agreement with the United States. Thus our own Government is in effect a party—however unwillingly—to an outrageous discrimination against Americans on the basis of their religious belief.

In a letter to Senator JAVITS the State Department has pointed out that it had vainly expressed special concern over the restrictions, but that the Saudi Arabians had said "their regulations were not intended to discriminate against the citizens of another country on the basis of religion, but were related to the tensions arising from the Arab-Israel dispute." We do not believe this Arabian statement to be true; but even if it were true, its implications are totally unacceptable. The Saudi Arabian Government is saying that Americans of Jewish faith must necessarily have a political allegiance to a foreign government, Israel, to which Saudi Arabia is hostile, and that therefore these Americans must be treated on the same basis as if they were Israeli citizens. This is an intolerable suggestion reflecting on the loyalty of loyal Americans; and it is even more intolerable that the State Department is willing to bow, reluctantly or not, to such a suggestion.

Secretary Dulles' additional explanation at his press conference Tuesday is equally unsatisfactory. He reports at this late date that King Saud's negative attitude toward lifting the ban against American Jews was at least partly explained by the cold shoulder Mayor Wagner had given the Monarch on his arrival in New York last January. Disgusted as we were by the mayor's rudeness to an official visitor, we think that this incident is a pretty sorry excuse for Mr. Dulles to be making on behalf of the King. The fact still remains that the United States Government is acquiescing in religious discrimination against its own nationals, contrary to the principles of a Senate resolution passed last July and contrary to the historic position of our Government in dealing with such problems in the past.

The Nation's First Satellite Observation Station To Be Financed by Private Industry

---

EXTENSION OF REMARKS

OF

HON. BARRY GOLDWATER

OF ARIZONA

IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. GOLDWATER. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an article about the Nation's first satellite observation station to be financed by private industry. It happens to be located in my hometown of Phoenix, Ariz. We are very proud of the installation.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NATION'S FIRST SATELLITE OBSERVATION STATION TO BE FINANCED BY PRIVATE INDUSTRY IS RATED AMONG THE BEST EQUIPPED AND STAFFED OF ALL

(By Charles W. Pine and Robert L. Gilbert)

"Operation Moonwatch"—a swift-moving Jules Verne-like satellite observation program which has fired the imagination of the American public—paused at Phoenix, Ariz., on April 19 to unveil:

1. The first completely equipped and staffed station in the Southwest.

2. The first post to be completely financed by private industry.

The station itself—located on the skyscraper roof of the 12-story home office of the Valley National Bank—is a dramatic chapter in the story of man's determination to keep track of the earth-circling artificial satellite he will rocket-launch into outer space early next year.

The latter program, a highlight of International Geophysical Year—an 18-month "year" which starts July 1, 1957—will climax the project called Operation Vanguard when it was first announced by President Eisenhower in July 1955.

Since then, public curiosity has been whetted by innumerable articles speculating on the fate of the manmade satellite.

Often dubbed "an oversize Christmas tree ball"—its diameter is only 20 inches and its weight only 21 pounds when loaded with delicate reporting instruments—the satellite will provide invaluable data about such matters as cosmic and ultraviolet rays, air density and movement, temperatures, pressures, magnetisms, and geodetic determinations, scientists are confident.

Radio equipment contained within the world's first manmade satellite will be effective in determining its position only during the first 2 weeks of its travels as it whizzes around the earth's circumference at a speed of 18,000 miles an hour.

"After that, because of battery exhaustion, only means of locating the sphere will be by visual observation," emphasizes Dr. Armand Spitz, coordinator of visual satellite observations for the Smithsonian Astrophysical Observatory at Cambridge, Mass.

The SAO has been asked by the Government to see that the satellite "doesn't get lost," and Spitz' job is to organize some 200 observation posts across the country by the end of the year.

Manned by amateur astronomers equipped with special wide-angle telescopes, many of these posts, under ideal conditions, will be able to spot the satellite as it streaks across the heavens.

The telescopes, fixed to sighting bars installed along a meridian line, will be trained on predetermined areas of the overhead sky. Whenever the sphere is sighted by the amateur sky watchers as it crosses their field its time to a second, and altitude and azimuth to a degree, will immediately be communicated to SAO headquarters at Cambridge.

There, by feeding this data to electronic computers, scientists will be able to plot the satellite's ever-changing orbit.

Dr. Spitz is particularly proud of the Phoenix station financed by Arizona's statewide Valley Bank.

Terming it "an ideal setup both from the standpoint of equipment and personnel," he credits the bank's decision last September to build such an installation as being "inspiring news which since has encouraged the financing of similar posts by business firms in several key localities throughout the Nation."

It was Spitz who approached Carl A. Bimson, president of the Valley Bank, last fall with the suggestion that the Arizona financial institution might be willing to underwrite the erection of a model station on the roof of the skyscraper known as the Professional Building at Central and Monroe in the heart of downtown Phoenix.

After outlining the contributions to modern science that such a station might make, Spitz pointed out that the height of the post, plus the unusually clear skies that prevail in the Phoenix area, would make it a key unit in his contemplated 200-station network.

Valley Bank has a reputation for being unusually community minded—it underwrites, in whole or in part, such projects as an annual scholastic art exhibit or little league baseball clubs—but this was the first time, other than its membership in the Association for Applied Solar Energy, that it had been approached to help finance a project with interplanetary connotations.

Bimson, however, did not hesitate in giving Spitz an immediate "Yes." As he explained later:

"We have the space available; it's a unique opportunity to help American scientists edge their counterparts behind the Iron Curtain in penetrating the mysteries of outer space, and it might attract some favorable national publicity for Phoenix."

Bimson was right on all counts.

On February 19 of this year Maj. Gen. Bernard A. Shriever, commander of the western development division of the Air Force Research and Development Command, declared:

"In the long haul, our safety as a nation may depend upon our achieving space superiority. Several decades from now the important battles may not be sea battles or air battles, but space battles."

Missiles would joust hundreds of miles above the earth. Electronic planetary outposts might be the key to victory—and survival, he made it clear.

Blunt as they were, the general's references to the military-security aspect of Operation Moonwatch still cannot be measured by any yardstick known to the general public—due to the veil of secrecy surrounding such scientific exploration.

But news stories bearing a Phoenix dateline can be measured.

One such story dealing with the Valley Bank observation post, and released last February to selected metopolitan Sunday newspapers in a score of major United States cities, was used verbatim by a dozen of them. Their combined readership is 2½ million.

Other news releases about the Phoenix station have appeared in all sort of daily and weekly newspapers, financial publications,

and magazines with a scientific bent. Combined circulation is in excess of 20 million.

(The bank does not have complete clips on a September 1, 1956, AP story or a September 12 INS release, for example, but a conservative estimate indicates these 2 items alone appeared in approximately 60 newspapers with a total circulation of several million.)

The Phoenix post is staffed by members of the Phoenix Astronomy Club. Amos Hoff and Kenneth M. Zenkere, highly regarded astronomy instructors at Phoenix College and codirectors of the station, have recruited 2 complete teams of 19 members each. Twelve observers, a recorder and six relief men make up a team.

The teams will alternate in manning the station 3 mornings and 3 evenings a month. Their dawn and dusk schedule is due to the fact that the satellite will be visible only when the sun glints off it against the background of a darkened sky.

Backgrounds of the team members are amazingly varied—they range from college students and store clerks to lawyers and retired pensioners—but they have a common denominator: a fervent desire to be among the Nation's first sky watchers to track the orbit of the polished sphere after its launching.

Their chances are excellent, according to SAO officials—both because of the station's location, their conscientious training by Hoff and Zenkere and their equipment.

"Most favorable, in fact," is the way Jack Slowey puts it. Slowey, a scientist on the SAO's staff, attended a meeting of the Poenix sky watchers last month and gave them this explanation in support of his statement:

"The Vanguard rocket carrying the satellite will be launched from Florida's Cape Canaveral during evening twilight.

"Our calculations indicate the satellite could first be spotted over South Africa during that area's sunrise. Traveling in virtually the same orbit in which it was projected, the satellite will flash across the Southwestern States during the evening twilight here following the launching.

"Moonwatch headquarters will furnish you with the approximate time and direction of its passage. With this information, your station has an excellent chance of being the first in the Nation to spot the sphere."

Slowey and other satellite scientists point out that, during each 24-hour period, when the natural moon is rising and setting once, the man-made moon will be crossing the sky 15 separate times—coming up and going down at different points on the horizon each time.

However, it can be seen only when it passes overhead at twilight—either the morning or evening variety, which the layman usually defines as dawn and dusk. At other times, the satellite will be black in the night sky, or sunlit but lost in the daylight brilliance.

(How long the first satellite will continue to circle the earth depends on its orbit. Scientists would like to have it move in perfect circles around the planet at a height of about 300 miles.

(Space at that altitude is a vacuum by earth standards, although it contains enough air to slow the satellite and eventually bring it plunging to fiery destruction as a result of friction in the dust-laden lower atmosphere.

(But a perfect-circle orbit would require too much precision of control to hope for, and the satellite's path in all likelihood will be an ellipse. Scientists will be happy if it approaches no closer than 200 miles—in which case the farthest point on its flight would be about 1,500 miles above the earth.

(Dr. John P. Hagen, of the Naval Research Laboratory, calculates that at 300 miles the satellite will live almost a year. At 200 miles, it will have a lifetime of about 15 days, he believes.)

Although the satellite's official launching apparently won't take place until around January or February of 1958, the Phoenix team's schedule of six practice alerts a month is certain to sharpen their reflexes, SAO officials point out.

And within the next few months, these reflexes will be put to test by an SAO-sponsored test alert. A jet plane flying at an altitude that will make its engine inaudible—with a course and speed simulating the motion of an artificial satellite—will streak across the Nation flashing a light matching the sphere's expected brightness as seen from the ground.

After inspecting the Valley Bank Station's physical equipment, Slowey flatly described it as the best equipped post in the southwest.

The equipment consists of 12 specially designed telescopes, 12 sighting bars, shortwave radio with special antenna, tape recorder, and microphone, buzzer system—even coffeemaking facilities for use on cool mornings.

The sighting bars are welded to a metal plate installed along a north-south medidan painted on a wing of the building's roof. In the center, Valley Bank maintenance men have erected a 24-foot T-bar mast designed by Zenkere.

Zenkere wanted a tower that wouldn't sway the slightest in a 28-mile wind. He got it, although the bank had to send to the coast to get the necessary steel. Physical format of the station follows blueprints provided by the SAP.

Cost to the bank thus far has amounted to several thousand dollars, but Bimson has cheerfully okayed all bills. Deeply interested in Operation Moonwatch, he keeps in close touch with all developments and obviously is intrigued by its scientific possibilities.

He is particularly gratified by the fact that national publicity received by the bank since a September 1 press conference has encouraged several major American business concerns to sponsor similar stations.

In St. Louis, Mo., for example, a nationally known soft drink concern is installing a post on the roof of its downtown office building.

In Evansville, Ind., the junior chamber of commerce is underwriting a station being set up on the campus of Evansville College.

And in Walnut Creek, Calif., an observation team is being sponsored by the local pipefitters union.

Today, in fact, over half of the proposed 200 observation sites throughout the Nation are in the process of being constructed—and a majority of the remainder is in the planning stage.

Last September, at Bimson's press conference, Dr. Spitz predicted: "There are many American communities where capable observers are anxious to participate in this epoch-making project. Construction of actual sites will be tremendously spurred by the Valley Bank's enlightened attitude."

His prediction has come true.

Let's Give America Back to Americans

EXTENSION OF REMARKS

OF

HON. HERMAN E. TALMADGE

OF GEORGIA

IN THE SENATE OF THE UNITED STATES

Wednesday, April 17, 1957

Mr. TALMADGE. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address entitled "Let's Give America Back to Americans," delivered today before the Advertising Club of San Francisco by Eugene W. Castle, veteran newsman and author of The Great Giveaway.

I am informed by the Public Printer that it is estimated that the printing of the address in the RECORD will require approximately 2⅔ pages, at a cost of $205.34. Notwithstanding this estimate, I ask unanimous consent that the address be printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LET'S GIVE AMERICA BACK TO AMERICANS

(Address by Eugene W. Castle, New York City, author of The Great Giveaway)

Today inflation is as great a danger to us all as is the atom bomb in the hands of the enemy.

Tragically, the principal forces feeding the fires of inflation are in the White House at Washington. It becomes an idle gesture to ask restraint of business or labor if Government itself will not curb inflation.

The more our Federal Government spends recklessly and needlessly, the softer American money becomes, and the more costly and difficult it is for the average American citizen to provide for himself and his family.

The purchasing power of the dollar has decreased 3½ percent within the past 12 months. The cost of the necessities of life is constantly rising.

The cost of sending a son or daughter to college has doubled since 1939, and the value of your dollar has decreased 50 percent since that time.

That is inflation—even if some politicians in Washington insist upon calling it prosperity.

We toss billions to the four winds and talk about bringing the full life to tens of millions who, perhaps, want to continue living as they have in the past.

We plan to give more billions to neutralist Nehru's India, while our own American Indians vainly seek a few million dollars to obtain the necessities of life in the land of their ancestors.

The hour is late and dangerous.

Unless the mass of our citizenry insists right now that the giving away of our dwindling resources be promptly stopped, we may soon arrive at the tragic state of not being able to help ourselves, or any one else in the world.

Between World War I and II, I saw the flames of inflation consume millions of helpless people in France, Germany, and Italy. I saw this happen before the dictators marched and drove their already ruined people to death and destruction.

Fortunately, many millions of Americans have recently been shocked and rocked into a great awakening. The exorbitant and highly inflationary budget of $71.8 billion has stirred the American people like an approaching prairie fire—stirred them to angry protest in such a tremendous nationwide uprising that many politicians at all levels of the Washington totem pole are still trying to recover from the shock.

Some Members of the House of Representatives responded to the mandate of the people by effecting substantial cuts in the Federal budget. However, the battle of the budget is still far from won. There are slick ways of restoring the savings. While a minority of our legislators of both political parties, patriotically fighting for cuts in the budget, appear to be winning their battle, a clique of superspenders in the Senate, prodded by the power and influence of the Chief Executive, is already at work to invalidate the savings made by the House.

Only the continuous vigilance of the American people—and their determination to maintain the fight for solvency—can stop the

stamped of those powerful forces within our government who are determined to spend us all into bankruptcy.

The Marshall plan was originally offered to a skeptical Congress as a means of rehabilitating the war-ravaged countries of Europe. We were told that $17 billion and 4 years would do the job.

But the Marshall plan has had no parallel, since the world began, in the resultant spending of the resources of one nation for foreign aid.

We have sent our dollars marching 60 billion strong over the far reaches of the earth in quest of mutual security. The prize, like a will-o'-the-wisp, has eluded us. The world is still in turmoil and danger. There is no security, mutual or otherwise.

What have these dollars brought us?

They have dammed great rivers far away. They have built fine highways for others to travel. They have reared hundreds of industrial plants under flags which many of us cannot even recognize. They have dispatched thousands of American technicians to remote regions of the world. They have poured out our resources to distant peoples everywhere.

Our billions of dollars have delivered jet planes across the seas and some of these planes have been diverted to misuse. Our dollars have given vast armaments to friendly nations to strengthen them against aggression, and some of those armaments have been misdirected to the invasion of other countries. Our budgets have helped sustain the domestic budgets of Europe, while our own debt remains higher per capita than in any other country in the world.

Unless I completely misjudge the character and desires of the vast majority of Americans, I think it can be safely said that we do not want to dominate the world. We do not want to dissipate our lives and fortunes in return for the empty title of world leadership that is apparently so pleasing to some Washington policymakers.

The minority who gain personal glory and temporary profit from repeatedly reciting the world leadership theme forget that the British Empire once owned the words and music to it, and that this empire has, of necessity, dispensed with both the trappings and the expense.

The founders of our country came here to establish freedom on the American continent—and all the world knows what a superb job they did. We know, too, for we have inherited this freedom, their wealth and great ideals. World leadership is not mentioned in the Constitution of the United States.

From the year 1792, when the first session of the first Congress convened, to 1950, when the current giveaway swung into full stride, the Government collected $406 billion in taxes.

From 1950 through 1956, both fiscal years included, the Government collected $433 billion in taxes.

For $406 billion in 158 years we fought and won 6 wars.

For $433 billion in 7 years we fought 1 war—in Korea—without victory; and we fought and are still fighting a cold war that we have been losing ever since it began.

When the Federal Government takes a heavy portion of the tax revenues of the whole country, as they have been doing for a long time, the individual and the locality have less with which to provide for their own needs, whether schools, hospitals, roads or old-age security. It is a rule as certain as it is obvious that as this process of Federal control enlarges, the significance and liberty of the citizen must proportionately diminish. This is the way it has always happened before.

President Eisenhower has said that high taxes are necessitated by the quest for peace. It is perhaps a pardonable oversimplification for the sake of rhetoric; certainly it will not bear much scrutiny. No one knows what is the precise price of peace. The price that the administration puts on defense in the new budget is $38 billion. The total budget is $71.8 billion. What has grown tremendously over the past several years is not only the cost of the military; it is the cost of new or expanded Federal intervention in the individual's life, and in largely unnecessary spending abroad.

The administration is adding to the price of peace a host of expensive and extraneous projects. What will happen if the price of peace increases? Britain has already cut its defense costs by more than three-fourths billion dollars, which means that Uncle Sam will probably have to pick up tab.

The challenge is before us. If steps are not taken to meet it now, some future year may be too late.

For many, foreign aid has become an Alice in Wonderland extravaganza—a nonsense land where men soberly insist that if a gift of tens of millions of dollars to an ally or neutralist fails to win his friendship, a gift of hundreds of millions will succeed. Our leaders and their high-flying ambassadors now argue that we can win peace and security, not by exerting firm policies and leadership but by giving away our margin of superiority to foreign nations in an effort to make them as strong as ourselves. From whatever end of the lens we look at foreign aid, its strange policies do not come into focus.

President Eisenhower once realized this when he publicly stated: "The United States cannot be an Atlas; it cannot, by its financial sacrifices, carry all other nations of the world on its shoulders and we should stop giveaway programs."

Few of us now remember that before its adjournment in July 1955 Congress ordered our giant foreign aid organization, the then Foreign Operations Agency, liquidated. Congress assumed, in terminating this Agency as a separate unit of the Government, that its activities would be greatly reduced and eventually ended. With that objective in mind, military aid was assigned to the Department of Defense, and future economic aid, under the new title of the International Cooperation Administration (ICA) was assigned to the Department of State.

When the former Taft law partner, John B. Hollister of Cincinnati, became the head of the ICA, prevailing Washington sentiment was that foreign aid was on the way to full and final liquidation.

In mid-December 1955 it appeared that Congress would be asked during the following January for $2.7 billion, the amount of the then current appropriation for foreign spending and a considerable reduction from the previous year.

But, only a week later there exploded the announcement that Congress would be asked for the astonishing sum of $4.9 billion for foreign aid plus another billion dollars in ten blank checks for the President to spend as and where he pleased over a 10-year period. What did this overnight reversal mean?

It meant that the White House had decided to set aside the will and instructions of the 83d Congress to reduce economic aid drastically in fiscal 1956 and taper off military aid in fiscal 1957. It meant that foreign aid was now to go on permanently, perhaps forever. What happened? That the White House was "afraid of the Soviets" became the new argument and principal propaganda of the day. Why were we afraid? At the time, the President expressed it this way: "With the Soviet leaders openly proclaiming their world aim, it would be a folly for us and our friends to relax our collective efforts toward stability and security." What were we afraid of?

In the furtherance of their policy of world trouble making, bluff and bluster, two tourists from Moscow, Soviet Premier Bulganin and pudgy Communist Party Boss Khrushchev staged a noisy and smiling procession for propaganda through India, Burma and Afghanistan. Throughout their travels, the two men from the Kremlin acted as canny businessmen. They adhered strictly to capitalistic methods. They gave nothing away. They promised nothing for free. If a prospective buyer was a bit hard up for cash they advanced it at a profitable interest rate.

For example, in neutralist India, which had received $1 billion worth of free goods from the United States and is now slated to get that much more, the Russians agreed to furnish that country with ore-mining machinery, but only on condition that Indian would purchase a million tons of ferrous metals. Even the widely heralded gift of a Soviet steel will to their happy and overly gracious host, Nehru, was no handout. It is to be repaid to Moscow by 12-year credits at 2½-percent interest.

In Burma, the two traveling salesmen from the Kremlin bought half of the Burmese rice crop and in return arranged to help Burma expand its agriculture and industry, not for free, but at an agreed price for goods and services.

In Afghanistan, the tourist capitalists from Moscow offered a $100-million loan to be used for the purchase of goods exclusively from the Soviet Union.

Paradoxically, it was the Soviet which was acting in the spirit of capitalism and not we. In the face of this new business and financial news our high policymakers in Washington panicked. They panicked despite the fact that for the 1954–56 period Soviet loans to other nations, usually at 2 percent or better interest, totaled only 4 percent of the United States outlays in dollar values during the same period. During this period the United States gave $12 billion to other nations.

Following a prolonged battle in Congress, during which the Comptroller General made public disclosure of the fact that $363 million of previously appropriated military aid funds remained unspent and had actually been lost in the catacombs of the Pentagon, Congress reduced the White House foreign aid request for fiscal 1956 by $1 billion and eliminated the President's 10-year blank-check request for another billion. However, foreign aid was back in business and with an increase of a billion dollars over the previous year. Despite the previously expressed will of the Congress, the great giveaway was on again, and perhaps forever.

What is a billion dollars?

If you earn $10,000 a year, it would take you 100,000 years to earn a billion dollars. If you built a house for $20,000 a billion dollars could pay for 50,000 houses just like yours. In terms of foreign aid we are spending $5 billion annually; therefore, the totals are 500,000 years and 250,000 houses.

But let's get away from these astronomical figures and get down to the individual. Here is an example that anyone can comprehend:

An invalid woman who for 20 years has depended upon a fixed trust income of $150 per month pays $17.15 a month Federal income taxes, compared with only $2 in 1939.

Therefore her current monthly check has now shriveled to $132.84 instead of $148. Moreover, since today's dollar now has only 50 cents of its 1939 purchasing power, her current buying power is only $66.42 per month, or almost $82 per month less than the $148 net which this invalid woman received in 1939. And that is not all, her diminishing dollars have lost another 3½ percent in purchasing power during the past 12 months.

This sorry example can be multiplied by millions dependent upon fixed incomes throughout America. It is the best reason that I can give you why the politicians offer to cut the budget maybe $2 billion or $3 billion is not enough to insure a sound and safe America. The cut has to be much deeper to accomplish this.

Even without any system of accounting, we now know that our foreign-aid spree has included the following:

We gave $7 billion to Britain that helped bring that country the plight of the former Socialist Labor government.

We poured more than $6 billion into France.

We gave billions to rebuild a war-torn West Germany in the most lavish manner conceivable.

We gave more than a billion dollars to the shaky government of Indochina before that country capitulated to the Reds.

We gave the Government of Norway $300 million, which they promptly applied to the reduction of their internal debt.

We gave Denmark $100 million, which they used the same way.

We are paying all living expenses and tuition costs for the sons of hundreds of wealthy Persians attending American universities.

In the name of foreign aid we are paying for free airplane excursions for thousands of Arabs visiting their religious shrine at Mecca.

In Portugal our handouts have paid for a 15-mile 6-lane superhighway connecting Libson with the gambling resort of Estoril.

American tax dollars have provided dress suits for Grecian undertakers, public baths for Egyptian camel drivers, and even iceboxes for Eskimos.

Also in the name of foreign aid we have shipped stage comedies to France, opera singers to Italy, and drama groups to Germany.

We have built an Italian village nobody wanted to live in and an Iranian road that leads to nowhere.

All this, mind you, at the American taxpayer's expense.

But this is not all. Foreign aid is no longer offered on the basis of "What do you need?" Now it is "What will you take?" Here are new examples of this:

Vice President NIXON recently attended ceremonies commemorating the establishment of the new African Gold Coast state of Ghana, but the Vice President's trip did not end with this official duty. He toured a number of African countries and everywhere indicated that the cash would follow. As a result it is estimated that these new customers, once wards of Great Britain and France, Portugal, and Belgium will now cost the American taxpayers more than $100 million annually—not for 1 year but for as long as the American people will stand for it, and pay for it.

Former Congressman Richards, the same Congressman who was responsible for reducing the White House demand for foreign aid for the current fiscal year by more than $1 billion, is now Ambassador Richards and he is flying around the Middle East desperately trying to divest himself of $200 million in a hurry before June 30 of this year so that he can come back and enable our global givers to obtain $400 more for the next 2 years. And remember, this is on top of the handouts already given and still going to the oil-rich desert dictators who do so well for themselves, but little if anything for their retarded people. King Saud, of Saudi Arabia, did not wait for Ambassador Richards to fly to him—the oil-happy potentate came to Washington and obtained enough money to announce that he will soon build a superhighway connecting his summer and winter palaces. While here, he purchased 100 gold-plated Cadillacs—and, of course, you paid for them.

Now we are about to change the law so we can give of our resources to Communist Poland. Senators WILLIAM KNOWLAND and STYLES BRIDGES are absolutely right in opposing this. Senator KNOWLAND said: "There are some things in life that cannot be compromised. Munich and Yalta should have taught us this."

This outrageous plan will not curb communism in Poland. Instead, the American people will be paying for obligations which the Kremlin will be glad to get rid of, and at the same time enrich a Soviet slave state. We are still assisting the Soviets in the case of Yugoslavia. Now we are adding Poland. We might just as well send the checks direct to Moscow.

The one to top them all is the recent suggestion made seriously by Congressman JIMMIE ROOSEVELT to the effect that it might be a good idea for us to give up the Panama Canal in order to show Egypt's Colonel Nasser what generous people we are. Apparently, the Congressman has completely forgotten the Monroe Doctrine which we have guarded so zealously for so long. Wouldn't it be nice to have some Red commissar telling us that he has taken over the internationalized Panama Canal, and that it is closed to ships flying the Stars and Stripes? In case of war we would very probably be unable to take our ships from the Atlantic to the Pacific.

Once we forgot to get a road out of Berlin after our Armed Forces fought and won the war in Europe. Now, in our mad quest for global giving it is seriously suggested that to please Nasser, who has no desire to please us, we should surrender the Panama Canal—our waterway to the Americas. We built it. We own it. Now we should give it away with the billions we are squandering all over the world.

There are several specific reasons why the foreign-aid program as presently carried on is a potential threat to our own self-interest. Let us consider eight of these dangers:

1. It has grown haphazardly without coordinated relationship to any long-range foreign policy.

2. It has become a roadblock to the working out of a rational foreign policy since every move is first predicated upon the giving of money. It deludes many Americans into thinking that the answer has been found to our foreign-policy dilemma.

3. Our false sense of security is frequently bolstered by the self-deceiving pronouncements of the United States Information Agency. This "cave of the winds," already overbudgeted by $85 million, is branded round the globe as a Government-subsidized propaganda bureaucracy. Day by day it is casting suspicion of Government domination on our private press services, the Associated Press, the United Press, and the International News Service, with which it is steadily increasing direct competition overseas. For the first time, a Government kept press has come to America.

4. Instead of aiding many of the recipient countries, such subsidization immobilizes them. The initiatives and the risks which would bring sound and balanced recovery remain untried when Uncle Sam is standing by, checkbook in hand, anxious and ready to wipe out the red ink of all the other nations in the world. Through its mistaken aid policies, our Government has probably retarded the return of many free nations to normalcy by several years. We have prolonged economic dislocation instead of removing it.

5. Frequently we are swept beyond the boundaries of our true national interest into areas of the world where we should never have become involved. By accepting the role of global givers, we have become a nation of international busybodies, rushing from troublespot to troublespot with our doubtful remedy of dollars.

6. While we thinly spread our strength over the world, our homefront develops dangerous gaps in its defenses. We have cut back our orders for B–52's largely because we spend the money on questionable experiments in remote and unrewarding areas of the world.

7. Great though our resources may be, the American taxpayer cannot afford the ever-mounting cost of the foreign aid program. For more than two decades, the United States has lived in a deficit economy. During these years, our national debt has towered from $19,487,002,444 in 1932 to $274,374,220,802 today. Hanging over every man, woman and child in America is a built-in per capita national indebtedness of $1,700, and it is going up.

8. Private initiative, which has the driving necessity of showing a profit, and which cannot unload its mistakes upon the taxpayer, does the job infinitely better. Our foreign aid program has paid lipservice to private investment, but in practice it supplants the private investor. It interposes the sterile hand of the state between human wants and demands, and the private initiative which can supply them. The political promoter and the global headline-hunter replace the economist and the technician. The capable brains which might possibly make it work are not at the service of the aid agencies.

Senator HERMAN TALMADGE of Georgia has recently stated: "If it is felt that this nation in promoting its interests must assist other countries in their economic developments, there are ways much more effective and considerably less costly than direct handouts from the Federal Treasury. One way would be to stimulate the flow of American capital into needy and underdeveloped nations through the incentive of fast tax writeoffs, such as are now granted to industries engaged in defense production. Another way would be to expand the capacity of the World Bank to make long-term, low-interest loans to worthy nations upon the security of such collateral as undeveloped natural resources or industrial potential. In so doing, the United States would be able to achieve its goal without insulting the beneficiaries of its assistance, and perhaps even more important, without bankrupting the American people."

What can and should be done?

One answer that should come fast and firm is a loud "No" to all Government requests for more blank checks and long-term handouts without full details to the public and the complete approval of the Congress.

We should take immediate steps to stop the prevailing idea that doles can replace diplomacy.

There is no such thing as paying for friendship. This is equally true of foreign governments and peoples. Any future foreign aid should be given solely on the basis of how it will benefit Americans, because we must start protecting ourselves while we can still do so.

We cannot continue to support the world. The $60 billion already spent offer ample proof that the continuance of our global dole will never buy permanent peace, friendship, or even respect for our country.

Washington's vast giveaway, with the bureaucracy that feeds and grows upon it, should be ended and replaced with an expansion of world trade.

Senator Harry F. Byrd, who is one of the most patriotic men in the United States Senate and one of the greatest living authorities on our Government's fiscal affairs, said this to me, "I regard a reduction in the pending budget as vitally important to our future welfare."

One way to help achieve this reduction, and in a substantial way, would be for the Congress to appropriate no new money for foreign aid. No new money is needed because there is enough already appropriated and in the Washington economic and military pipelines to carry on foreign aid for another 2 years.

No new funds for foreign aid would mean a saving of at least $10 billion to the American taxpayers during the next 2 fiscal years. We can use the money.

No new foreign aid funds would mean that the American people are determined to notify the world, friend and foe alike, that they cannot afford and will not pay for a world dole forever.

During the next 2 years, the American people should receive a totally honest, free from "brainwashing", country by country audit on what our dollars have done. This audit should be made by men determined to find ways and means of spending a minimum of our money in the future, instead of "believers" and junketeering notables who have been old riders on the foreign-aid bandwagon, who like the ride and who, in many cases, profit from it. Such appraisers are no different from having bank clerks examine themselves. Moreover, the majority of those who yearly go through the motions of investigating foreign aid, actually travel from red carpet to red carpet, escorted by those who give our money away. Such investigations are really the carrying of pails of whitewash to the White House, and always at a time when the call for new money is in the headlines.

Trade and private loans should be substituted for Washington's desire to give us away. Loans should, of course, be properly secured and made available to those who may be worthy of receiving them. Loans should be made not as a means to get rid of our money but on the same basis that any individual or company in America negotiates for his financial needs with his banker.

Trade and private loans can and must eventually replace the uninterrupted squandering of the American taxpayers' money under the false idea that a new crisis can be presented and peace preserved if we keep on giving without condition, audit or even requesting a receipt for our billions.

In 1952 General Eisenhower said: "Certainly I know that we must find a substitute for the purely temporary business of bolstering the free nations through annual handouts. That gets neither permanent results nor real friends."

Later that same month Candidate Eisenhower said: "My goal, assuming that the cold war gets no worse, is to cut Federal spending to something like $60 billion within 4 years."

This is as true today as it was in 1952.

The storm of protest that has arisen over the $71.8 billion Federal budget for fiscal 1958 is an encouraging sign, regardless of its immediate effects on governmental spending plans. It indicates that the President's first objective of a $60-billion budget was taken seriously, and that the steady retreat over the past several years from that objective has caused widespread disappointment.

If the people speak loud and long enough—and if they are determined enough we can have a $60 billion Federal budget.

Now, what would this do for the American people?

1. It would halt the increasing trend toward inflation.

2. It would enable us to start reducing our monstrous national debt, which hangs like a dagger over our economy.

3. It would take the unwarranted gross waste and extravagance out of every department of Federal government.

4. It would provide an immediate tax cut for millions of middle-bracket Americans who need tax relief right now, and not at some unknown tomorrow.

Here in the United States we celebrate Christmas once a year. We must stop being Santa Claus to the world 365 days a year. We have long been known as Uncle Sap. Now we are also known as Uncle Sugar. As Uncle Sugar we can melt away from our present 50-cent dollars to 10-cent dollars sooner than most of us may now realize. Let's give America back to Americans.

The Home-Building Industry

EXTENSION OF REMARKS
OF

HON. JOHN J. SPARKMAN

OF ALABAMA

IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. SPARKMAN. Mr. President, the Wall Street Journal of Monday, April 29, 1957, published an advertisement by the editors of the magazine House and Home, which, according to the editors of that journal, is "America's biggest industry monthly for America's biggest industry"—namely, the home-building industry. The advertisement is entitled "An Open Reply to the Wall Street Journal." It deals with the home-building industry and the whole problem of housing throughout the country today.

I ask unanimous consent that the substance of the advertisement be printed in the Appendix of the RECORD.

There being no objection, the advertisement was ordered to be printed in the RECORD, as follows:

AN OPEN REPLY TO THE WALL STREET JOURNAL ON BEHALF OF THE HOME-BUILDING INDUSTRY

Your recent editorial attack on the home-building industry was clever and bright and amusing, but it was unfair from start to finish.

You made the home builders look foolish by taking their words out of context and so setting up a straw man you could ridicule. You made them seem to ask help and favors they are not asking.

But you contributed nothing to your readers' understanding of how home building was whipsawed between too easy money and too little money.

You did not explain the Government actions which made it certain that home building would be hurt first and worst by tight money. You did not tell your readers how the Government itself has kept home building from getting the financing it needs in the free market.

"The Wall Street Journal" is far too important a newspaper to tell only half the story. Your readers are far too influential. Your readers should be given the whole picture and told the essential facts:

Fact No. 1:

"Home building is just about the most important single industry in America." So says Wm. McChesney Martin, Chairman of the Federal Reserve Board.

Home building is not only America's biggest single industry; it is also the most dynamic industry, exerting a tremendous influence to stimulate spending for everything from appliances, furniture, draperies and rugs to schools, churches, stores, roads and even cars.

Compared with agriculture, home building is bigger than cotton plus wheat plus corn plus tobacco combined.

For 10 years after World War II the newly great home-building industry played much the same part in sustaining national prosperity that the newly great automotive industry played after World War I.

Fact No. 2:

The biggest and most dynamic industry is now in very serious trouble. It is the only great industry which is not sharing in national prosperity.

While the rest of the economy has been expanding 6.5 percent, home building has been cut back 40 percent, from an annual rate of 1,460,000 starts in December 1955 to 880,000 in February 1957.

Fact No. 3:

This crisis in home building was precipitated by the Federal Government itself. (See fact No. 5.)

That is why the home builders have no hesitation—or pride—about asking the Federal Government, not for help, but for relief.

Fact No. 4:

The two chief architects of today's tight money policy—Randolf Burgess of the Treasury and William McChesney Martin, of the Federal Reserve—have both publicly recognized that tight money has hurt home building as it has hurt no other industry.

Both have said they wished they knew some simple way to correct this inequality.

Fact No. 5:

Here are the two big reasons why home building has taken almost the whole cutback of tight money:

A. The Federal Government refused to let home building raise its bid for money for FHA and VA mortgages. While all other borrowers were offering higher and higher interest, the Government kept the FHA and VA rates fixed far below the market price. (The FHA increase allowed last December was too little and too late. The VA rate is still frozen at 4½ percent—unchanged since 1954.)

And the Government has forbidden builders to meet the rate freeze with discounts unless the builder is willing to pay the discount out of his own pocket instead of passing it on to the home buyer.

B. Meanwhile, the Federal Government has stimulated and in effect subsidized the tremendous increase in corporate borrowing that has sopped up the money that formerly went into FHA and VA mortgages.

In effect the Federal Government offers to pay more than half the cost of any new corporate plant investment, first by allowing the corporation to deduct from its taxes 52 percent of its interest payments, second by allowing the corporation to deduct 52 percent of its entire plant cost as the plant depreciates.

How can the free market allocate money fairly when the Government (a) forbids home building to raise its bid and (b) offers a 52-percent tax subsidy to home building's competitors in the money market?

Fact No. 6:

Even inside the home-building industry the impact of tight money has been very unevenly divided.

The entire cutback has been taken by those builders who were serving the lower priced market—the market which had been financed primarily through FHA and VA.

The higher priced market—the market which uses conventional financing—is still booming.

Incidentally, this boom in quality houses means that even if starts fall to 900,000 this year, those 900,000 will use more quality products than the 1,200,000 smaller and cheaper houses built in 1950.

They will use more lumber, more roofing, more siding, more flooring, more bathtubs.

They will include many times more appliances—more ranges, more refrigerators, more dishwashers, more disposals, more clothes washers—and 30 times more air-conditioning units.

Fact No. 7:

The home-building industry is not asking the Federal Government for help to sell more houses; it is not asking for help of any kind.

It is asking for relief from the Federal actions which have indeed brought many builders to the brink of bankruptcy. Specifically:

A. It has asked the Federal Government to stop freezing the FHA and VA interest rates so far below the market.

B. It has asked the Government, through the Federal National Mortgage Association, to tap a wider source of money for FHA and VA mortgages by selling $2 billion worth of mortgage certificates to investors who cannot or will not buy mortgages as such. (Only qualified mortgages are permitted by law to buy FHA loans. In practice this limits the market to a few thousand lenders, mostly savings banks and life-insurance companies.)

This plea for relief through FNMA is no more than hundreds of railroads, manufacturers, and even banks asked (and got) from RFC when they found themselves caught in a money squeeze no worse than the money squeeze today on builders serving the lower priced home market.

The home builders frankly admit that in asking this relief through FNMA they are pushing a crash program to save many of their number from bankruptcy before it is too late.

Fact No. 8:

One big reason home building is being left to bear the whole cutback from tight money is that some high officials think the Government should turn home building on and off as needed to compensate the ups and downs in other industries. If general business is bad, let home building have enough mortgage money to build more houses; if general business is good, cut home building back.

For example, Vice Chairman C. Canby Balderston, of the Federal Reserve, has just cited home building as the No. 1 example of "postponable demand" with "marginal status" that "stands ready to absorb funds when credit eases." And Senator PAUL DOUGLAS, of the all-important Senate Housing Subcommittee, says: "I have always believed that home construction could in part be used as a countercyclical measure."

What would the automotive industry—or any other industry—say and do if it were told that its sales volume would be determined, not by its own sales efforts, not by the need for its product, but by Government ukase to balance out the failures or successes of other industries competing for the same consumer dollar.

HOME BUILDING ASKS NOT TO BE SUBSIDIZED

Fact No. 9:

Home building is not a subsidized industry like farming. It does not want to be subsidized. On the contrary, it wants not to be subsidized. The only subsidy home building gets is public housing, which the home-building industry has fought, first, last, and all the time.

All the other home-building programs combined have cost the Federal Treasury little more than price supports for peanuts.

In fact, the Federal Government spends so little tax money to help home building that the industry cannot even get usable market reports from the Bureau of Labor Statistics.

Fact No. 10:

Far from being a subsidized industry, home building is constantly bedeviled by Government interferences that make it harder to build and sell better houses for less.

Local building codes enforce $1,000 waste on almost every small house. Fictitious federally decreed interest rates for VA and FHA often cost another $1,000 for discounts. Undertaxation of land lets land prices soar out of sight, often adding $2,000 to the price of a small lot.

Many communities try to discourage home building through prohibitive improvement requirements. And taxes take 40 cents out of every building dollar.

FHA INSURANCE IS NOT A SUBSIDY

Fact No. 11: FHA is a mutual mortgage insurance system operated by the Government at a substantial profit. Its insurance premiums are twice as high as the insurance premiums charged for comparable insurance in England by private casualty companies with no government participation at all. Its insurance premiums are much higher than the savings and loans here plan to let their own proposed mortgage insurance company charge. Its insurance premiums are so high that some FHA critics say that FHA, far from being a concealed subsidy, is really a concealed Federal tax on the ownership of small homes.

The main reason FHA needs Federal participation is to let money flow freely across State lines from the established areas where money accumulates to the growth areas where mortgage money is most needed.

If there were no State barriers and no conflicting State laws, mortgage insurance could be handled here by private insurance companies as in England (and for a lower premium than FHA charges, as in England).

Fact No. 12: The home building industry is not asking Congress to extend the veterans' housing program.

Fact No. 13: Even though tight money has hurt home building as it has hurt no one else, the home building industry recognizes that a stable dollar is doubly essential to any industry dependent on heavy borrowing, so the industry has gone clearly on record in support of what the Treasury and Federal Reserve are trying to do to protect the dollar.

Wrote Chairman Martin of the Federal Reserve: "It is most heartening to have this great industry take such an understanding and broadminded attitude."

The home building industry does not want the kind of easy money we had in 1954. In January 1955 the presidents of every important trade association concerned with home building endorsed an open letter to President Eisenhower telling him that too easy money was encouraging serious abuses and threatening serious scandals.

THE NEED FOR GOOD NEW HOUSES IS STILL ENORMOUS

Fact No. 14: By building 12 million new houses since the war, the home builders have indeed eased the housing shortage which was so critical a few years ago. In so doing, they have built themselves out of the easy market, taken the cream off their sales. So—

Fact No. 15:

The money crisis hit home building at the worst possible time, just when the industry was making the difficult threefold adjustment from a seller's market to a buyer's market, from a market of first-time buyers to a market of second-time buyers, from a market whose first need was cheaper houses for young veterans with very little money to a market whose first need was better houses for families whose rising income lets them afford a more expensive home.

While the builders were learning to serve this very different market, some temporary cutback in starts was probably inevitable, but:

Fact No. 16:

The need for good new housing is still enormous.

Speaking quantitatively: All the new houses built since the war have still fallen 3 million short of catching up with net new household formation since 1930. (That means despite our bigger families we have been able to house 6 million new families only by cutting old units in half.)

Speaking qualitatively: We have houses enough for our nonfarm families only because more than 6 million families are living in units without private inside baths. One nonfarm family in every eight must live in a substandard home because there are still 6 million too few good homes to go around.

Most of these 6 million substandard homes are a disgrace to the richest Nation on earth. Most of them should be either completely rebuilt or destroyed at once.

Fact No. 17:

Incomes are rising so fast that at the present rate the average family will have an income well over $8,000 a year (in constant dollars) by 1980.

Out of 48 million dwellings occupied today not more than 15 million are the kind of houses people will want to live in when the average family makes as much money as junior executives earned just a few years back.

It is high time America faced up to the critical problem of replacing within 25 years most of the 33 million homes no one will want to live in—including the 6 million junkers that should be taken off the market right now.

Net new nonfarm family formation is running about 900,000 a year, so it takes 900,000 new houses a year just to keep up with population growth and farm-to-city migration. It takes at least another 100,000 to keep up with demolitions due to fire, highway construction, conversion to commercial use, etc.

So it takes at least 1 million new houses a year just to stand still.

Fact No. 18: In England Conservatives and Laborites alike recognize the need of building new homes at roughly five times the rate of population growth. By so doing, they hope to replace almost the entire stock of antiquated or substandard housing by the year 2000.

At the rate this country has been building since World War II it will take 480 years for America to replace its present 48 million houses. It will take 60 years to replace the junkers that should be liquidated right now.

So it is just plain nonsense to say America has been building too many homes.

Overbuilding is not the problem. The problem is underselling.

Trivial Snipers

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 29, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial about a current situation which appeared in the Boston Evening American, on April 23, 1957:

TRIVIAL SNIPERS

There has been so much needling of President Eisenhower at his recent press conferences that many responsible journalists, and probably as many observant newspaper readers, have begun to wonder about the increasingly heavy accent on trivial matters at these discussions of current events.

It is a fact, and a sad one, that so much attention is paid to petty situations at the question-and-answer sessions that little time is devoted to urgent national and international affairs.

For example, the danger of war in the Middle East was almost wholly overlooked a fortnight ago in the confusion caused by a sarcastic reference to the purchase of helicopters for the President's personal use in case of an emergency.

Similarly, there was the implication that the White House was somehow responsible for the arrests of correspondents trying to keep up with Mr. Eisenhower's caravan on

the highway leading to his Gettysburg farm.

Perhaps the questioners were trying to provoke the President. Or, maybe, they merely wished to make themselves heard.

But they certainly did not bring out the information that is essential if the American people are to understand what their Government is doing at home and abroad.

Fortunately, the President himself has displayed almost unfailing good humor in his relations with the press, and that, of course, is to his credit.

But it is considerably less to the credit of the correspondents that so many of them think their jobs are well done when they succeed in forcing the occupant of the Nation's highest office into a momentary flare of temper.

Sniping and ill-disguised partisanship serve no worthwhile purpose and both are proof of poor taste and bad manners.

The Tiger's Tail

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 17, 1957

Mr. BROOKS of Louisiana. Mr. Speaker, at a meeting of the Red River Valley Association in Shreveport, La., on April 22, 1957, Gen. E. C. Itschner, Chief of Engineers, United States Army, made an address entitled "The Tiger's Tail." For the people of the Red River Valley this address was filled with tremendous importance and farseeing future prophesy. The address is so important to the people of the Red River Valley and the United States that I am presenting it with commendation to its author and appreciation for a fine report, well conceived and framed and presented.

The address follows:

THE TIGER'S TAIL

(Remarks by Maj. Gen. E. C. Itschner, Chief of Engineers, United States Army, before the Red River Valley Association, at Shreveport, La., April 22, 1957)

The Red River Valley Association has had a long uphill fight. You have come far, but a good stretch of road still lies before you.

Today, as Senator KERR pointed out in a recent newspaper article, the Arkansas and the Red Rivers are the only major tributaries of the Mississippi still to be made navigable. There have been formidable difficulties in each case. But a comprehensive plan is under way in the Arkansas Basin, and this summer we will break ground for Dardanelle Dam, the first navigation structure on that stream.

That will leave only the Red River. And I am happy to tell you that the review study of the Overton-Red River waterway from Shreveport to the Mississippi River is finished and shows a favorable ratio of benefits to costs. This study was made by General Hardin and Colonel Lewis and their staffs, assisted by members of the staff of the Board of Engineers for Rivers and Harbors.

It shows that the cost of the project will be about $118 million, of which the share to be borne by local interests is $21 million. The benefits are estimated at $6¼ million a year. Small benefits are attributed to drainage and to the Ouachita River navigation project, but the great bulk of them—more than $6 million a year—are expected to consist of savings in the transportation of more than 2 million tons of prospective commerce a year. The benefits of the project are estimated at $1.08 for every dollar of annual charge—a small but definitely favorable margin.

Advance planning can begin whenever money is appropriated and appropriate assurance is provided that local requirements will be met. In this connection the investigators point out that the costs to be defrayed by local interests have risen by more than 700 percent since the project was authorized, largely because of the rapidly increasing development of the era through which it must run. For example, the number of existing highway bridges which must be altered at local expense has increased from 14 to 17; the number of pipelines, from 8 to 33; and the number of telephone, telegraph, and power lines from 5 to 53. The area will undoubtedly continue to develop, and as it does, relocation problems are likely to become even more severe, and the costs to both Federal and local governments even higher, until the project finally is put into place.

Now you probably appreciate that the benefit-cost ratio for this project is not large, and therefore a comparatively small decrease in estimated tonnages or savings or an unanticipated increase in cost could make the project unjustified economically. I therefore studied the report unusually carefully when it reached me about 2 weeks ago. As a result of that study and much thought, I am convinced that the economic analysis is sound and most meticulously prepared. I then questioned the cost estimate, made comparisons with actual experience recently on other projects, and I believe that it, too, is sound, based on the current price level.

The project provides for locks 56 feet wide and 650 feet long, and the canal is 100 feet wide at the bottom. Now we do not want to build a project that will be obsolete before it is begun. We do not believe you want us to. If we build at all, we must build for the future—for a dynamic future characterized by great growth and expansion. Otherwise we are merely incurring extra handicaps and expense for our children. So again I studied the problem carefully, and after considerable discussion with my staff, and based on information furnished me by General Hardin, and experience on other waterways, I believe the Overton-Red Waterway will be adequate as planned for the amount of traffic we assume will use it. Should the amount of traffic turn out to exceed our estimates materially, in all probability the enlargement of the project can be justified at that time. Until that day, however, I hope that navigation interests will realize that a waterway of appreciably larger dimensions, based on the assumptions we have made, cannot be justified economically, and therefore we cannot recommend it.

I think a quotation from the Bible would be appropriate at this point. It is the 12th verse of the 3d chapter of Second Corinthians, which reads:

"We have such hope, we use great plainness of speech."

So far your work has been largely inspirational and advisory. You have helped initiate and guide plans for the development of this valley. And I hope you will continue to do this, for by serving as a vehicle for expressing the needs and wishes of the people of the valley, you are fulfilling an indispensable function.

Someone must make room in the valley for the navigation project. Room not only in your lands but in your laws and businesses and trade patterns.

First, there must be local agencies properly empowered to deal with the Federal Government on questions affecting local cooperation. This is a prerequisite to construction. Arkansas law already provides for the establishment of such agencies, but Louisiana law so far does not.

Second, these projects must be made to justify themselves. We can expect our estimate of benefits for the Overton-Red Waterway to be subjected to the same bitter attacks as previous ones. Only experience will decide whether our estimates are in fact accurate, or too conservative, or as the opponents of the project claim, far too optimistic. What that experience will prove is up to you—the people and businessmen of the Red River Valley.

As you know, the Corps of Engineers has always tried to be reasonable but conservative in estimating the benefits of proposed projects. When we act as investment agents for American citizens to whom taxpaying is often a real hardship, we cannot allow ourselves to be guided entirely by the optimistic predictions of local interests as to the amount of new business and traffic that might arise once a waterway is built. That is why the Mississippi River Commission and the Board of Engineers for Rivers and Harbors were established to scrutinize the justifications of all proposed projects.

Our national waterway program probably would not exist if the Corps had ever taken any other attitude. The cry of pork barrel is always being raised by opponents of the waterways. Back in the first decade of the century that outcry was particularly rife. And President Theodore Roosevelt, who was surely as good a friend of conservation and waterway development as ever lived, gave an extremely blunt warning to the Joint Conservation Conference in 1908 when he said:

"If you dissipate the improvements throughout the country on the ground that each congressional district shall have its share, you had better abandon the project from the beginning."

Then he went on to say:

"No work whatever should be undertaken that has not been thoroughly examined and fully approved by competent experts, and these competent experts do not look at things exactly as if they were enthusiastic citizens of the neighborhood."

The Corps' conservative and responsible approach has been an essential factor in the sound and successful development of waterways ever since. It is what gives weight and meaning to our endorsement of the Overton-Red River Waterway.

We are going to continue to be conservative in estimating benefits. At the same time, not only in the Corps of Engineers but throughout the Nation, we are learning that the rate of growth and progress in this country compels us to build for the future, and scale our building to provide for the future's vastly expanding needs.

Today the main trunkline waterway system of the Nation is within sight of completion. Generally speaking, there has been no great problem in justifying the improvement of these older waterways.

Now we face a new kind of situation. We must consider the improvement of some of the more difficult streams, or those which reach into newer, less developed regions—streams like the Red and Arkansas, the Alabama-Coosa, the Columbia, and the Chattahoochee. At the same time, we must begin improving the tributary and feeder waterways needed to expand our trunkline system into a true network, for until this is done we cannot get the fullest benefit from our main line construction. On these tributary lines the prospects of future traffic are often less apparent than on the main streams. And there are many who believe that we should approach the problem of estimating benefits on these waterways with a somewhat different attitude than we have on the arterial routes. They feel we should take greater account of the country's growing enterprise and needs, and make a larger allowance for the expansion of enterprise in areas that would be served by proposed waterways.

It is here on the Red River that this view may be tested. You are asking the American

people through their Federal Government, to invest almost $100 million in it. Assuming that the project will be built—and I believe the prospects are favorable—what will they get out of their investment? Will the results encourage them to make similar investments in other areas in the future? For example, will they warrant us in looking forward to the day when the Black and Ouachita Rivers may be improved as tributaries of the Red? The answers are up to you.

It is against this background, and in this spirit, that I point out the responsibilities and opportunities that are opening before you members of the Red River Valley Association. You have been the voice of the Red River Valley; now we look to you to be increasingly its hands and its brains. Once you start developing a region as large, rich, and varied as this one, you have a continuing responsibility. It will be a long time before you can let go. For resource development can stop only when the Nation itself ceases to grow.

United States Information Agency Has Lavish Setup in France

EXTENSION OF REMARKS
OF
HON. LAWRENCE H. SMITH
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES

Monday, April 29, 1957

Mr. SMITH of Wisconsin. Mr. Speaker, Charles Lucey, Scripps-Howard staff writer, points out in an article that the USIA organization in France is operating on a lavish scale. He indicates that the British are doing as good a job as we are for much less money and with a lot less show. His article follows:

LAVISH IS THE WORD FOR USIA SETUP IN FRANCE

(By Charles Lucey)

PARIS, April 30.—From a resplendent office on an avenue appropriately named Gabriel, the United States Information Agency blows its horn here in Paris, and it is a high-priced performance often tending toward extravaganza.

USIA's fine quarters adjoins the American Embassy. Its staff is bigger than the Embassy staff, and it is a little hard to tell whether the tail or the dog does the wagging.

COMPARISON

A block away, Britain runs an information show costing one-tenth what the United States spends. France itself lays out only peanuts around the world to spread information and culture.

Here in France, as throughout Europe, USIA is engaged in many good, legitimate functions informing the world's peoples about United States policies, life and folkways. USIA's libraries invariably are filled. Many of the Agency people are devoted to their jobs and work hard.

But it is taking an awful lot of personnel to keep this show going. Here in France, the payroll lists 53 Americans and 247 Frenchmen. Additionally, it takes flocks of United States Embassy people to support the Information Agency—another 26 Americans and 76 Frenchmen plus 7 Marine guards. The USIA budget for France is just under $2,200,000 and supporting costs approach $400,000.

THIRTY-SIX-PAGE MAGAZINE

Here in Paris, USIA prints a 36-page biweekly magazine in French called Information and Documents. It is a fairly professional job. Describing various phases of American life, it may include photographs of a covered bridge, American theater scene, college campus pictures, families gathered at the table for Sunday dinner, and the like.

Mostly, the articles are serious, but recent numbers have included such bits of uncosmic souffle as the history of animated cartoons, descriptions of the New York ballet, an account of a Frenchman who established a splendid restaurant in a Western mining camp, etc.

It costs $175,000 yearly, circulates to 100,000 leaders, supposedly, of French thought. It certainly does not go to people starved for information or reading, because they have plenty of good French newspapers and magazines.

NOT THE BRITISH

The British put out no such magazine, but somehow manage to get a fair share of their story told in France through an inexpensive mimeograph production with a small circulation. It makes the American operation look plush indeed.

Here in France, USIA salaries alone exceed $500,000 yearly. Salaries run from $10,000 to $14,600 yearly with a few at the top getting another $3,200 living allowance. Many are paid more than they could possibly get in private jobs.

The French USIA show isn't merely Paris—there are branches in Lille, Lyon, Bordeaux, Marseille, Strasbourg, Tours, and Algiers.

How do the British manage in these places? They simply have the regular consul do the job instead of having separate information culture shows.

Protection of Beauty and Grandeur of Columbia River Gorge

EXTENSION OF REMARKS
OF
HON. RICHARD L. NEUBERGER
OF OREGON
IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. NEUBERGER. Mr. President, in every generation a small handful of men and women have fought the battle of conservation in order to preserve the natural heritage of our majestic continent—the heritage which belongs to the people of the future.

Some of these battles, alas, have been lost. Others, fortunately, have been won. Here in this Senate we have recently seen conservation fights lost and priceless natural resources surrendered to exploitation.

But out in my home State of Oregon, due largely to the determination and dedication of a tireless woman, a long struggle is being won to safeguard the scenic grandeur of the marvelous Columbia River Gorge where it is traversed by U. S. 30, which we also know as the Columbia River highway.

This woman is Mrs. Gertrude Glutsch Jensen. Principally because of Mrs. Jensen's effective crusading, the Oregon State Legislature has passed an act establishing the Columbia River Gorge Commission. Appropriately and fittingly, Mrs. Jensen has been appointed as chairman of the commission, which has as its mission the necessary land exchanges and land management to keep the timbered slopes of the Columbia River Gorge from being logged over by unsightly sawmill operations.

I am very proud to report that my wife, former State Representative Maurine Neuberger, and I were leading proponents in the legislature of the bill to establish the Columbia River Gorge Commission, where we worked with a Republican associate, former Senator Philip Hitchcock, to bring about adoption of the proposal so indefatigably urged by Mrs. Gertrude Jensen.

It is appropriate for me to call this major achievement in the field of conservation to the attention of the Senate, because most of the great cliffs and palisades of the Columbia Gorge are included in the Federal domain known as the Mount Hood National Forest.

A few other people deserve real credit for what has been accomplished. Among them are Marshall N. Dana, ex-editor of the Oregon Daily Journal, of Portland, Oreg.; Neal Butterfield, of the United States National Park Service; Frank B. Folsom, of the United States Forest Service; and Mr. John B. Yeon, Jr., outstanding architect and conservationist, who headed a citizens' study of the recreational and scenic assets of the Columbia Gorge. It was Mr. Dana, a longtime defender of the beauty and majesty of the Columbia's unrivaled chasm, who presented to the 1953 session of the Oregon Legislature the bill which ultimately, after some revision and amendments, became the helpful protective law of today.

I feel certain that Members of the Senate will be interested in a most comprehensive report prepared by Mrs. Gertrude G. Jensen on the task of preserving and protecting the scenic grandeur of the great Columbia River Gorge. I ask unanimous consent that her statement be printed in the Appendix of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

A LIST OF THE MAJOR ACCOMPLISHMENTS IN THE PRESERVATION OF THE COLUMBIA RIVER GORGE DURING THE PAST 4 YEARS

When I observed an extensive logging operation alongside the Columbia River highway below Mist Falls and just west of the Mount Hood Forest boundary of Wah-Keena Falls, I reported this observation to the executive council of the Portland Women's Forum, of which I am a member. The council was shocked and immediately the president, Mrs. Howard Arnest, appointed a committee to look into the matter. This committee was later known as the "save the gorge" committee, of which I served as chairman for 2 years. With the cooperation of the Oregonian and the Oregon Journal, and the friendly guidance and advice of Mr. Marshall Dana and Mr. Neal Butterfield of the National Park Service, considerable progress has been made.

MRS. GERTRUDE G. JENSEN,
Chairman, Columbia River Gorge Commission, State of Oregon.

A. The inauguration of an exchange program by the Federal Government as an emergency measure to safeguard beautiful stands of timber and watersheds along the Columbia River Highway and in the Gorge of the Columbia River. This exchange of lands in the gorge for publicly owned lands elsewhere has been carried on by the Bureau of Land Management of the Department of Interior and the Mount Hood National Forest of the Department of Agriculture with the friendly

cooperation of the National Park Service of the Department of Interior.

1. Some of the major exchanges of the Bureau of Land Management (BLM) which have been made and are in the process of exchange in the area from the Sandy River east to the forest boundary at Wahkeena Falls are as follows (the Forest Service makes the exchanges east from the boundary to Hook River):

(a) The mile-and-a-half Paul and Verla Martin strip of approximately 110 acres, extending east from the Sandy River bridge and along the south side of the expressway to the top of Broughton Bluff. This was done in cooperation with the owners of the property and Steboo Lumber Co., of Vancouver, Wash., of which William Culkin is vice president and general manager. The owners made the property available to the lumber company at the Government's appraisal, and the lumber company is exchanging this property for an area of equal value of public-domain land and timber on the Washintgon side of the Columbia River within 50 miles of the gorge.

(b) The acquisition and exchange of two parcels of property in Latorell Falls Canyon and watershed through the cooperation of the owners, Mr. and Mrs. Frank Mackaness and Mr. and Mrs. Clifford Latorell, Steboo Lumber Co., and BLM.

(c) The acquisition and exchange of a large and beautiful timbered area of over 200 acres beginning at the middle of Shepherd's Dell and along the south side of the Columbia River Highway of 1½ miles, all Douglas-fir trees, through the cooperation of the owners, Mr. and Mrs. Lyle Ginter, Steboo Lumber Co., and BLM.

(d) The Mist Falls area including Mist Falls, over 1,000 feet high and the forest up to Angels Rest including 2 miles along the south side of the Columbia River Highway of approximately 500 acres, through the cooperation of the owner of the land, Calvin Helfrich, the logger, Delbert Palmer, and Steboo Lumber Co.

(e) Several other parcels have been examined and an appraisal made by BLM.

2. The Mount Hood Forest Service has been successful in acquiring:

(a) The Warrendale Fishery property which runs along both sides of the highway and along the Columbia River for approximately 2 miles. This was the result of an offer to Mr. A. J. Dwyer, president of the Dwyer Lumber Co. to purchase land and timber in the gorge and exchange for land and timber elsewhere which was owned by the Government. This offer resulted in the offer of Donald Munro, Jr., grandson of Mr. Warren who owned this historic fishery built in 1885 to make the property available to the Forest Service.

(b) Many other parcels of privately owned property along the highway and in Multnomah Basin have been examined and are in the process of exchange awaiting a statement of policy from the Secretary of the Department of Agriculture making the gorge a special case and restoring the old policy of land and timber for timber instead of the present national overall policy of land timber for land and timber.

(c) Forest Service exchanges during the past 4 years achieved another successful exchange. Although this exchange involved only 40 acres of a heavily timbered forest hillside which is the southeast corner of the expressway intersection with the road into Bonneville Dam, this scenic entrance to the dam was seriously endangered and "nearly logged" and had it not been for a very sincere and earnest effort on the part of the Forest Service to act quickly, it would have been ruined. This corner was owned by Mr. Tyrell who sold the timber to Dubois Matlack Lumber Co. of Vancouver who had contracted with Merrill Bros. to cut the timber. An exchange was made for 40 acres in the gorge but farther back which cannot be seen from the highway. I always call this place Gertrude Dunns corner.

B. The appointment of an official Columbia River Gorge Committee by Gov. Douglas McKay. Mr. Marshall Dana was appointed chairman of this very important committee.

C. The enactment of the Columbia River Gorge bill, Senate bill No. 332, creating a Columbia River Gorge Commission. The drawing up of this bill was the result of a trip and conference in New York and in Washington which solved the problem of what to do. In New York, with my son, F. Charles Jensen, who was attending Columbia University and with Dr. Ralph Walker of the Madison Avenue Baptist Church, formerly pastor of the White Temple Baptist Church of Portland, we called on Horace Marden Albright, former head of the National Park Service in Washington, adviser to the Rockefeller and Ford Foundations and an active conservationist who greatly helped the Save the Redwoods movement in California.

In Washington, I conferred with Mr. Conrad Wirth, Chief of the National Park Service, and Ben Thompson, head of the recreational planning of the Park Service, and their assistants who had been briefed on the situation in the gorge by Mr. Neal Butterfield of the National Park Service in Portland. This conference was held in Mr. Wirth's office and resulted in the writing of the Columbia River Gorge bill which was presented to the 1953 Oregon Legislature by Mr. Marshall Dana.

This bill was passed through the concentrated efforts of the members of the Portland Women's Forum, the Mazamas and the natural resources committee of the Portland Chamber of Commerce, and Senator Richard Neuberger, Representative Maurine Neuberger, and Senator Philip Hitchcock.

This bill, in part, is as follows: *"Be it enacted by the people of the State of Oregon:* * * * For the purpose of preserving, developing, and protecting the recreation, scenic, and historic areas of the Columbia River Gorge, there hereby is created the Columbia River Gorge Commission. The Commission shall consist of three members who are resident of the State and shall be appointed by the Governor on a nonpartisan basis."

The duties and powers of the commission are to acquire land in the name of the State by purchase, exchange, transfer, gift, or devise. There are also other duties and powers. However, no money was provided by the 1953 or 1955 legislatures for the use of the commission for expenses or acquisition, due to the huge deficit in the State budget.

Another duty of the commission was the presentation of a plan to the Governor for the protection and administration of the Columbia River Gorge. This was done and follows as one of the major achievements in the plan for the gorge.

D. Presentation of the 25-year plan of acquisition, protection, and administration of the Columbia River Gorge to Gov. Paul Patterson by the Columbia River Gorge Commission. This plan resulted from a thorough and extensive study by members of the commission—Gertrude Jensen, chairman; George Ruby, attorney and member of the commission; Dan Pierson, member, and former president of the Chamber of Commerce of Hood River.

This plan was based on the 2-year study for the protection of the gorge as contained in the Northwest regional planning report of which Mr. Dana was chairman. This study was made for the protection of the natural scenery in the gorge at the time Bonneville Dam was built. Marshall Dana was chairman of the Northwest Regional Planning Committee and Mr. John Yeon, Jr., headed the committee of outstanding citizens who made a study of the gorge known as the Columbia River Gorge Committee. This plan was never carried out as the planning board of the State under Governor Martin was abolished by the next session of the legislature; Ormond Dean was chairman of this board. This book containing the plan for the preservation of the gorge was filed away in the State capitol since 1937 and is probably still there with no one authorized to do anything toward carrying out this plan.

Four years ago, Mr. Merriam, head of the National Park Service for region 4 in San Francisco, wrote me about his excellent report and study and felt that if I could obtain this volume, therein would be our solution. This report has been our guide.

E. The first gift—150 acres of land and timber of great value and scenic beauty near Mitchell Point, in the Columbia River Gorge, and intercepted by both highways and bordering along the Columbia River—presented to the State of Oregon, through the Columbia River Gorge Commission, on Christmas eve, 1954, by Anton A. Lausmann and Joseph H. Lausmann, in memory of their father, Vincenz Lausmann.

The 48th Legislative Assembly of the State of Oregon in 1955 passed house joint resolution 21, expressing the appreciation of the people of the State of Oregon to the donors of this generous commemorative gift—the first gift made to the commission.

F. An amendment to Columbia River Gorge senate bill 332, giving the commission the power to transfer property and appropriating money for the use of the commission for expenses and acquisition. This amendment was introduced by Senator Pat Longergan and Representative Tom, at the request of the Portland Women's Forum. No money was appropriated for the use of the commission or for acquisition, but an agreement with the State highway commission that a sum of $50,000 be set aside for acquisition of areas in the Columbia River Gorge, as recommended by the Columbia River Gorge Commission.

As a result, the State highway commission, through their parks department, has cooperated with the gorge commission in their study of essential scenic areas to be acquired by providing the services of Mr. Ray Landon, negotiator for the right-of-way department, and Mr. Merriam, forester, to contact the owners of the several parcels of property on which the commission has requested a report.

G. The efforts of the Columbia River Gorge Commission and Governor Patterson are centered on Washington, D. C., to restore the former exchange policy of the Forest Service of land and timber for stumpage to facilitate the exchanges.

It is hoped that these efforts to make the gorge a special case in the matter of exchange will be successful.

Also:

1. The cooperation of the county commissioners of Multnomah County making 80 acres in Oneonta Gorge and 40 acres at St. Peter's Dome available to the Mount Hood Forest Service at a price of $4,000.

2. The very important assistance of Charles Ladd, Sr., farm forester of the State department of forestry, in preparing a book of current ownerships in the gorge from the Sandy River to Hood River and also the status of each parcel of land relative to land use—logged, when logged, first or second growth, and other relative facts.

3. The purchase of Chanticlier Point by the ladies of the Portland Women's Forum which will be presented to the State of Oregon as a gift through the Columbia River Gorge Commission and to be developed as a park, as, from this point is obtained the first view of the magnificent gorge of the Columbia River. Chanticlier Point is one of the world famous view points.

4. Appointment of M. K. Wolfe as coordinator and executive secretary of the

Columbia River Gorge Commission pro tempore—until a permanent arrangement is made. This was done through the efforts of the National Park Service. Mr. Wolfe is a retired top official of the district office of the United States National Forest Service in the Division of Recreation and Lands. This appointment was made to become active May 1, 1956.

5. Restoration of former exchange policy of land and lumber for timber by the Forest Service on five parcels of land under consideration for exchange.

This is a partial list of the major accomplishments.

The Post Office Question

EXTENSION OF REMARKS
OF
HON. GEORGE M. RHODES
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. RHODES of Pennsylvania. Mr. Speaker, Post Office Department policies have brought considerable criticism in my district, as I know they have in all parts of the Nation. I would like to include, with my remarks, Mr. Speaker, an interesting editorial on the subject from the Birdsboro (Pa.) Dispatch, which follows:

THE POST OFFICE QUESTION

Every time we talk about the operations of the Post Office Department we have trouble with our mail deliveries. More trouble, that is, than ordinarily. Nevertheless we feel that recent events in the postal service demand some sort of comment.

Last Saturday, perhaps for the first time in history, post offices across the United States were closed up tight. The Postmaster General blamed Congress for the circumstance, and Congress accused the Postmaster General.

The wrangle which brought on the closing, in our opinion, has reflected no credit at all to either party in the dispute. In a rather arrogant fashion, the public service has been subverted to the political uses of both parties.

The heritage of that Department is that its service cannot be halted by either snow, nor rain, nor gloom of night. But what nature cannot accomplish, partisan politics has achieved with a vengeance. The service was suspended in what amounts to nothing more than a political jockeying for advantage.

Postmaster General Summerfield contends that he needs $47 million to maintain the former level of service for the final 3 months of the current fiscal year. Congress, with equal vigor, has denied him that sum.

Lost in the smoke of the controversy at hand is the fact that the Postmaster General knew full well last July 1 just exactly how much money he had to run his department for the full year.

He argues that the money which he is now short has been spent in maintaining full service during the past 9 months. While this fact may be true, it raises the issue of moral conduct. Was the Postmaster General morally right in borrowing sums for service last fall from the money allocated for service this spring?

We do not think that such practices were justified. And in their practice we believe that the Postmaster General performed a grave injustice not only to the people whom he deprived of the service for which they have paid but to the administration which he serves as well.

Hallmark of Republican policy down through the years has been the application of established business practices to the conduct of public affairs. That is one reason why the people of the United States entrusted the affairs of government to Republican hands.

Certainly no businessman of any stature would drain the funds of his venture to the last drop and then rush off to the bank or to his customers crying for more money. Certainly no businessman of any stature would employ such arrogant tactics in achieving his ends.

One point which the Postmaster General and Congress, to a lesser extent, seem to have forgotten is that the real bosses of the Government are not the various public officials in Washington but the people whom the postal service is supposed to serve.

And one point that everyone concerned seems to have chosen to ignore is that those people are entitled to full service. There have been rather vigorous efforts to imply that the mails, as they are set up, serve not the people but certain segments of business.

This argument is as spurious as a $3 bill. People pay taxes. Out of the money derived from these taxes, the Government is supposed to provide certain services. There is no question that the postal service is one of these because that is one function specifically assigned to the Federal Government by the Constitution of the United States.

It may be argued that the income from the sales of postage stamps and other fees are not sufficient to operate the Post Office Department. But what of the money that the Government receives from taxes?

If this idea of self-sufficiency is to be applied to the postal service, why is it not applied to the Department of Agriculture, the Department of Commerce and the Department of Health, Education and Welfare? Each of these performs some service, or there is no legitimate reason for the existence of the departments.

If the users of mail must carry the full burden of the department's costs or suffer a cutback of service, why should farmers not also carry the full burden of the costs of the Agriculture Department? Farmers should, by the same logic, pay for all the research and subsidies which they receive.

There is a lot of talk these days about modern Republicanism. We cannot but wonder if the curtailed mail service is supposed to be a manifestation of this innovation. If it is, we trust that we shall be forgiven for doubting the future success at the polls of the Republican Party.

The Late William H. Stafford

SPEECH
OF
HON. CLEMENT J. ZABLOCKI
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, April 29, 1957

Mr. ZABLOCKI. Mr. Speaker, I want to join with my colleagues in expressing regret at the news of the passing away of William H. Stafford, a former Member of this body from Milwaukee, Wis.

A quarter of a century has passed since the late William H. Stafford served his last term in the House of Representatives, but the image of his personality is still vivid in the memory of some of his former colleagues and contemporaries. He was a colorful, outspoken man. During his service in our national legislature he was associated with early advocacy of independence for the Philippines, abolition of "lame duck" sessions, and modification of the prohibition law.

He was among a handful of Members who voted against the entry of the United States into World War I. Eleven years later he again opposed certain of our activities in the international scene.

The late William H. Stafford lived to be 87 years of age. He is survived by a sister, Mrs. Ella Steiner, Milwaukee; a niece, Mrs. John M. Lindsay, Milwaukee, and two nephews, Fred J. Siekert, of Milwaukee, and Stafford Siekert of Apple Valley, Calif.

I wish to convey to them my sincere condolences at this time.

Progress in Our Military Program

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 17, 1957

Mr. BROOKS of Louisiana. Mr. Speaker, I rise to report to the House that our military program is moving along nicely. I have just been advised by the Department of the Army that this week 4,523 young men entered the Army part of this program. Of this number, 2,244 were 18½ years of age or older, the Army states, and 2,279 are under 18½ years.

Since the Reserve Forces Act of 1955 was passed by the Congress, there have been made criticisms of the operation of the program under the 6-month training act. Suffice it to note at this time that of these 4,523 men entering the Army program—does not include the National Guard—this week, 3,080 came in under the 6-month training provisions.

The Army also informs me that a total of 161,329 young men are now enlisted under the Army Reserve program. This is clear evidence, in my opinion, that our Reserve program is definitely developing and should give our people confidence in its future.

As with most successful programs, however, additional problems arise. This is especially true of our Reserve program. With the increasing influx of younger men into this program, there come the difficulties of providing them with adequate training facilities, equipment and competent instructors at unit level. A part of this problem is that of supplying military clothing for these men in needed amounts. The Army indicates that these problems will be extremely difficult to handle in some localities, particularly the one pertaining to capable instructors.

These are but a few of the problems which this program presents to the Army and which must be ironed out as the Reserves continue to increase in size and move to their ultimate strength. This is a very favorable situation, even with the present problems, and one which will result in time in developing the best military Reserve program in the world.

Address by Assistant Attorney General Perry W. Morton Before the Washington Pilgrimage

EXTENSION OF REMARKS
OF
HON. ALEXANDER WILEY
OF WISCONSIN
IN THE SENATE OF THE UNITED STATES
Wednesday, May 1, 1957

Mr. WILEY. Mr. President, it was my pleasure last Saturday to introduce the Honorable Perry W. Morton, Assistant Attorney General of the United States, to the audience of the Washington Pilgrimage. Mr. Morton there delivered a most interesting address, and I ask unanimous consent that it be printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

AN ADDRESS BY HONORABLE PERRY W. MORTON, ASSISTANT ATTORNEY GENERAL OF THE UNITED STATES, PREPARED FOR DELIVERY AT THE WASHINGTON PILGRIMAGE, UNITED STATES CAPITOL, WASHINGTON, D. C., SATURDAY, APRIL 27, 1957

It is indeed a privilege to share a few thoughts with you today concerning the significant theme which has brought us all together in this room. We come from many different backgrounds. Our ancestors embarked from numerous shores. We represent many geographic areas. We hold various specific religious beliefs. But we are here with a common concern and unity of purpose. Actually this pilgrimage is symbolic of what is finest and best in this city of Washington. For what is Washington but a bit of Kansas, California, Texas, Florida, Maine, Oregon, and all the rest, all melted together.

The point I wish to emphasize in these few minutes is: The essential unity which exists among us notwithstanding our differences, and in some respect, indeed, because of our differences. The Apostle Paul, in one of his great letters to the young church at Corinth, put the idea in these timeless words: "Now there are varieties of gifts, but the same Spirit; and there are varieties of service, but the same Lord; and there are varieties of working, but it is the same God who inspires them all in every one. To each is given the manifestation of the Spirit for the common good" (I Corinthians 12: 4–7).

It is because of this fundamental unity—to often obscured—that I, as a member of the executive branch of the Government, am not only free but honored to salute the Members of both Houses of the Congress, here present with you, no matter on which side of the aisle they may sit, for their common dedication to the principles which make this country great.

Many of you have often been puzzled, as I have been, why restraint, order and peace should prevail within our country to such a great degree, but the world outside is often torn asunder by such savagery, dissension and war.

It seems to me that we find peace where there is general agreement among our peoples as to what is right and just. It is upon this foundation that our internal laws beget such general respect and obedience.

Our way of life is one of trust in each other and in the judgment of the courts; of tolerance for each other's ideas and standards; of protecting the weak against the strong; of mediating our controversies with patience and fair compromise and abiding by the decision; of treating our neighbors as we want them to treat us; of recognizing the differences among our peoples and respecting them; of reducing inequalities and eradicating injustice; of acknowledging that progress cannot be stopped but must be attained by representative process; of regulating the course of public affairs to the needs of the people. These are at least some of the important ingredients of order and peace at home.

The President has aptly observed that "Men of widely divergent views in our country live in peace together because they share certain common aspirations which are more important than their differences."

These common aspirations, to which the President referred, all stem from one basically religious idea which is the cornerstone of our system of government. Indeed, it is not oversimplification to say that there are just two plans of government in all the world, and in all the history of the world There is the one which we call democracy, in which the individual is the citizen. And there is the other which we call dictatorship, in which the individual is the subject. No matter what they are called, that is the difference. It is immaterial whether the dictatorship is one which historically passed under the name of absolute monarchy, or whether it is a dictatorship of the right, like nazism, or one of the left, like communism. The one plan, called democracy, is based upon the essentially religous ideal of individual dignity and the infinitely precious value of each human soul. Under the other plan, currently identified as communism, the individual is degraded to being the puppet of an all powerful state. It is utterly amazing to observe the brazenness with which this Godlessly materialistic communism asserts that it is the revolutionary plan. As Dr. Elton Trueblood has so well described in his book Declaration of Freedom, "the free society is always and everywhere the revolutionary society." This great country of ours was born in revolution. The real revolution in this or any other time is the emancipation of man. Communism is not the wave of the future. It is the convulsive tremor of the dead past—a throwback to all that is cruel and ignoble in the character of man. Tyranny and dictators are as old as the Sphinx.

It is essential for us to understand that what we face is not merely an economic system, but a perverted faith, which is fanatical in temperament, missionary in the methods of its own expansion, and a substitute for God in the minds of its adherents. By its cleverly devious processes of subversion, including unscrupulous distortion of democracy's vocabulary, it succeeds in making helpers of many dupes whose empty talk corrodes the safeguards of true liberty.

That is why it is so tremendously important for us to understand that freedom is a treasure which is not purchased once and for all, but must be affirmatively preserved in every age and generation. That is why we must continuously cultivate our common aspiration that this shall be, indeed, one Nation under God. But let us be sure that we keep the picture of this motto right side up. Like any picture, it is confusing upside down. In this room of the United States Senate, it is especially fitting that we should, in this connection, recall the words of Peter Marshall, Chaplain of the Senate until his death in 1949: "The idea may be abroad in some quarters," said Dr. Marshall, "that democracy is the thing that must be preserved * * * and that God is to be brought in as its servant. We must not get the cart before the horse. The plea of the church today is not that people shall call upon God to return to democracy and bless it * * * but rather that we shall together cause our democracy to return to God and be blessed."

Dr. Marshall's point, of course, is that it is up to us to keep ourselves in tune with God's plans, instead of expecting Him to be some sort of a "gimmick" for getting what we want. It is not enough merely to be against the Communist conspiracy. We must act affirmatively for peace and freedom in order to make the brotherhood of man a reality. The only way to meet a perverted faith is by the living and spreading abroad of a better faith, penetrating all of the world with the dream of a society that is both just and free. We cannot do this by hiding in our closets singing some silly, shallow, sentimental, escapist, jukebox tune like, Have You Talked With the Man Upstairs? Religious faith does not provide an advance guaranty of immunity from risk, danger, and suffering. The God who spared not His own Son does not call us to walk in a garden, or to ride on an escalator above the turmoil of the human scene into a Beulah land. Men's finest hours come in times of ordeal, not in placid periods of tranquillity. It is especially in such hours that we, who are citizens of a nation under God instead of subjects of a godless state, find our unity towering above our differences. In unison and steadfast trust we can all say together: "God is King, be the earth never so unquiet."

Where Are We Headed in the Middle East?

EXTENSION OF REMARKS
OF
HON. LAWRENCE H. SMITH
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, April 29, 1957

Mr. SMITH of Wisconsin. Mr. Speaker, I am including as part of my remarks an interesting editorial that appeared in the Wall Street Journal and which points out the dangers that exist in the Middle East area.

The article follows:

CAUTION: EXPLOSIVES

As this is written the United States moves in the Middle East appear to have been successful.

At any rate King Hussein has regained some political stability for his country. The possibility that Jordan might be invaded by its immediate neighbors has diminished. And the Eisenhower administration can claim persuasively that its implicit warnings of United States intervention contributed to this favorable turn of events.

So we can all sigh with relief at the passing of this particular crisis. Perhaps also we can use this welcome breathing spell to take stock in a way that is difficult to do when events hang in the balance. Otherwise there is the danger that the successful passing of perils may persuade us the journey has become less perilous.

For good or ill the United States has got itself deeper and deeper into the maelstrom of the Middle East. In the last fortnight the Government has gone much farther than we understood the intent of the Eisenhower doctrine, and in so doing it has assumed new risks that ought to be fully measured.

The Eisenhower doctrine, as we think the public understood it, was a declaration that if any country in the Middle East was a victim of Communist aggression the United States would answer its appeal for help. It strikes us that this doctrine had to be stretched considerably to cover the troubles in Jordan.

Jordan itself is an artificial country. It was carved out of the Arabian desert by the British after World War I; until recently it was supported, economically and politically, by Britain. Its population consists of an unstable mixture of Circassian Moslems,

Arab Moslems, and Arab Christians to which have lately been added some 600,000 Arab refugees from Palestine.

Jordan thus has always had built-in stresses that have nothing to do with the political ideologies of communism. It had hardly obtained independence in 1946 before one king was assassinated. The next king was removed by Parliament and his son, the present king, has sat ever since upon an uneasy throne.

The interest of the Communists in this is undeniable. They are delighted by the strife and they have done everything to encourage it. But the notion that King Hussein leads a country that is united behind him except for the threat of international communism does not square with the known facts.

The real struggle is all mixed up with Jordanian nationalism, pan-Arabianism, anger at Israel, and lingering resentments from the long years of Western colonialism. It would be an explosive situation with or without the Communists.

To mix into this situation by rushing naval fleets and marine battalions into the area is a dangerous business. Our intervention has been welcomed by hardly anyone, except perhaps the King himself. In Jordan the Eisenhower doctrine is an inflammatory phrase—Mr. Richards with $200 million of Eisenhower doctrine aid to spend hasn't dared poke his nose into the place. Elsewhere in the Arab world we have made it easier for the Communists to talk about American imperialism.

We have also thereby acquired some new risks for the future. If the tenuous stability in Jordan gives way—and it is very likely to—what do we do with our fleets and our marines? To justify our action we have said that Jordan is vital to our interests. Do we invade it? Do we prop King Hussein on the throne with force? Are we prepared to fight Syria, Israel, Egypt, or Saudi Arabia to save Jordan if it should come to that? Or are we only bluffing?

Furthermore, if political stability in so small a country as Jordan is vital to us, what about the internal affairs of larger and more important countries in that area?

The Eisenhower doctrine, alone and without embellishment, was a major undertaking. It was an avowal that we would protect this area, if it wanted protection, from an aggression rooted in international communism. But whatever else this crisis in Jordan has been, and however much the Communists have shrewdly exploited it, its roots lie in the internal political stresses of the country, not in international communism. To inject ourselves into this situation is to go beyond the Eisenhower doctrine.

Some will reply that it is a logical extension of that doctrine. They say the time has come for the United States to recognize its responsibilities in that whole area, whatever the internal forces that threaten the peace, because any explosion would benefit the Communists.

Perhaps so. But if we are going to play around with such explosives, we had better be prepared to have them blow up in our face.

Examiner Rules FTC Has No Power To Act on Food Fair Case

EXTENSION OF REMARKS

OF

HON. LEE METCALF

OF MONTANA

Monday, March 25, 1957

IN THE HOUSE OF REPRESENTATIVES

Mr. METCALF. Mr. Speaker, a recent ruling by a Federal Trade Commission hearing examiner leaves a hole in our antitrust laws big enough to shove an industry through.

The ruling is the subject of the following story in the April 19, 1957, issue of the Wall Street Journal:

EXAMINER RULES FTC HAS NO POWER TO ACT ON FOOD FAIR CASE—FIRM'S MEATPACKING OPERATIONS PLACED IT UNDER FARM AGENCY CONTROL, HE MAINTAINS

WASHINGTON.—A Federal Trade Commission examiner ruled that the agency has no power to act against Food Fair Stores, Inc., Philadelphia, because the east-coast grocery chain operates a meatpacking plant.

Examiner Frank Hier held that the Agriculture Department has exclusive jurisdiction over meatpackers. The Agriculture Department's responsibilities extend, he added, even to a meatpacker's nonpacking operations.

FTC staff lawyers argued that giving the Agriculture Department sole jurisdiction over companies with packing interests would lead to absurd results. According to the staff, Mr. Hier's recommendation would permit a business to choose FTC or Agriculture Department regulation simply by acquiring or getting rid of a packing plant.

The examiner, however, said it's not up to him to interpret what he called the clear law. He noted that legislation is pending to give the Commission power to regulate the nonpacking activities of meatpackers.

Mr. Hier recommended dismissal of a 17-month-old FTC complaint against Food Fair. The chain was accused of inducing special promotional allowances from its suppliers which it knew or should have known were not being offered to its competitors. The dismissal order is subject to review by the full FTC.

Food Fair is a large supermarket grocery chain along the Atlantic seaboard. Its sales in the 28-week period ended November 10, 1956, were $279,373,768. Since 1945, Food Fair has operated a meatpacking plant in Elizabeth, N. J., which sells aout $25 million in meat products each year, the FTC said.

As the gentleman from New York [Mr. CELLER] has pointed out, the meat packers' exemption from surveillance by the Federal Tradé Commission "poses grave threats to the continued usefulness of the FTC and to its ability to proceed against unfair and discriminatory practices by any American company."

The Packers' and Stockyards Act of 1921 took away from the Trade Commission jurisdiction over unfair trade practices in the meat packing and related industries and gave it to the Secretary of Agriculture.

A number of us would restore jurisdiction to the Trade Commission. The lead has been taken by the gentleman from New York [Mr. CELLER] and the gentleman from Utah [Mr. DIXON]. In the other body where hearings have begun, the amendment is sponsored by the senior Senator from Wyoming, Senator O'MAHONEY, and the senior Senator from Utah, Senator WATKINS.

The gentleman from New York [Mr. CELLER], chairman of the House Committee on the Judiciary and of its Antitrust Subcommittee, has urged hearings on these bills in a letter to the chairman of the Committee on Interstate and Foreign Commerce, the gentleman from Arkansas [Mr. HARRIS], which appeared in the RECORD of April 29, 1957, on page A3163.

In that letter he pointed out that any industry—tire producers, battery manufacturers, automobile manufacturers, integrated oil companies, or any other industrial giant—could squeeze through this loophole outside antitrust enforcement by the Federal Trade Commission.

The danger to our competitive free enterprise system also has aroused the National Federation of Independent Business, whose vice president, Mr. George J. Burger, has written the following letters to me and to the chairman of the Federal Trade Commission:

NATIONAL FEDERATION OF INDEPENDENT BUSINESS,
Washington, D. C. April 19, 1957.

Hon. LEE METCALF,
House Office Building,
Washington, D. C.

MY DEAR CONGRESSMAN: Note my letter to Chairman Gwynne of the FTC and the attached copy of clipping.

Truthfully it will take some men of your type to spearhead the fight to have immediate correction made of this situation.

The remaining independents in the food industry or the retail meat industry will be through if the Government and the administration doesn't take the appropriate action.

The platforms of both political parties contained a pledge for allout vigorous enforcement of the antitrust laws to protect small business. Now we put the question: "Will the pledge be kept?"

Sincerely yours,

GEORGE J. BURGER,
Vice President.

APRIL 19, 1957.

Hon. JOHN GWYNNE,
Chairman, Federal Trade Commission,
Washington, D. C.

MY DEAR JUDGE: You, no doubt, are well aware of the action of the examiner in ruling that the Federal Trade Commission has no power to act in the Food Fair case.

If this wretched situation is allowed to continue, for practical purposes, due to divided authority in enforcement of the antitrust laws, it goes without saying, as we review the scene, that antitrust laws are worthless to protect the free-enterprise system.

This ruling will also cause a new defense for those who are charged under the FTC Act with alleged violation of the antitrust laws.

With airlines being exempt from antitrust laws, interstate carriers, and food chains where they are operating a meatpacking institution, we wonder where it is all going to end.

It is our hope that the Commission will take appropriate action in the present Congress in seeing to it that a correction is forthcoming at the earliest possible moment.

With some other cases pending—not applying to the FTC—we put the question: "When does equal justice under the law prevail?"

Would you be kind enough to bring my letter to the attention of your fellow commissioners, and as the National Federation is committed by its nationwide membership for all-out vigorous enforcement of the antitrust laws, we will leave no stone unturned to bring about this correction.

Waiting to hear from you.

Sincerely yours,

GEORGE J. BURGER,
Vice President.

The Western States Meat Packers Association, of San Francisco, Calif., describes the situation as follows:

FTC SAYS IT HAS NO JURISDICTION OVER RETAIL GROCERY CHAIN WHICH OWNS A MEATPACKING PLANT

A Federal Trade Commission examiner issued an order on April 18, 1957, to dis-

miss, for lack of jurisdiction, a complaint against Food Fair Stores, Inc., Philadelphia, Pa. The FTC examiner, Frank Hier, said Food Fair is a meatpacker under the terms of the Packers and Stockyards Act and, therefore, is under the exclusive jurisdiction of the Secretary of Agriculture on all its operations.

The Federal Trade Commission had charged that Food Fair Stores, Inc., had violated the Robinson-Patman amendment to the Clayton Act by inducing special promotional allowances from food suppliers which the company knew were not being offered to its smaller competitors.

Food Fair is a supermarket grocery chain of 238 stores along the Atlantic Seaboard having an annual business of $475 million. The company also operates a meat packing plant in Elizabeth, New Jersey. Food Fair is listed and licensed by the Department of Agriculture as a packer.

Examiner Hier said the Packers and Stockyards Act is clear and unambiguous and provides that "the Federal Trade Commission shall have no power nor jurisdiction so far as relating to any matter which by this act is made subject to the jurisdiction of the Secretary."

This decision by Examiner Hier has thrown the American business community into a chaotic situation. Mr. Hier has stated that any company under FTC jurisdiction can escape supervision of its trade practices by acquiring a 20 percent interest in a meatpacking plant.

This is a problem of great importance because the Department of Agriculture does not have the legal power to administer the provisions of the Clayton Act or the provision of the Robinson-Patman amendment. Furthermore the enforcement provisions of the Packers and Stockyards Act relating to monopolistic acts and unfair competition are almost altogether neglected because the Department of Agriculture has no staff to enforce its responsibility in this field.

Enforcement in the Department of Agriculture is also lacking for still another reason. The Packers and Stockyards Branch is relegated to a commodity Division in the Agricultural Marketing Service and is supervised up the line by economists and research specialists who have no specialized training in the field of monopolistic practices or unfair competition. In fact, the enforcement of fair trade practices would interfere with the regular work of the Department in which these men are interested.

In addition to these unfavorable factors for effective enforcement in the Department of Agriculture, it should be noted that USDA does not have an appropriation for an enforcement staff, but in recent years the Department has vetoed every effort of the Packers and Stockyards Branch to obtain an appropriation for this purpose.

For instance, last year the branch requested that $200,000 be placed in the USDA budget to employ personnel to start enforcing the meatpacker provisions of the act. The entire amount requested by the branch was knocked out of the budget by the Department itself. The request was not submitted to the Bureau of the Budget or the Congress.

The Department of Agriculture also has refused to request a supplemental appropriation from Congress for enforcement purposes for the year beginning July 1, 1957. The Department has opposed the establishment of a separate agency within the Department for enforcement purposes.

Unless the Department of Agriculture is willing to ask for an adequate appropriation, and to establish a separate enforcement within the Department to conduct this work, there is no chance for effective enforcement of fair-trade practices in that agency.

Accordingly, your association has asked other business organizations to cooperate with us in restoring supervision of meatpacker practices to the Federal Trade Commission. There probably will be no satisfactory enforcement of laws dealing with fair competition until all businessmen are under the same law and the same degree of enforcement.

We strongly urge our members to write their Senators and their Representatives in Congress to support S. 1356, H. R. 5282, H. R. 5283, and H. R. 5454. Passage of these bills could bring about proper public regulation of unfair trade practices.

As this law stands, any company under Federal Trade Commission jurisdiction can get out from under by buying a meatpacking plant. Congress should act promptly to plug this loophole which is a threat to our competitive free enterprise system.

The Vital Role of American Women

EXTENSION OF REMARKS
OF
HON. ALEXANDER WILEY
OF WISCONSIN
IN THE SENATE OF THE UNITED STATES

Wednesday, May 1, 1957

Mr. WILEY. Mr. President, it was my privilege yesterday to speak to a group of women before whom Mrs. Ivy Baker Priest, the able Treasurer of the United States, delivered a speech. I had the honor to introduce her. I ask unanimous consent that a statement I have prepared regarding women prominent in government in this country, together with a list of such women, be printed in the Appendix of the RECORD.

There being no objection, the statement and list were ordered to be printed in the RECORD, as follows:

THE VITAL ROLE OF AMERICAN WOMEN

On several occasions, I have commented upon the increasingly significant role played by American women throughout our entire Nation.

Americans understand and welcome this fact.

By now, it is no particular news to the American people to point out that women already own an estimated two-thirds of the national wealth, or that women already constitute one-third of America's labor force.

What may not be generally realized, however, is the welcome extent to which American women are coming into their own—in occupying positions of importance in the business, political, professional and public service life of our land.

MRS. PRIEST, GUEST OF INVEST LUNCHEON

Yesterday, I had the pleasure of being host at a luncheon of the National Invest-in-America Committee.

One of our honored guest speakers was the able Treasurer of the United States, Mrs. Ivy Baker Priest. She symbolizes, I believe, the vital role which women play in our economic life—as investers, as taxpayers and in many other financial capacities.

OUTSTANDING WOMEN LEADERS IN EXECUTIVE BRANCH

Recently, I noted an article by Josephine Ripley in the Christian Science Monitor, in which she enumerated some of the outstanding women like Mrs. Priest, who have been serving in government with high distinction.

Included among them are, of course, such excellent public servants as former Ambassador Clare Booth Luce; the former Assistant United States Treasurer, and later Assistant to the Secretary of the Treasury, Catherine B. Cleary, of Milwaukee; the former Deputy Administrator of Civil Defense, Mrs. Katherine Howard; the former Deputy Director of Foreign Operations, Mrs. Hiram C. Houghton.

And currently, we enjoy the continued services of the Director of the Women's Bureau of the Department of Labor, Mrs. Alice Leopold; the Chairman of the Subversive Activities Control Board, Mrs. Dorothy McCullough Lee; our representative on the United Nations Human Rights Commission, Mrs. Oswald B. Lord; the newly nominated Ambassador to Norway (formerly Ambassador to Switzerland) Mrs. Francis Willis. (Mrs. Willis symbolizes, in turn, the very welcome increase in the participation of women in America's Foreign Service.)

So, too, in the honored ranks of Government, are the newly confirmed Director of the Children's Bureau, Katherin Oettinger, who succeeds another outstanding woman, Dr. Martha M. Eliot.

ABLE MEMBERS IN LEGISLATIVE BRANCH

Of course, here in the Senate we are proud of the invaluable services of the senior Senator from Maine [Mrs. SMITH]. In the House of Representatives too, is a sizable contingent of able women legislators of both parties.

WOMEN SERVING AT HIGHER LEVELS

In still another article in the Monitor, in this instance, by Mary Handy, a significant fact was pointed out: In 1870, only fourtenths of 1 percent of the women working had executive-level jobs. In 1930, that proportion of higher-level workers had risen to 3 percent, and by 1956 the level had gone up to 6 percent.

APPOINTMENT OF WHITE HOUSE ASSOCIATE PRESS SECRETARY

And recently, within the past few weeks, no less a personage than the President of the United States has rightly recognized women's higher level role, by appointing Mrs. Anne Wheaton as Associate Press Secretary at the White House.

ENCOURAGE RISING FROM THE RANKS

I am pleased to comment on this general subject, because, in my judgment, every possible encouragement should be given to this trend.

This Nation needs skilled manpower and skilled womanpower. Even more important, it needs skilled brain power—irrespective of sex—brain power for the advancement of this Republic.

We cannot afford to squander any talent. We cannot allow individuals of great promise to be kept at lower employment levels, simply because they happen to be of the fair sex.

We learned during World War II through the WACS, the WAVES, the Women Marines, the SPARS, how we benefited as a nation when we secured women's services, virtually alongside their fighting men.

Yes, we learned, too, through our experience with wartime factories, from Rosie, the Riveter, that women are ready, willing, and eager to serve their land in ever-new capacities.

RESPONSIBILITIES AS MOTHERS

Naturally, their primary responsibilities rightly remain as mothers of the race, as guardians with their husbands of the Nation's homes. But that need not detract from their appropriate contributions elsewhere.

I send to the desk now a few brief supplementary comments, along with a long and enheartening list of top women leaders selected by the Eisenhower administration.

This list comes, incidentally, from the office of Miss Bertha Adkins, assistant chairman of the Republican National Committee, in her own right, one of our most prominent women leaders.

I ask unanimous consent that these comments and the list be printed at this point in the body of the CONGRESSIONAL RECORD.

SUPPLEMENTARY STATEMENT BY SENATOR WILEY

If each of us looked at our respective States, we could quickly find an outstanding group of women who amply represent the type of woman leader whom I am describing, and whom I am seeking to encourage.

We would find them in the General Federation of Women's Clubs, in the League of Women Voters, in the American Association of University Women, in the National Federation of Business and Professional Women's Clubs, in the American Legion Auxiliary, and in innumerable other religious, ethnic, social, professional, and other groups.

We would find them in the Republican and Democratic Party units at the grassroots. We would see them serving with and for the Nation's hospitals, schools, orphan homes, welfare institutions, underprivileged service centers, and in many other connections.

Were time and space no factors, I could cite a great many such fine ladies from my own State of Wisconsin.

A LEADING WOMAN IN THE DISTRICT OF COLUMBIA

I shall, however, set forth a few brief facts concerning one particular woman whose fine record has come to my attention from folks who highly respect her.

She is not from my State, but rather resides here in the District of Columbia where there is no Senator nor Representative to speak up in this manner for folks of merit.

And she is not in government, but rather is in private enterprise.

This particular woman has served as past president of the local Soroptimist International.

She is vice president of the Connecticut Avenue Association, and an active member of the board of directors of the Central Charge organization.

She has been prominent in the field of giving public recognition to what is well described as "juvenile decency." (I refer to the fact that most of our youngsters are fundamentally decent, and only a handful—less than 5 percent—become juvenile delinquents.)

During the past 12 years, she has been serving our veterans at Bethesda Naval Hospital, helping to rehabilitate them.

When the news of the magnificent Hungarian rebellion against Communist tyranny flashed to the world, she was one of the first here in the District area to take action. She and her employees eagerly agreed on the donation of proceeds of a portion of their business time for Hungarian relief. Similarly, she has arranged to bring several Hungarian refugees here to become self-supporting jobholders.

Her field—her business—is one which an uninformed person might not ordinarily think of in terms of a major United States business. And yet it is one, according to economists. It is that of dancing instruction.

The lady of whom I speak is the president of the Arthur Murray Studios of the Metropolitan Washington area. She is also regional director of 25 studios in 8 States and the District.

Her District business is, I understand, the most successful such franchise operation out of many such successes in the Nation. And she has built it herself during less than 20 years. She has built it with the philosophy of service, the sound, spiritual philosophy of contributing to character and human development.

She herself represents the ideals she seeks to advance, for she started humbly as a clerk in the Chase National Bank at $65 per month. And she worked her way up—an enterprising, dedicated woman in a so-called man's world—a pioneering woman, who grew with what had been an unknown industry, but what is now a vast industry throughout the Nation.

Indeed, the industry is extending overseas, for she is opening up a studio in Frankfort shortly—the first such American studio on the European Continent.

The lady's name is Ethel Pistere.

I have never had the pleasure of meeting this fine lady, or even any of her associates.

I select her as an example—a worthy example—of folks whom we may not know, but whom we may well admire.

CONCLUSION—LET WORLD'S WOMEN TAKE NOTE

Known or unknown, famous or less famous, in public or in private life, in everyday matters or in unique jobs, they are rendering significant service to the Nation.

In light dancing, or in serious diplomacy, in Wall Street or Main Street, I say: "More power to our women of ability—in serving this Nation."

Let the women of the world take inspiration from the women of America—from the Helen Kellers of America who have conquered every conceivable handicap, from the Susan B. Anthony's who have championed womens' equal role, from the women columnists and the women presidents of corporations and women scientists and educators and leaders in all walks of life.

TOP WOMEN APPOINTMENTS IN THE EISENHOWER ADMINISTRATION

(Listed in order of appointment)

1. Mrs. Oveta Culp Hobby,[1] Houston, Tex. (member of President's Cabinet) (resigned), Secretary, Department of Health, Education, and Welfare.—

2. Mrs. Ivy Baker Priest,[1] Bountiful, Utah, Treasurer of the United States.

3. Mrs. Oswald B. Lord,[1] New York, N. Y., United States Representative on Human Rights Commission of the Economic and Social Council of the United Nations; alternate United States representative to the 8th session of U. N. General Assembly (1953); alternate United States representative to the 9th session of U. N. General Assembly (1954); alternate United States representative to the 10th session of U. N. General Assembly (1955); alternate United States representative to the 11th session of the U. N. General Assembly (1956).

4. Mrs. Daniel J. Schenider,[1] Lakewood, Colo., Superintendent of the United States Mint at Denver.

5. Mrs. Clare Boothe Luce,[1] Ridgefield, Conn., United States Ambassador to Italy.

6. Mrs. Katherine G. Howard,[1] Boston, Mass., Special Adviser to the Federal Civil Defense Administrator (served first as Deputy Administrator), member, National Civil Defense Advisory Council.

7. Mrs. Lorena B. Hahn,[1] Omaha, Nebr., United States Representative on Status of Women Commission, United Nations.

8. Mrs. Hiram C. Houghton,[1] Red Oak, Iowa, member, Public Advisory Group on Refugee Relief Program, Department of State, formerly Deputy Director for Refugees and Migration, International Cooperation Administration (also Foreign Operations Administration).

9. Miss Albina R. Cermak,[1] Cleveland, Ohio, Collector of Customs at Cleveland.

10. Miss Catherine B. Cleary,[1] Milwaukee (resigned, June 1954), Assistant Secretary of the Treasury (first named Assistant United States Treasurer).

11. Mrs. Georgia France McCoy, Oklahoma City, Okla., Assistant to the Secretary, Department of Health, Education, and Welfare.

12. Mrs. Rae V. Biester,[1] Drexel Hill, Pa., Superintendent of the United States Mint at Philadelphia.

13. Mrs. Lottie Randolph, Columbus, Ohio, Assistant to Administrator, Farmers' Home Administration, Department of Agriculture.

Footnote at end of speech.

14. Miss Mildred E. Reeves,[1] Washington, D. C., Associate Judge, Municipal Court of the District of Columbia.

15. Mrs. Consuelo Northrop Bailey (resigned), South Burlington, Vt., member, Advisory Board, United States Post Office Department.

16. Miss Frances E. Willis,[1] Redlands, Calif., United States Ambassador to Switzerland.

17. Mrs. Elizabeth Shirley Enochs,[1] Lorton, Va., United States technical delegate on directing council of American International Institute for Protection of Childhood.

18. Dr. Bess Goodykoontz,[1] Iowa, alternate United States delegate, directing council of American International Institute for Protection of Childhood.

19. Mrs. Wendell Willkie,[1] New York City, N. Y.;

20. Mrs. Theodore Roosevelt, Jr.,[1] Oyster Bay, N. Y., members, American Battle Monuments Commisison.

21. Mrs. Wilfreda J. Lytle, Wilmington, Del., Director, Women's Activities (Second Region), Federal Civil Defense Administration.

22. Dr. Beatrice Aitchison, Portland, Oreg., Director, Transportation Research, Bureau of Transportation, United States Post Office Department.

23. Mrs. Daphne Leeds,[1] Atlantic City, N. J., Assistant Commissioner of Patents, Department of Commerce.

24. Miss Roberta Church, Chicago, Ill., consultant to minority groups, Department of Labor.

25. Mrs. Dorothy McCullough Lee,[1] Portland, Oreg., formerly member, Board of Parole, Department of Justice.

26. Mrs. Frances P. Bolton,[1] Cleveland, Ohio, United States representative, eighth session, United Nations General Assembly.

27. Mrs. F. Peavey Heffelfinger,[1] Wayzata, Minn., alternate United States delegate to UNESCO (United Nations) conference in 1953. United States delegate to eighth and ninth general UNESCO conference in Montevideo in 1954 and 1956, respectively. Also, in 1953, public member, 16th session of the Economic and Social Council of the United Nations, Geneva, 1953.

28. Miss Cleta Smith,[1] St. Louis, Mo., United States collector of customs at St. Louis.

29. Mrs. Olivia Erpenbach,[1] Minneapolis, Minn., collector of customs at Minneapolis.

30. Mrs. Helen Rogers Reid,[1] New York, N. Y., member, Government Contracts Committee.

31. Dr. Jean T. McKelvey, Ithaca, N. Y., member, advisory committee to the Secretary of Labor.

32. Mrs. Frances Lee,[1] San Mateo, N. Mex., member, Inter-American Commission of Women, Department of State.

33. Mrs. Raymond Sayre,[1] Ackworth, Iowa, member, Agricultural Advisory Commission; member, Commission on Congressional and Judicial Salaries.

34. Mrs. Alice K. Leopold,[1] Weston, Conn., Assistant to Secretary of Labor for Women's Affairs; also Director of Women's Bureau, Labor Department; public member, Commission on Intergovernmental Relations.

35. Mrs. Lovilla Lalor, Santa Rosa, Calif., Director, Women's Activities (region 7), Federal Civil Defense Administration.

36. Mrs. Ada Mucklestone, Chicago, Ill., Director, Women's Activities (fourth region), Federal Civil Defense Administration.

37. Mrs. Frances Diehl, San Francisco, Calif., Director, Reception Center, San Francisco (liaison with visiting governmental guests and exchange students for U. S. State Department).

38. Mrs. Carmel Carrington Marr, Brooklyn, N. Y., assistant to the United States Ambassador to the United Nations.

Footnote at end of speech.

39. Mrs. Jessie Vann,[1] (term expired), Pittsburgh, Pa., member, International Development Advisory Board.

40. Mrs. Anna A. Mitchell,[1] West Hartford, Conn., United States collector of customs at Bridgeport.

41. Mrs. Jane Morrow Spaulding, Charleston, W. Va., consultant, Foreign Operations Administration.

42. Mrs. Mildred C. Ahlgren,[1] Whiting, Ind., member, Public Advisory Board, Foreign Operations Administration.

43. Mrs. Frances Nolde, Reading, Pa., consultant in Defense Air Transportation.

44. Mrs. Pearl C. Pace,[1] Burkesville, Ky., member, Foreign Claims Settlement Commission.

45. Mrs. Jessie D. Sayler,[1] Savannah, Ga., United States collector of customs at Savannah.

46. Mrs. Frances Lee,[1] San Mateo, N. Mex., only woman member, American delegation to the Inter-American Conference at Caracas (March 1954).

47. Mrs. Edna Basten Donald,[1] Grand Island, Nebr., member, National Assay Commission.

48. Mrs. Ralph D. Keeney,[1] Somersville, Conn., member, National Assay Commission.

49. Mrs. O. Blake Willcox,[1] Englewood, N. J., member, National Assay Commission.

50. Mrs. Edward A. Pool,[1] New York, N. Y., member, National Assay Commission.

51. Mrs. Philip J. Woodward, Winchester, Mass., Assistant Administrator for Education (region 1), Federal Civil Defense Administration.

52. Dr. Anna L. Rose Hawkes,[1] Vermont, member, United States Advisory Commission on Educational Exchange.

53. Mrs. Helen Chapman,[1] Jerseyville, Ill.;

54. Mrs. Percy Maxim Lee,[1] Farmington, Conn.;

55. Miss Helen G. Irwin,[1] Des Moines, Iowa;

56. Mrs. Lucille Leonard,[1] Providence, R. I.;

57. Dr. Susan Riley,[1] Nashville, Tenn., members, Foreign Operations Council, Foreign Operations Commission.

58. Mrs. Myra Glazier Kenney, Worcester, Mass.;

59. Mrs. J. B. Cooley, Minot, N. Dak., members, Council of Consultants, Small Business Administration.

60. Mrs. Gladys Forsyth, Lincoln, Nebr., Board of Field Advisers, Small Business Administration.

61. Mrs. Emmert T. Bowlus,[1] Frederick, Md., Comptroller of Customs, Port of Baltimore, Md.

62. Miss Jane H. Todd, Tarrytown, N. Y., member, Council of Consultants, Small Business Administration.

63. Mrs. Ann Louise Ferris, Allegan, Mich., Civilian Defense Officer (Evacuation), Federal Civil Defense Administration.

64. Mrs. Charles W. Weis, Jr.,[1] Rochester, N. Y., member, Federal Civil Defense Advisory Council.

65. Mrs. Jean W. Fuller, Los Angeles, Calif., National Director, Women's Activities, Federal Civil Defense Administration.

66. Miss Winifred G. Helmes, St. Paul, Minn., Assistant Director, Women's Bureau, United States Department of Labor.

67. Dr. Mary P. Holleran,[1] Hampton, Va., United States Representative on Inter-American Cultural Council of the Organization of American States.

68. Mrs. Katharine Dixon Agar,[1] Chicago, Ill., member, United States Commission for Celebration of the 200th Anniversary of the Birth of John Marshall.

69. Miss Catherine Cleary, Milwaukee, Wis., National Advisory Council on Vocational Rehabilitation, Department of Health, Education, and Welfare.

70. Miss Louise Baker, Lincoln, Nebr., National Advisory Council on Vocational Rehabilitation, Department of Health, Education, and Welfare.

71. Mrs. Howard Coffin,[1] Washington, D. C., member, Hamilton Bicentennial Commission.

72. Mrs. Margaret Patterson,[1] New York, N. Y., member, Hamilton Bicentennial Commission.

73. Mrs. J. Madison Blackwell,[1] New York, N. Y., member, 1955 Annual Assay Commission.

74. Mrs. D. Ray Murdock, Greenburg, Pa., member, 1955 Annual Assay Commission.

75. Mrs. R. Henry Norweb,[1] Cleveland, Ohio, member, 1955 Annual Assay Commission.

76. Miss Lucy M. Seiler,[1] Philadelphia, Pa., member, 1955 Annual Assay Commission.

77. Mrs. Margaret Cathcart,[1] Lake Forest, Ill., member, Soo Locks Centennial Commission.

78. Mrs. Rae C. Hooker,[1] Mount Pleasant, Mich., member, Soo Locks Centennial Commission.

79. Mrs. Charles A. Dean,[1] Jr., Grosse Pointe Farms, Mich., member, Soo Locks Centennial Commission.

80. Mrs. Julie B. Kirlin (resigned), Boston, Mass., advisor, Office of International Trade Fairs, Commerce Department.

81. Miss Jane H. Todd, Tarrytown, N. Y., consultant, Women's Bureau, United States Department of Labor.

82. Dr. Althea K. Hottel,[1] Bala Cynwd, Pa., United States Representative, Social Commission of Economic and Social Council, United Nations.

83. Miss Francis Knight, Washington, D. C., Director, Passport Division, Department of State.

84. Dr. Martha M. Eliot,[1] Washington, D. C., Alternate United States Delegate, Eighth World Health Assembly, Mexico City, May 10–June 4, 1955.

85. Miss Mary H. Donlon,[1] Kinderhook, N. Y., member United States Customs Court.

86. Dr. Katherine G. Bloyley,[1] Keuka Park, N. Y., member, Board of Foreign Scholarships.

87. Mrs. W. Greg Smith, Denver, Colo., Director, Women's Activities (Sixth Region), Federal Civil Defense Administration.

88. Mrs. Pearl Wates, Thomasville, Ga., Director, Women's Activities (Region Three), Federal Civil Defense Administration.

89. Mrs. Elizabeth B. Cusack,[1] Winchester, Mass., Alternate United States Representative, United Nations Children's Fund.

90. Associate Justice Jennie Loitman Barron, Brookline, Mass., Delegate, United Nations Congress on Prevention of Crime.

91. Mrs. Robert Low Bacon,[1] Long Island, N. Y.

92. Miss Elizabeth B. Howry,[1] Jamestown, R. I.

93. Mrs. Eugene Meyer, Washington, D. C.

94. Mrs. James H. Rowe, Jr., Washington, D. C.

Members, Commission to plan civic center in Washington, D. C.

95. Mrs. Frances B. Crowninshield,[1] Boca Grande, Fla., member, Boston National Historic Sites Commission.

96. Mrs. J. Ramsay Harris,[1] Denver, Colo., member, International Development Advisory Board (2 years).

97. Mrs. Bernice B. Cronkhite,[1] Cambridge, Mass., member, Board of Foreign Scholarship (2 years).

98. Mrs. Margaret M. Conant,[1] Glen Dale, Md., member, Board of Advisers, Federal Reformatory for Women at Alderson, W. Va.

99. Mrs. Mildred E. Younger,[1] Los Angeles, Calif., member, Board of Advisers, Federal Reformatory for Women at Alderson, W. Va.

100. Mrs. Hazel H. Abel,[1] Lincoln, Neb., member, Theodore Roosevelt Centennial Commission.

101. Mrs. Sherman Post Haight,[1] New York, N. Y., member, Theodore Roosevelt Centennial Commission.

102. Mrs. Oscar A. Ahlgren, Whiting, Ind., Assistant to National Director, Savings Bonds Division, Treasury Department.

103. Mrs. Isabella J. Jones, Pittsburgh, Pa., Assistant to Assistant Secretary for Program Analysis, Department of Health, Education and Welfare.

104. Mrs. Nicholas (Alice Roosevelt) Longworth, Washington, D. C., member, United States Delegation to Inauguration of the President-elect of Brazil, January 30, 1956.

105. Mrs. William E. Martindale,[1] Harrisburg, Pa.

106. Mrs. Dorothy Young,[1] Philadelphia, Pa.

107. Miss Mamie Woodcock,[1] Salisbury, Md.

108. Mrs. Grace Bamonte Damour,[1] New York City, N. Y.

Members, 1956 Annual Assay Commission.

109. Mrs. Lorena B. Hahn,[1] Omaha, Neb., (1956) United States Representative on Status of Women Commission, United Nations.

110. Mrs. Christine Unger, Denton, Tex., Director, Women's Activities (region 5), Federal Civil Defense Administration.

111. Mrs. Dorothy D. Houghton,[1] Red Oak, Iowa, member, United States National Commission for UNESCO.

112. Mrs. Faye Hartman,[1] San Diego, Calif., director, San Diego office, Federal Housing Administration.

113. Mrs. Clover Todd Dulles,[1] New York City, N. Y., member, Board of Advisers, Federal Reformatory for Women at Alderson, W. Va.

114. Mrs. Mary Dilworth Barnes,[1] Pittsburgh, Pa., member, Board of Advisers, Federal Reformatory for Women at Alderson, W. Va.

115. Mrs. Helen C. Russell,[1] San Francisco, Calif., United States delegate to the Ninth Session of the General Conference of the United Nations Educational, Scientific, and Cultural Organization.

116. Mrs. Dorothy McCullough Lee,[1] Portland, Oreg., member, Subversive Activities Control Board.

117. Miss Corma Mowrey,[1] Charleston, W. Va., member, President's special people-to-people group to promote understanding and friendship throughout the world.

118. Miss Anna Lord Strauss,[1] New York City, N. Y., member, President's special people-to-people group to promote understanding and friendship throughout the world.

119. Mrs. William Barclay Parsons, Jr.,[1] New York City, N. Y., member, President's special people-to-people group to promote understanding and friendship throughout the world.

120. Mrs. Eva Bowring,[1] Merriman, Nebr., member, Federal Board of Parole.

121. Mrs. Grace Christian, Ocean City, N. J., Director of Women's Activities (region 1), Federal Civil Defense Administration.

122. Miss Catherine Kelly,[1] Washington, D. C., judge of municipal court, District of Columbia.

123. Dr. Katherine G. Byley,[1] Keuka Park, N. Y., reappointed, board of foreign scholarships.

124. Mrs. Katherine Neuberger, Red Bank, N. J., member of 1957 Annual Assay Commission.

125. Mrs. Charles S. Payson, New York, N. Y., member of 1957 Annual Assay Commission.

126. Mrs. Oswald B. Ford,[1] New York, N. Y., reappointment (January 1957), United States representative, Human Rights Commission, Economic and Social Council of United Nations.

Giant Business Expands

EXTENSION OF REMARKS
OF
HON. GEORGE M. RHODES
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. RHODES of Pennsylvania. Mr. Speaker, the danger of growing big business monopoly control of our country was recently stated by Hon. Herbert H. Lehman, former United States Senator from New York.

Mr. Lehman, one of the greatest men ever to serve in the United States Congress, is well qualified to discuss this most important question.

His warning is that 4 dozen corporations now control more than a fourth of the United States product, though there are 4 million companies at work.

Mr. Speaker, I wish to include with my remarks Mr. Lehman's article which was published in a recent issue of the New Leader, of New York:

GIANT BUSINESS EXPANDS

(By Herbert H. Lehman)

Fortune magazine recently published a study of the 50 largest firms in each of the major fields of the American economy, with figures on their 1955 sales, assets, and net profits. It is an old story that in steel, automobiles, and oil production, for instance, a few giant firms are clearly dominant. It is less generally understood, however, that economic concentration is growing in almost every sector of our economy. Today, almost every line of business is dominated by the giants:

The 50 largest insurance companies have 90 percent of all the assets of all insurance companies.

The 50 largest manufacturing companies made 27 percent of the sales made by all manufacturing companies—and there are 325,000 manufacturing companies in the United States.

The 50 largest corporations in all fields, together, made sales of $86 billion, or about 28 percent of the total gross national product of the United States.

One company, General Motors, made a net profit in 1955 of over $1 billion, on assets of $6 billion, with sales amounting to about $12.5 billion—a sales turnover equivalent to 3 percent of the gross national product of the United States.

No wonder that thoughtful men in the business world are raising the question: "How big is too big?" The monthly publication of the American Institute of Management raised this question editorially and concluded that, when a firm attains a sales volume that equals more than 1 percent of the gross national product, it is just too big for the health of the national economy.

Today, our entire economy is coming to consist of a few giants and swarms of ants, the ants being small businesses. There are 4.2 million separate businesses in America, of which perhaps a thousand are truly big-business firms. According to a United Press survey, there are 78 firms with assets of more than a billion dollars each. These are the giants.

If we wish to retain an economic system based on competition, new rules must be written—very soon—to protect the ants against the giants, and the consuming public against both. Something had better be done promptly about mergers, for one thing. The Federal Trade Commission reports that there were 617 mergers in 1954, 846 in 1955, and 906 in 1956. Many of the mergers have been spectacular, the merging of two already large corporations to make one giant—and to eliminate one further source of competition.

I have been especially interested in bank mergers, since I was once a banker myself. During 1955, 225 banks, with total assets of $9.6 billion, were merged, consolidated, or acquired by other banks. During the 6-year period between 1950 and 1956, 830 banks, with assets of $18.6 billion, were merged, consolidated, or acquired. These mergers took place, for the most part, in the key industrial areas of the country; they were part of the process whereby big banks grew larger and smaller banks were swallowed up.

Today, there are about 14,000 commercial banks in America. Twenty-four of these are giants, with a billion dollars or more of assets each. In California, there is the fabulous Bank of America, with resources of over $9 billion. In New York City, two giants, Chase-Manhattan and First National City, each have resources of over $7 billion; New York also has 4 $3 billion banks and 2 $2 billion banks. Together, these eight banks have some three-fourths of all the deposits in New York City.

It is strange that these huge banks should be trying to expand, through merger and consolidation, when—and I say this on the basis of my own experience in banking—a $500 million bank (certainly a billion-dollar bank) can do everything in the public interest which a $4 billion, $7 billion, or $10 billion bank can do. In other words, there is no economic justification for the expansion.

Within the last 6 years, 137 banks in New York State have been merged, consolidated, or acquired by other banks. The resources of the banks which have thus disappeared were $10 billion, almost a sixth of the total resources of all banks in the State. The story is the same in numerous other States.

California, for example, had long been the scene of bank mergers and consolidations. By 1950, California had only 149 banks—compared to over 600 in Kansas. But, between 1950 and the end of 1955, 86 of the 149 California banks were merged, consolidated or otherwise taken over—a reduction of over 60 percent in the number of banking institutions in this huge State.

The end result is not only a decreased number of banks and less competition, but a more highly centralized control of the Nation's financial system.

The development of bigness and monopoly control in banking has been parallel to that in many other lines of economic endeavor. The giant business firms not only dominate our economy to an increasing extent; they are beginning seriously to affect our culture, our education and the intellectual climate of our times. Certainly they have the greatest access to the mass media—television, radio, and the press. Their actual and potential effect on political life requires sober study and consideration of possible countervailing measures.

In becoming the major employer in the United States, big business has been building up a series of collectivist bureaucracies which, in my judgment, are far more dangerous to the future of this country than the Government bureaucracies against which big-business spokesmen have complained for years. In speaking of corporate bureaucracies, I am concerned with employees involved in the administrative, technical, professional and managerial functions of big enterprise.

A new professional class is developing alongside the educators, doctors, lawyers, scientists, and engineers. They are the sales engineers, the industrial-relations experts, the public-relations counselors, the program planners, and the communications advisers—to name but a few of the new categories. These are the individuals who receive the main impact of the corporate ideology and transmit and reflect it. Increasingly, they come from among the brightest and ablest of our college graduates; recent surveys have shown that most graduating seniors today want to work for big corporations. Only a very small percentage seem to want to start their own businesses or their own practices.

The big corporations offer good pay, job security and prospects for advancement. What is more, they offer a way of life. The employee is expected to give not only his talents and devotion but also his conformity. The engineers, scientists, and technologists, lawyers, statisticians, public-relations experts, advertising experts, merchandisers—all these making up the corporate bureaucracies are being pressed into a single mold. The individual is induced to fuse his identity into that of the corporation, to become an "organization man."

The leaders of big business and Government today pay lipservice to individualism and individual enterprise. In fact, their support is being given to the new philosophy of action identified with Madison Avenue, with its emphasis on form and approach rather than content and substance.

According to a report of the Bureau of Labor Statistics, over 90 percent of the research engineers and scientists employed by commercial and nonprofit, organizations work for big businesses. It should be noted that the Federal Government—particularly the Defense Department and the Atomic Energy Commission—is supporting most of the research and development work being done today. Of $7 billion being spent annually for research and development in the United States, $4 billion is being contributed in one form or another by the Government. This $4 billion is being expended almost entirely through the big corporations. According to the Defense Department, 95 percent of the Federal funds being spent through commercial companies on scientific research and development is being paid out to corporations having more than 500 employees. Thus, the Government research program is helping to attract engineers, scientists and technologists to the ranks of big business, and to promote economic concentration.

One of my chief worries as far as big business is concerned is the lack of democratic controls, or of any controls. The huge corporations, with their tremendous power over so many phases of our national and individual lives, are responsible only to the balance sheet and to the profit-and-loss statement. This is the only responsibility which management has even to the stockholders, the theoretical owners. In these huge corporations, of course, there is no real relationship between management and ownership. In most cases, management is self-perpetuating and has no real constituency at all. Perhaps one answer to the situation lies in requiring the management of publicly held corporations to show some measure of democratic responsibility both to the stockholders and to the public.

We need some new and original thinking on this whole subject, and on the particular problem of corporate bureaucracy, what it does to those who become part of it, and what it does to the pattern of national thought and life.

Negative Action on Suez

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. MULTER. Mr. Speaker, the following editorial which appeared in the New York Herald Tribune of April 28,

1957, is worthy of the attention of our colleagues:

NEGATIVE ACTION ON SUEZ

The failure of the Security Council to take any positive steps to solve the Suez Canal problem on behalf of the international community means that Egypt has succeeded in imposing a national solution. To be sure, Ambassador Henry Cabot Lodge, in urging that the Egyptian plan for canal operation be "given a trial," asserted that American acquiescence in Nasser's program "must be provisional," and that payment of canal tolls by United States flag vessels would continue to be made under protest. But once a situation of this kind has been recognized de facto, it is extremely difficult to alter. If the unilateral Egyptian declaration on canal management is accepted by the Security Council and the maritime nations, even provisonally and under protest, Egypt has won in principle, and the practical application of the document, as Mr. Lodge said, depends largely on Egypt." That is precisely the situation which France and Britain took up arms to avert.

Egypt—and the Soviet Union concurs in this—argues that by registering the Egyptian declaration on the canal with the United Nations it becomes an international instrument. But it is an instrument that can be revoked by the nation that compiled it. The Egyptian delegate, Omar Loufti, went on to say that Egypt would be willing to join in "a solemnly and internationally binding commitment in the form of a reaffirmation or a renewal of the 1888 convention." But, as Guillaume Georges-Picot of France pointed out, "Egypt is * * * reserving its right to place its own interpretation upon the convention of 1888, according to which it claims that it is entitled to prevent Israeli ships or vessels from passing through the Suez Canal."

The Egyptian declaration does provide for the arbitration of disputes over canal traffic or management. This may be the means whereby the question of free passage of Israeli—and all other—ships can be guaranteed. If it works out after this fashion, another major crisis over the canal could be avoided. But the international community, governments and shippers alike, cannot be sure that this result will ensue. There is no certainty, no guaranty. Arbitration is at best a slow process. If Egypt decided, to use an imaginary example, that ships of the Swiss Republic constituted a threat to Egyptian sovereignty, and banned the canal to vessels flying the white cross, presumably the issue would be taken to an international tribunal. But in the meanwhile, costly voyages would be interrupted; vital trade might be disrupted, and since there would be no provision, presumably, for international enforcement of the arbitration award, it might be defied. Or, even if it accepted the judgment, the Egyptian administration of the canal might repeat the offense on another occasion.

Trade is a sensitive medium of international intercourse. It rests, in the long run, on a body of accepted doctrines and a series of practicable routes. If the routes are subject to changing conditions without notice they become uneconomical. There are many practices, of inspection, of pilotage, of tolls, of health regulations, that could make the Suez passage costly and irksome. Resort to international arbitration might be too slow to correct abuses of this kind—even if it was able to do so. In New York City subway riders are familiar with the form of slowdown sometmes used by transit unions—that of running trains by the book, carrying out existing regulations to the point of absurdity. Such violations of the spirit of the rules are extremely difficult to prove in court.

The best solution for a situation in which a national government operates the Suez Canal, would be an international group, able to act with speed and decision in case of violations of the letter or the spirit of the international rights involved. Egypt has rejected this solution. As Mr. Lodge said: "In view of this lack of provision for organized and systematic cooperation between Egypt and the users there is no assurance that the six requirements [set up by the Security Council before the outbreak of hostilities last November] will in fact be implemented."

With this uncertainty it certainly cannot be said that the Suez crisis has ended. The first major test will come when an Israeli ship seeks to pass through the international waterway. Then the canal users must make it crystal clear that Israeli's cause is their cause, and that the denial of rights to one nation threatens the rights of all. The United States has a particular responsibility to see to it that the assumptions on which Israel withdrew from Gaza and the Sharm es-Sheikh are made good in this respect. Beyond that issue, there is need for continuing negotiations, continuing pressure, to demonstrate to Egypt that the international character of the Suez Canal must be clearly established.

Jurisdiction Over Monopolistic Acts or Practices on the Part of Persons Engaged in Commerce in Meat and Meat Products

EXTENSION OF REMARKS
OF
HON. JOSEPH C. O'MAHONEY
OF WYOMING
IN THE SENATE OF THE UNITED STATES
Wednesday, May 1, 1957

Mr. O'MAHONEY. Mr. President, the Senate Subcommittee on Antitrust and Monopoly, of the Committee on the Judiciary, this morning opened hearings upon a bill introduced by the senior Senator from Utah [Mr. WATKINS] and myself to amend the Packers and Stockyards Act by transfering to the Federal Trade Commission jurisdiction over the enforcement of the antitrust features of that law.

It may be of interest to point out that the first attempt to bring about the enactment of the Packers and Stockyards Act, for the regulation of the meat industry, was a bipartisan proposal by one of my predecessors, the late Senator John B. Kendrick, Democrat, of Wyoming, and the late Senator William S. Kenyon, Republican, of Iowa. That was more than 35 years ago. The act was finally passed early in the administration of President Harding, who signed the law in May 1921.

It is evidence of the bipartisan character of the effort of Congress to regulate commerce in the public interest that this new bill is sponsored in this session by a Democrat and a Republican. I am happy to be associated with the Senator from Utah in this effort, which has widespread support throughout the country, and concerning which the Senator from Utah gave the first testimony this morning. I ask unanimous consent that the text of his cogent and persuasive argument in support of the proposed legislation be printed in the Appendix of the RECORD.

There being no objection, the argument was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WATKINS BEFORE SUBCOMMITTEE ON ANTITRUST AND MONOPOLY, SENATE JUDICIARY COMMITTEE, ON S. 1356, CONFERRING UPON THE FTC JURISDICTION TO PREVENT MONOPOLISTIC ACTS OR PRACTICES AND OTHER UNLAWFUL RESTRAINTS IN COMMERCE BY CERTAIN PERSONS ENGAGED IN COMMERCE IN MEAT AND MEAT PRODUCTS

Mr. Chairman, in a free enterprise economy, the most effective regulator of economic activity is competition. Operating through the market forces of supply and demand, price competition is the best and most effective device for allocating resources to the production and subsequent sale of those goods or products for which demand is greatest. Also, such competition in the market for consumer preference is the best guaranty for improving product quality and maintaining prices which are fair to both producer and consumer.

As the economy has become more and more complex, so has the nature of competition. In some industries a relatively small number of firms has come to dominate economic activity. In some cases this has been due to superior management and business skill. In other cases it appears to have been the result of competitive practices which are not commensurate with the public interest. Price manipulation and unfair trade practices have been used to eliminate competition and to render neutral the forces of supply and demand .

COMPETITION A BIPARTISAN CONCERN

The public has come to expect and demand that government reinstate, where possible, and maintain by law as much price and other competition as the public interest necessitates in those areas of the economy in which it works badly or where little of it exists. This public concern is reflected in the platforms of both political parties. It is a matter of bipartisan concern.

For example, the 1956 Republican platform declares:

"The Republican Party has as a primary concern the continued advancement of the well-being of the individual. This can be attained only in an economy that, as today, is sound, free, and creative, ever building new wealth and new jobs for all the people.

"We believe in good business for all business—small, medium and large. We believe that competition in a free economy opens unrivaled opportunity and brings the greatest good to the greatest number."

Republicans also at that time pledged themselves to "a continuously vigorous enforcement of antitrust laws" (p. 7).

On the other hand, members of the Democrat Party at their 1956 Convention pledged themselves to maintaining "competitive conditions in American industry," and likewise "to the strict and impartial enforcement" of the laws "designed to prevent monopolies and other concentrations" of economic power (p. 18).

Thus both of our major political parties are committed to the objective of maintaining a free and expanding economy by fostering the growth of competition. For this reason, among others, I was happy to join with the distinguished chairman of this subcommittee in sponsoring S. 1356. This bill is designed to prevent monopolistic acts or practices, and other unlawful restraints in interstate commerce by persons engaged in processing and distributing meat and meat products. This S. 1356 does by—

1. Amending the Federal Trade Commission Act so as to return to the FTC jurisdiction over the meat packing and distributing industry, and by—

2. Amending the Packers and Stockyards Act so as to eliminate the authority the USDA has to prevent unfair trade practices under title II of that act, but which it has not effectively administered for 30-odd years.

Although S. 1356 repeals the jurisdiction of the Secretary of Agriculture over packers,

as authorized in title II of the Packers and Stockyards Act, it leaves undisturbed the jurisdiction of the USDA over the operation of stockyards, which is contained in title III of that act, as well as his special jurisdiction over dealers and handlers of live poultry, which is provided for in title V.

In regard to title III, I want to point out that the Department of Agriculture has been and is doing a commendable job. This is attested to by the description of its activities in this connection which are found in its Report on Current Activities and Problems Under the Packers and Stockyards Act, issued April 4, 1957.

Although the study giving rise to this report was prompted last February by the pending introduction of S. 1356, which would transfer title II authority to regulate packers back to the FTC where it was originally, about 75 percent of this report is devoted to the embellishment of my observation concerning title III. Also, planned future expansion of packers and stockyards activities by the Department of Agriculture apparently consists entirely of title III operations. This is evidenced by the fact that the only increase in funds for fiscal 1958 requested by the USDA for Packers and Stockyards Act administration is an item of $178,000 "to provide improved supervision of stockyards posted under the Packers and Stockyards Act and to post additional yards."

On the other hand, not one dollar is requested to expand the almost nonexistent title II operations, whose transfer back to the FTC is provided by S. 1356. The 25 percent of the self-appraisal report, which refers to title II activities, makes it very plain, in my judgment, that title II administration, in effect, is practically nonexistent. These hearings, Mr. Chairman, I am sure, will amply develop this point, and, therefore, I shall not elaborate at this time.

Before discussing in detail my reasons for co-sponsoring S. 1356, I want to make a few general observations.

UNFAIR COMPETITION CONDEMNED

First, I want to make it plain that no packer, large or small, or other business firm engaged in slaughtering or processing meat products has anything to fear from the return of title II authority to the FTC, provided their business behavior and trade practices conform to the norms outlined in the antitrust laws, which are designed to maintain and foster price as well as product competition.

Likewise, my action should not be construed as an attack upon big business. Bigness per se is not to be condemned. In fact, much of the comforts of everyday living which we all enjoy is made possible by economies of production which only large-sized firms can achieve. Only when big business uses its superior bargaining power and economic resources in a manner not consistent with the public interest—in this case to eliminate competition by unfair means, is it to be condemned.

By the same token, in co-sponsoring S. 1356, I do not intend to cast reflection upon any particular firm now doing business in the slaughtering or meat processing industry. Rather, I have been prompted to join Senator O'MAHONEY in sponsoring this legislation for two major reasons:

First, in light of the poor economic position in which most livestock producers find themselves, and the tremendous increase in direct buying from livestock producers, I believe it is imperative that proper scrutiny be maintained over the trade practices of firms slaughtering livestock and processing and distributing meat products so as to permit the existence of as many marketing alternatives for producers as the nature of the industry will permit. Fair competitive bidding should give producers higher prices than otherwise would be the case. And such competition can exist only where producers have marketing alternatives.

Second. I believe it is in the public interest that FTC control be extended over packers which enter into other sideline businesses—businesses which now escape such control because of USDA inaction, but whose competitors are subject to FTC control. The same need for public control applies to food firms, especially food chains, which now can acquire packing plants, or a substantial interest in one, and thus escape FTC supervision over their entire operations.

I shall discuss these two reasons in some detail at this point:

STOCKMEN NEED PROTECTION

Mr. Chairman, several million farmers, ranchers, and stockmen produce meat animals for market. With respect to cattle, the bulk of such animals are marketed during a period of a few weeks each fall. Most producers, especially in the great western range States, as you know so well, must market their animals at that time regardless of the prices offered, because they either do not raise enough feed to carry the stock until prices are more to their liking, or they cannot afford to buy feed for that purpose. A great number—essentially the small operators—must sell at that time in order to meet pressing financial obligations. As you know, most ranchers operate on a basis of "borrow it in the spring and pay it back in the fall." Still others must sell during the fall marketing season in order to meet the costs of daily living.

In recent years these forced fall marketings have been even heavier than normal, because of the effects of drought and the cost-price squeeze. High livestock numbers, caused by excessive feed-grain production on lands diverted from wheat and cotton production under the price support and acreage allotment and marketing quota programs, also have contributed to heavier marketing and low prices. These factors combined have served to virtually eliminate any bargaining power which producers might have had under more normal conditions.

Especially is this true in light of the increase in direct buying over the past 10 years from livestock producers. For example, whereas in 1946 the largest overall packer purchased directly from producers 20 percent of the cattle it slaughtered, this figure had increased to 32.7 percent by 1956. Whereas the same firm purchased directly 37.1 percent of the calves it slaughtered in 1946; in 1955 it purchased directly from producers 52.1 percent. There has also been a marked upward trend in direct buying by the next 9 largest overall packers during the past 10 years.

Since the subcommittee will develop this point, and all its ramifications later, I shall not pursue the matter further at this time, except to call to the subcommittee's attention the fact that producer organizations are very concerned about this upward trend in direct buying and the effect it has upon the prices their members receive in light of their weak bargaining positions. An example of this concern is provided by the following resolution adopted by the Utah Cattlemen's Association at its 38th annual convention held at Salt Lake City on December 7 and 8, 1956. The resolution reads as follows:

"DIRECT SELLING

"Whereas we strongly recommend that the Utah Cattle Association members refrain from consignment selling of livestock direct to packers for slaughter; and

"Whereas consignment slaughter short-changes the livestock producer and robs him of his rights as a seller. Consignment slaughtering thrives on a glutted market. It takes all of the gamble out of buying and gives the packer an assured profit with no investment and accomplishes nothing for the grower except to get rid of his stock and stop his feed bills. This is not buying, and it is not selling. We, therefore, condemn all three forms of consignment selling; namely, 'grade and yield,' 'price on grade,' and 'price on rail;' and

"Whereas this system takes advantage of split grading. The producer is paid on the basis of only three grades, while the meat is marketed by the packer on the basis of as many as 14 grades. Parts of the carcass can be sold at a much higher grade and price than that which the producer is credited; and

"Whereas packers also often trim carcasses before weighing and take advantage of shrink for hot weight. Direct selling to packers reduces livestock prices. A high percent of the better quality cattle move direct to packers leaving cattle of lower quality to move through markets and determine prices in the major markets of the West. In turn, these unrealistic low prices serve as the basis for pricing more direct to packer sales. Packers are also eliminated as potential buyers at our markets by these direct shipments—this reduces competition and prices at the markets: Therefore be it

"*Resolved*, That we must return to competitive bidding on cattle if producers are to get full market value for their cattle."

On the buyers' side of the market, by contrast, we find that less than 500 federally inspected plants—which for the most part are not individually owned firms, I might add—and less than 1,000 nonfederally inspected plants are engaged in slaughtering and meat processing. It also should be noted that 10 national concerns which own the bulk of these plants, slaughter approximately 50 percent of the cattle, 66 percent of the calves, 70 percent of the hogs, and 77 percent of the sheep coming under Federal inspection.

In an industry where the buyers are few in number and the sellers are great in number, it is evident that the buyers are in a position to set the prices they will pay and the sellers have only the option of "taking it or leaving it." Where all the dictating as to price is done by the buyers, it behooves us to maintain as many market outlets as possible for livestock producers, who obviously under these circumstances at best, have a very poor bargaining position. Also, in an industry where the buyers' side of the market is dominated by a few national operative concerns, this is not an easy task.

Producer organizations at the grassroots level in increasing numbers are expressing concern about this situation. For example, at the Utah Cattlemen's Association convention mentioned above, the following resolution was also adopted:

"Whereas this year has probably been the worst for cattlemen since the early 1930's, yet packer and retail profits are at an all-time high; and

"Whereas we feel our problems have been increased by the large spread between live cattle and retail prices; and

"Whereas chain stores and retail organizations have become so big that they can, undoubtedly, influence our markets: Therefore be it

"*Resolved*, That we commend the investigation being made by Senator JOSEPH C. O'MAHONEY, of Wyoming, into the possible manipulation of our markets by the large retailers and producers."

At its 50th annual convention held January 8–9, 1957, also in Salt Lake City, the Utah Wool Growers Association adopted this resolution:

"Utah woolgrowers desire to offer complete cooperation with the O'Mahoney subcommittee of the Senate in its hearing relating to the apparent collusion between packers and chainstores in the processing, sale, and merchandising of our meat products and we lend every effort to make these hearings complete and informative."

SMALL BUSINESS SUFFERS

In the present situation, it is in the public interest—which is commensurate with that

of the livestock producer, the consumer, and the small independent packer—to insure that unfair trade practices do not lead to greater concentration by elimination of competition. In this connection, I point to the 1956 platform of the Republican Party, which pledged "the continuation and improvement of our drive to aid small business." "Small business," the platform added, "can look forward to * * * a continuously vigorous enforcement of antitrust laws."

Enactment of S. 1356 will clearly facilitate such enforcement which, in my opinion, is now lacking as far as prevention of unfair trade practices is concerned in the meat packing and processing industry.

Now I am well aware of the fact that this bill is favored among others, by an association representing, in the main, small independent packers who slaughter about 70 percent of the livestock in 9 Western States, including my own State of Utah. While these independent packers are concerned about the entry of the national packers—especially the big 10, which account for 77 percent of the meat animals slaughtered in the United States—into the markets of these 9 States, as cosponsor of S. 1356, I am only concerned that use of unfair-trade practices does not aid or impede such entry.

I am equally aware of the fact that another association which represents, by and large, the interests of these national packers is not only actively and openly opposed to this bill, but even used its influence to try to keep such legislation as S. 1356 from being introduced in the first place.

For these reasons, I want to make it very plain that the provisions of S. 1356 will be enforced by the FTC just as vigorously against an independent packer engaged in unfair trade practices as it will against a national packer. On the other hand, I want to reiterate that no packer, large or small, has anything to fear if this bill becomes law, unless it is engaged in unfair trade practices.

Taking the meat packing industry as a whole, my first concern is that no packer or distributor, big or small, independent or national, take unfair advantage of the already weak bargining position of the livestock producer. The marketing arrangement which economists call monopsony is characterized by few buyers and many sellers. This situation by and large is descriptive of the meat packer-producer relationship. In such a marketing situation, if all the buyers within trucking or shipping distance are owned by the same parent company, or if they are owned by but 1 or 2 such companies, the seller, perhaps as a result of a common policy in the first instance, and price leadership in the second instance, is not likely to get a price for his animals which is the result of real competitive bidding. Thus, generally speaking, the producer might just as well sell to the closest plant and take what he can get.

RESPONSIBILITY ABDICATED BY USDA

Where such a situation exists, or where there is only one packing plant or other buyer, it certainly would be in the best interests of livestock producers to insure the prevention of unfair-trade practices which could prevent the entry of competitors, or serve to eliminate or control existing competitors. The USDA in my judgment is not supplying such regulation, supervision, or enforcement today, nor has it for over 30 years. How could it, when such responsibility here in Washington is literally buried in the Trade Practices Section (staffed by three individuals) of the Packers and Stockyards Branch of the Livestock Division of the Agricultural Marketing Service?

This section not only is responsible for preventing unfair trade practices under title II, whose transfer to FTC is the purpose of S. 1356, but also under title III which deals with stockyards. By no stretch of the imagination is it reasonable to conclude that these undoubtedly capable people can prevent unfair trade practices in the food business—the largest industry in this country. Although the Packers and Stockyards Branch has 20 field offices, most of their work, as the Department's self-appraisal report indicates, is in connection with activities relating to the regulation of stockyards, or title III enforcement, which is not disturbed by S. 1356. Not one person is engaged full time in title II enforcement.

Now, this is not to be deemed criticism of the personnel of the Trade Practice Section or the Packers and Stockyards Branch itself, but it is meant to be criticism of several national administrations for the almost complete lack of action in the past to comply with the congressional mandate given the USDA in 1921 to prevent unfair trade practices in the meat-packing industry. The simple facts are that the Packers and Stockyards Branch has no enforcement staff for administration of the fair-trade practices provisions of title II of the act relating to packers. Testimony given to this subcommittee by a former head of that branch indicates that it cannot even investigate complaints, let alone take effective action. Why the Packers and Stockyards Branch does not even require packers to submit reports containing data which is most essential in the detection of unfair trade practices.

As the Department indicated in its report on the Packers and Stockyards Act:

"The annual reports of meatpackers are received by the 20 district offices that are maintained by the Packers and Stockyards Branch. * * * Information contained in these reports is primarily concerned with ownership, organization, and financial condition. * * * The annual reports of the top four packers are forwarded to the Washington office of the Branch where they are retained in a permanent file.

"Although the annual reports of packers are received, there is no tabulation or statistical analysis made of the information contained in them for the purpose of determining industry trends, problems, or conditions" (p. 14).

One might logically ask, as a result: For what purpose are these reports reviewed? Why are they not reviewed for the purpose of determining industry trends, problems, or conditions? Why even require reports in the first place unless they are reviewed in order to carry out specific objectives of the Packers and Stockyards Act?

As concerns title II, the Department is charged with the responsibility of preventing unfair trade practices by meatpackers, yet these reports do not even require packers to show losses on their meat, nonmeat food products, and nonfood product operations. Yet such information generally is essential to determine whether a firm is absorbing losses in one area in order to eliminate competitors, but making up the loss in other areas where it already dominates the market. If none but the reports of the top four packers are sent to Washington how could the Department ever detect various market sharing arrangements which limit competition for livestock and mean lower prices to producers? The odds are that it could not make such a detection, let alone produce evidence sustainable in a court of law.

In a given situation where there were several packers, including independent firms, a livestock producer might not receive much higher prices than would be the case if only one were to bid for his animals. But this much is certain: the prices he could expect to receive would not be any lower than those he otherwise would receive if he were limited to a single buyer, and if there is really competitive bidding, there is a good chance that such prices would be higher.

Now opponents of this bill have voiced opposition on the ground that "there is no monopoly in meat packing." This is a truism Another is that "there is no use to lock the barn door after the horse is stolen." No, the problem is not one of correcting monopoly; rather, the problem is one of preventing unfair trade practies which serve to eliminate competition and thus create, or tend to create or increase monopoly control over the market. Should the latter happen, it is equally certain that livestock producers will receive lower prices than would be the case if some price competition existed.

UTAH STOCKMEN SUPPORT S. 1356

It is this concern which has led many grassroots producer organizations to support the return to FTC of the authority to prevent unfair trade practices in the meat-packing industry. In this regard, Mr. Chairman, I should like to read the following letter to me from Mr. Edward S. Crawford, executive secretary of the Utah Cattlemen's Association dated April 10, 1957. The letter reads as follows:

"This letter is to advise you that on April 6, 1957, the executive committee of the Utah Cattlemen's Association met and adopted a resolution favoring the transfer of the trade practices section of the Packers and Stockyards Act to the Federal Trade Commission, as proposed in S. 1356 and H. R. 5282." At its 50th convention in January of this year, the Utah Woolgrowers Association adopted the following resolution:

"We are in accord with the proposal to place the administration of the Packers and Stockyards Act in the hands of the Federal Trade Commission. We feel that there will be a more direct contact between the administrative authorities and the packers and stockyards."

In an explanatory letter dated March 13, 1957, Mr. James A. Hooper, Secretary-Treasurer of the Utah Woolgrowers, informed me as follows:

"We received your letter of March 1, 1957, which enclosed S. 1356 together with a statement you made at the time of the introduction of the bill. * * * Your statement is very well put, and we concur with your bill S. 1356."

I am sure the subcommittee has received many similar expressions from producer groups at the grassroots level in other States.

PACKERS AND FOOD CHAINS ESCAPE REGULATION

Mr. Chairman, transfer of control over packers from the FTC in 1921 to the USDA, and subsequent nonenforcement since then by that Department have given rise to another situation, which, in my judgment, warrants return of title II authority to the Federal Trade Commission.

Many packers sell numerous nonmeat products, and own and operate other types of business enterprises besides packing plants.

In January 1957 the FTC published an excellent study on Industrial Concentration and Products Diversification in the 1,000 Largest Manufacturing Companies: 1950. This study indicates that:

1. 6.6 percent of the total shipments made by the largest five companies principally engaged in the sale of fresh meats consisted of 14 classes of nonmeat food products such as: Butter, dairy products, shortening and salad oils and oleomargarine.

2. Eleven and six-tenths percent of the total shipments made by the largest eight companies engaged principally in the sale of fresh meats consisted of 62 classes of nonfood products such as soap and glycerine, grease and tallow, feed and fertilizer, and pharmaceuticals.

Significant for our purposes here is the observation contained in the study that:

"With * * * 2 exceptions, all of the shipments in industries other than fresh meats or prepared meats were made by the 4 largest of the 8 companies principally engaged in fresh meats. These companies

carried on extensive manufacturing operations not necessarily a part of the production of fresh meats and prepared meats. * * * The 4 companies shipped varying numbers of a total of 21 classes of food products and 51 classes of nonfood products" (pp. 64–65).

Yet these packer-owned enterprises now are not subject to FTC regulations as concerns unfair trade practices, because the parent concern is a packer, although nonpacker-owned competitors are subject to such FTC control. This gives an unfair advantage to packer-owned, nonmeat-processing businesses. An example of this situation is provided in a case identified as Docket No. 6409. This is a case in which the FTC brought an action against a large national packer for alleged false advertising in connection with the sale of oleomargarine. The action had to be terminated on March 30, 1956, because the company involved was a packer, exempt from FTC jurisdiction by reason of the Packers and Stockyards Act.

This practice by packers has, in turn, led food chains and other nonpacker firms to buy a small interest in a packing plant or similar processing facility. Such action enables them to qualify as a packer and to escape FTC enforcement of unfair-trade practices carried on by their related enterprises, and through USDA nonenforcement of the Packers and Stockyards Act, the trade practices carried on by their newly acquired packing plants also escape supervision. Such a situation is well illustrated by the *United Corporation, et al.* v. *FTC*, case (110 Fed. (2d) 473). In this instance, action was brought against the corporation which then was engaged in the sale and distribution of canned meat products. After the FTC had filed its petition, the defendant corporation acquired an interest in several packing companies. It then filed a motion for dismissal of the FTC complaint on the grounds that it was a packer, and thus not subject to the jurisdiction of the FTC. In granting the defendant's petition, the court said:

"The Commission, while virtually conceding that petitioner at the time of the entry of its order came within the definition of a packer as contained in the Packers and Stockyards Act, contends that it had jurisdiction because petitioner had not acquired that status at the time of the filing of the petition before it. The facts as to this are that the petition was filed March 31, 1937. Petitioner acquired 20 percent of the stock of Montel, Inc., April 12, 1937 and 20 percent of the stock of Emmart Food Products Co., May 1, 1937. The order was not entered until August 2, 1939. As early as 1936 petitioner had entered into a contract entitling it to a one-fifth interest in the business of Montel, which was then operating as a partnership (p. 274).

"When petitioner here, by acquiring stock in Montel, Inc., and Emmart Food Products Co., became a packer within the meaning of the Packers and Stockyards Act and subject to the jurisdiction of the Secretary of Agriculture, the Trade Commission had no further power of regulation over it; and the fact that the Commission may have been considering regulation under a complaint theretofore filed is immaterial (p. 476).

"For the reasons stated, the order of the Federal Trade Commission will be set aside for lack of jurisdiction over the business of petitioner" (p. 477).

Mr. Chairman, such activity by food chains seems on the increase. The reason is obvious. If they can escape FTC control by purchasing a packing facility, and the USDA continues to maintain an inadequate enforcement agency, they will have more flexibility in their operations than otherwise would be the case. Where this happens, the result is to give them a freedom of operation their competitors cannot enjoy. But such freedom—exemption from unfair trade practice regulations—could well be destructive of our free-enterprise system, since it gives them an unfair advantage over their competitors and thus a means of eliminating publicly desired price competition.

A more recent case can be identified as FTC Docket 6458. On November 21, 1955, the Federal Trade Commission filed a complaint against Food Fair Stores, Inc., of Philadelphia, alleging that the corporation had engaged in unfair-trade practices prohibited by the FTC Act by contracting with suppliers to buy certain items for an anniversary sale at prices lower than the prices these suppliers were asking from the corporation competitors. It is to be noted that this alleged violation had nothing to do with the operation by Food Fair of a meatpacking plant it owned in New Jersey.

On March 20, 1957, Food Fair filed a motion with the FTC in which it was asked that the original complaint be dismissed on the grounds that the corporation was in the packing business and, consequently, not subject to the Federal Trade Commission Act as to its trade practices. It was argued that the corporation was subject to the Packers and Stockyards Act. In its brief filed in support of the motion to dismiss, this food chain had the temerity to cite part of the remarks I made at the time S. 1356 was introduced as evidence of the fact that FTC did not have jurisdiction in the matter. In part, the motion stated:

"Senator WATKINS, of Utah, the author of a bill (S. 1356) now pending in the Senate to confer upon the Commission jurisdiction in precisely the situation in issue here, stated the following on the floor of the Senate on February 25, 1957, in support of his bill: 'I believe it is in the public interest that FTC control be extended over packers which enter into other sideline businesses—businesses which now escape such control because of USDA inaction, but whose competitors are subject to FTC control. The same need for public control applies to food firms, especially food chains, which now can acquire packing plants, or a substantial interest in one, and thus escape FTC supervision over their entire operation.'"

On April 18, 1957, a hearing examiner of the Federal Trade Commission issued an order dismissing the complaint against Food Fair Stores, Inc., "for lack of jurisdiction," just as Food Fair Stores had contended was the case in its motion to dismiss the complaint. This is a food chain, Mr. Chairman, operating 238 stores located along the Atlantic seacoast, which had gross sales of $475 million for the 1956 fiscal year. Yet, because it owns a packing plant in New Jersey, which by comparison during its 1956 fiscal year did only $25 million worth of business, it will, if this order is upheld, be permitted to wholly escape adequate supervision over all its operations.

The hearing examiner in dismissing the complaint summarized the present status of the law, as presented by the FTC counsel, by stating that it leads "to absurd results enabling any concern to choose at will the regulatory authority, by simply acquiring or divesting itself of a packing plant. Or, put more crassly, by the simple expedient of buying a load of chickens, wringing their necks, plucking their feathers, and selling their carcasses in commerce, any business in the Nation, even a tire or battery manufacturer, for instance, may escape regulation of its entire business by the Federal Trade Commission, whose 'expertise' in the use, for instance, of brokerage, advertising allowances, service grants, and other devious means of competitive favoritism, is widely recognized. Thus, in the instant case, alleged competitive discrimination in the use of advertising allowances to push such nonagricultural products as floor wax, chewing gum, and cleaning fluid is left exclusively to the Department of Agriculture."

As the hearing examiner further pointed out, the responsibility for removing the absurdities of the law rests with the Congress. This fact, he went on to say, is evidenced "by the recent introduction for passage by Congress of S. 1356 to confer on the Federal Trade Commission the very jurisdiction contended for here, and by the statement of its sponsor." He then went on to quote the identical remarks I made when the subcommittee chairman and I introduced S. 1356. These are the remarks I read a moment ago which Food Fair had quoted in its motion to dismiss the complaint.

RELIEF SOUGHT FROM CONSENT DECREE

Without doubt, in part at least, such action by food firms has stimulated the action taken by three national packers to seek relief from a 36-year-old consent decree they signed in 1920, which prevents them from handling some 140 other food and non-food products. Such relief is essential, they say, if, under the circumstances, they are to compete on favorable terms with food chains which have and are acquiring packing plants.

The history of the consent decree and its effect upon Federal control of unfair trade practices in the meatpacking industry is indeed interesting. In the years prior to 1921 and before passage of the Packers and Stockyards Act, the FTC's investigation of packers resulted in the filing of antitrust suits by the Justice Department against some five national packers. Apparently rather than face prosecution, these packers signed a consent decree which since then has prevented them from:

1. Dealing in 140 food and non-food products, chiefly vegetables, fruit, fish, and groceries.

2. Using their distribution facilities for the handling of any of these 140 products.

3. Owning and operating retail meat markets.

4. Dealing in fresh milk or cream.

OBJECTIONS TO S. 1356 UNFOUNDED

In 1921, when the Congress was considering passage of legislation to regulate stockyards, the five national packers, which had signed the consent decree, were able to convince Congress that prevention of unfair trade practices in that industry should be transferred from the FTC to the USDA. Material which have been circulated in opposition to S. 1356 by the association representing these large national packers, list four reasons why a transfer was desirable then, and why such authority now should remain with the USDA. The reasons given are:

"1. Meatpacking, being at the time the country's largest single industry, was of sufficient importance to warrant establishment of a separate, specialized agency.

"2. The FTC was an investigative rather than an administrative body, and hence did not have the power nor the specialized knowledge necessary to do an effective job of administration.

"3. Inevitably, there would be overlapping of jurisdiction between the Department of Agriculture and the FTC, and much confusion thereby created.

"4. The Department of Agriculture had in existence the necessary bureaus and personnel to undertake administration of the act. Moreover, existing personnel were well equipped to undertake supervision of the complicated relationships characteristic of the livestock and meat industry."

Regardless of the merits these arguments may have had in 1921, it is evident from what I have already said that 36 years of ineffective administration or nonenforcement of title II renders them completely valueless today. Experience clearly indicates and the USDA self-appraisal report confirms this fact, that the Congress made a mistake when it transferred authority to regulate trade practices of packers from a specialized agency handling antitrust matters to the

USDA, which did not then and does not now have a separate regulatory agency. Indeed, regulatory activities of the USDA are scattered piecemeal throughout its various agencies.

Mr. Chairman, a short review of USDA experience in the administration of the Packers and Stockyards Act will make this conclusion even more obvious. Originally, the USDA did establish a separate agency to administer the act. In 1927, however, this agency was abolished and responsibility for administration was placed in the Bureau of Animal Industry—a research agency. During the 1940's it was in the Production and Marketing Administration—the price-support agency. In the fall of 1953, responsibility was transferred to the Agricultural Marketing Service.

Enforcement of the title II provisions relating to unfair trade practices today is lodged in the Trade Practices Section of the Packers and Stockyards Branch of the Livestock Division of the Agricultural Marketing Service. This section, I repeat, is staffed at the Washington level by a handful of people. The great bulk of the work of this trade practice section deals with title III activities—stockyards regulation, not prevention of unfair trade practices under title II, whose transfer to FTC is provided by S. 1356. It should be obvious to all that the odds against its being able to regulate the activities of economic giants the size of many of these national packers and food chains are many times greater than the odds David faced in his battle with Goliath. What more effective way is there to escape proper public regulation, as expressed by the antitrust planks in the 1956 platforms of our two major political parties, than to transfer such antitrust authority from an effective and specialized agency, such as the FTC, to another agency and Department and insure its burial in a section which doesn't have a single full-time employee engaged in title II activities? A handful of people, in effect, are charged with regulating the largest industry in this country—the food business.

PUBLIC INTEREST REQUIRES ENACTMENT OF S. 1356

Under such circumstances it should be very plain that if the national packers obtain relief from the consent decree, and if the FTC is not given back its original authority to prevent unfair trade practices in this industry, the result could have dire consequences for the public welfare. Small businesses in the meat packing and wholesale and retail grocery industries can, and may well fail in droves. The increase in mergers in the meat packing industry is cause for genuine concern. Livestock producers, as well as producers of other food products, could expect to see their already weak bargaining positions further destroyed. The consumer, too, would face the prospect of growing monopoly control over the higher prices he might be forced to pay.

On this latter score, it is important to note that whereas over the past 10 years—1947 to 1956—the retail cost of meat products declined only 5 percent, in spite of the greatest increase in recent slaughter history, prices received by producers declined by 29 percent. These figures are revealed in the report Food Cost Trends, published April 15, 1957, by the Consumers Study Subcommittee of the House Agriculture Committee (p. 5). For our purpose here today, it is to be regretted that the initial phase of the subcommittee's work did not include an investigation of the effect corporation mergers and the trend toward vertical integration of production, processing, and distribution activities have upon prices received by producers and paid by consumers.

Facets of the latter include the increasing trend toward direct buying and the recent action taken by three national packers to seek relief from the consent decree. The subcommittee, however, gave assurance that investigation of mergers and vertical integration as they affect the price spread between what producers get and what consumers pay will constitute the next phase of the subcommittee's activities (p. 8).

Mr. Chairman, testimony received last June 21 by the Judiciary Committee's subcommittee on monopoly and antitrust reveals a record of ineffective administration and nonenforcement of the title II provisions relating to packers contained in the Packers and Stockyards Act. One witness reported going to the Chief of the Packers and Stockyards Branch in 1953 for the purpose of filing a complaint under title II against a national packer. The head of that Branch asked him not to file the complaint so that he personally could contact the alleged violator and obtain his promise of future compliance, since he had neither the staff nor funds even to investigate the complaint, if it were formally filed. This same witness indicated that his organization had given up going to this Branch because it never took action on any complaint it had filed. The USDA self-appraisal report of Packers and Stockyards Act administration indicated that not even one formal charge has been made under title II in recent years, mainly because apparently not even a formal hearing on a complaint has been held by the Packers and Stockyards Branch.

FTC JURISDICTION NEEDED

In spite of these facts, the national packer association which opposes S. 1356, states in printed matter being circulated against this bill that "the same factors which influenced the decision in 1921 should have an important bearing on the issue today." One of these factors, as I have pointed out—which the same group in 1921 said warranted transfer of the controls to the USDA—was that the FTC "did not have the power nor the specialized knowledge necessary to do an effective job of administration." Well, this observation in reverse now dictates the return of title II authority to the FTC.

The desire of the national packers to take such authority away from the FTC and to give such control to USDA in 1921, and their desire now to keep it there seems predicated upon the common knowledge that the FTC is an effective and efficiently operated agency. Too effective FTC administration, as far as they were concerned, led to the consent decree, which led to the transfer to the USDA, and now seems to be the basis of their opposition to return that authority to the FTC. It is now amply clear, quite to the contrary of such self-interest assertions, that the USDA personnel at the time of the transfer from FTC in 1921 were not "well equipped to undertake supervision of the complicated relationships characteristic of the livestock and meat industry." In fact, such personnel hardly even exist, let alone are they well equipped today for title II enforcement.

SOUND ADMINISTRATION DEMANDS TRANSFER

On the other hand, it is certain that if the Congress is ever going to be able to get effective administration of the laws it passes, it must recognize the need to group similar functions together for administrative purposes. Sound principles of organization dictate the reasonableness of this position. We have only ourselves to blame when we establish an independent agency, such as the FTC, to carry out a specific function like the prevention of unfair trade practices, and then proceed to dismember that agency by transferring its functions to other agencies and departments not equipped nor staffed to do the job.

Now I have heard the argument that packers are a vital part of agriculture, and, as such, the USDA should be responsible for preventing unfair trade practices in that industry. If this be so, and all logic is against it, then, by parity of reasoning, every other processor of agricultural products is also a vital part of agriculture and such antitrust authority over them also should be exercised by the USDA. It likewise is difficult for me to understand why such an argument now relied upon by the Department in opposing S. 1356 also did not apply when the USDA recommended that the Farm Credit Administration be transferred out of the Department and established as an independent agency. Certainly credit is just as vital to agriculture as meat packing.

Mr. Chairman, because I believe it summarizes the problem very concisely, I should like to read a letter dated April 5, 1957, which I recently received in support of S. 1356 from Mr. Alden K. Barton, chairman of the Utah State Board of Agriculture. This State official, who is in an excellent position to evaluate title II administration in the field, writes as follows:

"DEAR SENATOR WATKINS: I have reviewed Senate bill 1356 amending the antitrust laws relating to the meat-packing industry. I am in full accord with the statements you made before Congress in relation to fair-trade practices not being enforced by the Department of Agriculture and recommending that it could be efficiently handled under the Federal Trade Commission.

"It seems to me that the Department of Agriculture has had more to do with the stockyards division than they were staffed to handle and have not had the trained personnel to properly administer the fair-trade practices of the packers. There seems to be a feeling that packers can become monopolistic as they are endeavoring to go into other business such as livestock feeding and retail business to cover up some of the practices which would eliminate them from the laws that were intended to govern such practices.

"Another important practice which you mentioned is the chain stores going into the packing business in order to be exempt from the Federal Trade Commission supervision. It is felt by many that this is a bad practice and should be controlled. * * * I know that the four large packers are opposed to your bill; that is evidence that they are fearful of having more rigid supervision from the Federal Trade Commission than they are now getting from the Department of Agriculture.

"If you would like my advice, I would certainly favor Senate bill 1356. I feel it will be beneficial to the livestock industry. I also feel that anything that can be done to help the livestock industry should be the first order of business, under this high support program for basic commodities the livestock industry has suffered. I for one would like to do anything possible to help them out of the condition they are in at the present time. I have talked to several livestock men and they feel the same way that I have expressed myself to you.

"Hoping you are successful in getting this bill through the 85th Congress.

"Yours very respectfully,

"UTAH STATE DEPARTMENT OF AGRICULTURE,
"ALDEN K. BARTON,
"Commissioner of Agriculture."

But there is another basic reason why this authority to prevent unfair trade practices in the packing industry should be returned to the FTC, where Congress originally placed it. Because of 36 years of nonenforcement, title II of the Packers and Stockyards Act has never been fully litigated. The courts, therefore, have never been called upon to interpret the many and broad provisions which it contains. So from a practical standpoint, and in light of the seriousness of the situation, it might be several years before title II is fully litigated, so that effective action can be taken against alleged violators of the unfair trade practices provisions of that title.

In the meantime, if the national food chains and other food firms continue to acquire packing plants and thus escape FTC jurisdiction entirely, and the national packers concerned get out from under the consent decree, this situation would result:

1. A few large or giant firms would be able to set the prices received by producers not just of livestock products but a great many other farm products as well, and the prices paid by the consumer at the other end.

2 The same few giant concerns would be able to eliminate thousands of small businesses in all kinds of activities handling food products.

Religious Groups Wage Peace With the Weapons of Understanding and Food

EXTENSION OF REMARKS
OF
HON. COYA KNUTSON
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 1957

Mrs. KNUTSON. Mr. Speaker, our surplus food is a wonderful weapon for waging peace. There can be no question that the cause of freedom and democracy is served best by a warmhearted, generous, and prosperous people. This is particularly effective today when so many people of the world are yearning for an opportunity to achieve even a minimal living standard and the security that goes with it.

I am proud that religious groups in our country have taken the lead in using our abundant blessing of food in the interests of peace and of comfort to the unfortunate people in other countries.

Under leave to extend my remarks, I should like to insert into the RECORD the press release and a statement of the combined religious groups, Catholic Relief Services, Church World Service, and the United Jewish Appeal, which are part of their great effort in waging peace:

ONE HUNDRED MILLION DOLLARS IN SURPLUS FOODS SENT TO NEEDY BY RELIGIOUS FAITH GROUPS—HANDLE 91.3 PERCENT OF ALL COMMODITIES DISTRIBUTED TO HUNGRY ABROAD BY UNITED STATES VOLUNTARY AGENCIES

NEW YORK, N. Y., April 29.—American overseas relief agencies of the Protestant, Roman Catholic, and Jewish faiths distributed more than 1,140 million pounds of United States surplus foods free to destitute and hungry people abroad during the 9 months ended March 31, 1957.

These supplies of America's stocks of reserve foods—cheese, powdered milk, beans, corn, rice, wheat, cornmeal, and flour—comprised more than 91 percent of all such surplus foods distributed by all American voluntary relief groups during the period.

The overseas shipments by the religious agencies had a total value of $99,895,942.

Other surplus stocks similarly distributed by nonreligious voluntary agencies amounted to 108 million pounds, with a value of $14,184,256.

Of this, the largest amount—nearly 101 million pounds valued at $13,294,899, or 8.09 percent of the total was distributed by CARE (Cooperative for American Remittances to Everywhere, Inc.).

In addition, 61 million pounds of dried milk valued at $9,605,040 were distributed through UNICEF (United Nations Childrens Fund).

This was reported today by the American Council of Voluntary Agencies for Foreign Service, 20 West 40th Street, New York City, which is composed of 40 agencies registered and recognized by the United States Government. The report is based upon data issued by the United States Department of Agriculture.

In all, the United States Commodity Credit Corporation released 1,310 million pounds of foods valued at $123,685,000 for free distribution overseas by voluntary agencies during the 9 months.

During the same period, the CCC released approximately 750 million pounds of surplus commodities for distribution to needy persons in America through various State welfare projects, institutional programs, etc.

Operation of the overseas free food distribution by the religious faith groups was carried out in addition to their regular, ongoing worldwide schedules of relief and rehabilitation, through which contributed and purchased foods, clothing, bedding, medicines, and self-help supplies are furnished and through which are maintained continuing programs of resettlement, constructive development and assistance for refugees as well as support for orphanages and hospitals, tuberculosis and other health projects.

In the United States surplus food distribution, the faith groups utilize the vast, worldwide networks of their own voluntary relief personnel and that of associated religious agencies.

Because of the highly voluntary nature of their assistance both here and abroad, religious faith leaders report, the faith agencies achieve an extremely high rate of distribution per dollar of cost, with much more than 200 pounds of food (in many cases more than 400 pounds) being given to relieve human misery for each dollar expended in their programs.

Costs of the surplus operations of the religious faiths are defrayed by the voluntary contributions of their members—in Protestant churches largely through the One Great Hour of Sharing United Appeal and the Share-Our-Surplus programs, in the Roman Catholic Church through the Bishop's Relief Fund, and through the Emergency Rescue Fund of the United Jewish Appeal as well as other Jewish relief programs.

Surplus commodity shipments by American voluntary agencies during the 9 months (July 1, 1956–March 31, 1957) were:

	Total pounds	Dollar value
RELIGIOUS AGENCIES		
American Friends Service Committee	6,129,220	$929,641
American Jewish Joint Distribution Committee	8,584,700	559,290
Assemblies of God Foreign Service Committee	973,000	96,274
Catholic Relief Services—National Catholic Welfare Conference	796,892,300	65,378,021
Church World Service	249,866,366	23,171,056
Hadassah	1,462,765	375,137
Lutheran World Relief	72,997,047	9,063,114
Mennonite Central Committee	2,103,000	185,644
Unitarian Service Committee	377,700	50,255
World Relief Commission	916,555	87,510
Total	1,140,302,653	99,895,942
American Friends Austrian Children	826,000	111,040
American Mission to Greeks	471,000	65,957
American Korean Foundation	240,000	15,576
Care	100,985,145	13,294,899
Foster Parents' Plan for War Children	394,110	73,849
International Rescue Committee	720,000	98,360
Iran Foundation	1,992,070	216,658
Romanian Welfare	1,170,000	151,206
Tolstoy Foundation	90,000	25,200
United Lithuanian Relief Fund of America	947,000	90,091
Volunteer Border Relief	298,000	$30,260
Russian Children's Welfare Society	72,000	11,160
Total	108,205,925	14,184,256
Religious and secular agencies	1,248,508,578	114,060,198
United Nations Children's Fund	61,968,000	9,605,040
Total	1,310,476,578	123,685,238

Areas receiving United States shipments included Afghanistan, Algeria, Antigua, Austria, Bahama Islands, Belgium, Bolivia, Brazil, British Guiana, British Honduras, British Virgin Islands, Burma, Cambodia, Ceylon, Chile, Colombia, Costa Rica, Dominica, Ecuador, Egypt, England, Ethiopia, Formosa, France, French Guiana, French West Africa, Gambia, Gaza, Germany, Goa, Gold Coast, Greece, Grenada, Guadaloupe, Guatemala, Haiti, Honduras, Hong Kong, India, Indonesia, Iran, Iraq, Israel, Italy, Jamaica, Japan, Jordan, Kenya, Korea, Laos, Lebanon, Liberia, Libya, Malay States, Malta, Martinique, Mexico, French Morocco, Nigeria, North Borneo, Nyasaland, Okinawa, Pakistan, Panama, Paraguay, Peru, Philippine Islands, Portugal, St. Kitts, St. Helena, St. Vincent, San Salvador, Sarawak, Sierra Leone, Spain, Surinam, Syria, Thailand, Trieste, Trinidad and Tobago, Tunisia, Turkey, Vietnam, Yugoslavia.

APPRAISAL OF UNITED STATES SURPLUS-SHARING PROGRAMS

(Submitted April 1, 1957, by Overseas Voluntary Agency Representatives)

GROWTH OF OVERSEAS SURPLUS DISTRIBUTION PROGRAMS

Since the enactment of the Agricultural Act of 1949—partially incorporated into the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480)—making surplus American agricultural products available to overseas voluntary agencies for free distribution to needy persons abroad, there has existed a developing partnership between the voluntary agencies and the American Government that is undoubtedly without parallel or precendent either in scope of operations or value to the free world.

Until 1954, the growth of the overseas surplus distribution programs was comparatively moderate. During the 4-year period of 1950–53, only about 300 million pounds of surpluses—mainly dairy products and shortenings—were distributed in areas of need abroad.

Public Law 480 provided increased opportunity and additional facilities for surplus disposal by American voluntary agencies and during fiscal year 1955 such shipments abroad reached 403 million pounds as against the previous annual average of 75 to 80 millions.

In fiscal year 1956, during which wheat, corn, rice, and dried beans were released to overseas distribution programs, the relief agency programs expanded rapidly.

With this added opportunity for service benefiting from the fact that, by this time, the agencies had been able to perfect worldwide distribution facilities of high efficiency, nearly a billion and a quarter pounds—three times that of the previous year—were distributed to the hungry, homeless, and destitute as a gift of the American people.

During the first 6 months of fiscal year 1957—from July 1 through December 31, 1956—shipments abroad by 22 agencies, going to needy people in more than 75 of our sister nations have totaled 917,394,773 pounds or nearly a half million tons with every likelihood that the figure for the full year may reach twice this amount.

Thus, in 3 years, the sharing of our surplus through the partnership of overseas voluntary agencies and our Government has increased some 25 to 30 times.

Despite the magnitude of this greatest of food-relief efforts, there are still many millions of impoverished and undernourished persons in need, far exceeding in number those now being ministered to in the overseas-distribution process.

NEED FOR IMPROVED EFFICIENCY IN BASIC CONTROLS

Government responsibilities for the overseas-distribution program at the outset were shared by various existing Government agencies both here and in the recipient areas abroad—among them bureaus within the Department of Agriculture and within ECA, MSA, FOA, and later ICA, in the embassies overseas, in United States overseas missions, in agricultural missions, etc., and in the Advisory Committee on Voluntary Foreign Aid.

During the more or less experimental stages of the food-distribution program, the combination of these departments and bureaus was fairly adequate to the task, despite the fact that the individual units concerned often necessarily operated upon policies divergent in interests and concepts.

Since the inception of the program, little change has occurred in the operating machinery, particularly as concerns the vital control points abroad, and there has been little actual change at home despite an apparent and recognized need which has somewhat recently resulted in attempts to remedy the situation through interdepartmental coordinating groups.

Meanwhile the agencies' programs of distribution, as a result of the enthusiastic nationwide response and support accorded them by individual Americans, and their representatives in Congress and the administration leadership, have grown like Topsy almost overnight, placing inordinately heavy strain upon the improvised machinery of operation.

Many circumstances have arisen that tend to militate against the basic objectives of the partnership to meet human need.

Such circumstances are largely an inescapable result of the rapid growth of the programs, and the progressive involvement of more and more departments of Government (however well suited to cooperation) and the resulting conflict of concepts and ideas and interests.

The persons and bureaus concerned with the program have attempted, and continue to attempt, to do their very best within the governmental structures in which they found themselves.

However, as there has up to now been no articulated policy or philosophy of program, there has been no way to acquaint the many concerned people and bureaus with the underlying aims towards which they should bend their efforts.

The agencies feel that in view of the rapid expansion of the programs, a thorough top-level discussion and study of the total situation could be very helpful.

To this end the agencies suggest that the Secretary of Agriculture—because the programs are concerned with agricultural surpluses and are largely made possible through agricultural funds and because of his personal experience in ministry to the needy—institute such a study in concert with other governmental agencies and with the voluntary agencies.

Such a study by a workable group of upper-level officials, drawing upon the experience of the past and viewing current problems and divergent approaches realistically, could produce a valuable clarification in procedures and could contribute effectively to a greatly increased efficiency.

Only through such a concerted effort—drawing upon the experience of all involved—can there be achieved the potential that lies in America's opportunity to utilize her abundance for the greatest good.

SUGGESTIONS FOR WIDER EFFECTIVENESS OF PROGRAMS

We suggest the following as points upon which attention of such a study might well be focused:

1. The location of supervisory responsibility. It is essential that these programs have direction from a single authority and be guided by a single policy.

This would eliminate a great deal of the unwieldiness involved when, as currently, three agencies—USDA and ICA and the embassies—each have responsibility for separate parts of the operation.

It would eliminate a tremendous amount of wasted time and interdepartmental paperwork.

It would speed up and simplify much of the detail concerned with orders for and shipment of commodities and would prevent a great deal of misunderstandings and cross purposes which, in the past, have resulted in many unfortunate and costly situations.

2. Coordination and cooperation, in fact rather than theory, on local levels of operation between agencies and/or missions and embassy representatives to achieve more realistic and practical applications of program.

3. A closer alinement in terms of program application of the facilities for distribution disposal provided in title 2 and title 3 of Public Law 480 which could make more realistic the actions necessary to meet emergencies (e. g., the Hungarian refugee needs) and to better serve borderline programs.

4. A reappraisal of the 50–50 ocean freight philosophy to determine whether experience to date justifies, through dollars saved, the loss in achievement of the basic objectives of the total program through resulting limitations, lessening of people-to-people contact, and decreasing faith in democracy in oftentimes vital areas.

Additional points upon which such a study could be highly beneficial include:

1. Whether there are not advantages in actually purchasing some processed products on the market with funds from surplus sales rather than processing current surpluses for welfare distribution either here or abroad. (For example, wheat conversion into flour in certain instances where costs of handling and transportation become excessive.)

2. Extension of processing of commodities as provided for by the last Congress, particularly in such cases where processed commodities can be moved and distributed at lower costs and to better advantage in processed rather than in their present form (e. g., conversion of cheese into oil and protein meal).

3. Use of title 1 local currency funds for rehabilitation and self-help projects through approved voluntary agencies.

4. Consideration of making available other products either in steady or temporary surplus whose use would be highly beneficial in overseas programs and which could have desirable effect on domestic prices.

5. The opening of the Iron Curtain countries to voluntary agency programs at such time that sales of surplus goods may be permitted in such areas.

6. Development of pilot projects in limited distribution of processed or unprocessed commodities in the mutual interest of the welfare of peoples and the stimulation of market sales (e. g., bulgor wheat as a rice substitute).

(From G. Blackford, Church World Service, 215 Fourth Avenue, New York 3, N. Y.)

Message of Joseph F. Thomas, National President of UNAPOC

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 29, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the 75th anniversary message of UNAPOC President Joseph F. Thomas, which appeared in the Post Office Employee, official magazine of United National Associations of Post Office Craftsmen, in the issue for March-April 1957.

The message follows:

YOUR NATIONAL PRESIDENT'S MESSAGE

(By Joseph F. Thomas)

THREE-QUARTERS OF A CENTURY

It was just 75 years ago that a strong and courageous group of men—dedicated postal employees—met and decided to form an association or union for the purpose of bettering their deplorable working conditions. They vowed that in spite of threats from the Post Office Department and snubs from the Members of Congress, something had to be done to make the United States Post Office a decent place to work.

This was the humble but honorable beginning of America's oldest postal union—the UNAPOC. Many years have passed since that day in 1882 and many other unions have come into existence, but none can claim the solid achievements of our association.

Most of the basic legislation which we now enjoy was obtained by hard work long before the present-day postal unions had even been organized. Through those long years our association has steadfastly maintained its independence and has refused to surrender to any outside labor union or to any particular political party. Never have we been placed in the position of contributing to those affiliated with racketeers and hoodlums and never have we been beholden to those who would use our funds to defeat certain of our friends.

It is certainly fitting, as we reach the three-quarter century mark, to look back and say a prayer of thanks for those heroes who so ably paved the way for us. It behooves us all to be grateful for the long and honorable career of UNAPOC, which has done so much to help us.

Salary

Action on salary legislation thus far has been very discouraging, in spite of all our efforts. Things did brighten somewhat when Senator OLIN JOHNSTON of South Carolina, announced that his committee would hold pay raise hearings at a later date.

This is the action which is necessary to set off our whole campaign and we are still more than hopeful that a decent pay raise will be forthcoming before the adjournment of Congress.

Rates

In the meantime, though it has been contrary to our policy in the past, our association testified in favor of postal rate increases before the House Committee. This was done because of the continued effort of many to hold up postal salary raises until the rate bill is out of the way. UNAPOC testimony below will give you a good idea of the motives behind our testimony.

"Mr. Chairman, members of the committee, my name is Joseph F. Thomas and I am

president and legislative representative of the United National Association of Post Office Craftsmen. Our association, America's oldest postal union, is located in the Colorado Building, Washington, D. C.

"In appearing before you today I am representing over 40,000 members of our association and it is my hope that I am expressing their views to you.

"In connection with the bills before you, I hasten to explain that I am no financial expert and thus have not been able to delve into the actual complexities of these bills. I do know, however, that the first class letter rate is the same today as in the year 1932. I understand that second class mail has been increased about 3 percent since that time and that third class mail has shown an increase of 38 percent.

"At the same time, I remember that back in 1932 we were in the midst of a depression and certainly the dollar of today cannot be compared with the dollar of the 1930's. It is unreasonable to assume that postal rates should remain at an even figure for over 25 years, while in the same period salaries have risen over 100 percent, equipment, such as trucks and trailers, have increased between 200 and 300 percent and all other services, such as transportation, heat and light and many others, have risen sharply.

"I requires only a quick look at our own financial status, compared to that of 1932, to make us realize that increases in the posta' rates are in order.

"There has been some conflict in testimony before this committee as to whether or not the big businesses of our country actually favor the rate increases proposed. I am not qualified to pass on this question. However, after 20 years' service as a post-office clerk in one of the Nation's large offices, I can say that the bulk of mail processed by the post office is mailed by business houses and not by individuals. I am quite sure that business will more than pay its share in this respect and that individuals, such as myself, will be taxed about 11 or 12 cents a month, or a total of around $1.50 per year.

"As a member of this important committee, you may wonder why I, as an employee organization representative, should testify in support of a function which primarily belongs to management. The answer is simply this: In the past we have refrained from taking part in proposals to increase rates, feeling that this was the duty and responsibility of the Post Office Department. However, in recent years, each of our attempts to obtain reasonable legislation is met with a cry of "deficit." The term has been played up and exaggerated in the public mind and employee benefits have, as a result, become more and more associated with postal income. Naturally, since the employees of the post office are so vitally affected by postal rates, or lack of them, it is my duty to support any reasonable measure which will help the people I represent.

"In addition, as an individual citizen, I do feel as though a postal rate increase right down the line is justified. I feel also that I am expressing the views generally of our members, both as postal employees and as individual Americans.

"I thank you, Mr. Chairman, and each and every member of your committee, for the privilege and honor of appearing before you today."

What ails the mails?

If you were to put that question to officials of the Post Office Department, the answer would probably be "Nothing," and you would receive a long story about that elusive time in the future when all first class matter will be delivered the day after it is mailed.

Or, if you were to ask the same question of a regional official, he would tell you of the improvements in the postal service because of new equipment; he would laud the new efficiency because of the numerous changes which have been taking place and he would end up by telling you that the mail service has been improving in leaps and bounds, which it has not.

And, if you were to ask the American businessman what he thinks of today's mail service, he would probably show you the following letter to the editor, which is similar to many received by us in the past few months:

"To the EDITOR:

"I felt you might be interested in the following from 'Our Publisher's Viewpoint,' a monthly leaflet. It reads:

" 'Quite a number of people have written me about fantastic mail deliveries. Here is one letter from Philadelphia:

" 'On January 16 one of our customers in New York mailed us an envelope * * * first class, special delivery. It arrived by regular mail on January 26. Recently I personally mailed a first issue of our new magazine, first class, to a friend about 1½ blocks away on Thursday. It arrived the following Tuesday.

" 'In all the years we have been in business we have never seen the mail service as bad as it is now. It is unquestionably the slowest in any first-class country in the world. In Paris and London a special delivery stamp means special delivery that day. It seems as though it is a studied attempt on the part of our Post Office Department to force through their program for higher rates.

P. W.' "

So, there you have the extremes—management defending itself all the way and the businessman condemning the mails completely.

If you really want to know what ails the mails though, it might be wise to ask the Post Office employee—the fellow responsible for the actual moving of the mails. He would, in all probability, tell you that there is nothing wrong with the mail that is not curable with a little horsesense and some additional manpower. He'd say, no doubt, that it is very difficult for 2 employees to do the work of 3 and he would tell you, especially if his hours have been cut to the bone, that it is hard to keep good employees unless you are willing to pay them enough to live on.

He might tell you, too, that he is so busy keeping up with changes and so busy staying abreast of new regional orders, that he is hard put to actually settle down to what once was a calm and peaceful method of making a living.

The mails are ailing, no doubt of that, but the doctor may yet find a cure with a new and better prescription.

The Iconoclast of Petal, Miss.

EXTENSION OF REMARKS

OF

HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 9, 1957

Mr. MULTER. Mr. Speaker, the following article, written by Albert Vorspan, and which appeared in the March 21, 1957, issue of the Reporter, makes most interesting reading:

THE ICONOCLAST OF PETAL, MISS.

(By Albert Vorspan)

Mississippi is the home of the white citizens' councils, the first having sprung up in Indianola 2 months after the Supreme Court's first decision on school desegregation. There are now more than 300 in Mississippi alone. However, in Forrest County, in the south-central part of the State, the local council is still trying to get off the ground. On reason for that is P. D. East.

At 35, East is the editor of the Petal paper, a weekly that circulates in the towns of Petal and Hattiesburg. The Petal paper is an unpretentious newspaper, usually of 4 pages, for which East does all the writing and his wife does the art work. Circulation was pushing 2,000, but for reasons that will quickly become obvious, it is now nosing down. Both friends and enemies of East agree that the Petal paper is a remarkable publication. Hodding Carter, distinguished Mississippi editor, has predicted that East will either win a Pulitzer prize or be run out of town on a rail.

While neither of these calamities has yet befallen him, either would be a tribtue to his powers of ridicule and his ability to make some of his fellow Mississippians laugh at themselves—or blow their tops at East.

The Deep South today has become a kind of arsenal. Everybody seems to have some type of weapon. The Negroes in Montgomery use love and passive resistance; the white citizens' councils use economic pressure; some people use dynamite. P. D. (his name, not his initials) uses laughter. In March 1956, for example, on learning of plans to launch a council in Forest County, he threw out an anticouncil editorial he had written and hastily made up the full-page ad reproduced on page 35.

A kind of mushroom cloud hung over the community for several days. East's telephone began jumping. There were threats, cancellations of subscriptions and advertising, and some blistering letters. Carter wrote P. D., "I hope you leave a forwarding address," and William Faulkner wanted to know whether East had found any dead cats on his front porch. Requests for reprints poured in from the rest of Mississippi as well as from 37 other States and 3 foreign countries.

Some Mississippians are currently engaged in a campaign to mend the tattered reputation of their State. Many automobiles carry tags that read: "Mississippi, the most lied about State in the Nation." Said the Petal Paper in its January 10, 1957, issue: "We agree with the tags. Unfortunately, the lies are not necessarily being told by persons out of the State."

P. D. is a native Mississippian, educated in the schools of the State except for a brief stay at the University of Alabama. He has a deep affection for Mississippi, its rolling hills and green beauty. "I love my child, too," he says, "but sometimes I have to spank her. Same way with my State, only I spank her with laughter. I figure if you can make a body laugh at himself, you can make some progress. Besides, I don't give Mississippi any hell that is undeserved."

In an age of conformity, and in a section of the country where not to conform is tantamount to putting your head to the muzzle of a loaded cannon, East is an iconoclast. A deeply religious man privately, he tells his Bible belt readers with no trace of apology that he has no use for going to church. He tells his chauvinistic neighbors that the time has come for Mississippi to return to the Union and for Mississippians to rejoin the human race. In bone-dry Mississippi, the Petal Paper proclaims editorially: "Like women and poker, that booze is here to stay," and explains the position this way: "It was 4,303 years ago that Noah finished unpacking the Ark. Almost the first act he performed was to plant a vineyard, from which he made wine and got good and skunked. And since that time his descendants have pretty well followed in his path, at any rate, relative to getting skunked. * * *" And he concludes: "If enough of the church-going, dry-voting, wet-drinking folks find it difficult to get hold of booze, they will vote wet."

UNPLEASANT REMINDERS

But it is East's views on the racial question that really set him apart and for which he pays a heavy price in advertising and subscription cancellations and, to some extent, in social ostracism. Not that he is a crusader; he finds the very suggestion presumptuous and distasteful. Nor does he regard himself as a latter-day Moses come to lead the Negro race out of bondage and into the white schools. He is not much concerned with integration, which to him is a secondary issue. The basic issue, in East's view, is whether Mississippi and the rest of the Deep South, in a desperate effort to avoid dealing with the racial problem, will rip out the entire structure of constitutional democracy as we understand it. "A revolution is whistling through Dixie," P. D. believes, "and we can either get on the bandwagon—or get run over by it. That's the choice."

East has not endeared himself to his compatriots with his incessant reminders of the lot of the Mississippi Negro. For example, he published a picture of a new white school alongside a picture of a frightfully dilapidated Negro school and asked his readers to guess which was which. When a local politician made a grandstand play and ordered Negro teachers out of an interracial meeting to which they had been invited by the whites to discuss mutual problems, East roasted his hide in print. (He believes that most white people shared his revulsion, as evidenced by the man's failure to win reelection.) When a Negro leader, Dr. Benjamin Mays, president of Morehouse College, delivered a powerful speech to the Southern Historical Association, P. D. published it in full with his blessing "as one of the most brilliant pieces I've had the opportunity to read anywhere." But, first and foremost, East never stops pleading for some bridges to establish communication between whites and Negroes in Mississippi so that they can "sit down as human beings with mutual problems and with mutual respect to begin to work out differences."

EAST ON EASTLAND

East pours a boundless scorn on the "professional southerner," the cheap Mississippi politician who thinks the way to election is by yelling "Nigger" the loudest, the Mississippi legislature ("The Lord and the Constitution of the United States giveth, and the legislature of Mississippi taketh away"), and on those southerners who "use everything we have except our brains." East has an especially soft spot in his heart for Senator JAMES O. EASTLAND, senior Senator of the State, to whom he refers, familiarly, as "Our Gem." In the May 31, 1956, edition, the Petal Paper, under a heading "Our Gem, he's real gone, man, real gone—Now ain't he a real cool cat, man," offered this unsolicited testimonial to Eastland:

"In addition to his character, his integrity, his principles, 'Our Gem' is not only intelligent in the usual manner, but he's sharp as as a tack in other ways, Jackson. Example: At Doddsville, Miss., 'Our Gem' has a small cotton patch, composed of something like 5,020 acres. And in the United States Senate, who has been the strongest fighter for the cotton farmer? Of course, our very own cool cat. * * * And down on the gulf coast a few years ago there came up the question of expanding industry in Mississippi, and 'Our Gem' told an acquaintance of ours that Mississippi needed industry like a hole in his head. (And get the coolness of what follows.) How, he asked, can you keep labor on the farm at a dollar a day with industry moving in and offering them a dollar an hour? Do you see what we mean? Ain't he a real cool cat, Jackson?

East is a gadfly, and he can sting the conscience. Here is a statement in an issue a week before an election: "Forrest County has 12,000 Negroes, all citizens of the United States, but their citizenship expires at 7:30 p. m. next Thursday." Or on the fact that most clergymen in the area are followers and not leaders: "I am curious to know which minister is going to bless the organizational meeting of the Citizens Clan next Thursday night." When some Negroes were pushed around on the streets of Hattiesburg, East announced the formation of "The Bigger and Better Bigots Bureau," and summoned to the colors all who wish "to strike a blow for the sweet magnolia." Few of his needles drew blood so quickly as a playful fantasy he wrote about heaven ("At the Gate, One Keeper—Two Gates?"), which concluded with this thought:

"For just a moment let's consider the possibility of the fact that in Heaven there is no Jim Crow law, no segregation, and one lives on a certain street, in accordance with the size of his halo. What then? Maybe some of us had better begin to get used to the idea * * * possibly? Still, on the other hand, from what we've seen from time to time there is no use in worrying about it all * * * it's likely to be thumbs down just when we tell St. Peter we're from Mississippi."

East has run off a few hundred thousand words on his weary Underwood during the past 3 years, but he has enjoyed few columns as much as that in which he kicked off the campaign to change the State symbol from the magnolia to the crawfish. What commended the crawfish to him as a likely symbol for Mississippi is the crawfish's tendency to move backward. "This State is on the threshold of its greatest movement—and, as we have said, there are some who want to travel uphill, straight ahead—and, of course, they must be dealt with before we can hoist the crawfish symbol. * * * Our sagacious leaders are showing us how; they are leading the way. Their aim is to protect us from those crawfish who haven't the intelligence to move backward. * * *"

Many people are amazed that East has not been stomped yet—including East, who thinks that since he hasn't had his brains knocked out yet, it is not likely to happen. One day, when he had to stop his car for a light, a red-faced man walked up to his car and demanded: "Git outta that car, so's I can mop the street with you." East replied: "Sorry, pal, that ain't enough inducement," and drove away. Another time, a stranger stormed into his office, obviously spoiling for a fight. East was, as usual, slouched in his chair, tormenting the typewriter. When he rose, stretching his 6-foot-2, 220-pound frame, the visitor muttered something irrelevant and departed.

DEFINITION OF A JOURNALIST

But East has felt the pinch of economic pressure, which is hardly calculated to ease his ulcer or to slow the advancing gray that already sprinkles his sandy hair. An organized campaign, stepped up the last few months, has cut heavily into circulation and advertising, and the paper is in a precarious situation. Not long ago, a local businessman refused to advertise in the Petal Paper because, as it was reported to East, "Things in your editorials didn't set well with him." East erupted editorially on "Freedom of the Press—And the Mighty Buck." Rejecting any effort to control his ideas through financial pressure, he wrote: "We believe that keeping facts or ideas from citizens to be a crime. We believe that any person who calls himself a newspaperman should never permit anyone, for any reason, to keep him from presenting the truth or at any rate, the truth as he sees it.

"So with the help of God, and to this we swear, as long as we can keep our head above water, we will print what we please in this paper, in so long as we believe it to be right, fair, or true. And if the time should come that to keep our head above water means to submit to pressure of any kind, then we will go under without hesitation, and at least with a clear conscience. In the meantime, however, we have only six words to say to those who would attempt to put economic pressure on us; the words are: 'Go to hell in a bucket.'"

Why does East write these things? "Damn it," he said recently, "I'm not a hero, and I don't want to be one. I'm just a country editor. But I can't look the other way when the most important issue of my life hits me smack in the face. I think God made us for a purpose, not for the hell of it. I do it because of necessity.

"There are lots of white people who think the way I do, right here in Mississippi and other places in the South, but they are afraid to open their mouths. But when they get my paper and take it into their homes and draw the blinds and sit there by themselves, they read the paper and, well, they know they aren't alone."

And what if the pressure gets too strong and the paper goes under?

"The tragedy would not be mine, but Mississippi's. I could run a profitable paper if I would run under their flag. But I have to live with myself. The tragedy would not be in what is done to me. It is what we are doing to ourselves. We just can't go on denying basic rights to some people and reserving them to ourselves. It may work for a time, but after a while it's got to catch up with us.

"Anyway," he says, brightening, "I have no intention of going under. I wouldn't give them the satisfaction. Besides, I'm having too much fun."

LAWS RELATIVE TO THE PRINTING OF DOCUMENTS

Either House may order the printing of a document not already provided for by law, but only when the same shall be accompanied by an estimate from the Public Printer as to the probable cost thereof. Any executive department, bureau, board, or independent office of the Government submitting reports or documents in response to inquiries from Congress shall submit therewith an estimate of the probable cost of printing the usual number. Nothing in this section relating to estimates shall apply to reports or documents not exceeding 50 pages (U. S. Code, title 44, sec. 140, p. 1938).

Resolutions for printing extra copies, when presented to either House, shall be referred immediately to the Committee on House Administration of the House of Representatives or the Committee on Rules and Administration of the Senate, who, in making their report, shall give the probable cost of the proposed printing upon the estimate of the Public Printer, and no extra copies shall be printed before such committee has reported (U. S. Code, title 44, sec. 133, p. 1937).

PRINTING OF CONGRESSIONAL RECORD EXTRACTS

It shall be lawful for the Public Printer to print and deliver upon the order of any Senator, Representative, or Delegate, extracts from the CONGRESSIONAL RECORD, the person ordering the same paying the cost thereof (U. S. Code, title 44, sec. 185, p. 1942).

PRICE OF THE CONGRESSIONAL RECORD

The Public Printer is authorized to furnish to subscribers the daily RECORD at $1.50 per month, payable in advance.

Remit by money order payable to Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Appendix

Address by Hon. Alexander Wiley, of Wisconsin, Before Foremen's Club of Philadelphia, Pa.

EXTENSION OF REMARKS

OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. WILEY. Mr. President, it was my extreme good pleasure last evening to speak at the Labor and Industry Day dinner of the Foremen's Club in Philadelphia. I had a very fine time. That representative group of labor, management, and investors comprises the three elements in our society which will make for stabilization if they pull together. This was an example of a group working together and agreeing that, by and large, America needed not only their investment in material wealth, but also their realization that this is not the world we knew a few years ago, but is a world which challenges their best patriotic devotion to the American way of life.

I ask unanimous consent that my comments at the dinner be printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

WE NEED MORE INVESTMENTS IN AMERICA; FURTHER BUILDING THIS COUNTRY WITH THRIFT, HARD WORK, AND UNCEASING FAITH

(Excerpts from address delivered at the Labor and Industry Day Dinner, Foremen's Club, Philadelphia, by Senator ALEXANDER WILEY, Republican, of Wisconsin, senior Republican, Senate Judiciary and Foreign Relations Committees, Wednesday, May 1, 1957)

It is a real pleasure and privilege to participate in this labor and industry day dinner.

I am glad to visit Philadelphia, the city of brotherly love, the cradle of American liberty on this May 1.

It is a most appropriate day, when we—you and I—can strengthen the foundations of liberty. Likewise, we can and should strengthen the ties of mutual respect and understanding between labor and management, and all segments of our population.

MY THEME TONIGHT: MORE INVESTMENTS

My theme tonight is very simple, and yet, I believe, it is significant and enduring.

My theme is: We need still more investments in America.

In this National Invest in America Week and in all the other 51 weeks of the year we need to invest, soundly and carefully, more savings, accumulated by means of our thrift and our hard work.

Why? So that our dynamic economy can still further expand; so that there will be higher productivity, more jobs; a higher standard of living, more comforts and conveniences for all.

ANOTHER KIND OF INVESTMENT NEEDED

But we need still another kind of investment as well besides our dollars and cents, our tangible savings.

We need the type of investment with which you foremen are especially familiar—you leaders of men.

I refer to the investment of something more intangible—our minds and souls, our faith and determination.

But an investment in what?

WHAT IS AMERICA

An investment in everything for which this Republic stands. So let us ask: Exactly what is this America of ours that we would invest in?

Is it simply the 3 million square miles of this part of the North American Continent?

Is it simply our cities and countryside, our forests and lakes and rivers, our towns and hamlets?

Is it our churches, our schools, and our homes?

Yes; but we are talking of investment in all these and more.

Is it our 170 million living souls, young and old, each with their individual personality, their economic and political and religious ideas?

Yes; and it is still more.

Is it America's history, from the days of the ringing here of the Liberty Bell; the days of Valley Forge—through all the subsequent evolution that occurred, through our expansion westward, our wars, our elections, our explorations, our progress?

Is it our businesses, large and small, our factories and our mines?

Yes; it is all this, and still more.

Is it our precious Constitution and its Bill of Rights?

Is it our dreams and our vision?

Is it our world leadership and our faith for a better tomorrow?

Yes, all these and still more.

Is it the sacrifices in blood and treasure which have been paid for this thing called the American way? The million men who have died in all of our past military conflicts, so as to keep this country free?

Is it our devotion to freedom, not simply for ourselves, but for all mankind?

Still again, we answer: All this and more.

Is it our businessmen, our laboring people, our educators, our scholars and our preachers?

It is these and more.

Is it the mothers and fathers of America, dreaming dreams of a better world for their children, and reaching out to understand more of the meaning of life, by contacting the Infinite?

Yes, my friends, it is all these and still more, that I say you and I are called to invest in.

And let me repeat, when I say "invest," I mean more than the common significance of that term.

We know that when one invests in something, something very precious, something that is a part of him, he does more than simply place his cash on the dotted line.

PRESERVING OUR GREAT FREEDOMS

When you and I think of investing in America, we should think of seeing to it that everything is done in order that America shall remain free and secure.

We mean that we invest with our spirit and our determination. Why? So that the great freedoms which mark this land—freedoms of press, speech, religion, trial by jury, and others—shall remain intact and so that we can hand them down to those who come after us.

When we invest in America, we see to it, for example, that our schools here in Philadelphia and everywhere else, become still better. Why? So that our children will grow up to be strong moral men and women who live wholesome lives.

Yes, so that our children will recognize the privilege of American citizenship and will be competent and adequate to meet all the challenges of such citizenship.

WORLD LOOKS TO US IN JORDAN AND OTHER CRISES

When we invest in America, we recognize that we are investing in the country that is the lighthouse of the world, the leader of the world.

We are the country to which the world looks for the salvation of the troubled Middle East and of south Asia and of Western Europe and of all other lands.

If the crisis in Jordan, for example, is successfully solved, as we hope and pray it will be, it will be because your country helped to solve it—your President, your State Department, and, yes, the presence nearby, of the ready Armed Forces of your flag.

Men of good will in Jordan and elseswhere look to us for leadership, just as the men you supervise look to yourselves for leadership.

We Americans are not meddlers, but neither are we shirkers.

The Middle East today may seem 5,000 long miles away; but really, it is in our own backyard because space and time have been shrunken by man's inventiveness.

So, we will not shrink from our duty and responsibility there, as we see it.

ASSURING HEALTH AT HOME BY SOLVENT ECONOMY

Meanwhile, here at home, now, how can we specifically invest in this leader country?

Obviously, through an adequate defense, a still sounder program of social justice for all, sound schooling, and making sure that our economy remains healthy.

Naturally, it is this last point to which I have referred which is especially pertinent to this Invest in America Week. An economy which is healthy is not a luxury; it is an absolute necessity.

More nations have been destroyed by inflation and/or bankruptcy than have been destroyed by wars.

You will remember that the German mark during the days between World War I and World War II became so depreciated that it eventually reached the point where a trillion marks was worth a single American dollar. The printing presses had gone wild. And soon the Weimer Republic collapsed.

That must not and will not happen here.

THE RESPONSIBILITIES OF TRUSTEES

A healthy economy is one where those who are in charge of the direction of the economy sense their responsibility as trustees.

A trustee conserves values; he does not squander them.

He adds to assets; he does not impair them.

That is why a sound dollar, a sound banking system, sound credit, a sound insurance industry, a sound securities industry, a sound home and construction industry—all these are part of an expanding, healthy economy.

EXPANSION IS KEY TO PROSPEROUS TOMORROW

I keep referring to this matter of expansion because this country must keep moving forward.

We must do so for several reasons:

(a) Because our people have rightly come to expect an ever higher standard of living.

(b) Because it has been estimated that we need to create a million new jobs every year.

That includes jobs for young people entering the labor force and it includes jobs to replace tasks that have been replaced by new-type operations.

RISK CAPITAL VITALLY NEEDED

(c) Because it has been estimated that $14,000 or $15,000 is necessary to create a new job on the average. And that money must come principally from an increasing amount of savings, wisely invested in risk capital, in the form of private stocks and bonds.

(d) Because our population is expanding. More than 4 million youngsters were born last year.

And with the extension of man's span of life there are more and more mouths to feed and clothe and more and more individuals to make comfortable.

So when we invest we invest for ourselves, for our loved ones, and for those who will follow after us.

We have in America an economic engine run on the gasoline of finance. Finance is the fuel which makes the machinery run. And that machinery not only carries its own weight, but carries others' load of work as well.

But finance is no longer for the few. It is for the many.

THE MEANING OF "PEOPLE'S CAPITALISM"

More than 8 million Americans own stocks and bonds in publicly owned corporations. And more than 13 times that number own life-insurance policies.

Add, too, the tens of millions with sound stakes in our banks, our savings and loan associations, our millions of privately owned businesses, and you get a picture of what has been aptly called people's capitalism, the capitalism of all Americans, all owners of stakes in the private-enterprise system.

To preserve and advance this people's capitalism is your task and mine.

ECONOMY COULD BE DESTROYED BY CLASS WAR

You and I know that, besides war or inflation, there are other ways by which this or any other economy could be destroyed.

It could be destroyed by class warfare, by hatred and bitterness between individuals and groups.

It could be destroyed by a failure of labor to recognize management's problems, or of management to recognize labor's problem, or both labor and management to recognize foremen's and supervisor's problems.

Each of us must learn to put ourselves in the other fellow's shoes.

If collective bargaining is to be successful, there must be mutual understanding and good will.

If foremen are to get the jobs done, they must have a team to work with, a team which recognizes the need and advisability of greater productivity.

For purposes of illustration, let us look back for just a moment to colonial times, the era of early Philadelphia.

THE EARLY AMERICAN HOME

Imagine, if you will, the early American, sitting before the fire in his own home on a wooden three-legged stool.

He had there all the elements of our early political economy.

He had his own capital, as represented by his home, his land, and his simple tools, and his wife's spinningwheel and loom.

That is—

He provided his own labor, himself and his family.

He was his own management.

He was supported by his own 3 elements of management, labor, and capital, as certainly as the 3 legs of that wooden stool supported him.

But his was a simple home and a simple economy.

COMING OF SPECIALIZATION

Since then, the industrial revolution has given us the benefit of the marvelous results of specialized production. More than 66 millions are at work today.

But, you might say that our whole modern economy still rests squarely on a three-legged stool. It is supported by the three essential legs of management, of labor, and of capital.

Obviously, a stool cannot stand on two legs.

No more can our economy stand, without all three of these supports, labor, management, and capital.

If each of these three groups always remembers its interdependence on the other two, our economy will never topple.

FIVE-FOLD OUTLETS FOR PERSONAL INVESTMENT

Now, my friends, inevitably the comment may come, "Senator WILEY, I agree with you that we should invest in America, both tangibly and intangibily, but where should we put our financial investments?"

Well, my friends, I am not a specialist in advising on finance.

If anyone has additional funds which he wants to invest, my first suggestion would be "go to your banker."

Go, as well, to other specialists, get their best judgment, and then follow through, based upon your individual needs and wants.

I personally have always considered that a well-balanced investment in things material would consist of:

1. A ready reserve of cash in your bank, in your savings and loan association.

2. Adequate insurance to protect your loved ones.

3. Your own home, if you feel the need, as more than 3 out of every 5 Americans do, to own your own residence.

4. Government bonds (on which Congress has now wisely acted to raise the interest returns).

5. Stocks and bonds in corporations whose records of earnings and growth or of potential good yield, you have carefully studied.

VITAL IMPORTANCE OF "LABOR AND INDUSTRY DAY"

But as you study corporations, including your own employer, bear in mind that a corporation's success depends upon more than management, and yes, upon more than investors, as important as they are. It depends on employees, it depends on you foremen, you who provide the vital link between labor and management.

That is why I am particularly glad that this dinner is on labor and industry day and that labor and industry day is on May 1.

That is because May 1 in some parts of the world has come to be identified with demonstrations, conducted by Communists or under Communists' influence.

The mere fact that we do not have uprisings in the United States on May 1 or at any other time is a clear indication, it seems to me, that America provides what labor needs and wants.

America provides what all of us want, young or old.

TRIBUTE TO ORIGINATORS OF INVEST-IN-AMERICA WEEK

As I approach the conclusion of these thoughts, I want you to know that it has been a special joy to come to historic Philadelphia.

It has been a pleasure, not only for all the reasons which I have earlier mentioned, but because it is Philadelphia which originated and spearheaded this national Invest-in-America Week celebration.

As you know, I had been pleased to comment on this outstanding celebration on the floor of the United States Senate.

The spread of Invest-in-America Week demonstrates how a few individuals inspired by a need, can originate a worthy idea, an idea which will grow and which will catch on like wildfire. Why? Because it is needed and because it is constructive and helpful for a great cause.

A MESSAGE TO AMERICA'S YOUNGSTERS

And speaking of great causes, perhaps the best way we can invest in America is through our youngsters, through the children and grandchildren in our own homes.

This spring I have spoken to possibly a thousand Wisconsin high-school students who have come to Washington before and during the Easter recess.

I have stressed with them the privilege of being an American.

I have emphasized the necessity of being alert so that we don't ever become so complacent that we risk another Pearl Harbor.

Investing in America means, too, for each one of us, young and old, to recognize that this is a changing, not a static, country in a changing, not a static, world. It is up to us to make those changes constructive.

Yes, my friends, we have a great job to do, and, like Nehemiah, we have to be about our Father's business.

I believe that, like the prophets of old, we cannot let the enticements or the threats of our Nation's enemies divert us from the basic job.

May we respond as Nehemiah did, "I am doing a great work; I cannot come down."

May each of us continue to advance the business which is every American's business, the business of protecting and advancing this Republic.

BUILDING THE "CATHEDRAL" OF AMERICA

I would like to conclude, my friends, by recalling the story of the workmen who, under Sir Christopher Wren's direction, were building St. Paul's Cathedral. They were asked, "What are you doing?" One workman said, "I am laying brick." Another workman said, "Oh, I am mixing mortar." But the third one replied, his eyes looking up on high, "I am helping Sir Christopher Wren build a cathedral." That is what we will all be doing when we truly invest in America—building and maintaining a great edifice—this Republic.

Monopoly in the Meatpacking Industry

EXTENSION OF REMARKS

OF

HON. JOSEPH C. O'MAHONEY

OF WYOMING

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. O'MAHONEY. Mr. President, Hon. EMANUEL CELLER, chairman of the House Committee on the Judiciary, testified this morning before the Senate Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary, in favor of Senate bill 1356, which has been introduced by the distinguished senior Senator from Utah [Mr. WATKINS] and myself, to restore to the Federal Trade Commission the power of enforcement of the antitrust provisions of the Packers and Stockyards Act.

This measure is of great importance. While it deals partially with meat, it deals also with all sorts of food products and nonfood products.

Thirty-five years ago there was discovered in the United States, by reason of an investigation by the Federal Trade Commission, an amazing concentration of economic power in the hands of five meat-packing companies. So revealing

and so emphatic was the story disclosed by the Federal Trade Commission investigation that the Department of Justice brought suit against the five big packers under the Sherman Act. The packers, the defendants, instead of fighting the suit, gave their consent to the entry of a decree. One of the purposes of the decree was to divest the packers of their ownership and operation of the stockyards of America. Another objective was to divest them of the power of dealing in nonfood items, such as groceries and milk, and also of the operation of retail grocery stores. Such operations were then regarded by the courts, as they are now prohibited by the Sherman Act, as a concentration of economic power against the public interest.

The measure which has been introduced in the Senate merely restores to the Federal Trade Commission the power to enforce those provisions of the Trade Commission Act, the Clayton Act, and the Packers and Stockyards Act.

The statement of Representative CELLER was so persuasive, so effective, and so simple to understand that I ask unanimous consent that it may be printed in the Appendix of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY REPRESENTATIVE EMANUEL CELLER, CHAIRMAN OF THE COMMITTEE ON THE JUDICIARY, HOUSE OF REPRESENTATIVES, BEFORE THE SENATE JUDICIARY ANTITRUST AND MONOPOLY SUBCOMMITTEE IN FAVOR OF S. 1356

I welcome the opportunity of appearing before this distinguished committee to urge prompt and favorable consideration of S. 1356, jointly sponsored by Senators O'MAHONEY and WATKINS. Identical bills [1] were introduced in the House by Representatives DIXON, BERRY, METCALF, and myself. The bipartisan sponsorship of these bills in both Houses of Congress bespeaks their nonpartisan character and highlights the urgency of their enactment in the public interest.

Prompt adoption by Congress of this legislation is needed in order to restore Federal supervision over monopolistic practices resulting from unfair methods of competition in the meatpacking industry. The meatpacking industry, although the third largest in the United States, is today the only industrial group which effectively escapes such supervision by a Federal administrative agency.

Beyond that, a recent decisional trend, which I shall discuss, highlights existence of a statutory loophole through which certain grocery chains and other major elements of the food industry can likewise escape—and are escaping—Federal supervision of practices destructive of antitrust principles, by the simple expedient of acquiring a minority interest in a packing plant.

This situation, which bids fair to exempt certain monopolistic practices in the retail as well as the wholesale food industry from effective Federal supervision, results from the Packers and Stockyards Act of 1921.[2] That act removed supervision over anticompetitive trade practices of meatpackers from the Federal Trade Commission—an agency principally concerned with implementation of Federal antitrust policies. Instead, it placed this responsibility in the Secretary of Agriculture, an official whose multifarious duties are unrelated to antitrust enforcement, who has never been either equipped or motivated to supervise restrictive competitive practices, and who has not supervised them.

To correct this situation, the bill under consideration by this committee does two things: (1) It removes from the Secretary of Agriculture responsibility for preventing unfair methods of competition and other monopolistic practices in the meat-packing industry, and (2) it returns such responsibility to the Federal Trade Commission.

My plan this morning, Mr. Chairman, and members of the committee, is to discuss three general propositions:

First, that in enacting the Packers and Stockyards Act of 1921, Congress intended to subject unfair methods of competition and other practices inconsistent with antitrust principles in the meat-packing industry to more stringent, rather than less stringent Federal supervision;

Second, that in the past 36 years the Secretary of Agriculture has failed almost completely to enforce provisions of the Packers and Stockyards Act dealing with anticompetitive practices by packers, thereby affording the meat-packing industry what amounts to an exemption from such provisions; and

Third, that recent legal moves of the large packers, coupled with widespread entrance of grocery and market chains into the packing business, combine to create a situation in which effective antitrust enforcement and effective prevention of monopolistic practices in the food industry, as evisaged in the pending bill, become more than ever vital in the public interest.

HISTORY OF THE PACKERS AND STOCKYARDS ACT OF 1921

Turning first to the history of the enactment of the Packers and Stockyards Act of 1921, it is manifest that Congress did not intend to create the present supervisory vacuum in favor of packers and allied interests. On the contrary, Congress acted under the spur of then recent disclosures of widespread monopolistic trade and pricing practices on the part of dominant elements in the meat-packing industry and intended to subject the industry as a whole to more rigorous supervision.

Even before World War I there was widespread public concern over the Nation's system of food production and distribution, and particularly as to whether combinations and restrictive practices in this area were leading to unduly high prices. This concern increased with wartime shortages and attendant higher prices. In 1916 an unsuccessful attempt was made in Congress to order an investigation of the Big Five packers (Swift, Armour, Wilson, Cudahy, and Morris), and in 1917 President Wilson ordered the Federal Trade Commission to institute such an investigation. After a 2-year study the Commission issued a 6-volume report, finding that the Big Five had been and were using their vast power illegally to manipulate markets, restrict food supplies, control prices, defraud producers and consumers, crush effective competition, secure special privileges, and profiteer.

In 1920, as a result of this report, the Attorney General filed antitrust suits against the Big Five under the Sherman Act and the Clayton Act.[3] The complaints charged the defendants with having combined to restrain trade and to suppress competition in the purchase of livestock and the sale of dressed meats, by purchasing stock in competitive companies and in public stockyards, and by acquiring and operating retail meat markets, stockyard terminal railroads, and market newspapers. The defendants were further charged with attempting to dominate trade in products not related to the meatpacking business.

The case was never tried. The packers entered into a consent decree enjoining the further operation of the alleged combination and prohibiting the packers, among other things, from holding stock in public stockyard companies, public cold-storage plants, stockyard-terminal railroads, or market newspapers. The decree also forbade the defendants to handle or deal in commodities not related to the meatpacking business or to sell meats, fresh milk, or ice cream at retail.

It was in this climate that Congress, which had been engaged in virtually continuous consideration of packer legislation since 1918,[4] debated the packers and stockyards bill of 1921. As reported to the House by a unanimous Committee on Agriculture, and as later enacted with minor amendments, the bill contained two largely separate legislative patterns.

Title III dealt with stockyards and transactions taking place in stockyards. In addition to making it unlawful for stockyard owners, market agencies and dealers to engage in unfair and deceptive practices (sec. 312), this title provide detailed regulation of stockyards modeled on the provisions of the Interstate Commerce Act. "The procedure and language," the committee reported concerning title III, "are modeled very closely on the Interstate Commerce Act, and the Secretary of Agriculture is given substantially the same jurisdiction over stockyard matters which the Interstate Commerce Commission has over railroads, including the power, after full hearing, to establish and enforce just and reasonable rates and charges for, and practices in connection with, the furnishing of stockyard services." [5]

Title II, on the other hand, dealt exclusively with packers, as broadly defined by the act, and prohibited them from engaging in specified anti-competitive practices. Practices so prohibited closely paralleled conduct condemned by the Federal Trade Commission and conduct enjoined by the consent decree of 1920. Responsibility for investigating and preventing such practices by packers was taken away from the Federal Trade Commission and transferred to the Secretary of Agriculture. According to the House committee report, this was done in order to prevent "overlapping of authority and duplication of jurisdiction of other departments of government." [6] Enlarging on this in debate, a member of the committee told the House:

"While there was a difference of opinion among members of the committee as to the most satisfactory and most effective place to lodge the supervisory authority, some favoring the Secretary of Agriculture, some favoring the Federal Trade Commission, others favoring a special commission, and a majority favoring the Secretary of Agriculture, the Secretary of Agriculture was finally agreed upon mainly because of the fact that the Department now has in the Bureau of Markets, the Bureau of Animal Industry, and the Pure Food Inspection Department scores of employees on the ground at the several market centers who can be of material assistance to the Secretary in gathering the information needed to insure intelligent action by him in exercising his supervisory relationship. In other words it is the thought of the committee that the lodging of the supervisory power with the Secretary of Agriculture will make for both economy and efficiency." [7]

Among additional reasons advanced for placing this function in the Department of Agriculture (and now advanced for keeping it there) were that the size and importance of the meat industry warranted establishment of a single specialized agency; that the

Footnotes at end of speech.

Footnotes at end of speech.

Footnotes at end of speech.

Federal Trade Commission lacked power or experience to regulate stockyards; and that to give the Federal Trade Commission and the Department of Agriculture powers in the same area of industrial activity would make for overlapping of jurisdiction and confusion.

On the other hand, it has been contended that it was the meatpacking industry that prevailed upon Congress to displace the Federal Trade Commission because of industry resentment of the Commission's report on the Big Five packers. Remarks of Senator Norris, chairman of the Senate Agricultural Committee, who opposed the shift, reflected this view. He said:

"The Federal Trade Commission which investigated the packers, Mr. President, was put on the rack, and every big business—not the packers alone, but every other big business, and every allied financial industry—jumped onto the Federal Trade Commission. They started a propaganda over this country, that has never before been equaled in any similar transaction, condemning the Federal Trade Commission. They did not come forth and deny that what the Trade Commission said was true, but they condemned the Federal Trade Commission for giving the information to the people. The people were startled when the conditions were given publicity."[8]

Regardless of the factors that may have contributed to the end result, there is no shred of evidence that Congress intended to exempt the packers from accountability for trade practices contrary to antitrust principles. Chairman Haugen, reporting for the House Committee on Agriculture stated:

"A careful study of the bill will, I am sure, convince one that it, and existing laws, give the Secretary of Agriculture complete inquisitorial, visitorial, supervisory, and regulatory power over the packers, stockyards, and all activities connected therewith; that it is a most comprehensive measure and extends further than any previous law in the regulation of private business, in time of peace, except possibly the Interstate Commerce Act."[9]

INABILITY AND FAILURE OF THE SECRETARY OF AGRICULTURE TO SUPERVISE TRADE PRACTICES OF THE MEAT PACKERS

The defect of the Packers and Stockyards Act does not lie in any lack of legal authority. The point is that the act cannot be properly enforced by the Secretary of Agriculture. It is clear that the fundamental defect of the present statutory mechanism lies in the impracticality of placing antitrust supervisory and enforcement responsibility in the Department of Agriculture—an agency that has neither the experience, the staff, nor the incentive to exercise responsibility in matters of this kind.

The past 36 years have demonstrated beyond peradventure of doubt that the experience of the Department of Agriculture in marketing, animal industry, and pure food inspection, together with its functions of regulating stockyards, have not qualified it for exercising scrutiny over monopolistic practices of meat packers resulting from unfair methods of competition.

Moreover, the result of giving the Secretary of Agriculture antitrust enforcement responsibility is that there has been a singular paucity of cease and desist orders issued against packers under title II in the past 36 years.[10] Thus, for all practical purposes there has been created a supervisory vacuum for which not only packers qualify, but also other enterprises seeking immunity from enforcement can qualify, by donning the broad definitional habiliments of a packer.

I do not believe that Congress can continue to condone a statutory situation which has removed a segment of antitrust enforcement from an expert investigative agency—the very agency whose exhaustive investigation of the meat packing industry disclosed the need for additional, corrective legislation—and placed such authority in an agency whose experience and interest lie in other areas.

This February, in a move described in the Wall Street Journal as "obviously designed to head off current proposals to transfer antitrust jurisdiction over packers to the FTC,"[11] the Secretary of Agriculture ordered a survey of the Department's activities and problems relating to trade practices of packers. That survey, which was released on April 4, so candidly acknowledges the facts in respect to nonenforcement that it is difficult to understand why the Department would oppose, as it apparently does, the transfer of this function to an agency qualified for antitrust investigation and enforcement.[12]

According to the Department's survey,[13] the Packers and Stockyards Act is currently administered by the Packers and Stockyards Branch of the Livestock Division of the Agricultural Marketing Service of the Department; in other words, in a branch three echelons removed from the secretarial level. The appropriations and staffing history of the branch speak eloquently of the lowly place it and its work have been accorded. Its organization was built up on the basis of 260 positions in 1923, a number stated to be sufficient not only for regulation of the stockyards but also for a substantial volume of investigative activities. However, this was cut to 130 positions in 1925, and has thereafter hovered around 100. Today the branch has 93 full-time and 5 part-time employees.

Eliminating the administrative chief and 24 full-time and 5 part-time clerical employees leaves the administration of the act to 7 Washington and 61 field specialists. This group of 68 (which includes 4 valuation engineers and 3 scale and weighing specialists) has basic responsibility for a staggering volume of duties.[13]

These duties include regulation of 375 livestock markets and 64 terminal markets posted under the act, a total expected to reach 500 during the current fiscal year. They include regulation and/or supervision of 1,300 livestock commission firms and about 2,000 livestock dealers. They include the supervision of 1,300 poultry dealers, agents and handlers, under title V of the act, added in 1935. They include the periodic testing of 2,000 scales.

Beyond this, there are 2,000 packers and 2,600 buyers who purchase for these packers that are supervised under the act, and whose trade and pricing practices are the subject of the pending bill. Included among these packers, moreover, are 14 chain stores, of which 6 have almost 11,000 retail stores. To handle this load and also unfair practices of stockyards under title III, there has been established a trade-practices section in the Packers and Stockyards Branch. This trade-practices section comprises—let me emphasize—2 market specialists and 1 stenographer.

The Department of Agriculture survey concedes that because of inadequate appropriations and a determination to make "the most effective use of rather limited funds,"[14] administration of the act has, over the years, concentrated upon regulation of stockyards and of practices there occurring. It states, however, that the last few years have seen a change of emphasis. It points to the fact that there are now pending 17 investigations (of a total of 46) that deal with meat packer trade practices, including "some that originated as far back as 2 years ago and are at or near the stage of formal charges."[15] Based on the record there is little likelihood that trade practice enforcement dealing with packers will ever occupy a prominent place in the work of the Department of Agriculture. It must be recognized that the Packers and Stockyards Branch is only a small part of the departmental organization, its total budget a trifling part of the departmental budget, and supervision of packers' restrictive practices is only a minor part of the duties and responsibilities of the Branch under the act.

It is clear that the Department has consistently for more than 30 years, assigned little importance, if any, to the duty of enforcing vital antitrust provisions. The departmental survey stresses the fact that in fiscal 1956 a total of 1,704 scales were tested; that review of stockyard rates and charges saved shippers $482,000, and that investigation of an individual market stopped losses of $750,000 per year in fraudulent weight of hogs. These are functions for which the Packers and Stockyards Branch is qualified. Its efforts in this area should not be diluted by the addition of antitrust functions with which it has never been familiar. As the Department's survey states:

"Most of the cases under the act do not involve broad economic problems but are local in nature and effect and do not require long involved studies or large numbers of personnel. Investigations of alleged monopolistic practices, however, do become more involved and may require studies over an extended length of time by quite a number of personnel and entail a great deal of work by Department of Agriculture attorneys."[16]

Mr. Chairman, the Department of Agriculture should receive adequate appropriations for those functions which its Packers and Stockyards Branch is qualified to perform. Antitrust functions, however, should be promptly returned to the agency whose specialty they are. I shall quote, if I may, from the statement I made in February, when I introduced H. R. 5282. I then said: "The Secretary of Agriculture has indicated that next year he will ask Congress for an appropriation for this purpose. But even should the Department obtain necessary funds, it would be far more costly to set up a separate enforcement agency in the Department than to use the existing enforcement facilities of the Federal Trade Commission. These considerations are particularly important in light of the fact that the Federal Trade Commission has been established precisely to enforce provisions of law dealing with unfair methods of competition.

"Furthermore, it has been estimated that minimum unfair trade practice enforcement by the Department of Agriculture under the Packers and Stockyards Act would require an additional staff of 60 full-time employees. On the other hand, the Federal Trade Commission could absorb such enforcement activity with its present staff.

"In recent years the Department of Agriculture has relegated the Packers and Stockyards Branch to a Commodity Division in the agricultural service. Principal functions of this division are marketing news services and Federal meat grading—both of which depend on packer cooperation for their success. In these circumstances it is hardly to be expected that this division could, in any event, adequately enforce provisions of antitrust laws."

RECENT DEVELOPMENTS RENDERING ACTION URGENT

My final point, Mr. Chairman, involves certain recent legal and economic developments that render the effective prevention of monopolistic practices in the food industry more important than ever before.

The first of these is the motion filed late last year by three of the defendants in the

Footnotes at end of speech.

Footnotes at end of speech.

Footnotes at end of speech.

1920 antitrust suit for relaxation of the terms of the consent decree entered against them in that year. The packers contend that circumstances have changed to such an extent as to entitle them to relief. Specifically, they ask to be relieved of the injunction against entering the business of dealing in meat at retail and in nonmeat foods. Their objective is said to be to enter the supermarket field. I do not propose to discuss the merits of this motion, which was addressed to the Federal district court. I do believe, however, that if the court should find merit in the motion and should grant it, entry of the packers into the nonmeat food industry and the retail meat industry will give added reason for making sure that a competent agency shall be in the position to supervise the trade and pricing practices of the parties.

The other facet of this problem arises from the fact, as asserted by the packers and the Department of Agriculture survey, that food chains have extensively entered the field of meatpacking. In this connection, the definition of what constitutes a "packer" under the Packers and Stockyards Act creates a number of problems of statutory coverage, as between the jurisdiction of the Federal Trade Commission and the Secretary of Agriculture. The act defines the term "packer" so that it not only includes any person engaged in the business of (a) buying livestock in commerce for purposes of slaughter or (b) manufacturing or preparing meats or meat food products for sale or shipment in commerce, but also includes interests in food markets controlled by persons in either such category, as well as any person who owns as much as 20 percent of the control of an enterprise in either of the stated categories (a or b), and as much as 20 percent of the control of a food market.

Several decisions involving this broad definition of "packer" give cause for concern. The committee is doubtless familiar with the 1940 case of *United Corporation* v. *Federal Trade Commission*,[18] in which the fourth circuit held that by purchasing stock in corporate packers after the FTC had filed a complaint against it, the corporate respondent, engaged in the marketing of canned meat, had successfully become a "packer," thereby ousting the FTC of jurisdiction to make an order requiring it to cease and desist from misrepresentation and false and misleading advertising.

More recently, on April 11, 1957, a hearing examiner for the Federal Trade Commission issued a ruling that underscores the urgency of closing the loophole in the Federal Trade Commission Act that was created by the meat packers' exemption. In the Food Fair Stores case,[19] the Commission's examiner ruled that Food Fair's ownership and operation of a meat packing plant ousted the Federal Trade Commission from jurisdiction over respondent's practices in allegedly inducing and receiving unfair and discriminatory allowances in violation of section 2 (d) of the Robinson-Patman amendment to the Clayton Act. These practices were totally unrelated to the distribution of meats or meat products. However, by investing $2,700,000 in a meat packing plant, Food Fair has been able to remove FTC surveillance over the business of a supermarket grocery chain of 238 stores with gross sales of $475 million annually. This is clearly a case where the tail wags the dog. Unless the FTC overrules its examiner, his decision leads to absurd results. His opinion indicates his belief that Congress intended "to have the Secretary of Agriculture regulate all phases of any business in whatever primary field, connected in any way, or operating to any degree in meat packing." Under this view, any company no matter what its primary line, can oust the FTC of jurisdiction over its activities by making a minimal investment in a meat packing operation.

I hope that the hearing examiner ultimately is found to be in error. The fact that there is support for his interpretation of the packers' exemption, however, emphasizes the need for Congress to clarify this situation and to reestablish the jurisdiction of the Federal Trade Commission over the activities of meatpackers.

The packers' exemption has beshrouded other aspects of the Federal Trade Commission's jurisdiction with ambiguity. In the case of Armour & Co.,[20] for example, the Commission's examiner dismissed a complaint of false advertising under the so-called oleomargarine amendment to the Federal Trade Commission Act[21] on the ground that Armour is a packer and therefore not within the Commission's jurisdiction. The Commission upheld its examiner. When similar charges were entertained by the Commission against the Blanton Co.,[22] which is not a packer, that company appealed to the eighth circuit, contending that this amendment is unconstitutional because it does not apply equally to competitors who are not packers.

Passage of the bill under consideration to restore to the Federal Trade Commission jurisdiction over packers is essential in the interest of antitrust enforcement. Conversely, failure of Congress to act, coupled with the litigation of legal problems of the kind I have described, will frustrate such enforcement in ever-growing areas for decades to come. This I know this committee will not countenance.

Spring Burgeons Along Park Avenue

EXTENSION OF REMARKS
OF
HON. RICHARD L. NEUBERGER
OF OREGON

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. NEUBERGER. Mr. President, some of us have been working hard during the past 4 or 5 months to establish the principle of protecting our highway roadsides from defacement by signboards. A patriotic and civic-minded resident of New York City, Mrs. Albert D. Lasker, a devoted friend of mine, has shown that even so-called streetsides can be made more beautiful, too. Through the generosity of Mrs. Lasker, plantings have been made along Park Avenue, on Manhattan Island, of daffodils and tulips and other magnificent beds of flowers. These have been contributed in memory of Mrs. Lasker's mother, Mrs. Sara J. Woodard, herself a pioneer conservationist in the field of scenic and outdoor beauty.

So that members of the Senate may know of what has been done by Mrs. Lasker to help add some beauty and sylvan atmosphere to one of the famous streets in the largest city of our country, I ask unanimous consent that a short article from the New York Times of April 26, 1957, be printed in the Appendix of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SPRING BURGEONS ALONG PARK AVENUE

A midtown stretch of Park Avenue is flowering with a mile-long planting of daffodils and tulips. The central islands of every block from 50th Street to 72d have been transformed into garden plots, holding 140,000 plants.

The daffodils, both yellow and cream varieties, began to bloom last Sunday over a ground cover of myrtle; the tulips, some still budding, are of red, pink, white, lavender, and yellow.

Between the traffic lanes the massed fields of flowers make a bright ribbon of color in the shadow of office and apartment buildings. The plantings are a gift to the city from Mrs.

Albert D. Lasker, who thinks New York needs to be more beautiful than it is.

When she proposed the plan horticulturists were doubtful that the plants would survive the city's traffic exhaust, soot, and limited sunshine. A test planting was made last year in two blocks north of 50th and 70th Streets. The flowers surprised everyone by their ability to flourish, Mrs. Lasker said.

She hopes that the success of the gardens will inspire other contributors to provide other seasonal plantings when the tulips and daffodils are gone.

The donor is president of the Albert and Mary Lasker Foundation, which is chiefly concerned with fostering medical research. She has made many gifts of flowering plants to the city since 1943. Her earliest donations were made in memory of her mother, Mrs. Sara J. Woodard, a pioneer park conservationist who founded one of the first public parks in Watertown, Wis.

The plantings were supervised by the department of parks.

Address by George E. Stringfellow Before Kiwanis Club of Scranton, Pa.

EXTENSION OF REMARKS
OF

HON. HARRY FLOOD BYRD

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address entitled, "Are We Spending Our Way To Destruction?" delivered by Mr. George E. Stringfellow, past president of the Kiwanis Club of New York City, and a long time business associate of the late Thomas A. Edison, before the Kiwanis Club of Scranton, Pa., April 24, 1957.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ARE WE SPENDING OUR WAY TO DESTRUCTION?

(Address by George E. Stringfellow, past president of the Kiwanis Club of New York City and long-time business associate of the late Thomas Alva Edison, before the Kiwanis Club of Scranton, Pa., April 24, 1957)

Mr. President, officers, past officers, distinguished guests and members of the Scranton Kiwanis Club, Kiwanis has many fine objectives and it is essential to the preservation of our way of life that we support them with enthusiasm. The Kiwanis objective which I propose to emphasize today is free enterprise.

No one can champion free enterprise without engaging in politics. I am conscious of the fact that many service clubs shy away from the discussion of politics. I hope your club does not fall in that category. I shall emphasize the effect that politics has on free enterprise. I shall speak of politics in the sense defined by Webster as "the science of Government—about which we should all all know more."

Inasmuch as Government affects every phase of our lives, we individually and collectively should take an active part in the science of government. If we would preserve the kind of government our forefathers envisioned, and if we are to implement the underlying principles of Kiwanis, we must discharge our responsibility by taking an active part in directing the affairs of our Government.

High taxes in peacetime are the end result of extravagantly conducted governmental affairs. Confiscatory taxes will destroy initiative and free enterprise and replace our capitalistic system with State socialism, a blood brother of communism.

One hundred and fifty years ago, John Marshall, Chief Justice of the Supreme Court, said, "The power to tax is the power to destroy." Full force of that power is being used today.

Twenty-five years ago the cost of Federal, State, and local governments took 8½ percent of the Nation's income. Today, these 3 segments of Government take 30 percent of the Nation's income. The Federal income tax alone takes from us 20 percent to 91 percent and Federal Government takes from 52 percent to 65 percent of the profits of business concerns.

One hundred and ten years ago, Karl Marx, one of the founders of communism said, "The surest way to destroy the capitalistic system—free enterprise—is through taxation."

Fifty years ago, Nicolai Lenin, that patron saint of communism said, "Sooner or later we hope to force America to spend her way to destruction."

When we compare our present tax rate with that of a quarter of a century ago and our current spending spree, there is little wonder that many Americans are asking, "Are we taxing and spending our way to destruction, as the Communists predicted we would?"

Five years ago, speaking in Paterson, N. J., when our annual Federal tax bill was about $70 billion, candidate Eisenhower said, "I don't know what the amount of taxes represents, when we talk about $70 billion. But I do know this, we can't afford what we are spending and stay strong enough to lead the world to peace." President Eisenhower would now have us believe that if we don't spend at least $72 billion a year we cannot lead the world to peace. What we may ask brought about this rightabout-face on the part of the President? The rightabout-face was probably brought about by the President's palace guards who, for the most part, entertain the Harry Hopkins philosophy of "spend and spend and spend and elect and elect and elect."

I have very serious doubt that the President has learned what $72 billion is. I would, therefore, give him a few examples:

Seventy-two billion dollars would make a stack of 10-dollar bills 410 miles high. This is more than the distance from Scranton, Pa., to Montreal, Canada.

Seventy-two billion dollars would pay the wages of a million factory workers at the present average rate for 17 years.

Seventy-two billion dollars is almost twice as much as the United States Government spent for World War I.

Seventy-two billion dollars represents spending $1.15 per second since the birth of Christ.

In the 3 fiscal years ending June 30 of 1954, 1955, and 1956, the Federal Government, under Eisenhower, spent $193 billion. In the 152 years from George Washington's first inauguration in 1789 to 1940, the Federal Government spent $167 billion. In other words, Eisenhower's administration in 3 years spent $26 billion more than was spent in 152 years.

In a single month in 1956, the Federal Government spent almost twice as much as the total cost of Government during the 4 years of the Civil War.

EISENHOWER BUDGET

President Eisenhower has proposed a budget of approximately $72 billion for the fiscal year beginning July 1. In addition to that he proposes to spend another $14 billion appropriated by previous Congresses.

Eisenhower proposes to spend in 1 peacetime year as much as Franklin D. Roosevelt spent in 9 peacetime years and Roosevelt, I think you will agree, was not noted for his frugality with public funds. As a matter of fact, it must be apparent to anyone who has studied the record that the difference between the New Deal, the Fair Deal, and Modern Republicanism is one of degree—the latter being more expensive than the other two.

The magnitude of Eisenhower's proposed expenses during peacetime years is illustrated by a chart which I shall distribute at the conclusion of my remarks. The data for this chart was supplied by the United States Treasury Department.

The Honorable HARRY FLOOD BYRD, senior United States Senator from Virginia and one of the ablest and one of the most partiotic statesmen in the history of our Republic, recently referred to the proposed Eisenhower budget as a "spending spree which will continue inflation and increase the cost of living." Senator BYRD proposed a reduction in the Eisenhower budget of $6½ billion and has shown how and where the reduction can be made. If Congress reduces the Eisenhower budget, as recommended by Senator BYRD, and I hope it does, it still would be $65,300 million, which is $5½ billion more than Eisenhower recommended in 1952, when he sought the presidency. He said then: "Tax reduction is a way to boost consumer buying and let the people spend their own money instead of the Government spending it for them. Tax reduction is an essential part of our program to achieve prosperity without war."

PRESS CONFERENCE

At a recent press conference the President was told of the growing criticism of his unprecedented peacetime budget. His retort was "This isn't 1890. * * * In this day," he said, "We can't limit ourselves to Government processes that were applicable to 1890. We have got to adapt the great principles of the Constitution to the inescapable industrial and economic conditions of our times." And that, we suppose, in intended to explain everything.

If anyone ventures the simplest suggestion today that all virtues, such as thrift or prudence or self-reliance or local responsibility for local problems might have some virtue as they had in the past—for Government as well as for citizens—the suggestion is dismissed with such phrases as "We can't turn back the clock to McKinley," or "would you go back to the horse and buggy days?" This is intended to be devastating to the one making the suggestion. It is supposed to make him an ignoramus unaware of the march of history and more than likely an enemy of the people because he is opposed to progress. It also marks the defensive spender as a farsighted fellow whose gaze is fixed ahead to 1980. It is a debater's retort that answers nothing. It is intended to throw the subject out of focus and put the critic on the defense.

Such Senators as BRICKER, BRIDGES, BYRD, DIRKSEN, DOUGLAS, GOLDWATER, JENNER, KNOWLAND, LAUSCHE, MARTIN, MUNDT, REVERCOMB, RUSSELL, TALMADGE, and WILLIAMS—who are critical of the Eisenhower budget—are neither unmindful of history nor are they fools. They are men of far more experience and their judgment is unquestionably better than that of the "palace guard" composed of Hoffman, Adams, Stassen, and brother Milton, who have the President's ear.

In October 1932 Calvin Coolidge and Alfred E. Smith issued the following statement: "All the cost of Federal, State, and local government must be reduced without fear and without favor. Unless the people, through unified action, arise and take charge of their government, they will find that their government has taken charge of them."

When these 2 wise and courageous citizens made that statement, almost a quarter of a century ago, Government was taking 8½ per-

cent of the Nation's income. Today it is taking 30 percent.

If you want to reduce the cost of government, you can do it by telling your Congressman and your Senators that they must cut the cost of government or you will remove them from the Government payroll at the next election.

The Government will be as efficient as we demand and as wasteful as we permit. The time has arrived, I think, when we taxpayers, if we are to preserve our way of life, must speak out.

Unless we get control of Government expenses at an early date our whole form of government will be changed from capitalism to some form of state socialism—blood brother to communism.

We can prevent this by protesting to our Congressmen and Senators. They will respond to our demands if we are insistent. Will you make the demand now and thus do your share to preserve our way of life?

A Permanent U. N. Force

EXTENSION OF REMARKS
OF
HON. THRUSTON B. MORTON
OF KENTUCKY
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. MORTON. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a letter which appeared in the New York Herald Tribune.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

A PERMANENT U. N. FORCE

To the New York Herald Tribune:

The committee for collective security urges that the United States seek the establishment of a permanent and effective United Nations security force. This force would be useful in discouraging and preventing aggression, thus inducing peaceful settlement of disputes between member states. The need for and the value of such a force has been clearly demonstrated by the United Nations emergency force in the Middle East.

The establishment of such a force would involve many problems, such as the following:

1. Is the force to be used to stop armed aggression, to stop contraventions of international law, to maintain domestic status quo at the request of a government, to protect United Nations missions abroad, to police disturbed frontiers, plebiscites, areas of international importance?

2. Is the force to be controlled by the Security Council, the General Assembly, the Genral Assembly with a new voting system, or a new body?

3. Is the force to be recruited by national contingents under permanent United Nations command, or individually?

4. How large should the permanent force be and how should it be expanded when the need arises?

5. Who pays the force—national governments paying their own contigents, the United Nations paying the national contingents, or the United Nations paying internationally recruited forces?

6. Should the force be equipped with mass-destruction weapons, conventional weapons, or only small arms?

7. Under what circumstances should the force be used without the consent of the government in whose territory it is to operate?

8. Should the force be stationed in permanent bases which would become United Nations territory, or near trouble spots along disputed frontiers, or on national bases at the pleasure of national governments?

Recognizing the many difficult problems involved, we urge that the United States propose in the United Nations the creation of a commission to explore all phases of this proposal and to report its findings and recommendations to the General Assembly.

GOODHUE LIVINGSTON, Jr.,
Chairman, Policy Committee, Committee for Collective Security.
NEW YORK, April 3, 1957.

Address by George E. Stringfellow at Annual Spring Reunion, Omaha, Nebr., Scottish Rite Bodies of Freemasonry

EXTENSION OF REMARKS
OF
HON. ROMAN L. HRUSKA
OF NEBRASKA
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. HRUSKA. Mr. President, the Omaha, Nebr., Scottish Rite Bodies of Freemasonry held their annual spring reunion last week. On the occasion of their banquet, they were addressed by the Honorable George E. Stringfellow, currently the Imperial Chief Rabban of the Shrine of North America. Mr. Stringfellow's home is in East Orange, N. J. He is senior vice president of Thomas A. Edison Industries of the McGraw Edison Co. He was a daily business associate of Thomas Alva Edison for many years. His achievements in civic and business affairs are extensive and significant. He has become a member of the board of directors of some of the large American corporations. Honors have been bestowed on him by institutions of culture and learning. He has given of his time and resources toward goals of better citizenship and a stronger republic.

The title of his address on the occasion referred to was "The Lamp of Liberty." I ask unanimous consent that it be printed in the Appendix of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE LAMP OF LIBERTY

(Address by George E. Stringfellow, Imperial Chief Rabgan, A. A. O. M. S., before the spring reunion banquet of the Scottish Rite Bodies of Omaha, Nebr., April 25, 1957)

Mr. Chairman, distinguished guests, friends, I am grateful to you for the warmth of your reception and for the privilege of addressing this audience of eminent Masons.

The spirit of friendship which is so much in evidence gives tangible meaning to the philosophy in which we Masons—and Shriners—believe: The brotherhood of man, and the fatherhood of God.

This belief in the existence of the Great Architect of the Universe, together with our love of country, our native sense of service to our fellow man, and our fundamental antipathy to tyranny, impels us to do all we can to preserve our way of life, which to a large extent, was conceived and implemented by our Masonic forefathers. We Masons, therefore, in my opinion, have a greater responsibility to keey "The lamp of liberty" burning in America than any other group of citizens.

We were fortunate in the early days of our history to have in our colonies a small group of leaders whose like had not been seen before or since. We who love our country are justly thrilled by the courage of our forefathers. They had granite in their character and iron in their backbone.

Individual enterprise, courage, daring and incentive were the order of the day. Social security was not emphasized. Individual freedom was more important. Patrick Henry's declaration "Give me liberty or give me death" represented the sentiment of our founding fathers. Their ideals were high, and from those ideals they fashioned and bequeathed to us in our constitution what Gladstone termed: "The greatest document ever stricken off in a given time by the brain and purpose of man."

Under our form of government we have made more progress in 170 years than people under other forms of government have made in 6,000 years. We have built on this continent a civilization which for prestige, power, and wealth has no equal in the annals of history.

It is true that our country has enjoyed a great physical heritage. Resources of mine and soil, water, field and forest have been given to us in prodigious abundance. However, other countries have been endowed with natural resources more richly than ours. It is, therefore, something more than material assets that accounts for our phenomenal progress. Of greater importance is the character of our people and the pattern of our Government.

In spite of all this, within recent years our country, our form of government, and our way of life have been subjected to severe and unwarranted criticism, largely from two sources:

1. The fuzzy-minded, egg-headed, self-styled liberals, and

2. The Communists and fellow travelers.

Of the two, I believe the self-styled liberals are the more dangerous because they aren't always recognized for what they are.

In a recent ceremony, when he received the 1956 award of the Freedom Foundation, J. Edgar Hoover, who, as director of the Federal Bureau of Investigation, is in a position to know what he is talking about, asserted: "Pseudo-liberals, as self-styled social reformers have become the ready tools of the Communist conspiracy in this country." They have increasingly conceived committees in the name of defending every freedom, but none to uphold authority.

The time has come for loyal Americans to stand up to our detractors.

The time has come for us to treat the Communist apparatus for what is it—a conspiracy to destroy America. We must not be deceived by the pseudo-liberals who assert that the Communists are not dangerous, and if left alone, will do us no harm. Don't you believe it. Their methods are devious, but their intent is unfaltering. They sometimes work under the principle of Roman Gen. Quintus Fabius, who said, "When your enemy is too large to defeat outright, lure him to battle, in small sectors and defeat him bit by bit."

Too many of our unthinking people have been lured by this strategy in the effort to take from us our freedoms in exchange for a totalitarian philosophy.

Whether we call it communism, socialism, welfare state, or liberalism, the objective is the same—to destroy individual enterprise and individual liberty.

England is a tragic example of what can happen. Socialism has been the rainbow with its elusive pot of gold, capturing the hearts of the English people.

Major services have been socialized, among them socialized medicine, about which there is misgiving and much regret.

The result is that personal wealth is just about gone. Only a mere handful of large estates remain. There is no one left to tax but the average man.

This same process of creeping socialism has been taking place in the United States

since 1933. Our Federal Government grows larger, more powerful and more costly.

Public housing, Government-owned utilities and power, Government control of transportation and commerce, Government control of money, credit, banking and business are self-evident facts.

In many quarters there is a demand for Federal aid to public education. This of course means Federal control of public schools. It is to be expected that if the Federal Government pays the bill, the Federal Government will make the rules. The strongest medium for promoting democracy at its grassroots would thus be controlled by means of Federal subsidizing.

Socialized medicine is being widely promoted. You can be certain that it would be tied up with redtape, regulations, and prohibitions.

All benefits are born from the noblest of motives. That's why so many people are deluded into accepting them. However, they don't read the fine print to see what final payment—both in terms of liberty and taxation—will be demanded of them.

All this is being done in the name of the common or average man. The cry is "Equality for all." But, there is something fallacious in the notion that everybody must be equal—that everybody must have approximately the same income, the same purchasing power, the same quality of car, home, and external circumstances, regardless of his creative ability or his productivity. There is no equality among men. The Socialist seeks to push all men down to a common level, but God does not give men equal endowment, nor does he make two alike.

In the parable of the talents—Matthew 25: 14–30—we are told in graphic and striking words how men were rewarded in accordance with their productivity.

The parable can be interpreted to mean that Jesus was talking about God and his children. The gifts to the three servants were not equal, as God's gifts to men are not equal. Each servant was free to choose and act according to his own wisdom and he was rewarded accordingly.

Men grow best when they are free from restraints, free to make their own decisions, free to work out their own problems, and free to accept responsibility for their own lives.

It is what we do with the opportunity given us that affords our spiritual development.

What we must safeguard today are the principles of government that provide us with the opportunity to develop, each in his own way, the spiritual and material gifts with which we are endowed.

We can preserve the way of life which has given us individual freedom, material success, and security, by exemplifying the courage, the daring, and independence of our forefathers.

If we Masons fulfill our threefold responsibility (1) to God, (2) to country, and (3) to our fellow man, we will keep the "lamp of liberty" burning in America.

Death of Dr. Claude B. Lewis

EXTENSION OF REMARKS

OF

HON. EDWARD J. THYE

OF MINNESOTA

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. THYE. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "Death of a Doctor," published in the Minneapolis Star of April 23, 1957; also an article entitled "Dr. C. B. Lewis Dies; Brother of Novelist," published in the Minneapolis Star of April 22, 1957; and an article entitled "Dr. C. B. Lewis, St. Cloud, Dies," published in the St. Paul Pioneer-Press of April 22, 1957.

There being no objection, the editorial and articles were ordered to be printed in the RECORD, as follows:

[From the Minneapolis Star of April 23, 1957]

DEATH OF A DOCTOR

Dr. Claude B. Lewis, of St. Cloud, brother of novelist Sinclair Lewis, was a beloved physician and surgeon of central Minnesota—the kind of oldfashioned country doctor who, when times were rough back in the 30's, was willing to take a sack of potatoes or a crock of butter as payment on a medical bill. Many people in Stearns and surrounding counties mourn his passing.

Although his more famous brother won the Nobel Prize and international renown, the country doctor never was overawed. Sinclair once confessed that his ambition was to "impress Claude." But men who stay home and work at the grassroots often are hard to impress. Dr. Lewis' main interest was his country practice. Literary salons and coteries were not for him.

Now that he is gone, thousands of Minnesotans will remember his kindness and gentleness—and his great devotion to the sick and suffering—as among the real blessings of their lives. And perhaps this is a better kind of fame than even the Nobel Prize.

[From the Minneapolis Star of April 22, 1957]

DR. C. B. LEWIS DIES; BROTHER OF NOVELIST

ST. CLOUD, MINN.—Dr. Claude B. Lewis, brother of novelist Sinclair Lewis, died Saturday at the age of 78. He had been a physician and surgeon here for 52 years.

He was the last of the 3 sons of Dr. Edwin J. Lewis, the Sauk Centre, Minn., country doctor, who probably was the model for Dr. Kennicott in "Main Street." Fred, the oldest, a miller, died in Sauk Centre in 1944. Sinclair, the youngest, died in Italy in 1951.

Funeral services will be 2 p. m., Wednesday, at First Presbyterian Church with burial in North Star Cemetery, St. Cloud. The family prefers memorials to First Presbyterian Church, or St. Cloud Hospital.

Dr. Claude Lewis had the same fiery red hair and the same colorful—if more restrained—way of expressing himself as the novelist.

Sinclair never failed to send the doctor autographed copies of his books but the doctor often didn't have time to read them, according to a daughter, Mrs. Robert Agrell, Excelsior.

"He didn't like novels," she said. "He liked detective stories and stories of adventure and exploration. But he secretly was very proud of Uncle Hal." (Sinclair, also known as Harry or Hal.)

Of Lewis' novels, Dr. Lewis said: "Some I liked very much. In others I thought he was a little long-winded."

During his years in St. Cloud, the doctor became known throughout central Minnesota for his reputation as a surgeon.

He was instrumental in establishing the first school of nursing at St. Raphael's Hospital, forerunner of the present St. Cloud Hospital.

He also planned the purchase of modern equipment and set up the system of records still in use.

Dr. Lewis once told friends that, like his father, he loved his country practice because he "liked to take care of people who were really sick, who really needed me."

He loved the country, too, and at one time owned several farms near St. Cloud. Dressed in dungarees and with a cigar between his teeth, he would spend weekends tramping through the fields, discussing the management of the farms with his tenant farmers.

His cheerfulness and gentleness in dealing with his patients endeared him to the nuns, members of the Order of St. Benedict, who operate the St. Cloud Hospital.

And Dr. Lewis, a Presbyterian, spent his last weeks, in one of the "bishop's rooms" at the hospital. There the nuns would drop in one by one to say, "We're praying for you, doctor."

Dr. Lewis was born in Ironton, Wis., September 17, 1878. When he was 5, the family moved to Sauk Centre. His mother, Emma Kermott Lewis, died in 1891 and 2 years later, his father married Isabel Warner, who was as redheaded as her stepsons.

Dr. Lewis graduated from high school in Sauk Centre in 1895, taught school a year, then entered University of Minnesota and graduated in 1900. He entered Rush Medical College, Chicago, where his father also had studied medicine, and graduated in 1903.

After serving a year of internship at Augustana Hospital, Chicago, he came to St. Cloud in 1905 to begin practice.

He was a charter member and a former president of the St. Cloud Kiwanis Club. He belonged to the First Presbyterian Church and to the Minnesota State Medical Association and the American Medical Association. He was a member of the State organization's Fifty-Year Club.

He is survived by his wife, Helen A., whom he married in 1950; a son, Freeman, Glen Head, Long Island, N. Y., executive vice president of pocketbooks for Simon & Schuster, New York publishers; two daughters, Isabel (Mrs. Agrell) and Virginia, an interior decorator in San Francisco, Calif. There are six grandchildren.

[From St. Paul Pioneer-Press of April 22, 1957]

DR. C. B. LEWIS, ST. CLOUD, DIES

ST. CLOUD, MINN.—Dr. C. B. Lewis, 78, longtime head surgeon at St. Cloud Hospital and brother of the late author, Sinclair Lewis, died Saturday night after an extended illness.

Dr. Lewis came to the hospital here in 1905 after finishing medical school at Rush Medical College in Chicago, where he also interned. On his retirement in 1950 he was named to the honorary staff of the hospital.

Sinclair Lewis, who made his hometown of Sauk Centre, Minn., famous in his novel, Main Street, died in 1950, a year after he and Dr. Lewis had made a European tour together. A third brother, Fred, died several years ago.

Surviving Dr. Lewis are his widow, the former Helen Lindberg Deboll; a son, Freeman, of New York; and two daughters, Virginia Lewis, of San Francisco, and Mrs. Robert Isabel Agrell, of Excelsior, Minn.

Labor Union Regulation and Curbing Union Abuses

EXTENSION OF REMARKS

OF

HON. IRVING M. IVES

OF NEW YORK

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. IVES. Mr. President, there appeared in the April 25 and 26 issues of the New York Times editorials entitled

"Curbing Union Abuses" and "Labor Union Regulation."

These editorials are so comprehensive and depict such a complete grasp of the present labor-management situation, where racketeering and other abuses are involved, that they should be read by all who are interested in this very critical and dangerous domestic problem.

I ask unanimous consent that the editorials be printed in the Appendix of the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times of April 25, 1957]

CURBING UNION ABUSES

Organized labor in the United States faces a hostile public opinion much like the anti-business sentiment of 50 years ago. Another parallel is sure to follow: the regulation of unions by the Government. Sporadic cases of labor racketeering and corruption, many involving collusion by employers, have been of growing concern to the public, but the revelation of teamster misdeeds by the McClellan committee has raised the blood pressure of the entire Nation. As the committee penetrates other areas of this miasma the demand for its eradication will increase. And along with proposals that are in the legitimate interest of labor and the public will be many which are clearly neither. The time has come for the public to ponder both on what should be done and what should not be done.

It is well to keep in mind that, as with business in the past, the well-advertised misdeeds of the few are not an indictment of the many. The reckless misuse of union funds by teamster officials emphasizes by comparison the meticulous care with which other union treasuries are guarded, in the garment-trades unions, for example. And the AFL-CIO should receive unstinted praise for its determination to root out abuses and establish standards of good conduct for its affiliated unions.

Several areas of union operations should be clearly differentiated, both as to existing Government regulations and what further controls are needed. Welfare funds have been most in the public eye. But the McClellan committee exposures have now spotlighted union treasuries; the operating funds that come from members' dues. Then there is the field of internal-union government; how officers are elected, basic decisions made, etc. And finally there is the legal status of unions and of their operations in general.

The case for greater regulation in financial matters is much the clearest cut, where union officers are trustees for the contributions of the rank and file. Complete disclosure of welfare-fund operations is an absolute must, and either the Douglas or the Ives bill to compel this—both bills are now before Congress—should be passed. The Taft-Hartley law already requires financial reports to the Secretary of Labor for a union's accreditation by the National Labor Relations Board. It also calls for full information about union internal procedures.

The Taft-Hartley requirements, however, have obviously had no effect in the restraint of even the grossest abuses. Clearly, the disclosures should be fuller, and given a wider circulation, than either of the bills before Congress or the Taft-Hartley law prescribes. And, even then, will not direct Government controls be called for, such as clearly defined standards for union financial operations, with the power to enforce them, and some legal guaranties of democratic union government?

But measures beyond these are open to serious doubt. Opponents of organized labor, and those fearful of its strength, are using the McClellan committee revelations as arguments for more drastic limitations. For example, pressures are rising for a Federal law against the union shop, for the application of the antitrust laws to labor organization, and for a bar to industrywide union-management agreements.

President Eisenhower is now publicly committed to propose a program of legislation to curb improper union practices, which he has asked Secretary of Labor Mitchell to discuss with him today. Mr. Mitchell's known opposition to "right to work" laws and to subjecting unions to antitrust restrictions gives some hint as to his point of view. It is encouraging that he seems to be aware of the danger of too drastic, or purely antiunion legislation.

What is called for, of course, is protection against the abuses that are now being revealed, without weakening free and responsible collective bargaining—one of this Nation's most cherished institutions.

[From the New York Times of April 28, 1957]

LABOR-UNION REGULATION

President Eisenhower's program for laws to curb labor-union abuses, and Secretary Mitchell's comments on it show a commendable determination to deal with this vital problem, yet to proceed with care, taking the most urgent and easiest steps at the start and avoiding wrong directions.

Most timely is the administration's backing, and also that of Senator MCCLELLAN, for legislation such as Senator IVES' bill, now before Congress, requiring Federal registration of all labor pension and welfare funds and permitting public disclosure of their operations—both those to which union members contribute and those solely financed and controlled by the employers. Strong business opposition to the inclusion of employer funds slowed up action on this bill last year. But it is hard to see why the beneficiaries of one should not be as fully protected as those of the other.

The McClellan committee hearings have shown need of the same treatment for labor's operating treasuries. The Taft-Hartley law requires detailed financial reports to the Secretary of Labor from unions as a prerequisite to accreditation by the National Labor Relations Board. But only labor committees of Congress are permitted to inspect them—except that members of a union can see their own organization's report. In the 10 years since the records have been kept there have been only 200 requests for access to any of the 39,000 reports on file.

The President has approved, as he should, a law to make this information open to the public. But why should not all unions be included—not only those accredited by the NLRB—and also those, such as the Western Conference of Teamsters, not parties to collective bargaining at all? And shouldn't the reports of each union be made available to its members?

The administration has in mind a further step: Federal review and audit of union financial operations. This might well lead to another move not included in the program: legal standards of administration and penalties for their violation. Still another subject calls for the President's attention: guaranties of membership control over union elections and major policy decisions. The Taft-Hartley law also requires similar report on union official personnel and their salaries and on governing procedures. But these records, too, are not open to the public. They certainly should be.

Encouraging also is the AFL-CIO's support of the administration program. President Meany says the federation favors even more sweeping legislation on welfare funds and that labor "sees no danger in public disclosure of union financial reports." He adds: "Every union member should get a report of what is being done with his money." Amen.

Address by Hon. Roswell Magill Before Academy of Political Science

EXTENSION OF REMARKS

OF

HON. HARRY FLOOD BYRD

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a speech entitled "Can the Federal Budget Be Reduced?" made by the Honorable Roswell Magill before the Academy of Political Science on April 22, 1957.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

CAN THE FEDERAL BUDGET BE REDUCED?

(Address before the Academy of Political Science on April 22, 1957, by Roswell Magill, partner, Cravath, Swaine & Moore; president, the Tax Foundation; member, board of directors, Academy of Political Science)

The proposed $72 billion Federal budget for 1958 has provoked a storm of citizen interest. Citizens have begun to appreciate that so long as the Federal budget remains high, there is no real chance of Federal tax reduction.

We have painfully learned in our individual experiences during the past 10 years that unbalanced budgets mean not only additions to the enormous Federal debt but also inflation and a dollar gradually diminishing in value. Time was when a penny would buy a newspaper. Now pennies have little use save for sales taxes. Time was when a nickel would buy a subway ride. Now three nickels are required. Now a dime buys the afternoon paper that pennies used to provide. We don't want to produce the time when a dollar bill will be required for that purpose.

There is some evidence that the sheer size of the Federal budget has appalled a good many citizens. Moreover, many of us are troubled to recall that, after the 1952 campaign with its promises of a reduced budget and a smaller Federal Government, the budget really was reduced $10 billion in the course of 2 successive years; but that in the next 3 years it has grown $9 billion (including the new highway program); so we are back where we started. Nor is the growth solely in defense items. Defense expenditures are budgeted to increase $2.7 billion, less than a third of the total rise; other expenditures have increased $6.3 billion, more than twice as much.

Many taxpayers have taken pen in hand (better still, some have used pencils) to write to their Congressmen that they don't like the budget, and want it reduced. Congress has begun to respond to the demands of constituents. At the same time, however, some leaders express doubts whether citizens are really prepared to take less from the United States as the price of paying less in taxes. Is the economy drive really well grounded, not merely in the grassroots, but in the facts of present-day American life?

The fact that the current outcry from citizens is aimed at the proposed Federal budget may have obscured the source of the protest. Some people may in fact feel that the Federal Government already is too large and is spending too much; others may be convinced that loose Federal spending at a time like this can only add to inflationary pressures. Essentially, however, the curernt protest is a protest against high taxes. Too many people are paying too much in taxes, not only at the Federal, but also at the

State and local levels. They had hoped, after the campaign promises of last year, that there would be a substantial tax reduction, at least in Federal taxes, this year.

The proposed budget for fiscal 1958 washed out those hopes for tax cuts. That is why the people protested, and are continuing to do so. That is why these protests have forced the House of Representatives to make substantial reductions in appropriations bills to date. Americans this year are merely exercising the age-old right of civilized people to complain about taxes in the interest of reducing the burden.

Looked at in this light, the current protest does not answer a more fundamental problem involving our entire philosophy of government. Practically, are citizens really prepared to give up some school aid, some farm parity, some foreign aid, in the interest of a smaller expenditure total and thus lower taxes?

Philosophyically, are we now so large a country, with so many people, so much national income, and such worldwide responsibilities, that we must support a vastly expensive Federal Government? On this basis, for example, one commentator, an official under a prior administration, criticizes the currently proposed budget as being much too small. Senator BYRD says the budget is much too high and should be cut $5 billion. Who is right?

What are the facts? The calm and dispassionate atmosphere of an Academy of Political Science meeting ought to be a good spot in which to make the endeavor to separate out a few of the principal threads in a very complicated and tangled web. We can't hope to learn in a few minutes what Senator BYRD, and the Chairman of the Council of Economic Advisers, and Director of the Bureau of the Budget have learned in several lifetimes of study. But we can hope to become moderately well-informed citizens, better able to judge intelligently some of the major issues here involved.

I

First, what is the budget? Who makes it? Who is responsible for it?

The current budget, a volume of 1,249 pages, is the Federal program of expenditures for the fiscal year July 1, 1957, to June 30, 1958; and the official estimate of cash receipts, mostly from taxes, for the same fiscal period. It is prepared by the Bureau of the Budget, an agency in the executive branch of the Government, headed by a director.

President Eisenhower stated in his budget message for 1957: "A budget is not just a book of figures describing fiscal operations—it is a comprehensive plan of action for meeting our national objectives. As such, it affects every phase of the life and activity of the Nation."

Fundamentally, the budget is a cumulative list of all the items of anticipated expenditures for the fiscal year for all the innumerable Government departments, bureaus, and agencies. Some of these items have already been authorized by Congress in past years. Some are logical developments of what has been authorized. Some require new authorization.

In a nutshell, the budget for fiscal 1958, which so many taxpayers are protesting, calls for expenditures of $72 billion in the year beginning July 1. Nearly two-thirds will go for what is called national security spending, and the rest for all other programs.

Even if Congress wants to cut a few billion out of proposed spending, it will have a hard time doing so. The trouble is Congress deals primarily with appropriations, not expenditures. As part of his budget planning, the President has requested Congress to pass some $73 billion in appropriations this year.

Even if Congress refused to pass a single dollar of this $73 billion, the President would still have available for spending some $70 billion from appropriations and authorizations by prior Congresses. And if Congress does give the President all the appropriations he now asks for, he will have available for expenditure on July 1, not the $72 billion he says he plans to spend, but a fabulous total of about $140 billion.

Actually, so far as spending for fiscal 1958 is concerned, about the only way Congress could be sure to cut expenditures would be to pass a measure putting a ceiling on spending for the year. That is why there has been considerable support for proposals such as the one by Representative JOHN RAY, of New York, House Resolution 170, which would, in effect, try to put an arbitrary ceiling of $65 billion on spending for fiscal 1958.

II

All this does not mean that Congress is wasting its time trying to cut appropriations bills. On the contrary, sizable appropriations cuts can influence spending, not only in fiscal 1958 but in later years as well. By cutting down the amount of carryovers, Congress can increase its control over future budget.

That is the significance of proposals by Senator BYRD and others to make major cuts in appropriations this year. Senator BYRD has said expenditures for fiscal 1958 should be cut by at least $5 billion. To help reach that objective he proposes that appropriations be cut by $6½ billion. Although he does not plan to release the details of his appropriations cuts until the Senate is dealing with each of the appropriations bills, he has outlined the main areas where he thinks these cuts can be made.

He would cut national security appropriations by $1½ billion, a reduction of less than 5 percent aimed at eliminating waste without curtailing essential defense spending. Presumably he would include as waste any big-game hunting parties in the wilds of Alaska by Air Force brass.

He would cut $2 billion more by maintaining military assistance to foreign countries at the 1957 level (a saving of $500 million), and by reducing economic assistance by $1½ billion.

He would cut $3 billion from domestic-civilian activities, which have risen 36 percent since 1954. Right here we have the critical test of the American philosophy of government, to which I referred previously. Few people seem to realize that the vaunted $10 billion cut in Federal spending achieved by the present administration in its first 2 years in office was due primarily to lighter military demands after the end of the Korean war.

On the other hand, nondefense spending, after a sharp drop of about $3 billion between fiscal 1953 and 1954, has increased steadily ever since, passing the previous Truman peak in the present year and reaching a new peacetime record in the proposed budget for fiscal 1958.

In my view, these proposals by Senator BYRD by no means hobble the Federal Government's activities, whether for defense or for civilian purposes. Mainly the line of demarcation seems to be between a Federal Government which spends freely on all sorts of not very essential projects and one which is reasonably careful about its expenditures. That the proposed cuts as a whole do not introduce an era of austerity is sufficiently shown by the fact that if all the cuts were made the budget would be reduced much less than 10 percent. It is likely that, in fact, the cuts will be more nearly 5 percent than 10. Even such relatively moderate reductions are producing howls of anguish from the particular bureau chiefs affected; chiefs who would not be able to expand their services as they hoped. Nevertheless it is quite clear that even after the cuts the Government at Washington will go on.

The really important result of the relatively slight shrinking of proposed Federal activities will be a corresponding opportunity to shrink Federal taxes a little, and even to shrink the massive Federal debt a little. We citizens would really enjoy a chance to spend for ourselves more of the money we earn.

III

Fundamentally, in what philosophy of government do we citizens believe? Do we really want to spend our own money, or do we really prefer to have the Government spend for us? Are we satisfied to restrict the activities of the Federal Government largely to those matters like national defense which only the Federal Government can do well? Are we satisfied to leave to the States and municipalities the execution of historically local functions, like schools and local highways, which the localities can finance and execute, perhaps more slowly, but in the long run, with better supervision and attention to local needs than a distant national government? Incidentally, we should not throw away the great advantages that flow from many local experiments in different forms of management of public affairs; advantages that are notably absent from the centralized administration of a monolithic state.

In presenting his budget 3 years ago, the President said: "This budget marks the beginning of a movement to shift to State and local governments and to private enterprise Federal activities which can be more appropriately and more efficiently carried on in that way."

That philosophy seems to me sound, and I should like to return to it. The 1958 budget was evidently drawn on a different basis.

The fact that we are a big country with a rapidly growing population and an enormous national income does not really justify the 1958 budget. If we spend up to the limit of our tax resources now, and that is what we are doing, where shall we turn if an emergency makes even heavier outlays necessary?

There is every indication that unless Congress makes heroic efforts to cut the budget, the final spending total for fiscal 1958 will be even higher than the President indicated in his January budget. We need only look at the last couple of years to see the possibilities. The 1956 budget rose more than $4 billion between the time the President first proposed it and the end of the fiscal year; the 1957 budget is expected to rise at least $3 billion in the same period. If it hadn't been for an even greater increase in budget receipts, the surpluses of the past 2 years would have been substantial deficits.

If inflationary pressures continue as at present, fiscal 1958 spending is virtually certain to be considerably higher than the $72 billion planned in the President's budget. And I wish I was as sure as some that the precarious surplus in the present budget will in fact be brought about by a continuing rise in budget receipts, reflecting a prosperity that is still booming lustily. Are we really as sure as that of endless good times?

Moreover, if we try to project this kind of budget with its huge obligational authority to future years, the outlook is gloomy indeed. A new analysis of the budget by the Tax Foundation shows that there are no less than 42 new or expanded programs proposed for fiscal 1958. Twenty-four are new, in the sense that they require new authorizations or have never yet been appropriated for, and another 18 are expanded.

Besides the well-known ones, such as Federal aid for school construction, the list includes such things as: a new series of loans and grants to State and local governments for development of small reclamation projects; grants to States to meet personnel and administrative costs of State and local civil-defense organizations; new borrowing power for college housing loans; new benefits for veterans; grants to States for construction of

training facilities for medical and dental schools; grants to States for training of public welfare personnel; grants and loans for areas with persistent unemployment. Grants to States to assist in tree planting at a cost of $4 million.

There are many others, but these are fair samples. So far as future spending is concerned, it is extremely significant that these 42 programs, involving appropriations of nearly $9 billion in the 1958 budget, call for expenditures of less than $2 billion in fiscal 1958. The rest would go to make future budgets big.

Our practice is to permit these programs to start small and grow big. An excellent example came to light recently. The item in question was an appropriation of $150,000 entitled "Salaries and Expenses, President's Committee on Education Beyond High School." The Committee received this appropriation some time ago and was supposed to make a report by December 31, 1957. In the current budget, there are 2 more items, 1 for $650,000 for grants and subsidies and another for $300,000 to enable the Committee to complete its report. The payoff, however, is a third item in the same budget requesting $2.5 million further to assist in developing programs to implement recommendations of the Committee. Thus, in 2 years, a little old $150,000 item to enable the Committee to make a report has grown to a $3 million appropriation for a grants and subsidy program to implement a report and recommendations that the Committee has not yet made.

However shocking these governmental practices may be to the taxpayers, taxpayers must recognize that the practical effect is to assure big budgets for years to come. Unless Congress and the administration take a strong stand now, the budget for fiscal 1959 may well approach $80 billion. If the budget is anywhere near that total, we may well forget the possibility of any of the substantial tax cuts that the politicians talk about but that public officials like to forget.

IV

Nevertheless, the outlook is not hopeless, nor is the battle lost. There are some good signs, too. One of the best is the renewed interest of Congress as well as of the people in the problem of controlling expenditures. Right now, there are dozens of bills attempting to deal with problems of carryovers, of appropriations procedures, of poor staffing for appropriations committees. I shall mention a few.

Legislation calling for a single-package appropriation-expenditure control bill has been introduced by the indefatigable Senator BYRD. This proposal seeks to give Congress actual control over annual expenditures both from new and prior appropriations. In addition to consolidating all regular appropriations in a single bill, this measure provides that each bill must be accompanied by a congressional report itemizing all appropriations and expenditures. Such legislation will limit total authorized spending for the year. A current estimate of revenue for the ensuing year is also called for, so that the Congress may know whether its actions will result in a balanced budget or a debt increase.

The Senate has already approved a measure introduced by Senator MCCLELLAN, of Arkansas, and cosponsored by 71 Senators which provides for the establishment of a Joint Committee on the Budget. This committee would fcailitate congressional analysis and evaluation of spending proposals and seems likely to strengthen congressional budgetary procedures greatly.

Senators KENNEDY and BYRD and 45 others are the sponsors of a bill calling for the statement of appropriations on an annual accrued expenditure basis, a recommendation of the Hoover Commission. Under this legislation, Congress would appropriate for each fiscal year on the basis of estimates of expenditures actually to be made or accrued in that year.

It is clear from what I have said that the problem of the Federal budget is not a unique problem that arises this year. The bitter recriminations raging around the "battle of the budget" cannot possibly be settled this year.

The fundamental question is, "What do we want Government to do for us?" Congress and citizens have to reach a judgment on that question every year. All the discussion and letterwriting about Federal spending will have a salutary effect if it helps pinpoint the principle at issue: the relationship between the Federal Government and the States, the localities and the individual.

This brief budgetary review makes it painfully evident that the first steps can and should be taken this year toward remedying the fearful lack of expenditure control manifest in congressional treatment of money bills. Surely, among the Byrd, the McClellan and the other proposals I have mentioned, Congress can find a way to end the present dismal lack of control over spending.

Whatever may happen to the budget now being dealt with by Congress—and I heartily hope it will be cut substantially—the probability of future budgets just as difficult to deal with makes it imperative that Congress improve its procedures. The path to eventual tax reduction must certainly first pass the milestone of congressional spending control. Members of Congress need to know, when they vote for appropriations, how much that vote will mean in terms of budget expenditures, national debt, and possible tax reduction. Citizens have a prime responsibility to help Congress achieve this control over their tax dollars.

Results of Questionnaire

EXTENSION OF REMARKS

OF

HON. O. C. FISHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. FISHER. Mr. Speaker, I recently submitted to the people of the 21st Congressional District in Texas a poll covering 12 current issues. The response has been very gratifying. More than 12,000 returns have been received. Tabulation of the answers has now been completed. The results are as follows:

QUESTIONNAIRE

1. The Eisenhower doctrine authorizes the President, if requested by an invaded country, to use American troops to combat overt Communist aggression in the Middle East. Do you favor this? Yes, 47.6 percent; no, 43.3 percent; no opinion, 9.1 percent.

2. A bill in Congress proposes that the Federal Government contribute a substantial amount of Federal funds to help finance local school construction, subject to local compliance with Federal regulations. Do you favor this? Yes, 28.1 percent; no, 67.2 percent; no opinion, 4.7 percent.

3. For the alleged purpose of protecting the civil rights of citizens from discrimination on account of race or religion, legislation in Congress proposes:

1. That a Federal commission be empowered to subpena persons and records to investigate claims of discrimination.

2. That the Attorney General may bring lawsuits, with lawyers and court expenses paid by the taxpayers, to recover money for damages on behalf of people who claim their civil rights have been violated.

3. That citizens, under Federal court injunction, may be sentenced to prison without jury trial for violating, or being about to violate, another's civil rights.

Do you favor this legislation? Yes, 12.4 percent; no, 77.2 percent; no opinion, 10.4 percent.

4. A bill in Congress would extend the Federal minimum wage and overtime law to retail stores and service establishments. Do you favor this? Yes, 41.1 percent; no, 49.4 percent, no opinion 9.5 percent.

5. During the past year, under present laws, about 350,000 immigrants were admitted to this country. A bill in Congress would increase this number each year. Do you favor the increase? Yes, 8.4 percent; no, 83.7 percent; no opinion 7.9 percent.

6. Do you favor statehood for Hawaii and Alaska? Yes, 67.2 percent; no, 17.4 percent; no opinion 15.4 percent.

7. Last year Congress adopted a soil-bank plan (costing $1.2 billion annually), to pay farmers for taking certain farmlands out of production, thus reducing surpluses. Do you favor continuation of the soil bank? Yes, 37.6 percent; no, 46.2 percent; no opinion, 14 percent.

8. The closed shop is outlawed by the Taft-Hartley Act. A bill in Congress would legalize agreements in the construction industry under which unions could select the employees on construction jobs and require that new workers join a union within a short period after going on the job. Do you favor this? Yes, 9.2 percent; no, 82.2 percent; no opinion, 8.6 percent.

9. The President's annual budget calls for a total of $71,800,000,000. Do you favor a reduction in this amount? Yes, 79.2 percent; no, 9.7 percent; no opinion, 11.1 percent.

10. The budget calls for $4.4 billion for foreign military and economic aid ($2.6 military aid, $1.8 billion economic aid), during the next fiscal year. Do you favor this? Yes, 18.4 percent; no, 64.6 percent; no opinion, 17 percent.

11. On the subject of tax reduction, do you favor the policy of first achieving a balanced budget before undertaking tax reductions? Yes, 76.1 percent; no, 17.4 percent; no opinion, 6.5 percent.

12. In the operation of the Post Office Department, there is presently an annual deficit in its operation of about $464 million. A bill in Congress would increase postal rates in order to reduce the deficit. Do you favor any increase in postal rates? Yes, 54 percent; no, 39 percent; no opinion, 7 percent.

EISENHOWER DOCTRINE

Mr. Speaker, there were so many interesting comments in regard to the various issues that I am constrained to discuss a few of the questions and perhaps clarify some of them.

Considerable interest was shown in the first question—dealing with the Eisenhower doctrine. About the time the questionnaire was sent out the Congress took final action on that issue, and it was overwhelmingly approved. So the issue is now moot, in a manner of speaking, but continues to be a lively topic before the American people.

Actually, the President already had the authority which he requested from the Congress. That authority has been held to be inherent in his constitutional authority as Commander in Chief of our Armed Forces. And it has, without any action by the Congress, been exercised many times in the past. A few examples include the action against the Barbary pirates in 1801; the second Barbary War in 1815; the American-Mexican incident

between 1914 and 1917; the Boxer uprising in 1900; the almost innumerable instances of intervention in Latin America; the Dominican Republic, and Nicaragua. Then there was the Korean conflict.

The purpose of the President in asking for congressional approval for his use of troops to combat overt Communist aggression in the Middle East was obviously to obtain an expression of support for that phase of our foreign policy.

PEOPLE WANT REDUCED SPENDING, TAX RELIEF

Mr. Speaker, I have the honor of representing a fairly conservative district. The people there are good, average Americans who still believe that 2 and 2 make 4, and that all is not gold that glitters. They still cling to the belief that a man should put in a good day's work for what he earns. They are very dubious about this business of getting something for nothing. In their patriotic zeal they put the Nation's welfare and the future of our country ahead of petty political considerations. They abhor demagoguery and political chicanery. They are hardy and patient people, and because of strength and fortitude they have survived 7 years of the most devastating drought in history.

Those people are understandably concerned about the size of our public debt. They are worried about the highest peacetime budget in history. They feel the heavy burden of the present tax load. They feel that the present Federal spending velocity should be reduced substantially. They want something paid on the public debt, and they want some tax relief.

It will be noted that 79.2 percent feel the President's current budget estimates are too high. Seventy-six percent favor a balanced budget before undertaking further tax reductions.

PUBLIC SUPPORT FOR RETRENCHMENT ENCOURAGING

As one who has through the years—not just this year—fought against nonessential Federal spending, I am encouraged by the amount of public support that is this year being shown in favor of this retrenchment policy. It is a good sign and it should bear fruit, coming as it does from all over the Nation.

Thus far the House has considered $15 billion in appropriations out of the $72 billion budget. And we have whacked more than $1 billion from it. That is good start. President Eisenhower has recently suggested another $2 billion that he believes can be trimmed. Surely we can whittle another $2 billion or $3 billion. If the Senate follows suit we should, therefore, be able to cut at least $5 billion. It all depends.

FOREIGN AID SHOULD BE CUT

Mr. Speaker, there are a number of budget items that can and should be reduced or eliminated. These include the $4.4 billion for foreign aid and the half billion for school construction assistance. The latter calls for a total outlay of $2 billion, with a half billion to be granted to local schools the first year. In my judgment we should defeat the proposed school aid measure and nip that new Federal commitment in the bud. How can we ever hope for balanced budgets and tax relief if we keep right on tallying up new expensive Federal grant programs, most of which, once started, snowball and go on for years and years?

As I see it, foreign aid should be limited in the main, except for certain loans and technical assistance, to military support for friendly and deserving countries which cannot help themselves and where it is to our selfish advantage to help keep them armed and prepared to combat Communist aggression.

FISHER VOTE ON FOREIGN AID

For the past 4 years I have personally voted against every bill for foreign aid. I have been constrained to do so because those bills have been presented in package form, all economic and military assistance lumped together, and they have included too much of what I was convinced was both wasteful and nonessential. The American taxpayers simply cannot go on and on carrying so much of the burdens of the world on their shoulders.

CUT SPENDING, CUT TAXES

We all know that tax reduction, including an increase in personal exemptions, to be really meaningful must be made at a time when the resulting loss in revenue will not have to be replaced with borrowed money, with the borrowed money to be added to the national debt.

We all know that is not really tax relief. It is tax postponement—just passing the added amount on to our children and grandchildren to pay. It may placate certain vote-hungry politicians, but it is not a sound approach and everyone knows it.

There is a remedy if the Congress has the courage to make use of it. Let us face up to the issue. We can balance the budget. We can reduce nonessential spending. We can reduce the public debt. And at the same time, while doing these things, we can and should reduce the heavy tax burden.

HOOVER COMMISSION RECOMMENDATIONS

Mr. Speaker, in seeking ways to reduce, we are reminded of the great work done by the Hoover Commission. Sixty-five percent of all Hoover Commission proposals are in effect, including most of the major ones. The approval of some of the remaining proposals, at least, would undoubtedly help in promoting economy and efficiency in the operation of the Government.

PEOPLE FAVOR IMMIGRATION RESTRICTIONS

Mr. Speaker, the fifth question relates to immigration and the pending legislation designed to relax existing restrictions.

As indicated by the answers and comments, the people are very much alarmed about the proposed increase. It will be noted that only 8.4 percent favor an increase, and many of these answers were qualified. A total of 83.7 percent oppose any increase, and I am convinced the vast majority favor a reduction rather than an increase in the present rate of admissions.

President Eisenhower, as was true of President Truman before him, favors a drastic change in our traditional quota system. Under that proposal more than 100,000 more immigrants would be admissible yearly, above the number now being admitted. Last year more than 350,000 entered.

FISHER SUPPORTS PRESENT RESTRICTIONS

Mr. Speaker, I am unalterably opposed to any further breakdown in our quota system of orderly and restricted admissions. Our own population is recreasing rapidly. At our present rate we will have more than 200 million by 1975—and that is not very far off.

If we want to preserve our standard of living we simply cannot absorb the surplus population of Europe, as pressures would have us do. We cannot afford to become the dumping ground for that surplus. And the same is true with respect to our neighbors to the South and of the entire Western Hemisphere. Let us listen to the voice of the American people and then hold the line firmly.

FLOOD PREVENTION, WATER CONSERVATION

Mr. Speaker, it is our responsibility to distinguish between what is essential and what is not essential in Federal spending. One action where money can be wisely spent with assurance of good dividends to the taxpayers on the investments is in the field of flood control and water conservation, based upon sound engineering justification.

A good example that comes to my mind is that of the Falcon Dam on the Rio Grande. In just one flood which occurred shortly after that dam was constructed the saving from damage amounted to more than the entire cost of the project.

We have been urging advancement of the proposed international project on the Rio Grande above Del Rio. And we have urged the Corps of Engineers to complete surveys on all our streams in the 21st District of Texas, including the Colorado and tributaries, the Guadaloupe, the Neuces and its tributaries, and others. That is a flash-flood country, and protection is needed.

In addition, the Reclamation Bureau is presently making a comprehensive survey of the entire water situation in Texas. This may lead to location of feasible projects on our rivers and streams.

A multipurpose flood-control, irrigation, and water-conservation dam is now being proposed by the Reclamation Bureau on the Conchos above the city of San Angelo. Most of the cost will be paid back to the Government in accordance with contracts for the sale of water to the city of San Angelo and to irrigators. Because of this market for water, this project will be paid for in the main by local people and will cost the Government comparatively little.

INCREASE IN POSTAL RATES?

It will be noted that 54 percent of the people favor an increase in postal rates in order to reduce the annual deficit. That deficit is estimated at $650 million next year. If it can be reduced or eliminated it will cut the size of the budget just that much.

According to the responses I have received most of the people want substantial raises in rates on so-called junk mail. The pending bill on the subject proposes to raise first-class rates by 1 cent, and

this would yield $348.5 million yearly in new revenues, including revenue from an increase by 1 cent on post cards.

Second-class zone rates on magazines and newspapers would be upped by 4 successive annual 15-percent increases to provide a total of $31 million annually in additional revenue by the end of the fourth year.

Rates on third-class mail—largely direct-mail advertising circulars—would advance to yield $128 million in additional revenue by 1960. This increase would be on piece rate under bulk mailings, from 1.5 cents to 2.5 cents by 1959.

The Postmaster General is now required by law to set parcel-post rates at a level that makes this class of mail pay its own way, and that is now the case.

In regard to congressional franked mail, it is of interest to note that since August 1953, the Department has been paid in full for handling it—approximately $1.5 million yearly—and penalty mail of Government agencies—approximating $35 million yearly—which were formerly carried free.

Mr. Speaker, because of time and space limitation I must conclude. I believe that in conclusion I will quote from a comment on a questionnaire that was sent in from Brownwood, Tex., by a constituent who, while expressing certain kind and generous indulgence toward me, expresses a basic philosophy. Here it is:

Think you are doing a good job for us but your ideas of sound government do not coincide with the "spend and elect," "court the minorities," and "never mind the debt" attitude that prevails in Washington. I think, and sincerely hope, your ideas go along the same path as mine which does not follow those paths. We are already at the danger point in taxation as we also have taxes other than Federal, remember.

Alexander Hamilton

EXTENSION OF REMARKS
OF
HON. KARL E. MUNDT
OF SOUTH DAKOTA
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. MUNDT. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "Alexander Hamilton," which appeared in the April 1957 issue of National Republic editorials, that interesting and informative monthly periodical and magazine published in Washington, D. C.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ALEXANDER HAMILTON

In celebrating this year the 200th anniversary of Alexander Hamilton's birth, America will grow stronger in spirit and vision, with a new and deeper understanding of Hamilton's decisive part in establishing the Republic. Without Hamilton's judgment, influence, devotion, and moderating counsel, the American Constitution might have never been achieved.

Because he was a conservative in the eyes of Thomas Jefferson, Hamilton was the victim of much contemporary political calumny. History now has demonstrated clearly that Hamilton's brand of conservatism meant principally holding on to tried and proven values of the past—but not standing still. He was not afraid of new ideas, new approaches to old problems—nor even a wholly new form of government for a new nation on a virgin continent.

But Hamilton did insist upon the processes of law. Constructive change, as he interpreted history, could come only from evolution, rather than revolution.

The French Revolution, toward which Jefferson was wholly sympathetic, was viewed by Hamilton as rampant mob terrorism. Obviously, Hamilton's moderating influence in the formative years of the American Republic contributed notably to the survival qualities now recognized by all in our Federal system.

One of the great ironies of history is the fact that Hamilton vigorously fought Jefferson on the Louisiana Purchase. Yet when Jefferson finally accomplished this great act of national expansion, he justified the deed before Congress by accepting Hamilton's broad construction of Federal powers—rather than by the narrower conceptions of rigid States Righters.

Indeed, when we view the American revolution in calm historical perspective, it is impossible to imagine the establishment of the Union without Hamilton's work in the movement for independence, in the Philadelphia convention, as a contributor to the Federalist, and as an intimate friend, adviser, and guide in George Washington's Cabinet. Without Hamilton, the tottering young Union easily might have stumbled into the consuming vortex of Europes' monarchist intrigue and treachery.

His death on July 12, 1804, following the tragic duel with Aaron Burr, ended a brilliant and energetic career in its very prime. Hamilton was only 47. Had he lived another quarter century, his moderate temperament and sharp judicial mind might have eased considerably the trials of our national development.

Senator KARL E. MUNDT, of South Dakota, introduced the original resolution calling for a Hamilton bicentennial observance, on March 16, 1954. Many new nations in the world are trying today to find the solid road to freedom and human felicity. Hamilton's writing and letters could help and guide them all—as they still may help every American to revere, protect, and defend our own citadel of human freedom.

We owe much in honor and esteem to the memory of Alexander Hamilton.

The State Department

EXTENSION OF REMARKS
OF
HON. THOMAS H. KUCHEL
OF CALIFORNIA
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. KUCHEL. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an excellent editorial entitled "State Keeps 'Em From Our Door," published in the Los Angeles Times under date of Wednesday, April 17, 1957.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

STATE KEEPS 'EM FROM OUR DOOR

Our State Department, more often than not, works in ways far beyond the understanding of the lay mind.

THE KLM CASE

Take the case of KLM, the Dutch airline. Mayor Poulson, the chamber of commerce and most of the Los Angeles press urged that KLM be permitted to fly into our airports. But the State Department ruled that KLM may put down no farther west than Houston.

On the other hand, the State Department had granted the right to fly to Los Angeles to Scandinavian Airlines, to British BOAC and to German Lufthansa. Scandinavian is deserving, for it pioneered the polar route, but BOAC and Lufthansa are sitting on their franchises apparently because they do not have the planes to fly here.

Now, both BOAC and Lufthansa are heavily subsidized lines and government-controlled. KLM, on the other hand, is a private company, receiving no Government subsidies. It actually pays its stockholders an annual dividend. Moreover, it is one of the oldest airlines, and next to the two great United States lines, Pan American and TWA, flies the most transatlantic mileage.

Holland, the home base of KLM, has managed without American giveaway for a long time and has created such a favorable climate for free enterprise that many American firms producing in Europe have established their offices and factories there.

PECULIAR CONCLUSION

This leads one to the peculiar but quite tenable conclusion that our State Department discriminates against countries showing the energy for self-support which its own program of economic aid is supposed to induce or encourage. We have long suspected that the giveaway bureaucracy looks with disfavor on any enterprise of any country which makes a bad case for continued American spending. The giveaway people are not interested in helping the Dutch, apparently, until the Dutch have caved in and become docile clients of the foreign-aid system.

That may not be the entire explanation of the State Department's decision but experience speaks strongly for it as one of the important factors. But there is another factor, quite as illogical as the first, and it should be rejected if we were not dealing with an organization like the State Department. This is that the State people know even less about their own country than they do about the outer world they deal with.

The grand gurus of State do not seem to be aware Los Angeles is an important center. They suffered the Latin American Ambassadors to meet here, we guess, because their files told them that this was a quaint Latin town in which the guests would feel at home. But as for other foreign guests of honor, State touts them away from Los Angeles whenever possible.

ROUTED AWAY

The travel schedules of these foreigners are arranged by the State Department or one of its contract agencies. Despite efforts of the consular corps in Los Angeles the visitors have regularly been routed away from here, just as KLM was. The planned visits of President Theodor Heuss and Chancellor Konrad Adenauer of West Germany, postponed for reasons of health, are two examples; they were not to visit Los Angeles.

A number of visitors who have contrived to come here in spite of State said they were asked in Washington, "What on earth do you

want to do in Los Angeles?" The President of the Austrian Parliament, Dr. Hurdes, in a recent address in Los Angeles remarked humorously that he had to fight the State Department people in order to be routed here.

We have an influential southern California delegation in Congress. Perhaps the Representatives could provide State with some new maps and other gazetteer information. The chamber of commerce is a little behind in its traditional work.

We ought to have KLM here. Moreover, any visiting firemen who want to look over our community, one of the most remarkable in the world, ought not to be discouraged. They know what's here even if the State Department does not.

Jordan and the United States Problem

EXTENSION OF REMARKS
OF
HON. CLIFFORD P. CASE
OF NEW JERSEY
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. CASE of New Jersey. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an article entitled "Jordan and the United States Problem," written by David Lawrence, and appearing in the Washington Evening Star of April 25, 1957.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JORDAN AND THE UNITED STATES PROBLEM—RED DRIVE SEEN POINTING UP DEMANDS TO CUT OUR AID PROGRAMS AND USIA

(By David Lawrence)

The struggle inside Jordan vividly illustrates the dilemma in the Middle East that confronts the United States and the other Westren Powers.

The Communists are conspicuously active—the young King admits it in a published interview with representatives of the American press. The plain effort of the Soviet conspiracy is to overthrow the existing regime in Jordan and line it up with Nasser of Egypt and the pro-Communist clique that has taken possession of Syria.

Shall the United States look on indifferently? Leaflets condemning the western nations, including the United States, are being distributed in the streets by the Communists. Student groups which have been infiltrated by Communist agents are being incited to make riotous demonstrations. Shall there be nothing done to counteract this, and shall the Western Powers let it all go by default and see the whole Middle Eastern situation grow more and more dangerous as armed conflicts ensue?

These questions go to the heart of the problem posed by the critics who have urged that America abandon her economic aid programs and curtail or abolish the United States Information Agency. Behind this drive is the belief that it will save money and that the budget can be thus trimmed and taxes soon reduced.

But the danger is that the budget may have to be increased if armed conflict breaks out. Then the outpourings of dollars may be many times more than any pittance now spent in counteracting Communist activity in the Middle East.

The Moscow propagandists are busy and energetic. They think the Eisenhower doctrine is too tempting for the Arab countries and that since Lebanon, Iraq, Iran, and Saudi Arabia are friendly toward the doctrine, the other countries may likewise come within its helpful orbit and ties to the West will be strengthened.

And so the battle on the propaganda front goes. Big stakes are involved. Out of little wars grow big wars. The peace of the Middle East is at best hard to manage. Referring to that area, Secretary of State Dulles in his speech in New York this week said: "Wherever such situations occur, they are always worsened by Soviet intrigue. The Kremlin likes troubled waters in which to fish."

Unfortunately, the Moscow regime has billions available for such intrigue and for propaganda of all kinds, including hundreds of "cultural missions," but in America any effective defense with propaganda or countertactics is waved aside by too many people as "boondoggling."

Perhaps the most misunderstood feature of the work of the United States Information Agency is the jazz-band tours that it has recently sponsored. A young American businessman who was in southeast Asia at the time of one of these jazz-band visits writes to this correspondent:

"The Benny Goodman tour proved that jazz is the folk music of America. It has a way of cutting through the boundaries of language and culture that nothing else possesses. Additionally, it enables Americans to get through to the average citizen of each country more quickly than any diplomatic procedure. For example, in Rangoon the university is a problem for the United States. The students are prime targets for all propaganda, for they are the future rulers of Burma. The Goodman band played two concerts indoors and held an outdoor seminar and jam session under the trees. Students flocked to hear the band. And the entire student attitude in Rangoon became more friendly toward the United States as a result. In Thailand, the king had Goodman to the palace four times so that he could play with the band. This was a tremendous asset to our people there—and they capitalized on the situation. My point is that we must fight our competition in these countries by all possible strategies, and the United States Information Agency enables us to cash in on our opportunities."

These are new problems, strange problems to the average American, who, feeling secure in a world of his own with all the comforts of a peaceful climate, little realizes that the cold war is going on every hour of the day in the smaller countries of Asia and Africa where the United States at the moment is determined that international communism shall not get a firm foothold—and this costs money.

Retirement of George A. Barton, of the Minneapolis Tribune

EXTENSION OF REMARKS
OF
HON. EDWARD J. THYE
OF MINNESOTA
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. THYE. Mr. President, there was published in the Minneapolis Morning Tribune of April 29, 1957, an editorial entitled "George Barton Retires"; also, in the Minneapolis Sunday Tribune of April 28, 1957, an article entitled "George A. Barton To Retire May 1 After 53 Years."

George Barton was one of the great athletes of the United States, and one of the finest sports writers we have known in our generation. I ask unanimous consent to have printed in the Appendix of the RECORD the editorial and article to which I have referred.

There being no objection, the editorial and article were ordered to be printed in the RECORD, as follows:

[From the Minneapolis Morning Tribune of April 29, 1957]

GEORGE BARTON RETIRES

George Barton is leaving the Tribune tomorrow and thus goes into retirement one of the finest sports traditions in this part of the world. For more than half a century he has chronicled the news of athletic contests with honesty, sympathy, and discernment.

He has been more than an observer. In boxing, which has been under a cloud at various times, he helped to restore confidence by his participation as boxer, referee, and then as chairman of the State boxing commission. He gave stature to any enterprise he aided.

George Barton is a man of remarkable memory, of complete probity, of enduring soundness. He has well earned the retirement into which he steps with the ending of April.

[From the Minneapolis Sunday Tribune of April 28, 1957]

GEORGE A. BARTON TO RETIRE MAY 1 AFTER 53 YEARS

George A. Barton, 72, veteran sports writer for the Minneapolis Tribune, is retiring May 1.

After more than 53 years of covering sports for Twin Cities newspapers, "Mr. Boxing" announced Saturday that he is putting aside his typewriter on a full-time basis.

He will continue to write a column once a week for the Tribune but will devote most of his time after May 1 finishing a book on the history of Minnesota sports over the past half century.

He also will remain as chairman of the State athletic commission, a position he has held for the past 15 years under 5 different governors.

Barton is one of the best known sports writers in the United States. Down through the years he has covered every athletic activity in the book, but he gained his greatest fame in boxing.

Born in Northfield, Minn., February 20, 1885, he moved with his family to St. Paul in 1893. He has lived there ever since.

George attended Madison, Benjamin Drew and Jefferson grade schools in St. Paul and Central High School. There he won letters in baseball and track.

He became interested in boxing while frequenting fire station No. 1 in St. Paul. He embarked on a fistic career at the age of 16 and turned professional at 17, boxing first as a bantamweight and later as a featherweight.

He engaged in sneak fights in his younger days when the sport was illegal in Minnesota.

Barton embarked on his newspaper career on the St. Paul Daily News in July 1903 as assistant to the late J. Alec Sloan at $10 a week. He continued to box in his spare time and eventually became an instructor at the St. Paul YMCA. Among his pupils were the famed Mike Gibbons and Ernest Brimmer, who became film star Richard Dix.

On December 7, 1903, he accepted a position as sports editor of the Minneapolis Daily News. He served in that post until February 16, 1923, when he became executive sports editor of the Tribune newspapers. He has been on the Tribune staff ever since as columnist, reporter, and director of the Star and Tribune Golden Glove program.

His newspaper career covers 53 years and 10 months when he steps out May 1.

During that span he has covered every heavyweight championship fight from Jack Johnson versus Jim Jeffries in 1910 at Reno, Nev., through the Archie Moore-Floyd Patterson mix last November.

Minneapolis baseball and Minnesota football also were his special beats, but boxing was his favorite.

Over 35 years "Mr. Boxing" refereed more than 12,000 bouts, involving 26 world champions and practically every known fighter of that period. He also served as judge for 30 New York-Chicago intercity Golden Gloves tournaments and 3 national intercollegiate meets.

As a fighter, Barton's most notable victory was over Terry McGovern, holder of the world's bantamweight and featherweight crowns. That was over six rounds in 1904. He boxed exhibitions with Battling Nelson and Joe Gans when they were tops in the lightweight division. He hung up his boxing gloves in 1910 when his salary as sports editor of the Daily News was hiked to $35 a week.

Many honors have come Barton's way through these 53 years. The most distinguished was the James J. Walker award in 1953 for his long and meritorious contributions to boxing.

He was president of the National Boxing Association in 1952–53 and was a militant leader against the monopoly of the International Boxing Club.

He served as president of the American Association of Baseball Writers in 1940 and also is a past president of the Star and Tribune 20-year club.

Barton was recipient of a trophy and the Town Topper award by the Minneapolis Chamber of Commerce in 1953 for his contributions to boxing.

He was awarded a silver medallion by the French Boxing Federation and many other honors.

George married Kathryn Elizabeth Riley, of St. Paul, September 17, 1908. They have two sons—George A., Jr., and Richard Kenneth—and five grandchildren.

Barton will be honored by his fellow employees at a luncheon next Thursday noon in the civic dining room at the Star and Tribune.

Outstanding Citizens of Pendleton, Oreg.

EXTENSION OF REMARKS

OF

HON. RICHARD L. NEUBERGER

OF OREGON

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. NEUBERGER. Mr. President, in the Pendleton East Oregonian, of Friday, April 16, there is a news story which reports the selection of the outstanding citizens of Pendleton, Oreg., for 1956. The selection was announced at the annual recognition banquet of the Pendleton Chamber of Commerce.

The story, written by reporter Jim Eardley, clearly establishes why Mrs. H. S. McKenzie and Mr. J. W. (Bud) Forrester, Jr., were singled out for this honor. I think it will be of especial interest to the Senate to know that Mr. Forrester is the father of Mike Forrester who, you will remember, was an able and alert Senate page boy during the 1st session of the 84th Congress.

Let me say, Mr. President, that I confess to a selfish but justifiable personal pride in calling this matter to special attention. J. W. Forrester, Jr., and I waded into the journalistic waters together when we worked on the Portland Oregonian as 16-year-old fledgling reporters.

Mr. President, I ask unanimous consent to have this news story printed in the Appendix of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CIVIC WORKER, EDITOR NAMED CITIZENS OF YEAR

(By Jim Eardley)

A woman who has given countless hours of public service in a multitude of worthy activities, and the editor and publisher of the East Oregonian last night were named Pendleton's outstanding citizens of 1956.

Announcement of the selection of Mrs. H. S. (Helen) McKenzie and J. W. (Bud) Forrester as the city's outstanding citizens last year was made last night at the Pendleton Chamber of Commerce annual recognition banquet.

Nineteen past presidents of the chamber also were honored. Ten were able to be present and the son of another accepted the award for his father.

About 100 attended the banquet.

HAS THREE GROWN SONS

Mrs. McKenzie has three grown sons. "While her sons are grown," said the awards selection committee, "she helps in the rearing of her 5 Pendleton grandchildren [she has 2 others], but manages to give countless hours to public service."

Mrs. McKenzie has as a private project, visitation and shopping service for shut-ins.

In addition, there is her work for veterans, and for church, clubs, and civic groups.

She is on the Veterans' Administration advisory council of the Walla Walla Veterans' Hospital, and has been active in veterans' aid for years.

In the Pendleton United Churchwomen's group she has charge of publicity.

HELPS AT HOSPITAL

She also does her stint with helping with the library book cart service at St. Anthony's Hospital. She is on the United Churchwomen's social relations committee.

Mrs. McKenzie is active in the Presbyterian Church, sings in the choir, and is chairman of publicity for women's association, and has circle activities.

She is a charter member of the Civic Music Association, and is on the executive committee, longtime member of Mothers and Wives Service Club, first vice president in charge of programs and publicity and is the club's veterans' aid representative.

Mrs. McKenzie is a member of the Pendleton Women's Club and is chairman of the library and publicity committees.

OTHER PROJECTS LISTED

She is chairman of the veterans' committee and of publicity for the Oregon Federation of Women's Club.

She is State chaplain of the Oregon Ladies of the Grand Army of the Republic and treasurer of the local McPhearson circle.

Mrs. McKenzie is active in the Pioneer Ladies Club, one of her 2-year projects being the antique display in store windows during Round-Up, during which she has responsibility for more than 300 antiques.

She is a past president of the Thursday Afternoon Club and a member of the Medical Society auxiliary.

Of her services for shut-ins, the selection committee said: "The sick and aged are her own personal concern."

SONS LISTED

Sons of Dr. and Mrs. McKenzie are Dr. Robert McKenzie, Pendleton; Dr. Kenneth McKenzie, Denver, Colo.; and Dean McKenzie, New York City, working on his doctor of philosophy degree in art history.

Forrester is now member of the State board of higher education; vice chairman of Umatilla County Chapter, Red Cross; vice president of Pendleton Country Club; member of St. Anthony's Hospital advisory committee and chairman of the Pendleton Chamber of Commerce water resource development committee.

He is an active member of Kiwanis, Rotary, Episcopal Church of the Redeemer, and is on the Oregon Highway Lifesavers Umatilla County Board.

Forrester is a member of a committee which annually selects a research interne for Senator NEUBERGER's staff.

BACKGROUND MATERIAL GIVEN

He is a director of the Umatilla County United Fund Association, and a member of the Oregon State College memorial union board of governors.

Mr. and Mrs. Forrester gave a home for 1956 to a foreign exchange student at their own expense.

While the award was based on 1956 activities, the committee said it was interested in background material. Forrester was, in recent years:

President of the Oregon Newspaper Publishers Association, director of the Oregon State College Alumni Association, member of the Round-Up Board, member of the State parks study committee and member of the Umatilla County Development Commission, Umatilla County Red Cross membership chairman, chairman of school district 16–C (Pendleton) citizens advisory committee, member of the Umatilla County courthouse building committee, director of the Pendleton Chamber of Commerce, member of the Upper Columbia River Basin Commission and member of the Bonneville regional advisory council.

In January this year he visited 24 of the State's 36 counties interviewing editors and publishers of newspapers and people in agriculture and industry for a survey of the economy of Oregon. This has been published in book form.

The Supreme Court and Post Mortem Wills

EXTENSION OF REMARKS

OF

HON. SAM J. ERVIN, JR.

OF NORTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. ERVIN. Mr. President, on April 29, 1957, the Supreme Court, in effect, wrote a post mortem codicil to a will made 126 years ago by Stephen Girard, who evidently entertained during his ante mortem days the belief that courts are not created to make wills for deceased persons. As one who clings to an abiding conviction that it is not the function of the judiciary to make or remake constitutions or laws or wills, I have read with profound concern the penetrating comments of Mr. David Lawrence on the astounding decision of the Supreme Court in the Girard will case, which appeared in an article in the Washington Evening Star of May 1, 1957, under the title "Ruling May Affect Private Schools." Believing, as I do, that Mr. Lawrence's penetrating comments merit consideration by all thoughtful Americans, I ask unanimous consent that the article in question be printed in the Appendix of the RECORD.

There being no objection, the article was ordered printed in the RECORD, as follows:

RULING MAY AFFECT PRIVATE SCHOOLS—SUPREME COURT ACTION ON GIRARD COLLEGE CALLED REVERSAL OF LEGAL DOCTRINE

(By David Lawrence)

The Supreme Court of the United States passed a new law on Monday. It could affect discrimination or racial or religious grounds in private schools, exclusive clubs, and colleges supported or controlled by church groups of any denomination.

The Supreme Court isn't supposed to pass any laws. That's the function of Congress. But now the Supreme Court proclaims as "the law of the land" that a man who left his money in 1831 for a college to which only male, white orphans were to be admitted cannot have his wishes entirely respected. If Stephen Girard were alive today, he could discriminate on racial or religious grounds and conduct a private school or college, admitting anyone he chose. But, since he made the mistake of letting a city government act as trustee for him, the wishes of the original donor cannot be lawfully fulfilled by the trustee.

This is a sensational reversal of centuries of legal doctrine. Up to now it had been thought that a trustee, as such, was a private person, merely acting for the donor, and that a public official acting as a trustee could no anything that it was lawful for any trustee to do in following the provisions of a will. But the Supreme Court of the United States says the Board of Directors of City Trusts—an organization set up by the city of Philadelphia to carry out the terms of wills and estates left in perpetual trust—is an agency of the State and not an agency of the donor of the money. Then the Supreme Court invokes the 14th amendment, which says that "no State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States."

No public funds are involved in the Girard College case. It consists entirely of private funds of nearly $100 million, and the real issue is the board of trustees. There are 14 citizens on it. Twelve are appointed by the Court of Common Pleas, and there are 2 ex officio members, 1 the president of the City Council of Philadelphia, and the other the city's mayor. This is not unlike the setup in many States where private colleges and universities operate under a State charter and the governor is designated as an ex officio member of the board of trustees.

Every college or university—in fact, almost every private club—operates under a corporation charter issued by a State government. If corporations, which are often referred to as creatures of the State, are some day to be subject to the rule laid down in the case of Stephen Girard College by the Supreme Court of the United States, it raises a question as to whether any form of discrimination—either on religious, racial, or even political grounds—might come under the ban.

One university here in Washington, for example, operating under a Federal Government charter, is required to select a certain number of trustees from a particular church. Will this be construed as discrimination? Many a bank and trust company, in seeking to carry out the wishes of a donor, is sometimes confronted with clauses in the will that require either religious or racial discrimination to be exercised. Can the trustee be enjoined now from carrying out the wishes of the donor if some relatives or other outside persons choose to challenge the fulfillment of the provisions of the will on the ground that the trustee is an agency of the State and hence cannot violate the 14th amendment?

These are questions of degree and scope on which the new decision, which happens to be brief, throws little light. Also, to what extent will States hereafter be limited in making their own rules on wills and trusts?

What, it is also being asked by lawyers, is going to happen to wills that are executed by State appointees, as in the case of an administrator or executor designated by the courts? Many wills, for example, provide that when a wife remarries she loses the benefit of the funds bequeathed or that children are to qualify only if they are members of a certain church. Does the new ruling mean that if the administrator is held to be an agency of the State he cannot recognize any discriminatory provisions in wills hereafter? The attorney general of a State, it will be noted, has the duty of enforcing all charitable trusts.

The new decision of the Supreme Court is avowedly based on the school segregation ruling handed down in 1954, but it raises more questions than it answers.

The Supreme Court could readily have accepted the decision of Pennsylvania's highest court in this case and thus could have retained the recognized principles of law. But being sociologically inclined the tendency of the present Supreme Court justices is to go more and more to the side of reform for reform's sake with less and less regard for any consistency of legal precepts.

The Fallacy of Federal Aid

EXTENSION OF REMARKS
OF
HON. HERMAN E. TALMADGE
OF GEORGIA
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. TALMADGE. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an editorial entitled "The Fallacy of Federal Aid," from the April 18, 1957, issue of the Baxley (Ga.) News-Banner.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE FALLACY OF FEDERAL AID

Federal aid may well be the straw that finally breaks the camel's back despite all the grandiose objectives it is designed to accomplish.

There was a time when the Federal Government was known for its efficiency and anything connected with it was thought to be above reproach. Sordid politics was supposed to have been confined to the States and local governments and only when Federal aid was not involved did politicians seek to circumvent the law whenever they thought it politically expedient to do so.

Today the Federal Government is perhaps as strict as ever about how Federal-aid projects must be carried out, but the "watch dogs" required to supervise the States in carrying out Federal-aid projects bite heavily into Federal funds. Civilian employment by the Federal Government is at a peak today and still climbing.

It was interesting to note recently that Dr. Milton Eisenhower, brother to the President and highly recognized university president, spoke in opposition to Federal aid to higher education. We suspect that only in deference to his brother he did not speak out against Federal aid to education at the elementary and high-school level. He stated that Federal aid eventually leads to Federal control.

Certainly the News-Banner is in favor of receiving a Federal grant to help finance the construction of a sewage-disposal plant in Baxley. Yet the city of Baxley had already planned the project without Federal aid and would have completed it without Federal aid.

Today there is the worst shortage in history for engineers. So short is the supply that the Highway Department of Georgia has employed a recruiter to find engineers. Yet at the same time thousands of engineers are on the Federal payroll checking engineering plans just to see that they meet Federal-aid specifications. And more Federal aid means more Federal engineers.

We do not feel that the Federal Government should have no interest in the health and welfare of the people of America. What we do believe, though, is that the Federal Government should perform such services as it is found necessary directly and let the States render those which they are financially able to handle. In that way perhaps we can reduce the Federal debt and in time reduce taxes. But more Federal aid means more taxes and less return on the tax dollar. Somewhere the line must be drawn.

Federal Aid to Education

EXTENSION OF REMARKS
OF
HON. CLIFFORD P. CASE
OF NEW JERSEY
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. CASE of New Jersey. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD three editorials which appeared in the Manville News, Manville, N. J., as follows: "Creation of 2-Year Community Colleges with United States Aid Advocated by Senator CASE," in the December 27, 1956, issue; "Senator CASE's Proposal," in the January 3, 1957, issue; and "A College for Somerset?" in the February 28, 1957, issue.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Manville (N. J.) News of December 27, 1956]

CREATION OF 2-YEAR COMMUNITY COLLEGES WITH UNITED STATES AID ADVOCATED BY SENATOR CASE

Coupled with the warning that there soon will be no room available in the Nation's colleges, United States Senator CLIFFORD P. CASE, Republican, today called for consideration of an emergency Federal-aid program to create 2-year public community colleges for more than a half million qualified youths who will not be able to gain admittance to 4-year colleges in the next 5 years.

The junior Senator from New Jersey is suggesting that Federal grants-in-aid up to one-third the cost of construction and equipment be allocated to States participating in the program. He did not stipulate that he would sponsor legislation to create the program, only submitting his views for consideration.

The community college is the usual 2-year college expanded to include vocational training. It would provide 2 years of college credit at a low-cost institution for students who would get their final 2 years of study at a regular 4-year college.

Another main function of the community college would be to provide college facilities close to students' homes, thus reducing the expense of living away from home.

ENROLLMENT FUTURE

To support his proposal, Senator CASE reviewed studies made by President Eisenhower's Committee on Education Beyond the High School. This report predicted that by 1970 approximately 6 million students will be seeking entrance to college, about twice the present total attending higher institutions of learning. By 1970, however, the Association of American Colleges anticipates there will be space for only 4.35 million students.

The association also reported, according to Senator CASE, that within the next 5 years colleges expect to expand facilities by about 20 percent.

"This means," the legislator stated, "that some 368,800 qualified boys and girls now in junior and senior high school are doomed to disappointment unless we find some effective way to expand college facilities."

In this State, he continued, "if nothing is done beyond expansion now planned, by 1963 one out of every three young people in New Jersey wanting to go to college will find no place. By 1973 the 'no room' sign will be hung for 1 out of every 2 desiring college."

These figures "are minimal," he added, and are based on the assumption that about 30 percent of high school seniors will want to enter college.

"The failure to expand facilities for higher education will take its toll as our population continues to grow and the number of doctors, scientists, teachers, and ministers does not grow apace," he said. "It will take its toll in industry and commerce as higher and higher skills are demanded and proportionately fewer and fewer young people can provide them." The Eisenhower Committee has predicted a need for a 75 percent increase in professional and technical personnel by 1975, along with a 25 percent decrease in laborers."

NO COST FIGURES

President Truman's Committee on Higher Education recommended that "the number of community colleges be increased and that their activities be multiplied," Senator CASE pointed out, and President Eisenhower declared in a speech in Ohio that "I firmly believe that more education than that obtained in high school must be brought to every community and locality in such a way that every young person regardless of his means or lack of means can go to school for a minimum of 2 additional years.

Senator CASE would not predict the cost of the community college program.

"The actual amount would depend on what portion of the total problem Congress chose to attack and how much interest this approach stimulated among the States," he said. "Obviously, the program would require a large sum, but our Government is already spending millions and millions to assist our farmers, our airlines, and our shipping firms. Surely, our youth and their future are equally important."

Twenty-six States have laws permitting establishment of community or junior colleges, 16 of them providing State aid, according to Senator CASE.

[From the Manville (N. J.) News of January 3, 1957]

SENATOR CASE'S PROPOSAL

In suggesting that the Federal Government consider an emergency grant-in-aid program to stimulate construction of 2-year community colleges, New Jersey's United States Senator CLIFFORD P. CASE has come forth with a stimulating idea that should receive deep consideration in the Nation.

Senator CASE's proposal adds new definition to the lack of school facilities in the country. While most people realize that our elementary and high school plants are bursting with youngsters, they do not have this same perception of conditions beyond the secondary school level. It is possible that Senator CASE's recommendation may help create the kind of thinking on municipal, county, and State levels that the problem of higher education requires.

Taking for granted that municipalities throughout the Nation are making tremendous efforts to construct new elementary and high schools to house the Nation's increasing population of young people, Senator CASE, in effect, poses the question: "Where do the youngsters go from there?" While this is a question many people already are asking, it is a question many more people will be asking within the next few years.

Within a few short years this question will have the same loud ring that we have been hearing about elementary and secondary school shortages since the end of the last war, unless a program is prepared to meet the inevitable crisis.

Using figures drawn from the Association of American Colleges and the United States Office of Education, Senator CASE points out that by 1970—only 13 years off—there will be at least 6 million students ready for college, approximately double the present enrollment, but the Nation's higher institutions of learning will have expanded their facilities to accommodate less than 4½ million students. Extending the statistical approach, all this means that about 368,000 youngsters now in junior or senior high school will have their enrollment applications rejected by colleges and universities for lack of space, that by 1973 1 of every 2 New Jersey children desiring to enter college will not be admitted.

To close this terrifying breach, a breach which unquestionably could numb, the Nation's future, Senator CASE recommends that Federal grants—without Federal control over curriculum—be granted to States which would devise their own programs for creation of 2-year community colleges, where young people could pursue higher learning close to home at minimum cost, and where institutions could provide regular college credits for those who wish to continue in a 4-year college. The 2-year community college also would provide a curriculum of posthigh school general education with vocational training for the subprofessions and occupations of a technical nature."

Here is a challenge for the States, for the educators, for those who are vitally concerned about the future of America's youth. The junior senator from New Jersey has issued a profound thesis, one which we hope he soon prepares as a formal document for the consideration of Congress, where committee hearings could shed more light on the impending crisis—where action to forestall a tragedy could be initiated.

[From the Manville (N. J.) News of February 28, 1957]

A COLLEGE FOR SOMERSET

The Somerset County Education Association, which comprises teachers and supervisory school personnel, has organized a steering committee from among its membership to study the possibilities of creating a community, 2-year college in Somerset County, and this display of initiative should receive the wholehearted support and cooperation of every individual and organization interested in education.

As 1956 ended, United States Senator CLIFFORD P. CASE issued a recommendation that an emergency Federal aid program be created to construct 2-year public community colleges. His main premise was that unless such a program was initiated more than a half million young people qualified for college training would find no facilities available for them within 5 years because of the continuing growth of our scholastic enrollment. Collegiate plants are expanding, but not fast enough.

Using New Jersey as an illustration, Senator CASE pointed out in December that "if nothing is done beyond the expansion now planned by 1963, 1 out of every 3 young people in New Jersey wanting to go to college will find no place. By 1973, the 'no room' sign will be hung for 1 out of every 2 desiring college."

In our first editorial on this subject, immediately following the Senator's statement, the News declared that "Here is a challenge for the States, for the educators, for those who are vitally concerned about the future of America's youth."

It is with pleasure, therefore, that we note that action is now being motivated by Somerset educators. If the broad national figures and those for New Jersey provided by Senator CASE are as indicative as we believe them to be, the Somerset County Education Association probably will discover there is need for a community college in Somerset, especially if they remember that the Case proposal also provides that such community colleges include a curriculum of post-high-school general education with vocational training "for the subprofessions and occupations of a technical nature."

A note of caution is necessary at this point: Community college vocational training should not be confused with the need for a secondary technical and vocational school for Somerset.

Should the county's education association find need for a junior college in Somerset, there should be little difficulty finding a place to house such an institution of learning. Surely the quiet countryside in Montgomery or Hillsborough or Branchburg could provide as pleasant a scholastic atmosphere as any to be found in Somerset.

A site is secondary, of course. Of primary importance is determination of the need for a junior college, and on this line of thought we suggest that the education association lose no time in securing the facts. We also recommend that Senator CASE take his proposal out of the recommendation stage and prepare a bill for congressional consideration.

If anyone believes that dispatch is not required, we refer them to a report made by President Eisenhower's Committee on Education Beyond the High School, a report which predicts that approximately 6 million young people will be seeking entrance to colleges by 1970, and by 1970, according to the Association of American Colleges, there will be space for less than 4½ million students.

How USIA Wants To Spend $140 Million

EXTENSION OF REMARKS

OF

HON. HERMAN E. TALMADGE

OF GEORGIA

IN THE SENATE OF THE UNITED STATES

Thursday, May 2, 1957

Mr. TALMADGE. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an article written by Marshall McNeil, Scripps-Howard staff writer, as it appeared in the April 10, 1957, issue of the New York World-Telegram and Sun, entitled, "Where USIA's 140 Millions Go," together with an editorial entitled "USIA Is Too Big," from the same paper.

There being no objection, the article and editorial were ordered to be printed in the RECORD, as follows:

WHERE USIA'S $140 MILLION GOES—WANTS TV OFFICER FOR CLOSED STATION IN MOROCCO

(By Marshall McNeil)

WASHINGTON, April 10.—The United States Information Agency, charged with telling the American story to combat communism worldwide—

Wants to spend $56,400 to give free subscriptions for 2 United States newspapers to leading Englishmen, including 644 members of the British Parliament.

Wants to hire a television officer for its Morocco office, but the TV station there has been off the air for a year; may get back on this year.

Wants $150,200 for Latin American translations of 67 books, but their titles and those of books translated under earlier appropriations for library uses are not disclosed.

Defends as proper the publication of a "wall newspaper" in Bolivia which puts the United States Government in the role of taking part in a debate over Bolivian internal affairs.

Proposes to give selected foreigners who have studied in American colleges 2 books and 2 magazine subscriptions.

Bought $134,926 worth of phonograph records (net cost after discount: $78,251) for use in its centers around the world, including a Dizzy Gillespie record for Addis Ababa in Ethiopia and some square-dance music for Rangoon.

These are among the facts about USIA revealed in House Appropriations Committee hearings released today. The Agency asks $140 million to spend next fiscal year—$27 million more than this year.

Arthur Larson, new Director, emphasized in a recent speech that USIA had a single, central purpose: To present evidence to the peoples of the world that America's policies and objectives are in line with, and will advance, their legitimate aspirations for freedom, progress, and peace. He cited at the time numerous indications of USIA's effectiveness in this approach.

To the House committee he said the Agency was trying to help bring about a state of world opinion so that vast expenditures for arms wouldn't be necessary.

"A large share of the burden falls on the shoulders of USIA in easing world tensions and creating favorable world attitudes," he said.

To carry out its mission, the Agency wanted to spend $155 million next year. But the Budget Bureau enforced a $15 million cut. Even with $140 million USIA expects to have jobs for more than 12,000 persons next year.

Scraps of testimony, in between off-the-record statements appear to reveal that:

USIA secretly spent $100,000 subsidizing a commercial anti-Communist movie generally for American consumption. A top official of the propaganda Agency told the committee the movie turned out to be a box-office flop when shown in 1953. He said that unfortunately was the history of such films. The Agency refuses to disclose the name of the film or where it is being shown now. But the testimony indicated a foreign-language version now is being produced—without help this time from the taxpayers.

USIA is boosting its TV output. It said a check last fall showed its canned shows were being used on 138 of the 185 TV stations in the free world outside the United States and Canada.

The Agency is stepping up its radio broadcasts, known as the Voice of America. Instead of the $16,849,479 it got this year it wants $27,387,767. A new land-based transmitter would be built in the Greek area to replace the ship-borne transmitter, *Courier*, which has been tied up off the island of Rhodes for the past 4 years.

The Agency wants to spend $2,930,000 under its new budget distributing books. In addition to purchases of regular editions, it will print 7,455,000 low-cost paperback volumes in 19 languages to sell at 10 to 40 cents a copy.

USIA is preparing to publish another magazine for distribution in some Communist satellite country.

COST TO INCREASE

Cost of the libraries the USIA operates is $8.2 million this year. Proposed cost next year would be greater, but the committee doesn't know exactly how much.

In Paris this year, USIS (United States Information Service—the name the Agency uses abroad) gave away 111 copies of 40 magazines at a cost of $758. Included were copies of the Psychiatric Quarterly.

USIA operates a worldwide press service, the cost of which is estimated at $11.4 million for next year.

It does not consider itself competing with or overlapping the three American wire services, the United Press, Associated Press, and International News Service.

"The real difference between us and the commercial services," Mr. Larson testified, "is that they are in the business of sending out news for the sake of news; we are in the business of supporting United States foreign policies."

BASEBALL SCORES

The USIA wire service sends out football and baseball scores. But these are specifically marked "not for publication." They are intended to keep our Foreign Service personnel "abreast of the latest news at home and abroad."

The New York Times has an overseas edition, as does the New York Herald Tribune. Copies are easily available throughout Free Europe. But USIA proposes to give away subscriptions to these papers to about a thousand Englishmen. As to their identities, Mr. Larson requested that they "not be incorporated in the printed record. Such publicity would almost certainly result in embarrassing our relationships with many of these important people and might have the effect of destroying their future cooperation with our program."

Subcommittee chairman JOHN J. ROONEY, Democrat, New York, charged that the agency's motion-picture director, Turner B. Shelton, first denied to him that USIA had any connection with the anti-Communist picture which Mr. Rooney said he saw at a Washington movie house.

MEAGER DETAILS

But he said Mr. Shelton and Clive L. Duval 2d, the Agency's general counsel, came to his office the following day and told him the story. In today's published hearings Mr. Shelton declined to discuss the case on the record except for meager details.

The heavily censored 741-page testimony did not make clear to what extent USIA has participated in such ventures, although Mr. Shelton said this was the only case he knew of involving a film produced for distribution in this country.

Asked specifically whether the agency had "engaged in any other ventures such as this," he sought and was granted permission to answer off the record. And his reply was not disclosed.

Elsewhere, the hearings showed that the Agency has budgeted $755,924 in the new fiscal year for a secret motion-picture project known as Kingfish. Members apparently asked no questions about this.

SILENT ON FACTS

Mr. Shelton told the subcommittee USIA is making movies locally in 44 countries. Because of certain ramifications about which his testimony at his request was deleted, he declined to name either the countries involved or titles of the pictures.

These generally are documentaries, he said, which "advance the cultural interests" of this country.

Either on its own or under contract with private firms the Agency runs a steady budget of documentary picture production in this country and as of February 1 had 438 original productions of this kind in circulation. Its list of nonsecret films also included 610 acquired from other sources.

The agency asked $9,446,000 for its movie work in the new fiscal year, compared with $4,507,569 in fiscal 1957. Representative ROONEY said films he has seen were "not impressive" and that the subcommittee has reached the point "where we question the value of this whole operation."

But Mr. Shelton said some of the films had tremendous impact on foreign audiences. He cited particularly a series on the Hungarian uprising.

FAIR PARTICIPATION

The hearings also covered a Presidential request for $20 million compared to $9,900,000 this year—to finance American participation in international trade fairs and to subsidize foreign tours of American musicians, sports figures, and other artists.

The transcript showed that the Agency came in for its annual hard time at the hands of subcommittee members. They challenged the Agency's methods and questioned its results in selling the American points of view overseas.

But Mr. Larson said the world now is more willing than ever before to hear this country's story. He said this results from our break with colonialism in the Suez crisis and from unrest in the satellites.

USIA Is Too Big

Americans always have been dubious about foreign propaganda, including their own. Budget hearing testimony just made public by a House subcommittee will strengthen that attitude.

The United States Information Agency (USIA) is a postwar organization set up to tell the world about our democracy and offset anti-Americanism. It spent $87 million in 1956, will spend $113 million this year, and wants $140 million for 1958. The number of employees on its payroll has been increasing about 1,000 a year.

It has sent abroad swarms of ex-newspaper workers and others who must be falling over their own feet in their struggle to distribute Government handouts.

It employs, for instance, 17 Americans and 116 natives in tiny Cambodia, a country half the size of California and with one-third that State's population. It employs 489 in Japan, 222 in Korea. To tell its story it wants to spend $2,692,304 next year in France, $1,700,778 in Britain.

Most of these countries are already supplied with all the American news they can absorb, by the same worldwide press associations which serve American newspapers, and by magazines, American films, etc.

These private media have established a solid reputation for telling the truth about America and the rest of the world because—almost uniquely in the world—they operate without Government subsidy or political control.

USIA operation in this field is, at best, interference and duplication. At worst it raises suspicion as to the disinterested reliability of all American news.

There is need for an American information service which functions modestly and intelligently. It should supplement rather than compete with other agencies. Its projects should be specific and limited, rather than splattered all over the lot.

The best things USIA does are usually those which employ the fewest people and cost least money. Most USIA libraries and reading rooms are crowded and highly productive of good will. The exchange program brings

civic and youth leaders, labor unionists, and other influential men and women to this country to see for themselves. They usually return home enthusiastic about this country, anxious to combat anti-Americanism in their own lands.

But overall the USIA has far too many employees, trying to do far too many things. It wants to spend 24 percent more next year than this. It could spend 24 percent less and get more done.

Wisdom of Military Aid Seen in Turkish Forces

EXTENSION OF REMARKS
OF
HON. JOSEPH W. MARTIN, JR.
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. MARTIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by Ansel E. Talbert, military and aviation editor of the New York Herald Tribune, in the issue of that newspaper on May 2, 1957:

WISDOM OF MILITARY AID SEEN IN TURKISH FORCES

(By Ansel E. Talbert)

America's policy of giving military aid to nations willing to defend themselves against Communist aggression—now 10 years old—is paying off handsomely in the current Jordan crisis.

Less publicized than the dramatic movement of the United States 6th Fleet to eastern Mediterranean waters is the quiet and efficient deployment of crack Turkish armed forces units during the last few days to positions where they could do the most good in any Middle Eastern explosion.

Turkey, with at least 480,000 well-trained men under arms—a greater number, for example, than either Britain or France has available—has just moved some of its best infantry and armored outfits to the Syrian border. They could effectively neutralize any future move by Syria to swallow up the Hashemite Kingdom of Jordan—long a dream of the greater Syria nationalists, which recently has been revived by Soviet grants of arms and aircraft to the Syrian armed forces.

There is nothing imaginary about Soviet military aid to Syria and Egypt being increased since the Suez Canal crisis of last October. During the last 6 months Iron Curtain shipments to these nations through the Eastern Mediterranean have increased three-fold.

BILLION UNITED STATES EQUIPMENT

But chiefs of the Red Army would have a hard nut to crack in the shape of the Turkish Army, Navy and Air Force—which have been modernized with more than $1 billion in American equipment—should they ever make the unlikely decision to aid Syria and Egypt directly. The 3d Turkish Army, with headquarters at Erzurum, a city near the source of the Euphrates River, 450 miles east of Ankara, which figured in many past struggles between Russia and Turkey, has the task of guarding the Caucasus Mountain approaches.

Ten years ago this field army and the two other Turkish field armies had no tanks, no big guns, no mobile artillery and no modern airplanes to support their operations. Today, as a result of American help and the spending of nearly half the entire Turkish budget on defense measures, the Turkish armed forces are ready for anything.

JET BASES AVAILABLE

There is a string of jet bases across Turkey from the highly sensitive area of the Turkish straits—the Bosporus and the Dardanelles—to the Caucasus. Although these presently do not house any United States Air Force units, they could be made available overnight.

Adana, in the southern part of Turkey near the Syrian border, for example, has 14,000-foot runways and could handle the biggest existing bombers. It has huge hangers, workshops and barracks for three bombing groups. Some of the chief jet fighter bases are Diyarbakir to the northeast of Adana, Bandirma and Balikesir near the Dardanelles and Merzifon near the Black Sea. There are at least 11 modern air bases completed or near completion.

The gratitude of the Turkish people toward the United States is remarkable. A short time ago when this correspondent was passing through the Middle East, Turkey was holding a national celebration with ceremonies extolling America in each school throughout the nation to commemorate the 10th anniversary of the first American military assistance. This was given after the Soviet Union had put forward a claim to Turkey's eastern provinces and indicated an intention to take over control of the strategic straits.

Right now the Turkish Army comprises 16 infantry divisions 3 cavalry divisions and 6 armored brigades equipped with American Patton and Sherman tanks. The 1st Field Army headquarters are at Istanbul, while the 2d Field Army, which could reinforce either flank, is controlled from Konya in central Turkey, the 12th century seat of the Suljuk Turks and their Sultanate, which played a major role in the rise of the Turkish nation. There are 3 tactical air forces supporting the 3 field armies, and Turkey also has a small Navy trained for anti-submarine warfare.

Petaluma, Calif., Chamber of Commerce Endorses Trinity River Partnership Plan

EXTENSION OF REMARKS
OF
HON. HUBERT B. SCUDDER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. SCUDDER. Mr. Speaker, the board of directors of the Petaluma, Calif., Chamber of Commerce has taken a firm stand in favor of the partnership plan—by which the Federal Government would enter into an agreement with a private utility company for development of the power phases of the Trinity River project in northern California.

In taking this position after lengthy study, the members of this organization reaffirm the opinion of most Americans that "private enterprise should be encouraged, not hindered, by Government competition."

Joint development of Trinity River power facilities will allow private enterprise to do a job it is capable of doing while, at the same time, relieving the taxpayers of practically all the burden involved in this $225 million project. The partnership plan, as provided for in H. R. 6997, is among the best business proposals ever offered to the Federal Government and the taxpayers.

In support of this view, I desire to include with my remarks the following letter from the Petaluma, Calif., Chamber of Commerce:

PETALUMA CHAMBER OF COMMERCE,
Petaluma, Calif., March 13, 1957.

Congressman HUBERT B. SCUDDER,
House Office Building,
Washington, D. C.

DEAR CONGRESSMAN SCUDDER: At a regular meeting of the board of directors of the Petaluma Chamber of Commerce, a firm stand was taken favoring the partnership plan approved by Secretary Seaton for the development of the Trinity project.

After a lengthy study by our committees this plan was found to be sound and in the best interest of every citizen in the State of California as well as the Nation.

This organization is opposed to Government ownership and operation of industry and it is the opinion of this chamber that private enterprise should be encouraged, not hindered by Government competition. We also feel that public funds should be invested only where necessary to furnish adequate service that private enterprise cannot provide.

We urge your support of this plan as we feel it is a vital step forward in the development of the State of California.

Sincerely yours,

CLAUDE D. BRADFORD,
Secretary-Manager.

The 40th Anniversary of the National Coal Association

EXTENSION OF REMARKS
OF
HON. ROBERT C. BYRD
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. BYRD. Mr. Speaker, the National Coal Association, which was organized to deal with questions of fuel supply during World War I, will hold its 40th anniversary convention at the Shoreham Hotel in Washington June 4–6. What takes place at the convention will be of nationwide interest, since the status of the coal industry is so closely related to the general welfare and the national security.

The National Coal Association has come a long way since its birth four decades ago. It has played a vital role in periods of war and peace.

The Honorable Tom Pickett, executive vice president of the National Coal Association and a former Member of Congress, has been good enough to supply me with the advanced program of activities scheduled for the convention. I am sure that the program will have wide appeal, for—in addition to coal industry people—representatives of railroads, chemicals, and other allied industries will attend. I am pleased to note that the banquet speaker will be a learned member of the clergy for whom everyone has the greatest respect, Dr. Norman Vincent Peale, pastor of

Marble Collegiate Church in New York City.

Mr. Speaker, I am proud to inform the Congress that Mr. W. W. Goldsmith, president of Elk Horn Coal Co., Charleston, W. Va., is chairman of the NCA convention committee. Another resident of the constituency which I represent is Mr. L. Newton Thomas, chief executive officer of the Carbon Fuel Co., Charleston. He is president of the National Coal Association.

I am sure that our colleagues will want to join me in congratulating this organization for the excellent contribution it has made to the development of one of the basic industries of this Nation, coal.

Why Suggestion Awards Pay Off

EXTENSION OF REMARKS
OF
HON. IRVING M. IVES
OF NEW YORK
IN THE SENATE OF THE UNITED STATES
Thursday, May 2, 1957

Mr. IVES. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an excellent article entitled "Why Suggestion Awards Pay Off," which appeared in the February issue of the Armed Forces Management magazine.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHY SUGGESTION AWARDS PAY OFF

(By Henry G. Mazlen)

(Creative potential is that unique ability of bringing something new into the world—a new tool, design, book, song, idea, or method. It encompasses the capacity for thinking beyond the confines of existing knowledge and experience. It must precede both invention and copyright and is thus the basis for all progress.)

Within the Federal establishment, with its vast research organizations and particularly within the Department of Defense where a major portion of research is under the cloak of security restrictions, creative potential must not be neglected. In our world there is a constant race for new ideas, and it seems that America must remain ahead of all her idea competitors for sheer survival. It follows that our Government needs men and women with creative potential and that such employees must be encouraged.

In the commercial world, incentive for ideas lies in rewards reaped from marketing of patented or copyright works. Government has acknowledged that ideas are the secret and private property of the originator; to stay in his or her mind forever, or be made public. To induce those with creative potential to make their ideas public under Government protection, the patent and copyright laws were formulated.

There now exists a means for recognition and advancement related to the individual values of each public servant which can be measured against his or her creative potential and demonstrated contributions to progress.

At long last, a new law which recognizes the merit of awards for both ideas as well as performance, has been enacted. This law states, "The head of each department is authorized to pay cash awards to and to incur necessary expenses for the honorary recognition of, civilian officers and employees of the Government who by their suggestions, inventions, superior accomplishments, or other personal efforts contribute to the efficiency, economy, or other improvement of Government operations or who perform special acts or services in the public interest in connection with or related to their official employment."

Some men and women not only rise to meet what their particular jobs demand of them—but motivated by initiative, go beyond the prescribed limits to make valuable contributions to their own organizations specifically, and to the Government in general. A superior accomplishment toward efficiency and economy may not be patentable or copyrightable, but as a mark of individual effort, as an index of creative potential, it calls for deserved recognition and commensurate reward.

Clearly then, it is the duty and responsibility of management at all echelons to see that worthwhile contributions are properly credited to those who bring them forward. Management must recognize that there is no monopoly of ideas outside the Federal establishment.

Whoever has powers of observation keen enough to discover a need, self-confidence enough to believe that some method or device not previously tried is worth searching for, dissatisfaction enough with the existing order—and perseverance enough to work out a better way of doing a job—that person deserves to be encouraged and rewarded when the sum total of his or her efforts prove practical.

CREATIVE POTENTIAL LACKING

It has been asked why professors of English do not write our best sellers, why professors of chemistry and physics do not solve the mass of practical problems which impinge on these and related fields. We know now why our great songs are not written by concert artists, why our great symphonies are not composed by first violinists or conductors. The reason is that creative potential is lacking.

There is a saying that the "one who makes the model is not the inventor." This is the critical appraisal. Imaginative insight and inventive ability appear to go hand-in-hand and may be found in all walks of life, in all lines of endeavor and at all echelons of organization, from office boy to president.

It is a strange fact that new ideas have always encountered some form of opposition. The danger is that lethargy to change or outright suppression can frustrate those who really have good ideas. The history of invention is filled with heartbreaks. The patience of the creative personality is too often worn thin in crossing the desert of opposition.

Usually, all the good ideas come from the executives; but this is natural. The trick is to get those who are not in executive positions to develop creative potential and contribute to organizational progress.

In the Federal Government, the introduction of the suggestion box and the review of ideas by committees has tended to build confidence in the system. With continued encouragement, more and better ideas will evolve. It is surprising what a volume of ideas can be generated by a handful of people under proper stimulation.

Because it is human nature to become discouraged after a few disappointments, it is management's task to see that the suggestor who has submitted ideas which have not been accepted is made to feel that there is still plenty of room for improvement. Stephenson's locomotive, Fulton's steamboat, Edison's genius, and the contributions of Pasteur, the Wright brothers, and Einstein—all would have been lost to our civilization but for the indefatigable efforts shown by these idea men.

The greatest inventive contributions have come from men and women who were practically brought up on a diet of rebuke and scorn from friends, parents and strangers alike. They looked ahead. They didn't give up after 1 or 100 failures. Finally, they won out.

Thomas Jefferson was belittled for the Louisiana Purchase because his contemporaries lacked his vision. Today, unenlightened, irrational, intolerant attitudes toward progressive ideas would be unforgiveable. In the short span of some 50-odd years the ingenuity of man has attained a position which cannot even be measured against man's accomplishments over the past 300,000 years.

It is a fact that a significant part of this advancement was achieved by men and women working under the auspices of our Federal Government.

Unfortunately, security restrictions have precluded the free dissemination of these achievements and the identification of these benefactors in many instances.

The truth is that with technological advances, man's investigative faculties are becoming unshackled. There is no law, according to psychiatrists, which governs the production of ideas. Men with four university degrees after thier names are in no better idea "climate" than men who never finished high school. The scientist sorting his facts with cold logic is on the same creative plane with the lathe operator who recommends an improvement in machine design which increases production 100 fold and reduces costs. The question of worth is relative since the end result is progress; whether it takes the form of a master's thesis or a lathe worker's beneficial suggestion.

Within the Federal establishment with its extra-governmental affiliations, particularly in defense work, vast fields continue to be opened to innovators and investigators. Science, public health, communications, transportation, agriculture, industry—all have opened doors which confront us like new horizons. And in all these fields together with many, many more, there are Government employees whose creative potential is still to be awakened and stimulated.

Is it any wonder that management has this growing responsibility for finding and encouraging the minds we must have in the future we are all working for? When we remember that the Mayas of Yucatan actually had a calendar that lost but 1 day in 374,000 years, yet the Mayas possessed no instrument of precision to help them evolve it—what should not our creative potential be capable of?

We must also consider that often results will not be individual. In this respect, management must develop a standard of ethics in dealing with group accomplishments. By ethics in this special sense I mean doing everything possible to bestow group recognition plus individual recognition upon outstanding leader(s) of the group.

THREE TRAITS SHOWN

If an individual has ever accomplished anything worthwhile he or she has evidenced three admirable traits—organizational skill, experimental ingenuity and patience of a very high order. These criteria may assist management in selecting and training employees for specialized positions. These attributes tie in with the skill necessary for the accumulation of facts, systemization of observations, recording of conclusions. It is a form of articulateness which may be considered characteristic of innovators and research workers.

There is but one conclusion that you can draw from all this—that we must be prepared to receive ideas from all sources. There must be but one criterion. Does the idea contribute to progress; to efficiency and economy in the operations of the Federal Government, or to other objectives along these lines such as safety? If so, we are obligated to receive such ideas in good faith,

decide upon their merits and show the originator that his contribution is worthwhile.

No program of incentives and award can hope for success, regardless of law, if management does not believe in and subscribe to these fundamental truths about innovations and innovators alike. In many areas the search for ideas borders upon desperation. All echelons of management have been alerted by direct messages from the President and the Secretary of Defense. Instructions have been issued. Procedures have been formulated.

The onus lies heavily upon management to get the instructions carried out so that the full intent of the law will be met. The evidence will not be long forthcoming. As managerial leadership goes into full swing behind the awards program, the suggestion boxes will fill; measurable saving and documented efficiency in operations and records of unusual individual achievements will accumulate in all Federal organizations.

This testimony will prove beyond any doubt that the program of finding, stimulating, recognizing and rewarding creative potential has far-reaching benefits. And once the program is in high gear it will be management's task to keep it from retrogressing. Nothing remains static. There will always be room for improvement and need for improvers.

Rockets Open United States to Red Sub Attack

EXTENSION OF REMARKS
OF
HON. BOB WILSON
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. WILSON of California. Mr. Speaker, there has been a great deal of conjecture, and much misleading information on the strength or weakness of the Russian submarine fleet. In this regard, a series of recent articles in the San Diego Union and other Copley newspapers has helped to clarify the relative strengths of the submarine fleets of Russia and the United States.

This series of articles was written by the Copley newspaper's distinguished military expert, Mr. Rembert James, whose world travels and military knowledge qualify him as an articulate observer of this changing military balance of power.

Under unanimous consent I include these articles in the Appendix of the RECORD:

DEFENSES BEING READIED — ROCKETS OPEN UNITED STATES TO RED SUB ATTACK

(By Rembert James)

The perfection of the rocket has bared the coasts of North America, laying almost all of the United States open, in case of war, to a nuclear attack launched from Russian submarines.

Adm. Arleigh A. Burke, Chief of Naval Operations, has told Congress that this danger from the sea is perhaps more real than the threat of attack from the air.

Top Navy men say this realization is behind the new urgency of the United States Navy's efforts to develop an array of long-range devices capable of detecting and destroying submarines.

It also is the reason why the Navy has created a new antisubmarine command in the Atlantic and plans to incorporate all antisubmarine measures this command devises into the Pacific Fleet as well.

A reporter trying to piece together the facts finds that two sets of intelligence reports circulating among high officials in Washington largely explain the situation.

One set of reports confirms that the Russian submarine fleet, with 450 boats and building new ones at the rate of more than 1 a week, is constantly increasing its activity in both the Atlantic and Pacific Oceans.

The other group of intelligence papers reports that the Russians have test fired 50 rockets at ranges of up to 800 miles.

The United States Navy has been launching missiles from submarines for several years, and its top leaders assume that the Russians have the skill to build missile launchers into submarines.

If the missiles had a range of 800 to 1,000 miles, they could reach into almost every State. They could stand offshore 50 or 100 miles and hurl rockets with atomic warheads at targets as far inland as Chicago and Detroit. And, of course, they could hit cities along both the Atlantic and Pacific coasts.

The development of the rocket has turned the submarine into an entirely new weapon. Its main purpose in the future, naval leaders believe, will be to launch rockets, either of the aimed ((ballistic) type, or guided missile type.

Admiral Burke, in a recent appearance before the House Armed Services Committee, told of the need for rapid development of antisubmarine warfare detection equipment and weapons, and of what the Navy is doing.

EMPHASIS ON ANTISUBMARINE WARFARE

"The Navy places major emphasis on antisubmarine warfare," he said.

"We have to be able to identify enemy submarines at long ranges, and kill them at long ranges. We are now making progress in those areas.

"Most of the ships and weapons the Navy now has, or has under development, are designed to play some part in antisubmarine warfare."

Burke meant by this that Navy ships, submarines, airplanes, and helicopters are being fitted with new electronic devices to find enemy submarines.

Russia has submarine forces deployed in four areas—the Baltic Sea, the Barents Sea, the Black Sea, and in the Far East at Vladivostok and Petropaviovsk.

Vice Adm. Wallace M. Beakley, commander of the United States 7th Fleet, East, has reported the number of Russian submarines in the Far East at around 100, of which 60 or 70 are long range.

INCREASED SIGHTINGS IN PACIFIC, ATLANTIC

In the Pacific, as well as in the Atlantic, these Russian submarines rove the distances. Increasing numbers of sightings, many near America's coasts, have been reported since the Russian submarine fleet started taking to the seas in 1948.

Because of the width of the Pacific, and the comparatively smaller size of Russia's Far Eastern submarine facilities, the threat of submarine-borne rocket attacks is considered less pressing in the Pacific than in the Atlantic.

But with the offensive capabilities of submarines increasing so rapidly in the last few years, countermeasures have become a top priority in the Navy's defensive effort in both oceans.

This concern over the capabilities of Russian submarines is not confined to the United States. Canada has shown similar worry.

Defense Minister Campney told the Canadian House of Commons this month that Canada's Navy and Air Force will get a new air-to-water homing missile to use against the Soviet submarine threat.

"We must counter the Soviet concentration on the building of a large submarine fleet, and the prospect of long-range submarines with the capability of launching atomic missiles from several hundred miles offshore," he said.

SNEAK STRIKE THREAT—"NAUTILUS" SEA TESTS PROVE SUBMARINE ATTACK POTENTIAL

It was the performance of the *Nautilus*, the world's first atomic submarine, that awakened American military strategists to full realization of the frightful possibilities of a new Pearl Harbor-type attack coming from the sea.

During exhaustive tests in the Atlantic, the *Nautilus* outran its hunters. It outwitted those who would detect it, even on the close approaches to New York Harbor.

The *Nautilus* proved almost impossible to find, and wholly impossible to contain and neutralize with present antisubmarine warfare devices.

Although the *Nautilus* was not fitted out with rocket launchers, the lesson was there for all to see. It could have bombarded New York, or even Pittsburgh and cities farther inland, with missiles now in operational use in the United States Navy.

A Russian submarine, with nuclear power and the ability to launch rockets, could have done the same.

A hundred Russian submarines, nuclear-powered and fitted out with rocket launchers and missiles with atomic warheads, could have brought destruction to every American city on the Atlantic seaboard.

If the rocket range were stretched out to 1,000 miles—and the Russians have tested dozens of rockets that carry 800 miles—the whole eastern half of the United States, as far as the Dakotas, could have been brought under attack.

A similar concentration of Russian submarines, standing off the Pacific coast, could have hit every State west of the Rocky Mountains.

These tests of the *Nautilus* and its possibilities took place a year ago. During that time the offensive possibilities of submarines have increased greatly, along with improvements in rockets and nuclear weapons.

How far has Russia progressed in these fields? What are Russia's attack abilities now? And her likely abilities in the future?

Vice Adm. Frank T. Watkins, head of the Atlantic Fleet's new Antisubmarine Command, said recently that there is no positive evidence that the Russians have achieved nuclear power for submarines.

"But we can only assume that they are working on that," he said. "They would be fools if they didn't."

Watkins estimated that in any case the Russians will have nuclear-powered submarines of indefinite range within perhaps 5 years.

American intelligence experts have agreed that Russia has around 450 submarines, and is building new ones at the rate of more than 1 a week, possibly at the rate of 75 a year. All of the new boats are long-range, ocean-going types equipped with snorkel breathing devices.

Adm. Jerauld Wright, Commander in Chief of the Atlantic Fleet, says he has no certain knowledge that the Russians have developed the technique of launching missiles from submarines, but he said the Navy assumes that the Russians have that capacity.

It is not hard for competent naval men to achieve. The United States Navy began carrying and launching the Regulus missile from the submarine *Tunny* more than 3 years ago.

As for progress in the missile field, Western intelligence agents believed as early as 1955 that the Russians had an operationally reliable surface-to-surface rocket with a range of 400 miles, and were trying to develop it to travel 1,500 miles.

The United States Defense Department said early this year that the Russians had been

firing ballistic missiles more and more frequently since November of 1955, the month in which they tested a missile with a range of 900 miles.

Trevor Gardner, former Assistant Air Force Secretary, believes the Russians possess a ballistic missile able to travel 700 to 800 miles.

A new set of intelligence reports received in Washington reports that the Russians have test fired 50 rockets at ranges of around 800 miles.

RED SUPREMACY FEARED—NAVY IS RUSHING DEFENSE AGAINST SOVIET ATOM SUBS

The United States Navy is going all out to develop antisubmarine weapons powerful enough to protect this country with its 5,000 miles of coast line from a possible nuclear attack from the sea.

American naval officers refuse to talk even privately about the reason for this new urgency, but some Members of Congress who deal with defense matters have supplied what seems to be the answer.

These Congressmen believe the Russians have speeded up their efforts to produce an atomic-powered submarine fleet and that the United States Navy has secret information to this effect.

Admiral Burke, Chief of Naval Operations, says the United States defenses are strong enough to repel an attack against American shores by the conventional type Russian submarines, but even this would be a long and bitter fight.

It is not known whether Russia has built a nuclear-powered submarine, or whether Russia has submarines fitted to fire rockets, but in case of war, Russia can be presumed to have that capability.

Such submarines, powered with nuclear engines able to run indefinitely without refueling, could shoot atomic-tipped missiles from 100 miles off United States coasts into two-thirds of the 48 States.

For this reason, antisubmarine warfare has become a major part of the United States Navy's defense training.

SECRECY SURROUNDS RESEARCH

High United States naval officials have said several times the Navy has a new device that is more effective against submarines than anything previously developed. There have been hints of other breakthroughs in the Navy's research for long-range systems to find and destroy submarines. But secrecy covers most of this research, although certain basic facts are known and some details have been disclosed.

For example, the sonar detection range has been greatly increased. This is the system in which sound waves are sent out electrically under water, strike an object, and rebound.

Ten years ago the extreme range for reliable detection was about 1 mile. Now it is much greater, but just how much the Navy refuses to tell.

During the last 5 years the Navy has worked out a system in which a helicopter hovers low above the sea and lowers a sonar listening device. This enables the helicopter to locate a submerged boat and drop depth charges, or call on airplanes or surface ships to do so.

The Navy also has blimps that cruise slowly over the ocean and hover over submerged submarines. There are submarines that destroy other submarines. There are airplanes that carry electric magnetic detection units and there are sonar picket ships stationed in such areas as the North Atlantic.

UNITED STATES MAINTAINS AIR RADAR WATCH

There are specially built airplanes that keep a constant watch over the Atlantic with radar, an oceangoing extension of the Arctic radar stations.

The Navy has improved depth charges, including one reported to have an atomic warhead. It has a type of homing torpedo that floats in the ocean until a submarine engine's noise activates the mechanism and brings the torpedo diving after the noise. This torpedo explodes on contact.

There is even a revolutionary new searchlight, powerful as the headlights of 10,000 automobiles, light enough to be mounted on an airplane and able to spot a submarine under water.

The Navy's major submarine defense effort centers around its antisubmarine warfare task group—an aircraft carrier with other surface ships, and submarines, armed with a whole array of submarine-spotting and destruction systems.

TWO DEFENSE METHODS PLANNED

In the event of war, the Navy would have two ways of meeting the submarine threat. One calls for destroying the enemy's submarine bases—atomic bombing by the Navy and the Strategic Air Command.

The other provides for tight defensive measures in the Atlantic, Pacific, and Arctic Oceans, all the way from American shores to Russia.

In this drive to gain mastery of the enemy's submarine offensive capability, the Navy has had help from such scientific centers as Scripps Institution of Oceanography and Caltech, in California, and Massachusetts Institute of Technology, but mostly, the Navy has been forced to rely upon its own research, or pay for special research carried out by others. Industrial concerns have found only few ways in which underseas research seemed to have any commercial value.

This has meant that out of its current budget of $10 billion, the Navy had to use large sums on research. Naval officers say that this need continues, and is one reason why the Navy is to get $11 billion out of the 1957–58 defense budget of 38 billions.

Exposing the "Cheap Power" Myth

EXTENSION OF REMARKS
OF
HON. HUBERT B. SCUDDER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. SCUDDER. Mr. Speaker, under leave to extend my own remarks I desire to include a letter from Mr. Alfred W. Bowman of Novato, Calif.

In my estimation this expression of opinion from a citizen and a taxpayer is an outstanding exposé of the myth that public power is cheap. It states the case plainly and from experience that somebody pays for this cheap public power in the long run—and those who pay are the taxpayers.

Citing his firsthand experience with the TVA, Mr. Bowman urges adoption of the partnership plan for developing power at the Trinity River project in California.

I am pleased to submit, for the information of my colleagues, the following letter from a resident of my district:

NOVATO, CALIF., *March 30, 1957.*

Congressman HUBERT B. SCUDDER,
House of Representatives,
Washington, D. C.

DEAR FRIEND: I wish to go on record as favoring Pacific Gas & Electric Co.'s proposal to develop and distribute electrical power through a joint venture with the Federal Government at the Trinity River project.

In years past I owned and operated Bowman Manufacturing Co. in Memphis, Tenn., and was a beneficiary of the Government's Tennessee Valley Authority. My power bill was about half of that charged previously by the private enterprise, Memphis Light & Gas. I venture to say that Memphis Light & Gas could have cut the bill in half had it too been subsidized by the taxpayer. My cheap power bill soon faded into insignificance as my Federal tax bill soared. In short, who was kidding whom?

P. G. & E. is a very successful and well managed private industry whose business is generating and distributing electricity. I believe they can do a far better job in a joint venture than the Government has demonstrated in its venture into the public power field. Perhaps their rates won't be lower, but I am sure our taxes won't be higher on their account. They are heavy taxpayers both locally and federally. Let's keep them that way.

Therefore, owing to my firsthand experience with cheap power, I strongly favor and recommend P. G. & E.'s proposed plan.

With kindest personal regards, I am,

Very truly yours,

ALFRED W. BOWMAN.

Polish Constitution Day

EXTENSION OF REMARKS
OF
HON. EMMET F. BYRNE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. BYRNE of Illinois. Mr. Speaker, I would like to place in the RECORD a few remarks about Poland today since the Polish people will celebrate the anniversary of their constitution of 1791 tomorrow, May 3. This constitution, as we know, was one of the first democratic and progressive constitutions in Europe.

We are all familiar with dramatic events of the last year involving postwar Poland and I believe these events have contributed greatly to an emerging awareness in the Soviet bloc that the Communist ideology cannot endure forever in the countries which are under their domination. The Soviets may control economically and militarily but activities in recent months prove that the Polish people have not permitted an inroad into their spiritual life and ideals but have held on to their belief in liberty.

It is heartening to note that it was the workers who dared to raise their hand against Communist tyranny thereby demonstrating the fallacy in the Communists claim that their philosophy is the rule of the peasants and workers.

May 3 gives Americans everywhere an opportunity to pay tribute to the Polish people who are so valiantly struggling to again have complete freedom and to restore the bonds with the West and the United States. These ties have long existed. It was Thaddeus Kosciusko, of Poland, who volunteered his services to our continental Army in the American revolution. He fought so courageously for us because he believed in the principles for which we were fighting. He was made a brigadier general in 1783 and was awarded the Order of Cincin-

nati which carried the privilege of citizenship and an annual pension. Kosciusko was beloved by other American officers. Shortly before he died, and many years after his return from America, he emancipated his serfs in order to manifest his belief in liberty, equality, and fraternity.

The Striving of the People of Poland for Freedom

EXTENSION OF REMARKS
OF
HON. ROBERT W. KEAN
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. KEAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a very comprehensive address by the very able Representative from the Sixth District of New Jersey, Mrs. FLORENCE P. DWYER, on one of the most important events in the world today—the striving of the people of Poland for freedom and relief from the yoke of international communism.

This address, made before the 50th anniversary dinner of the Polish National Alliance Women's Department in Chicago, Ill., on March 24, 1957, merits the attention of every Member of Congress.

The address follows:

I am deeply honored to have the privilege tonight of addressing this distinguished gathering. I say this in all sincerity, and in all humility, for I know of no other organization in our land that has worked so tirelessly and accomplished so much in sustaining the eternal seed of American friendship in the bleak soil behind the Iron Curtain.

Yes, I am proud to join with you tonight in the observance of the 50th anniversary of the women's department of the Polish National Alliance, for I know the wealth of contributions members of your organization have made to the educational, cultural, civic, and social welfare developments of our Nation during these years.

I am proud to be with you tonight, for I know that our great Nation was born with the devoted help of Polish patriots.

I am proud to be with you tonight, for I share with you the conviction that the people of Poland thirst for freedom; that the spark of rebellion against godless tyranny which was ignited at Poznan still holds the bright hope of salvation for all the oppressed multitudes behind the Iron Curtain who are inching, step by step, along the road to freedom.

Certainly, this dream of freedom is not new to the Polish people; it is not a vision created in desperation by the hunger, the fear, the privation, the persecution of the Kremlin's ruthless communistic colonialism. The love of freedom is deeply rooted in Poland's culture. The Polish people were one of the first in Europe to strive for this God-given right; and, though its land too often has felt the fury of freedom-crushing invaders, this spirit of liberty has never died.

This inborn belief in freedom and human dignity, shared in common by our countries, has molded a bond of spiritual kinship between the people of Poland and America. It is a bond that has endured since the bitter days of our own struggle for freedom when Pulaski and Kosciusko left their homeland to fight for our cause.

Even beyond this spiritual kinship, Poland has deep roots in America. The tide of Polish immigration, through the years, has served to enrich our culture in every field of human endeavor. Today, our 7 million Polish Americans can look with pride on the heritage they and their forefathers have brought to our land.

I have always believed that the true hallmark of the American way of life is that, in this land of ours, it is possible for a person to be a 100-percent United States citizen and still cherish and perpetuate the best of the culture and the customs of the country of his origin.

This is important in a free nation such as ours, for we are descendants of every nation and every race on earth. And each has played its part in shaping American life. Be we of Polish descent, or Irish, or Italian, or German, or English—or of any of the other nationalities—we should be proud of our ancestral heritages, and seek to keep them alive and part of our American life.

The love of native country and the pride of customs and culture are particularly strong among our Polish-American citizens. The strength of these ties is reflected in the constant communication between you and your loved ones in Poland—a communication which even the Communists have not been able to sever.

It is important that this communication continue. The letters you write and the packages you send may not be dramatic; they may not make headlines. But they are very important, for they have comprised, in recent years, the single lifeline through which America has been able to keep alive our friendship with the Polish people. They have served to brighten the lives of those behind the Iron Curtain, and to remind them that they have not been forgotten or abandoned by the United States.

But, in the pattern of events of the past year in Poland, these questions arise:

Can this single lifeline of hope continue indefinitely to sustain the proud spirit of the Polish people?

Can hope alone sustain the determined seeking of liberty of a people whose economic and financial resources have been plundered by the forces of communism?

In searching for answers to these questions, I believe it is important to review the events in Poland which have sent shock tremors of unrest and rebellion throughout the Soviet Union's network of captive nations.

I have, just as you, vivid memories of the Poznan riots of last summer. Indeed, I was privileged—as a member of the New Jersey State Legislature last year—to introduce a resolution, which was quickly enacted, memorializing the undying love of freedom of those Polish patriots who were jailed or massacred in Poznan when they arose to demand "Bread and freedom and the right to worship God."

The defiance of the vast power and ruthlessness of the Soviet Government by a people who refused to surrender their spirits or their minds to the invader is one of the inspiring milestones in mankind's never-ending search for the light of freedom. It was, in the greatest sense, the turning point in the history of the relations between Moscow and its satellites—an inspiring example of courage and determination that turned the eyes of the world, especially behind the Iron Curtain, on Poland and the Warsaw government.

The causes of this rebellion against tyranny within Poland which has shaken the very foundations of the Kremlin's program for world conquest are many.

Basically, we all know, the Polish people through the years have faced westward because of their cultural traditions and their Roman Catholic faith. Poland's 28 million people—unshakably Catholic, proudly nationalistic and bitterly anti-Russian—have no common bonds or sympathies with the Kremlin, nor with the 1,500,000 members of the Polish Communist Party who ruled their lives with blueprints supplied by Moscow.

In addition to this vital factor, by mid-1956 there was a widespread discontent in Poland generated by a continuing economic crisis. Life in Poland was becoming more and more difficult. Living standards dropped, and prices kept climbing to higher and higher levels. The few consumer goods that could be purchased were priced far out of the reach of the average person.

In general, the Polish people were paying the price for years of poor and self-centered planning by the Communists. The entire Polish economy, under the Soviet Union's direction, had been geared to heavy industrial production without regard for the stable, balanced economic development necessary for a people's welfare. At the same time Polish trade was geared solely to satisfy Soviet interests rather than Polish interests. Historic trade patterns with the West were cut off, much to Poland's disadvantage, for Poland could not supply the legitimate needs of her people with trade with the East.

All of these factors contributed to a worsening economic crisis which, in 1956, went beyond the point of toleration.

Political elements also entered into the complex pattern of events and contributed to the general air of discontent. These elements, for the most part, had their origin in the Moscow regime's sudden switch of policy to an anti-Stalin line, in which Stalin was exposed for what he was and what he did. This act by the Soviet leaders in revealing before the eyes of the world the lie of Communist propaganda touched off immediate repercussions behind the Iron Curtain. In Poland, where anti-Russianism has a long and respected tradition, the repercussions were particularly violent. The Polish people began to seriously question past policies and past loyalties.

This mounting discontent reached a climax with the Poznan riots last June. The following 4 months brought increasing political ferment and potential danger for Poland, until—at last—the Warsaw government faced up to the responsibilities of its own misdeeds and mismanagement and returned Wladislaw Gomulka to power.

Gomulka, a Polish Communist leader who had been purged from the party and imprisoned for his anti-Stalin, nationalistic deviations, instituted a program of action that contained many concessions to the Polish people. Cardinal Wyszynski, Poland's beloved anti-Communist, anti-Soviet Catholic leader, was released from prison. Wider religious freedom was given to the people. General modifications in economic planning were proposed after a realistic reappraisal of Poland's deepening economic plight. The new Gomulka regime even responded favorably to President Eisenhower's proposal for economic aid.

In the cultural field, other concessions were made. Open criticism of the Government and Soviet Russia appeared in the public press. And, in the political field, some changes in the electoral law brought about a small degree of parliamentary reform. A tighter rein also was placed on the dreaded secret police.

Particularly dramatic in this abrupt change in leadership was the removal from office of pro-Kremlin Polish Communists who advocated slavish obedience to Russia, and the ouster of Marshal Rokossovsky, the Soviet military leader whose name had become a symbol of fear and persecution in every Polish home. All of these pro-Soviet offi-

cials were replaced by Polish Communist nationalists as Gomulka guided the Warsaw government on a new course of national communism which he maintained would be dedicated mainly to Polish interests.

The background upon which these changes took place heightened the tense air of danger in Poland. Hungary was in the grips of revolution. Soviet troops in Russia and East Germany were alerted, and in Poland the Red Army began preparations for another of the Kremlin's ill-famed maneuvers. The crisis finally subsided, at least temporarily, when the Soviet Union agreed to recognize the Gomulka government after assurances were given that Poland's relations with Moscow would not be altered substantially except for greater Polish independence.

Thus, for the moment, Gomulka's Polish "National Communist" regime has succeeded in its war of nerves with the powerful Soviet Union. But the struggle is far from over. Gomulka now must strengthen his regime, if he hopes to survive. Politically, he has been striving to do this by reshaping the party apparatus and strengthening it with his own loyal followers. However, the most critical problem facing Gomulka today is, without question, to solve Poland's economic ills. Should Gomulka fail, the prospects of the future of Poland's national communism would be dim.

During the past months, Gomulka has taken steps to remedy Poland's sick economy. For instance, pressures on the farmers have been eased. But it appears increasingly evident that Gomulka is placing his greatest hope on substantial economic aid from the United States. The Poles need farming and mining machinery; they need cotton, fats, and oils; they need many of the agricultural products which we have in surplus and which we have been using in our extensive economic aid program.

In recent weeks, a Polish delegation has been in Washington, conferring with our Department of State on means of expanding our economic relations with Poland and helping the Polish people in their hour of need.

These negotiations involve problems as complex and as fraught with significance for the entire world as almost any phase of our present-day international negotiations.

Most Americans, I am sure, agree that we should welcome any progress made in Poland—or in any other nation behind the Iron Curtain—toward a greater measure of freedom and sovereignty.

Our Government, in entering negotiations with Poland, is not urging nor trying to force upon the Polish people any economic, social, or political system or ideology. Our Government's only hope is that the Polish people eventually will be given the liberty to choose freely whatever system they want.

In general, our Government has taken a cautious attitude in these negotiations.

President Eisenhower's administration has manifested its interest in giving some form of aid to the Gomulka regime in Poland. Now, the purpose of this policy is not to aid any sort of communism. The doctrines of communism are repugnant to all free peoples, and they will remain so whether they are promulgated from Moscow, Warsaw, Belgrade, or any other capital.

No, our Government's policy is not to interfere in the internal affairs of Poland, nor to encourage the cause of communism. But our Government does have an enormous interest in extending the area of freedom from Moscow's domination as the best means of discouraging aggression and enhancing the eternal hopes for a sound and lasting world peace.

This, I firmly believe, is the objective we in the Congress must keep in mind as we view the question of aid to Poland.

I believe we should not close our minds to these negotiations. We must give the State Department our faith and our confidence as it proceeds with the delicate shaping of this policy which well may serve to ease the satellites toward a greater degree of independence from Moscow.

These negotiations take time, and patience, and confidential discussion. Once the policy has been formulated, the Congress can exercise its responsibilities under the Constitution. But, until that time—when we begin our study of such a policy in all of its implications—we should not bind ourselves with a rigid, dogmatic position which will make attempts at successful negotiation impossible.

This is most important at this time, for our policymakers are faced with many grave questions as they proceed with these negotiations.

In the first place, the Eisenhower administration is confronted with severe legal restrictions in seeking to administer some form of aid to a Communist-controlled country.

Long before last year's satellite rebellions began, Congress passed the Battle Act, which prohibits aid to Communist governments. There was a need for such restriction at the time. But now the question arises whether such restrictions should not be at least partially eased to fit the pattern of freedom-inspired unrest behind the Iron Curtain.

But, even beyond such legal questions, there is a need for great caution in aiding such satellite nations as Poland during this transitional stage between complete suppression and complete freedom. The welfare of both the people of America and the people of Poland demands such caution.

Briefly, our dilemma is this: If the United States does not aid Poland, the Poles may be compelled to turn to the Soviet Union for the assistance we were not prepared to extend. As a condition, Poland probably would be forced to include in its government more of the pro-Moscow Communists, and thus sacrifice what degree of independence it has achieved.

On the other hand, were we to grant Poland substantial aid through loans and credit, we doubtedlessly would run the risk of provoking intervention by Soviet Russia. It happened in Hungary. Russia would not tolerate a Hungary which was not tied securely to the Soviet Empire. It is probable that Russia would neither tolerate a genuinely independent Poland, nor any fundamental change in the structure of the Polish state. Russia today tolerates the Gomulka regime only because it is Communist and retains a certain loyalty to Moscow.

Also, there is the argument that aid to Poland would strengthen the Communist regime and make it difficult for the evolution of any genuine democracy there. Communism, whether it be Stalinist or nationalist, is fundamentally opposed to the ideals of democracy; and it follows that if we strengthen a Communist regime, we reduce the possibilities for the gradual emergence of democracy. Perhaps, what now appears to be a short-term gain may, in the long run, prove to be a burden of oppression that would be impossible to dislodge.

On the positive side, however, there is the argument that to aid Poland is to aid the Polish people, and not the Warsaw government. It is to make life easier for the Poles; it is to ease the burden of oppression from their tired shoulders; it is to give them a chance at a measure of the necessities of life.

These are some of the problems that face our Government today as it carefully considers the question of expanded trade relations with Poland as a measure of aid to the Polish people. The concern of our Government—which for so long has been the beacon of hope to the oppressed, the hungry, the homeless of the world—is for the welfare of our own people and for the people of Poland—and not the Warsaw government. We cannot afford to be impatient, or too demanding, as much as our hearts weep for the people of Poland. We must remember that the problems involved are complex; that the situation is charged with many dangers, both for us and for the people of Poland. We must remember, no matter how loudly our instinct calls out for the relief of hardships, that headlong and ill-advised action could only serve to wipe out the flickering light of the beginnings of freedom in Poland.

I believe, however—as President Eisenhower believes, and as he and the Department of State have clearly indicated—that we should take cautious steps to strengthen Poland's independence. I believe, in weighing both the good and the bad factors, that it is vital to extend to the Polish people a judicious measure of the aid they need so desperately.

Six years of World War II cost the United States alone $390 billion. By this estimate, just 1 day of that war cost our people nearly $200 million, or less than the amount we might loan to Poland to stave off an acute food shortage.

If the giving of such aid will help the Polish people pry themselves loose from the Soviet grip, and to develop a society along their own lines, it will be worth the price. If American aid assists or speeds the process of liberalization, it will be the cheapest and most effective—as well as the most humane—offensive the United States can mount in the cold war.

Unless we take such steps, there can be no hope for eventual liberation of the captive nations of the world; there can be no real meaning to the cause of freedom we have sought to advance across the horizons of the world.

Federal Aid for School Construction

EXTENSION OF REMARKS
OF
HON. H. ALLEN SMITH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. SMITH of California. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter, dated April 24, 1957, from Paul H. Lambert, president, Burbank Chamber of Commerce, Burbank, Calif., concerning opposition of the board of directors of the Burbank Chamber of Commerce to Federal aid for schools construction program:

BURBANK CHAMBER OF COMMERCE,
Burbank, Calif., April 24, 1957.

The Honorable H. ALLEN SMITH,
Representative United States Congress,
Los Angeles, Calif.

DEAR ALLEN: At a recent director's meeting of the chamber of commerce, the board of directors went on record reiterating their position as opposing Federal aid for schools construction program.

This position was taken by the board for several reasons. First, there is no wealth within the reach of the Federal Government that is not within the 48 States and the outlying Territories. If Federal aid to school construction is to be done on any basis, it could be a foot in the door to an ever-increasing expenditure program.

Secondly, Federal aid always raises the inherent threat that it will lead to Federal control and furthermore local school districts and the States which have the greatest problems of school housing are meeting their own needs, even though it takes their resourcefulness as well as their resources.

Sincerely,

PAUL H. LAMBERT,
President.

Stark County Board of Elections Recipient of American Heritage Foundation Award

EXTENSION OF REMARKS
OF

HON. FRANK T. BOW

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. BOW. Mr. Speaker, I am proud to announce that the Stark County Board of Elections, located in my home city of Canton, Ohio, has been selected for an award from the American Heritage Foundation for the best job done by a county election board in the national nonpartisan register, inform yourself and vote program in 1956.

I offer my congratulations to the clerk of the board, Hon. James Seccombe, who served the 16th District as a Member of the House in the 76th Congress, and to the members of the board and the staff who did such excellent work last year.

I wish to include in the RECORD the letter received by Mr. Seccombe, notifying him of the award, and the story from the Canton Repository giving details of the accomplishment which brought this honor to our county. Members of the Stark County Board of Elections are Paul M. Perkins, chairman, Lou Ella H. Buker, Vera L. Elliott, and Henry W. Kattman. Members of the staff of the board include J. Harold Hogan, deputy clerk, Mildred Mensch, Margaret Neel, Audrey V. Sickle, Sophie Hahn, Marie Dick, and Loddie Neumann.

The letter follows:

THE AMERICAN HERITAGE FOUNDATION,
New York, N. Y., April 10, 1957.

Mr. JAMES SECCOMBE,
Clerk, Stark County Board of Elections, Canton, Ohio.

DEAR MR. SECCOMBE: We want you to be the first to know that the Awards Committee of the American Heritage Foundation, after evaluating the work of more than 7,000 participants, has selected the Stark County Board of Elections to receive a major American Heritage Foundation award for the "best job by a county election board" in the 1956 national nonpartisan register, inform yourself, and vote program.

The award is a 12-inch by 18-inch reproduction of the beautiful illustration, George Washington the Soldier, by the eminent artist, Arthur Szyk, and it carries a citation of appreciation.

Perhaps you would like the award to be presented to you at a particularly appropriate time and place. Or, if you prefer, we can simply send it to you. Please let us know your wishes.

Again, our heartfelt thanks and deep appreciation for all that you have done to advance the Foundation's continuing program to move more of our fellow-Americans from the role of passive spectators into that of active, participating citizens.

Sincerely,

JOHN C. CORNELIUS,
President.
WALTER BEDELL SMITH,
Chairman.

[From the Canton Repository]

CHOSEN AMONG 7,000—AWARD CITES WORK OF FALL CAMPAIGNS

The Stark County Board of Elections has been selected from among 7,000 election boards nationwide to receive a major American Heritage Foundation Award for the "best job done by a county election board" in the national nonpartisan, register, inform yourself and vote program.

Notice of the selection has been received by James Seccombe, clerk of the Stark County board, from Walter Bedell Smith, chairman, and John C. Cornelius, president of the American Heritage Foundation.

The award was based on a two-part program conducted by the Stark County board last fall. First aim was to register as many of the county's voters as possible, and in this the board was eminently successful. A record total of 148,702 electors was on the rolls for the November elections. Previous high was in 1952 when 145,608 voters were eligible to cast votes.

The second phase was to get out the vote and this also was successful in setting a new record. A total of 134,529 voters cast ballots, compared to the previous high of 131,142 in 1952.

The award will be a 12-by-18-inch reproduction of George Washington the Soldier by Arthur Szyk. It will carry a citation of appreciation for the work done by the Stark County board.

The letter from the foundation officials left it to the local board's decision on how and when the award will be presented. Mr. Seccombe said he will meet with the board and will suggest the presentation be made at a meeting here.

He said he also will suggest invitations to attend the meeting be sent to General Smith, who has served as President Eisenhower's chief of staff, or Mr. Cornelius.

Selection of the Stark board for this honor was based largely on a scrapbook comprised mainly of clippings from the Repository, which worked in very close cooperation with Mr. Seccombe and the board in promoting registration and actual voting. The campaigns were bulwarked effectively in their respective territories by the Massillon Independent and the Alliance Review as well as the county's several radio stations.

Mr. Seccombe said he already has received a telephone call and telegram from Ted Brown, secretary of state and Ohio's chief election official, congratulating the Stark board on its achievement.

He said Mr. Brown informed him he wants to attend the presentation meeting here and that the Stark board also will receive a special citation for its registration and vote promotion at the meeting of the Ohio Election Officials Association at Cleveland July 20–22.

The vote-registration campaign spearheaded by the election board, in addition to a continuous series of newspaper stories and editorials, featured numerous signs around the board of elections office. These queried: Is your name in the book?

Music was broadcast throughout the day, starting with hymns in the morning hours and including waltzes, marches, and polkas as the day progressed.

Parking on Second Street NW., between Market and Court Avenues was reserved for persons coming to the board's offices to register. In the case of persons who were crippled, board clerks would go out to the autos to register them. At night, sparklers and red flares were used to create a holiday mood and attract attention to the campaign.

The registration drive was climaxed September 21 when the offices remained open all night to accommodate voters unable to register during the conventional hours. This brought a total of 479 registrations and 91 transfers.

"Ours was the only board in the State and, as far as the American Heritage Foundation could determine, the only board anywhere that remained open all night for the convenience of the voters," Mr. Seccombe said. "It entirely removed the time element as a reason for not registering to vote."

The board also maintained extra hours at its offices in Massillon and Alliance City Halls. Branch offices also were opened in 18 Stark County villages for registration.

The second phase of the campaign, aimed at getting out the vote, found a united nonpartisan effort at work, Mr. Seccombe pointed out in a letter to the foundation which accompanied the scrapbook.

After registration was ended, the board received effective cooperation of labor organizations, civic and fraternal groups, and the parent-teacher association in getting out the vote for the November elections. This included distribution of lapel tickets worded: "I Will Vote—Will You?"

Both parties made automobiles available for persons needing transportation to and from the polling places. A school was held for 2,500 poll workers and there was not a single delinquency or absence among them on election day.

Bespeaking the efficiency of the election organizing was the low discrepancy in the figures of the unofficial count and the official count last fall, Mr. Seccombe informed the foundation.

The scrapbook contained letters from the mayors of Canton, Massillon, and Alliance, the Canton Chamber of Commerce and from district 27, United Steel Workers of America, complimenting the Stark board on its registration and get-out-the-vote campaigns.

The letter from the foundation notifying Mr. Seccombe of the Stark board's selection for the honor concluded with:

"Our heartfelt thanks and deep appreciation for all that you have done to advance the foundation's continuing program to move more of our fellow Americans from the role of passive spectators into that of active, participating citizens."

In commenting on the award Mr. Seccombe said:

"This award from the American Heritage Foundation is greatly appreciated. It is an honor to which we aspired and which we now accept with humility.

"To be selected from more than 7,000 participants is, we feel, an achievement in which we can all share.

"The award is accepted on behalf of the Stark County Board of Elections and its many employees, who all played a part in making this recognition possible.

"In the brochure submitted for the consideration of the judges of the foundation, the work of the Canton Repository, in story and picture, was liberally displayed.

"The Repository's registration and get-out-the-vote campaign contributed heavily to the success of our effort.

"We wish to thank all who played any part in the election board's program. We can all rejoice in the honor it has brought to Stark County."

Mr. Speaker, another honor has come to the 16th Congressional District of Ohio with the announcement that the New Philadelphia Chamber of Commerce received the national second place merit certificate of the United States Chamber of Commerce for its outstanding program and accomplishments.

I include with my remarks a news statement giving details of this award to New Philadelphia:

WASHINGTON, D. C., April 30.—The New Philadelphia Chamber of Commerce was last night awarded a national second place merit certificate by the Chamber of Commerce of the United States at the leadership recognition dinner held at the Statler Hotel. The award was for program of work activities and achievements and outstanding accomplishments for communities of population up to 25,000 in the United States during 1956. The dinner was a featured event of the national chamber's 45th annual meeting.

In the program of work category the New Philadelphia Chamber of Commerce was

judged on its achievements in developing and conducting a well-balanced program of effective activities in business development, community betterment, good citizenship, and organization improvement.

The award was accepted for the members by Clayton D. Hatch, chamber president, and Eugene V. Endres, national councilor.

Mr. Hatch stated that the chamber's award was based on the activities of 2 of its councils, 25 of its committees, 3 of its affiliates, 30 chairmen, 150 committeemen, and members, and some 5,000 man-hours of work and participation.

The national winner in the program of work category was Longview, Tex., Chamber of Commerce (population 24,502); second, New Philadelphia, Ohio, Chamber of Commerce (population 12,948); and third, Huntsville, Ala., Chamber of Commerce (population 16,432), last year's national winner for program of work activities.

The material, information, and the program of work of the New Philadelphia Chamber of Commerce will be preserved in the national chamber's library and will be referred to and used in the future by local chambers everywhere.

Mr. Speaker, nationwide recognition has come to John Bentia, one of the outstanding young business leaders of my congressional district.

At 39, he has been chosen to receive the Horatio Alger Award of the American Schools and Colleges Association, thus joining a distinguished company which includes former President Herbert Hoover, Secretary of Defense Charles E. Wilson, and Capt. Eddie Rickenbacker.

The full story of this achievement was told in a recent issue of the Alliance Review, the newspaper John once served as a carrier. Under leave to extend, I include the article in my remarks:

BENTIA, WHO STARTED AS STOCKBOY, IS YOUNGEST TO GET HORATIO ALGER AWARD

A 39-year-old Alliance industrialist will be the youngest American ever to receive the coveted Horatio Alger Award of the American Schools and Colleges Association.

John Bentia, president and general manager of the Alliance Manufacturing Co., today was announced a winner of the 1957 Horatio Alger Award. He and several other outstanding men will receive the awards at presentation ceremonies May 9 at the Waldorf Astoria Hotel in New York.

Among those who will receive the awards this year with Bentia are: Gwilyn A. Price, chairman and president of Westinghouse Electric Co.; Joyce C. Hall, president, Hallmark Greeting Cards Co.; Dr. John J. Sheinin, president, Chicago Medical School; and Harry Sugar, president of Alsco, Inc., Akron.

Winners in previous years included such notables as Charles E. Wilson, Secretary of Defense, then head of General Electric Co.; Bernard Baruch; Dr. Milton Eisenhower; Conrad Hilton; former President Herbert Hoover; Charles F. Kettering; Gen. David Sarnoff; and Capt. Eddie Rickenbacker.

CARRIED THE REVIEW

Bentia was born in Alliance, the son of Rumanian immigrants. His first job came at the age of 5 when he carried the Review as a newsboy's helper in the north end of the city. He continued working throughout his childhood and youth—after school hours, on weekends, and holidays—putting his earnings in the family financial pool.

Bentia was graduated from Alliance High School and worked his way through Mount Union College by operating presses and as a heater at the Alliance Drop Forging Co. He received his bachelor of science degree in chemistry from Mount in 1938.

Upon graduation, he started work at the Alliance Manufacturing Co. as a stockboy in the storeroom. He quickly worked his way up the ladder, moving to the sales department, to purchasing, priorities, and then back to sales as sales manager. The next steps were vice president in charge of sales, then company vice president, executive vice president, and then president of this $20 million manufacturing company, a post he assumed in 1954.

OTHER POSITIONS

In addition he is vice president of Consolidated Electronics Industries Corp., parent firm of Alliance Manufacturing Co.; a director of the Alliance First National Bank, and a director of the Salem China Co.

Bentia at present is chairman of the Record Changers & Phonograph Committee of the Radio-Television Electronics Manufacturing Association, on the Government Contract Committee of the National Association of Manufacturers and was a member during World War II of the Dyno Motor Subcommittee of the National Munitions Board.

He has been active in community affairs, including the manufacturing division of the chamber of commerce, United Fund, YMCA, Red Cross, and other local campaigns.

Bontia, when reached in New York today where he is attending a directors meeting of the Alliance Manufacturing Co., said he did not deserve the award. He said he felt humbled in being put in the same company with such past winners as Charles E. Wilson, Bernard Baruch, Charles F. Kettering, David Sarnoff, and others.

LAUDS MOTHER

He said any success he might have attained comes from the persons around him. He listed his mother with whom he makes his home at 2043 South Union Avenue, his staff and coworkers as his helpers. "They all have been helpful and wonderful," he commented.

The national committee which makes the Horatio Alger award quoted Bentia as attributing his success to "determination, hard work and God-given good health." Even since the early 1940's Bentia has been known to work from 12 to 14 hours a day, 6 and 7 days a week.

COLLEGE INCIDENT

Bentia is convinced that by long hours of alert, concentrated study, one can overcome innate mental handicaps. He recounts an incident in college chemistry to prove his point: a classmate—dull, homely, naive—had started at the bottom of the class. Four years later, to the complete surprise of all, he ranked third—a position achieved by constant "plugging away, long hours, sheer determination."

The realization that the student had overcome his own handicap by extraordinary hard work crystallized in Bentia's mind a "never-say-die" attitude.

Possessed of a tremendous curiosity about all things, Bentia is an avid reader on subjects outside his immediate interest—currently he's concentrating on botany, female psychology (he's a bachelor), agriculture—and especially biography and autobiography.

During times of sustained work—when "staleness" is threatening—Bentia often relaxes by reading biographies of successful men. This serves as a catalyst, because he has always been spurred on by the success of others.

Comparing present-day opportunities to those of the past, Bentia candidly, yet emphatically asserts:

"There are infinitely more opportunities today. Chances for success are much greater simply because more and more men are seeking security rather than competitive success. For the really determined individual, unafraid of hard work, today's opportunities offer less competition than ever before. Actually, the less capable person now has more chances for success than he ever had in the past."

Dr. William F. Verdi, Famed Surgeon

EXTENSION OF REMARKS
OF
HON. ALBERT W. CRETELLA
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. CRETELLA. Mr. Speaker, the city of New Haven, the State of Connecticut, and, indeed, citizens throughout the country and world, are sorrowed by the death of a great man and outstanding surgeon, Dr. William Verdi, at his home on April 21.

I had the pleasure and honor to know Dr. Verdi. He had earned the wide admiration, love, and respect which was his during the many years he had selflessly served his fellow men, his community, and his country. His great contribution to medicine will forever be recorded in the annals of medical history.

Below is an article and an editorial from the April 22 New Haven Register paying tribute to Dr. Verdi:

DR. WILLIAM F. VERDI

On rare occasions there comes among us one more richly endowed in skills, talents, and driving force than most of those among whom he will live and move.

When this individual gives freely and unreservedly of these talents his gifts will take on an imperishable nature.

Such a man was Dr. William F. Verdi.

Now that he no longer moves among us his gifts to his fellowman stand forth in memory and in visible sign around us.

They will endure as long as any upon whom they were bestowed remain—and after that in the minds of those who loved them.

No man could ask for more.

No man could give more.

Love — admiration — respect — faith — trust.

There were among the things Dr. Verdi inspired in those who knew him and those who depended upon him—often for life itself under the delicacy and sureness of his surgeon's hand.

These, then, are among the things he leaves behind him as he departs from a long life of unfailing service to a cause and an institution—and a community.

What more could any man leave?

For here walked a man who, in his own words, loved his work.

The extent to which he loved it is revealed now as one looks back upon his accomplishments.

Chief of Staff at St. Raphael's Hospital—clinical professor of surgery at Yale School of Medicine—president of the Connecticut Medical Association, and the New Haven Association—war service as a physician—these were some, but far from all, of the things which he did as a dedicated career unfolded.

Now, after long and fruitful years, the last active chapter has been written.

But other chapters, we may hold certain are yet to be placed upon the pages of time—by those who, because of him, will walk in the footsteps he once followed.

DR. WILLIAM VERDI DIES—SURGEON HERE 55 YEARS—LONG ON STAFF OF YALE MEDICAL SCHOOL—SAW MILITARY SERVICE IN WORLD WAR I—WON NUMEROUS HONORS

Dr. William F. Verdi, 84, famed surgeon and one of the founders of St. Raphael's Hospital, died Sunday at his home, 703 Whitney Avenue. He suffered a stroke several years ago and had been inactive since then.

Honored three times by the Italian Government, Dr. Verdi served as president of both the New Haven and of the State Medical Associations. He had practiced here for 55 years before being stricken. He was chief of staff at St. Raphael's and clinical professor of surgery at Yale School of Medicine.

Although Dr. Verdi was internationally-known for his medical skill, he was beloved in New Haven for his kindness. City Engineer William Bolton, a former band leader, recalls that one of his musicians needed an operation, but had no money to pay for it.

REFUSED PAYMENT

Dr. Verdi, nevertheless, took the poor musician, a Yale student, performed a successful operation and refused payment. Years later, the patient became wealthy, but the doctor continued to refuse payment.

Finally, in gratitude to Dr. Verdi, the poor student Rudy Vallee, at the peak of his fame, appeared one day at St. Raphael's and gave a private concert to Dr. Verdi's patients.

Dr. Verdi's surgical skill was known far and wide to countless thousands of persons in all walks of life whom he had helped, many times without compensation, during a half century of practice as a physician and surgeon.

"I am in love with my work," he once remarked. "If I had my life to live over again, I'd follow the same path. Friends ask me why I don't retire. Why, I couldn't retire. I love my work so much I want to be at it every waking moment."

An unassuming man; always impeccably dressed, Dr. Verdi considered medicine the highest of professions. It was not until 1949 when he became ill that he let up on his daily gruelling schedule of work. His schedule included hours of operating at St. Raphael's Hospital where he was chief of staff as well as regular private office hours.

SINCERE INTEREST

Dr. Verdi had the ability to win completely the confidence of his patients and he often described himself as being sincerely interested in each person who sought his aid.

He remarked at one time, "Everyone should know the surgeon is concerned, intensely concerned, with the recovery of the patient. He is interested in pulling the patient through. And he suffers even as the family suffers—every time. A tragedy is never taken more at heart than by the surgeon. It could not be otherwise for a good doctor."

Dr. Verdi was born November 27, 1872, in Montechiaro Vico Equense, Naples, the son of Domenic and Rose Ruggiero Verdi. When he was 18 months old the family came to the United States and settled in New Haven.

It was to his mother that Dr. Verdi attributed his success and in 1927 he contributed $10,000 to the Yale Endowment Fund for a medical scholarship in her memory. That same year he also presented a $10,000 organ to St. Michael's Church as a memorial to his mother.

PRAISED MOTHER

The eminent surgeon explained: "My mother gave me a pair of dextrous hands. That inheritance has been the most valuable possession of my life. She could knit, crochet, sew—in fact, do anything with her hands. She gave me some of her skill."

It may be said that the world owes the surgical ability and genius of Dr. Verdi to the insistence of Principal James D. Whitmore of Hillhouse High School. The young Verdi had left high school to take a job in a barbershop in order to help his family financially. But Whitmore called at his home and stayed with the boy until he promised to return to his studies.

Dr. Verdi was the first native Italian to graduate from Hillhouse High School. After receiving his diploma in 1891 he entered the Yale Medical School. He said he had considered being a priest, a lawyer, and a doctor but felt that he did not have a vocation to the priesthood and he was too shy to be a lawyer.

Before the turn of the century medicine was not held in the high regard it now is, and Dr. Verdi was determined never to be the usual "quack" or "Doc," as physicians were called in those days. He was graduated from Yale Medical School in 1894; where he had been marked by Dean William Carmult for a successful career.

SERVED AS INTERPRETER

In order to pay his tuition at medical school, Dr. Verdi served as an Italian interpreter in court and also taught English to Italian immigrants in high school.

Following an internship, Dr. Verdi did postgraduate work in surgery in Germany and Austria and for many years he returned each summer to Europe for further study in this field.

Dr. Verdi opened his first office in 172 St. John Street and performed his first operations in the little homes near East Street, where the instruments were sterilized on the wood-burning kitchen stoves.

The Italian-born doctor was honored three times by King Emmanuele, of Italy, in recognition of his high standing in the medical profession and for his services to former Italian soldiers in the interest of humanity. He received the title of Chevalier of the Order of the Crown of Italy in 1914 and was later raised to the rank of Commeneatore. The promotion followed his services with the United States Army Medical Corps during World War I. In 1929 he was named Grande Officiale of the Order of the Crown.

During the first World War Dr. Verdi volunteered and was commissioned a major in the Medical Corps. He served overseas from July 1918 until January 1919 and was attached to units near the frontlines. He was chief of the operating team at Chateau Thierry and later played an important part in caring for the wounded during the Battle of the Meuse-Argonne.

Although he was recommended for commission as a lieutenant colonel, he refused the promotion because the war had ended and he preferred to return to his practice in New Haven rather than to remain in the Army.

WITH MEDICAL SCHOOL

Since 1896 Dr. Verdi has been associated with the Yale Medical School faculty. He has served as assistant in obstetrics and gynecology assistant in surgical clinic; assistant demonstrator of anatomy; instructor in surgery. In 1919 he was appointed clinical professor of surgery and in 1933 he became an associate fellow of Branford College.

St. Raphael's Hospital stands as a monument to Dr. Verdi, who headed the St. Raphael Hospital Association for several years as well as being chief of staff. He was chairman of the group which raised the first million dollars toward its construction.

Dr. Verdi served also as president of the Connecticut Medicine Association and of the New Haven Medical Association at one time and was a member of the American Medical Association, the American Urological Association, and of the New England Surgical Association. He was a fellow of the American Surgical Association and of the American College of Surgeons.

Long interested in the civic affairs of New Haven, the doctor was awarded the New Haven Advertising Club's gold medal award in 1940. He had served as a member of the New Haven Board of Education from 1913 until 1917 and was president of the group for a term. He had also held the rank of colonel on the staff of Gov. Simeon Baldwin from 1911 to 1915.

Dr. Verdi was a trustee of the Connecticut Savings Bank, a director of the New Haven community chest, and a member of the New Haven cancer control committee and was on the advisory council of the Association of the Yale Medical Alumni.

In addition to his work with St. Raphael's and his private office in 27 Elm Street, Dr. Verdi was consultant surgeon at New Haven Hospital and at several other hospitals throughout the State.

Dr. Verdi believed the hope of the medical profession is the recruitment of more and more qualified men and women rather than any increase in Government direction of the profession.

Reds Active in Americas

EXTENSION OF REMARKS

OF

HON. B. W. (PAT) KEARNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. KEARNEY. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I should like to include the following article by Pierre J. Huss, which appeared in the Albany (N. Y.) Times-Union of Sunday, April 28, 1957:

REDS ACTIVE IN AMERICAS

(By Pierre J. Huss)

UNITED NATIONS, April 27.—When Guatemalan patriots smashed the Communist grip on the government 3 years ago this May, the Kremlin ordered a tremendous shakeup in the Red machine throughout Latin America. Its hundreds of agents were told to operate only by infiltration into local Communist networks disguised as various democratic organizations.

The strategic zones for infiltration in the Americas as laid out by the Kremlin are in their order of importance:

The Colombia-Panama zone; the Antillean belt; the Central American isthmus; the Brazilian hump; the Bolivian plateau; the Argentine-Chile meridional tip.

The machinations of communism in Latin American and especially in Caribbean countries were exposed to view in a closed-door address before San Francisco's Commonwealth Club by Dominican Secretary of State and Ambassador-designate to the United States Manuel De Moya Alonzo.

Drawing upon the Dominican Republic's intelligence service watching Red intrigues throughout the Caribbean, De Moya said that the new Kremlin tactics are being carried out by regional Communist rings under reorganized leadership, a situation which places upon security authorities in the Americas more responsibility than at any time before in keeping the Communist menace at bay.

ALL FOREIGNERS

Declaring that all founders of Latin American communism were of foreign import, De Moya added:

"How well did they succeed? Did they establish strong Communist Parties? They did not. But they did establish Communist influence. Official Communist parties in the Caribbean seldom use the designation 'Communist.' They call themselves the Revolutionary Socialist Party or the Socialist Revolutionary Party, etc. But make no mistake—they are Red as any party this side of the Iron Curtain.

"These parties are generally illegal, except in Mexico and Costa Rica. So they operate either underground or in exile—or both. They don't lack for company or allies. They all want power and they hate the United States. For one thing, these revolutionaries consider the United States the great barrier

to that power. Let us face it. Uncle Sam would win no more popularity contests among Latin American leftists and nationalists than among Egyptians or Syrians of the same type.

"It would be a mistake to dismiss these people as comic-opera revolutionists. They are not. They are both deadly serious and deadly. They kill people. They have killed many people, and will kill many more unless the governments of the Americas make a concerted effort to break this thing up."

THREE YEARS AGO

Turning back to the Guatemala revolt against the Communists 3 years ago, De Moya said:

"Guatemala at that time was just about as far down the road to communism as a nation can go. With one exception—the army was not completely undermined. That ultimately proved fatal to the Reds—but not before they had released a Soviet-type terror never before seen in this hemisphere.

"Guatemala had temporarily ceased to be an American nation. Guatemala was not left wing or liberal then. Guatemala was Soviet terror in this hemisphere. Who was responsible? Some Guatemalan Communists, yes—but only a handful. The fact is there were never enough local Reds to possibly control the country. They called in allies. Who were they? We found among the actives the Dominican Revolutionary Party, the Dominican Revolutionary Socialist Party, and the Dominican Popular Socialist Party.

OLD REDS ON HAND

"Then there were Venezuelans known as Accion Democratica, which is probably the smoothest operating unit in the whole Caribbean movement. There were also many Nicaraguans. There are many organized Reds there. The Salvadoreans are specialists in labor agitation and they were there. So were the Spaniards, among them expert revolutionists who provided the know-how learned from Soviet terrorism in Barcelona during the 1936 uprisings. There were Mexicans, Chileans, Costa Ricans, Cuban, and even a few European Reds other than the Spaniards.

"That was the combination which controlled Guatemala in 1954. That is the combination that staged the butchering of thousands of innocent people. That combination is active today in the Caribbean."

Federal Aid for School Construction

EXTENSION OF REMARKS
OF
HON. H. ALLEN SMITH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. SMITH of California. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution adopted April 16, 1957, by the Glendale City Board of Education re opposition to H. R. 1 and H. R. 3968:

Whereas the public education of children is traditionally the responsibility of local communities within the framework of the State education code; and

Whereas the Congress of the United States has taken under consideration legislative bills H. R. 1 and H. R. 3968 which would grant Federal aid for local schoolhouse construction: Now, therefore, be it

Resolved, That the board of education of the Glendale Unified School District make known its opposition to H. R. 1 and H. R. 3968. Although these proposals are voluntary in form, the payment of the tax necessary to support them is not voluntary, and the power to withhold benefits from States failing to cooperate is by nature compulsory. Furthermore, the cost of such Federal aid to the taxpayers in this and many similar California school districts would exceed the benefits they might receive. The board feels that the effectiveness of the public school is due largely to local support and that Federal aid would unnecessarily weaken the close ties between the schools and the communities they serve.

Resolved further, That copies of this resolution be sent to congressional representatives in this area and to the boards of education of neighboring school districts.

BOARD OF EDUCATION,
GLENDALE UNIFIED SCHOOL DISTRICT.

Aid for Poland

EXTENSION OF REMARKS
OF
HON. EDWIN B. DOOLEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. DOOLEY. Mr. Speaker, under unanimous consent to extend my remarks in the Appendix of the RECORD, I include a letter from Charles Burke, Washington representative of the Polish American Congress, Inc. It is my thought that the letter will help clarify the situation extant in Poland and indicate to the reader that aid to Poland today, even though it is under Soviet domination, will materially help that country and enable it to assert its independence once again.

The letter follows:

For many years the Congress of the United States has demonstrated the friendship of this country toward the Polish people on Poland's national day, May the 3rd, which commemorates the anniversary of the enactment of one of the first European democratic and progressive constitutions (May 3, 1791).

The past year has proved to be one of the most eventful in the history of postwar Poland, and, indeed, in the history of the Soviet bloc as a whole. By the Poznan uprising in June, by the Polish October events and the heroic Hungarian revolution, the basis of Soviet theory and rule in the countries of Central and Eastern Europe has been shattered. During this past year the Polish people have taken the lead in demonstrating the total bankruptcy of Communist policy. By requesting bread, freedom, and the withdrawal of the Soviet army from Poland on the streets of Poznan they showed that communism has brought Poland and the other subjugated countries to a state of economic ruin. As a result of the Communist collectivization experiment, Poland, one of Europe's granaries, is unable to feed her own people. By requesting freedom, Poznan workers demonstrated how wholeheartedly they reject Soviet control of Poland and Communist dictatorship. The request that the Soviet army be withdrawn from Polish territory proves that the Polish nation has no desire to be a member of the Soviet bloc's military machine and that Poland's policy over recent years has not been of her own making.

The most staggering fact to come to light during the Poznan riots however, was the fact that it was the workers who dared to raise their hand against Communist tyranny, and the workers who showed the true worth of the fallacy that communism is the rule of peasants and workers.

By means of a bloodless revolution the October events have brought a certain degree of liberalization; Poles can breath more freely and Poland is on a more equal international footing with the Soviet Union. In October Poland took her destiny into her own hands. Gomulka, present leader of the Polish Communist Party was placed at the head of the bloodless anti-Soviet revolt by the people. The Government he created is striving to maintain its balance between three points: (1) The Polish nation's urge for greater freedom and liberalization and for absolute independence from the Soviet Government and a return to the West; (2) the country's disastrous economy after so many years of Soviet exploitation and Communist mismangement, desperately needs help to restore stability; (3) Soviet policy has demonstrated on many occasions that it will not tolerate too much liberalism in Poland nor the return of democracy to that country.

The past year has also been a year of ideological ferment within the whole Soviet bloc. News of this ideological ferment reaches us from Czechoslovakia, Lithuania, China and even from the Soviet Union where students and the new technocratic intelligentsia demonstrate that they are no longer prepared to accept as gospel the fallacies of Marxism, Leninism and Stalinism.

The liberalization of Poland has attained such a degree that the celebration of May 3, prohibited for years and replaced by July 10, the day of Poland's subjugation by the Soviet Union, is once more allowed. It has not been restored as a national day, but the Warsaw Government has declared that people may commemorate it privately.

In the Polish nation's struggle to achieve more freedom by means of evoluation, the eyes of her people are turned hopefully to the West, and especially to America. The date May 3 offers an opportunity for a proclamation not only of friendship and sympathy for Poland, but also of an American policy which can help Poland along her hazardous but courageous path to freedom and democracy.

Hate Material Sent Through United States Mail

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 10, 1957

Mr. ANFUSO. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to insert an article dealing with hate literature which is being sent through the United States mails. The article was written by Samuel Rubenstein, editor of the Beacon, the official publication of the order of Brith Abraham, one of the oldest Jewish fraternal orders in the United States, with a membership residing in 27 States.

The purpose of these hate sheets, which are flooding the country, is to foment trouble and arouse racial hatred toward Jews and other minority groups. The Jews of America are perturbed over this situation and feel that it is high time for our Government, particularly Congress, to adopt the necessary legis-

lation to forbid the use of United States mails for this purpose.

If pornographic literature and seditious publications cannot be distributed through the mail, why not place hate literature in the same category? Pitting race against race and inciting people against people is, to my mind, just as criminal and treasonous. It tends to divide the American people, instead of uniting them in these crucial times. What we need today is greater harmony, rather than hatred and mistrust of one another. Unity and harmony will help to see us through the present world crisis; hatred and mistrust only play right into the hands of the Communists.

Mr. Speaker, let us stop the use of United States mails for spreading race hatred and serving as a medium for hate propaganda. Use of the United States mails should be denied to demagogs, crackpots and rabblerousers who utilize it only for their sinister purposes. This can be done through legislation, and Congress is the place to start.

The article mentioned above reads as follows:

GRAND MASTER LAUNCHES DRIVE TO STOP MAILING PRIVILEGE OF HATE PAPERS

(By Samuel Rubenstein)

The flood of hate literature going through the mails the past few years is the best evidence that racism is raising its ugly head again in our country and did not die with the downfall of Hitler. Nearly a dozen years after the end of World War II, which most Americans thought would put an end to race hatred, we find ourselves back again with the same old tragic problem. Again we seek a way to clear from the air the poison of the hate mongers who began spreading their venom in the early 1930s.

Right at this moment more than a hundred hate publications are contaminating the country. These venomous sheets are just as trashy and just as dangerous as those which circulated so freely up to the beginning of Pearl Harbor. In addition, millions of letters and circulars, most of them appealing for funds for these so-called publishers, are also passing through the mails. And it appears, unquestionably, that they are getting results.

The end of Father Coughlin's "Social Justice" and his organized movement, which caused so much trouble throughout the country for a few brief years, has turned out merely an armed truce in the hate camp.

The war had been over with but two years when, in 1947, a character by the name of Conde J. McGinley, operating out of Union, N. J., started his hate sheet, called Common Sense. It has, McGinley says in his paper, a circulation of 100,000 copies. It is a semimonthly. He also holds fund drives. He must be financially succesful, for he has been in the hate business for 10 years.

McGinley cannot make a living out of his publication alone. He must have his angels. One of them is the most successful hatemonger of all, the so-called Rev. Gerald H. K. Smith. Smith began in the hate business almost 25 years ago. He is still in it. He not only runs the usual hate movement with its magazine, but even has a full grown political organization which, according to Smith's own sworn report to the Government, collected in 3 years, up to 1955, an average of $185,000 in donations. He has turned out many graduates from his school of hate. Among his pupils were Conde McGinley. He comes to the assistance of these pupils mostly through purchasing their literature in multiple thousand-dollar lots and seeing that they are sold.

The Committee on Un-American Activities, of the United States House of Representatives, in its report on neofascist and hate groups emphasizes that "antisemitism is the chief stock in trade of Common Sense publication, which now distortedly defines communism as a false face for Judaism."

Continuing, the committee added: "It is apparent that this publication represents a modern example of the racketeers who made a business out of the un-American hate propaganda during the 1930's."

The committee expressed much concern over this type of hate propaganda. In its report it strongly stated:

"Communism's present threat to the very survival of the United States and the rest of the free world has placed heavy burdens on the defenders of human freedom and dignity. The Committee on Un-American Activities is concerned to observe that this burden is being aggravated by certain individuals and organizations unscrupulously exploiting the menace of communism to promote other activities equally subversive and equally un-American. Such activities would destroy the very foundation work of the American Republic, if permitted to operate unnoticed and unchallenged * * * the organized hate group, which masquerades as a defender of our republican form of government, yet conducts hate campaigns against racial and religious minorities in the infamous tradition of the fascist dictatorship."

Openly, there seems to be no central controlling clique guiding the disseminators of race hatred. But we must not be too sure about that. It is not difficult to operate under cover in our country. Somewhere there might be a directing head or heads.

The same old techniques and the same old gimmicks have been dusted off and streamlined to catch the unwary in the net of race hatred and get their financial support. Communist tactics are of course the standby in enabling many of the racists to infiltrate legitimate rightwing and anti-Communist groups. Today, to shout communism is more effective than in the 1930's when there was so much mass unemployment. It is a tragedy, but nonetheless true, that the fear of communism, a genuine one, has enabled the race haters to scare millions into supporting their cause.

Many of the racists are outright criminals. One was a convicted check forger. This should be no surprise. The race hate movement is bound to attract those who represent the lowest level of human existence.

But most of the racists are not criminals. Many, like Joe McWilliams, the notorious rabble rouser from Yorkville, the Nazi stronghold in New York City in the 1930's, have passed out of the picture. But plenty of oldtimers are still around. They no longer have their storm troopers and no longer hold mass rallies. But they are as busy as ever in other ways. Instead, they run "news letters" and "intelligence" reports. They don't have to show public admiration for Hitler, particularly when he isn't around any more. But they still have the same tactic: Jews, Negroes, and Catholics are responsible for the woes of the world, and especially for Jews who are "conspiring" to bring about a Communist world.

Best of all, the race haters have discovered the value of direct mailing lists which are the easiest things in the world to buy today at a few cents a name.

These characters will continue to ply their terrible game until some legal way can be found to put them out of business, just as the Communists were.

POST OFFICE DEPARTMENT

Our remarkable Post Office Department performs a service whose value cannot be calculated in terms of dollars and cents. We only have to envision for a moment what civilized life would be without this service. But, unhappily, it has its dark sides, and one of these is that it permits all sorts of characters, at a fantastically cheap price, to spread the corroding poison of race hatred. These characters have been spreading their venom through the mails for about a quarter of a century. Brith Abraham is of the opinion that it is about time Congress does something about this.

The second-class mailing privilege was inaugurated to promote the first amendment, which is part of the Bill of Rights of the Constitution. Congress, in granting this privilege, specifically provided in the law that publications taking advantage of this privilege must serve an educational purpose. As a rule, this law must be stretched quite liberally by the postal authorities lest the right of free press be interfered with. The only publications barred from the mails are pornographic literature or advertising material sent out by ordinary business swindlers.

But is it not time to deal with those characters who make a profitable business of race hatred? Without the privilege of second-class mail they would be helpless.

We have before us as we write this a copy of the notorious hate sheet, Common Sense, a semimonthly published in Union, N. J., by the "hatemonger," Conde McGinley. McGinley's one and only hate seems to be the Jews. Nobody but a Jew is mentioned in Common Sense unless one is a friend of a Jew.

In the issue for January 1, Common Sense, a tabloid, devotes practically its entire issue to a story headlined "Proof Positive—Communism is Jewish From Start to Finish." Then, underneath is the subhead, "We Have Strived in This Issue to Prove Beyond a Shadow of Doubt That Communism Always Has Been Jewish, the Excerpts Herein Are From Their Own Writings—Books, Newspapers, Magazines—Meant Only for Jewish Eyes and Ears—Judge for Yourself." The story begins by quoting quite liberally from an article written in 1920 by Winston Churchill about Jewish Bolsheviks whom he calls "for the most part atheistic Jews." Then, after quoting from other articles, McGinley returns to the old standby of forgery "Protocols of the Learned Elders of Zion." Following this is a quote from an alleged booklet, "Jewish Anti-Communism," in which we learn the fiction: "Lenin, believed to be a gentile, was married to a Jewess, N. Kroupskaya, and contemporary anti-communist historians recorded that the couple spoke only Yiddish in their home."

In the January 5 issue of McGinley's hate sheet is an article, "No Christians available?" It is accompanied by a photo of the newly appointed ambassador to Italy, James D. Zellerbach, and the story states that he (Zellerbach) is a Zionist Jew like those who fill practically all important administrative positions of our Government.

As interpreted by the courts, the law is very plain on the question of libel. An entire people cannot be libelled. But McGinley, not being too smart, made the mistake of libelling an individual last year, no doubt on the theory that he would not sue. But the individual, a refugee rabbi from Berlin, Joachim Prinz of Newark, N. J., did sue. The rabbi was given a verdict of $30,000 by an all-Christian jury for being called a "Red" by McGinley's sheet. This verdict was recently sustained on appeal.

But such punitive measures are not very harmful. McGinley has plenty of backers. This oldtime admirer of Father Coughlin, who began in 1946 spewing forth his race hatred, is now on top of the dung heap of racist.

The hate mongers are not as numerous, perhaps, as they were in the 1930's. But

they are just as deadly. For with so much money around now, they are able to attract more supporters with bigger contributions.

Grand Master Irving Katcher expressed confidence that a congressional attempt is clearly in order to bar the hate publications from the mails, without, of course, violating the first amendment. It is these publications, not always profitable in themselves, by which the McGinley's and the Gerald H. K. Smith's garner their fat financial donations. As has already been noted, a publication must serve an educational purpose in order to enjoy the second-class mailing privilege. It should not be any too difficult to show that these sheets prove no such purpose. On the contrary, it can be proved that they do not by simply pointing to the report of the Committee on un-American Activities.

Brith Abraham, through its national publication (the Beacon), again and again has exposed "hate sheets." It objected to Father Coughlin's Social Justice publication. The Order, through its then grand master, Judge Herman Hoffman, filed a complaint with the Post Office Department against Social Justice. A short time thereafter, the publication was barred from the mails and folded up.

We also vividly recall how Brith Abraham put the searchlight on the activities of the Christian Front movement in the police department of the city of New York. Mayor La Guardia quickly stamped out this activity, warning that any policeman found to be a member of the Christian Front will be thrown off the force. The same Christian Front pattern began to make inroads in the fire department and the city's school system. The heads of these two respective departments quickly nipped the movement.

Grand Master Katcher is determined to put a stop to spreading "hate sheets" through the United States mail. He is seeking the aid of Members of Congress to amend the mailing privilege laws.

"Hate papers do not belong in the educational category," said the grand master. "Dividing race against race is un-American and does not contribute to the welfare of our country."

The Brooklyn Council for Social Planning

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 9, 1957

Mr. MULTER. Mr. Speaker, I am pleased to commend to the attention of our colleagues the following proclamation issued on March 20, 1957, by the president of the Borough of Brooklyn, the Honorable John Cashmore, in recognition of the services rendered to Brooklyn by the Brooklyn Council for Social Planning:

PROCLAMATION, PRESIDENT OF BROOKLYN, CITY OF NEW YORK

Whereas the Brooklyn Council for Social Planning, established in 1933 to coordinate and direct the cooperative efforts of Brooklyn's many health and welfare agencies and organizations, has, in these 24 years, effectively enhanced the welfare of this vast community; and

Whereas the Brooklyn Council has constantly and consistently brought together the borough's hundreds of agencies and organizations to share information, to coordinate services, to avoid duplication of services, to study unmet needs, to plan together to develop new services and to mobilize resources to ensure the establishment of such new services; and

Whereas the Brooklyn Council has provided the connecting link between the borough's agencies and its citizens, and has spearheaded the stimulated action on topics of vital importance to the borough's welfare; and

Whereas the Brooklyn Council has gathered facts, prepared, published and distributed many widely used reports and brochures, and has served as a borough spokesman before public administrators and officials; and

Whereas now more than ever, changes taking place in the borough point to the need for strengthened channels of coordination and joint planning;

Now, therefore, I John Cashmore, president of the Borough of Brooklyn, in recognition of its past services and the promise it embodies of future significant contribution toward the betterment of the community, do hereby proclaim the week of April 7, 1957, as Brooklyn Council for Social Planning Week.

In witness whereof, I have hereunto set my hand and caused the seal of the Borough of Brooklyn to be affixed this 20th day of March, 1957.

JOHN CASHMORE,
President of the Borough of Brooklyn.

Attest:

JOHN F. HAYES,
Assistant to the President.

Congressman Minshall Polls Constituents

EXTENSION OF REMARKS
OF
HON. WILLIAM E. MINSHALL
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 3, 1957

Mr. MINSHALL. Mr. Speaker, on previous occasions I have sent questionnaires to the residents of Ohio's 23d Congressional District seeking their opinion on pertinent issues before the Congress. In early April of this year, I again mailed out 31,422 questionnaires—1 to approximately every 3 homes in my district. An unprecedented and amazing response of about 33 percent, or nearly 10,000 questionnaires were completed and returned.

I am highly pleased with this response, for it shows the intense interest the residents of the Ohio 23d District have in their Government. This percentage of return is nearly double that of any previous response I have had.

The results of this opinion poll follow:

1. Do you favor Congress authorizing the admission of a greater number of immigrants from all countries? Yes, 24 percent; no, 67 percent; no opinion, 9 percent.

2. Do you favor Federal aid for local school construction? Yes, 45 percent; no, 52 percent; no opinion, 3 percent.

3. Do you favor statehood for Alaska? Yes, 82 percent; no, 10 percent; no opinion 8 percent.

4. Do you favor statehood for Hawaii? Yes, 81 percent; no, 11 percent; no opinion, 8 percent.

5. Do you favor an increase in postal rates to place the Post Office Department on a self-sustaining basis? Yes, 79 percent; no, 16 percent; no opinion, 5 percent.

6. Would you favor a $20 billion national air-raid shelter construction program? Yes, 18 percent; no, 69 percent; no opinion, 13 percent.

7. Are you in agreement with the Eisenhower-Dulles foreign policy? Yes, 51 percent; no, 31 percent; no opinion, 18 percent.

8. Do you believe the voting age should be lowered from 21 to 18 years? Yes, 31 percent; no, 66 percent; no opinion, 33 percent.

9. Do you favor extending the present $1-an-hour minimum wage law to include retail stores and service establishments? Yes, 68 percent; no, 22 percent; no opinion, 10 percent.

10. To assist local communities in combating juvenile delinquency Congress has been asked to appropriate $3 million. Do you approve of this appropriation? Yes, 36 percent; no, 58 percent; no opinion, 6 percent.

11. Do you favor a protective tariff or quota on imports of foreign goods which compete with our own businesses? Yes, 60 percent; no, 32 percent; no opinion, 8 percent.

12. Do you believe we should continue our foreign aid program which calls for the expenditures of $4.3 billion in military and economic aid to our allies and free countries during the next fiscal year? Yes, 36 percent; no, 58 percent; no opinion, 6 percent.

13. Do you feel the United Nations deserves our continued support? Yes, 84 percent; no, 10 percent; no opinion, 6 percent.

14. In our effort to reduce the budget, what items do you think should be cut most? Please check four—

First choice: Foreign aid ☐
Second choice: Federal aid to agriculture ☐
Third choice: Federal housing and community development ☐
Fourth choice: Federal aid to States (aid to local public agencies, aid to needy, public health, etc.) ☐
Fifth choice: Veterans payments (nonservice-connected disability, pensions, etc.) ☐
Sixth choice: Federal aid to small business ☐
Seventh choice: Federal public works construction (dams, airports, buildings, interstate roads, etc.) ☐
Eighth choice: National defense ☐

Egypt Sneaking Into Gaza Under UNEF's Nose

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1957

Mr. MULTER. Mr. Speaker, I commend to the attention of our colleagues the following article, written by Walter Eytan, Director-General of Israel's Foreign Ministry, which appeared in the Israel Digest of April 8, 1957:

EGYPT SNEAKING INTO GAZA UNDER UNEF'S NOSE

The situation in Gaza has become grim indeed. The Egyptians are creeping back—under the noses of the United Nations Emergency Force. The emergency force and its commanders know exactly what is going on; and they understand, like everyone else, that the Egyptians are up to no good. But the political directives from United Nations headquarters in New York make it impossible for the United Nations command on the spot to take effective counter-action. Indeed, they seem to be compelling the emergency force actually to cooperate in restoring Egyptian influence and rule.

What this influence and rule mean, everybody now knows. Egypt has for close on 9 years maintained a state of war against Israel. She has boasted of this openly all the time—and boasts of it still today. Yet the United Nations is helping Col. Abdel Nasser to resume control of Gaza, which during all these years was his main base for fedayeen raids into Israel, with death and destruction in their train.

From the start Egypt has brazenly violated her obligations as a member of the United Nations, yet today she is enjoying the United Nations' active help and support—in renewing, and very likely redoubling, her warfare against Israel. It is a grotesque situation. The law is proverbially an ass, but it should not be quite as asinine as this. This is legalism run riot. When we find the United Nations giving aid and comfort to a country which prides itself on maintaining a state of war against a fellow-member of the United Nations, it is almost as if we had reached 1984.

Egypt has long claimed, and still claims, belligerent rights—that is, the rights which international law concedes to a country at war. A country may, for example, in time of war, exercise a blockade against its enemy, if it can make this blockade effective. It is on this right enjoyed by a belligerent that Egypt bases her blockade measures against Israel in the Suez Canal, as well as her wider economic boycott.

LEGALLY, NEVER A WAR

In the legal sense, however, there was never war between Egypt and Israel, and in determining belligerent rights it is only the legal sense that counts. When the Egyptian Army invaded Israel in 1948 together with the other Arab armies, the Egyptian Government went out of its way to declare that it was not making war, but only taking "police action"—ostensibly to preserve law and order. Egypt never, in fact, declared war against Israel, though she proceeded to act as if she had.

When the Egyptian forces were finally routed, and the armistice agrement was signed in 1949; the warfare that had existed—that is, the de facto war—came to an end. This was explicitly confirmed by a decision of the Security Council of the United Nations. But Egypt paid no attention. She continued to claim belligerent rights and to wage war against Israel by all means short of actual invasion—though this did not prevent her from letting out a terrible squeal every time Israel took her at her word and answered in kind.

DOUBLE STANDARD IN WAR

There was never a country like Egypt for wanting to eat its cake and have it. It is all right for Egypt to fight Israel—by boycott, blockade and fedayeen, killing peaceable civilians by the score, and destroying property right and left; but it is not all right for Israel to defend herself. Israel's self-defense immediately becomes a "breach of the armistice agreement"—of the agreement which the Egyptians made null and void by their violations of it over many years.

All kinds of spurious claims are made against Israel in the name of this armistice agreement, almost every single article of which Egypt has, as a matter of deliberate policy, disregarded. Israel cannot tolerate this double standard, by which she is expected to respect an agreement which Egypt is free to dishonor.

The official view of Mr. Hammarskjold is that the armistice agreement entitles Egypt to return to Gaza. It is Israel's view that the agreement entiles Egypt to nothing at all, and that it has, in fact, thanks to Egypt's own actions, ceased to exist. If Egypt had had any respect for the armistice agreement, she should long ago have negotiated peace with Israel: the restoration of peace was one of the explicit, agreed aims of the armistice.

As things are, Egypt looks like coming back to Gaza, not in order to restore peace, but to renew her attacks against Israel's villages and farms.

As long as this self-styled belligerent basks in the favor of the United Nations, there is not the slightest prospect of peace in the Middle East. And, what is perhaps worse, the confidence of many small countries in the justice of the United Nations and its highest officers has been badly shaken, and perhaps altogether destroyed. No one can have much to hope for as long as Egypt can boast of maintaining war against Israel and yet find herself pampered by a United Nations supposedly dedicated to the pursuit of peace.

Murder Won't Out

EXTENSION OF REMARKS
OF
HON. ROBERT H. MICHEL
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. MICHEL. Mr. Speaker, on Thursday, April 25, the Washington Evening Star carried an article written by L. Edgar Prina entitled "Murder Won't Out," which concerns one of the most puzzling murder cases in history—that of the Grimes sisters in Chicago. It throws the spotlight, like no other story of the case has done, on the lack of cooperation and coordination among the official agencies involved. It also points up that in dropping the charges against the No. 1 suspect absolute reliance was placed upon medical conclusions which were based on the testimony of one lay witness.

I believe strongly that the best interests of the people of Chicago, Cook County, and the State of Illinois would be served if a special grand jury were convened to look into the handling of this controversial case by all the officials concerned. Coming in the wake of other mishandled medical examinations in the Peterson-Schuessler and Montgomery Ward Thorne cases, it would seem to me that some positive action should be vigorously pursued:

MURDER WON'T OUT—CHICAGO SEEMS TO WASH ITS HANDS OF GRIMMEST TEEN-AGE SLAYING

(By L. Edgar Prina)

CHICAGO.—There have been 192 unsolved murders in Chicago in the last 5 years. None of them compares, for gruesome mystery, with the Grimes case. Even out here, this one and its handling have been something to make people sit up and take notice.

The investigation into the deaths last winter of Patricia and Barbara Grimes has been marked by a running feud among the law-enforcement agencies of the area.

Today, more than 3 months after the event, the effort to effect a solution hangs on dead center.

Charges against the principal suspect have been dropped, and he has been ordered extradited to Florida to stand trial in another case.

Nothing further is in sight. The State of Illinois seems, in effect, to be washing its hands of the problem.

In the belief that such a situation is of interest and concern to good citizens anywhere, the Star sent this reporter to Chicago to sort out some of the strings of this strangely tangled web. I have talked with nearly all persons figuring in the investigation.

Here is the story—the factual background of one of the grimmest and most baffling murder cases of our day.

WHAT HAPPENED IN THE CASE

It was a cold and blustery night, last Decembr 28, when Patricia Grimes, 13, and her sister Barbara, 15, set out from their little brick home in a lower-middle class section of the city to see Elvis Presley in Love Me Tender.

The theater was about 3 miles away. They had seen the film before. Friends say they had seen it 11 times. Their mother, Mrs. Loretta Grimes, insists this was only the second time.

The girls arrived at the theater at about 8 p. m. and remained until the end of the last run at 11:15. Two witnesses identified the sisters at the movie. One, a young bank clerk, told police he left at the same time the girls did.

He said they all walked in the same direction for several blocks and that youths in two different automobiles tried to pick the girls up. They just giggled and walked on, he said. It was about 11:30 when the witness last saw them. Under the city's curfew law, the Grimes girls should have been home at that time. They apparently were in no hurry to get there. Mrs. Grimes called the police to report her daughters missing at 2:53 a. m., December 29. A widely publicized search got underway immediately.

Bodies were found a month later

On January 22, almost a month later, the sisters' bodies were found. A laborer, out to buy the family groceries, was driving near the Cook County line at a place called Devils Hill when he saw what looked to him like two bodies lying just off the highway, behind a guardrail some 30 inches high.

Frightened, the man drove back to his house and asked his wife to come with him for a closer inspection. They found the nude and frozen bodies of Patricia and Barbara Grimes.

The local police were called, and they immediately notified the sheriff's office. Undersheriff Thomas Brennan raced to the scene and secured the area. The sheriff himself is Joseph D. Lohman, a member and former chairman of the National Capital Planning Commission in Washington, whose term as a commissioner expires next Tuesday. He called the coroner's office and the Chicago Police Crime Laboratory for technicians and photographers.

Walter E. McCarron, the coroner, was in Washington attending President Eisenhower's inaugural festivities. He returned to Chicago and called in three pathologists to conduct an autopsy. He also directed the State toxicologist to make an analysis of the contents of the victims' stomachs. Autopsies were performed the next day.

On the night of January 23, the sheriff's police got an immediate break in the case. They were told by an informant that the Grimes girls had been seen in a slum area restaurant in the company of an ex-hillbilly named Edward Lee (Bennie the Bum) Bedwell, and another, dark and swarthy, who might have been a Mexican.

Suspect is arrested

In what was hailed by the press as excellent police work, the sheriff's deputies interrogated the owners of the eating place, John and Minnie Duros, who said they saw Bennie and the Grimes sisters in their restaurant very early on January 6, a Sunday morning.

That would have been 9 days after the girls disappeared. Bennie had once worked for the Duroses as a dishwasher.

Besides girls Bennie had two known weaknesses: alcohol and movies. The deputies picked him up at the Star and Garter Theater, in the same slum area, viewing "20,000 Years in Sing Sing."

They took him back to Mr. and Mrs. Duros, who reproached him with an "I told you so." The couple had warned him earlier, they said, that the girls he had with him were the missing sisters. Bennie was locked up.

Two days went by, during which the prisoner made two incomplete confessions and repudiations. Then, on Saturday January 26, Bennie confessed verbally again. He said he met the girls January 7—the day after Mr. and Mrs. Duros claimed to have seen them together. Bennie said he encountered the sisters at a bar with another man, and the foursome set out on a week's debauch.

On the night of January 13, he said, after eating hotdogs and drinking beer with them, he and his male companion drove the Grimes sisters out to the forest preserves. When the girls belatedly resisted their advances, Bennie related, he and the other man knocked them out and undressed them. He (Bennie) then placed their bodies on the side of the road.

Reenacted crime

On January 26, Bennie also visited the scene of the crime and reenacted the death drama. Sheriff Lohman has a vivid recollection of this occasion.

On the way to the scene, he says, Bennie directed a car containing the sheriff and his top aids to within 150 feet of the spot marked X. There he got out of the car, asked for a flashlight, spotted some tall trees and, using these as a guide, led the party without hesitation to the exact point where the bodies had been found. At no stage, Sheriff Lohman says, did Bennie benefit by coaching.

On the way to the scene, Bennie had told the sheriff that at one of the county police stations the last two letters in the neon police sign were burned out the night he passed by with the girls on the way to the forest preserves. The sheriff and his party had not known this, and the lights were not out now.

The sheriff checked. The two letters had indeed been defective on January 13. There was a maintenance record in the file noting that a repair man had been called.

About midnight, Mr. Lohman called in States Attorney Benjamin Adamowski and, with his top aids and a stenographer present, Bennie's formal confession was taken.

Bennie's mother visits

Mr. Adamowski personally conducted the interrogation. After the confession, he told the press that unquestionably Bennie was 1 of the 2 men who killed the Grimes girls. He added that he had enough evidence for an indictment.

Mrs. Ethel Bradberry, Bennie's mother, came to visit him the day after the confession was announced. With her was a lawyer, David E. Bradshaw, vice chairman of the Young Democrats of Cook County. Earlier, Mrs. Bradberry had told newsmen her son was a no-good, shiftless bum. Now she asked him whether he committed the crime.

"Yes, Ma," Bennie replied, according to reporters and a deputy sheriff who were standing nearby.

Saying that she never thought a son of hers would do such a thing, the mother turned and departed. Mr. Bradshaw remained for awhile to talk with Bennie.

Two days later, after the toxicologist had reported that no meat or alcohol was found in the stomachs of the two bodies, and after word had leaked that the doctors had uncovered no evidence of sexual molestation, Bennie repudiated his confession. He charged that he had been beaten, stripped and threatened. But Mr. Lohman, probably the only doctor of philosophy sheriff in the country, was a jump ahead. He had called in two private physicians to examine the suspect after the confession. The doctors certified that there were no signs of mistreatment. Post-confession photographs of Bennie backed them up.

Inquest begins

The coroner's inquest had begun, meanwhile, the day before, on January 29. And on February 8, the formal report of the pathologists was made. After ruling out all other causes, this panel of doctors said the girls died of exposure to the cold. The coroner's jury then ruled on February 11 that the deaths were by murder.

On March 1, Mr. Adamowski announced that he was going to move that the charges against Bennie be dropped. He said he came to this decision after conferring with the pathologists a few days before in the "most enlightening and informative meeting I have ever attended."

The reason he gave was that the doctors had set the date of death with such uncanny certainty that Bennie's confession obviously was false. They had, in fact, established that the girls had died several days before anyone placed them in Bennie's company.

In reaching his decision, Mr. Adamowski rejected the testimony of more than 20 witnesses who told police they saw the Grimes girls alone together or with Bennie after the death date set by the doctors.

"Their testimony would carry considerable weight and would in a sense corroborate the sordid details (of Bennie's confession), if the date of death was uncertain," Mr. Adamowski said. "It is my honest conviction that these witnesses are mistaken."

Testimony hard to reject

Some of the testimony in question is of a sort not easy to reject. There is, for instance, that of three members of the Casey Jarzen family—operators of a drive-in on the road to the forest preserves where the bodies were found—and one of their employees, a waiter.

All four swear they saw the Grimes sisters, Bennie and another man in the restaurant late in the afternoon of January 11. They told of the girls' playing Elvis Presley records on the juke box. And the waiter, who said the girls told him they were sisters, informed police that the girl he identified from photographs as Patricia had the letters "PAT" sewn on her jacket.

This fact had not been disclosed by Mrs. Grimes when she gave police and newspapers a description of the clothing the girls were wearing the night they disappeared. The sheriff's investigators called her immediately. She confirmed that the letters were on the jacket.

Notwithstanding this type of evidence, Mr. Adamowski made it clear in his statement that he believed he could not obtain a conviction of Bennie in view of the doctors' conclusions. He said:

"These outstanding medical men, whose testimony I must rely upon when eventual trial, God willing, takes place, have told us that they are prepared to 'stake our professional reputations on our conclusions and findings.'"

Death set for December 28-29

Although it does not appear in any formal, signed report, the doctors hold that the sisters died about midnight December 28 or very early in the morning of December 29. Bennie, in his confession, had said he first met the girls January 7. His time clock at an industrial plant where he then worked was punched out at 12:30 a. m., December 29.

The charges were dropped on Bennie's 22d birthday, March 4. He was released and immediately rearrested and held on $100,000 bond on a Florida warrant charging him with the rape of a teen-age girl in that State. Last week Governor Stratton, of Illinois, ordered Bennie extradited to Florida where he already is under indictment. But Bennie currently remains in the Cook County jail, awaiting the outcome of further legal moves which he hopes will bar his extradition.

Warfare over case

The handling of the case in Chicago has provoked open warfare between the sheriff's office on the one hand, and those of the coroner and States' attorney on the other. No independent investigation of the affair has been able to get off the ground.

The foreman of the county grand jury sought to take up the case in February. He was told the jury's time was running out and therefore it would not be feasible to start such an inquiry.

A resolution introduced in the Illinois State Senate, calling for a 5-man committee to look into the matter, was defeated. The author of the resolution had charged that the law enforcement agencies "are withholding information from one another or are generally hurting the possibility of apprehension through noncooperation."

Sheriff Lohman, who is continuing the investigation, persists in the belief that Bennie was involved in the crime—he has so stated on numerous public and private occasions. He, too, has requested a special grand jury to look into the handling of the Grimes case by official agencies, but this plea was turned down flat in a note from Cook County Chief Justice Wilbert Crowley, who told him: "It would be prudent to consult your attorney on this matter."

There the case rests.

WHEN IT HAPPENED

The crucial issue in the Grimes murder mystery, all parties agree, is the time of death. The toxicologist and the three pathologists who conducted the autopsy say the girls died the night they disappeared, December 28-29. If this is so, it is difficult to see how Bennie could have been involved in the killings.

The contention that the Grimes sisters died that first night rests on two pieces of medical evidence. The first is the contents of the victims' stomachs. The second is the stage of menstrual cycle in which the autopsies showed the girls to have been at the time of death.

On both these points, the scientific findings of the medical men have significance only in the light of the testimony of Mrs. Grimes, the mother of the dead girls. The doctors can determine beyond doubt the contents of the stomachs and the stages of menstrual cycle. But the fixing of the date of death from this data depends, the doctors themselves make plain, on Mrs. Grimes' statements as to what the girls had eaten on the day they disappeared—and as to when the menstrual cycles of her daughters had begun.

This was evident at several stages of the inquiry.

Dr. W. J. R. Camp, the Illinois State toxicologist, noted in his formal report, for instance, that he found bits of fish, "probably tuna," sweet potatoes, small pieces of peanuts, and a trace of apple skin in Barbara's stomach, but nothing at all in Patricia's. He estimated time of digestion at about 4 hours.

Reported findings

Dr. Camp telephoned Coroner McCarron early in the morning of the day the inquest was opened to report his findings. Mr. McCarron, in his questioning of Mrs. Grimes that day, made a special point of asserting that he had just received the report—ap-

parently to bar speculation that the findings could have been made known to the girls' mother prior to the inquest.

At this point there was an interesting difference of opinion on the phrasing of Mr. McCarron's key question to Mrs. Grimes and whether it had the effect of "leading" her. Some newsmen present say they heard the coroner say to the witness, "You are a Catholic family—it was Friday—of course you had fish?"

The Chicago Sun-Times, which editorially accepts the doctors' thesis that the girls died the night they disappeared, quoted Mr. McCarron who himself is a Catholic, as saying:

"Of course, you had fish. It was Friday, wasn't it?"

The official transcript, however, states that after the coroner informed Mrs. Grimes that he wanted to know what the girls had eaten, he asked:

"On the night these children went to a show, this would be a Friday night, is that correct?"

Mother names foods

Mrs. Grimes then proceeded to list tuna fish, sweet and white potatoes mixed, chocolate chip cookies and a cola drink as the fare. She did not mention nuts, but said, under questioning, that she had a box of assorted chocolates in the house and did not know whether the girls ate any before leaving for the theater.

The mother had an explanation for the fact that no food particles were found in Patricia's stomach. Asked, according to the transcript, whether she paid particular attention "as to how much food" the younger girl ate, Mrs. Grimes said: "She didn't eat too much."

Again, a question exists as to whether Mrs. Grimes was led into giving this information. The Sun-Times quoted Mr. McCarron as first asking: "Did Barbara eat more than Patricia?"

In an interview with Mr. McCarron, who kept his personal attorney in attendance, this reporter was told that the peanuts that showed up in Barbara's stomach probably were from the Baby Ruth candy bar she is reported by a witness to have eaten at the theater the night she disappeared.

I reminded Mr. McCarron that this same witness reported that Patricia, whose stomach was found empty, also had eaten a Baby Ruth—and that each girl had a bag of buttered popcorn.

No popcorn found

No popcorn was found in the stomachs of either of the dead girls. Had they eaten it and died the same night, an hour or so later, the doctors concede that it would have turned up in the examination.

Mr. McCarron said simply he thought the witness was mistaken in her testimony as to what the sisters ate at the theater. The witness in question is a 15-year-old former classmate of Barbara's who sat with the Grimes girls during the movie. She has stuck by her story in spite of official skepticism by the coroner, State's attorney, and doctors. She has offered to take a lie detector test.

Mrs. Grimes also took issue with the testimony about the popcorn. At the inquest, she testified that Patricia never ate popcorn because the salt gave her toothaches.

Later, however, the mother of another young friend of the Grimes sisters told police that a few days before Christmas Patricia and Barbara came over to her house and that she fixed popcorn as a refreshment. She said all the children, including Patricia, ate it.

The final development on the food analysis came almost 3 weeks after the toxicologist's first report. On February 15, it was disclosed that Dr. Camp told Mr. McCarron (the coroner has no formal, signed report on the matter in his files) that he had discovered banana fibers and traces of nuts and berry seeds in Patricia's intestines.

Mrs. Grimes subsequently said she recalled that Patricia had eaten a banana split on the afternoon she disappeared.

So much for the food problem. On the matter of the menstrual cycles of the girls, the coroner's files also contain no formal report by the doctors. But the medical men and Mr. McCarron say Mrs. Grimes had a precise record of when each girl's cycle began. They say the medical examination showed that the dates she gave fitted exactly the menstrual stage reached by the sisters—assuming the death date was the night of December 28–29.

The doctors on the coroner's panel emphatically make that assumption. But Sheriff Lohman is not alone in challenging them. When the American Academy of Forensic Sciences met in Chicago recently, the Grimes case was a principal item of discussion. Dr. Richard Ford, head of the forensic (legal) medicine department at Harvard Medical School, told this reporter: "Anyone setting the time of death so precisely would have to have a crystal ball."

MORAL ISSUE

The question as to when the Grimes sisters died is an emotional one; it involves more than the matter of Bennie's guilt or innocence. It involves, to put it bluntly, a question as to what sort of girls these pathetic victims were.

Mrs. Grimes, 48, divorced her husband 6 years ago after a lengthy separation. Although Mr. Grimes contributes $30 a week to the family, she has had to work to support herself and 5 children. She even has worked a night shift at an industrial plant. It has been difficult for her to give the children the care and attention they may have needed.

"My girls were good girls. * * * They never were on West Madison Street, they had too much upbringing for that. * * * They never even knew where skid row was." Time and again, since Bennie's confession, Mrs. Grimes had made statements like these.

Bennie had stated, in the confession, that he had sex relations with Patricia over a period of days, and implied that his friend had been similarly favored by Barbara.

It was natural, then, that one of the most controversial points in the medical examination of the Grimes sisters should be the question as to whether they were sexually molested. This issue was not involved in establishing the cause of death. But it was obviously important in the police investigation.

Samples sent to lab

The three pathologists who conducted the autopsy were very firm on the subject. They said they had found no indication that the girls had engaged in sexual intercourse. The coroner told the press, in fact, that the autopsy had indicated that the Grimes sisters were virgins.

But then an odd thing happened. Dr. Jerry J. Kearns, one of the coroner's pathologists, sent samples taken from the bodies to the Chicago Police Crime Laboratory for a courtesy examination. The laboratory received 3 vials, 2 marked "Barbara Grimes," and the third, oddly, unlabeled. There apparently was a fourth vial, but it never got to the lab.

The police technicians, one of whom is the president of the Illinois State Society of Microscopy and a man who has worked on scores of rape cases, consider that they have established beyond doubt that Barbara had had sexual relations in the days before her death. They have shown the evidence to this reporter, and, they assured me, to the doctors who handled the autopsies. Scientifically speaking, they asserted, there is no possible doubt about the matter.

When Dr. Edwin F. Hirsch, one of the pathologists, was asked by me whether he had seen the police slides, he said: "I can't comment on that. That's a moral question."

The fact that the crime lab had sex evidence was first disclosed officially when Harry Glos, the coroner's chief investigator and the only nonmedical man to witness the autopsies, called a press conference February 14 to blast coverups in the case.

The doctors and Mr. McCarron, however, were adamant. Mr. Glos was fired. The doctors took the position that they would not engage in a controversy with "technicians." Their studies did not show evidence of sex activity, they insisted.

Medical inquiry closed

Mr. McCarron rejected suggestions that other pathologists be brought into the case and announced that the medical phase of the inquiry was closed.

Mr. McCarron the coroner says, "Like all Irishmen, I think with my heart instead of my head." He dislikes even to talk about the possibility that sex figured in the Grimes case. He becomes evasive and annoyed when questioned about it.

Back in February, after the doctors set the death date, Mr. McCarron asserted: "The scientists took the girls off Madison Street and put them into respectability, and that's the most important thing aside from solving this case."

To me, he said: "Those little girls are in heaven."

There was one cryptic paragraph in the autopsy report which apparently relates to the crime lab report:

"We do not deny or affirm having received information obtained by police investigators, but this information has no role in establishing the cause of death. To deny or to affirm would divulge information that is confidential."

PUZZLING ANGLES

The sheriff's investigators, in their efforts to square the pathologists' verdict of death on December 28–29 with other known facts of the case, keep running into puzzling problems.

Time continues to be the all-important element of the mystery. The girls ate supper the night they disappeared, then saw the movie through, according to witnesses, before they were killed. Yet the toxicologist's report sets 4 hours as the time since the food found in Barbara's system had been eaten.

This means that on the timetable accepted by the coroner and State's attorney, the sisters would have had to be picked up, driven to an outlying part of Cook County, undressed and killed—all within an hour or so after leaving the theater.

And how killed? This reporter asked the toxicologist, Dr. Camp, how the girls could have been so quickly rendered powerless and then brought to death, without there being any signs of struggle or beating or use of drugs. Dr. Camp replied merely that this is the most puzzling aspect of the case for the doctors.

"That is a terrific problem," he asserted.

Dr. Kearns says the sisters could have died of fright. That is what Mrs. Grimes says she believes. But Dr. Hirsch has another interesting idea. According to Mr. McCarron, this is the Hirsch supposition as related to him:

The girls were picked up by a couple of teen-age boys who drove them out to the forest preserves. Their advances rejected, they undressed the girls and put them out of the car—more as a practical joke than through fiendish cruelty. The girls walked along in the wintry wind and as they did the cold air acted as an anesthetic on them. They grew sleepy and, as no cars came by for them to hail, they stepped over the roadside

guardrail and lay down and fell asleep. There they froze to death.

Time major factor

Again, in the analysis of the sheriff's office, the time question offers an ever-mounting problem. If Dr. Hirsch is correct, the hour or so after the movie must have supplied sufficient time not only for the actions already enumerated—but time, too, for the girls to have died from the cold.

It is admittedly a difficult timetable to picture. In discussing it with this reporter, States Attorney Adamowski made a surprising statement. "I don't think," he said, "the girls went to the theater that night."

Mr. Adamowski is the only responsible official connected with the case to have advanced this suggestion; others have accepted the statements of eyewitnesses who claim to have been seated with the girls or immediately behind them.

If the girls did not attend the movie, of course, the strain on the officially accepted timetable would be greatly relieved.

"I don't think anyone has ever asked Mrs. Grimes whether the girls might have gone to the theater some other night that week," Mr. Adamowski said.

Later, this reporter did put that question to Mrs. Grimes. She told me December 28 was the first and only night her daughters ever went to that particular theater.

Mr. Adamowski, himself, never asked Mrs. Grimes that question. I asked the states attorney, in fact, whether he had ever questioned Mrs. Grimes on anything, in order to evaluate her testimony as a basis for the doctors' conclusions.

"No," said Mr. Adamowski simply, "I have not."

No decomposition

There is one other factor that has provoked a certain skepticism in the public's mind on the December 28–29 death date. The bodies were found to be in a well-preserved condition, with no signs of decomposition.

The Chicago Tribune, quoting one of the world's leading authorities on exposure and freezing of human beings, said the medical man asserted in an interview that it would take 8 to 10 hours for a person to freeze to death in temperatures around 20 to 24 degrees. That was the range at Chicago's Midway Airport in the hours around midnight December 28.

Other experts say a reading of 20 or lower is needed for freezing the body.

The official United States Weather Bureau records show that the temperatures at Midway Airport, which is 35 minutes by automobile from downtown Chicago, ranged from a high of 36 to a low of 20 on December 28, from 27 to 19 on December 29, and from 39 to 13 on December 30. There was 1 inch of snow on the ground in this 3-day period.

On the other hand, the range January 13, the day Bennie said he disposed of the bodies, was from 10 above to 3 below zero. For the next 4 days readings never got above 16 and hit a low of 7 below. Five inches of snow was on the ground in this period. Bennie's statement in his confession that it was "snowing and snow was on the ground" corresponded with the actual situation, January 13.

Dr. Camp, however, was not impressed by these statistics. He said it probably was colder in the forest preserves than at the airport and that if the ground was frozen it would have acted as a refrigerator.

Two good leads

Sheriff Lohman currently has two new leads to the Grimes mystery investigation. He believes either one could break the case wide open.

One concerns a scarf or babushka said by a witness to have been left by one of the Grimes sisters when they were in a drive-in restaurant with Bennie Bedwell and another man.

Mrs. Grimes concedes that the scarf bears a striking resemblance to a scarf in the Grimes home—1 of 2 she bought just before Christmas.

Laboratory tests on these scarfs and two others bought by the sheriff's office at the same shop already have shown that the scarf found in the restaurant and the one Mrs. Grimes turned over have similar foreign matter on them. The other scarfs do not. Additional laboratory analyses are being made in which fibers from rugs in the Grimes home and the girls' blankets are being compared with the foreign matter noted above.

The other "hot" lead concerns a friend of Bennie's, a woman, who says she drove him to within a block of the Grimes home several times last year, and saw Bennie and Patricia together.

Mr. Lohman believes this woman knows more than she has told, and his aids are trying to convince her she should cooperate fully.

Sheriff's witnesses listed

Among other witnesses the sheriff has are:

1. Three persons who, like the Duros couple, say they saw the girls, Bennie and a "Mexican" man in the Duros restaurant, January 6.

2. A bus driver and an elderly woman passenger who say they saws the girls on a West Madison Street bus January 2 or 3. They said one of the sisters stretched out on a seat (near the old woman) and the other kept running to the driver to ask him where Homan Avenue was and telling him to be sure to let her know when they came to it. The witnesses say the girls got out at Homan.

3. A tree surgeon, who stopped at a skid row joint, near Homan Avenue, for a couple of drinks January 5, told police he saw Bennie and the Grimes girls there. "Pat, where are my shoes?" one girl asked the other, he said. They had been dancing in their stocking feet. The witness said he sat within 3 feet of them.

4. A classmate of Barbara's said the Grimes girl showed her two wallet pictures of a boy "she called Eddie." The witness identified the pictures as those of Edward L. (Bennie) Bedwell. She said that Barbara told her "Eddie" was a hillbilly and that one of her sisters "took Eddie away" from her.

There is another factor, too, which makes the sheriff and his people reluctant to dismiss Bennie as a suspect. Lie detector tests indicate that he was implicated in the crime.

George W. Haney, the sheriff's lie detector consultant, is a former associate of Russell Chatham of Vienna, Va., one of the Nation's leading polygraph authorities.

"There was never any doubt in my mind that Bennie told the truth when he said he knew the Grimes sisters and disposed of their bodies," Mr. Haney says.

LAST WORDS

When Chicagoans talk about the Grimes case, some surprisingly contradictory statements result.

Mr. McCarron, the coroner, implied in an interview that Bennie had simply been given the third degree. "They kept him for a week and brainwashed him," this official said. "He would have confessed to anything. So would you—so would I."

Mr. Adamowski, the State's attorney, was asked in another interview whether he thought Bennie had been pressured into a confession. "No; he wasn't," came the reply.

The State's attorney's basic position is not hard to understand, however. He clearly feels that he could not secure a conviction with the testimony of his own medical experts against him. And a prosecutor, by the rules of the game, should not seek an indictment unless he believes he can convict.

Whether Bennie will be convicted of anything in Florida, of course, remains to be seen. The case there is similar in many respects to the one in Chicago from which he now appears safely extricated.

The Florida charge is that he raped a 13-year-old girl and held her prisoner in a trailer for 3 days. Another girl was similarly attacked and held by an unidentified friend of Bennie's, it is alleged.

Orders extradition

Governor Stratton, of Illinois, asserted in ordering the extradition that evidence produced at a special hearing on the matter showed that Bennie was in Florida at the time of the alleged crime (March 9, 1956) and that the girl identified Bennie as her attacker. The girl's mother, the Governor said, identified the suspect as the person who had requested permission to date her daughter after he had met her at a carnival where he worked as a roustabout.

Coroner, McCarron, on the other hand, pooh-poohs the idea that Bennie figured in the Florida case.

"He didn't have any more to do with that case than you did," Mr. McCarron told this reporter.

And so the mystery remains.

I interviewed Mrs. Grimes the other day in her home. It was strange to think that the State's attorney had never once bothered to talk with this woman on whose testimony Bennie's entire scientific alibi depended.

At the inquest Mrs. Grimes had embraced Bennie's mother and, according to the news reports, said: "I know your boy didn't do it."

Now she sat in her tiny livingroom, where she had been playing cards with three of the children and a neighbor. A big policeman, assigned to the house, read a newspaper on the sofa.

"I never said Bennie Bedwell didn't do it," Mrs. Grimes told me.

That's the way things have been going in Chicago.

A Monument to Garden City, Kans.

EXTENSION OF REMARKS

OF

HON. J. FLOYD BREEDING

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. BREEDING. Mr. Speaker, the good people of Kansas have always been noted for their hospitality and friendliness extended to those visiting our State. I feel the article appearing in the May issue of the Reader's Digest is a typical reminder of the warm friendliness of the West, and is truly a monument to the fine people of Garden City for the part played by its citizenry in healing a stranger who came there sick in body and sicker in spirit. I would like to extend my remarks in the RECORD to include a copy of this article:

A MONUMENT FOR GARDEN CITY

(By Walker Winslow)

If "life certificates," like birth certificates, were issued, mine would have been given me by Garden City, Kans., in February 1952. This little city took me at a time when I was near death, not only physically but spiritually.

A deep feeling of depression gnawed at my mind as I drove down from the moun-

tains onto the plains of Kansas. There was melting snow on the straight, lonely highway; the wind was cold and dismal.

For more years of my life than I like to remember, I had been avoiding responsibility, eluding the routine difficulties of life and even justifying defeat by means of alcohol. My alcoholism had been a technique of living destructively and reducing the surface penalties to hangovers and remorse. Now, literally unable to use alcohol any longer, I suffered from a guilt that asserted itself in bleak depression. I was an isolated creature at bay in a hostile world. I felt that the world did not want me, that all men were against me.

I should have felt adventurous, for I was on my way to Topeka to get additional material for a book I was writing about Dr. C. F. Menninger, a great pioneer whose work had saved thousands of persons from the bogs of mental illness. Instead I was in despair, cynical, and bitter. I wondered how Menninger had managed to cling to the illusion of life's goodness for 91 years.

Suddenly I came to a slight curve in the road and was snapped out of my reverie. The car would not steer. Getting out, I found that the melting snow had splashed up and filled the undersides of the fenders with ice, clogging the wheels. In an hour, by using a screwdriver as an icepick, I managed to free the wheels, but I was exhausted.

I had trouble getting my breath as I drove on. Suddenly my ribs seemed to clench in like a closing fist, and a molten river of pain ran down my left arm. I got the car stopped and caught my breath. At that moment the gray face I saw in the rear-view mirror appeared to be turning blue. (Later I learned that I'd had what is called a coronary insufficiency—a temporarily inadequate supply of blood to the muscles of the heart.)

There wasn't a soul for miles; I had to drive on. A perverse will to survive must have got me to the next town. I can remember only thinking it ironic that its name should be Garden City and that there should be a sign bidding me welcome.

The next thing I remember is being helped into the small white residence of a young doctor. His family and some guests were about to have dinner. When I protested that I could wait, the doctor warned me not to talk. He practically carried me into a bedroom and laid me on the clean white spread, dirty shoes and all. His wife helped him get my coat and shirt off.

Skillfully he went about examining me. My exhaustion was so complete I simply wanted to let go; dying in this room seemed better than by the roadside. A pill was put under my tongue, and something was injected into a vein. After another injection the pain was gone, and so was consciousness.

I awakened in a hospital. There was an oxygen mask on my face, and the doctor was with me. Knowing he would have to stand good for my hospital bill if I couldn't, I lifted the mask and said, "There are some traveler's checks in my coat. You'd better let me sign some for you."

"Put that mask back on and forget about payment," he said gently. "Let me do the worrying."

Something in his manner made me impulsively hold out my hand to him. For a few moments he held the hand and then said gruffly, "You're among friends." I wanted to cry. It was as if I'd been welcomed back to life. A gentle Sister gave me a hypodermic and I went back to sleep.

When I awakened it was morning and the oxygen mask had been removed. There were flowers in the room. As soon as a nurse came in I asked her where they had come from. "Some of Dr. T.'s other patients," she said. When she asked me how I was feeling she remarked that everyone was pestering her to find out.

"I feel better," I said, "but why should all these people want to know how a stranger is feeling and send him flowers?"

"Word gets around," she said.

A good-natured Irish Sister came in with coffee. "You're exhausted, poor lad," she said with a jovial sympathy, "and this will give you a bit of warmth." She added, "I said a prayer for you last night and so did the other Sisters. We won't be forgetting you."

I felt stunned. I was experiencing spontaneous and warming evidences of friendship I'd thought impossible in modern life. And I was a complete stranger to all these people. When a nurse came with a hypodermic I told her I didn't want it. There was still pain, but I didn't want anything to obliterate the sense of security I now felt. She gave me the injection anyway.

The doctor came in and grinned. "You gave me a real scare yesterday," he said, "but in these cases there's not necessarily any permanent damage."

As he examined me he said he had put my car in his garage and had taken the liberty of packing a bag with the things I'd need at the hospital. "If you hold on where you are now," he added, "you can have visitors in a couple of days. The friends who were at my house when you came in want to call on you, and some of my patients want to meet you. You're going to be here at least two weeks, so enjoy yourself."

Even during the next 2 days, when visitors were still barred, several patients and some of their relatives stopped at my door to ask how I was and to leave me magazines, books and flowers. They showed a natural cordiality and sincere concern, and I could feel the strength of my spirit grow.

When I could have visitors my days were full. Callers were frequent. I had half a dozen invitations to dinner as soon as I was out of the hospital. Always there were flowers in abundance.

I was being given so much that it was a relief when I, too, had the opportunity to give. I had noticed a young man pacing the hall and, sensing his tension, I asked him in for a talk. He said his sister was in the last stages of leukemia but didn't know that she couldn't live long. She was beautiful and talented, just out of college and on the verge of a career. The brother was bitter that she should be taken and betrayed his bitterness to everyone he talked to.

"Does she have visitors?" I asked.

"Plenty," he said. "Idiots who have no idea of what is happening to her. They laugh and talk and let her tell them of her plans for the future."

I was surprised to hear myself telling him that if she died with her plans in full bloom and in an aura of love and friendship she would be fortunate. "The plan or dream is always greater than the realization," I heard myself say. "People are all for her now—she has hurt no one, competed with no one, created no jealousies. You can be grateful that she's not going out on the downbeat as so many do." A strange speech for me. A day or two later the brother came in again and this time he talked eagerly of his sister's plans.

For the few days that I stayed on in Garden City after I left the hospital, I felt as if I'd come home, as indeed I had—I'd rejoined my fellow men and now had a faith in and a love for human beings. In the past I had regarded professional men who chose small towns as people who were looking for a comfortable niche for mediocrity. Dr. T. made me change my mind about that; it was evident he'd sought a place where he could function best as a human being as well as a physician.

The doctor didn't think I should drive to Topeka, so I had a friend come for me. What to do with my car should have been a problem, but before it had a chance to become one a man who had been at Dr. T.'s the day I arrived said he had to make a trip to Topeka later and would drive it there for me. He said he didn't mind returning by train.

When I left Garden City I wished that I could have erected a monument to that small town. It would be simple—the figure of a gentle and concerned man with his hand extended in friendship. There would be a sign directing strangers to drive through the streets so that they could see happy, friendly people who could take in a stranger and make him one of them.

As I was driven toward Topeka I felt that I could now tell the story of Dr. C. F. Menninger with greater understanding. This humble and selfless man had founded a great organization for human betterment on the simple formula, "If we can love." It was a conjecture made in a faith that had been proved correct by his and his sons' belief in man. In Dr. T., I had met another physician of the great tradition, and a young one at that.

Apparently my heart had revolted at the bitter view I was taking of life. There is such a thing as organic wisdom. This is the wisdom that can sweeten the bitter, humble the arrogant, and make us receptive to truth, to the spirit of good will among men.

Employment of the Handicapped

EXTENSION OF REMARKS

OF

HON. J. EDGAR CHENOWETH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. CHENOWETH. Mr. Speaker, I am sure the Members of the House will be interested in an essay on the employment of the handicapped which was submitted by Miss Virginia Trujillo, a student in the Antonito Public High School, Antonito, Colo. This essay won second place in the 1957 national essay contest conducted by the President's Committee on Employment of the Physically Handicapped.

I congratulate Miss Trujillo on her prize-winning essay. I am indeed proud to represent the congressional district in which she lives.

Miss Trujillo will come to Washington on May 23, and will receive her award directly from President Eisenhower. I am happy to see her receive this recognition which she richly deserves. She has brought great honor, not only to herself, but to her school in Antonito, and to the entire State of Colorado.

The essay follows:

EMPLOYMENT OF THE HANDICAPPED: A COMMUNITY RESPONSIBILITY

Carefully groping in the darkness, John Erickson finally found what he was looking for—the doorknob. He turned it slowly, almost fearfully, for this was the step he had dreaded to take for so long. This was the step which would lead him out of the security of the hospital and into the insecurity of the world.

John dreaded to go out into his community. He wondered, "How will my community receive me now? Will my old friends make me feel welcome? Will I be able to get a job here so I myself can support my family and not have to rely on aid from the Government? Or will my town think I am to-

tally unfit to do any kind of work because I am blind? Surely there must be some kind of work a fellow like me can do."

The knob turned and John stepped out of the hospital with its familiar antiseptic smell into the air with its fragrance of grass and flowers of spring. As he felt the warm sunshine on his sightless eyes, John thought bitterly, "Is this the same John Erickson who a few years ago was a successful salesman with the prettiest wife and smartest children in the neighborhood? Is this the same John Erickson who 4 years ago was up as a candidate for mayor and now is little better than the worm who crawls in the dirt not knowing where he is going?"

All this mental agony had come to John Erickson because he had gone to fight for his country, his community, his family, his ideals. All because some fellow had failed to check the pin on his hand grenade. With these thoughts John walked slowly, tapping his way toward the family car that his wife must drive everywhere now.

Yes, this was the same John Erickson. Why should he have changed? The only thing he had lost was his sight. He still had the qualities which make a man fight for a set of ideals, which make a man proud of his family, and a promising candidate for mayor. He still had the sense of responsibility and pride that he and not the taxpayers should support the John Ericksons. He still had that pride in his community that made him tell everyone, "Smithville, Iowa, my hometown, is the swellest place a fellow could ever want to live."

John Erickson still had those hopes and dreams. But most of all he still had the quality which is in every human being—a feeling of independence and the need of being wanted and appreciated. Yes, he was the same John Erickson. He was the same if his community would still give him a chance; if Smithville would help him get used to the sound of a tapping cane by making him an indispensable citizen with a wage-earning job.

Yes; John Erickson and the 28,000,000 other disabled persons in the United States need help, help from their communities so that they can again feel independent and appreciated. They need help to make all their hopes, dreams, and desires come true.

Is it financial help they need, or is it sympathy and consolation? They want none of these. A chance in fair competition for a job is what they need, not a kind word or a pitying glance. In other words, all a handicapped person wants is a chance to prove himself, a chance to prove that there is something he can still do to make himself a worthy community member.

But before being employed, many of the physically handicapped must have a chance to become rehabilitated, to become adjusted to their limitations of acivity imposed on them by crippling disease or accident. These people need to be tested for their aptitudes so they will know for which type of work they are best qualified. Then training in their field must be offered to them.

And who is to provide for these services? Where is John Erickson to turn for help?

Isn't it fitting that John, who lost his eyesight so that communities like his might be free, be helped by his community that he might be free? Should not the responsibility of rehabilitation to normal life through employment be the communities'? The same goes for the thousands of Johns who have been an active part of their neighborhood before becoming disabled.

Which other organized body is better suited to rehabilitate and employ handicapped persons than their own community? It is here that is "home" to the disabled; it is here that his heart is. Is it not logical that a handicapped person should prefer to work in his own community, with his friends than to go off to some factory where jobs are "made" for people with physical infirmities?

If to rehabilitate the handicapped is our aim, should not the community provide the tools? The small community is the only organized body small enough to take care of the thousands of disabled and give them the attention which such a person requires.

But what would happen if our communities neglect their responsibilities of rehabilitating and employing their handicapped?

The National Safety Council's compilations of statistics for the year 1953 indicates that there were 2 million accidents which caused a total production loss of 45 million man-days and a total cost in loss of wages, medical expenses, compensation benefits, and other administrative expenses of $1,650,000,000. If we add to this latter figure the so-called indirect accident costs of the loss of production time it raises the total estimated cost of accidents to the staggering total of $3,150,000,000 which the taxpayer must pay in higher taxes and higher prices. So it is vitally important for us as well as the handicapped that the communities shoulder their responsibility because full utilization of all our potential manpower is essential to the welfare and strength of our country at all times. If the handicapped are rehabilitated and given employment, the entire country will benefit. To quote President Eisenhower, "Rehabilitated persons, as a group, pay back in Federal income tax many times the cost of rehabilitation."

Neglecting the handicapped would not only result in the loss of millions of dollars and a great deal of manpower, but it would also result in the weakening of our Nation. There are some 28 million disabled persons in the United States. The majority of these persons are married and have children to care for. What happens if they are placed in institutions? If the family is the basic unit of society, the strength of our country rests on this. Therefore, if the family is no longer able to look to its head for financial support and security, it will lose its basic solidness. If this happens the community will be weakened and the strength of the United States of America shall crumble.

It is up to our communities to see that the disabled person is restored to his fullest physical, mental, social, and economic usefulness so that the United States may be able to withstand the powers that threaten it. We must realize that only the community can rehabilitate a handicapped person to his fullest capacity by employing him.

It is the responsibility of communities like Smithville, Iowa, to see that a white tipped cane can tap John Erickson's way to a useful job so that he may become a contributing citizen of an American community.

An Editor and Smalltown Businessman Looks for a Change in the Eisenhower-Benson Program To Aid the Family Farmer

---

EXTENSION OF REMARKS

OF

HON. COYA KNUTSON

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 14, 1957

Mrs. KNUTSON. Mr. Speaker, there is a gentleman in my district, the editor of the Perham Enterprise-Bulletin, whose heart lies with the family farmer. As a small-town businessman, he fully understands the great potential of a good farm program for the whole family-farm community. In his editorials, he tangles with all the various aspects of the agricultural program, challenging and probing for solutions.

A recent editorial, April 25, was directed at the President's possible change in farm policy. Observations and suggestions in this editorial merit serious consideration. I, therefore, under unanimous consent, insert this studious editorial in the RECORD:

IKE SEEKS NEW FARM PLAN, WILL AID SMALL FARM

We would like you to read several quotations:

Quote No. 1: "The present farm program—the so-called flexible system adopted in 1954 is not working well in these areas. We have laws for disposal of surpluses under a subsidized arrangement for which the taxpayers pay. Then, when we get rid of those surpluses for a certain degree, the arbitrary provisions of the law operate, the price supports go up and you get more surpluses. Small farmers especially need help because of the cost-price squeeze, but that the present program doesn't work that way. The big farmers get the most."

Who said these things? President Dwight D. Eisenhower on April 17, 1957, as reported in the Minneapolis Tribune.

Quote No. 2: "The present parity (flexible) setup is a big operator's, city speculators bonanza. It gives the big operator and the small operator a 50–50 break—1 horse for the big operator and 1 rabbit for the small operator. * * * Currently the consumer is paying for production which is stored, destroyed, or given away and then paying high prices in the market place because these surpluses were removed to cause an artificially high price."

Who said these things: We did on August 4, 1955, in an editorial.

We are glad that President Eisenhower has come to the realization that Mr. Benson's choice of a farm program is for the birds. It has been apparent to folks out this way for some time that lowering prices paid for farm produce simply makes the farmer produce more to keep his volume up.

Both full parity and flexible support are bound to fail because they (for the most part) attempt to guarantee prices without regulating supply. Both aid the big producer while failing to effectively aid the small producer for whom they were ostensibly designed.

Now that the President is seeking a farm program that will, as he puts it, "Stand the test of time," we suggest he take a look at the one we have been advocating for a number of years. Under it the Government would pay the farmer a direct subsidy on his produce, scaled down as his production increases.

For instance—Pay 90 percent of parity on the first $5,000 produced; 85 percent on the second $5,000 produced; 80 percent on the third $5,000, and so on down until a total of $25,000 is reached. Production of any one farmer over $25,000 would not be subsidized at all.

Farm prices would be allowed to seek their own level in the markets, thus giving the consumer a break.

All Government purchases of surpluses would be eliminated.

As nearly as we have been able to ascertain, the above plan would subsidize less than half the farm production, leaving half of the market for the ambitious to fight over in the best of American tradition.

What do you think about it, Mr. President?

We think you are right in scouting around because in this day and age of hybrid seeds, high power fertilizers and potent insecticides, the soil bank will not bail out the flexible support program.

Britain Saves Money on Her Navy

EXTENSION OF REMARKS
OF
HON. EMMET F. BYRNE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. BYRNE of Illinois. Mr. Speaker, I would like consent to insert in the RECORD a timely editorial appearing in the Chicago Tribune, Wednesday, May 1. The British continue to deserve the reputation of looking out for Britain as indicated by their current action with respect to expenditures in their budget for the coming year. It would seem that while we talk vociferously about cutting the budget for the United States the British are taking definite steps and are achieving their goal to reduce their budget and give their people some tax relief. In this particular instance, the United States would do well to follow the British so that we could give our people action and not talk.

BRITAIN SAVES MONEY ON HER NAVY

Britain intends in the year ahead to reduce her naval expenses by 10 percent. Eventually, the number of men in the naval service will be cut from the present 120,000 to 75,000. All but one of the biggest battleships are to be scrapped, and, when the transformation has been completed in 5 years, the British Navy will consist of half a dozen aircraft carriers and their auxiliary ships, together with a couple of hundred frigates to patrol the coasts and about 60 submarines.

The new British budget calls for spending less than $900 million on the navy. The new American budget calls for spending more than $10 billion on our Navy and the cost in the coming year is to be larger by several hundred million dollars than in the present year. Britain's Navy is going down while ours is going up.

Arthur Veysey, The Tribune's London correspondent, has figured that the number of men in our navy today is just about twice the expected strength 5 years hence of the British Army, Navy, and Air Force combined.

Possibly there are those in this country who will conclude that all this is just as it should be because it proves that the United States has replaced Britain as the world's leading naval power. Americans may well take pride in this achievement but they also may ask whether such vast superiority at enormous cost is altogether necessary.

Plainly the British have come to the conclusion that types of naval equipment, already obsolete in World War II, are of even less value today. There can be no quarrel with that thesis. Our own Navy has scrapped a good many of its old-fashioned ships and has almost all of its remaining battlewagons in mothballs.

And plainly, too, the British think that they will be just about as safe with a little navy as they would be with a much bigger one. This conclusion could have been reached in several ways. The British strategists may have decided that, in the atomic age, no fleet can offer much protection to an island within easy bombing and rocket range of an enemy on the continent of Europe; or the decision may have been founded on the assurance that the American fleet will do whatever a fleet can do to protect Britain and the American air bases on the island.

In fact, both lines of reasoning may have contributed to the result and the conclusion may well have been reinforced by estimates, revised downward, of the soviet capacity to take the offensive. Certainly since the Hungarian revolt it has been clear that the Soviet commanders cannot rely on the loyalty of the soldiers of the satellite countries and, in fact, would have to keep great numbers of Russian soldiers guarding lines of communication through the satellites to prevent sabotage.

At any rate, whatever the reasoning may have been, it is the American fleet that is steaming eastward in the Mediterranean, which, even in the years of Britain's military decline, has been regarded as Britain's special concern. Plainly the British are quite willing to have their interests in the Near and Middle East protected at American expense and risk. Because our recent administrations have been eager to assume these responsibilities and to impose corresponding burdens on our taxpayers, the British can feel safe in weakening their own military establishments on land and sea, to the advantage of the British taxpayer.

Tyranny and Brigandage in Collection of Alleged Delinquent Income Taxes

EXTENSION OF REMARKS
OF
HON. MICHAEL J. KIRWAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. KIRWAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following editorial from the Jefferson Gazette. Mr. E. C. Lampson, the owner and editor of the Jefferson Gazette is a truly fine American, his father was reading clerk in the House of Representatives following the Civil War. Jefferson, Ohio, sent Senator Ben Wade and Congressman Joshua Giddings to the United States Congress. It is the town in which John Brown laid the cornerstone of the courthouse before going on to Harpers Ferry.

From the editorial of this fine northeastern Ohio newspaper, which is rated as one of the best newspapers of the country, we can heed that all is not well in the old homestead—or a way down east—or on the banks of the Wabash. It is a good advice to the administration that it better devote more time to mid-America and not so much to the Middle East, if we want to survive.

The editorial follows:

[From the Jefferson (Ohio) Gazette of April 30, 1957]

TYRANNY AND BRIGANDAGE IN COLLECTION OF ALLEGED DELINQUENT INCOME TAXES—AMERICAN CITIZENS ARE BRAZENLY DENIED THE PROTECTION OF THE COURTS—FEDERAL OFFICERS FLOUT THE BILL OF RIGHTS WITH IMPUNITY—AN OPEN LETTER TO THE PRESIDENT OF THE UNITED STATES

Mr. President: The brazen methods used by officers of the Federal Government in this 34th District and probably elsewhere in the United States, deserve your immediate condemnation.

If their wanton and unconstitutional acts in charging and persecuting citizens for alleged income tax delinquency has the approval of your administration, I shall regret the loyal support given you in the elections of 1952 and 1956. I am ashamed of my own Government.

I was shocked to read in the Cleveland Plain Dealer, April 25, 1957, the statement of the district director of IRS: "We have no special orders from Washington, but we have been receiving regular instructions about this from time to time." His effort was to justify the tyrannical methods used in collections of tax accounts. Proof of correctness is not always shown to the victims in advance. His remark was followed by the comment of William Horvath, assistant chief of the delinquent accounts, that: "But some taxpayers think we don't have the authority to do this, that we need a court order. That isn't true as they find out."

Mr. President: Has the protection of the Bill of Rights become a myth under the Eisenhower administration?

Have you been too much concerned with foreign aid to prevent American citizens being denied the protection of law and the Constitution, when some of them are charged without any proof offered by the agents of the Federal Government as criminals—tax evaders?

Under Ohio laws, to enter uninvited upon private property or to seize the same without due process, or to impound property even for States taxes delinquent is a trespass compounding a felony. Under Ohio laws, no delinquent State tax may be collected until due process of law provides the delinquent taxpayer with notice and reasonable time to contest or to make a voluntary settlement.

Under the Eisenhower administration the Internal Revenue executives and minor employees claim lawful authority without proof of the correctness of their claim to take a taxpayer's home, business, credits, or other properties without due process of law. He is not allowed opportunity to prove the Federal claim incorrect and unjust. Since when has the tenacles of this Federal tax octopus grown so large and so crushing that an American citizen faces certain damage if he fights an illegal tax claim? By whose authority is this cruel and unusual punishment inflicted with impunity by Federal employees?

According to the Cleveland Plain Dealer of April 25, 1957, in this 34th district, in 1956 there were 180 property seizures and 9,833 levies. Few if any such actions followed a court order. In each case Federal employees reported to superiors alleged bookkeeping charges that the taxpayers were delinquent. Each alleged delinquent was given a short notice with threats of levy on wages, salary, or other income, or to seize and sell your property or rights to property, if payment is not received within 10 days of the date of this notice. Does that mean 10 days before or 10 days after said date? A fourth-grader should write better English.

To seize a man's business, to padlock it merely to collect a few dollars, which the taxpayer may believe he does not owe the Government, is a monstrous misapplication of Federal power. To refuse said taxpayer his constitutional State and National rights of a day in court is worse than is done in Russia.

Many errors are made in the accounting department and by the taxpayer without intent to defraud. Until the department explains in a courteous manner its claim of debt, by what conceivable constitutional law can such gross imposition be made with impunity in our once-free United States of America?

PROOF OF THE CORRECTNESS OF MY CHARGES

There is no constitutional authority for an employee of the Income Tax Division to threaten or seize property, wages, or other possessions in payment of an alleged delinquent tax until proven in a court of law. No Federal employee has the right to demand payment of a controversial charge within an unreasonable period of time, nor to trespass upon, nor to impound, nor to seize, nor to

sell nor to damage in any manner the property or the reputation of any taxpayer without due process of law.

The now common practice of seizing and denying a taxpayer access to his own records is unconstitutional. The fourth amendment covers this statement, quoted in part: "The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures shall not be violated * * *"

It certainly is unreasonable to seize papers and records upon which the taxpayer must base his claim of error when the error was made by the department itself.

The much-abused fifth amendment amply provides against the abuse of power by Government officials and employees. It renders the seizure of wages, salary, income, or other property, without due process of law, a crime on the part of any officer or employee of the State or Nation. The fifth amendment provides that anyone charged with a crime must "be informed of the nature and cause of the accusation, must be confronted with the witnesses against him, and must have compulsory process for obtaining witnesses in his favor and to have the assistance of counsel." These provisions, and others of the Bill of Rights, are flagrantly and boastfully flouted in the 34th District in Ohio.

The seventh article provides that where the value in controversy exceeds $20 the right of trial by jury shall be preserved. The officials of the 34th district claim the law under which they operate does not provide for trial by jury. If that be true, the said law is unconstitutional. Any tax collected under it by force is an illegal collection. A single penny taken more than the tax and costs is a theft or is taking private property without just compensation.

The vexatious delays in law for restoring rights and property prevent many from suing individuals who have assumed to charge, arrest, and punish alleged delinquent taxpayers without due process of law.

PERSONAL EXPERIENCE WITH CLEVELAND OFFICE

I am in receipt of a card demanding $9, alleged deficit in my 1956 income tax. No explanation accompanied the demand. But the card states, "Your computation of tax has been mathematically verified." If my account has been mathematically verified, why the discourteous demand? The card threatens "If payment is not received within 10 days from the date of this notice, your account will be placed in the hands of an internal revenue collection officer without further notice. Under the law he may levy on your wages, salary, or other income or seize or sell your property or rights to property to collect this account."

Your protestor is 81 years old. He has been the editor of a country newspaper for 61 years. He handled in that period many $100,000 accounts. He never has defaulted in any obligation, public or private.

Until recently no bill payable has been received by him that contained discourteous language. He finds the Gazette, through error made by some clerk in the Cleveland office, charged with $1,094.84 delinquency for 1956 in withholding taxes and social-security taxes paid for the employees of the Gazette Printing Co., Inc., Jefferson, Ohio.

The Cleveland office claims it never received the fourth quarterly report for 1956, form No. 941, yet it credits us with a payment of $626.88.

We have in our possession and will not give it up, without a court order, our check for $626.68, No. 2429, dated January 22, 1957, which check accompanied form 941 with the necessary papers to complete our 1956 account. Payment in full. We have since then paid the January, February, and March charges, totaling $1,556.88.

The Gazette Printing Co., Inc., is not indebted to the Federal Government for any taxes accruing prior to April 1, 1957.

Knowing we are on safe grounds if the Department is not an American gestapo, we have no cause to worry. The entry of our premises by the use of force by a Federal tax collector would make said person so entering "a trespasser, a thief, or a burglar." Ohio laws will be used if necessary. The Revolutionary War was fought on less grounds for revolt, Mr. President, than now exists in your administration when honest taxpayers are held delinquent and their property taken by agents of the income-tax division without due process of law.

Respectfully submitted.

CHET LAMPSON.

Polish Constitution Day

EXTENSION OF REMARKS
OF
HON. ALBERT W. CRETELLA
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. CRETELLA. Mr. Speaker, May 3 is Polish National Day. It commemorates the anniversary of the enactment of Poland's democratic constitution on May 3, 1791.

At this crucial time in history when communism dominates half of Europe, it is essential that the United States and the free Western Powers give all possible support to the Polish cause for freedom and independence.

I do not believe it is the United States policy to incite uprisings behind the Iron Curtain against the Communist governments, for such a policy by itself while demonstrating the burning spirit of the people for freedom, results in the horrible destruction and the death of fighters and innocent women and children at the hands of overwhelming Soviet manpower and armaments. Such terror was witnessed recently both in Hungary and Poland.

Rather, our policy must be to raise our voices continually against this Soviet subjugation and even to offer material and economic aid to the Poles, if we can receive the assurances that such aid will indeed reach the Polish people and they are aware of its source. A private organization, the Ford Foundation, has recently announced a grant to Poland. It will be well for our Government to heed closely the effectiveness of this assistance as a possible guide for further United States efforts.

I believe there to be some validity in the argument that the Polish people, if given the proper moral and material tools, will better equip themselves for casting off Russian domination and regaining independence.

There is no question in the minds of the Kremlin that brave Poland stands firmly in the camp of the West. For Poland to cast such a die in the face of stark adversity, gives the free world an insight into the fibre of bravery and courage possessed by these people, who, since World War II have been denied their cultural and sacred freedom.

Let us not be cajoled into imagining that the Gomulka government is the government of the Polish people. This is merely a shabby compromise instigated at the direction of Moscow as an attempt to mollify a country whose free existence has been erased and sense of nationalism offended.

Although Poland may be relatively free as a nation in captivity by the Communists, the United States should settle for nothing less than the complete return of freedom to this and other countries, so that they may govern as they choose.

The Maligned Postman Deserves Better of Us

EXTENSION OF REMARKS
OF
HON. RICHARD BOLLING
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. BOLLING. Mr. Speaker, the following column by Bill Vaughan appeared in the Kansas City Star of April 13. I heartily agree with Mr. Vaughan's comments on the courteous and fine service performed by our friends and fellow citizens who give their working lives to the Post Office Department and efficient service to their fellow citizens.

THE MALIGNED POSTMAN DESERVES BETTER OF US

(By Bill Vaughan)

The Postoffice Department has been having a difficult time this week. Today, Saturday deliveries were eliminated, and other cutbacks may be put in force. There isn't enough money.

Congress, however, apparently has relented enough so that these reductions in service will be temporary.

Critics abound. There are people who send the editor grisly stories of how it took a letter 15 days to get from Philadelphia to Dayton, Ohio. Some patrons object to the design of new postage stamps on esthetic grounds. Others do not like to be addressed as "Occupant." We are told that the Post Office Department should employ more machines and fewer people. The post offices themselves, we are told, should look more like factories and less like Greek temples.

I will agree that it is ridiculous that we cannot operate a mail system geared to the needs of our citizens. This is the sort of thing that Americans like to laugh at in other countries. We are so proud of our technological superiority. When we are charged with cultural shortcomings we can always point out that at least you can make a telephone call, send a telegram or get a letter delivered in the United States more expeditiously than in lands which lack our Yankee know-how.

Perhaps it is good for our national soul to be told that other countries handle their mail better than we do. Conceit is the besetting sin of America. We go into hot wars on the assumption that the Japanese are unable to fly airplanes because their eyes are the wrong shape. And a comforting delusion at the start of the cold war was that Russia could never build the atomic bomb because it is a nation of dreamy peasants.

From both of these ideas we had rude awakenings.

So it may be a healthy thing for us to learn that other peoples get their mail as expeditiously as we do, or more so.

But, all this aside, I think it might be well to inject a few comments about our postal system that have nothing to do with its fiscal stability.

There were three letters from New York on my desk this morning. All were mailed yesterday. I have never experienced any of these grotesque delays in service which are being reported from time to time.

I have never found a rude or cranky person—beyond, that is, the normal amount of crankiness which is every freeborn American's natural right—at the window of any postoffice. On the contrary, I have been helped, advised, and coddled beyond anything due me.

Last Christmas I was in line behind a gentleman in overalls who lacked 15 cents of having enough money to mail a package. The young man at the window put it in out of his own pocket—with, of course, a promise from the customer to "drop it by some time."

I hope we get more efficient operation of our postal system. I hope, maybe, that we get machines—although I find them generally less agreeable than people, in favor of whom I tend to have a bias. I would even wish that post offices looked like factories instead of Greek temples, if that would help, even though the average American town needs at least one Greek temple. And where is it going to get one unless from the Government?

But I also hope that we never get so efficient that the man at the post office window won't take time to help us retie our packages and the mailman won't have enough interest to call out, "Got a letter from that kid of yours today."

Let's be efficient, let's save money (or spend more if necessary), but let's not lose our admiration for the wonderful people who get the mail through.

Colt's Peacemaker

EXTENSION OF REMARKS
OF
HON. EDWIN H. MAY, JR.
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. MAY. Mr. Speaker, the State of Connecticut and the city of Hartford are famed for many things, not the least of which is the home of the Colt's Patent Fire Arms Manufacturing Co.

One of the famous Colt's products is the "six shooter," or "Peacemaker," a single-action revolver. This gun was dropped by Colt's during World War II but has been put back into production, and this has excited the gun collecting and shooting fraternity.

Without objection, I request permission to insert in the Appendix of the CONGRESSIONAL RECORD an account of the six shooter's modern day comeback by Kenneth Scheibel of the Gannet News Service. This story has appeared widely in the Gannett newspapers, including the Hartford Times in my district. Here is how it appeared in the Utica (N. Y.) Daily Press:

FAMED COLT PEACEMAKER BLAZES TO NEW POPULARITY

(By Kenneth Scheibel)

WASHINGTON, March 25.—A famous American gun which blazed its way across the pages of early United States history is making a modern-day comeback.

It is the world-famed .45 caliber six shooter, or "Peacemaker," known as the gun that won the West. It is the product of Colt's Patent Fire Arms Co., Hartford, Conn.

Colt's official John A. Millington and associates are displaying the "Peacemaker" model at the annual meetings of the National Rifle Association here this week.

He said that the public's reaction to reintroduction of the gun has been amazing.

"We are about 30,000 orders behind," Millington declared, "even though we put on night shifts."

What is behind the interest in a gun developed in 1873?

Millington said shooters and gun collectors always felt the six-gun was a good gun. Colt's discontinued it in 1941, but resumed production on a limited basis in 1955.

"In the United States today, there is a nostalgic urge for the things of the past," Millington declared. He said this is true of automobiles, architecture, and clothing. With a grin, he said "and television and western movies have helped this trend."

According to figures cited by Millington, the gun business is booming. He said the company in some categories of sales registered a 357-percent increase in the last 6 months of 1956 compared with the first half of the year.

Colt's also is exhibiting at the National Rifle Association exhibit its new .357 magnum, called the "python." Millington described it as a gun "with a lotta power" which he said has excited collectors and sportsmen.

Sam Colt invented his first revolver in the 1830's. The war in Mexico created demand for them. Colt developed .44 caliber, six-shot revolvers for Gen. Zachary Taylor.

The Civil War found revolvers widely adopted as a side arm and later in the settling of the West they became almost standard dress, going by such names as "thumbbuster," "hawg laig," "equalizer," and "plowhandle."

Sam Colt died in 1862 at the age of 48 and in 1873 his gun was produced as the "Model P" for the Cavalry.

The "six gun" is a single action handgun which fires one round at a time and must be recocked by hand. Its chamber holds six shells. Each empty shell must be ejected by hand.

Many old models of the storied "peacemaker" have become collector's items worth thousands of dollars. Enhancing values are special ivory, pearl, or silver grips as well as fine engraving performed by master craftsmen. The age of the piece—the era in which it was produced—also is a factor in values of oldtime Colts.

Gov. Abraham Ribicoff recently accepted on behalf of the State of Connecticut a Colt's museum collection of its old models.

Alex Sachs Retires

EXTENSION OF REMARKS
OF
HON. RICHARD BOLLING
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. BOLLING. Mr. Speaker, the following editorial appeared in the Kansas City Times of April 25. All of us in the Kansas City area regret the retirement of Alex Sachs, who has been our outstanding postmaster since 1949. Public servants of Alex Sachs' great ability and charming personality are rare and valuable. We all wish Alex the best in his well-earned retirement.

The editorial follows:

ALEX SACHS RETIRES

New postmasters customarily attend meetings of postoffice employee organizations. Shortly after he was appointed Kansas City postmaster in 1949, Alex F. Sachs dutifully appeared at a gathering of the carriers group.

"Where are you going?" a sergeant at arms asked Sachs at the door.

"To the meeting," Sachs replied.

"Where do you work?" asked the sergeant.

"At the postoffice," said Sachs.

"What's your name?" inquired the sergeant.

"Alex Sachs," replied the new boss, and the sergeant retreated in confusion.

This was a perfectly normal incident, for the Kansas City postoffice is a big organization of 3,000 regular employees. But it couldn't have happened a few months later, for by then virtually every employee knew the boss by sight. Sachs moved about quietly from one department to the next until he was familiar with the routine. He soon became well acquainted with the postal manual, a book of regulations about 5 inches thick. He learned that you start planning for next Christmas on December 26.

The engineer turned postmaster has given calm direction to an operation that in the last 9 months handled 514,413,000 pieces of first class mail and 40,589,000 pounds of second and third class items. He never became a desk-pounder.

Now Alex Sachs is retiring to relieve the unavoidable pressures of the job on his health. Kansas City will wish its postmaster well.

Anniversary of the Adoption of the Polish Constitution

EXTENSION OF REMARKS
OF
HON. JOHN J. ROONEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. ROONEY. Mr. Speaker, I am grateful for the privilege of once again joining with my distinguished colleagues in the annual celebration commemorating the adoption of the Polish constitution, the date of which May 3, 1791, is one of the outstanding milestones in the evolution of democracy in Europe.

This Polish constitution closely follows our own form of representative government as initiated by our Founding Fathers. While we are still guarding the rights and privileges granted to us under our Constitution, the valiant anti-Communist Polish people have lost all rights, all privileges, all independence bestowed upon them 166 years ago, and have become an enslaved nation.

For centuries it has been the lot of the Polish people—foremost exponents of democratic ideals—to undergo bitter privation and persecution. We all know that to be the history of Poland—a history replete with constant struggle and sacrifice. The people of our great country, yours and mine, should be forever grateful to the Polish race for their many splendid contributions to liberty.

Today, in the hearts of millions of Polish people, those still behind the Iron Curtain and millions of our own Americans of Polish birth or descent, there

burns the light of freedom that will some day soon bring to Poland a new independence.

I am sure that with few exceptions the people today in Poland would if they could jubilantly join us in this celebration to commemorate the adoption of the Polish constitution and renounce Soviet Russia. Even the iron heel of Soviet Russia cannot prevent the Polish people from a silent and hopeful observance of the anniversary of their great day.

The Poles have never calculated costs when their national pride and existence were at stake. They will fight when there is not an apparent chance of winning. They are the perpetual upholders of the lost but ever-glorious cause: Polish freedom. Battles in the past against Poles have been won, but the war has never been won. There has always been a Poland, even if it existed temporarily only in their hearts.

I pray that some day soon the end will come to the incessant warfare, to the oppression of the small nations, to bloodshed and pain, to intolerance and greed that have frustrated all the attempts of establishing peace and freedom in the world, and have brought tragedy to the lives of countless millions. I pray that the alien regime now in Poland will be hurled out and liberty will again be restored to these courageous people.

This observance of Polish Constitution Day should be another occasion to reassure the subjugated people of Poland that the Government and the people of the United States are dedicated to their peaceful liberation from Soviet bondage.

To Arouse the Conscience of the Nation

EXTENSION OF REMARKS
OF
HON. ADAM C. POWELL, JR.
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. POWELL. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

CALL TO A PRAYER PILGRIMAGE FOR FREEDOM TO WASHINGTON, D. C., ON MAY 17, 1957

As we approach the third anniversary of the ruling of the United States Supreme Court against racially segregated public school systems, we invite all believers in the God-given concept of the brotherhood of man and in the American ideal of equality, to assemble, review the national scene, give thanks for the progress to date, and pray for the wiping out of the evils that still beset our Nation.

The May 17, 1954, ruling against State-imposed segregation came about in orderly fashion, through the courts, from the lowest to the highest. Our appeal was based upon the Constitution of the United States of America. It was made after 58 years of enduring the grossly unequal "separate-but-equal" doctrine laid down in 1896. It came after decades of patience and of reliance on morality and justice. It came slowly, step by step.

It came without violence, terror, or assassination. No bombs were thrown. No school shacks were burned down. No Jim Crow trains were dynamited. What was then the law of the land was not defied.

The Negro citizens of the land made the most of their circumstances. They got what education they could for their children. They made out with little or no public recreation. When they traveled they endured insult and physical assaults. They took such jobs as they could get at such wages as they were paid. They lived where they were herded. They were barred from the ballot boxes on election day. They abided by the kind of justice they received in the courts. They served their country in a Jim Crow army. They were victims of the bestial crime of lynching. However, this blanket of inequality and oppression did not completely smother the struggle for human rights. Time after time the challenge was met with steadfastness and courage, even in the face of disheartening odds. The valiant freedom fighters for civil rights became inspiring heroes for our time.

The May 17 decision, then, was a new emancipation. At last Negroes were to be recognized as citizens and the States were forbidden to set them off by law, solely because of race, in public education and elsewhere. In Montgomery the people caught the meaning of the hour and struck a mighty spiritual blow for human dignity.

On the public-school question, 9 States and the District of Columbia have either completed desegregation or have made a beginning. But 8 States have defied the Nation's highest Court and have refused to begin in good faith, with all deliberate speed, to comply with its ruling. In these States privately organized groups have exerted economic pressure upon Negro citizens who have simply asked obedience to the Supreme Court. Men and women have been fired from their jobs. Merchants have been refused credit and goods. Farmers have been denied loans.

The governments of these States have joined the assault on democracy by moving to put the National Association for the Advancement of Colored People out of business. While the NAACP is the declared target of these actions, the true victims are the white and Negro citizens who are thereby restricted in the exercise of their right to freedom of speech, freedom of assembly and petition, and freedom to seek redress of grievances through the courts.

In view of the historic role the association has played in the life of the American Negroes, the attack upon it becomes a very special and particular one upon the constitutional rights of Negro citizens. Abridging the basic rights of citizens is in itself a high crime; but depriving them of the agency through which they have sought, in the courts, to secure these very rights is shameful compounding of the felony. It makes a mockery of citizenship.

The law enforcement agencies of these States have permitted violence to be visited upon individuals and institutions which oppose segregation. Ministers have been arrested, threatened, and shot. Churches and homes have been bombed. Schoolchildren have been threatened by mobs.

Accompanying all this has been a campaign of racial slander of the most vicious and reprehensible nature, typified by characterization of the Negro as inherently criminal and diseased, and as a mental incompetent.

This defiance, this legislative harassment, this economic pressure, this slander and violence have been encouraged by public officials, including mayors, governors, attorneys general, and United States Senators.

At the Federal level the civil rights bill has been trimmed and delayed in the Congress by Members from the States where defiance of the Supreme Court is State policy. The avowed purpose is either to whittle it down to nothing, or to kill it altogether.

One hundred years ago, in the Dred Scott decision, it was held that the Constitution did not include Negroes in its protection of the rights of citizens. Even though a war was fought and the Constitution amended, some States today are seeking to wipe out history and to restore to force the Dred Scott decision of 1857.

In the words of Abraham Lincoln, this is a Nation "conceived in liberty and dedicated to the proposition that all men are created equal." We believe its people treasure the heritage of equality before the law. They uphold this principle because they know that every man, whatever his race, religion, or station, must be free if our Nation is to remain strong.

We believe Americans are deeply religious and wish to order their lives and their country according to the great moral truths to be found in our common religious heritage.

As the Founding Americans prayed for strength and wisdom in the wilderness of a new land, as the slaves and their descendants prayed for emancipation and human dignity, as men of every color and clime in time of crisis have sought Divine guidance, so we now, in these troubled and momentous years, call upon all who love justice and dignity and liberty, who love their country, and who love mankind, to join in a prayer pilgrimage to Washington on May 17, 1957, where we shall renew our strength, communicate our unity, and rededicate our efforts, firmly but peaceably, to the attainment of freedom.

A. PHILIP RANDOLPH,
President, Brotherhood of Sleeping Car Porters, CIO.
REV. MARTIN LUTHER KING., JR.,
President, Southern Leaders Conference.
ROY WILKINS,
Executive Secretary, National Association for the Advancement of Colored People.

SPECIAL NEW YORK CHURCH MOBILIZATION

Church mobilizer: The Reverend David N. Licorish, New York, N. Y.

New York City: The Reverend Claude L. Franklyn, chairman, New York Committee, Brooklyn, N. Y.

Bronx organizer: The Reverend George L. Payne, Bronx, N. Y.

Fares New York to Washington, D. C., and return: Bus, $5; train, $9.50.

Polish Constitution Day, May 3, 1957

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. VAN ZANDT. Mr. Speaker, we pause today to celebrate the 166th anniversary of the adoption of the Polish Constitution May 3, 1791. This is an important date in the history of Poland. It marks the beginning of modern Poland with a limited monarchy, ministerial responsibility, and biennial parliaments. Much of the obstructive machinery of the old system was abolished and invidious class distinctions were done away with. Absolute religious toleration was established. No sooner was it adopted, however, than it was overthrown by the force of invading Russian armies. Since then, Poland has known

little freedom except for the period between the two World Wars. Today we look forward to the time when Poland may again know true freedom.

For the last 13 years, since the Red army "liberated" Poland from the Nazi forces, the Soviet Union has dominated the Polish government. It has been a Russian satellite. Soviet planners have directed the economy, leading the nation to near bankruptcy. The Polish economy was made completely dependent on Russia, both for markets and machinery parts. Production of consumer goods was curtailed in order to build more heavy machinery for exports to Soviet Russia. The people lost all incentive to work, for the benefits of their labor helped only their Soviet overlords. Communist attempts to collectivize the farms failed. It is reported that the independent-minded Polish peasants resisted collectivization so stubbornly that some 80 percent remained individual farmers despite all the pressures applied by the government. Russian teachers shaped the educational system to teach communism and stamp out the Polish love of liberty and Christian faith. But after 13 years it is manifestly clear that the most stringent Soviet efforts have failed completely. The vast majority of the Polish people are united in their hatred for Soviet oppression and Soviet communism. We have seen testimonies to this resistance in the Poznan uprising last June and in the revolution of October 1956.

Poland now stands in a perilous and uncertain position on the road between slavery and freedom. The question of whether the "nationalist" regime headed by Mr. Gomulka will further increase the freedoms of the Polish people or be swallowed up by the Soviet Union is one which none of us can answer now. Mr. Gomulka is a Communist and could not be classed as a champion of democracy by the wildest stretch of the imagination. He is not a new embodiment of the spirit of the constitution of 1791, except that he too appears to seek the independence of his native land from Russian control. Collectivization has been stopped, religious instruction is again given in the schools to those who desire it, and the Polish people supported his government in the semifree elections held this January. But Gomulka has signed an agreement with Russia that permits the continued stationing of Red troops on Polish soil and he is not seeking to renounce the Warsaw Pact. Still, it is reported that the Soviets are seeking to oust Gomulka and replace him with a lackey similar to the Hungarian, Janos Kadar.

The question of how much freedom Gomulka will really establish in Poland and whether he can continue to resist Soviet domination is a particularly difficult one for Americans today. The Gomulka regime has requested substantial foreign aid credits from the United States. If Russia reasserted her control over Poland, our aid would really be aid to Russia. On the other hand, many are convinced that if United States loans proved effective in relieving some of the most pressing economic difficulties in Poland today, it would enable the Gomulka government to break away from Russia to an even greater extent. This would give inspiration to the peoples living under all the other satellite governments of Eastern Europe. It could show a way to peaceful liberation, by evolution, however slow it may be.

Reports in the newspapers indicate that President Eisenhower favors granting a loan to the Gomulka regime, though a much smaller one than it has requested. All of us who love freedom and who have watched from afar the past oppression of the Polish people will join in the hope that if this step is taken, it will lead toward the eventual realization of full freedom for Poland.

Polish Constitution Day

EXTENSION OF REMARKS
OF
HON. DANTE B. FASCELL
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 9, 1957

Mr. FASCELL. Mr. Speaker, tomorrow is Poland's national day, commemorating the anniversary of the adoption on May 3, 1791, of one of the first European constitutions based on democratic and progressive principles. Because of recent events in Poland and Hungary the celebration of Poland's national holiday assumes special importance this year.

Since the Poznan uprising in June and the bloodless Gomulka revoultion of last October, the whole basis of Soviet control in Poland has been challenged. When taken in conjunction with the heroic efforts of the Hungarian freedom fighters, these events assume major historical significance. Communist claims to have won the allegiance of the peoples of the subjugated nations of central and eastern Europe have been shown to be false.

For Poland, as for the other countries of eastern Europe, Communist rule has brought economic ruin; the forced collectivization of agriculture has resulted in dismal failure, and attempts to win the loyalty of the youth workers and intellectuals have been openly repudiated. It is obvious that the vast majority of Poles are wholeheartedly opposed to Soviet control of Poland's foreign policy, to Communist dictatorship as a form of government, and to the teachings of Marx, Lenin, and Stalin. The present Warsaw government has brought a certain degree of liberalization and has sought to put Poland on a more equal footing in dealing with the Soviet Union. The path to a free and democratic Poland remains a long and hazardous one, but those who know the Polish people have no doubt that this is the path which they will courageously seek to follow.

It is of more than mere symbolic significance that the Soviets for years prohibited the celebration of Poland's national day on May 3, substituting for it the hated July 10 anniversary of Poland's subjugation by the Soviet Union. This year the present Warsaw government has not dared restore May 3 as a formal national holiday, but it has declared that the Polish people may commemorate it privately. This compromise is typical of the precarious balance which the Gomulka regime must maintain in its efforts to attain greater freedom and liberalization for Poland without provoking Russian antagonism beyond the breaking point.

Developments in Poland in this crucial period are of grave importance both for the West and for the Soviet Union. The continuing unrest and discontent in Poland indicate the demand for further reforms. Already collectivization of agriculture has ceased and 80 percent of the collective farms have been dissolved, craftsmen have been allowed to return to their private trades, and small shops under private operation are now permissible. The new leadership has also come to more satisfactory terms with the Catholic church; however, as the recently released Cardinal Wyszyski has pointed out the Polish people must show patience and endurance. Poland is still encircled by Soviet Army divisions, and the West is in no position to help the Poles achieve their aims by resort to armed force.

The Polish nation does, however, look to the West and particularly to America for political, moral and economic support. Continued interest on our part will bring nearer the long-awaited day of complete Polish liberation by peaceful means.

The Iron Curtain which has split Europe for over a decade shows clear signs of rusting away. The efforts of the Polish people to maintain constant pressure on the remaining Soviet bonds of slavery are being closely watched by the other subjugated peoples of Central and Eastern Europe. To aid these peoples in their difficult struggle for freedom the United States must follow a policy of constructive and imaginative leadership.

The War Against Our Immigration Law

EXTENSION OF REMARKS
OF
HON. LAWRENCE H. SMITH
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. SMITH of Wisconsin. Mr. Speaker, the distinguished gentleman from Pennsylvania, the Honorable FRANCIS E. WALTER, has to his very great credit the enactment of the so-called Walter-McCarran Act. In recent weeks, this law has been the target of many groups who would repeal our immigration law. Mr. WALTER himself has been the recipient of many unfair attacks by these people.

Mr. Speaker, in the April 20 issue of Human Events our colleague submitted an article entitled "The War Against Our Immigration Law." He stated that this drive to repeal our immigration law was spearheaded by Communists, their fellow travelers and others. Under leave to ex-

tend my remarks, I am including the article for insertion in the RECORD as it is a very important statement by a man who helped to write the law and whose only objective, as I see it, is to protect American citizens against unlimited immigration. This law must not be repealed.

THE WAR AGAINST OUR IMMIGRATION LAW

(By Hon. FRANCIS E. WALTER, of Pennsylvania)

Spearheaded by the Communists, their fellow travelers, congressional liberals and spokesmen for the so-called ethnic minority blocs, the assault on America's immigration system is increasing in intensity every month. Attempts to amend or abolish the Immigration and Nationality Act—generally referred to as the Walter-McCarran Act—have become standard operating procedure at every session of Congress since passage of the act in 1952.

In the closing hours of the Congress last year, those who are bent on wrecking our protective immigration system came within a hair's breadth of accomplishing their job of destruction. On the very last day of the session, Senators ARTHUR WATKINS and EVERETT DIRKSEN, in an unprecedented move, appended to a routine bill a series of amendments which would have demolished the national origins quota system and opened the floodgates. These amendments were rushed through the Senate without customary hearings and without committee reports.

In fact, these amendments had not even been printed when they were passed and sent to the House of Representatives—where the wheels had been greased to slip them by in the final rush before adjournment. Amendments of this sort are invariably sent to the appropriate committee before submission to the House. In this particular case, however, the amendments were sent over after the House Judiciary Committee had held its last meeting of the session. As chairman of the Immigration Subcommittee in the House, I was able to head off adoption of these amendments only by persistent effort as the clock was ticking off the closing moments of that body.

These amendments, which have again been introduced in the present Congress, contain provisions which would open every valve the Walter-McCarran Act furnishes for controlling the number and caliber of aliens gaining admission to our shores. If the provisions of these amendments are adopted, the net result will be (1) destruction of our national origins immigration system which gears the flow of immigration for maximum assimilation and for the preservation of our cultural integrity; (2) increase of total annual immigration from around 230,000 to well in excess of 600,000; and (3) emasculation of the chief screening and security safeguards of the present law.

Moreover, unless the rank and file of patriotic citizens—at the crossroads of America—demand of their Senators and Congressmen that they vote against these weakening amendments, they are likely to be adopted in response to the mounting clamor of leftist organizations.

The Committee on Un-American Activities recently disclosed that the Communist party has created over 180 organizations for the purpose of bringing grassroots pressure on the Congress to destroy the Walter-McCarran Act. At the recent convention of the Communist party in New York City, the destruction of this law was one of the two legislative objectives on which the twenty-odd-thousand Communist agents in this country were ordered to concentrate during this year.

The Walter-McCarran Immigration Act, the result of 4½ years of painstaking research and exhaustive hearings, represents the simplification and codifying of 148 different immigration and naturalization laws. It has two chief purposes: (1) To insure that the citizens of the United States—whatever their ancestry—will form a true nation, not a hodgepodge of unassimilated ethnic minority groups; and (2) to keep from our shores criminals, Communists, and other subversives.

To understand what danger lies in the current proposals to change this law, it is necessary to understand just what the Walter-McCarran Act provides, and the principles it embodies.

The Immigration and Nationality Act (Public Law 414, 82d Cong.) became law on June 26, 1952, over the veto of President Truman. Congress overrode Truman's veto by a vote of 278 to 113 in the House, and a vote of 57 to 26 in the Senate. As those figures suggest, the passage was a "bipartisan" effort. It was a faithful concensus of national sentiment on the subject of immigration.

Until Congress stamped its decisive approval on the Walter-McCarran Act, American immigration law was a snarl of separately enacted, and in many cases conflicting, statutes. Numerous injustices, such as racial exclusion, resulted from this tangle. On the other hand, many aliens were admitted who should have been kept out. One of the gravest weaknesses in our old laws was the fact that our immigration and naturalization policy were not coordinated. The result of this failing was that ethnic blocs grew up within our country, estranged from the society about them. Such enclaves are notoriously easy pickings for unscrupulous politicians, and often prove fertile ground for the seeds of Communist agitation.

The Communist question is, in many ways, the most serious that the Walter-McCarran Act is designed to handle. Prof. Louis Budenz testified before the Senate Immigration Subcommittee that the "general world pattern pursued by the Kremlin" shows that "* * * the direct responsibility shall be in the hands of aliens in any respective country in which operations are carried on. It is the fixed design of Moscow to employ aliens in the most responsible positions in every country. This assures that nostalgia and patriotism may be reduced to the minimum. * * * The native Communist leader, therefore, is always under the control of a superior, who is an alien, or an ex-alien, the latter having received his citizenship merely in order to serve the Kremlin more effectively."

This is, obviously, a common sense measure by the Communists. While I am convinced that the vast majority of our naturalized citizens are loyal Americans, I think it is apparent that immigrants coming to our shores with prior loyalties, can function as subversives with less emotional stress than native-born citizens. The shrewdness of the Communists in exploiting this fact is borne out by this startling information: analysis of approximately 5,000 of the more militant members of the Communist Party revealed that 91.5 percent were either of foreign birth, married to persons of foreign birth, or born of foreign parents. Over half traced their origins to Russia and the satellite countries. It is beyond question, therefore, that prior loyalties, in the form of cultural and emotional commitments, are used to advantage by the Communists.

To combat this grave danger, the Immigration and Nationality Act incorporated provisions of the Internal Security Act of 1950, enabling immigration authorities to screen out subversive elements. The immigration law now provides for deportation of alien Communists, and cancellation of the citizenship of naturalized Communists who obtained citizenship fraudulently. It also tightens up procedures for screening out criminals, prostitutes, narcotic-addicts, and the like.

The method devised for achieving maximum assimilation of aliens admitted—and minimum politicking—is called the national origins quota system. This formula was introduced in the Immigration Act of 1924, and has been retained in the present law. It provides that the annual quota for any 1 of the 85 major quota areas shall equal one-sixth of 1 percent of the number of inhabitants of the United States, computed from the 1920 census, originating in that area. The total number of quota immigrants now admissible each year is 154,657. Additionally, a substantial number of nonquota immigrants are admitted each year. These include husbands, wives, and children of American citizens and natives of independent countries of the Western Hemisphere. There is no numerical limitation on the entrance of nonquota immigrants, and their numbers swell the ranks of immigrants coming to this country to well over 225,000 annually.

In the fiscal year 1956, the United States admitted 321,625 immigrants—people who took up permanent residence in this country. Of this number, 232,315 were admitted under our regular immigration laws and 89,310 were admitted under the so-called Refugee Relief Act, which is in reality only a device for admission of more aliens into this country through the back door. These figures represent substantial increases over fiscal year 1955, and the trend indicates that the pressure upon our immigration system will increase proportionately each year.

The national origins system is vilified, in the chant of the immigration hucksters, as racist, bigoted, and reactionary. These accusations are summed up in the classic phrase of the demagog bidding for minority bloc votes: the national origins system, it is charged, makes second-class citizens of immigrants.

All of these accusations are false. The Walter-McCarran Act is, in many essential respects, the most liberal immigration law in the world. The charge of racism is especially ludicrous. The truth is that this immigration statute removed, for the first time, racial bars to immigration. The quotas for Asiatic countries are now determined by the same formula as those for European countries, i. e., according to the proportion that their group in our country bears to the total population. Congressman WALTER H. JUDD, an acknowledged authority on the Far East, has said that "this law removes, at one stroke, the remaining racial discriminations in our nationality and immigration laws which have so greatly contributed to ill feeling in many parts of the world."

The culminating charge, that the national origins system creates second-class citizens, is the most hypocritical of all. A second-class citizen we are informed, is someone who is denied opportunities open to the rest of society, and who is thereby placed on unequal footing with his fellow citizens. The national origins system produces no such results. In fact, it is the expressed purpose of that system to make sure that all new citizens, by assimilation into society, are given equal opportunities, and are placed on an equal footing with everyone else. On the other hand, it is those who thrive on manipulated ethnic votes, who want, desperately, to create second-class citizens. These vote hucksters want to build up blocs whose interests are cut off from those of the country at large. Isolated from many of the main issues that are vital to the United States, these bocs are perfect material for the political demagog.

The political impulse behind many of the attacks on the national origins system can be seen when we inspect the proposed alternatives. The chief substitute which has, from time to time, been proposed is the unified quota system. Under this system, ad-

missions would not be decided on an automatic, mathematical basis. Rather, the power to determine admission would be vested in a commission, politically appointed. Such a change is roughly one from a government of laws to a government of men. It would instantly convert immigration from a policy conducted in the national interest to a policy directed by political greed—in which each pressure group would strive to make its particular influence felt, and in which the demagogs would attempt to jam through blocs of immigrants representing just so many captive votes. The national origins system is the only impartial method of quota allocations ever devised. In the explosive context of immigration, setting up a system free of political conniving is a major job in itself.

The national origins controversy boils down to this: Is there such a thing as the United States? Do the American people have a culture which unites them as a nation? If we are to judge by results, the answer to these questions has to be "yes." There is something about America which has made it great and strong, and which has made it and kept it free, although—in my opinion—it has nothing to do with race or superiority or inferiority. Rather, it is a matter of basic ideology, cultural attitudes, of a common heritage. That we are a nation of immigrants is indeed a part of that heritage, but the emphasis in that phrase is on the word "nation." We are immigrants who have fused into one people, with one national loyalty—to the United States of America.

This country can continue in its great traditions only if its citizens understand and believe in them. New citizens, therefore, must be brought in by a pattern and in degrees which will allow them to become a true part of American life. Immigration which contradicts this pattern or which exceeds those degrees is a disservice to the immigrant and our society alike.

As part of the clipping away of the national origins system, it is proposed that the base year—1920—chosen for establishing the total number of admissible quota immigrants, be changed to 1950. This one amendment, if enacted, would not only increase the quotas by about 85,000 annually, but would change the entire complexion of the cultural composition of immigration to this country. Because of numerous special enactments (such as the displaced persons law and the Refugee Relief Act) and a disproportionate use of quotas by natives of certain countries, the flow of immigration during the last several years has not been patterned to maintain the cultural balance of our population.

Another pending amendment is to apply the unused portion from large quotas to the waiting lists for small quotas. By completely rearranging the apportionment of visas, this proposal would further weaken the national origins system. Current attempts to alter the quota provisions relating to the Asia-Pacific triangle—by which orientals born in Western Hemisphere countries are chargeable to oriental quotas—would have the same effect. Another attempt to destroy the "national origins" system is the proposal that dependent colonies take over the unused quotas of their mother country. All of these proposals are thinly veiled attempts to wreck the national origins quota system, which is vital to the preservation of the basic cultural composition of our society. For that reason, they must be defeated.

The onslaught on or immigration laws is not limited to the national origins system. The tactic is to strike from many directions at once, with the hope that through sheer weight of numbers, some of the amendments will get through.

Here are some of the other proposals that have been introduced in the House and Senate:

1. It is proposed that a Board of Visa Appeals be established to review consular decisions granting or withholding visas, with its decisions in turn subject to judicial review. This means that immigration to the United States would assume the status of an adjudicable right of aliens, rather than a privilege.

2. Under the present law, the consular officers may refuse to issue a visa if they have reason to believe that an alien seeks to enter the United States for purposes detrimental to the welfare or security of the country. It is proposed that the consular officers be forced to establish in court their grounds for refusal. Again, this makes immigration a right, rather than privilege. It would also force the Government, at the demand of an alien, to disclose secret security information.

3. It is urged that broad discretionary power be vested in the Attorney General to admit aliens—outside the quotas—when he deems it in the public interest, and to permit aliens who have illegally entered the country to remain here permanently. The net effect of such provisions would be to open a huge gap in our immigration laws and to put a premium on illegal entry, when there are an estimated 3 to 5 million aliens illegally in the United States already.

4. The Walter-McCarran Act provides that an alien who has received, in the United States, pardon for a crime is exempt from deportation. It is proposed that this benefit include those pardoned for crimes by other countries. Such a provision, of course, would place power over immigration to the United States, in such cases, in the hands of foreign governments.

5. The present law stipulates that naturalized citizens who return to their homeland and establish residence for 3 years, or who establish residence in some other country for 5, lose their citizenship. It is proposed that such residence abroad should not be cause for loss of citizenship. The effect of this proposal would be to confer upon aliens the benefits of American citizenship, and then to permit them to evade the duties of citizenship.

Analysis of these and literally dozens of other pending amendments reveals a common thread: they all aim to subordinate the interests of the United States to the interests of other countries and their citizens. This is, in fact, the major theme of diatribes against the Walter-McCarran Act. It is asserted that Europe, Asia, and almost every country in the world, are suffering from too many people, and too little wealth. Therefore, they say, it is the "duty" of the United States to accept the population surplus of other nations, irrespective of their assimilability or our own population problems.

This is not the philosophy by which I have been guided in my career in the Congress. I believe that the first duty of an elected representative of the American people is to serve his own country. It is quite true that the population of the world, like the population of the United States, is expanding rapidly. Europe's surplus population alone is estimated at 79 million. The Far East is a vast sea of humanity with a combined population totaling almost a billion people. To suppose that the United States, through its immigration policy, can cure the problems presented by such masses of people is sheer folly. If we should open wide the floodgates to receive humanity's surplus, we would not improve the lot of the underprivileged countries of the world. We would only succeed in dragging ourselves down closer to their level.

While other nations of the world may, through envy or misunderstanding, want us to follow such a policy, they would suffer from it as much as we. For it is only as long as the United States remains strong and free that it can hold back the tide of communism. If we go under, they will go with us.

Rhode Island Independence Day

EXTENSION OF REMARKS
OF
HON. AIME J. FORAND
OF RHODE ISLAND
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. FORAND. Mr. Speaker, on May 4 Rhode Island will be celebrating the anniversary of its freedom. One hundred and eighty-one years ago the bells tolled for the brave people of Rhode Island, granting them their independence from their mother country, Great Britain.

In course of time, events are overlooked and personal sufferings unrelated. But, these brave colonists endured such inequities with a strong determination to shake themselves of this yoke. True to the tradition of democracy the people imposed their will upon the legislators of the time to act, and swiftly, to rid themselves of the rule of a tyrannical ancestor. It was on the 4th of May 1776, that the Rhode Island Assembly adopted the resolution renouncing allegiance to the British King. This act was the initial spark of freedom that fired the Congress of the United States to take similar action 2 months later.

Although Rhode Islanders have always been noted for their individual initiative and independence, the people of the State have stood together when they knew their cause was just. Rhode Island was the first of the 13 colonies to declare complete independence of Great Britain, and it was the last to ratify the Federal Constitution, refraining until it felt that certain inequities had been corrected.

The events which led up to these developments were hard pills to swallow by this little colony. Colonial resentment found expression in a series of incidents, many of which occurred in Rhode Island. As early as 1764 Newporters climaxed a riot with crewmen of the British schooner *St. John* by firing upon the vessel with cannons. The following year a Newport mob, angered by impressment of American seamen, seized and burned one of the boats of the British vessel *Maidstone*. Most famous in this series of incidents was the burning of the British revenue schooner *Gaspee*.

The colonial spirit of independency was the rock on which Britain's North American empire was finally wrecked. Accustomed for more than a generation to little or no taxation, and to nearly complete freedom in the management of their internal affairs, the colonists were disposed to resent every British attempt to strengthen colonial administration.

In 1774 Rhode Island gave support to the calling of the Continental Congress, naming as delegates the former political rivals Stephen Hopkins and Samuel Ward. In 1775, upon receipt of the news of Concord and Lexington, the general assembly created an army of observation—most of the troops later joined Washington's Continental Army. The same year the assembly commissioned its own navy, consisting of two units, to protect the colony's trade. Before the year was out, this force had attacked and

captured a vessel of the Royal Navy. On May 4, 1776, the Rhode Island General Assembly climaxed its program of resistance by formally declaring its freedom from Britain. This action, taken 2 months before the Declaration of Independence at Philadelphia, made Rhode Island the first sovereign State established by Europeans in the New World.

Mr. Speaker, in keeping with our great past, Rhode Island will celebrate its second annual Heritage Week this year over a 10-day period, from May 3 to 12. Events honoring our historic inheritance are being scheduled and will include pageants, ceremonies, exhibits, and open-house invitations on a statewide scale, including many of our most treasured historic sites and shrines.

The heritage of Rhode Island is a continuing thing, a patrimony passed on from generation to generation. New honors, new accomplishments, new discoveries—all are based upon that devotion to liberty and integrity that was implicit in the founding of our State. The many industries that make Rhode Island renowned today had their beginnings in the humble crafts of our State's settlers. The culture of Rhode Island is the contribution of those made welcome by this State's tradition of freedom of conscience. Our schools and universities stem from the love of learning that distinguished Roger Williams and his followers.

Many illustrious names are woven into the fabric of Rhode Island history: Roger Williams, William Blackstone, John Clarke, and William Coddington, John and Moses Brown, Gen. Nathaniel Green, Stephen and Esek Hopkins, Oliver Hazard Perry, Gilbert Stuart, John Goddard, Peter Harrison, and Samuel Slater. These and many more have helped to make our Nation strong and secure and have contributed to its economy and culture.

Kentucky Judge Exposes "Legal Railroading" in Our Mental Hospitals

EXTENSION OF REMARKS
OF
HON. USHER L. BURDICK
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. BURDICK. Mr. Speaker, I have here a letter written to the Honorable Basil H. Pollitt by Lawrence S. Grauman, judge of the Jefferson circuit court of Louisville, Ky., which gives a vivid account of how people are arbitrarily committed to mental institutions without being given their constitutional right or "due process of law," and other practices which appear to be common throughout the Nation, judging from reports I have had, under which persons who are not insane are nevertheless confined in institutions or mental hospitals.

In view of the fact that I have introduced House Concurrent Resolution 98, now in the Rules Committee, which provides for a thorough investigation of all mental health programs being currently promoted, I believe the facts brought forth in Judge Grauman's letter will prove of interest to my colleagues, and to all others who are interested in protecting the rights of persons being thus "railroaded":

MAY 22, 1956.

The Honorable BASIL H. POLLITT,
DeLand, Fla.

DEAR SIR: I have your letter of May 8, 1956, and read with interest the copy of the Cross which you enclosed.

You have requested a letter from me outlining the facts relative to situations which I have encountered as circuit judge where persons charged with being mentally ill are committed to State institutions without the safeguards provided for by law being followed.

Until 1954 all mental inquests were held in the criminal branch of the Jefferson circuit court (there being nine judges of the Jefferson cricuit court—5 common law, 2 chancery and 2 criminal). Some of the good citizens of Jefferson County interested in improving the conditions existing at our State mental institutions requested that the five common law judges alternate in presiding at mental inquests. In the spring of 1954 this new policy was inaugurated. I was astounded to find that a system was being used which did not afford due process to the defendants in the mental health cases. The Kentucky Revised Statutes provide for a presiding judge to appoint a member of the bar to represent and protect the interests of the defendant. KRS 202.050. The practice had been followed of appointing any attorney who happened to be in court the day the hearing came up, and thus the attorney had not previously conferred with the defendant to ascertain whether the defendant had a defense and wanted any witnesses summoned on his behalf.

KRS 202.130 provides that the presence of the defendant can be dispensed with if the oral testimony or the affidavits of two physicians who examined him contain the statement that they have examined him and that they believe his condition is such that it would be unsafe or unwise to bring him into court. I found that for an extended period of time prior to the common law judge presiding at the inquests defendants who were temporarily detained either in the psychiatric ward of the Louisville General Hospital or at the Central State Hospital in Jefferson County were never produced at the trial, but that either the two doctors who examined the defendant testified or sent affidavits that it would be unsafe or unwise to bring the defendant into court.

The Kentucky law provides for detention of the defendant pending a final trial where certain conditions exist, such as where a person has been arrested on a warrant based on an affidavit that the defendant is violent and dangerous; also where, in accordance with the statute, that person has been committed for 35 days for observation.

As a result of some newspaper publicity, I started receiving letters from inmates at Central State Hospital who claimed they had been committed without ever being personally summoned or personally present at the trial. I examined the files pertaining to some of these cases and was astonished to find that in many instances the defendant was not personally served and was not in court at the trial, but that the physician or person in charge of the defendant had been served. In a few instances I found that no process of any nature or description had been served on the physician or person having charge of the defendant or upon the defendant, and that the defendant had not been personally present at the trial.

After making an exhaustive research of the law, I came to the conclusion that even though the wording of the Kentucky statute warranted the interpretation that the defendant did not have to be personally served as long as the physician or person having him in charge and the nearest relative was served, a judgment rendered adjudicating the defendant to be a person of unsound mind under these circumstances, and where the defendant was not personally in court, was absolutely void—the defendant having been denied due process of law. I further came to the conclusion after reading numerous criminal cases, some from the Supreme Court of the United States, where an attorney had not been appointed in proper time to represent a defendant charged with crime, that unless the attorney appointed for the defendant in a mental inquest proceeding was appointed prior to the trial and actually went out and interviewed the defendant, the defendant was being denied due process of law.

KRS 202.120 dealing with the 35-day commitment for observation, provides that if within 30 days after admission by court order the institution finds that the person is insane (phychotic), a certificate to that effect shall be furnished and the inquest shall be held without appointing examiners (two physicians), who are appointed by the court, to examine the defendant. KRS 202.120 further provides: "And the court, instead of appointing examiners as provided for under KRS 202.100, shall admit as evidence the certificate above referred to in this subsection."

I have refused to permit any final hearing to be had where the evidence as to the defendant's mental illness was solely the certificate provided for by KRS 202.120, which certificate has generally been in the form of a joint affidavit of the two physicians from the mental hospital that the defendant is insane (psychotic). I do not see how an attorney appointed to represent a defendant could cross-examine a joint affidavit or a certificate, and therefore I believe that a defendant is being denied due process of law where he is not personally present in court and where the two doctors from the hospital where the defendant was committed for observation do not appear in person and give their testimony but send in a joint affidavit in the form of a certificate.

I personally believe that the presence of the defendant should not be dispensed with unless at least one doctor appears in person before the jury at the inquest and gives facts and not conclusions showing why it would be unsafe or unwise to bring the defendant into court.

I realize the difficult situation which confronts some of the honest, conscientious psychiatrists connected with either the Veterans' Administration Hospitals or the Central and other State hospitals. In many instances the defendant is violent and upset, and the service of a summons on the defendant might have an adverse effect and the interview of the defendant by an attorney appointed might excite the defendant. However, under the law a defendant is presumed to be sane until he is in a proper judicial proceeding adjudicated to be insane; and in view of the 14th amendment to the Federal Constitution, which provides that no person shall be denied his liberty without due process of law, I have consistently refused to permit any case to be tried before me unless the defendant was personally served or was present in court, and unless the attorney appointed to defend the defendant has had the opportunity to interview the defendant in person before the trial, and unless there is competent medical testimony given orally before the court and

the jury at the mental inquest proceeding. I am pleased to state that I have gotten cooperation from the psychiatrists at the Veterans' Hospital and from the superintendent at the Central State Hospital. However, from personal investigation I have found that there are numerous senile persons who have previously been committed to a State mental hospital where there has been absolutely no compliance with the due process of law clause and where such persons are not insane but troublesome and their children or other members or their families have been responsible for their incarceration in a State mental hospital.

I believe that the public is being alerted to the situations which have existed in the past with reference to defendants being adjudicated of unsound mind where such defendants were not accorded the protection of the due process clause, and that in the future there will be fewer instances of defendants being committed to mental institutions without the defendants' rights being securely guarded under the due process clause.

Unfortunately the victims of these situations where due process of law has been denied are generally humble people without influence and without finances, and therefore very little attention has been paid to their plight. I trust that you and your associates will pursue your efforts to safeguard the rights of those charged with being mentally ill and will thus bring about a better understanding of the strict requirements of the law and of both the Federal and State constitutions with reference to mental health proceedings.

Yours very truly,

LAWRENCE S. GRAUMAN,
Judge, Jefferson Circuit Court, Common Pleas Branch, Fifth Division.

We rest our case. A respected and eminent judge has spoken. Dynamite has exploded. Legal railroading is no longer a myth—it is an established fact. If you are interested in stopping legal railroading or wish to ask questions regarding Judge Grauman, send them to Basil H. Pollitt, editor of the Cross.

Address by Adm. Arleigh A. Burke, USN, Chief of Naval Operations, Before the English Speaking Union, London, England, Monday, April 1, 1957

EXTENSION OF REMARKS
OF

HON. EUGENE J. McCARTHY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. McCARTHY. Mr. Speaker, I wish to call to the attention of the House the address by Adm. Arleigh A. Burke, Chief of Naval Operations, before the English Speaking Union in London, England, on April 1, 1957:

Ladies and gentlemen, it is an honor to be here. I have long looked forward to paying another visit to England.

I am here today as a sailor, but I would like to emphasize at the beginning that our defense team consists of an Army, a Navy, an Air Force, and the Marines. Each service is carefully balanced in relation to others.

The world is changing. Some of the changes are so far reaching that it is impossible to comprehend the full impact of all of them.

The world population, for example, is increasing at an unprecedented rate. It looks as if it may triple in the next hundred years.

Land frontiers of the world have all but disappeared. About the only areas on the surface of the earth which remain to challenge man's pioneering spirit and ingenuity in the years ahead are the oceans. Beyond that is the space above us.

The time may come, of course, when we may be able to pioneer on some other planet. But today our problem is to get along on this particular planet.

Technological change is accelerating. Land transportation, water transportation, and air transportation technology is progressing at a very rapid rate. The need to transport people and material among nations is expanding year by year.

At sea, our nuclear-powered submarine *Nautilus* cruised, on her first core, the equivalent of 24 Atlantic crossings, or 2½ times around the world, without refueling.

Guided and ballistic missiles are soon to become commonplace methods for delivery of destructive power—and times of delivery will be measured in minutes. Antiaircraft surface-to-air guided missiles already in operation have demonstrated phenomenal accuracy against aircraft targets.

The destructive power of weapons has increased tremendously. The world is haunted by the specter of a nuclear exchange between rival population centers.

Defense costs are rising steeply, yet satisfactory solutions to our security problems still seem far away.

More people, more speed and more destructive power have created among us a feeling of global claustrophobia. Many have become so mesmerized by the possibility of massive devastation that other more practical, and perhaps less futile, solutions to our problems are being overlooked.

In times like these, men are compelled to search for new and better answers to their problems. If enough of us search hard enough, better answers will surely be found, and perhaps not too far in the future.

In our search for better answers, we are mindful that certain things have not changed very much. I shall mention only a few.

First of all, geopraphy—the basic geography of this planet—has not changed very much. The mountains remain where they were. So do the deserts, the plains and the seas. Land areas constitute less than one-third of the surface of the earth. The water areas, covering the rest of the world, still remain relatively untouched.

Another thing which has not changed very much is human nature. People are land conscious.

People understand land problems more readily than they do sea problems. Most of the research and development talent of the human race is devoted to the solution of land problems. That portion of the total human effort available, which is devoted to sea matters, still remains very small.

Nevertheless, human liberty and national independence seem to bear some kind of relationship to an understanding of the sea. The British, more than any other people in the world, bear witness to the fact that sea consciousness and independence are related.

Today, from the interior of Asia, totalitarianism threatens the maritime world. Totalitarianism is again on the march. This threat has taken many forms over the years, as it alternately pressed against the maritime world and then receded. Communist totalitarianism is reaching out—seeking to subjugate more people and to control more territory. The cycle has begun again.

Consciously and sometimes unconsciously, the maritime world has united when threatened with totalitarian aggression. More often than not, this unity has been rather loose and informal. It has been a unity born of common ideals and common purposes, in the face of a common threat. It has been a common advance toward common goals.

Rarely have all members of this wonderful maritime federation proceeded along precisely the same path—or at the same rate—or in rigid cadence. Yet, the fact remains that this loose, informal maritime association has been, almost from the beginning, one of the most powerful, consistent and constructive influences in the history of civilization. No people on the face of the earth have contributed more to this freedom-maritime concept than have the British.

Continental-minded conquerors have long sought to subjugate these British Isles. None ever understood why the accomplishment of this should be so difficult. There may even be a few today who still do not understand. It is doubtful whether Napoleon ever understood how his losses at sea, far beyond his shores, were spinning a web from which he would never escape.

Hitler would probably have missed the point and been well pleased had he known after Dunkirk that your great Prime Minister had stripped these islands to reinforce the Middle East. There were perhaps, in those days too, many who would have placed less emphasis on striking the enemy in distant theaters and more on home defense installations. The free world owes much to the fact that such advice did not prevail.

New weapons and new techniques have increased the vulnerability of all types of installations. This is particularly true of fixed bases which can be acurately located well in advance of attack. We in the United States Navy are particularly concerned about the increased vulnerability of stationary bases which support our forces at sea. To us in the Navy this means greater emphasis on moving forces, such as mobile carrier striking forces, and less reliance on stationary bases for support.

New technologies have done something more. They have disinterred the ancient claim that a weapon has at last been found that will sweep surface ships from the seas.

This is, of course, an old story to sailors. For some reason or other, the development of a new weapon has almost invariably been accompanied by a claim that navies were finished.

To take only recent examples, in the 19th century, it was the rifled gun that was to do us in. Then it was the torpedo, the submarine, the airplane and the atomic bomb. Now the nuclear-powered submarine is the weapon that finally is to sink all ships at sea.

Let us not underestimate the threat of the nuclear-powered, missile-firing submarine. However, new weapons will also be put to work to assist the free world navies in controlling and using the seas. Instead of spelling the doom of navies, powerful new weapons invariably add to our strength at sea.

The need to use the oceans is greater today than ever before. The tonnage of material moved by sea continues to increase year after year. Over 99½ percent of the total world volume of trade moves by sea. Less than one-half of 1 percent moves by air.

Survival under attack depends on the ability of the free world to come quickly to the support of beleagured nations by sea—with modern, hard-hitting army, navy, and air force teams. The free world will continue to use the surface of the seas. The fact is that there can be no free world unless we do.

There can be no free world association unless its navies are kept up to date. Guns can no longer shoot down modern, high-flying planes. Guided missiles are needed. Navies must be equipped with the modern weapons and equipment needed to meet all threats at sea. Modern weapons and equipment are needed to cope with the innumerable tasks which navies must perform.

Modern weapons and equipment are costly. They weigh heavily on the economy of the richest nations.

The Royal Navy is to be congratulated on the steps it has taken, and will take, to maintain modern effectiveness. Modern devices, such as the new aircraft, Scimitar and

Sea Vixen; the guided missile, Sea Slug, and other modern devices of which we have heard encouraging reports, will all be needed in the future.

It is not easy, as I have found from painful experience, to make the decision to spend large portions of the funds available to a navy on new equipment. Nevertheless, it is a necessary decision.

We in the United States Navy are convinced that naval power will have a greater influence on the lives and affairs of nations in the years ahead than it has ever had in the past.

In the nuclear-missile age, even more than in the past, the side which commands the seas will not be defeated. The greatness of Britain bears testimony to her long appreciation of this fundamental principle.

Technologically, we in the United States Navy feel that we are now moving ahead, after an initial period when naval developments seemed to lag behind developments in land-based weapons. Many of the wonderful ideas which we are using in our new ships we owe to our colleagues in the Royal Navy.

Of particular significance are some of the contributions you have made to the effectiveness of our mobile carrier striking forces: steam catapults, the angled carrier deck, the mirror-landing system, to name a few.

We look forward to still more naval progress as the sea consciousness of the free world increases, as it surely will and must. All of us should develop the habit of looking ahead toward the seapower of the future, before our Communist competitors, who are learning fast about these things, take the oceans away from us. Everything possible must be done to interest more of the creative and industrial genius of our countries in the solution of oceanic problems.

Turning now to the specific problem of free world security in the nuclear-missile age, three things appear to be necessary:

First, our main defenses must be advanced as far toward the enemy threat as possible. In event of nuclear attack it is doubtful whether defensive weapons based in home territories can get into action soon enough or far enough away to provide good protection for vital areas.

The ocean areas of the world present opportunities to gain more time and space for defense. The location of ships at sea is generally unknown to an enemy. Ships must be searched for and located before they can be attacked. This takes extra time.

Ships are deployed away from home, away from population centers of the homeland, near possible trouble areas. This gives the free world extra space. The side which has extra time and space has a decisive advantage.

Next, offensive weapons must be deployed as close to the source of the threat as possible. This provides another significant time and space advantage in event of attack. It adds substantially to the weight of fire that can be delivered on target for a given expenditure of resources. This means superior economy of force, more attack capability for the amount of money expended.

Third, additional dispersal and meneuvering space must be found. The one remaining area of the world where space is relatively inexpensive, and where unlimited dispersal can be achieved without interfering with people, is the oceans of the world.

To insure that these vast ocean spaces remain available for the free world, we must be able to control them, use them, and deny them to our enemies. This requires a collective free world effort. No single free world nation can accomplish this vast assignment alone.

We in the United States Navy are convinced that an ever-increasing portion of the offensive and defensive power of the future must be deployed in the ocean spaces of the world. This applies to Soviet power as well as to free world power. One need only contemplate the tremendous Soviet naval program, and their persistent efforts to gain access to ice-free coastal areas, to conclude that they recognize this.

The Soviet naval building program was started at a time when they were short of everything, at a time when they were still rebuilding from World War II devastation. Their purpose is quite apparent. They propose to have the means to deny the free world use of the seas. If they ever gain that ability, they will have achieved their goal of world domination.

The Soviets are emphasizing submarine construction. They are building them in huge numbers. They apparently see in the submarine a means of launching guided missiles against the United States. They see in the submarine an opportunity to inflict terrible losses on free world shipping, perhaps even exceeding the accomplishments of Hitler's submarines, which destroyed millions of tons.

The large number of submarines in the Soviet Fleet are a grave menace today to the sea communications upon which our partnership depends.

In event of nuclear war, the power to survive the initial assault, the power to recover, the power to organize, the power to shift resources, and the power to carry on to victory depends on the ability of our navies to move on the seas, to control them and to bring tremendous power to bear where it is needed, when it is needed.

For over four centuries the leaders of England have brought independence, prosperity and security to their country through their incomparable understanding of the oceans. Today, when the ocean spaces clearly hold the key to the future, the free world continues to look to England's deep, historical knowledge of the sea for inspiration and guidance.

Those of the free world who understand these things must persist in their efforts to call attention to the importance of the oceans in this nuclear-missile age. Our greatest danger as free people lies in the failure to recognize our oceanic opportunities, rather than in lack of techniques or courage to deal with the enemy.

In the oceans will be found the mobility which we need to move with superior force to the aid of those among us who are threatened with aggression.

In the vastness of the oceans will be found the space to disperse and maneuver the powerful offensive-defensive complexes of the future.

In the oceans will be found the means of deterring or defeating nuclear aggression and the means of keeping local wars localized.

It is the oceans which bind together the tremendously superior power of the free world. The oceans bind the NATO alliance together. Without their use our great partnership cannot exist.

We in the United States Navy firmly believe that free world survival in the years ahead depends to a very large degree on the sea-consciousness of its peoples and governments. Through proper use of the oceans the free world can continue to confront the modern-day totalitarian with overwhelming force, overwhelming resources, better manpower, and better scientific and industrial talent. The oceans provide new opportunities for the solution of some of the most pressing problems of our time. They are the key to many of our future security problems, at a price we can afford to pay.

One of the hardest problems in the world is determining the proper balance to be maintained within a nation's military forces. This requires the best professional military experience and the best professional military judgment the Nation has available. My experience with this problem over a period of several years has impressed me with the tremendous contribution made by each of the military services to the overall defense effort. Each service has an indispensable, very specialized part to play. No single service can perform successfully without the help of the others. The military power of a nation rests in the united, balanced effort of all the services, each contributing its best in its own field, each supporting the others in their fields.

In the broader framework of all alliance, this team concept applies equally well. In it lies our best hope of safeguarding a free world which our oceanic strength makes possible.

Address of H. C. Rumble, Regional Director, Post Office Department, Cincinnati Region, on the Occasion of the Dedication of the New Post Office at Hebron, Ohio, April 24, 1957

EXTENSION OF REMARKS
OF
HON. J. HARRY McGREGOR
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. McGREGOR. Mr. Speaker, under leave to extend my remarks, I am enclosing an address given by Mr. H. C. Rumble, regional director, Post Office Department, Cincinnati region. This address was given at the dedication of the new post office at Hebron, Ohio, and I believe Mr. Rumble's remarks are worthwhile reading. I am sure he has set forth some facts that will be of interest, not only to Members of Congress, but to our entire citizenry:

Congressman J. HARRY McGREGOR, Mayor Hashor, Reverend Smith, District Operations Manager Risley, Assistant District Operations Manager Courtney, Ralph Bennett, national executive committeeman of the National League of Postmasters, distinguished guests, fellow postal workers, ladies and gentlemen and friends, this is far from the first time I have been called upon to make an address on a program dedicating a new post office or other postal facility. The novelty may have worn off but my feeling of pride of accomplishment which I share with each and every one of you remains undimmed. These occasions are always happy ones.

This new and beautiful post office in Hebron, Ohio, with its adequate work area, its platform and parking facilities, its excellent equipment, just didn't happen—it resulted from careful planning and sincere, intelligent and dedicated effort starting with Arthur E. Summerfield, our great Postmaster General. He has fulfilled the commission assigned him by President Dwight D. Eisenhower, who asked him to improve postal services while effecting economies."

It would be unfair to your own Congressman J. HARRY McGREGOR and your Senators JOHN W. BRICKER and FRANK J. LAUSCHE if I failed to point out that the Nation's legislative bodies are responsible for keeping us in business by providing the necessary funds with which to operate the postal service, and I am confident that they are justly proud of this structure because it more adequately serves the constituents they so ably represent.

I feel very much at home here in Hebron, Ohio today. In fact, I feel much at home anywhere within the great Cincinnati postal region, where I have worked so many years.

The region embraces the great States of Ohio, Indiana, and Kentucky, with 48,000 dedicated postal workers, 4,000 of whom are postmasters, all engaged in the great task of moving the mails promptly and efficiently for the 17 million people in the region.

I would like to take a little time today to tell you some of the facts about the decentralization of the Post Office Department. It began in Cincinnati November 24, 1953. On that date the Cincinnati regional office was established, the "pilot" region, after which 14 more regions were activated. All the regions have now been established, the latest in Wichita, Kans., in February 1956.

It has long been the argument of intelligent thinkers that the sprawling postal establishment reaching into every part of the Nation and its possessions and employing 520,000 people, could best be operated through decentralization. Webster's New International Dictionary mentions decentralization particularly of public affairs. In the case of the postal system the word specifically means "move out from a center." Until November 24, 1953, that center was in Washington, D. C. On that date, Postmaster General Summerfield, addressing some 1,200 postmasters of Ohio, Indiana, and Kentucky, launched regionalization—the greatest revolutionary program in the postal service since the pony express. This decentralized management of the Post Office Department brings it right out to the individual post offices through Joseph Risley, my capable district operations manager and his staff, headquartered in Columbus, Ohio. It also brings the district transportation manager near to the scene of operation and all problems other than those of high policy, can be settled right at the scene of action, promptly and correctly.

Mr. Summerfield came to head the postal system in much the same manner as many of his predecessors. He had been the national chairman of his political party, the springboard for numerous postmasters general through the years. One might have expected him to follow the general policies of those whom he succeeded, yet the fact remains that under Arthur E. Summerfield there has been less politics in the postal service than during any period within my memory, and my service began over 45 years ago.

Only a short time ago the President nominated Mr. Summerfield for postmaster general for another 4-year term. He was promptly and unanimously confirmed, a great tribute to a great public servant, and mind you, praise came from both sides of the aisle for him. The Postmaster General is the only member of the President's Cabinet who has to be confirmed by the Senate.

Editorial comment throughout the Nation was highly favorable also. The President's decision serves as a strong endorsement of the program of Mr. Summerfield, who brought sound business management into the Department, which had been sadly devoid of modern business concepts for many years. The concept of decentralization was not now one of dictating to postmasters through the regional and district offices, but one of helpfulness to them. In the Cincinnati region there are nine district offices located as follows: Cleveland, Cincinnati, Toledo, and Columbus, Ohio; Louisville and Lexington, Ky.; Indianapolis, Fort Wayne, and Evansville, Ind. There are also 12 district transportation managers located strategically throughout the region. Each district office has a manager and assistant manager and appropriate staff, men who have been schooled in the postal service and selected carefully for postal assignments because of their knowledge of the operation of the postal service.

District managers are given a wide latitude of authority in helping solve operating problems. They are nearby to counsel with postmasters, to help them discover leaks in scheduling and use of man-hours which are sometimes costly unless corrected, and to work toward a common goal, more efficient operation of the postal service, which means better service to 1 million patrons, at lower costs.

I would be stating an untruth if I were to say that decentralization has never been the subject of criticism. Some of this criticism has been sincere but much of it stems from the natural inclination of resistance to change. We make no claim that our program is perfect or that it cannot be improved. We work constantly for improvement, otherwise our position would be untenable.

The charge that decentralization has made the postmaster impotent is simply untrue. On the contrary, decentralization has relieved postmasters of many time-consuming duties, and has given the postmaster time to assume active management and direction of his office and devote more time to our main business, that of handling your mail. We of the region are receiving many evidences of the appreciation on the part of postmasters of the effectiveness of regionalization. They understand fully that they are charged with the total responsibility for the operation of the postal service in their communities. However, they also understand that the regional officers stand ready and willing to help them with their problems at all times.

This new post office we are dedicating today should serve the community of Hebron, Ohio, well for years to come. From my own experience and from looking around here today, I know that its ample interior space is functionally designed for efficient handling of the mails. It has ample working space, ample lobby space, and is furnished so far as needful with the latest developments in mail-handling equipment.

You have reason to be proud of your new post office. So, too, it should be a matter of pride to your fellow citizens, Jesse Underwood & Associates, who built and leased this modern structure to the Post Office Department.

Now I'm wondering if you have given any thought to the symbolic significance of this new post office. In a very true sense, it symbolized the liberties with which all Americans are blessed. It does so because it represents in this community the United States postal service. Our postal service is one of the strongest foundation stones of those American liberties I've mentioned. So the Founding Fathers of the Republic intended it to be.

The postal service is a major branch of the Nation's communication system, whereby the free flow of information, public and private, continuously is maintained. And perhaps, needless to say, only an informed people long can remain free.

And this leads me to address to you a few remarks concerning postage rates, a subject about which you will hear often during the next few months.

You are no doubt aware that President Eisenhower on three occasions has earnestly requested of the Congress as a moderate increase in postal rates. This year he is again renewing that request, and the House of Representatives and the Senate both are entertaining bills in committee which, it is earnestly to be hoped, will be reported out of committee within the near future, discussed, and acted on favorably.

May I say to you that the Post Office Department is unique in that it sells its commodities and services not only at cost but actually below cost. How long could you folks here operate your business that way?

The 3-cent stamp is the cheapest commodity anywhere in the Nation today. It will carry your first-class letter to any destination in the United States of America and its possessions. It is the same service you paid 3 cents for in 1932. Meanwhile, per capita disposal income has risen over 300 percent. The wholesale price index is up 162 percent and the postal cost index is up 107 percent.

It now costs an average of 3.45 cents to carry a first-class letter. We plan to ask a postage increase on letter mail. This increase would cost the average family only a few cents a month. Our plan is to increase letter mail to 4 cents per ounce, postal cards 3 cents each and airmail letters to 7 cents per ounce. This increase I believe would provide the funds to more nearly meet the cost of the postal service.

Second-class mail is made up of newspapers and magazines. The Department is asking four annual increases in second-class rates of 15 percent, or 60 percent in 4 years. May I say that it now costs 5.6 cents a copy to distribute a widely known magazine with more than 2 million circulation. The postage paid by the publisher is 2.4 cents per copy or less than half the actual cost. The difference of 3.6 cents is paid by the taxpayers, and last fiscal year this difference cost the taxpayers $231 million on second-class mail alone.

Do I need to go further to convince you good people that the Department can never come close to balancing the Post Office budget until a rate increase is effected? Only the Congressmen can vote this increase, and it is encouraging to know that once we have supplied the public with the facts, they have expressed accord with the Department's proposal to increase rates by an overwhelming majority. Many newspapers and magazines have approved, even though it will mean a greater out-of-pocket expense for them.

The program of expanding physical facilities, of properly equipping present facilities can never be met on current department income. A tremendous building and expansion program is absolutely essential if we are to continue to provide physical quarters to handle the tremendous volume of mail which during the last fiscal year exceeded 56 billion pieces. This year almost 60 billion pieces of mail will be handled, and this is increasing every year by a percentage of from 3 to 4 percent.

Before concluding I'd like to refer to a phase of the postal business which has to do with the rapidly growing population in these United States which constantly poses the problem of keeping up with the Nation's growth. Cities and towns throughout Ohio, Indiana, and Kentucky are growing like wildfire. Not a day passes but that we of the region receive requests from postmasters, patrons, Members of Congress and the United States Senate, farm groups, and civic clubs for numerous postal improvements. It is our earnest desire to furnish this improved service to keep pace with the growth of our region because the patrons have a right to good service. They expect it and we intend to give it to them.

During recent months we have dedicated new post offices in several cities and towns of our region, opened new classified stations and parcel-post annexes, and have installed heavy equipment, including conveyors, fork lifts, and other apparatus designed to move the mails faster and to make the job easier for our thousands of employees. To mention a few, we have recently opened new facilities in Fort Wayne, Ind., Mansfield, Ohio, New Bremen, Ohio, Doylestown, Ohio, Stowe, Ohio, Sandusky, Ohio, Columbus, Ohio, and Navarre, Ohio. We are preparing to dedicate new post offices in New Richmond, New Carlisle, and Blanchester, Ohio. Last fall we ded-

icated new facilities in Paducah and Hartford, Ky. There are many other places where we are dedicating new facilities too numerous to mention at this time.

Most of the new post offices and other facilities I mentioned above were built by private capital and are leased for a term of years by the Post Office Department. This way private investors retain title, the Department otbains quarters at a reasonable rental, and property remains on the tax duplicates and the owners pay taxes.

The Post Office Department is determined that postal patrons of this great Nation shall continue to have the best postal service in the entire world.

In an effort to operate within the annual budget allowed by Congress and to keep down a mounting deficit the Post Office Department since January 20, 1953, has introduced new principles of management, better work methods. It has improved working conditions, improved equipment so that our hundreds of thousands of employees may find their work more pleasant and be able to improve their daily production without overwork or undue fatigue.

Despite occasional comment to the contrary, it is not now or has it been the Department's policy to overwork anyone. We do believe that the Department and the postal patrons have a right to expect a reasonable day's work for a reasonable day's pay.

During 1955 the Department sponsored and succeeded in having Congress enact into law Public Law 68, which provided an average 8.2 percent pay increase for every postal employee and for a classification of all jobs within the Post Office Department, based on the principle of equal pay for equal work.

This salary increase, the new physical facilities about which I have just been talking, the constant extension of city and rural routes and the establishment of new routes, and the handling of ever increasing volume of mail plus new and improved equipment have all cost a great amount of money. Despite every effort to effect all reasonable economies and to institute a program of improved management—and this has been done, it has been impossible to make income from patrons in the form of postage equal expenses. It will continue to remain impossible until and unless a realistic and reasonable rate increase is voted by Congress. We hope it will be this year. If you believe our cause to be a fair and just one, may I say to you that you have a right, also a duty to inform your Congressmen and your Senators of your opinions.

I am not a native of the Cincinnati region. I am a transplanted Hawkeye. But may I say that I have lived with my family in Cincinnati since 1928. I claim citizenship in all three great States of Indiana, Kentucky, and Ohio. During my years as a post office inspector, which began in 1928 and continued over a span of almost 28 years, I have traveled the great tri-State region, crossing and recrossing its wide and beautiful expanse many times. As a lease inspector for the Department, I handled leases in large cities, small cities, towns, and villages. I have come to know the postal employees and the people of the region as few people have an opportunity to do.

With the aid of these fine postal employees and the fine people who are our patrons, we of the region look forward with confidence to the future. The Cincinnati region has been called the first region. Going forward as a determined team it is our firm intention to make and keep it the first region in the Nation on any reasonable basis of comparison. This is not a boast. It is merely an expression of confidence in ourselves, in our employees, and in the public which we serve.

A Tribute to the American Cowboy

EXTENSION OF REMARKS
OF
HON. OTTO KRUEGER
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. KRUEGER. Mr. Speaker, a sober and fitting tribute to the great contribution of America's most popular heroes is being advanced rapidly with the progress toward construction of the National Cowboy Hall of Fame at Oklahoma City, Okla.

There is little doubt that today the American cowboy, through the influence of the press and radio, and particularly because of television and motion pictures, is the best known figure on the American scene. A straight-shooting, hard-hitting, hard-working man in fact, he has readily become all this and more in fiction.

Such well-known men of the law as Wyatt Earp had their counterparts in the cowboy who quietly went about his work in helping mold the West into a great part of the Nation.

The National Cowboy Hall of Fame will pay honor to these men. It will be a museum for archives, artifacts, and other evidence of an era that has so enriched our American historical heritage, and a valuable contribution to the folklore of America, of material benefit to all citizens and scholars of the present and future.

Earlier this year the board of trustees of the Cowboy Hall of Fame adopted a resolution urging that it be designated a national shrine. It is my understanding legislation to accomplish this will shortly be introduced in the Congress.

At this point I desire to have printed the text of the resolution adopted by the hall of fame trustees, whose members include the Honorable John E. Davis, Governor of North Dakota, and Mr. Ray Schnell and Mr. Brooks Keogh, of North Dakota:

RESOLUTION ADOPTED BY THE BOARD OF TRUSTEES OF THE NATIONAL COWBOY HALL OF FAME AND MUSEUM, JANUARY 5, 1957, AT PHOENIX, ARIZ.

Whereas the board of trustees of the National Cowboy Hall of Fame and Museum, a nonprofit foundation, having previously completed their organization with 2 members from each of the 17 Western States, with governors of those States sitting ex officio, did after careful investigation on April 15, 1955, select Oklahoma City, Okla., as the site of the permanent structure of the National Cowboy Hall of Fame and Museum; and

Whereas the board of trustees did, on November 11, 1955, dedicate at Oklahoma City the 37-acre site, provided by the people of the city of Oklahoma City and the State of Oklahoma; and

Whereas the people of Oklahoma, through private subscription, raised the equivalent of $1 million as their initial goal toward construction of the first unit of the National Cowboy Hall of Fame and Museum; and

Whereas citizens of the other 16 Western States now are undertaking by private subscription to raise an additional $4 million to complete a fitting shrine to men outstanding in opening and developing the West, with a museum for archives, artifacts, and other evidence of an era that so enriched our American historical heritage; and

Whereas the National Cowboy Hall of Fame and Museum will be a valuable contribution to the folklore of America, of material benefit to all citizens and scholars of the present and future: Therefore be it

Resolved by the board of trustees, That the Congress of the United States be requested by resolution or other parliamentary means to memorialize and/or commend to the people of the United States, the National Cowboy Hall of Fame and Museum as a national shrine, and that a copy of such engrossed resolution be made a part of permanent archives of the National Cowboy Hall of Fame and Museum.

The Board of Trustees: C. A. Reynolds, of Missouri, chairman; Albert K. Mitchell, of New Mexico, first vice chairman; Fred H. Dressler, of Nevada, second vice chairman; A. M. H. Swanson, of Texas, third vice chairman; Neeson P. Crow, of California; Chester Paxton, of Nebraska; Alan Rogers, of Washington; Fred Porter, Jr., of Arizona; R. J. Hofmann, of Wyoming; Ray Schnell, of North Dakota; Burt L. Hall, of South Dakota; F. H. Spencer, of Montana; Rex Bell, of Nevada; A. D. Brownfield, of New Mexico; Lowe P. Howell, of Arizona; Banks Keogh, of North Dakota; William M. Fencher, of Washington; Hal Cooper, of Oklahoma; Lee Sneed, of Oklahoma; E. H. Shoemaker, Jr., of Nebraska; Victor E. Anderson, of Nebraska, Governor; P. D. Ackerman, of Colorado; E. L. Mechern, of New Mexico, Governor; John D. Lewis, of Utah; A. Hugo Aronson, of Montana, Governor; Fred W. Heine, of Kansas; F. L. Fiomquist, of Idaho; Milward L. Tompson, of Wyoming, Governor; John E. Davis, of North Dakota, Governor; Ernest B. Ham, of South Dakota; Joe Foss, of South Dakota, Governor; K. OTC: Will Congress Be Mousetrapped?

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. VAN ZANDT. Mr. Speaker, Congress is again being asked to approve United States membership in the OTC—Organization for Trade Cooperation.

Many of us have been told that the bill proposing such approval has been so amended since its first introduction 2 years ago that the OTC could not possibly deprive Congress of any of its au-

thority to regulate our foreign commerce or to determine our tariff and trade policies.

I for one do not believe that any amendments put on by the United States would have any lasting effect on the OTC. I have seen too much of the operations and methods of the State Department under the general agreement—GATT—to have any faith left in the fair words of those who are promoting the OTC. They have no intention of relinquishing their grip on our tariff and trade policies.

The State Department has not let go of a single disputed power under the Trade Agreements Act except under legislative compulsion and even then has contested every step of the way. When Congress said that section 22 of the Agricultural Adjustment Act should be carried out, that is, quotas placed on agricultural imports if necessary, notwithstanding any foreign trade agreement, the State Department went to Geneva and asked GATT for permission on behalf of the United States to do what Congress had legislated to be done.

Have we not gone pretty far when the State Department recognizes GATT as the real umpire, above and beyond Congress? If Congress approves the OTC it will be on record agreeing with the State Department view.

In this connection, I, under unanimous consent, insert in the RECORD an analysis of the effect of the principal amendments to the OTC bill, H. R. 6630, prepared by O. R. Strackbein, who is chairman of the Nationwide Committee on Import-Export Policy. He has made a very close study of the OTC and the standing of any amendments or reservations attached by the United States:

OTC ONCE MORE—H. R. 6630

(Statement of O. R. Strackbein, chairman, the Nationwide Committee on Import-Export Policy, April 17, 1957)

A new OTC bill has been presented to Congress. It contains most of the amendments added to the original bill by the Ways and Means Committee in 1956. These amendments were designed to make the bill more palatable by setting up certain United States reservations.

In addition the new bill seeks to make the OTC seem still more harmless by setting up a body of advisers who would consult with the chief United States representative to the OTC.

All these reservations, safeguards, caveats, and multiple insulations merely demonstrate to what lengths the State Department and those of like mind will go in order to get this country into the OTC. They have all but thrown the baby out with the wash. They have gone to extremes to demonstrate the utter innocence of the OTC.

There is one thing wrong with these tactics. They are reminiscent of the fox in the movies who assumes a dozen different disguises to fool the lamb.

The conclusion is inevitable that if the OTC were to be as hobbled and helpless as this bill would seem to render it the State Department would not be interested in it. The United States would be better off without the handicaps that the bill would place on membership.

Why then do the State Department and the executive power bring this strapped papoose to Congress?

Answer that question and you also provide the reason why Congress should reject the whole deceptive bundle.

1. The amendments, reservations and caveats in the bill are only skin deep. They do not reach any of the provisions of the articles of agreement that would govern the OTC. The articles constituting the agreement are 21 in number and were signed in Geneva in 1955. The United States cannot unilaterally by amendments, reservations or otherwise change so much as a comma in these articles. This could only be done by reopening the agreement and renegotiating it with the other countries. This is not even proposed. Yet the articles of agreement as they now stand and as they would exist despite H. R. 6630 reservations would determine the setup of the OTC, its procedures, its powers and the methods of its amendment. One of the articles says that the OTC is to give full effect to the purposes and objectives of GATT.

2. The amendments, reservations and caveats in H. R. 6630 could in any case be washed off like so much oil from the skin. The State Department could either create situations or simply take advantage of developments that could be used to coerce Congress to back away from the reservations lest the United States offend the other members of the OTC.

Thus the amendments and reservations could be frittered away in a matter of 2 or 3 years and Congress would find the United States going along as an unfettered member of the OTC and doing its bidding from Geneva.

3. The OTC could vote itself into association with the United Nations as a specialized agency. One of the provisions (art. 11) specifically makes this possible. To meet this objection, H. R. 6630 says "it is the sense of Congress that the Organization for Trade Cooperation shall not be brought into a specialized agency relationship with the United Nations."

But should the OTC vote itself into membership nevertheless the United States could simply stand out in the rain until such time as the State Department succeeded in persuading Congress that it would be so much better if we just forgot about the reservation in H. R. 6630. The leadership of the free world of course would be at stake, and the honor of the United States would suffer unthinkably if we persisted in staying out in the cold.

4. The same would happen with respect to the understanding of Congress, as expressed in the bill, that the functions of the OTC would "be limited to the administration of GATT and facilitating intergovernmental cooperation solely in the field of trade * * *."

Obviously the understanding of Congress would be as good as 1 vote in 35. We must not build on the haughty assumption that the other countries will always go along with us.

How long would this understanding last if we were outvoted (possibly with a wink from the State Department) by the other members?

Considering how the State Department has interpreted the delegation of power under the Trade Agreements Act, it is easy to guess what would happen. That Department took a limited delegation of power conferred by the Trade Agreements Act and came out with greater and broader power than was left to Congress itself. If the Department so well succeeded in this effort on the strength of delegated power it is clear what it would do if Congress now acquiesced in such domination by approving the OTC.

Obviously, the mere understanding of Congress as set forth in the bill at any point would have no standing in the OTC because the State Department would not be in sympathy with it. Other countries look to that Department and not to Congress to set forth the position of the United States. There would be no one on hand to speak for Congress and the will of Congress would soon be forgotten.

Through H. R. 6630 the State Department is asking Congress quite obviously to have the grace to bow out and to stop bothering the Department with the protests and grievances of the people back home. After all, the conduct of foreign affairs is a very delicate business, and the heavy hand of democratic government can only spoil the finesse of the diplomats.

It will be said that it was precisely to avoid just such highhanded action by the State Department that H. R. 6630 provided for the appointment of an advisory committee which is to be representative of American labor, industry, agriculture, and the public and which is to advise and consult with the chief representative (to the OTC) on matters coming before the Organization for Trade Cooperation.

Unfortunately the memory is still fresh about previous boards and commissions appointed by the President to study and report on tariff and trade policy. There come to mind the Gordon Gray report of 1950, the study of the Bell Commission 2 years later, and then the Randall Commission of 1953–54.

These boards or commissions and their staffs were all heavily biased in the direction of the views held by the appointing power. Even the Randall Commission, which made some pretense at giving representation to the opposing view, was loaded 5 or 6 to 1 in favor of the predilections of the appointing power.

Let us, therefore, not be further insulted by such transparent offers of an advisory body representative of this or that group. The offer of an advisory committee as a safeguard against OTC usurpations is nothing more than bait for the gullible.

Of a piece with this sop is the proposed appointment of a chief United States representative to the OTC by the President. It is sufficient to note that, when representing the United States, this representative "shall at all times act in accordance with instructions of the President, transmitted to the chief representative by the President or in such manner as the President may direct. * * *"

The Constitution says that Congress shall regulate the foreign commerce of the United States. It shall also lay and collect duties (tariffs).

Where is Congress in this OTC scheme?

What in the bill may be the sense of Congress or the understanding of Congress will be a pale if not imperceptible image of its original after it is filtered through the brains of the advisory board, appointed by the President, through the chief representative appointed and instructed by the President, and then finally through the machinery and procedures of the OTC itself, sitting in Geneva.

The voice of the people back home, the industries, the producers, the farmers, and the workers, who complain about unfair import competition, will be muffled into deep silence. Oppressive futility will reward their efforts to be heard. Their right of petition, guaranteed under the Constitution for reasons that are sound and sufficient, will be a dead letter. Their right to vote for representatives to represent them in the national legislative body will be a useless gesture so far as tariffs and trade are concerned, because, under the proposed system, the Members of Congress would become mere appendages of an obsolete body.

5. Finally, H. R. 6630 (sec. 351 (c) (3)) says that nothing in this bill is to be construed as constituting approval or disapproval of GATT (General Agreement on Tariffs and Trade).

This self-denying ordinance is a very odd type of disavowal. Keeping in mind that

the OTC would endeavor to give full effect to the objectives and purposes of GATT, how could Congress possibly approve United States membership in the OTC without subscribing to the very purpose of the organization? Unquestionably, by all rules of logic, by all sensible interpretation of rational human action and undobutedly in the belief of the State Department itself, approval of the OTC would also mean approval of GATT by Congress.

We cannot approve membership in the OTC which is dedicated explicitly to carry out the purposes and objectives of GATT, without approving GATT unless we should be admitted merely as observers; and that is neither the intent nor is there provision in the OTC articles of agreement for such limited membership.

Moreover, the State Department last year stoutly maintained before the Ways and Means Committee that GATT requires no approval by Congress to be legal.

Therefore the proposed amendment saying that approval of OTC would not constitute approval of GATT is the same as saying that approval of the OTC would not constitute approval of what in the eyes of the State Department needs no approval in any case.

The upshot is that approval of the OTC bill by Congress would, despite all the amendments and reservations written into the bill, represent the passage of effective power over our tariffs and trade from Congress to the executive and thence to the new international trade organization known as OTC.

So far as effective action in behalf of American producers, American farmers, American factories, miners, fisheries, and their workers, by the Congress is concerned, looking toward the preservation of their market, their employment, and their business under conditions of fair competition, Congress might as well close its doors.

In reply to these objections it is usually said that we already are a member of GATT, that we have GATT and that the executive branch already exercises the dominant role in the regulation of our foreign commerce.

This is true—only too true.

Then it is said that membership in the OTC would not change any of the existing situation.

This is not true. Congressional approval of the OTC would represent ratification by Congress of the executive usurpation of power and perpetuation of such usurped power.

Congress would be throwing the game.

At issue is more than the OTC, much more. At issue is a fundamental principle of our Government. The OTC bill is important because embodied in it is the congressional surrender document and because Congress is asked to sign it.

Congress is asked in H. R. 6630 to confirm the State Department in its extensive usurpations and to pass the powers of Congress into still more distant hands.

This is probably the last chance of Congress to reassert its position in this field and to insist on the authority to speak on behalf of the American people in matters vital to them. Therefore it is imperative that Congress spurn the surrender document that has been laid before it. It is an instrument, the OTC, fashioned in its origins and its ultimate objectives by an overweeningly ambitious executive bureaucracy that thirsts for power to make over America in the image of the bureaucratic concept of a planned and internationally controlled global economy.

An alerted Congress will know what to do. It will kill the OTC bill. It will not sign its own surrender document and its bill of abdication. On the contrary, it will keep open the door for the expression of changing sentiment in the country. That is its true function.

Congress and the International Atom

EXTENSION OF REMARKS
OF
HON. STERLING COLE
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. COLE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address which I made at the Atomic Industrial Forum Symposium on April 25, 1957, at the Plaza Hotel in New York City:

CONGRESS AND THE INTERNATINOAL ATOM

(By Hon. STERLING COLE, of New York)

Mr. Robbins, Commissioner Vance, distinguished guests, ladies, and gentlemen of the forum, the forum has been formed now for just over 4 years and during this short period the forum has had an incredible growth. Where it started with 1 or 2 meetings a year, it is now fostering meetings even on the other side of the globe. It is a great pleasure to talk with a group of people who have shown such great dedication to the cause of developing the peaceful uses of the atom.

Your day long symposium on the international legal problems of atomic energy is but another milestone that you have passed in your steady march of progress.

Many of the problems which have been included on your agenda today are problems which are proper subjects for congressional attention. While it appears that the most desirable way to protect an American manufacturer or designer against the very remote possibility of a runaway in the reactor when it is installed and operated abroad is through an international convention, there may be a proper role for legislation in this sphere. The very first agreements for cooperation paid no attention at all to this problem. At the urging of the Subcommittee on Agreements for Cooperation, the Atomic Energy Commission inserted into its agreements a clause that would hold the United States harmless for materials or services supplied to other nations. Although the Joint Committee has raised a question for some period there still has been no similar clause inserted into the agreements for cooperation which would protect the American supplier. Further persuasive efforts by the Joint Committee to have the agreements for cooperation protect the suppliers may be needed. If these efforts are not successful perhaps there should be a statutory requirement that the agreements require the cooperating nation to protect the American supplier, at least until such time as an international convention can resolve the basic problems in an overall manner.

Another problem which needs close examination by the Congress is that of foreign patents. It would seem that the Atomic Energy Commission has not been as alert to filing patents in other countries as it might have been. I do not say this in any derogatory sense since the United States Government might not have any interest in exploiting the rights abroad which arise out of inventions. Nevertheless, the failure to exploit these rights could seriously affect United States firms who want to go abroad. It is possible that this is something that can be taken care of by the Commission by straight administrative action. It is also possible that this could require legislative attention. The problem arises only with respect to those United States patents to which the Commission takes title but which the firms developing the ideas want to use abroad. The catch in the foreign patent situation is that failure to file may permit complete outsiders to file on United States-originated ideas and to block the development of United States ideas in reactors in the countries involved. I hope that any possible patent roadblock to the foreign development of atomic energy by United States firms can be quickly eliminated.

In view of the fact that all of the studies on the economics of atomic energy indicate that power from atomic energy is most likely to be economical when produced in foreign countries, the international picture plays a tremendously important part in the development of the domestic program. Even when reactors are first built abroad I doubt that they will be economic. The question, therefore, seems to me is very properly raised; namely, how do we get our reactors to be the ones which are built in other nations? Since we would be the first to obtain information which will let us know about the economics of such reactors, I would suggest that we subsidize the construction of advanced development reactors abroad. I would not have the subsidy complete but would limit the amount of subsidy to half of the additional cost of building those reactors over the cost of constructing conventional powerplants. Even then, I would suggest that we only put in funds which would be matched dollar for dollar by foreign governments. Also, I would expect the United States to have ready access to these reactors, not only for inspection and control, but for studying all of their technological and economic operations. It would be expected that the financial assistance would be given to the other nations only if the major component parts of the reactor were bought in the United States.

All of these matters are minor compared to the one great question before the Congress this session. This is the matter of the ratification of the International Atomic Energy Agency statute.

In many ways I look upon the International Agency as a close parallel to the forum. In its initial phase it is starting with about as many members on its board of governors as you had on your board of directors. It is starting out with about as many on its initial staff as were on the initial staff of the forum. In 4 years I believe the Agency will be playing as important a role in the international affairs of atomic energy as the forum is playing among the private interests in this great field.

Of course you know that the Agency received its start at President Eisenhower's famous speech to the General Assembly of the United Nations on December 8, 1953. We have all followed it anxiously since that period and I have been extremely interested in watching the idea take root and flourish.

When the Atomic Energy Act of 1954 was under discussion, the joint committee wrote into the bill provisions of law enabling the United States to enter into agreements for coopertion in the peaceful uses of atomic energy. Wanting to encourage the idea of the International Agency, we also included a section in the law which would permit the United States to enter into agreements for cooperation with the Agency once it had been approved by the Congress. I was very glad that the Congress accepted such a provision for it indicated general congressional approval of the idea of the Agency.

As the various drafts of the statute for the Agency were written, the Joint Committee received full information on the developments from the State Department. In July of 1955, just before the joint committee left to attend the International Conference on the Peaceful Uses of Atomic Energy at Geneva, Ambassador Moorehead Patterson came before us and told us about the draft as it had evolved to that point. During the 10th General Assembly of the United Nations, the 1st committee held considerable debate

on the method of formation of the Agency. The United States participated in this debate but, even more important, was one of the main leaders in the debate. A resolution, approving the idea of the International Agency and recommending that there be an International Conference called to consider the final draft of the Agency, was adopted by the General Assembly without opposition.

A 12-nation drafting session was held in Washington in the spring of 1956, during which time the ideas of India, Russia, Brazil, and many of the nations who were not participating, but who had made comments, were incorporated into the statute. The statute was approved by the drafting session without objection. After the drafting session, Ambassador James J. Wadsworth came before the committee and described the work that had been performed in perfecting the statute to that point.

Last fall the Conference on the Statute of the International Agency was held at the United Nations in New York. After a month of debates, directed both to the general and to the specific provisions of the statute, and during which time many further amendments were added to the statute, the statute was approved for ratification without objection by 81 nations. By the end of the period, during which the statute was open for signature, 80 of the participants in the Conference had signed. Ratifications have begun to be deposited with the United States. Russia's ratification is one of these.

I was fortunate to be able to attend the Conference as 1 of 4 congressional advisers to Ambassador Wadsworth. The other 3 advisers designated by the Congress were Congressman KILDAY and Sentors BRICKER and PASTORE.

During that Conference I had a remarkable opportunity to watch the other nations in their confidence of the future of atomic energy and of the Agency. I was amazed and delightfully surprised to find the overwhelming desire among all the nations to make the Agency a workable and sound organization for the international development and the future international control of the peaceful uses of atomic energy. More than anything else, at that Conference, I was impressed by the tremendous desire of all the nations involved to reach a common conclusion on the problems. Almost as great was the feeling that atomic energy will bring many great blessings to the peoples of the world.

Since the closing of the Conference on October 26, the Preparatory Commission has been busily at work getting ready for the First General Conference of the International Agency. In the Preparatory Commission, I am told, the same feeling has continued: the same unanimity of desire to get ahead; the same willingness to seek solution to common problems acceptable to all. It is against this background that I wish to begin discussing the future of the Atomic Energy Agency with you.

As you well know, the President, on March 22, transmitted the statute of the Agency to the Senate to be ratified as a treaty. This means that there must be 64 votes in favor of the statute. Thirty-three negative votes, or any major reservation, can kill the spirit of this Agency. I am taking this opportunity of bringing to your attention the fact that there is a very strong movement on in the Senate which would either modify or kill the statute.

For myself, I cannot agree with this movement. I believe that this Agency is a tremendous force for the future of our country, and for the future of the world.

First of all, I want very quickly to dispel the idea that this Agency will automatically be open to Red China. The 10th General Assembly limited the participation in the drafting of the Agency to the members of the United Nations and of its specialized agencies. This does not include Red China. The drafting session extended an invitation only to the National Republic of China and not to Red China, although the Soviet Union sought to change the invitations. A motion to remove the limitations in the statute requiring adherence by future members to the United Nations principles was overwhelmingly rejected by the International Conference. This motion was made primarily to permit Red China to become a member later on. The credentials of the National Republic of China were upheld on two different votes. Thus, there have been at least five separate occasions when the problem of Red China was considered. On all of them the position of the United States against the admission of Red China was maintained without any veto. A veto written into the statute would not be a desirable or satisfactory basis for the operations of this kind of an Agency.

Another complaint against the Agency is that the United States will be giving 5,000 or 20,000 kilograms of uranium enriched in uranium-233 to the Agency. So far no one has indicated that this material will be donated as a gift. Indeed, the statute contemplates that the Agency will pay for the services and materials received unless there is a special agreement to the contrary. The Atomic Energy Commission has already informed the joint committee that it does not believe that it has any statutory authority to give materials to the Agency. If, at any time in the future, it should be decided that the United States should make a gift of materials, the Commisison would seek to have that authority granted to it by Congress.

A further claim is that materials given to the Agency could be diverted and made into weapons. I do not believe that this would be the case. In the first place, the International Agency has provisions in its statute for the inspection and control of projects to which the Agency gives assistance. These provisions are almost identical with the provisions which are written into the bilateral agreements of the United States. However, they carry one additional safeguard that the United States bilaterals do not have. These Agency projects would carry a contractual basis for action by the United Nations in the event any diversion should be found. This contractual basis is, of course, missing from the United States bilaterals.

In the second place, Agency projects are limited to those projects which will be designed to implement the development of atomic energy for peaceful uses. A nation which wanted to divert the materials from these projects would find it dangerous and costly since they would have to devise ways to get around the rigid inspection and control provisions and to process materials which could be highly radioactive. Any nation that wanted to embark on a weapons program of its own could do so outside of the Agency. Indeed, many nations probably will start atomic energy programs of their own. The more nations that start their programs under the International Atomic Energy Agency, the fewer will be the nations which will have atomic programs which can be turned into military uses. Let there be no mistake about this. Uranium is one of the most abundant resources in the world. The knowledge if building reactors is not limited to any one country. Other countries will be able to obtain both the materials and information on how to use atomic energy from sources other than the United States. If they desire, they can use them for the military uses of atomic energy.

We can, and should, encourage those countries which are now beginning to get into the atomic energy program to devote themselves only to the peaceful uses.

Many have asked why we should join in with the Agency when we can achieve the same results through our own bilateral programs. I do not think we can achieve the same results. It was many of the small nations that first suggested that the International Agency be established through a conference. They did not want to have the Agency statute set up by the major powers and then forced on them.

They wanted to have a voice in the formation of the Agency and in its operation. The wisdom of letting them have this voice today has been shown by the many ways in which the statute of the International Agency has been bettered by the amendments offered in the Conference last fall. Also, it is part of their national pride that their atomic energy program will be drawn not from any one nation but from all of the nations of the world. There may be many nations in the world who because of their traditionally neutral positions, may prefer to receive assistance from the Agency instead of receiving further assistance from the United States. Such nations could include Switzerland and the Scandinavian countries.

Also, I should remind you that it was a small nation, Thailand, that suggested the amendment to the statute giving the Agency the authority to take over the inspection and control functions of the national program of any single nation.

Above and beyond all that can be achieved through the distribution of materials and information on the peaceful uses of the atom, there will be one outstanding accomplishment which can be obtained from the International Agency. This will be a period of learning about all of the problems—technical legal, psychological—of international inspection and control. The Agency was suggested at a time when neither the United States nor Russia was able to agree on an inspection and control plan for themselves for disarmament purposes. The Agency's operations can produce that technology and that confidence in international control which will lead to complete international control of atomic energy at an appropriate time later on.

There has been some objection raised to the ability of the Agency to furnish materials to Iron Curtain countries. I do not fear this authority. The Agency is not going to start on large grandiose plans. It can start out, however, furnishing radioisotopes for peaceful purposes. These radioisotopes could be used to help people behind the Iron Curtain control and cure diseases. Small research reactors containing amounts of materials militarily insignificant can help people behind the Iron Curtain learn about the bases of atomic energy. Since the International Agency was proposed as a means of winning the hearts and minds of peoples of the world, certainly there should be no disagreement that these activities of the Agency can, and should be, encouraged. Remember that the Iron Curtain countries requesting assistance for projects must also agree to appropriate inspection and control features. This kind of experience can be extremely valuable to the Agency and to the world in learning how the control systems operate behind the Iron Curtain. Later on there may be countries that will want other reactors of more advanced types. In considering those projects, as in considering any initial project, the board of governors of the Agency would have to consider the adequacy of the inspection and control systems which might be required, as well as the ability of the nation to comply with these features. This means that the basic responsibility would rely upon the board of governors to make this decision. We can, and I think we should, have confidence that the board of governors would make any such decision in the light of all of the known facts surrounding the project.

Thus far I have talked about the Agency in terms of meeting the arguments against it. It seems to me, however, that there is

much more to be gained by talking about the future than the Agency can make for the world. Of course it can provide a ground for the training of many scientists in many countries. Further than that, it can provide a central clearinghouse for the exchange of information. In the field of science such a clearinghouse is a great help since the thoughts of one person will frequently strike a sympathetic spark in the minds of others. The more scientists that can read and discuss the work of the leaders in other countries, the more quickly will this great potential be tapped for the good of all. In scientific fields you never know where a new and original thought will come from. Remember that the basic formula on which this field is founded came from an unknown examiner in the Swiss Patent Office. The more persons around the world who are able to study the problems of atomic energy, the sooner will this great energy be released for the benefit of all mankind.

Many of the commercial problems which will develop in this field can run into extremely complex legal situations unless there is one international agency which can help resolve the problems. I have already mentioned one of these fields. This is the problem of the manufacturer or supplier of materials or services to reactors built in foreign lands. One of the earliest tasks that the International Agency could undertake would be the calling of a convention which could draft an international treaty in which many of the difficult legal problems could be resolved to the advantage of all nations. The treaty could, indeed, give the Agency some administrative functions which the Agency cannot now undertake. This could include the administration of an indemnity fund such as the indemnity fund in the Anderson and Price bills now being considered by the joint committee. The treaty could cover extensive and difficult substantive and procedural questions in the unlikely event of such a runaway. Another natural problem for the Agency to work on would be international techniques for the disposal of waste radioactive gases and liquids in the atomic energy program. The problem of international control to radiation exposure could also be considered. I am sure that the Agency already has such projects in mind for its operation once it is established. These will be of great advantage to the United States or any nation seeking to sell its services in the international market. But above all, the great contribution that can be made by this Agency is in the development of the technology, the law, and the public acceptance of international control. This will not be achieved suddenly but gradually. The Agency cannot achieve this benefit if it has no materials at its command.

I cannot criticize those who want to study and understand the Agency thoroughly before the statute comes before the Senate for ratification action. I, too, have had a long period of studying the Agency. I do hope that once the study has been completed that the discussion of ratification will then proceed on the same high level of hope and faith for the whole world that has been evident in the discussions and international discussions of the Agency to date. President Eisenhower's proposal before the United Nations received worldwide acclaim. The negotiations on the statute have proceeded in the faith and hope that the Agency would come into being as soon as possible.

So far we have spent much effort and great sums of money in developing atomic weapons for waging war whenever we may be called on to defend our liberties and our shores. If the time ever comes when any nation should again have to fire an atomic weapon in anger, it will be a great tragedy.

In the words of Pope Pius XII:

"There will be no song of victory, only the inconsolable weeping of humanity, which in desolation will gaze upon the catastrophe brought on by its own folly."

Now is the time, while maintaining our armed strength, to devote our efforts as wholeheartedly to finding the ways in which to develop atomic energy for the peaceful benefits of all mankind. The only real way in which this can be done is under an international agency devoted to the resolution of international atomic energy problems through international law.

As we enter into the age of the international development of atomic energy, we must learn to have faith in the ideals and judgments of the free nations of the world. But we must remember that the free world—and indeed the whole world—looks to the United States for leadership in this great dilemma. To date the United States has exercised that leadership wisely and with restraint in the negotiations leading to the signing of the Statute of the International Atomic Energy Agency. As long as the United States continues to apply its ideals to this field in the same strong but reserved manner that it has, the United States will continue to supply the leadership of a foundering world. When this country shall begin to withdraw again unto itself, it will be only a nullity among the nations of the world.

Congress, after giving the statutes thorough consideration, should ratify the statute by an overwhelming vote. This will tell the other nations that we have faith in them and their peoples. This will also affirm the pledge given to the world by President Eisenhower to the General Assembly on December 8, 1953:

"The United States pledges before you—and therefore before the world—its determination to help solve the fearful atomic dilemma—to devote its entire heart and mind to find the way by which the miraculous inventiveness of man shall not be dedicated to his death, but consecrated to his life."

All's Forgiven, Mr. Summerfield

EXTENSION OF REMARKS
OF
HON. MICHAEL J. KIRWAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. KIRWAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following article by H. I. Phillips, entitled "All's Forgiven, Mr. Summerfield":

ALL'S FORGIVEN, MR. SUMMERFIELD, BUT PLEASE DON'T KEEP US AWAY FROM THE POST OFFICE AGAIN

(By H. I. Phillips)

Postmaster General SUMMERFIELD,
Washington, D. C.

DEAR SIR: Well, a lot of people, knowing your background as one of the country's biggest auto dealers, are for trading you in for a new model Postmaster General, less rugged, brighter, and with more comfortable features. Even with normal service resumed, Mr. and Mrs. John Q. Public are still sore. You might be the first Postmaster General to be nominated on the all-American team for unnecessary roughness.

It is a new experience for Americans to get shut out at a post-office window, although some are used to it at the $2 mutuels. The public finds it nice to think of a letter carrier as no longer a missing person.

CLOSE TO OUR HEARTS

You were not entirely to blame for the first "closed" sign in history on post-office windows, but to the average man and woman you seem a man who sees a Government post office in the same light as an auto salesroom. I guess you don't realize fully that a post office is an institution extra close to the hearts of the people. It is the one place that gives them a personal touch with Government. Mr. and Mrs. Public have always felt welcome there Saturday, even if they didn't want to mail a letter and just dropped in to try out one of those new ballpoint pens. You have no idea how those big "closed" signs hurt sentimentally. People are very fond of the mailman, too, and have come to regard him as a symbol of regular and reliable service. To millions of sick people watching from hospital or sickroom windows he is a messenger of comfort and hope. Likewise to mothers expecting a letter from a kid in service, and to all lovers everywhere.

Gosh, Mr. Summerfield, the letter carrier is just about the last of the vanishing Americans. The fast-disappearing human being who walks, the fellow who gets corns on his feet instead of his posterior, the worker who totes a heavy load uncomplainingly and never strikes because he is tired. Take him out of the American scene for a weekend and you become a villain in the public mind.

Well, it was a depressing interlude in the United States mail service and how about a new oversized postage stamp commemorating the boner? It could be a likeness of the Postmaster General on a white horse galloping full tilt into Congress as a sort of angry Lochinvar, against a background of post-office doors labeled "Closed." What is one more special stamp these days?

Yours,

ELMER.

Polish Constitution Day

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. RODINO. Mr. Speaker, under leave to extend my remarks I wish to join all Americans of Polish descent in the celebration of the anniversary of the Polish Constitution.

One hundred and sixty-six years ago a group of patriotic, liberal, and far-seeing Polish leaders wanted to inaugurate a new era in Poland. They felt that some basic changes in the machinery of the government were needed; and to meet this imperative need they drafted a constitution. It was adopted, promulgated, and went into force on May 3 of 1791.

Since that year May 3 has been celebrated as Constitution Day, and the event has been regarded as a great landmark in Poland's fight for liberalism and for independence. The Constitution of 1791 was a liberal, democratic document, and as such it aimed to reduce the powers of the monarch without impairing the authority of the central government. By this constitution the government became one of limited, constitutional monarchy. It did away with the old class distinctions and class privileges, and guaranteed religious freedom. In this respect it embodied some of the ideas of the American Revolution, and also of the French Revolution. The constitution of course aimed at strengthening Poland by uniting all its citizens more firmly in de-

sense of its independence. In embracing these twin aims of liberalizing and strengthening the Polish Government, the constitution of 1791 was a major democratic instrument, and to this day it serves as a symbol to the Poles in their tireless struggle for freedom and independence. I heartily join all Americans of Polish descent in the celebration of the anniversary of this great and significant event, the Polish Constitution Day.

Paradise Dam Controversy

EXTENSION OF REMARKS
OF
HON. EARL CHUDOFF
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. CHUDOFF. Mr. Speaker, just below the town of Paradise, Mont., on the Clark Fork River, is the site for a high multi-purpose dam, the construction of which has been investigated by the Bureau of Reclamation. If built, Paradise Dam would impound an estimated 4,000,000 acre-feet of usuable storage and involve an addition of some 1,000,000 kilowatts of generating capacity. The Montana Power Co. has been granted a preliminary permit to investigate certain sites for power dams which would provide relatively little storage of water but which would conflict with and effectively preclude the construction of a high Paradise Dam.

I should like to bring to the attention of the House a letter and newspaper article which I have just received from Frances D. Logan, of Charlo, Mont., representing the Committee for Paradise Dam. In this letter the complaint is made that many kinds of pressures and restraints, including economic types and also press censorship, are being brought to bear against those who advocate the high Federal dam. The company referred to in the letter is, of course, the Montana Power Co.

The letter and newspaper article follow:

COMMITTEE FOR PARADISE DAM,
Charlo, Mont., April 23, 1957.

Hon. EARL CHUDOFF,
Chairman, Public Works and Resources Subcommittee, Committee on Government Operations, House Office Building, Washington, D. C.

DEAR MR. CHUDOFF: Thank you very much for sending me the reports of your subcommittee on Private Utilities' Organized Efforts To Influence the Secretary of the Interior, and Availability of Power To Public Preference Customers From Central Valley Project, the hearings on these matters, and also the hearings on upper Columbia River development. I trust you will excuse my tardy acknowledgment. My husband and I have been away from home, first attending the annual meeting of Northwest Public Power Association in Seattle, then our son's wedding in New York.

The situation we face here was described by Senator Lehman in the debate on the Niagara project, CONGRESSIONAL RECORD for May 15, 1956, as an avalanche of propaganda. Presumably the avalanche is being manufactured according to the methods described by P. D. Brooks for the Ebasco presidents' meeting, page 382 of the hearings. We are suffering under the additional handicap of press censorship, operating over a long period of time, now for the first time to my knowledge openly admitted (see clipping).

We will use material from the reports and hearings as we find opportunities, in letters to the editor, limited to 300 words, which some county weeklies will run, in meetings as we can arrange them, by word of mouth, and if we can raise the necessary funds, by direct mail. We are operating on the assumption that you "can't fool all the people all of the time" if you can get the facts to them. The facts you have sent are important in the formation of judgments. We will do our best to make good use of them.

One very disturbing aspect of this controversy over whether we are to have a multipurpose Paradise Dam or two private power company's no-storage dams, is the large number of people who are afraid to come out publicly for the high dam. Company pressure has succeeded in creating fears of all kinds, from fear of losing a job and not being able to get another, to fear that credit will not be available, to fear that one's wife will no longer be invited to the best bridge parties, to fear of being called "Red." The effectiveness of the company's wide-angle public-relations campaign is incredible, and worrisome. However, I believe that slowly and quietly we are beginning to make some progress in making known the facts.

In that effort the material you have sent is very valuable, and we appreciate your help.

Sincerely yours,
FRANCES D. LOGAN
(For the Committee for Paradise Dam).

[From the Ronan (Mont.) Pioneer of April 4, 1957]

IN 'N' OUT OF FOCUS

(By Floyd Larson)

Last week, the newspapers of Sanders County published the results of a poll on Paradise Dam. The poll was in the form of ballots printed in the March 21 issues of the three papers. Of 213 votes cast, 153 favored Paradise; 57 opposed it; and 3 were undecided. Because of the implication of the poll and possible use that might be made of it by proponents of Paradise Dam, the following is a copy of a letter sent to the editors of the three Sanders County papers concerning this writer's reaction to the way the poll was conducted.

I have read with interest the results of the Paradise Dam poll conducted in the Sanders County papers but, as a newspaperman, I must question the validity of the poll and emphasis given it directly and by inference in your publications.

I'll not discuss my reasons for opposing the dam for after all they are one man's opinion; but I do think that your readers are entitled to know the shortcomings of your poll and how they affect the validity of the result so that when the proper time comes those results can be evaluated in proper perspective—which is that 148 persons out of 216 who volunteered their opinions favored Paradise.

To make more than this out of the poll is to overlook some of the following factors which are always included in the conduct of Gallup polls and other scientific public-opinion surveys.

On a voluntary basis, it is impossible to obtain a cross section of opinion representing population characteristics, economic levels, political creeds, religious creeds, and all the factors that are considered essential in creating a sample valid and acceptable for statistical projection.

It is impossible to eliminate padding of a poll by limiting a press run. Newsstand sales, borrowing of other copies and using the ballots therein is possible and a tempting opportunity when ballots for the poll are not required to be signed to eliminate duplication. Accepted practice in modern poll taking is to use an interviewer who follows a sampling pattern reflecting the community as outlined above.

Your papers carried no information in their stories on the poll to indicate whether or not any organized effort was conducted by groups interested in the poll question to get adherents to participate. In a voluntary poll such as the one you have conducted this is also possible and also another tempting opportunity to pad the poll. Whether such efforts occurred or not, makes little difference because that fact that such could have occurred definitely makes it of little value as a basis of saying that Sanders County residents favor Paradise Dam 3 to 1—you can only say, honestly that 3 out of every 4 who answered the poll, favor Paradise, which is quite a different story.

There are other factors which must be also considered before your poll can be given any status as a true reflection of sentiment on Paradise Dam in Sanders County. For example, was intention to make the poll known prior to publication? Who originated the idea? The editors? Those favoring Paradise? Those opposing it?

In conclusion as one newspaperman to another, do you feel that your poll—in view of your knowledge of scientific poll taking—was a fair sample of opinion and one that you can honestly project as representative of the opinions held by the majority of your readers?

I personally do not think the outcome of the poll will change my position on the issue nor of others who have formed their opinions—pro or con—on the issue. However, as a newspaperman, I do feel that such a poll conducted in this manner is poor journalism in that it will be used by Paradise proponents to influence undecided residents of Sanders County and adjacent areas. Instead of attempting to steer an objective course in the issue (which I believe was the motive behind your poll) you have unwittingly, through failure to use accepted polling practices, given aid to one side at the expense of the other.

Your papers I am sure are held in esteem by your readers and material printed in them have their acceptance as being valid. In the case of this poll you are misleading them if you do not call the shortcomings of this poll to their attention. I am sure that you will do this out of fairness to both sides and because of the importance of the issue involved to the people of Sanders County and western Montana.

For while we as newspapermen have the right and obligation to speak out editorially on issues of this kind, we also have the responsibility of doing everything humanly possible to protect our readers from information that can be subjected to misinterpretation because of its unsound origin.

Polish Constitution Day

EXTENSION OF REMARKS
OF
HON. AIME J. FORAND
OF RHODE ISLAND
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. FORAND. Mr. Speaker, men and women of every nationality with faith in democratic principles join with those people of Polish ancestry in commemorating the anniversary of the Polish constitution of the 3d of May. It is fitting that we pause a moment to pay tribute to a document that stands beside

our Declaration of Independence as a landmark in humanity's struggle for liberty.

Tomorrow is the 165th anniversary of the day in 1791 when the statesmen of Poland signed a constitution that inaugurated great reforms in Poland's Government. Equally impressive as the scope of the reforms was the bloodless manner in which they were carried out, indicative of the Poles as peacemakers without bloodshed rather than warmongers. This does not mean that they will turn from a fight for a cause they consider just. On the contrary, they are stouthearted people imbued with centuries of Christian doctrine, the dictate of their minds and energies.

In this generation the Polish people oppose the Communists at every turn and in every way that they can. Such opposition is to be encouraged and the people supported in their efforts to be free. The Poles cannot, of course, object in an organized way on a national level, but they can be given the comfort and assistance of the free world. The Polish-Americans of my State and of the country are their greatest source of encouragement and by their example may do much eventually to assist them in their quest for freedom. We hear reports from behind the Iron Curtain of the heroic action on the part of these people who refuse to bend to the oppressor's demands, and who refuse to accept slavery as a normal state of mankind. The process of freedom is very slow, and although today we do not hear of any violent revolutions in Poland, there are definite actions on the part of the Government of this country which are small tokens of assurance to the Polish people, and people of other nations, that are now being denied their God-given right of freedom. This tribute today I sincerely hope will reach the ears of all freedom-loving people everywhere for it is often said that the fires of freedom burn hottest among the oppressed.

In 1939 Poland made the world's first stand for liberty against the onslaughts of the Nazi might. But her strength could not avail against this great force, suplemented as it was by the Soviet stab in the back. In short, Poland suffered a new partition, and one far worse than any before. No people endured more, or resisted more defiantly than the Poles. When the circumstances of war made the Russians our allies, hope rose again in Polish hearts that Poland might yet be free. But, viewing the world since 1945 it became clear that one principal factor which frustrated the advance of the world toward peace, security, and progress is the activity of the Soviet Union. In every way Russia wantonly dissipated any hope for a world at peace and relieved of international tensions. And today they have advanced a new propaganda theme designed to conceal their real treacherous intentions, a theme entitled "Peaceful Coexistence." Try as they will the Soviet shift in policy will not divert the attention of America from its attachment to relief for the oppressed.

Mr. Speaker, in this world beset with atomic hypertension, and with the threat of global warfare let us take heart as we look to the courageousness of our Polish brethren. Let us redouble our efforts for peace in the world and the restoration of liberty and self-government to Poland and other freedom-loving nations now under Communist rule.

National Music Week in Trenton, N. J., Is Opened Again This Year by Villa Victoria Academy Program

---

EXTENSION OF REMARKS
OF
HON. FRANK THOMPSON, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. THOMPSON of New Jersey. Mr. Speaker, the Trenton Sunday Times-Advertiser reported in a major article on April 21, 1957, that Villa Victoria Academy has won wide renown for its music department. The academy's senior choir, under the direction of Sister Elizabeth Parente, M. P. F., has opened National Music Week in Trenton, N. J., since 1938. The choir is a veteran of radio, television, and concert stage. It has been the guest of six radio stations and several television stations, and has given concerts in New York City's Town Hall, in Philadelphia, Washington, Newark, Montclair, New Brunswick, and has appeared twice with the Trenton Symphony Orchestra. Recently recordings were made of the choir by RCA Victor. At a nationwide music festival held on the campus of Catholic University in Washington, D. C., the choir received highest ratings from Robert Hufstader, former director of the Juilliard School of Music.

Deeply interested and highly talented in the field of music, the choir's director, Sister Elizabeth Parente, has succeeded in developing a similar interest in many of her pupils. Several have received scholarships for their achievements in piano and voice and some have gone on to professional work.

Foundation of Villa Victoria Academy was due in great measure to the foresight of the late Most Reverend Thomas J. Walsh, S. D. T., J. C. D.

Villa Victoria Academy's 19th annual musicale, to be presented on May 4 and 5 at the War Memorial Building in Trenton, N. J., will open the way to a new era of musical education at the school.

The expansion of teaching facilities at Villa Victoria Academy is similar to the expansion of fine arts facilities at the University of Notre Dame, at Trinity College, in Washington, D. C., and elsewhere.

No less than other educators in the United States and abroad, Catholic educators, and the institutions they head, have always recognized the humanizing influence of the arts and their importance in the teaching process.

I include here the article from the Trenton Sunday Times-Advertiser of April 21, 1957:

ACADEMY'S MUSIC DEPARTMENT HAS WON NATIONWIDE HONORS

Villa Victoria Academy's 19th annual musicale, to be presented on May 4 and 5 at the War Memorial Building, will open the way to a new era of musical education at the school.

The entire proceeds of the event will be earmarked for a new music building on the River Road campus. Facilities at the school are no longer adequate to meet the demands of a rapidly expanding program of music, drama and art.

Villa Victoria has won wide renown for its music department. The Academy's senior choir, under the direction of Sister Elizabeth Parente, M. P. F., has opened National Music Week in Trenton since 1938. The choir, a veteran of radio, television and concert stage, has twice appeared with the Trenton Symphony Orchestra, performing works by Verdi, Debussy, Wagner and Beethoven. The choir has been the guest of six radio stations and several television stations, and has given concerts in New York City's Town Hall, in Philadelphia, Washington, Newark, Montclair, New Brunswick and Morristown. Recently recordings of choir selections were made by RCA Victor. At a nationwide music festival held on the campus of Catholic University in Washington, D. C., the choir received highest ratings from Robert Hufstader, former director of the Juilliard School of Music.

Sister Elizabeth Parente, deeply interested and highly talented in the field of music, has succeeded in developing a similar interest in many of her pupils. Several have received scholarships for their achievements in piano and voice and some have gone on to professional work. One of Sister Elizabeth Parente's former pupils made a debut in Carnegie Hall and another has toured the United States, Canada and South America with the Wagner Opera Company.

The new music building will rise on the campus of the Academy, a college preparatory boarding and day school for girls, on the bank of the Delaware River.

FORMER MOTHER HOUSE

The property, once an estate, was first used as a Mother House for the teaching order of nuns, the Religious Sisters Filippini, and became a school in 1933. The buildings and extensive grounds of the estate lend themselves admirably to school purposes. The spacious rooms of the old mansion have been converted into dormitories, classrooms and a well-equipped library. Nearby, another school building is furnished with every accessory for instruction. The gymnasium has been placed a short distance from the classrooms so that no sounds may disturb students while studying.

The nuns of the Filippini Sisterhood, whose order dates back to 1692, devoted themselves to teaching, first in Italy, and since 1910, in the United States. They are invested with full authority to teach all of the prescribed subjects and also to give vocal and instrumental instruction. The academy offers a classical course and unusual opportunities are provided in music, the dance, modern languages and Latin. Each year all girl graduates of the eighth grade in the diocese of Trenton are eligible to complete for the academy's victorian music scholarship and the Archbishop Walsh Memorial scholarship.

BISHOP STARTED SCHOOL

Foundation of the academy was due in great measure to the foresight of the late Most Reverend Thomas J. Walsh, S. D. T., J. C. D. Archbishop Walsh received most of his education in the United States, but went to Rome to complete his ecclesiastical studies. Returning to Trenton in 1918, he realized the inadequacy of the schools which had been established by Italian Catholics in the United States. When he was consecrated

Bishop of the diocese of Trenton, he determined to put into practice some of the ideas he had been formulating concerning the educational needs of the people. He sent to Rome for 20 teaching nuns who came to the United States and began to operate a training school for Italian-American teaching sisters in Trenton. The school was called Villa Victoria in honor of Mrs. Victoria Mary Pery Brady, wife of the New York philanthropist, James Cox Brady, who contributed the estate property and nearly half a million dollars for the founding of the school, Mr. Brady had purchased the estate from Harvey Fisk, internationally known banker of New York and this city, who had built it as a country home.

The training school for nuns was converted into a school for girls when Archbishop Walsh, who had been transferred to Newark, suggested that the sisters establish their mother house in Morristown. This house, known for many years as Villa Lucia, was renamed Villa Walsh on the 40th anniversary of the Archbishop's ordination.

"VICTORIANS" AID BENEFIT

Extensive preparations for the 1957 musicale are being handled by "The Victorians," a group of mothers of academy students. Mrs. Paul L. Fabian, general chairman, will be assisted by the following committee chairmen: Patrons, Mrs. James M. Cartlidge; boosters, Mrs. Julius C. Smoliga and Mrs. Robert A. Beikosky; tickets, Mrs. John J. Scheppe, Mrs. Charles V. Burkhauser, Mrs. Reynold Salvatore and Mrs. Ernest J. Taylor; publicity, Mrs. Vincent Cahill and Mrs. Herman Lavan; and special donations, Mrs. Marvin J. Riley. Mrs. Frank W. Hindley is serving as honorary chairman.

We Don't Take Dares

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an interesting editorial from the National Tribune, Stars and Stripes of May 2, 1957:

WE DON'T TAKE DARES

The heading for the following comment was inspired by a communication from a World War I veteran in Texas who offers a good argument in favor of pensions for the men of 1917–19. He is logical enough in setting forth his reasons why the group to which he belongs should receive special consideration at this time.

In his zeal, however, he took out on some of the other veterans' organizations, expressing the thought that they had failed to support the World War I men in their attempt to secure the passage of legislation beneficial to the veterans involved.

We have no quarrel with his attitude. We believe he is entitled to his views on the subject. However, in our opinion, he made one mistake. After expressing himself, he wrote, "Do you, the editor, dare to publish this article in your paper?"

Some 40 years ago the writer of this editorial had his first experience in newspaper work. He had the good fortune to work with some of the great newspapermen of that era, some whose names have become household words in the history of journalism.

Many letters from readers were received outlining their views on many subjects. One of the old gags was to dare the editor to print the letter in the hope that some freeater on the staff might accept the dare and print what might be of little argumentative value because he was dared to do it.

During the course of years we learned never to take a dare and consequently, at this stage of the game, we are not going to do so. We have written the veteran in question, complimenting him on the sound argument he sets forth and explaining why it would be necessary to delete his references to other veteran organizations.

In this connection it might be well to dwell on the history of the veterans' organizations in the hope that not only our contributor but others will understand why we do not feel that name calling of groups which do not seem to meet the wishes of other groups will result in anything beneficial to the veterans as a whole.

Shortly after the Civil War the Grand Army of the Republic was formed. It was composed of men who had served with the North in that bloody conflict. There were many of them and they banded together into a tight organization which was able not only to secure assistance for themselves and their dependents in the true tradition of America but also to control the politics of the Nation for many years. Happily, this control did not set back the country in any way—financially or otherwise.

The leaders of the Grand Army had the interests of the country at heart and by their strength were able to see to it that the United States grew prosperous during the 30 years that followed the close of the Civil War.

Then came the Spanish-American War. At the close of that 4-year struggle, veterans of the Spanish-American War formed organizations which later were merged into one great organization—the United Spanish War Veterans.

The Veterans of Foreign Wars of the United States also sprang from the war of 1898–1902 and both of these groups were well organized, following in the footsteps of their older comrades of the Grand Army. In due time they, too, were able to secure the passage of legislation beneficial to themselves and their dependents, never losing sight, however, of the larger needs of our country.

The surviving members of the Grand Army of the Republic and the veterans of the Spanish-American War worked together for a common purpose—to secure justice for themselves and to uphold the finest traditions of our country.

The country was at peace for many years until 1917 when the United States became engaged in the biggest war of its history. It was known then as the World War and it required nearly 5 million individuals to fill the ranks of fighting men before it was won.

In the spring of 1919, with splendid purpose, the American Legion was formed in Paris. Their eligibility rules permitted any veteran who had service prior to November 1918 to become a member.

The Veterans of Foreign Wars, whose ranks were always open to men who had served their country in time of war in "foreign lands or hostile waters," acquired a large number of members from the new group of veterans.

Here comes the hitch. Many important people in this country, some of them politicians, some of them big-business men, perhaps, realizing the power that the Grand Army of the Republic had wielded in the destiny of the Nation, and realizing, also, that here was the largest body of men who might ever band together in guiding the policy of the country, decided to take action.

What did they do? The old theory of warfare—"Divide and Conquer"—was resurrected and for many years, by hook or by crook, the newly formed group of the American Legion and the older organization of the Veterans of Foreign Wars were kept torn apart with petty fueds—setting one man against another until a time had come when it seemed impossible for men who had fought together in war to meet on a common ground.

It was a shrewd move and it worked. Not until 1936, when the VFW and the Legion got together on the World War I bonus were they able to secure the passage of legislation which made it unnecessary for the World War I veterans to wait years before they could secure the benefits of their bonus. So strong were the two groups that they were able to have this legislation passed over the veto of a popular President.

Happily, the two groups have become more closely allied and, with the exception of minor differences, the measures they propose to Congress in behalf of veterans seek the same ends.

Had it not been for the joint efforts of these two groups and the Disabled American Veterans, much of the benefits granted to our younger men of World War II and the Korean war might never have become law.

This shows what cooperation between the various veteran organizations can do and this is why we do not believe in denunciation when one group feels that the other group is working against it.

This, too, is why we have not taken the dare of our letter writer. We feel we are on the right track and that only through close partnership will the veterans of our wars, no matter what their organization may be called, secure the kind of legislation they want and deserve.

Racial Relations and the Courts

EXTENSION OF REMARKS
OF
HON. BURR P. HARRISON
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. HARRISON of Virginia. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include two recent editorials from Virginia newspapers, the first, Clinton Revisited, from the Northern Virginia Daily, and the second, But in Mississippi, from the Richmond News Leader. The editorials follow:

CLINTON REVISITED

Does anyone remember Clinton, Tenn.?

It will be 6 months this week since the disorder that prompted the most threatening judicial action in modern times.

Last September, almost 9 months ago, the Federal district court at Knoxville, Tenn. issued an injunction which prohibited anyone from interfering with integration at the Clinton High School. Previously, the court had ordered that the high school be integrated.

This was a broad injunction which apparently was intended to run indefinitely.

On December 4, when the Clinton school had been reopened after racial disturbances, a group of segregationists on the sidewalk near the high school roughed up a preacher who was herding some Negro cildren into the formerly all-white high school. Immediately after the fracas, Clinton police arrested one man. The next day Federal marshals arrested 15 more persons.

These people were charged with violating the September injunction.

Another man was arrested and sentenced without jury trial to 30 days in jail. He was found guilty of criminal contempt of court. He dared to pass out pamphlets advocating segregation.

At the time the pamphleteer was sentenced on December 6 the Federal judge announced that the other 16 charged with violation of the injunction would be brought to trial within 10 days. They would be tried before the Federal judge who issued the injunction. They would be tried by that judge without any jury.

But what has happened? What has happened to the prompt trial of those who were brought into court in handcuffs charged with criminal contempt of the most sweeping, most outrageous court injunction in history?

A story last weekend told of the Government asking the court to deny the defendants' motion to dismiss the complaints. The story also stated: "The date for the trial has not yet been set."

In our view, the complaints should be dismissed and no trial date ever set. The injunction was denial of basic freedoms guaranteed Americans in the Constitution, a document which receives ever-diminishing governmental recognition.

In Clinton a disturbance of the peace on the sidewalks of the town has resulted in 16 persons being charged with criminal contempt of court. These persons were not parties to the original court case which resulted in the injunction. They did not misbehave in the court. They misbehaved, if found guilty, on the streets of the town.

The Federal injunction has unlimited implications. It forbids speaking or writing against integration in the Clinton High School. One man who distributed pamphlets protesting the action has been sentenced without jury trial to 30 days in jail. Others, after 6 months, still face criminal contempt of court charges.

Clinton, revisited after 6 months, still smells of obnoxious Federal court decrees.

BUT IN MISSISSIPPI?

Let us talk for a moment today of three tragic events of recent occurrence.

On the afternoon of February 16, Edward Rose, 36, a Negro building superintendent, was walking along the street with his wife, Dolores, 26, white, who was then pregnant with her fifth child. They were accosted by 4 white men, 1 of whom yelled "poor white trash" at the woman. When Rose protested, 2 of the men beat him to death while the other 2 held his wife and pinioned her arms.

On the evening of Monday, March 11, Alvin Palmer, a 17-year-old Negro high school student, was standing on a corner waiting for a bus. A gang of 15 white youths, ranging in age from 16 to 19, first sauntered past him and then turned and came back. One of the gang, alleged to be Joseph Schwartz, 17, then killed Palmer by crushing his head with a hammer. The boys subsequently told police they just "wanted to get a Negro."

On the night of Tuesday, April 24, another 17-year-old Negro youth, Curtis Bevins, was walking along a street. A car driven by an 18-year-old factory worker pulled up beside him. From the back seat of the car, police said, 19-year-old David Vandersteeg, white, fired a shotgun blast. A white girl, 17, was in the car with them. Bevins died shortly thereafter in a hospital.

What may be said of these events?

Rose was slain in Boston, young Palmer and young Bevins in Chicago.

Now, the crime of lynching ordinarily is thought of as the offense that is committed when a prisoner is taken from lawful custody and put to death by a mob. But in other times, when Tuskegee Institute used to keep a record of these things, lynching was defined to include any unprovoked slaying by reason of racial prejudice, committed by three or more persons.

Applying the same standard definition, we may make the point that the last 3 racial lynchings to occur in the United States have occurred within the past 3 months—1 in Boston, 2 in Chicago.

The northern press, which sent special correspondents to Mississippi when the Emmett Till case arose, has been strangely quiet about the slaying of Rose, Palmer, and Bevins. The New York Times, which gives prominent attention to every incident of racial violence in the South, seems to find these events not news fit to print. What is page 1 lynching in the South is merely routine homicide in the North.

The suggestion may well be renewed, as we see it, that our holier-than-thou critics beyond the Potomac look to their own problems before they undertake to instruct the South in handling its troubles down here.

Let's Stop This Shocking Waste of Scientific Manpower

EXTENSION OF REMARKS
OF

HON. CHARLES S. GUBSER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 5, 1957

Mr. GUBSER. Mr. Speaker, under leave to extend my remarks, I include an article in the May 1957 issue of Reader's Digest entitled "Let's Stop This Shocking Waste of Scientific Manpower" by Albert Q. Maisel.

In this article the author points out that the rapidly growing shortage of scientists and engineers is forcing cutbacks in military and civilian research programs and causing delays in the completion of urgent defense contracts, while the time and talents of thousands of our most skilled research and development minds are being squandered on useless and wasteful chores.

He points out that three times within the last year and a half this prodigal waste of manpower has been detailed and documented in testimony before congressional committees but that so far these wasteful practices continue.

The author notes that the working time of thousands of engineers and scientists serving in the Armed Forces is being wasted keeping meticulous and routine and probably useless records. He goes on to say:

About 5,000 draftees who are scientists and engineers, for example, are currently serving in the Army as privates and corporals, classified under a special scientific and professional personnel program. Theoretically, they are being utilized to relieve the pressing shortage of civilian scientists in our understaffed military research laboratories. In practice, however, the Army has not seen fit to release these men from routine chores, and half their time is wasted upon KP and other fatigue details, on compulsory attendance at training movies and marching in parades. At Fort Belvoir, Congressman CARL HINSHAW found an entire company of masters and doctors of science being removed from lab duty 2 days a week to swab pots, pick up cigarette butts, and stand guard.

At Fort Monmouth, 50 draftee engineers made a 9-month study of the Army's utilization of their time. Keeping meticulous records, they found that details having nothing to do with their specialized skills had consumed the amazing total of 31,872 hours. Less than 60 percent of their time on duty was left—in short and unpredictable snatches—for their professional assignments.

At Rossford Ordnance Depot, two half-idle engineer draftees applied for transfers. Their request was rejected "due to the critical shortage." A few days later, these same men were given the vitally important task of copying long lists of serial numbers from file cards onto sheets of paper.

It is my understanding that at the Rossford Ordnance Depot alone a consulting firm of engineers has been hired, for a staggering sum, to write specifications for small tools and equipment while only a few feet away sit several highly skilled college graduated engineers, who are wasting their time either doing nothing or performing useless menial routine jobs. Could this be the fault of some designing people among the civilian personnel who are more interested in building themselves an empire than they are in utilizing the talent at their disposal?

Let us either utilize the skills of these military personnel in the manner best suited to the interest of the United States or release them from service so that they can help to relieve the critical shortage of scientific manpower referred to by the author.

In this time of record defense spending we canont afford to waste anything—least of all precious scientific skills.

The article by Mr. Maisel follows:

LET'S STOP THIS SHOCKING WASTE OF SCIENTIFIC MANPOWER

(By Albert Q. Maisel)

A vast—and rapidly growing—shortage of scientists and engineers is forcing cutbacks in military and civilian research programs and causing critical delays in the completion of urgent defense contracts.

For lack of engineering manpower, such major manufacturers as Caterpillar Tractor and Sylvania Electric have had repeatedly to turn down invitations to bid on production of material for our Armed Forces. Raytheon, AlResearch Manufacturing and scores of other firms report intermittent slowdowns in new product development. The Radio Corporation of America is searching for at least 1,000 additional graduate engineers, General Electric for 2,300. In the Civil Aeronautics Administration 35 percent of the authorized science and engineering positions have been vacant. At Redstone Arsenal, the Army's principal missile research center, the shortage of civilian scientists has exceeded 40 percent.

Behind this mounting famine of scientific brainpower lies the fact that ever since 1950 our output of college-graduated engineers has been from 20 to 40 percent below the soaring needs of our expanding economy. This June our colleges and universities will graduate fewer than 40,000 young physicists, metallurgists, mathematicians and engineers—10,000 below the number needed to make up for deaths, retirements and the normal growth of industry and research.

Is there any way to ease this crucial shortage—right now? Indeed there is. Dr. Lee A. DuBridge, president of California Institute of Technology, pointed it out a year ago. "If we could improve by only 5 percent the efficiency of our utilization of the 600,000 engineers we already have," he declared, "we would add to the effective supply of engineering talent as much as all this year's new graduates."

But that is exactly what the Defense Department and many of our largest defense plants have not been doing. Instead, they have been squandering the time and talent of thousands of their most skilled research and development experts.

Worse yet: thousands of key men have been diverted from top priority research work to the wasteful job of luring away the scientific staffs of other defense plants, of civilian industries and college faculties, and even of the Defense Department's most important military research labs.

Most fantastic of all: the Pentagon has been fostering and financing this piratical raiding with millions of your tax dollars and mine. For the Army, Navy, and Air Force have been lavishly reimbursing their industrial contractors for the cost of thousands of pages of flamboyant want ads and hundreds of high-pressure recruiting teams.

Three times within the last year and a half this prodigal waste of money and manpower has been detailed and documented in testimony before the Joint Congressional Committee on Atomic Energy and the House Armed Services and Civil Service Committees. Members of these committees have repeatedly prodded the Defense Department to alter its talent-squandering policies. But the most wasteful practices continue unabated.

At Government expense, for example, west coast airplane and electronic plants have been flooding east coast newspapers with advertisements urging engineers to abandon their jobs in the land of slush and snow and head for sunny California. These ads promise full relocation expenses. Even dogs and cats have been crated and transported—with the taxpayer, of course, picking up the bill.

East-coast defense contractors have not taken this lying down. One large electronics manufacturer, for instance, has been using big space in newspapers all over the West for ads reading: "Are you homesick for fresh green spring, sparkling autumn, snowy winter? You can enjoy four-season living again—swimming, fishing, hunting, skating—and unique career opportunities too." In 1 year this tempting offer induced some 230 engineers, most of them originally migrants from the East, to pick up stakes for a second cross-country trek and a second round of Government-reimbursed relocation expenses.

To flush out additional prospects, military contractors have been sending swarms of recruiters to every scientific meeting. The 308 physicists who attended a recent meeting of the American Institute of Physics were besieged by more than 2,000 job offers. Out of 40,000 who went to a recent convention of electronic engineers, an estimatede 15,000 changed their positions before the sessions ended. "I was happy in my old job," explained one engineer, "but I just couldn't go home and tell my wife that I'd turned down an offer of a $2,500 increase."

What has all this shuffling and reshuffling been costing the taxpayer? With some 10,000 primary and subcontractors in the plane and missile field alone, the Pentagon has thus far been unable to supply congressional investigators with even an estimate of the total cost. But the Navy, in a spot check of 37 companies selected at random from among those doing most of their business with the Government, found that even this small group was running up total recruitment charges at the rate of nearly $9 million a year.

One contractor was spending $500,000 annually just for help-wanted advertising. Another firm's travel and moving expenses, which were charged back to the Pentagon, came to $540,000. A third firm spent $907,560 to recruit and relocate 193 engineers, but in the same period lost 134 engineers to other companies—thus scoring a net gain of only 59 men. For each engineer actually added to this plant's staff, the Treasury had to pay out $15,380.

Yet such fantastic hiring costs are only a fraction of the staggering waste. For these raids and counterraids have been drastically reducing the productivity of our existing scientific work force. Before 1950, only 3 to 4 percent of all scientists and engineers switched from one plant or laboratory to another in any given year. But last year the engineering turnover was more than 12 percent, while in airplane manufacturing the turnover rate soared to 17 percent. Throughout industry the time wasted between jobs and in becoming familiar with new assignments is now estimated to equal the full year's productivity of nearly 19,000 engineers and scientists.

To tap the only source of new scientific talent, defense contractors and other industrial firms have sent their headhunters stalking over every college campus. This spring 500 such squads descended upon Massachusetts Institute of Technology, to solicit the services of 1,200 prospective graduates. Columbia, Rensselaer, Cal Tech, Georgia Tech, and Carnegie Tech have been similarly overrun. Outstanding students often have 50 job offers to choose from, at $450 a month and up, plus fringe benefits. The result, unfortunately for the future of research, is that hundreds of the best brains abandon their plans for further study which would lead to advanced degrees. Thus, the country has been losing its future Einsteins, Fermis, and Tellers.

Nearly every Government engineering and research laboratory has had its work disrupted and delayed by the raiding. Last year alone, offers of jobs at salary increases of $1,500 to $15,000 induced over 9,300 engineers and scientists to resign from Federal positions. The quit rate in Government labs today is 50 percent higher than that of private industry and is rocketing rapidly upward. The new hire rate, on the other hand, is plummeting downward.

Ironically, it is in the laboratories of the Defense Department itself that Pentagon-subsidized personnel pirates have been wreaking their greatest havoc. The Army Engineer Corps has lost 2,000 of its civilian engineers and scientists in less than 2 years. At its Fort Belvoir Research and Development Laboratories, 1 out of every 5 of its budgeted scientific jobs is now vacant.

All three services have been desperately trying to compete with the free-spending recruiters from the defense plants. The Army engineers, for instance, made 1,164 offers of employment to civilian engineers during a recent 3-month period. They managed to hire only 52. Recruiting squads from the White Sands Proving Ground visited 74 colleges, but could induce only 47 young men to accept jobs.

While paying its contractors to wreck its own research staffs, and everyone else's as well, the Defense Department has also been wasting the working time of thousands of engineers and scientists still under its control. About 5,000 draftees who are scientists and engineers, for example, are currently serving in the Army as privates and corporals, classified under a special scientific and professional personnel program. Theoretically, they are being utilized to relieve the pressing shortage of civilian scientists in our understaffed military research laboratories. In practice, however, the Army has not seen fit to release these men from routine chores, and half their time is wasted upon KP and other fatigue details, on compulsory attendance at training movies and marching in parades. At Fort Belvoir Congressman CARL HINSHAW found an entire company of masters and doctors of science being removed from lab duty 2 days a week to swab pots, pick up cigarette butts and stand guard.

At Fort Monmouth, 50 draftee engineers made a 9-month study of the Army utilization of their time. Keeping meticulous records, they found that details having nothing to do with their specialized skills had consumed the amazing total of 31,872 hours. Less than 60 percent of their time on duty was left—in short and unpredictable snatches—for their professional assignments.

At Rossford Ordnance Depot, two half-idle engineer draftees applied for transfers. Their request was rejected "due to the critical shortage." A few days later, these same men were given the vitally important task of copying long lists of serial numbers from file cards onto sheets of paper.

What about the civilian engineers and physical scientists who still work for the services? In a recent survey Army investigators interviewed 4,000 engineers and scientists in 14 principal Army research centers. They discovered that nearly one-third of the working time of these experts was being consumed by duties that could be performed by office managers, draftsmen, laboratory assistants, bottle washers, stock clerks or messengers. The shocked investigators found that saving even half of this time—780 man-years—would make up for all the vacancies currently plaguing these Army labs.

Many large defense plants are as profligate as the Government in the misuse of scientists and engineers. A study by Booz Allen and Hamilton, management consultants, revealed that 41 percent of the scientists employed in 26 major companies were heavily burdened with such tasks as lettering on blueprints, compiling bibliographies and reports in longhand and performing repetitive calculations which could have been done by assistants.

The stock excuse for these practices is the claim that technical help is even harder to find than graduate engineers. But that alibi was punctured back in 1951 when an ad appeared in Seattle newspapers, reading: "Boeing will teach you drafting and pay while you learn. Must be able to do simple arithmetic." In the first 2 days 243 persons applied for the 6-week course, which has run to capacity ever since. Thanks to the graduates of this in-the-plant school, Boeing has trebled the proportion of semi-skilled helpers in its engineering departments and eased its shortage of engineers by at least 1,000.

By a similar plan, International Business Machines has so increased its use of technical helpers that their number now equals the combined total of its scientists and engineers. The result? The quit rate in its laboratories has fallen to less than one-sixth of the national average.

Some firms use machines to replace or aid men. Sperry Gyroscope Co., for instance, has 11 sets of electronic computers which work out in minutes the solutions to mathematical problems that formerly took scores of engineers weeks.

At Hughes Aircraft, an intensive program to improve working conditions has produced phenomenal increases in productivity. Instead of huge bull-pens, there are semi-private offices, each shared by 2 or 3 men doing related work. Instead of having to line up to obtain supplies, scientists are trusted to browse through self-service, super-market stock rooms. For every 3 engineers, there are 4 supporting technicians, clerks, and other aids. As a result, Hughes' quit rate has fallen far below the west-coast average, while engineering output has skyrocketed.

Unfortunately, instances like these are the exceptions. Far more typical are conditions reported at another plane plant where more than 1,100 engineers are crowded into a loft originally designed for 750. Another group works immediately above a wind tunnel, the noise level being 80 decibels and the summer temperature sometimes topping 100°. Two hundred additional engineers work on an open mezzanine, overlooking a metal-working shop where the noise tops that of a boiler factory. More than a third of this plant's engineering staff quit their jobs in 1956, the highest turnover in the entire airframe industry.

What can be done to eliminate this waste of talent? Must we resort to wartime controls—job freezes and wage freezes? Not at all. Our shortage of engineers and scientists could be immeasurably and immediately eased by a few simple changes in Defense Department policies.

A logical first step would be to release from military service the 5,000 draftee scientists and at least an equal number of ROTC engineers and scientists whose specialized skills are currently going almost unused. They could serve far better in defense production.

A second would be to eliminate the Defense Department's misuse of its civilian engineering force.

Third, the armed services could curb the destructive practice of personnel pirating, and save many millions of dollars besides, by stopping their lush subsidies for recruiting teams and switch-your-job ads. Compelled to pay their own hiring expenses, most defense contractors would find it far cheaper to train technical aides and to improve working conditions in order to hold on to the engineers and scientists they already have.

Finally, military procurement officials could provide an incentive, a reward, for efficient use of engineers by defense firms, just as they reward efficient manufacturing production with share-the-savings contracts.

None of these steps are the panaceas of visionaries unfamiliar with the scientific manpower problem. They have been repeatedly recommended by outstanding educators and industrialists, by professional societies of scientists and engineers, and by three successive congressional investigations. Only the public, which pays for the waste, has not been heard from. If its powerful voice rang out—in letters to the Secretary of Defense and the Members of Congress—our shocking waste of engineers and scientists would soon come to a halt.

Ambassadors of Good Will

EXTENSION OF REMARKS
OF
HON. ROBERT W. HEMPHILL
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. HEMPHILL. Mr. Speaker, under leave to extend my remarks in the RECORD I include therein the following editorial taken from the Camden (S. C.) Chronicle of April 26, 1957:

AMBASSADORS OF GOOD WILL

Camden families who took members of the Kingston, N. Y., high school choir into their homes report that the youngsters appeared very favorably impressed with Camden and the South.

This being true, Camden and our citizens now have some 78 good-will ambassadors who will, most assuredly, go back home and tell their families and friends, who will in their turn pass the word on along, that "southern hospitality" isn't just a figure of speech, and that some of the things the northern press is saying about this section of the country aren't true at all.

We have no idea as to how many thousands of dollars the trip set Tic-Tac President Clarence Rowland back, but we do know that there can be no price tag placed on the all-round good which will come of the visit.

Not only were the New York State students apparently very much pleased with what they saw and heard and the treatment they received on their visit here, but local citizens are firmly convinced that no finer and more talented group of youngsters could be found anywhere.

In its concert Wednesday night, the choir lived up to all advance billings, and even more. We cannot remember when we have seen a more appreciative audience. Said choir director Leonard Stine following the concert: "This audience is one of the most appreciative we have ever presented a program before." And the program was spellbinding. No wonder this splendid choir has gained national recognition.

The concert is over and the youngsters are gone, but the results of the visit will be far-reaching for years to come.

Thank you, Mr. Rowland. We can never repay you.

Happy Birthday, Industrial Press

EXTENSION OF REMARKS
OF
HON. GEORGE HUDDLESTON, JR.
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. HUDDLESTON. Mr. Speaker, this week is the 26th anniversary of the founding of one of the fine weekly newspapers of my district, the Industrial Press, of Ensley, Ala.

It is with much pride that I join with the editors and readers of the Press in paying tribute to this progressive home-community newspaper on its 26th birthday. Since it was founded on April 30, 1931, the Press has vigorously and energetically reported the weekly developments and occurrences of the western section of Birmingham and Jefferson County.

Mr. C. G. Thomason, the editor and publisher, is noted for his lively editorials and enlightening comments. His editorial policy is based on a quotation from Milton which he runs every week on his editorial page:

Give me the liberty to know, to utter, and to argue freely according to conscience, above all other liberties.

The Press, which has grown up with the western section of my county, endeavors to reflect the thinking of the fine citizens of that area. The newspaper is dedicated to a responsibility of service in the community and serves adequately and well as a community voice.

It is my pleasure, under leave heretofore granted, to insert an editorial which appeared in last week's issue of the Press, calling attention to its 26th birthday. The article follows:

TWENTY-SIXTH COMING UP—TUESDAY WILL BE BIRTHDAY FOR THE PRESS

Next Tuesday will mark the 26th anniversary of this newspaper.

As in previous years, it is again our privilege to express our thanks to the thousands of citizens in the western section whose loyalty and support have made possible the paper's continuous publication.

From its initial issue the paper has been dedicated to the constructive service of the citizens of all the communities that make up the western section of city and county. It has always been our hope that the dissemination of personal and organizational news from these communities would tend to bring them into a closer bond of friendship and cooperation. We hope we have succeeded.

Growth and development of a greater western section in recent years and months have been accepted as a still greater challenge by the Press.

May we ask a continuance of your cooperation, understanding and tolerance as we strive to meet this new challenge.

We hope you can be as proud of your home community paper as we are of our home folk—you.

Vocational Rehabilitation

EXTENSION OF REMARKS
OF
HON. CLEVELAND M. BAILEY
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. BAILEY. Mr. Speaker, I believe that our colleagues will agree that no program of the Federal Government represents a sounder investment on the part of the Amercan people than the vocational rehabilitation program. Last week at Jackson's Mill, W. Va., Region III of the National Rehabilitation Association—including West Virgina, Virginia, Maryland, North Carolina, Kentucky and Washington, D. C.—held its annual meeting. My colleague who represents the Sixth Congressional District of the "Mountain State" participated in the program. I am pleased to direct the attention of the House to the remarks made by the Honorable ROBERT C. BYRD on Saturday noon, April 30, when he addressed the regional meeting.

Representative BYRD's remarks follow:

Ladies and gentlemen, in almost all health fields, but particularly perhaps in rehabilitation, the activity and leadership coming from voluntary associations serves to keep our Federal effort free of any hint of paternalism. Furthermore, as Americans, we can take pride in knowing that quite apart from all the points we make about the national economy and security, the basic drive behind vocational rehabilitation is one of simple humanity. The work you do saves millions of tax dollars and increases our productivity and national worth. There is no question about that. On the basis of a special study of persons rehabilitated during the 1953 fiscal year who were receiving some help from public relief agencies during rehabilitation, it is estimated that 13,000 disabled persons, about 20 percent of the total rehabilitated during the 1956 fiscal year, were dependent to some extent on public assistance either at the time of acceptance or during the process of rehabilitation. It is estimated that the cost of maintaining these 13,000 persons on public assistance for one year would be about $11.1 million. The cost of operating a basic rehabilitation program is estimated at $9.6 million.

The annual rate of earnings of the group of persons rehabilitated during the 1956 fiscal year who were receiving wages was estimated at $17.5 million before rehabilitation and $127.3 million the first year after rehabilitation.

Statistics show that rehabilitated persons pay back $10 for every $1 invested in rehabilitation.

The economic facts of rehabilitation give strong support to the proposition that vocational rehabilitation is an investment in human welfare that is completely self-liquidating. No program of the Government better illustrates the principle that the expenditure of effort and money to help people be-

come self-reliant and self-sustaining is not only proper and sound but is a prudent disbursement of public funds.

All of us, you in the field, the people in the State and Federal office of vocational rehabilitation, and Members of Congress, see the greatest rewards in terms of human lives. The true measure of your work is in terms of those children and adults who have learned to live again. That is a measure that, in the minds and hearts of all of us, transcends dollars and cents.

When we were discussing my appearance here today it was felt that the best way for me to make a contribution would be to talk about the point of view a legislator brings to bear on a subject like vocational rehabilitation. Point of view, of course, is largely a personal matter. Legislatures are made up of individuals who bring into them varied attitudes and equipment. But it is fair to think that there is such a thing as a legislative frame of mind, if I may use that phrase. In Congress, and in State legislatures, generally speaking, majority opinion evolves steadily, without many abrupt changes. In essence, this is because a legislature represents a people whose attitudes and opinions also evolve that way. As we go along, day-to-day, we hardly seem to be changing at all. But if we stop to take a backward look we will sometimes be surprised at how far we have come. In this context it might be instructive to review the situation in Congress and the Nation when the Vocational Rehabilitation Act had its rather modest birth in 1920.

At that time, or rather, during the hearings held by the 65th and 66th Congress in 1918 and 1919, the plans for Federal grants-in-aid to the States for vocational rehabilitation were presented as representing "social justice on the one hand, social economy on the other." Federal participation was presented as being nothing more than stimulating to the States. There was a great deal of interest throughout the country, on the part of industry, labor, State government, and private organizations. No one was sure, exactly, how big the problem was. Everyone knew that inaction was resulting in a tragic waste of lives. We don't today, see the alternative to this program in terms of disabled people out on the streets selling shoelaces or just plain begging, but that was the way they saw it then. There was, then, very little resistance to the idea in Congress. What resistance there was—and the printed hearings bear out that it was a sincere, thoughtful, high-minded resistance, with nothing arbitrary in it—took two phases. On the one hand was this problem: was Congress invading a territory better left to the States? What little experience there was in this respect concerned the land-grant colleges and the still new Office of Vocational Education. The proponents of the measure quite honestly expected Federal participation, in dollars, to remain small. They expected that State contributions would greatly outweigh Federal contributions. And great care was taken to see that actual administration would remain in State control.

The second type of question—I won't say objection—raised was whether or not the bill was too inclusive. The famous phrase "injured in industry or otherwise" raised a spectre of a program to retain at public expense practically the whole population. One representative, for example, wondered if this term might not be construed to include everyone who gets sick. The difficulties implicit in limiting the phraseology were illustrated by the case of an employee receiving a disabling injury while on the way to work. This was at the joint committee hearings in 1918 in it is significant to note that the Representative raising the question was not objecting to the bill. He was prepared to vote it out of committee favorably. But he was concerned with the problem of seeing it through the House and Senate, and getting it made into law. Then, as now, Congress needed facts with which to work. Proponents of the measure had the Members' sympathy, but sympathy was not enough. During those hearings in 1918, the members wanted facts. They wanted some idea of the scope of vocational disability. What was the dollar value of lost productivity? How many people actually needed vocational rehabilitation? In 1918 these questions could not be answered with any statistical certainty, but the committee heard a wealth of testimony on the situation in individual industries or in particluar areas. They could not get all the information they wanted, but they heard that other countries were doing more than we were, that the problem was widespread and grave, and that programs abroad, and isolated programs here, showed that handicapped persons could be helped to economic and spiritual self-sufficiency. The 65th Congress did not get to vote on the bill, but it was reintroduced in the 66th, and became law on June 2, 1920.

Passage of this act did not usher in any millenium, as we all know. It has been a long, hard pull. First you people in vocational rehabilitation had to build up your programs in the States. When you first started there was only a handful of people who knew something about the subject. You had to create a new discipline, build up a national pool of knowledge, invent new skills and then train people to use them. You also had to make friends, so to speak, or open lines of communication with various people in State and local governments, in industry and in labor. And, most importantly, you had somehow to reach the handicapped. You had to let them know you were there, and convince them that you had something worthwhile to offer. Over and above all this there has always been the problem of getting your program across to Congress and the State legislatures.

Generally, you have done a good job. Legislators want facts, as I said before, and a lot of them have been developed since those early days. Now you can give us the facts, facts which are pretty well irresistable on a dollar and cents basis.

In 1943, with passage of the Barden-LaFollette amendments to the Vocational Rehabilitation Act, your movement closed the book on the chapter of ancient history and moved into an exciting future. It was in the succeeding decade that you were able to entertain the notion of caring for all the handicapped, no matter how severe their deficiencies.

Physical restoration: What a wonderful phrase that is. Every year saw new kinds of cares taken in hand for the first time. Counseling receded into the background as physical medicine advanced. And all parts worked together harmoniously. As physical medicine advanced, so did the science of prosthetics. At the same time there were developments of new jobs, or job skills, for the rehabilitees. The progress in physical medicine accompanied that of the rehabilitation center as a means of restoring the more severely handicapped. And the 1954 amendments will result in an even greater significance for the rehabilitation center. Sheltered workshops, too, have grown in importance, for you are restoring people now who cannot be expected to step right out into competitive employment. We can hope, and expect, that future legislation will help expand that part of the program.

Right now, the legislative pattern for the vocational rehabilitation program seems to me to be pretty adequate in its broad outlines. There are areas where it can be improved, or added to, of course. But it now seems to encompass the field, and it has about as much flexibility as legislation can have without becoming vague or indefinite. What we need now is more money for expansion, more rehabilitation centers, more sheltered workshops, and more trained personnel.

Now, in the 37 years since passage of the Vocational Rehabilitation Act, I understand there have been great changes, evolutionary ones, in your thinking. Along with this has been the development, or cultivating, of local planning and responsibility.

Some of our present-day developments were dismissed in 1918 as highly unlikely. It was felt, for example, that private organizations would by their very nature be limited to small pilot studies. No one foresaw the present day's tremendous response to fund-raising campaigns of the voluntary health agencies. Then again, it was anticipated that rehabilitation work would require no new facilities. The sponsors of the act decried the possibility. And there has been one big change that has come about so slowly most of us never think of it. Back in the early twenties everyone discussing vocational rehabilitation operated on the tacit assumption that a great many cases were hopeless. In those days they were thinking mostly of injured persons in whom one faculty was lost or impaired, but who were still mostly sound—almost the entire emphasis was on developing vocational skill with what a man had left to him when he came to the agency. When vocational opportunities were discussed, there was a lot of talk about running bee farms or raising capons. They never contemplated the day—how could they contemplate the day?—when men who had lain for 20 years on their backs would be carried into hospitals on stretchers and would walk out to face a new life 6 months later.

There are quite a few people who have never had any personal, intimate knowledge of severely handicapped persons. They have seen them in the streets, perhaps, but this problem is pretty remote and impersonal. When we talk of the inspiring history of this movement, we know that to some it is just a matter of statistics. This is not a matter of heartlessness. How, without knowledge, can you look at a man, distinguishable only by some peculiarity in his gait, and appreciate the narrow margin between his present state and a vegetative existence? One doesn't begin to comprehend this field until he knows the "before and after" status of particular individuals. There is a tendency with some people to see, or hear of, a man rotting helplessly on a cot, and to think that his case is helpless. They would rather not think about him any more. It is too painful. They drop a penny in the hat and forget about him. But here, in a coal mining State, you won't find that apathy and indifference.

To every coal miner, and to everyone who knows the mines, severely crippling injuries have been far from remote. Men so crippled they would never work or walk again have been part of everyone's experience. The fear of becoming a hopeless cripple, even more than the fear of death, has haunted every coal miner. And no matter how safe the mines have become, they are still places of great hazards.

So here, in a coal mining State, where you have the greatest awareness of what being handicapped means, you will find the greatest appreciation of rehabilitation. And it is fiting that in these areas you find the greatest development in civilian rehabilitation, the most exciting and inspiring story of all with a remarkable display of courage, ingenuity, and humanity. The United Mine Workers have launched their own drive to wipe out the backlog of so-called hopeless cases. Although the initiative has come from the mine workers, they have not of course worked alone. They have received full cooperation from State and Federal agencies, and they have found rehabilitation

personnel and facilities ready to work with them.

Being a member of the Foreign Affairs Committee, I sometimes think that if we could adequately publicize this program abroad it would create a much better understanding of us among people in general over there. As a matter of fact, if we could adequately publicize it here in this country it would really wake the public up.

Judging by results, the rehabilitation program seems to operate on the assumption that no case is hopeless. The work we hear of today gives new meaning to the old phrase, "where there's life there's hope."

There has been a steadily growing tendency, reflected in legislation, to see the rehabilitative process whole; to see it as an integrated part of the entire complex of health service and facilities. The 10 beautiful hospitals built by the UMW will not be isolated centers—they are part of a new dynamic approach which aims for total health. If they are the forerunners of more and more local initiative, on the part of labor, industry, and community, the future of vocational rehabilitation may be brighter than any one of us thinks. The best thing about the initiative that comes from the base of the pyramid, rather than the tip, is that this is the best way to get new ideas into action, and to get brilliant new approaches.

At this point, I wish it were possible to predict what this Congress, and subsequent ones, are going to do about rehabilitation. Unfortunately, I do not have a crystal ball. But this much I can say: over the years congressional support of vocational rehabilitation has strengthened as our understanding has deepened. We see great progress in techniques, we see the State programs getting stronger and more far reaching. It would seem that we are now at one of those historical points where we can launch an all-out drive to bring this program within reach of every handicapped person in the United States.

On past evidence there will be no partisanship in approach to any bills relating to vocational rehabilitation. And just as we are certain of your unselfishness and concern for the general welfare, so can you be sure of our continued interest in your great work. The future is really up to you.

What Alabama Makes Makes Alabama

EXTENSION OF REMARKS
OF

HON. GEORGE HUDDLESTON, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 1, 1957

Mr. HUDDLESTON. Mr. Speaker, this is Alabama Industry Week in my home State. We are celebrating it because we believe in the saying: "What Alabama Makes Makes Alabama."

As the whole Nation knows, Alabama is enjoying a tremendous industrial expansion. Entirely a rural area not long ago, our State is rapidly becoming urban with new factories and plants popping up almost daily. During 1956 at least 160 large industries were located or existing industries were materially expanded within the State. The new facilities provided 18,604 additional jobs in Alabama, which led the director of the Alabama Department of Industrial Relations, Eugene Wells, to boast with reason:

There is a job for every able-bodied man in Alabama who wants to work today.

While other Southern States are worried about a serious migratory problem in labor, Alabama is able to supply the jobs for its laborers which neighboring States are not. In fact, the creation of the 18,604 new industrial jobs in Alabama last year should show these average community gains, based upon a recent United States Chamber of Commerce report: 55,068 more persons, 20,836 more households, 19,906 more automobiles, 744 more retail stores, and 32,371 more workers employed in other industries.

Alabama industrial expansion announced in 1956 totaled $376,287,000—an all-time record in our State. This is certainly graphic proof of the confidence which industry has in Alabama. Mr. Roland L. Adams, president of the Alabama State Chamber of Commerce, calls this one of the very best selling points we have in attracting more and more industries to our great State.

So far this year, a total of 22 new plants or large expansion programs have been revealed. Mr. Pleas Looney, director of the Alabama planning and industrial development board, reports that the 1957 outlook is much brighter than it was this time in 1956 because of the development of Alabama's waterways system. Now seriously considering Alabama sites are a number of heavy type industries requiring an abundant water supply and low-cost barge transportation.

Alabama industry is truly in high gear. When the wheels of industry are humming, economic prosperity is here. The industries are happy, the workers are happy, the merchants are happy; all the State is happy.

It is thus with much pride that my State this week is celebrating Alabama Industry Days. This eighth annual observance, from April 29 through May 4, is under the sponsorship of the Associated Industries of Alabama.

Another outstanding organization which has certainly done its part in boosting local business is the Birmingham "committee of 100," which is 7½ years old today. It was organized in December 1949. During the previous 2 years, not a single new factory had located in Birmingham, the iron and coal center of the South. It was almost unbelievable but true. Overnight, 100 civic leaders set to work to woo new industry. The committee was overwhelmingly successful. It has since brought more than 100 major plants, warehouses, and district sales offices to Birmingham and Jefferson County. In 1956, 20 new plants were established in the county and 26 local companies expanded their facilities. The new industries added $74 million to the area's annual payroll.

In just 66 months, the Birmingham "committee of 100" has given the Birmingham area new and vital lifeblood. New factories mean new markets. A boon in industry is a boon to business in general.

On the occasion of Alabama Industry Week, I would like to salute the individual industries whose management has had the foresight to move to Alabama. I trust that their economic prosperity in our State will encourage other industries to follow.

In this connection, under leave heretofore granted, I am pleased to insert in the CONGRESSIONAL RECORD, an article headlined "Why Does Industry Move to the South?" which appeared in the April 28, 1957, edition of the Birmingham News, one of the fine dailies in my district:

RESOURCES, LABOR, MARKET, ETC.: WHY DOES INDUSTRY MOVE TO THE SOUTH?—HERE'S WHAT A STUDY TURNED UP

Why is industry moving to Alabama and the South?

Two members of the industrial development department of Alabama Power Co. have spent considerable time studying that question. They were W. Cooper Green, Alabama Power vice president, and head of the department, and Ed Staub.

Here's the way they described the basic things that are luring industry southward:

1. LABOR

"The labor pool is deep enough to last for many years. Because of mechanization on the farm and the transition from cotton to livestock production, more and more people are available for industrial work. Also the modern trend by industrial management is to shift the back-breaking burden and human skill to machines. * * *

"Most of the big corporations that recently built plants in Alabama and the South were not searching primarily for cheap labor, but rather for a labor population that was young, quick to learn, and productive. Cheap labor in the South is a misnomer. * * * Industrialists have recognized that per unit of production, the workers in the South are on a par, and in many cases have proved superior to workers in other areas."

2. NATURAL RESOURCES

"In natural resources, the South has no equal and can match or excel any region in the Nation. The efficient utilization of these raw materials has barely begun.

"The South sells itself when it has this much to offer out of the Nation's storehouse:

"Seventy percent of the Nation's petroleum, 80 percent of all the natural gas, 61 percent of all navigable waterways, 35 percent of all potential waterpower east of the Rocky Mountains, 22 percent of all the coal, 75 percent of all the graphite, 40 percent of all commercial forest area, 40 percent of the phosphate rock, 100 percent of all the bauxite, and ample water supply. From this listing, it is little wonder that in the last 5 years, more than half of the Nation's new chemical plants have located south of the Mason-Dixon line."

3. MARKET

"Our area is the fastest growing market in the Nation for consumer goods. With each new factory the market grows. Someone has to supply this market, and foresighted industrialists will continue to locate branch plants at points of consumption. Per capita income in the Southeast has risen from $332 in 1940 to $1,292 in 1955, an increase of 301 percent.

"In Alabama it has risen from $268 to $1,181 during the same period, a rise of 340 percent. Saleswise the South * * * offers merchants and advertisers tremendous opportunities. * * *

"As industry continues to locate and expand in Alabama and the South * * * the result will be additional increase in per capita income, and a general rise in the economic level. This will mean a demand for products that must be satisfied. * * * It is cheaper to serve this new market by branch plants than by freights."

4. CLIMATE

"The South is endowed with a uniform climate that makes for good year-around working conditions."

5. WATER SUPPLY

"Alabama and the South are blessed by a plentiful supply of both ground and surface water * * * Alabama has more than 531 square miles of inland water area and 1,091 square miles of total water area."

6. TRANSPORTATION

"Alabama is geographically located in the very center of the southern market, and is the logical hub for shipments to the various distribution centers.

"The Warrior-Tombigbee-Mobile Waterway is luring new industries to its banks at a recordbreaking speed."

7. POWER AND ENERGY RESOURCES

"In Alabama and the South there is a plentiful supply of electric power with rates less than, or comparable to any other region. * * *

"Natural gas pipelines are all over Alabama and the South.

"Energy for industry is one of the least of our worries."

7. DECENTRALIZATION

"In this age of atomic power and threats of recession, industry is looking southward. There is room to expand here.

"If the national economy deflates, the South's new factories will be the last to sag because they are among the newest and most efficient in the Nation."

8. COOPERATION FROM THE PEOPLE OF THE SOUTH

"One thing you don't mark down on the budget sheet, but does show up in the final balance sheet is the friendliness and cooperative spirit on the part of existing industries, community leaders and citizens to incoming manufacturers."

9. NOTHING SELLS LIKE SUCCESS

"For every $1 million spent in new branch plants, the southern people have overmatched that with $15 million for expansion of already established plants.

"The years 1955 and 1956 saw more than $350 million worth of capital investment allocated for new industries and expansions of existing industries, in Alabama. Industry's plans point to another recordbreaking year for 1957."

A Thoughtful Man Looks at Mr. Eisenhower's Performance

EXTENSION OF REMARKS
OF
HON. COYA KNUTSON
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 14, 1957

Mrs. KNUTSON. Mr. Speaker, one of my constituents has a weekly column in a local newspaper. He is George Meyer, who writes for the Badger Enterprise. He is possessed of a charming spontaneity of style which does credit to his original and wide-ranging thoughts. Last week he wrote an article which I feel expresses the reactions of many of my constituents. Under leave to extend my remarks, I request permission to place in the RECORD, his very lucid column Scraps From Here and There from the Badger Enterprise of April 26:

SCRAPS FROM HERE AND THERE

(By George A. Meyer)

Usually in this column I try to make like a Congressman and say what I think most of you would like to have me say. That's because I'm a modest, peace-loving guy who would do practically anything to keep out of trouble. But once in a while I get a bullheaded streak and say what I please on an unpopular subject, without worrying whether anybody agrees with me or not. This just happens to be one of those rare occasions.

Last week I quoted Senator GOLDWATER as saying in the CONGRESSIONAL RECORD that this $72 billion budget of Ike's is a deplorable departure from the kind of leadership we've had during the past 4 years. Well, as a Congressman would say, let's take a look at the record. Or, as a former boss of mine used to say, "Let's get the dope, Kid, let's get the dope."

Eisenhower promised peace, parity, and prosperity in order to win the election in 1952, and what did we get? The first thing he did was to give away a large slice of our national wealth in the form of tidelands oil. It doesn't help to say it was no giveaway because the Government still gets a small royalty on part of it. We can't blame Ike too much. After he hocked his political future to buy votes, the only honest thing to do was to pay up.

Peace? Sure, if you favor peace at any price, peace based on bribes paid to Arab dictators, peace riding on a truce so shaky that it's liable to blow up in our faces any minute. What has become of the "millions for defense but not one cent for tribute" kind of peace? That's the kind where the flavor lasts.

It's all right to depend on the United Nations to settle disputes, but somebody must hold the line while the U. N. is getting it's equipment ready to move. No use holding back until there's no longer anything left to settle. The Berlin airlift and prompt action in Korea kept the Communists from taking over large areas of the free world. So what did the President do? Let the Reds off the hook in Korea, where they were bogged down, only to have them break out on a new front and gobble half of Indochina.

The action of this administration in offering Nasser help in building the Aswan Dam, then withdrawing that offer, brought on this whole Middle East crisis, which is still threatening to break out into global war at any time. It is on a par with all their other brink of war moves, and this brink location is getting to be not only uncomfortable but expensive. In every case, our Government has talked a good fight, then backed off and allowed the dictators to have their own way. If we depend on footwork instead of punching power to win our battles we'll be on the run for a long time, and this bout is not limited to a specific number of rounds.

Prosperity? Ike denounced the Truman administration as being wasteful and extravagant, promised to cut the budget, reduce taxes, reduce the national debt. He made a good start, then reversed the field. Since then his budgets have gone up steadily until his latest is the biggest peacetime budget in history. The national debt is at an alltime high, with bigger deficits in all departments of the Government. What tax cuts have been for the benefit of big business and folks in the higher income brackets. Wage increases granted labor have been added to the cost of national defense, industrial output including farm machinery and consumer goods, threefold. Big business has prospered magnificently, but the rest of the economy is far worse off than it was in 1952.

For 4 years he was against Federal housing, Federal aid to schools, and the soil bank. Then in 1956, in order to win reelection he was suddenly in favor of all three. He managed to stall Federal aid to schools until the lawmakers of the more prosperous States decided they would be better off without it. The future of that issue is still in doubt, but by advocating it he won a lot of votes last year, and that apparently was his main object.

He favored the soil bank in 1956 for the same reason, then when Congress passed a law containing the soil bank provisions, he promptly wrecked it. He did this by using the soil bank program for disaster relief, paying farmers for flooded or dried-out acres, and by fixing corn support prices to farmers who did not comply with soil bank regulations only slightly below the prices paid those who did comply. Under such a setup, producers could see no inducement for taking good land out of production. The natural result was a bigger crop and a bigger surplus sliding scale support program.

Higher price supports at the start, coupled with acreage controls, could have brought the surplus down to a point where it would be no burden, but apparently that was not what Eisenhower wanted. What he does want is to build up more and more surplus until the Government is forced to drop all price-support programs, and put the farmer at the mercy of finance and industry, just as they were up to about the year 1940.

He may succeed, but in so doing he may also wreck the health and welfare program. The additional millionaires he has created by his methods will hardly be able to maintain it and when the rank and file decide that it is easier to move than pay rent when we reach the point where tax delinquency is the rule rather than the exception, that program will collapse. We'll be lucky if the defense program doesn't collapse right along with it.

Eisenhower may be a great leader, but we didn't want to go in the direction he is leading us. Unless Congress wakes up, and soon, he will succeed in leading us back into economic slavery.

Most of us won't strain our eyes looking for a tax cut right away. What we would like is an income to pay taxes with. Gabriel Hauge, Ike's chief economic adviser (and he should know better because he hails from this poverty ridden district) says he hopes we may possibly get one by 1960. Which is probably a nice way of saying he hopes our votes will be for sale again in the next Presidential election.

We really don't mind eating crow. We're used to it, but we hate to have it sent to us direct from Washington, with directions printed on it yet. Like this story the caretaker at Ballard's used-car cemetery handed me. The Washington Biological Survey put metal bands on wild birds in order to study their migration habits. These bands were stamped "Wash. Biol. Surv." Not long after they got a letter from an angry taxpayer, like this: "Sirs, I shot one of your pet crows, and followed the instructions. I Washeed it, Bioled it, and Surved it, but it still tasted terrible. Are you sure you guys know what you're doing?"

The Late Senator Robert A. Taft

EXTENSION OF REMARKS
OF
HON. JOHN E. HENDERSON
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. HENDERSON. Mr. Speaker, I am confident that the people of Ohio and of the Nation are gratified to learn that the portrait of the beloved late Senator Robert A. Taft, of Ohio, is to be placed in the Senate reception room as 1 of the 5 outstanding Senators of the past.

We, of Ohio, were confident that Robert A. Taft was qualified for the honored selection. Indeed, we would have been

disappointed had his name not been selected. We knew him and loved him. We rejoiced when his conservative convictions which he refused to compromise won for him the admiration of all America in the campaign of 1950.

It has always been my personal belief that Senator Robert Taft could have obtained higher office had he been willing to modify some of his convictions. But, his position in the hearts of his fellow Americans would have been lowered.

His portrait in the Senate reception room, the life he lived, and the principles for which he stood, will serve as an inspiration to those who now, and in future years, will represent his State and his country and to the youth of America who wish to enlist their services and their lives in the campaign to keep America strong, free, and American.

The Day Congress Surrendered Unconditionally

EXTENSION OF REMARKS
OF
HON. CHARLES O. PORTER
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 18, 1957

Mr. PORTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article which appeared in the New Republic on April 29, 1957:

THE DAY CONGRESS SURRENDERED UNCONDITIONALLY

(From a revised American history, published in 1987 by Harcourt-Harcourt)

Nineteen hundred and fifty-seven was the year the congressional revolt that failed. And the man who broke it was Dwight D. Eisenhower. It all began with "Summerfield's Rebellion." Summerfield, a Michigan automobile dealer who had observed at first-hand the success of union sitdown strikers in the thirties, became embroiled with Congress over a request for $47 million in additional funds for operation of the post offices. Although Summerfield had not been very successful in speeding up mail delivery, he was popular among Republicans because he painted mail boxes in patriotic colors.

When Congress refused to open its purse to Summerfield, he closed the post offices over weekends and sharply reduced mail service. Pension checks were delayed. Third-class mail advertisements of spring sales arrived after the sales were over. Within a week the sitdown strike had brought Congress to its knees.

Now this so impressed the White House that it immediately instructed the Bureau of the Budget to survey the entire Government and find out what other agencies could uses the Postmaster General's technique successfully. The study was carried out quickly, and though the Presidential order had been stamped top secret, Doris Fleeson printed it verbatim, and Drew Pearson added a few lines of his own. There were, naturally, some indignant mumblings from the Congress, but no outright revolt—not until, as a result of the Budget Bureau study, Mr. Eisenhower summoned the leaders of Congress to the White House and presented them with the following ultimatum:

Defense Department: Unless the proposals of the Department were pushed through Congress without change, the Strategic Air Command would henceforth be idle on weekends, which would start at noon on Thursday and end at noon on Monday.

Treasury: Unless Treasury's requests for appropriations were honored in full, the Secretary would withdraw all pennies, nickels, and dimes now in circulation, and mint no more.

State: Unless State got the funds it asked for, John Foster Dulles would stop giving interviews to employees of Time and Life, thus depriving the public of its only chance of finding out what American foreign policy really is.

Interior: The National Parks would be closed from June through September.

Agriculture: All price-support payments would cease immediately.

The President thereupon left for Georgia, and the stunned Congress met in extraordinary session to map its counter-strategy. There were weeks of debate; a few thought the President's proposals were a good thing; most didn't, and Congress, not knowing what else to do, went home. Summer came and went, the President became tanned and fit, the stock market slipped, but the Congress stood firm.

Finally, Mr. Eisenhower's advisers, who had got him into the fight in the first place, begged him to relent. Things could not go on this way. The President's unexpected response was so out of character, his aids would not believe their ears. "We shall fight," he said.

And then, as if the gods themselves could no longer abide the impasse, the President accidentally picked up a newspaper one morning and there found a suggestive story. It appears that one day a Republican Congressman struck up a conversation with Representative JAMES ROOSEVELT, Democrat of California, in the House lobby. They were discussing a resolution the House had just passed, telling the President, in effect, to go cut his own budget. "How," asked the Republican of Mr. ROOSEVELT, "do you think your daddy would have reacted to such a resolution?" "I think I know what he would have done," replied the late President's son. "He would have sent back a very courteous note saying he'd be happy to tell Congress where to cut his budget. Then he'd have cut at least one project from the district of every House Member who voted for the resolution."

The effect on Mr. Eisenhower was electric. To the crew of the *Columbine*, now fit and tanned, there was flashed the red alert. Back to Washington flew the President. Within 24 hours, Congress and the country were informed: The extra $1.5 billion authorized by the Senate in the spring of 1957 for pork-barrel projects would be added to the $8 billion previously authorized (but unspent) for "rivers and harbors," and not 1 cent of the total figure would be expended by the Army Corps of Engineers—ever. No Sandy Lick Creek Dam at Brookville, Pa. No Mad River Dam in Connecticut. No Bruces Eddy Reservoir in Idaho. No LaQuinta Channel in Texas. Nothing.

The war was over. General Eisenhower received the congressional surrender in the Oval Room of the White House, in the presence of the Cabinet, the press, his brother Edgar, and the ex-King of Jordan, who happened to be passing through town.

Your Hidden Tax Boost

EXTENSION OF REMARKS
OF
HON. ROBERT W. HEMPHILL
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. HEMPHILL. Mr. Speaker, under leave to extend my remarks in the RECORD I include therein the following editorial taken from the April 23, 1957, issue of the Rock Hill (S. C.) Evening Herald:

YOUR HIDDEN TAX BOOST

Was it a little tougher to pay Uncle Sam income tax this year?

If it was, here's a reason you may not have thought of:

Prices rose last year. So did many wages. But the personal income tax exemption you could claim for each dependent remained at $600.

This meant that, although your cost of supporting each dependent went up, the Government did not consider this in its allowance for exemptions. This amounted to a hidden tax boost.

The result was that, you received higher wages to help you keep up with higher living costs, the Government taxed part of it away.

Storm Over Budget Brews on Hill

EXTENSION OF REMARKS
OF
HON. JOHN W. McCORMACK
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks I include a discerning and appropriately written article by Marquis Childs entitled "Storm Over Budget Brews on Hill" appearing in the Washington Post and Times Herald of May 1, 1957.

It will be interesting to see if President Eisenhower will show, as stated in the article, more effort and determination in behalf of the essentials of his program than he has demonstrated during the past 4½ years. If so, he will have to evidence that leadership among his own party, not only in Congress, but with Secretary of the Treasury Humphrey. For the rollcall votes of this session show that a clear majority of the Pesident's own party (Republican) have consistently voted against his recommendations.

The test of leadership that faces the President is whether he can get his own party to follow and support him.

The article follows:

STORM OVER BUDGET BREWS ON HILL

(By Marquis Childs)

Democrats returning from the Easter recess are voicing their indignation over what they heard back home from prominent Republicans. This was no less than a demand that they, the Democrats, cut President Eisenhower's $72 billion budget or take the political rap for "big spending."

Those Democrats who have felt obligated to support foreign aid, school construction, and other measures Mr. Eisenhower has called for are beginning to ask why they should deliberately put themselves in the line of fire from the Republican right wing. The reaction to the stop-the-spending propaganda being lavishly poured out in many parts of the country is bad news for the President's program.

In Oregon, an advertisement in newspapers denounced the spending spree, demanding that Uncle Sam come to his senses and start living within the income we can afford. The advertisement was sponsored by six corporations, including the Hyster Co. of Portland, of which Ernest Swigert, president of the National Association of Manufacturers, is the head.

The advertisement, which quotes the President as saying he hopes Congress will cut the budget wherever it can, asks voters to write to Senators WAYNE MORSE and RICHARD NEUBERGER, and to Representative EDITH GREEN, all Democrats.

In other words, here were Republicans calling on Democrats to defeat the President on issues he has repeatedly said are vital. If there are to be any large budget cuts, they must come out of foreign aid or defense, and the President has said that cuts in aid will be damaging to American foreign policy.

This is a pattern that is becoming repetitious. Last year, in response to an urgent appeal from Secretary of State John Foster Dulles, who said he spoke with the authority of the President in behalf of aid for Yugoslavia, NEUBERGER voted with the administration. Yet when he went back to Oregon some Republicans accused him of being pro-Communist because of his vote to give economic help to Marshal Tito.

Senator WILLIAM F. KNOWLAND, the Republican leader of the Senate, and Senator STYLES BRIDGES, chairman of the Republican Policy Committee, both opposed the President on aid for Yugoslavia.

The pattern, NEUBERGER and other Democrats complain, is one of having your cake and eating it, too. When NEUBERGER ran for the Senate in 1954, Senators GEORGE W. MALONE, of Nevada, and HENRY C. DWORSHAK, of Idaho, went into Oregon to campaign against him on a "back Ike" appeal. Yet the Congressional Quarterly record of votes for the 1956 session of Congress shows that NEUBERGER supported the President on foreign policy on 95 percent of all rollcalls, while the record for MALONE was 27 percent and for DWORSHAK 36 percent.

Shortly before Members of Congress went on their Easter holiday the House defeated an amendment which would have cut the appropriation to support international commissions in which the United States has an important role.

Of the 166 House Members who voted for the cut, 99 were Republicans and 67 were Democrats. Of the 205 who voted against the cut, 128 were Democrats and 77 Republicans. Speaker SAM RAYBURN sputtered indignantly that once again the Democrats had to come to the rescue of the Republican President.

Democratic leaders in both the Senate and House complain that there is little or no effort on either side of the Capitol to rally support for the President among the members of his own party. More often than not the attitude is one of indifference or private opposition to what the White House wants.

Returning from his golfing vacation at Augusta, Ga., the third play-rest-work interval since the first of the year, the President will have to face up to the revolt over the budget. In the words of one of his congressional critics, he will have to fish or cut bait. He will, in short, have to show more effort and determination in behalf of the essentials of his program than he has demonstrated during the past 4½ years.

Poland's National Day

EXTENSION OF REMARKS
OF
HON. FRANK J. BECKER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. BECKER. Mr. Speaker, May 3 commemorates the anniversary of the enactment of the first democratic constitution in Poland. Yet, today finds Poland struggling valiantly against the dominating fist of Soviet Communist Russia.

Under the handicap of this terrible tragedy, the people of Poland never cease fighting for their freedom. Their courageous uprising at Poznan last June, and the Polish October events, point up the fact that the rank and file of the Polish people will not rest until they are free again.

The United States can always be proud of the people of Poland and their descendants who settled in the United States. Their help in building this country to its present greatness can hardly be estimated in terms of statistics.

The people of Poland have proven conclusively, during the past year, that they can rise again and, by their demonstrations, wholeheartedly reject Soviet control of Poland and Communist dictatorship. All peoples of the free world will join in a frevent prayer on this anniversary that freedom for the people of Poland will not be too far in the future.

"National Origins" Should Be Kept in Immigration Law

EXTENSION OF REMARKS
OF
HON. FRANCIS E. WALTER
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Saturday Evening Post of April 20, 1957:

"NATIONAL ORIGINS" SHOULD BE KEPT IN IMMIGRATION LAW

Those who oppose immigration laws based upon the national-origins system would burn the barn to roast the pig.

The national-origin system means that new arrivals to our shores would not upset the balance among racial and national groups which now exists. The system was adopted in 1924, after years of debate. It was described as sound democratic policy by Robert C. Alexander in last spring's issue of Law and Contemporary Problems, published at Duke University. Mr. Alexander was engaged from 1938 to 1954 in advising upon immigration and refugee matters in the State Department. The principal provisions of the 1924 law were codified in the Immigration and Naturalization Act of 1952 (the McCarran-Walter Act) after 5 years of public hearings and study.

President Truman appointed an executive commission which spent 2 months in organizing, one in listening to selected opponents of the act, and another in writing a report. The document was of tremendous propaganda value for the national committee to repeal the McCarran Act. It excited the interest of the Senate's Internal Security Subcommittee, which attempted to extract from Abner Green, executive secretary of the Committee for Protection of Foreign Born, an admission that he had a part in setting up the Committee To Repeal the McCarran Act. Green took the fifth amendment on every question relating to the committee.

Of course, there are many sincere opponents of the national-origins system. Most of their strength is in the big eastern and northern cities where most descendants of recent immigrants live. Support of the present system lies mostly in the people on the farms, in the villages, towns, and smaller cities.

We should open the door for as many worthy aliens as we can. But we must hold fast to our policy so that the cultural characteristics of our population will not be materially altered.

Taxation Without Representation

EXTENSION OF REMARKS
OF
HON. H. R. GROSS
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. GROSS. Mr. Speaker, on April 16 I offered an amendment to H. R. 6871 to cut the appropriation for United States contributions to international organizations. The amendment was tentatively adopted, but was later rejected on a rollcall vote.

In support of the amendment, I referred to a meeting of the United Nations Educational, Scientific, and Cultural Organization in New Delhi, India, at which time the United States contribution to UNESCO was raised, despite the opposition of the United States delegation.

The Boston Daily Record commented on this matter in an editorial appearing in the April 29 edition, and I desire to include the editorial as part of my remarks:

"UNCLE SUGAR" BECOMES "UNCLE SAP"

Representative GROSS, Republican, of Iowa, called the attention of his colleagues the other day to the manner in which the expenditures of the Federal Government are increased by international authority, without American consent and even over American objections.

There had been a conference of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) in New Delhi, India, at which an increase in the American contribution to the expenses of the organization was proposed.

The American delegate objected strenuously to the imposition of new tax burdens upon the people of the United States, but the delegations of 27 nations supported it, with only 20 opposed.

Ironically, as Mr. GROSS observed, 6 of the nations voting against the United States on the matter are delinquent in their own UNESCO contributions.

The effect of the action is exactly what he suggested, that the nations which have not lived up to their own obligations have succeeded in shifting their burdens to the United States.

But Mr. GROSS notes an infinitely more offensive phase of the matter. What it all boils down to is this, as he remarked:

"In other words, 27 nations had the power to levy on American tax dollars."

The indignation of the Iowa Congressman is widely shared.

The UNESCO organization is highly controversial, and the Senate Internal Security Subcommittee has called it "by far the worst danger spot from the standpoint of disloyalty and subversive activity among Americans employed by international organizations."

But even if UNESCO is the useful organization its supporters believe it to be, it is still a gross imposition upon the American people that their tax burdens can be increased by the sole authority of an international body

in which our own country has only one voice among nearly half a hundred.

When nations that do not bother to pay their own share of the costs of UNESCO can and do pass the whole load over to the American people, then the old appellations of "Uncle Sugar" and "Uncle Sap" have new and unpleasant meanings.

The enormous and sometimes wasteful expenditures of our own Government are notorious, but at least they are made with the authority of the American people, however mistakenly.

This illuminating experience with UNECSO suggests that we are not so far as we thought from the days of the Boston Tea Party, when taxation without representation touched off the first bonfires of national indignation.

Max Abelman's 70th Birthday

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 25, 1957

Mr. ANFUSO. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to insert the text of a resolution introduced in the New York State Legislature by Assemblyman Bernard Austin, of my district, in honor of Max Abelman, who celebrated his 70th birthday on January 26, 1957.

Mr. Abelman is one of Brooklyn's leading citizens and is often referred to as Brooklyn's ambassador of good will. The text of the resolution is as follows:

Concurrent resolution honoring Max Abelman, Brooklyn's ambassador of good will, upon the occasion of the 70th anniversary of his birthday

Whereas the Borough of Brookyln in the city of New York is proud of its many distinguished citizens in the realm of every human activity; and

Whereas by citation issued on October 5, 1949 by the Borough President of the said Borough, Brooklyn's favorite son Max Abelman was honored with the designation as "Brooklyn's ambassador of good will"; and

Whereas the 26th day of January 1957 will mark the 70th birthday of Max Abelman; and

Whereas by his lifelong devotion to the constructive endeavors of philanthropy and his zealous championship of the cause of civic betterment he has given expression to the highest ideals of Americanism and good citizenship; and

Whereas his dedicated and unremitting service to the cause of bringing about better understanding and reciprocal esteem among all people without regard to race, creed, color, or national origin was evidenced by the special diploma of honor awarded to him by the University of Manila, Republic of the Philippines, on December 8, 1955; and

Whereas the noble career of Max Abelman has been an inspiration to his fellow citizens not alone in Brooklyn but throughout the State of New York: Now, therefore, be it

Resolved, That the members of the Legislature of the State of New York, on behalf of themselves and all of the people of the State, extend to Max Abelman their heartiest congratulations upon his forthcoming 70th birthday and their sincere wishes for many more years of good health and happiness; and it is further

Resolved, That a copy of this resolution, suitably engrossed, be transmitted to Max Abelman.

The Last Days of Abraham Lincoln

EXTENSION OF REMARKS
OF
HON. WILLIAM H. AVERY
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. AVERY. Mr. Speaker, the following is a radio lecture delivered by Rev. Frank R. Jenkins, Clifton, Kans., over radio station KMAN of Manhattan, Kans., on The Last Days of Abraham Lincoln.

Reverend Jenkins has devoted much study on the life of Lincoln. I think that no one will question that he has now become an expert and authority on Abraham Lincoln. I recommend that the Members of Congress read this excellent presentation. It clearly indicates that Reverend Jenkins has a thorough knowledge of the subject of Abraham Lincoln.

The radio lecture follows:

THE LAST DAYS OF ABRAHAM LINCOLN

My friends. We deem it a privilege and a pleasure, for the opportunity, through the kindness of this station KMAN, to bring this vital message to you: a few bits of information which we have gathered and gleaned from the various sources, through study and research for 45 years, on this gruesome and vital subject, that has been resolved into an hour-long lecture, which has been delivered at various times and places.

It will be 92 years at 10 o'clock tonight, April 14, of this year, since the assassination of Abraham Lincoln.

Please permit us to read two verses of a poem, which was his favorite.

"Oh, why should the spirit of mortal be proud?
Like a swift, fleeting meteor, a fast flying cloud,
A flash of the lightning, a break of the wave,
Man ceases from life, to his rest in the grave.

'Tis the wing of an eye, 'tis the draught of a breath,
From the blossom of life, to the paleness of death,
From the gilded saloon to the bier and the shroud:
Oh, why should the spirit of mortal be proud?"

Can we imagine anyone who would prize this gloomy poem entitled "The Vanity of Human Pride," written by William Knox? Yes; there was one who prized this homely poem. As someone has recently written, "If one should try to follow a single trait in his character, it would require a lifetime of study. For it is our desire to observe some of his activities on the 14th of April, the year of our Lord 1865. And just think that 1,865 years before, another young man, in the prime of His life, was nude and bleeding, and hanged on Calvary's Cross and prayed, "Father forgive them, for they know not what they do," and soon "yielded up the ghost."

Our hero had gone through many Gethsemanes. And as Carl Sandburg, in a recent radio broadcast said, "No one but his Heavenly Father knew the hours of mental and spiritual anguish, which Abraham Lincoln passed through, many countless nights, alone, walking up and down, or upon his knees, in mental torture, in the rooms of his quarters in the White House, praying and agonizing with his Heavenly Father, to guide and direct him to find the solution to the seemingly, unsolvable, problem, how to end the years of strife, anger and sorrow."

Death had come into their home and removed 11-year-old Willie, which nearly prostrated the parents. But he carried on.

It was true that the Civil War had practically ended. While there were minor skirmishes, between small detachments of soldiers, of both sides, and General Sherman had about completed his campaign against General Johnson, the news of victory was momentarily expected.

The war had practically ended on Sunday, April 9, 1865, when General Grant and General Lee had signed the articles of unconditional surrender at Appomattox Courthouse in Virginia.

In Washington it was a time of rejoicing. Torchlight processions were held at night. Martial music from fife and drum corps and military brass bands, could be heard frequently.

President Lincoln was called upon for appearances and addresses at the various functions and gatherings—relative to celebrating the victory. Men in the blue, both black and white of face, and some in gray, were seen on the streets.

Easter Sunday was to be devoted for praise and thanksgiving, in the churches. First for the risen Savior, and next for the great victory in crushing human slavery and preservation of the union. And we think that many wonderful sermons and discourses were prepared to be delivered from the various pulpits. And then on Monday was to be a nationwide celebration for victory, and with the presence of President Lincoln and General Grant, the stars and stripes were again to be raised on battered Fort Sumter.

In letters of large type, was a sign which could be read from a distance both day and night, that was a passage of scripture, taken from Psalms and read: "This is the Lord's doing: And it is marvelous in our eyes."

It was on the new dome, and placed there under the direction of War Secretary, Edwin Stanton.

Such was the background for our drama. We can scarcely touch the events of April 14, 1865, the last day of his life.

Please pardon this explanation, and you will understand better his thoughts and inner life.

Subversives had threatened his life often. Even before his inauguration in March 1861.

His former law partner said of him that he was a fatalist and always said that his death would be by violence. This idea which he had, originated in his mind, when as a small boy he attended the church services at Pigeon Creek meeting house and other places of worship, and listened to backwoods Baptist preachers deliver their sermons on the doctrine of predestination and foreordination.

The late Dr. W. E. Barton said of him along that line. "While Abraham Lincoln was a devout believer in God the Father, and Jesus Christ as his guide and helper, he had no faith that any precaution of his, would avert whatever destiny was in store for him."

He once remarked to Harriet Beecher Stowe, the author of "Uncle Tom's Cabin," that he did not expect that his life would be extended long after the ending of the Civil War.

Yet he said to others that he knew that God had a place and program for him to fulfill, and he had faith to believe that he would be permitted to carry it out.

Before proceeding, we wish to call the roll of those inspired by the devil to seek his life.

John Wilkes Booth, a drunken egotistic, former actor and dramatist, and also an acrobatic performer.

His activities and companions were among the subversives and the bar rats. He was shot by Sergeant Boston Corbett, a member of a military police squad, who had been

searching diligently for him for several days. He and Davey Harrold had hidden in a tobacco barn on the Richard Garrett farm in Virginia early in the morning of April 20. His suffering was excruciating to say the least. He is buried at the foot of his parents' grave in a cemetery in Baltimore, Md.

President Grant made this stipulation to his brother, Edwin, who requested that his brother's body be exhumed from a grave in an unused and unidentified prison cell around Washington. The reburial had to be done secretly and at midnight. Only the head sexton was present as witness, besides Edwin.

A magazine article has recently been written by one of the numerous debunkers claiming that Booth was never killed—it was someone else. What a mistake and misrepresentation. As soon as he died from his wounds at seven in the morning of April 20, 1865, prominent surgeons and doctors, on a steam launch, in a stream nearby, examined every inch of his body, and made proper certificates and affidavits confirming his identity. We have copies of their certificates. His relatives identified his body before the final burial.

We wish to say that the old Boston Corbett homestead is located in the Phoenix school district, 8 miles south and 2 east of Concordia, Kans.

Mrs. Mary Surratt, an owner of a saloon and tavern in Surrattsville, 10 miles south of Washington, D. C., and owned and operated a rooming house on corner of East 11th Street in Washington, a mother of a grown son and adult daughter, Anna.

She figured prominently in the assassination plot, regardless of the claims of the debunkers of her innocence and unjust execution.

She was hanged on July 9, 1865, from gallows erected in an abandoned military prison yard below Washington, D. C.

Lewis Powell or Payne, with additional aliases, a professional murderer and bank robber, who is said to have been hired to be one of Booth's main members of his gang, and who tried to kill Secretary William H. Seward, the night of the assassination, by stabbing him on his sickbed, was hanged the same time and on the same gallows, with Mrs. Surratt.

Davey Harrold, a brainless, shallow, young character, and was Booth's booze companion, and on account of his wide acquaintanceship with some of the drinkers and subversives of Virginia, Maryland, and in and around the city of Washington, was valuable to Booth on account of his pliable character. He was executed with Mrs. Surratt.

George Atzerodt, a mason and a plasterer from Tobaccoport near Washington. He loved his booze.

Thursday night, 2 weeks before the assassination Mrs. Surratt and Booth gave him a sum of money to pay for his room and board in the Kirkwood house, where Vice President Johnson had rooms. Also they furnished him with a large Bowie knife and revolver to kill Johnson. He was executed with Mrs. Surratt.

John Surratt, a son of Mary Surratt, a member of the secret service in the Confederacy. After the assassination of President Lincoln, disguising himself as a woman, he escaped to Canada, later went to Europe and joined the Swiss Zouaves of Rome. He changed his name, but was recognized by an acquaintance, who informed President Grant, who issued extradition papers for his arrest and return. But he again escaped and went to Egypt, where he was recaptured and returned to the United States, and tried before a military court, who found him guilty of being a spy and in the plot, but as his mother was executed for the same crime, he was released later.

Doctor Samuel Mudd, Lewis Spangler, Michael O'Laughlin, and Sam Arnold, were tried, and found guilty and sentenced to Jefferson Fortress, on Dry Tortugas Island in Florida. After serving 4 years, all with the exception of Sam Arnold, who died in prison, were released.

Lt. Cols. Jacob Thompson, Clement Clay, and Larry McDonald, of Toronto, Canada, were deeply involved, and price placed upon their heads, by authorities in the United States. They never ventured across the border to the United States, for had they taken this step, they would have received what they deserved. History should record them, as murderers in the plot. Lt. Col. George Y. Beals, a veritable Quantrill along the border. By the order of President Lincoln, he with a number of his cut throat, renegade band was captured, and all hanged. He was Booth's close friend.

Let us note some of the happenings to Lincoln on his last day.

In his early morning walk he greeted a group of men—Senator Charles Sumner in this group.

His talk later with General Harbord telling him of his dream a few, nights previous, while in his sleep he heard the sound of weeping coming from the rotunda in the Capitol. Looking in, he saw an assemblage of people gathered around the catafalque weeping. On the catafalque rested an open coffin. In it was himself. General Harbord replied and with some vehemence. "Mr. Lincoln, that is a premonition sent from God, and I plead earnestly with you, do not go near Ford's Theater tonight."

After his return from his walk, different groups came in to see him. Some for political business, others for friendly visit. To the first group he did not give much satisfaction, but resumed his visit with old friends and acquaintances from Kentucky, Indiana, and Illinois.

Cabinet meeting was called for 11 o'clock. General Grant was to be the honored guest. The sentiment expressed by Lincoln to those present was gratefulness to God for his directing power and leadership in causing the war to cease.

In guiding us in the preservation of the Union, also in helping and blessing in the work of liberating an enslaved people. His prayer for peace was not only for the Nation but for the world.

As for the reconstruction program, he wanted the full support of his Cabinet. He was anxious for those present to work with him for a definite program, free of hate and revenge toward the people of the South. For they had suffered much. Continuing along that line, stating that there must be no reprisals and no executions, as there had been too many lives lost. "Now," said he, "as to the leaders, if you want to scare them off like sheep and run them out of the country, that would be all right, but I will not countenance nor consent to any public hangings."

He also mentioned about a dream that he had the night before. "I had this dream the night before the first battle of Bull Run, the night before the battle of Gettysburg, the eve before signing the emancipation proclamation, and last night. Now I do not think it is a portent of evil, but I think that it is an omen of good. We have not heard as yet the outcome of General Sherman's campaign against General Johnson, but I believe that it has been successful, and we can expect that report from him any time."

The dream as he described it was that "he was on a shapeless, swiftly vessel, alone, sailing rapidly toward a dark shore." Not much business to transact and the Cabinet adjourned (as for him, forever).

After the Cabinet meeting and before luncheon, a group of persons came in his office to see him and asked him if he did not fear the many threats made upon his life. He turned to his desk and opening a drawer lifted out a large bundle of letters tied with tape and holding them up he said, "All these letters threaten my life. But I am not fearful."

After luncheon he visited with more friends, and at 2 o'clock Mary sent word that it was time for their daily drive. He had requested that no guards were to ride with them that day. Leaning back in his seat, and resting his head on the top back, the conversation was something like this: "Mary, you and I have passed through a great deal, with the taking of Willie, and the hours of grief and anguish, not only because of this, but the awful war and its heartaches and sorrow, that we have borne with countless others. But through God's great mercy we are beginning to see the dawn through the dark clouds of night. Our Nation has been saved and the slaves emancipated. And I am thinking that if and when we complete the new term of the Presidency, perhaps moving to Chicago, or returning to Springfield, where I will resume my law profession until time of retirement But when we retire, I hope that you and I can visit the capitals of the world, but my greatest desire is to visit Palestine, where I can walk in the footprints of my Saviour."

The time is near at hand for our conclusion. So much must be omitted. President Lincoln was fatally wounded in the President's box in John Ford's theater at 10 o'clock. He died at 7:22 and 10 seconds on the morning of April 15, 1865.

He had been there with Mary. General and Mrs. Grant were invited as their guests with them in the box. But perceiving the plot, they left on the 6 o'clock passenger train for Burlington, N. J., to be overnight with their children.

Disappointed, Mary invited her friend, Miss Cora Harris, daughter of Senator Harris of New York, and her fiance, Major Harry Rathbone to be their guests at the theater to witness Jeremy Taylor's comedy, Our American Cousin.

The late Col. Henry G. Watterson of the Louisville Courier Journal, Louisville, Ky., said: "In that group tragedy left its mark. First, the assassination of President Lincoln, the mental derangement of Mary, the tragic death of Miss Harris shortly, by accident, the shooting of Major Rathbone, which was practically a duel."

The end came on a dismal, rainy, Saturday morning, the flags and bunting symbolizing victory, were now wet and bedraggled, as if in grief.

It had been an awful night of watching and anxiety, in the death chamber in the Peterson rooming house directly across from the theater. In the room at the time of his passing were doctors, Major General Barnes, Stone, Leal, and Robert. Dr. Phineas Gurley, pastor New York Avenue Presbyterian Church in Washington, attended faithfully by Lincoln and Mary a member, Lincoln was not a church member. Chief Justice Salmon P. Chase, some members of the Cabinet, Edwin Stanton, and Gideon Wells, some Members of the Senate, including Charles Sumner, and Gideon Wells; some of the miliary. Vice President Johnson was not present. Prostrated, Mary in an adjoining room with friends. When he was pronounced dead, Secretary Stanton, with tears running down his cheeks, said, "Now he belongs to the ages."

How soon joy was changed to sorrow. Vice President Johnson was sworn in as President, at 9 o'clock, on that dismal, rainy, Saturday morning. Time will not permit to go into detail of the elaborate, funeral arrangements, beginning in the Capitol in Washington, with Doctor Phineas Gurley preaching the sermon, and Bishop Matthew Simpson, of the Methodist Episcopal Church, a close friend of the President, leading in prayer, on April 19. On Friday morning, April 21, the sad cortege, by special train, made its way, stopping in Bal-

timore, Harrisburg, Philadelphia, New York City, Albany, Buffalo, Syracuse, Rochester, Cleveland, Columbus, Indianapolis, Chicago, arriving in Springfield on May 2. On May 4, the hearse and procession made its way to Oak Ridge Cemetery, one-half mile distant from the Capitol. Prayers were offered by Rev. Albert Hale, and scripture reading by Rev. N. W. Minor, both Springfield pastors. Then was read the greatest of all Lincoln's State papers, his second inaugural. The funeral oration was delivered by Bishop Matthew Simpson, "a worthy tribute to a great man." The closing prayer was offered by Doctor Gurley. The bodies of the President and Little Willie were placed in a temporary vault. Truly that last service at the grave, and all present, was the most elaborate service and attendance that the Nation has ever seen.

Permit us to quote from the last paragraph from the late Henry G. Watterson's oration on Abraham Lincoln, as we saw and heard him on that memorable night, in the Kansas State College auditorium, in January 1908.

We will have to paraphrase this paragraph, as we do not have the exact copy of the wording.

"Born into the world like the babe of Bethlehem of lowly parentage, amid hardship and poverty. By unceasing labor and diligent application in striving for an education through the school of hard knocks."

Cherishing in his heart, while in youth, a secret ambition to free an enslaved people, fitting and equipping himself for this task, by perserverance and hard labor and study, in order to attain his goal, and as a result being elevated to the height as Chief Executive, at a time when it semed like the Nation would be dissolved.

Through the goodness and mercy of Almighty God, whose help he relied upon continually, brought about the preservation of our Nation, the striking off the shackles of an enslaved people, and making our Nation as one. It seems like to me that he was a leader like Moses and the prophets sent from God to perform a certain task, and having fulfilled that duty, like Enoch and Elijah, "He was not for God took him."

In conclusion, we wish to quote the last four clauses in Lincoln's memorable Gettysburg Address.

"That we here highly resolve that these dead shall not have died in vain—that this Nation under God shall have a new birth of freedom—and that the government of the people, by the people, for the people, shall not perish from the earth."

We thank you.

Low Tariffs and Reciprocal Trade Agreements

EXTENSION OF REMARKS

OF

HON. WILL E. NEAL

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. NEAL. Mr. Speaker, advocates of low tariffs and reciprocal trade agreements seem inclined to disregard the plight of small businesses that find it necessary to complain against the importation of foreign-made products. I hereby submit the petition signed by more than 500 employees of the O. Ames Co., Parkersburg, W. Va., decrying the fact that imported shovels and tools are making it necessary for them to limit production and thereby reduce employment in an old, established manufacturing institution that has provided steady employment to the workers of Parkersburg for many, many years.

As stated above, in addition to the names listed, more than 500 signatures have been appended to this petition, as hereby submitted for the benefit of Members of Congress who represent many areas of the United States where similar small industries are being adversely affected in like manner.

The petition follows:

We the undersigned, members of Local Union 1651, United Steelworkers of America, AFL–CIO, and employees of the O. Ames Co., in Parkersburg, W. Va., petition you to take some action in our behalf.

Our livelihood depends on our work at the O. Ames Co. Our principal product is the manufacture of shovels, and the sales and production of our company are being seriously affected by the importation of cheap and inferior quality German and Japanese shovels. These foreign shovels are produced with cheap labor and of inferior materials and are being sold in the United States at a price which is only two-thirds of the price for which our company can afford to sell their cheapest shovels. This has come about due to the fact that over the past few years the import duty on these foreign shovels has been reduced from approximately 30 to 7½ percent.

Our company is one of the larger companies in this area, employing over 800 employees. We are concerned about our welfare and our livelihood. We respectfully request that you take some action to have this import duty restored to its former 30 percent.

Yours very truly,

JAMES F. THOMAS.
CLINTON B. WILCOX.
LOUIS A. HERRES.
JOSEPH L. WILLIAMS.
PRESTON T. HOLDEN, Jr.

Bad Advice or Misinformation?

EXTENSION OF REMARKS

OF

HON. ROBERT W. HEMPHILL

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. HEMPHILL. Mr. Speaker, under leave to extend my remarks in the RECORD I include an editorial taken from the April 25, 1957, issue of the Fort Mill (S. C.) Times.

BAD ADVICE OR MISINFORMATION?

"President Eisenhower is either getting some bad advice or has been misinformed about the plywood and textile industries, two of our State's biggest," said John S. Linton, president of the South Carolina State Chamber of Commerce, today.

Last Wednesday, President Eisenhower, at a press conference, referred to past and present troubles experienced by the two industries due to the lack of restrictions on Japanese imports, and indicated that industry compliments could possibly drive Japan into the arms of Soviet Russia.

"As a matter of record," said Linton, "the textile industry did not, as the President suggested, ask for increased tariffs on Japanese textiles. It did request that reasonable quotas be put on the volume of Japanese goods coming into the United States, and these have been arranged to the satisfaction of everyone concerned—including both Japanese and American textile industries—with the help of the State and Commerce Departments.

"On the other hand, the plywood industry currently doesn't know where it stands from day to day, what with boatload after boatload of cutrate Japanese plywood being landed on the west coast. The effect of this may be good for Japanese plywood mills, but the effect in this country has been a depressed market, unstable prices and short-time work. Actually, 7 plywood plants in South Carolina have had to shut down during the past 2 years because of foreign competition.

"Surely the President doesn't mean to imply that the plywood and textile industries will have to be sacrificed in order to meet the objects of our foreign policy," said Linton. "No one will disagree with the necessity of maintaining friendly and cooperative relations with the Japanese, but caution must be exercised so that certain segments of our economy are not considered expendable."

From our vantage point Mr. Linton's reasoning seems sound.

Resolutions Memorializing the Congress of the United States to Enact Legislation Placing Full Responsibility for Civil Defense on the Federal Government

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include a resolution adopted on April 15, 1957 by the Massachusetts House of Representatives memorializing the Congress of the United States to enact legislation placing full responsibility for civil defense on the Federal Government.

I have always felt that civil defense was a primary part of our national defense, and was the responsibility of the Federal Government.

The resolution follows:

Whereas the Governor of the Commonwealth of Massachusetts, in his special message to the General Court of Massachusetts on January 14, 1957, stated: "I believe civil defense is primarily a Federal problem and should be directed nationally * * * I request the General Court to join with me in urging the Congress of the United States to redefine the responsibility of the State and Federal Government so that the operation of the civil defense program may be vested in the National Government"; and

Whereas the Congress of the United States is now considering H. R. 2125, 1957, which declares that it is the national policy that civil defense should be a Federal responsibility; and

Whereas it is imperative that if such a declaration of policy is to become effective it be implemented by appropriate statutory enactment which actually places full administrative responsibility in the National Government; and

Whereas the General Court concurs with the Governor in believing that the common defense of these United States is and must be a national responsibility: Therefore, be it

Resolved, That the General Court of the Commonwealth of Massachusetts memorializes the Congress of the United States requesting that the Congress give early favorable consideration to H. R. 2125, or similar legislation declaring civil defense to be primarily a Federal responsibility, and through amendment of H. R. 2125, or other legislation, provide effective statutory implementation for such a declaration of policy; and be it further

Resolved, That copies of these resolutions be sent forthwith by the secretary of the Commonwealth to the chairman of the House of Representatives' Committee on Government Operations, the chairman of the subcommittee of the Committee on Military Operations, and to each Member of Congress from this Commonwealth.

House of representatives, adopted, April 15, 1957.

LAWRENCE R. GROVE,
Clerk.

Senate, adopted in concurrence, April 17, 1957.

IRVING N. HAYDEN,
Clerk.

A true copy.
Attest:
[SEAL] EDWARD J. CRONIN,
Secretary of the Commonwealth.

Congress Halts Land Grabbers

EXTENSION OF REMARKS
OF
HON. WAYNE N. ASPINALL
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. ASPINALL. Mr. Speaker, the House recently approved legislation designed to limit and control military withdrawals of public lands. This action has met with enthusiastic approval on the part of those interested in the wise use of our public resources. As an evidence of this I would like to include as a part of my remarks two editorials from the Denver Post, of Denver, Colo. These editorials are loud in their praise of the action of the House in reasserting its jurisdiction over the public lands of the Nation.

Additionally, these editorials point out the credit that is due to our colleague, the Honorable CLAIR ENGLE, of California, in obtaining the passage of this important legislation. Finally, these editorials speak clearly on the value of this legislation and I recommend them to all who wish to understand the issues involved.

The editorials follow:

[From the Denver Post of April 25, 1957]

CONGRESS HALTS LAND GRABBERS—I

Congress may be going to clamp down on military land-grabbing and reassert its own constitutional authority over public lands, their uses and disposition. It is about time.

In the last 20 years, defense agencies have pyramided their holdings from 3 million acres in the United States to more than 30 million, including 17 million acres of public lands in continental United States. This is an area larger than the States of Ohio, Kentucky, or Tennessee—or 21 times the size of Delaware—plus a chunk of Alaska as big as Connecticut.

Now, under a House-passed bill pending in the Senate, the military land acquisition in parcels of more than 5,000 acres would have to be approved by Congress.

The overwhelming House vote was both a personal victory for Representative CLAIR ENGLE and another testimonial to his long and valuable service in the public interest. For 15 years, the northern California Democrat, who also served so nobly in the upper Colorado River storage project battle, has fought in Congress to get the military to reevaluate their property holdings, policies, and procedures.

Now ENGLE's House Interior and Insular Affairs Committee has documented defense land acquisitions as one of the most wasteful land grabs of all time. For example:

For a year and a half, ending in mid-1956, the military ticked off 5 more acres of public land with every minute of the day and night. And if applications for another 8.7 million acres had gone through, 11 acres would have been gobbled up during every minute of that 18-month period.

As of February 1956, a total of 49 temporary World War II military land withdrawals of 11.9 million acres in 10 States and Alaska were still in effect, although they were supposed to revert to the public domain no later than October 1952.

An Air Force board reported in October 1956, that 40 percent of the Air Force's 14.4 million acres were not even needed. These excess military lands equal a strip of land nearly three miles wide from New York to San Francisco.

The same board found 9 Air Force bombing or gunnery ranges, covering 5.1 million acres in 8 States, had been closed to hunting and fishing without justification. Another 6.7 million acres—enough to support 67,000 cattle and 420,000 sheep for a year—were closed to grazing and agriculture without justification on 12 other Air Force ranges.

More than 500 square miles of western Utah, held by the Wendover Bombing Range for 15 years, never has and never will be used because it is traversed by a major railroad, highway, pipelines, and a commercial air route.

More than 233 million acres of the oil-rich Continental Shelf off the Nation's shorelines are already withdrawn for military purposes, and another 140 million are sought. One of these alone would produce $250 million in oil royalties, but the Navy won't give it up and test missiles elsewhere. Instead, the Navy wants to extend its grip on this area when it already holds 16,000 square miles (13.8 million acres) of the Gulf of Mexico and controls or seeks a total of 236,000 square miles (198.7 million acres) off the Atlantic and Pacific coasts.

A superballistics range 100 miles square was proposed on public lands near the bustling metropolis of Albuquerque, N. Mex., when remote, little-used lands were available—and finally substituted—on the Navaho Indian Reservation.

The Navy suddenly announced it was taking over a strip of land 20 to 30 miles wide and 150 miles long through a California national forest, but eventually went elsewhere.

To get all these lands, the military had only to ask the Interior Department for them, in the name of national security. When they were handed over, all activities were halted—grazing, mining, hunting and fishing, water development, conservation, etc.

All kinds of abuses followed; and when the lands had served their purpose, they reverted, not to the public domain but to the General Services Administration to be peddled as surplus.

For example, ENGLE's diligent committee found that during the deer season just ended at Camp Hill, Va., where only 97 Army personnel and 85 civilians are permanently assigned to a 77,000-acre base, a total of 6,250 persons were permitted to hunt—and 4,505 of them wore uniforms. At the Nellis-Tonopah Air Force range in Nevada, when 1,800,000 acres were released, the land was so contaminated with unexploded ordnance that it would cost $10 an acre to make it safe for ordinary civilian use.

These and other galloping excesses, at long last, have been exposed by ENGLE and his committee in an all-too-uncommon demonstration of congressional thoroughness and responsibility. A concluding editorial to follow will explain how his bill would restore congressional authority over the public lands which the military has so scandalously, and so obviously, abused.

[From The Denver Post of April 26, 1957]

THE LAND GRABBERS—II

When Congress let slip its constitutional powers over the 450 million public acres grabbed by the military, it committed an error that it is now trying to correct.

The military simply asked the Interior Department for whatever lands it wanted, and it got them—some 48,000 square miles in the United States and Alaska. Much of this land belonged to the public, but once the military moved in all other activities like grazing, mining and recreation were halted.

Sometimes the military apparently didn't even bother to ask before it took over huge chunks of public lands. This is indicated by a recent case in New Mexico where 440,000 acres were chopped out of the public domain for the McGregor guided missile range without any approval at all.

Now Congress is seeking to reestablish its authority to dispose of and make all needful rules and regulations concerning public lands. Under a House-passed bill pending in the Senate, Congress would have to approve all military land acquisitions over 5,000 acres.

This long-overdue measure followed a comprehensive 2-year study by Representative CLAIR ENGLE and his Interior and Insular Affairs Committee.

Not only would the Engle committee bill correct all that, but also it would save untold millions of dollars in defense appropriations—the only place big budget cuts can be made.

Referring to a constructively critical Air Force study of its own land holdings, the Engle committee reported that resulting changes in Air Force land procedures will produce several millions of dollars of direct savings at the outset, and * * * tens of millions of dollars in savings in future operations.

In lauding the Air Force study, the Engle committee asserted that if the same self-analysis were to be applied throughout the Department of Defense we would make a considerable dent in the lump-sum automatic defense appropriation for real property acquisition and administration.

But so far the other defense agencies have failed to comply with an August, 1955, Defense Department directive ordering a thorough reappraisal of land needs and uses by the Army, Navy, and Air Force.

Besides arresting the military land stampede, the Engle committee bill would serve three important subsidiary purposes:

1. It would stop the use of military reservations as exclusive game and fish preserves for the high brass, and require compliance with State game and fish laws as to licensing, bag limits, and seasons.

2. It would develop a multiple-use land system on military ranges to permit grazing, prospecting, and other activities where they can be conducted safely with defense operations.

3. It would require that unneeded military lands revert to the public domain, not to the general services administration as surplus, unless the land character had been sub-

stantially changed, as by construction of an air strip.

Congressmen put added emphasis on the game-fish aspects of the Engle committee bill by singling out abuses in their own States. For example, Representative JOHNSON, of Wisconsin, charged that anything goes at 61,000-acre Camp McCoy—deer hunting by shining, shooting from cars, carrying loaded guns in vehicles, illegal slaughter of does and fawns during buck season—all in utter disregard of State laws.

In Colorado we are fortunate that our military commanders have been conservation-minded men intent on complying with State game laws. Some grazing has also been allowed. But still such large areas as the Lowry bombing range, Rocky Mountain arsenal and Pueblo ordnance depot grounds are strictly posted to the public and only the military can hunt the abundant antelope, deer, and birds on these lands.

Conservationists have long objected to this double standard in hunting and fishing—one for the public, one for the military. As Representative JOHNSON observed, it is particularly disturbing now when so many impressionable young people are just beginning to know and love the outdoors.

Now the public at large should likewise rally behind the efforts of the Engle committee to halt the military raiding of the public domain which poses such a dangerous threat to the shrinking wilderness areas future generations must depend upon.

A Statement of Conscience

EXTENSION OF REMARKS
OF
HON. STEWART L. UDALL
OF ARIZONA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. UDALL. Mr. Speaker, the letter I am appending below as part of these remarks is an eloquent statement of conscience which needs no supporting brief.

The writer of this open letter, Dr. Lambert Davis, is an eminent person in the field of letters who resides in North Carolina:

AN OPEN LETTER

GOV. THOMAS B. STANLEY,
The Capitol, Richmond, Va.

SIR: I have received an invitation from you in the name of the Commonwealth of Virginia and the State chamber of commerce to attend a homecoming reception and dinner for distinguished Virginians as a part of the Jamestown Festival, with a request that I reply to your office.

I assume that I have receive the invitation because I, like Dr. Ulian B. Powell, of New York City, am listed in Who's Who in America as having been born in Virginia. I also assume that if, as happened in the case of Dr. Powell, it transpired that I was an American of Negro ancestry, you would delegate Mr. Verbon Kemp of the chamber of commerce to inform me that the invitation was a mistake. It is therefore not a true invitation, but an offer contingent upon my being able to prove Caucasian ancestry.

As it happens, I am, as far as I know, of Caucasian ancestry. And, if I may be allowed a boast, I think I have done the Commonwealth some service, in the 10 years (1928–38) that I was managing editor and editor of the Virginia Quarterly Review, which was and is the Commonwealth's most distinguished institutional contribution to the world of letters. And I might remark that it was not the policy of the Quarterly to ask any contributor to show proof of Caucasian ancestry. By the Quarterly's standards, distinguished literary achievement was in itself a sufficient qualification for appearance in the magazine.

Although I no longer live in Virginia, I think I have earned the right to take pride in the Commonwealth's achievements and to be critical of its shortcomings. And over the past few years I have watched with increasing alarm, despair, and anger the course that has been taken by the political leadership of Virginia, with you as titular head, in the face of one of the most momentous and complex issues of our time. When—as I well know—sober minds all over the South have looked to the Old Dominion for leadership, you have offered only the barren slogan of massive resistance, the tyrannical suppression of all local freedom, and a mass of witless obstructive legislation that is rightly doomed to the judicial scrapheap. And now you find yourself, on a great and solemn occasion in the history of the Commonwealth, in the ridiculous position of asserting, in effect, that being distinguished is an accomplishment possible only for people of Caucasian ancestry. You have succeeded in making the leadership of the Commonwealth both a stench and a laughing stock in the Nation.

I believe that I can best show my loyalty to the great traditions of Virginia by declining your invitation.

Regretfully,

LAMBERT DAVIS.

Poland's National Day

EXTENSION OF REMARKS
OF
HON. LEONARD FARBSTEIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 6, 1957

Mr. FARBSTEIN. Mr. Speaker, Congress has many times voiced its friendship toward and support of the Polish people on Poland's national holiday, May 3. For many years now these expressions have had to be made in terms of sympathy for a people subjected and oppressed.

This year we can look forward for the first time since the end of war with new hope for a new day in Poland. Poland is not free. But at least some of its bonds have been loosened.

In the economic sphere, several changes have taken place. It is reported that collectivization of agriculture has ceased and that 80 percent of the collective farms have been dissolved and land, machines, and livestock have been returned to the farmers. Individual enterprise on a reduced scale is apparently now permitted and in the past 2 months 20,000 small shops have been reopened.

A certain measure of religious freedom is also allowed. Catholic Cardinal Wyszenski has been released and in his sermons appeals to the Polish nation for patience and endurance.

Politically the Polish people have moved as far toward freedom as their Soviet Communist masters will allow.

This brave and determined people continue to demonstrate again and again their love of liberty and hatred of their Communist masters.

They demonstrated it in the Poznan uprisings in June in the demand for bread, freedom, and the withdrawal of Soviet troops.

They demonstrated it in the widespread expressions of sympathy for the Hungarians in their fight against their Soviet overlords. In every town and village in Poland committees were created for aid to Hungary, although the Polish people themselves have been in serious economic distress.

They demonstrated it when they turned to the West for economic succor, knowing well that such a policy would inevitably arouse the dangerous wrath of the Soviet Union.

The Polish people have dared to take such action although they are in the very nest of the Soviet Communists. Twenty-three divisions of Soviet troops are stationed in East Germany. Another 20 are in Hungary. Some eight are in Rumania and Czechoslovakia and large numbers of troops are in the eastern border of Poland itself.

In the Polish people's struggle to achieve more freedom through evolutionary means their eyes turn hopefully toward the West and especially toward the United States. They realize that in this era of the atom and hydrogen bombs a war of liberation could be a war of annihilation. They know that final freedom cannot therefore come through war. But they look to the West for that political, moral, and economic support which, with its constant pressure on the forces of oppression represented by the Soviet Union, will lead, we all hope, to a restoration of the whole range of Polish rights and liberties.

Our Nation's Budgetary Affairs

EXTENSION OF REMARKS
OF
HON. DANIEL A. REED
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, April 29, 1957

Mr. REED. Mr. Speaker, on April 7, 1954, it was my privilege to speak before the Republican Women's Conference meeting in Washington, D. C. At that time I spoke on the subject of the Republican record with respect to the management of our Nation's fiscal affairs. I recently had occasion to review the remarks that I made at that time. Those remarks are germane to the present-day consideration of our Nation's budgetary affairs. For the information of my colleagues in the House, I would like to include a portion of the remarks I made on April 7, 1954, before that very wonderful meeting of Republican women held in Washington, D. C.:

ADDRESS BY THE HONORABLE DANIEL A. REED, CHAIRMAN, HOUSE COMMITTEE ON WAYS AND MEANS, BEFORE THE REPUBLICAN WOMEN'S CONFERENCE, APRIL 7, 1954

Tax reduction and reduced expenditures have been the traditional fiscal policy of the Republican Party as a formula for achieving a balanced budget and debt retirement. Under this formula, the Republican Party has

dedicated itself to a high standard of living for all the people under a peaceful, free enterprise system.

It was my privilege to serve as a Member of Congress immediately after World War I. In 1919 the national debt was $26 billion. Taxes were at their highest level in the history of the United States. Six or seven million persons were idle and relied for their sustenance on soup kitchens organized in our cities. The issue confronting the American people at that time was how could the Nation's productivity and employment be stimulated.

The Republican Party's answer to that problem was not to plunge the Nation into further deficit financing nor were tax increases resorted to in an effort to foster a welfare State.

The first thing the Republican Party did was to retrench and to eliminate nonessential Federal expenditures. Next in 1919–20, personal income taxes were reduced from 12 percent to 8 percent.

Again, in 1921–23, a cut was made in individual income taxes of married persons by increasing their personal exemption from $2,000 to $2,500 and the exemption for each dependent was increased by $200 to $400. In 1924 the tax rate was reduced from 8 percent to 6 percent; also the tax for 1923 was reduced 25 percent by the 1924 act.

Again in the 1926 Revenue Act for the years 1925–27, personal income taxes were reduced from 6 percent to 5 percent. The exemption for a single person was increased from $1,000 to $1,500 and the exemption for married couples was increased from $2,500 to $3,500. In 1928, for the year 1929, the rate was reduced from 5 percent to 4 percent on personal income taxes.

Did these tax reductions result in further deficit financing and additions to the national debt? Not at all. The 6 or 7 million idle people were put to work. One billion dollars each year 10 years was paid on the national debt. A great decade of prosperity was enjoyed by the people during this period of tax reduction. The budget was balanced each year for 10 years.

In addition to these income tax reductions of the 1920's, many excise taxes, which retarded business expansion and were such a nuisance to the consumer, were either reduced or repealed.

Thus by the reduction of Federal income taxes and war excise taxes in the post-World War I period, business was stimulated, prosperity resulted, the budget was balanced, and the national debt was reduced $10 billion in 10 years.

In the annual report of the Secretary of the Treasury, that distinguished financier and statesman, the Honorable Andrew W. Mellon, once said as follows: "The Treasury Department has always contended that in the long run the taxation of income at moderate rates would be more productive than at very high rates. The soundness of this contention appears to have been borne out by the tax returns under the law of 1926, for both the calendar years 1925 and 1926."

However, we can look to a more recent period for another demonstration of this Republican tax philosophy successfully in operation. I refer to the Republican 80th Congress. In the fall of 1945, the Bureau of the Budget estimated that the administration would have a deficit of over $30 billion for the fiscal year 1946. The economic condition of the Nation was marred by increasing unemployment and the slowing down of business activity.

The issue then was how would we accomplish our objective of providing incentives for business expansion and to increase consumer purchasing power. The answer was partially supplied by the Revenue Act of 1945, which became effective January 1, 1946. It was then estimated that the revenue effect of this legislation would result in a loss exceeding $5 billion. Congress courageously passed the measure in spite of the estimated deficit of $30 billion. Mr. Truman did not veto the bill. This legislation gave relief to both individual and corporate taxpayers. The excess profits tax was repealed for 1946 and later years, and the capital stock tax was repealed. All of this tax reduction program of 1945 was done to forestall threatened economic recession.

Let us examine what happened to the Federal revenues under the stimulating effects of this tax reduction. Our tax receipts instead of being less than the previous year increased an additional $300 million and by 1948 the Federal revenues had increased by approximately $1.7 billion over 1946. Through this tax reduction a scheduled budgetary deficit was converted into a surplus of $754 million for the fiscal year 1947. In the Revenue Act of 1948, taxes were again reduced, and a surplus of $8.4 billion resulted for fiscal year 1948.

In short, the tax record of the 80th Congress reads succinctly as follows: Taxes were reduced $5 billion per year; the budget was balanced for the first time in 17 years; $7 billion was paid on the national debt; a surplus of $8.4 billion was left in the Treasury in 1948. I need not cite the tremendous boom that occurred simultaneously in our economy.

The dynamic qualities that can be fostered in an economy by a sound tax program have been demonstrated by developments in other countries of the world. Canada, Great Britain, and in fact most of the countries of free Europe, have launched a program of tax reduction. As these countries have cast aside their unsuccessful ventures in varying forms of controlled economies and socialism they have undertaken to lend impetus to private enterprise and to restore the fiscal stability of their respective governments through tax reduction. The theory behind this trend has been ably stated by the Honorable R. A. Butler, England's distinguished Chancellor of the Exchequer, when he said, "We must banish the hopeless feeling that extra effort is not worth while."

Concern has properly been expressed that a substantial reduction in the level of Government spending may produce a depressing influence on the national economy activity. In order to offset such a trend the suggestion has been made that a commensurate reduction in Federal taxation should either precede or occur simultaneously with the cut in expenditures. In this connection the following is quoted from an article by Sumner H. Slichter appearing in the Harper's magazine of February 1953. He states the following as the seventh point in the eight-point program to combat recession, and I quote:

"(7) Cut taxes: If individuals and business concerns raise their spending for goods as fast as the Government cuts its defense spending, the total demand for goods will not drop and there will be no recession. The Government can help individuals and business concerns to spend more by taking less from them in the form of taxes. Hence it is important that cuts in defense spending be promptly matched by cuts in taxes."

This wise counsel comes from one of the leading economists in our country who is the economic adviser to some of our Nation's largest businesses.

There is the documented record of the Republican fiscal policy at work. That is the Republican record of keeping faith with the American public by providing greater incentive for productive effort and successfully enhancing the level of our national economy. The greatest beneficiaries of these Republican measures have been the people of small incomes—wage earners, salaried men, and men operating small individual business enterprises.

This Republican policy is certainly a marked departure from the philosophy prevailing during the 20 years of Democratic rule, when 14 major revenue measures were enacted into law increasing taxes. It is a long overdue departure from the New and Fair Deal programs of tax and tax, spend and spend.

State Management of Local Programs Means a Federal Tax Cut Now

EXTENSION OF REMARKS
OF
HON. THOMAS M. PELLY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 18, 1957

Mr. PELLY. Mr. Speaker, like many of my colleagues who were home in their legislative districts last week during the Easter recess, I have returned with renewed determination to do what I can as a Member of Congress to justify a major reduction in Federal taxes through the curtailment of unnecessary Government waste and spending.

The Democratic and Republican Parties alike, Mr. Speaker, had party platforms calling for such a cut in taxes, and to that purpose many Members like myself have introduced legislation. In my own case, I have been frank in stating I would not ask for consideration by the House Ways and Means Committee or support any measure to reduce the revenue of the Federal Treasury without prior assurance that cuts at least in an equal amount could be made in the budget. My own bill, H. R. 5997, would reduce, for example, the Federal revenue by $4.3 billion, nad that, consequently, has been my own goal for a budget cut.

During the Easter recess, I made several public speeches in my home State. In each of these I referred to the Federal grants-in-aid program as a source of long-range economy. I said something every Member of this House knows—that 25 percent of the amount of these grants goes toward Federal administrative and other costs on the national level. In other words, if the States collected and spent their own money, without the funds passing through the Federal Treasury and being appropriated by Congress through executive agencies back to the States and local interests, the recipients of the aid, as well as the taxpayers, would all be better off.

As an example, in my district the University of Washington at Seattle is the recipient of a number of Federal grants for research. These are for worthwhile projects. But my point is that if my State had the funds and the State legislature made the appropriations, I think everyone concerned would be better off. Everybody knows the closer to the people, the better the government, and as the trend increases of State dependence on Federal handouts we face a serious imbalance of local responsibility.

Now we are asked to authorize expenditures for State and local government aid for various programs to cost more than $5.5 billion, or $1 billion over fiscal 1957, which, in turn, was almost three-quarters of a billion dollars over the year before. Since 1948, these Federal grants to

States have been mounting every year. Where will it end?

The legislative proposals for fiscal 1958 include $211 million in new grants, together with a total of $6 million for previously authorized programs.

According to the May 1957 issue of Nation's Business, total aid of various kinds to State and local governments will amount to approximately $35 billion by July 1 of this year, since 1947.

Here are some of the programs Congress started last year, as outlined by the article just referred to in Nation's Business:

A water pollution control program this year will cost the taxpayers about $2 million. Next year it will cost $3 million.

A new Federal program of aid to municipalities for the construction of waste treatment facilities will result in drafts on the Treasury of $7 million this year. Next year the program will cost $62 million.

Grants-in-aid for the construction of health research facilities costing $1.6 million this year will take $8.4 million in fiscal 1958.

A program of local library services costing $2 million this year will require $3 million or more next year.

The National Science Foundation administers grants for certain research facilities which this year will cost $500,000, but which next year will take $2.8 million.

A program for the drainage of anthracite mines will cost taxpayers $1 million this year. The program will cost $2.5 million next year.

The $5.5 billion in Federal aid to States and communities in the year ahead basically takes three forms:

Grants-in-aid, at least 66 programs, which account for $5.3 billion.

Shared revenue, totaling $102.3 million.

Loans and repayable advances which total $126.3 million.

Mr. Speaker, I never hear any support in this Chamber for Federal intervention in State affairs; indeed, on the contrary, Members frequently express their opposition on the floor to Federal control.

I wonder if in the grants-in-aid programs, however, we do not overlook the means and look rather at the end. For most of the programs in themselves are worthy.

If Congress, however, directly allocated back to each respective State a percentage of the revenues collected by the Federal Government, with no strings attached, and said in so many words, "You decide and take care of your own needs," and, in short, said, "Grants to the States are at an end"—what a saving this would be to the taxpayers. What a blessing to the people.

My State of Washington gets back about $99 million out of the $848 million we pay through income taxes. If, as I believe, the cost amounts to $25 million of getting and giving our State's part of this aid, then what I mean becomes more apparent. With the $99 million plus $25 million available on the State level the State, unaided, could construct training facilities for medical and dental schools, make grants for health and other research available, plant its own trees, train welfare workers, teachers, and nurses, assist the unemployed, and finance other such programs and projects for itself. The local people, meanwhile, could decide for themselves what projects were desirable, and oversee how the programs were administered.

Mr. Speaker, there are many sources of Federal economy. Our congressional committees will examine into the details of requests of executive agencies and come up with plenty of suggestions where savings can be made. For myself I do not favor cutting normal functions of Government, nor the standard of compensation of Federal employees which should always equal that of private enterprise. Ample opportunity for reducing Government expenditures, it seems to me, exists without meat-ax cuts, and one of these avenues is in the elimination of the system of Federal grants to States. We can screen carefully foreign aid and our own Department of Defense. We can cut here and there, as we have been doing thus far this session, to the amount of $1 billion. But unless local and State government is to be superseded and become a mere puppet form of federally controlled local field administration, we should end completely the grants to States program. The resultant savings in taxpayers' dollars would be such as to guarantee a lasting cut in taxes for all time for all people.

Address by Hon. Morris F. de Castro, 40th Anniversary Celebration

---

EXTENSION OF REMARKS

OF

HON. WAYNE N. ASPINALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. ASPINALL. Mr. Speaker, on April 1, 1957, the people of the Virgin Islands celebrated the 40th anniversary of the transfer of the islands from the jurisdiction of Denmark to that of the United States.

The House took official notice of this anniversary at that time, but I should like to include in my remarks the main address given at the ceremonies held in St. Thomas on the first of April. This address was delivered by the Honorable Morris F. de Castro, former Governor of the islands, and I recommend this excellent talk to Members who have an interest in this offshore part of America.

ADDRESS BY HON. MORRIS F. DE CASTRO, CHAIRMAN OF THE 40TH ANNIVERSARY CELEBRATIONS COMMITTEE, AT THE TRANSFER DAY PROGRAM HELD AT THE EMANCIPATION GARDEN, ST. THOMAS, V. I., APRIL 1, 1957

Mr. Chairman, Governor and Mrs. Walter Gordon, distinguished guests, and my fellow citizens of the Virgin Islands in St. Croix, St. Thomas, and St. John, for the honor and privilege—as I esteem the call to me to be—which Governor Gordon granted me to head the 40th anniversary celebrations throughout the Virgin Islands: I shall ever be grateful, I present my heartfelt thanks, Your Excellency.

GREETINGS

To celebrate these historic days with us, many of our friends from official Washington have been good enough to put aside their own business—even pressing engagements, I understand—and, in many instances, have traveled far. We appreciate very much the kindness. To each and every one in the offical party, and to the representative of the Secretary of the Interior, Mr. Carl T. Junge, we extend a hearty welcome, yes, a welcome as warm and as pleasant as the famed Virgin Islands sunshine which drenches our gathering here today.

Particularly, I want to salute an old freind of these islands: the Ambassador of Denmark to the United States. Ambassador Kaufmann, we recall with much pleasure your visit to St. Thomas in July 1948 when you joined in our Freedom Centennial. We were happy to see you again in August 1952 in St. Croix to present, in the name of beloved Denmark, the replica collection of elaborate furnishings for the Government House on that island in commemoration of 1½ centuries of diplomatic relations between our respective countries.

It is good to have you here with us, Your Excellency. Please turn your steps frequently to these shores to renew with us those many ties that still remain between Denmark and the Virgin Islands. As our voices resound, Ambassador Kaufmann, in the traditional cheer "Hans Majestaet Kong Frederik den IX laenge leve"; we know that you join with our prayers for the continued well-being of our illustrious leader, President Dwight D. Eisenhower.

GRATITUDE TO COMMITTEE

I want to thank, particularly, Dr. Roy W. Bornn, who is today in Washington on urgent business, and Messrs. Henry Rohlsen and George Simmons, the chairmen of the three steering committees; as well as the active members of our committee: Commissioner Leon A. Mawson, Messrs. Adolph Gereau, J. Antonio Jarvis, Raphael Wheatley, and my one-time private secretary, Mr. Frederick A. Esannason. These officers have accomplished an effective translation of historic recapitulation into pageantry and praise and have crowned it with beauty and dignity. I know that you appreciate their work as much as I do.

Outstanding was the distant journey back into the nostalgic past, in which we were led by Mr. Jarvis yesterday, to stand in the presence of history as enacted with the changing of the guard over our island home 40 years ago. We do appreciate the fine planning and much effort—and particularly the genuine interest—which developed into delightful and remarkable focus the spontaneous outpouring of a people's gratitude to our sovereigns, past and present.

THANKS, EVERYONE

In this harmony of interests, we recognize and we congratulate the participating arms: the United States Navy, the insular government departments, our industries and other fields of private enterprise, and many others—some appearing in the programs and parades of yesterday and today—for their part in this impressive portrayal of the Virgin Islands success story of two score years.

GOLD OF THE ISLES

And, now, with your kind permission, I would like to discuss a few anniversary thoughts in the chatty "suppertime" style which we used some years ago. I would like to talk to you this morning about gold. Now, please do not look surprised; I am no longer the Commissioner of Finance, and I no longer prepare the revenue estimates. And I do not have any gold in the bank's vaults, either. So, just relax and hear me through, please. Since I have hardly done any public speaking over the past 3 years, I just had to find some familiar ground from which to sound off. That is why I have chosen gold—the well-known yellow metal, one of the heaviest substances known. I will endeavor to point out that gold, not exactly the raw ore, but its equivalent in cultural and material value, is being discovered and being developed every day in the Virgin Islands.

ITS ATTRIBUTES, SURELY

I understand that when Interior Secretary Seaton visited the Virgin Islands last December he received an application from a group of prospectors for mining rights at the newly opened national park on the island of St. John. I hope they find gold, or silver, or uranium, or even oil. But, my dear friends, the gold that I speak about—the treasure of the Virgin Islands of the United States—sparkles in the loveliness of our sunrise and sunset, in the panoramic splendor of our landscape and seascape, in the wonders of our climate, and in the peace and quietness here—so far removed from the roar of the concrete jungles.

Gold, pure and refined, gleams forth in our man's humanity to man, in the richness of our culture and character, in the ready hospitality among all Virgin Islanders. Golden too, I must add, is the absence from these shores of the ugly blotches of organized crime, of subversive movement, of racial discrimination. Thank God, that this is so.

OUR HERITAGE

We must repeatedly refine this precious ore by the constant cultivation of harmony and good will. These days of retrospect—yesterday and today—crowd us with fond memories of the gracious and gentle life of yesteryear. We are proud of those memories; for they represent the skein with which we fashion the rich fabric of our folkway. It is good that we maintain in our towns the Old World jewels of architecture; it is better when we embellish the refined taste in our morals; but we are at our very best when we can pass on this heritage to succeeding generations as theirs to keep and to increase. God grant that this will always be so.

PAYMENT IN GOLD

In gathering the notes for this talk, we visited our public library and found there a treasure trove of Virgin Islands material: many, many volumes dealing with the historical and the folk interest, drawn from a wide field of scholars, educators, government officials, and other writers.

We found in Zabriskie's account of the transfer, this incident which took place on a Saturday afternoon at 4 o'clock, on the last day of March 40 years ago, in the large diplomatic reception room of the State Department (State, War, and Navy Building), in the city of Washington. There the then Secretary of the Treasury, Wm. G. McAdoo, handed to Secretary of State Robert Lansing a Treasury warrant, representing $25 million in gold, and smilingly explained that he had brought the money in the form of a warrant because the actual gold coins would weigh nearly 48 tons, approximately 96,000 pounds, that is.

PROSPERING "POORHOUSE"

That incident was definitely not the first time, of course, that gold in substantial quantity jingled in Virgin Islands history. In bygone years, as you will recall from history, our cities and towns were used as sanctuary for freebooters in from the Spanish Main. Here they counted and shared the loot, we understand. March 31, 1917, was definitely not the last time that such bullion was linked up with our islands. A President of the United States once labeled our islands as "an effective poorhouse." That was unfortunately (?) tacked on to us back in 1931. Unfortunately or fortunately? Let us discuss the phrase in the light of what has transpired since.

We can venture this explanation: As part and parcel of our Nation we experience the rise and fall of the national economy. Therefore, when the lamented depression shook the country 2½ decades ago, it is quite understandable that the islands, too, as its miniature, had to bear the brunt of a damaged economy as well. That was the time of the classic proposal to Congress that Denmark be paid to take us back.

That remark, however sincerely meant or well intended, from the honored guest aboard the U. S. S. *Arizona* made us do things, and do them in a big hurry. For, since then, the poorhouse has paid off the mortgage, every cent of it. Yes, we have definitely done so. Official documents have proved that the internal-revenue taxes which have been paid into the Treasury of the United States on liquors produced in these islands have more than covered the total cost of the islands' government to the United States, including the purchase price of the islands from Denmark.

The mortgage settled, we next proceeded to prove that we would not be a liability to the United States. We installed modern conveniences to our little cottage, planted ornamentals, and tidied the spot spick and span. Yes, we built hotels, schools, hospitals, roads, increased public and private housing. We fashioned monuments to a people's indomitable will, courage, and persistence. You know what happened following that renovation, and still continues, before the paint was dry on our "Rooms to let" signboard, the world came hurrying over to register. So great is the crowd that continues to push up to our gates that we had better do something fast to save some room for our own children. And now we should like to extend a gracious invitation to the author of that disturbing phrase for him to return to spend his retirement years in the tranquil and prospering paradise of the Caribbean—the onetime poorhouse. Unfortunate or fortunate, disturbing or inspiring. What do you think now of that label of 1931 compared with communal results in the 26 years since, I will give my answer—President Hoover's 1931 "poorhouse" has been transformed during the administrations of President Roosevelt, President Truman, and President Eisenhower into the 1957 prospering "guesthouse."

OUR OWN HANDIWORK

In August 1953, I made a statement that, since the year 1950, total bank deposits in the Virgin Islands had increased $2,200,000 in that 2½-year period, imports into the Virgin Islands had increased by $2 million and exports by $300,000, and that travel statistics showed that 94,000 tourists visited St. Thomas and spent $4 million in the year 1952, and that 123,000 arrived during the following year and spent approximately $5,400,000.

But look what happened to these same indexes since that 1953 suppertime chat: Total bank deposits in the Virgin Islands, which were $6,475,669.49 on June 30, 1953, are shown on the published statements of the two banks in the Virgin Islands to be $16,806,928.84 on December 31, 1956, an increase of over $10 million in 3½ years. Total income taxes paid in the Virgin Islands in 1953 were $720,314.36. Total income taxes paid in the Virgin Islands in 1955 amounted to $1,059,631.61, and in 1956 income taxes increased to $1,549,309.68—or double the amount paid 3½ years ago.

Our tourist development board estimated that in 1953 visitors to the Virgin Islands, in the tourist economy of the islands, spent approximately $5,400,000. In 1956 gross tourist expenditures were estimated to be $11,645,988, again more than double the amount spent by tourists 3½ years ago. In 1952 total imports into the Virgin Islands were $11,162,880. In 1955 our imports jumped to $16,255,575, an increase of $4 million. During the same period exports from the Virgin Islands increased from $2,477,655 to $4,277,314, an increase of $2 million.

Do you care to listen to a few more startling comparisons? The assertion was made not so long ago, that Virgin Islanders are not industrious, not given to hard toil and sacrifice. Well, I looked for the facts and I found that in the year 1956 there were 8,138 workers in all the Virgin Islands covered by workmen's compensation, of whom—incidentally—4,345 were engaged in private, I repeat, in private employment and 1,793 in Government work. This figure represents nearly four times as many workers in private employment as in Government employment on these small islands where Government naturally combines all levels of city, county, State, and Federal activities. Let it be remembered, too, and let it be quoted widely, that the people of the Virgin Islands today raise more than 10 times the local revenues than they did 20 years ago, and 2¼ times the local taxes they raised 10 years ago. Here are the figures. In 1936, local revenues totaled $288,438; in 1946 local revenues had increased to $1,374,259.61; and in 1956, revenues from local taxes amounted to $2,911,775.08.

Unlike the bucanneers of old, we have not been trundling wheelbarrowsful of bullion down Main Street lately, nor are we paving the new waterfront highway with the heavy, yellow ingots. Yet, despite the pinch of poverty, felt here as elsewhere among our ill-housed and ill-fed citizens, grass is definitely not growing on Main Street • • • and that is not because of any water shortage either. And here's another fact: keeping pace with our economic advancement, we have been building steadily solid and lasting monuments—not alone of stone and of concrete—but of human resources as well in the health and well-being of our citizens, in the letters, and in the arts.

Dear friends, I am moved to bring to witness this Transfer Day, the firm faith of Virgin Islanders in the traditional American virtues of hard work, in thrift, in resourcefulness, and in our sturdy self-reliance. How very often, these days, we have to fall back on their support. Nevertheless, we are experiencing years of progress and, God helping us, we can look ahead with confidence.

GOVERNMENT HAS HELPED

Government has had no small chapter, of course, in this success story. I would like to pass on to you the definition given by Lincoln in his first inaugural address: "The legitimate object of Government is to do for a community of people whatever they need to be done, but cannot do at all, or cannot so well do, in their separate and individual capacities."

We believe that no American—no one group of Americans—can truly prosper unless all Americans prosper. For we are one family made up of millions of Americans with the same hopes for a full and happy life. We believe that the slum, the outdated highway, the poor school system—deficiencies in health protection, the loss of a job, and the fear of poverty in old age—in fact any real injustice in the business of living—penalizes us all.

We know that our Government stands ready to help us to help ourselves and to do those things for us which we cannot so well do in our individual capacity. I strike into this record our full appreciation for the golden millions which the Federal Government has poured into our islands to equip us with modern sewerage systems, improved communications facilities, the very latest in hospital and school plants, in low-cost housing, airport, and highway construction, among the substantial physical improvements over the past decade. On the other hand, let us never undervalue or underestimate the many things, I have here recited in part only—which we, in the march of progress have done, and daily continue to do, for ourselves as we should, by intelligent planning, skill, and by the sweat of our brow.

PATRIOTISM, UNLIMITED

I listened very carefully a few weeks ago to my good friend, Col. Joseph A. Christmas, United States Air Force, the Selective Service officer in the Virgin Islands, as he was interviewed by the Women's League over radio station WSTA. Among his many remarks commending the spirit and valor of Virgin Islands servicemen, Colonel Christmas brought out the fact that there were approximately 544 volunteers of the 1,073 Virgin Islands servicemen processed through the local board, or roughly 50 percent of the total enlistments. I just had to point out that fact because, these days, we hear too little of the patriotism and sacrifice of Virgin Islanders; and hear far too much, these days, of the economic benefits which these islands receive from the Federal Government, although we receive such grant-in-aid at less than par, in many instances, along with the other Territories and certain States of the Union.

PROGRESS DEMANDS DEDICATION

Unhesitatingly, I wish to state my firm conviction that the people of these islands are well advanced in the application of the principles of American democracy and of self-government. We have a tremendous reservoir of leadership ability just waiting to be tapped. But, my friends, these times cry out loudly for more constructive suggestions. We need less complaints and less criticism of each other. Progress is not for the lazy and indolent. Progress demands character, it demands will, it demands dedication. Progress requires quiet decision, self-respect, and self-reliance.

Let us cherish our island home with a love that does not count sacrifice, a concern that thrives under constant and determined effort. Let us remember, you and I, that our child and our children's children will benefit or suffer by what we do today. The element of gold—here pure, there adulterated—has marked our progress over the 40 years, 1917 through 1957. Progress demands more than lip service or a more recitation of its elements. How well we have learned the lessons along the way. Have we profited well from the experience? We should be building foundations now under our castles-in-the-sky, if there they be, so that our next anniversary celebration, in 1967, may be truly golden in word and in deed.

THE HIGHER LEVEL

And so this morning, richly endowed as we are in the good things of the earth, in the fellowship of our neighbors and the closeness of our Nation, would it not be fitting for each of us to speak in prayer to the Father of the Nations to ask that He help us—and teach us—and receive our thanksgiving?

Might we not pray that He teach us? Teach us, and teach our leaders, to seek to understand the problems and needs of our people. Teach us how those problems may reach solution in wisdom, and how best those needs may be met. Teach us to require of all those who seek to lead us, and teach us too, to require of ourselves, these things: Integrity of purpose; the upright mind, selfless sacrifice, and the courage of the just. Teach us trust and hope and self-dependence. Teach us the security of faith.

THE ROAD AHEAD

Four decades ago, when old Dannebrog was replaced here by the Stars and Stripes, the United States stood on the brink of World War I. Today we celebrate this anniversary at a time when the nations seem to be gathered on the verge of a most serious catastrophe of our times. This sombering thought should bring us solemn pause. Today, as we meet here in peace and quietness, our statesmen are striving valiantly to settle international issues around the conference table rather than around the "watchfires of a hundred circling camps." Today the democratic countries, led by our Mother Country, and by our great President, are earnestly and eagerly seeking ways and means to keep the peace.

This is a serious moment. And it behooves us as good American citizens to be loyal to our country and flag and to the eminent principles for which they stand, to proclaim our faith in righteousness and justice, and to be proud to give ourselves in meeting the everyday needs of our Nation, by willing sacrifice. Thus we strengthen, likewise, our own homeland.

OUR COMMISSION

To each individual gathered here, and to those within the reach of my voice, I express, first, our satisfaction that you could join with us in reviewing this parade of events. Secondly, my great faith that you, each and every one of you, can contribute something to render more precious the social, economic, and political fabric of these islands so dear to us all. And, thirdly, that in so doing you will gain the satisfaction of knowing that you are moving along the high road of constructive progress on all fronts and not banding together to chieve the defensive or negative concept of mere physical security. When we place our desires and designs into proper perspective, to which we can attend right now, we would move into better position to celebrate the golden anniversary laden with achievements beyond our fondest dreams. It is a great faith that must march forward. With it we cannot stand still.

IN SUMMARY

In closing we wish to emphasize that a real, pulsing drive, adorned with deep human concern, has marked these Virgin Islands as the show-place of American democracy. Our gold is in our hearts and in our homes, and our monument not the shaft of stone, but a tower of true spiritual and cultural values and of great material accomplishments. From that viewpoint, and with these self-evident truth, we have surveyed with pardonable pride, yet with humility, these past 40 years.

It is well that we solemnly pledge, this instant, to build a stronger and better nation and home—of greater security and increasing prosperity for all. Working together for the common welfare is an American habit. Let us continue to cultivate and to keep that habit strong. We know that we have not failed to do our full share in this good work. We know what has been done. We know whither our goal. With sincere and unswerving dedication to the tasks ahead, with confidence in our ability to accomplish them, with abiding faith in Almighty God, we cannot fail—we shall not fail.

For the honor of appearing once again before you, my countrymen, thanks to each one of you.

God bless you all.

Poland's National Day

EXTENSION OF REMARKS
OF
HON. STEVEN B. DEROUNIAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. DEROUNIAN. Mr. Speaker, on May 3, for the first time in many years, the Polish people will celebrate the birth of the freedom they once knew and is now lost to them. May 3 will mark the anniversary of a constitution devoted to democracy, adopted by Poland in 1871.

Although for long years, this constitution, symbol of freedom, has lain lifeless, recent months have brought changes and indications that the people of Poland may yet throw off the yoke of communism and once again cloak themselves with freedom and liberty. In this, God is on their side and ultimately the victory will be theirs.

The free world is again witnessing the course of communism: Hunger, starvation, the denial of every birthright of man, and inevitably, the struggle of the people to free themselves from its stranglehold. Our hopes are with the Polish people. They will win their freedom, we know.

The Cyprus Question

EXTENSION OF REMARKS
OF
HON. FRANCIS E. DORN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. DORN of New York. Mr. Speaker, we are all concerned with the problem of Cyprus and its relation to American foreign policy. The recent conditional release of Archbishop Makarios, the spiritual and national leader of the people of Cyprus, has done much to improve the situation. I would like to draw the attention of the Congress to two statements prepared by the committee on the Cyprus question of the Cyprus Federation of America entitled "The Importance of the United Nations Debate" and "A Needless Tragedy." These statements appeared March 24, 1957, and April 12, 1957, respectively, in the international edition of the New Times:

[From the March 24, 1957, international air edition of the New York Times]

THE CYPRUS QUESTION—IMPORTANCE OF UNITED NATIONS DEBATE

(No. 9 in a series of statements as a public service to clarify the issues facing our Nation and the free world in the Cyprus question. Direct inquiries to: Committee on the Cyprus Question, 147 West 42d Street, New York 36, N. Y. Bibliography and research topics available upon request.)

The recent debate on the Cyprus question in the United Nations (February 18–22, 1957) was a big step forward for the people of Cyprus in their long struggle for freedom. It is the most important advance for the Cypriots since Great Britain occupied their island in 1878. The reasons for this are, among others, as follows:

1. It established once and for all that this was an international issue and that the United Nations has jurisdiction in the matter.

2. It demonstrated that the member nations are overwhelmingly behind the Cypriot struggle for independence. A reading of the various speeches clearly indicates almost unanimous support for the struggling people of Cyprus.

3. It recognized that the future of Cyprus rests with the sovereign people of Cyprus.

4. The suggestion of partition by Great Britain was strongly criticised and rejected as a solution by the member nations.

5. The Radcliffe constitutional proposal was rejected as a not-too-well disguised effort to maintain a colonial regime.

6. It recognized that the people of Cyprus are mature, highly civilized, and completely capable of governing themselves and that the excuse that they need training in self-government is simply an evasion.

7. It called for the resumption of direct negotiations between Great Britain and the people of Cyprus.

The United Nations debate brought worldwide attention to the struggle of this small nation for its freedom and made known the issues to a world sometimes too busy to acquaint itself with every international problem. The debate dramatized the fact that the Cyprus question is a needless quarrel and one filled with danger for the free world and that its just and quick solution is of extreme importance to the Western cause.

UNITED NATIONS RESOLUTION

The resolution passed at the United Nations is of great importance to the people of Cyprus. The resolution reads:

"The General Assembly, having considered the question of Cyprus, believing that the solution of this problem requires an atmosphere of peace and freedom of expression, expresses the earnest desire that a peaceful, democratic, and just solution will be found in accord with the principles and purposes of the Charter of the United Nations, and the hope that negotiations will be resumed and continued to this end."

This resolution was introduced by India, whose delegate, Mr. V. K. Krishna Menon, in his speech stressed that the issue here was one of self-determination for the people of Cyprus and that the responsibility for carrying out this principle lay on the United Kingdom in consultation with the people of Cyprus. He stated, in part, as follows: "The resolution we submitted does not provide a solution * * *. [It] places the responsibility for solution on those who today wield the power and the other partners in that solution are the peoples of the Island of Cyprus."

The interpretation of the resolution given by its sponsor and other member nations makes clear that the resumption of negotiations, contemplated by the resolution, were those which had been interrupted—namely, those between the British Government and Archbishop Makarios (October 4, 1955–March 6, 1956).

BRITISH MOVES TO SHOW GOOD FAITH

The following are some ways for Great Britain to show her good faith if she is sincerely interested in a democratic settlement:

1. Release Archbishop Makarios and resume negotiations.

2. Commute all death sentences.

3. Abolish the emergency regulations and restore all judicial guaranties. (The emergency regulations have resulted in serious cases of brutality by the British. See Time magazine, March 11, 1957, page 28.)

4. Abolish the two concentration camps—Kokkinotrimythia and Pyla—and free the more than 2,000 political prisoners and detainees.

5. Reopen the schools.

6. Replace the military governor with a civilian governor.

The necessary first step is the release of Archbishop Makarios, the elected national leader and representative of the Greek Cypriotes, and the resumption of negotiations with him. The recent offer of a truce by the EOKA rebels conditioned on the return of Makarios and the British reply thereto will be discussed in a subsequent statement.

THE ROLE OF THE UNITED STATES

The role of the United States in this matter is clear. The historic American principle of self-determination should be supported by our Nation with vigor in the case of Cyprus. The United States has supported Great Britain in her contention that the Cyprus question could be settled privately outside the United Nations. We have a responsibility to ourselves and as the leaders of the free world to do all possible to urge the British Government to live up to its commitments.

Our State Department should press with all its energy, in accordance with the U. N. resolution on Cyprus, for an early and just solution to this problem. It should emphasize to the British Government that in this era we cannot condemn Soviet colonialism and at the same time condone British colonialism. The Soviet Union and her satellites are using British colonialism in Cyprus as a weapon against the United States and particularly against our new Middle East doctrine. How can we expect the nations of the Middle East to have faith in our pronouncements if we allow British colonialism to continue on Cyprus? If we are to succeed in adjusting to the new nationalism we must make it clear that Western diplomacy based on bullying is a thing of the past.

Our vote in the U. N. and our new assumption of responsibilities in the Middle East require active mediation on our part in the Cyprus problem. In the interest of American foreign policy our Government must do its best to see that the relevant parties, the United Kingdom and the people of Cyprus, resume their talks in an atmosphere of calm.

Stripped of all extraneous matters, the issue in Cyprus reduces itself to one problem; The British are imposing their will against an alien and self-conscious people through force. The release of Archbishop Makarios and the resumption of negotiations will do much to clear the air of rancor. The irony of the entire problem is that it is needless. A clear statement by Great Britain promising the right of self-determination at a definite time in the near future could halt the conflict overnight, strengthen NATO's southern flank, and erase a serious moral embarrassment for the West.

[From the April 12, 1957, international air edition of the New York Times]

THE CYPRUS QUESTION—A NEEDLESS TRAGEDY

(No. 10 in a series of statements as a public service to clarify the issues facing our Nation and the free world in the Cyprus question.)

The conditional release of Archbishop Makarios (he is still barred from Cyprus), and subsequent resignation of Lord Salisbury are interpreted as welcome signs of a new British attitude toward Cyprus. However, it remains to be seen whether it is a new attitude or simply a move to stifle the mounting opposition at home and abroad to Britain's use of naked force to control the Cypriotes. In the past few years we have witnessed a colossal blunder by our ally Great Britain in this matter. Not only has the Balkan alliance and the southeastern flank of NATO been shattered, but the United States has suffered acute embarrassment from the example of colonial oppression given by the British in Cyprus. These consequences are all the more regrettable because they are the result of a needless tragedy: the Cyprus question has always had and has now a solution in accordance with normal democratic principles which would fully protect western interests.

Ever since the close of World War II the British saw fit to employ every devise to impede an honorable settlement which would have preserved their military use of the island and would have given the Cypriotes their freedom. Since they have never colonized the island the British had to rely on divisive politics, i. e., stirring up hatred between the groups on Cyprus and between governments and then playing one off against the other. Finally the resolute drive of the Cypriote will toward freedom, caused British political manipulation to degenerate into the naked use of force in order to continue their rule.

RESIGNATION OF LORD SALISBURY

Possibly more important even than the release of Archbishop Markarios is the resignation from the British Cabinet of Lord Salisbury. Lord Salisbury, one of the leaders of Britain's aristocratic ruling class and one of the strongest advocates of force and repression to quell the Cypriotes' desire for freedom, resigned in protest at the release of the archbishop. His resignation is excellent news for the United States, as it indicates that the few back benchers in the Conservative Party can no longer dictate policy. It indicates that the Conservatives finally realize that a policy of rule by force, intimidation and terror cannot be successful against a peoples'—as in this case the Cypriotes—movement for freedom, and that the day when government could act without public sympathy is long past. As the London Observer said Sunday, March 31, 1957, Lord Salisbury's going may be the first blessing the Macmillan administration has enjoyed and that it may be the light at the end of a dark tunnel.

It is to the credit of Prime Minister Macmillan that he risked the wrath of the intransigent back benchers in his own party in an effort to extricate his nation from a policy which has reaped it no profit and has caused it such loss. This grant of praise is deserved even though one recognizes that the Conservative government has been under mounting pressure from British public opinion, the Labor Party, the United States, and from the world community. In any case let us hope that the magnitude of the British blunder will become a matter for historians and that this needless tragedy will be cut short.

NECESSARY STEPS TO A SETTLEMENT

The following steps, among others, by Britain would greatly speed a peaceful, democratic, and just solution in accordance with the United Nations resolution:

1. Full resumption by Archbishop Makarios in Cyprus of his duties as spiritual and national leader.

2. Replacement of military governor with civilian governor.

3. Halt all political hangings.

4. Abolish the two British concentration camps.

5. Halt all forms of brutality by the British security police.

6. In general, abolish all emergency regulations.

The important thing now is to have negotiations resumed. It is clear that the resumption of negotiations contemplated by the United Nations were the negotiations which took place between the British Government and Archbishop Makarios between October 4, 1955, and March 6, 1956, and which were unilaterally breached by Britain when a settlement was reported near.

ROLE OF THE UNITED STATES

With our assumption of new and added responsibilities in the Middle East area, Cyprus has become even more of an American problem than before. The United States is not faced in the Cyprus question with her usual postwar dilemma of supporting the colonial power versus a reactionary local government or the Communist-led aspirations of subjugated people. In the case of Cyprus human rights and political expediency combine. American self-interest is best served by a position designed to make the British Conservative government accept the compromise solution of a NATO base on Cyprus and self-determination for the people of Cyprus at some determinative time in the near future. If Britain accepts this compro-

mise it would go a long way to restrengthening NATO and the free world and help in reestablishing the normal functioning of the Balkan alliance.

The Transportation Tax Law Should Be Repealed

EXTENSION OF REMARKS
OF
HON. ROBERT L. F. SIKES
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. SIKES. Mr. Speaker, under unanimous consent, I insert in the Appendix of the RECORD an article which appeared in the Playground News, of Fort Walton Beach, Fla., April 18, 1957, which indicates some of the reasons why the citizens of Florida feel that the transportation tax law should be repealed.

My colleague, the Honorable A. S. HERLONG, Jr., has introduced a bill, H. R. 2867, to repeal the transportation tax law, sections 4261, 4262, 4271, 4272, and 4273, Internal Revenue Code of 1954. Some 40 bills, I am informed, have been introduced and are now awaiting action of the 85th Congress, relating to this subject.

Speaking in support of the bill, as shown in the CONGRESSIONAL RECORD of March 5, 1957, Mr. HERLONG said:

It is possible, through repeal of the taxes on transportation, to extend a measure of relief to each and every person and each and every business, without any serious loss of revenue to the Government. * * * the potential benefits to be gained by all consumers through the cumulative effect of lower prices at each stage of manufacture, wholesaling and retailing, are so great as to make any possible loss of revenue almost insignificant by comparison. * * * repeal of the taxes on transportation cannot safely be delayed, while immediate repeal would be in the best interest of all.

Another of my colleagues, the Honorable JAMES E. VAN ZANDT, author of H. R. 976, which seeks repeal of the transportation tax, in a speech in support of his bill and recorded in the CONGRESSIONAL RECORD of February 18, 1957, says:

The cost of transportation and the burden falls most heavily on those least able to afford it. * * * Transportation, more than any other factor, is part of everything this Nation uses or consumes. * * * Repeal of the transportation taxes would, therefore, benefit each and every person and the entire national economy.

The news article reads as follows:

RESOLUTION IS ADOPTED AT DESTIN MEETING—BOATSMEN ASSOCIATION SEEKS REPEAL OF TAX

At a meeting of the Florida Boatsmen Association, Inc., held at the Community Center Building in Destin, Fla., Saturday night, a spirited discussion centered on matters relating to taxation, license fees, and regulation of the fishing industry, President J. E. Brunson said.

James H. Wise, member of the legislature from Okaloosa County met with the association members for a discussion of pending legislation relating to fishing and boating, Brunson added.

"A number of bills have been introduced and are pending action of the legislature now in session in Tallahassee," he explained.

A resolution was adopted requesting the legislature to approve a concurrent resolution urging Congress to repeal the transportation tax. This tax, according to David W. Palmer, association counsel, who presented the resolution, has been the subject of much litigation, so much that it is no longer profitable to the Government as a revenue producing measure.

"It is a war measure," he said, "enacted in 1941, to deter people from riding the trains, planes, and boats and thereby give more room for transporting military personnel and equipment.

"Some 30 bills are now before Congress seeking repeal," he added. Ten State legislatures have already taken similar action seeking repeal.

"Many court decisions have held that the tax had been illegally collected on the movement of logs, earth, oil, ice, gravel, and persons making fishing and sightseeing trips. More than 100 associations, including the Chamber of Commerce of Los Angeles and Kansas City, are supporting the repeal movement," Palmer said.

C. L. Kelly, secretary-treasurer, presented the resolution as follows:

"Whereas the Federal transportation tax is a discriminatory and unfair tax, imposed on those who in their business or profession are required to travel or transport goods, wares, and merchandise; and

"Whereas the courts have held that the tax, in a number of instances, was illegally collected and that said tax does not apply, under certain conditions, to various articles, commodities, persons and activities, such as the movement of logs, earth, oil, ice, gravel, fishing boats, etc.; and

"Whereas it appears from the remarks of Hon. ROBERT L. F. SIKES, as recorded in the CONGRESSIONAL RECORD of April 13, 1955, and May 31, 1955, that said tax has not been uniformly imposed but has been collected contrary to law; and

"Whereas large sums of said tax illegally collected have been refunded pursuant to court decree; and

"Whereas in Florida, because of our location, said tax imposed an unfair and undue burden on our citizens: Now, therefore, be it

"Resolved, That the Florida Boatsmen Association, Inc., hereby petitions the Legislature of the State of Florida, now in session at Tallahassee, by appropriate concurrent resolution to request the Congress of the United States to repeal said transportation tax law; be it further

"Resolved, That said association hereby requests Members of the Congress from Florida to repeal said law; that a copy of this resolution be sent to Members of Congress from the State of Florida; be it further

"Resolved, That a copy hereof be released to the press to the end that due publicity be given the subject.

"Approved at Destin, Fla., this 13th day of April 1957.

"FLORIDA BOATSMEN
ASSOCIATION, INC.,
"By J. E. BRUNSON,
"President.

"Attest:
"C. L. KELLY,
"Secretary-Treasurer."

Attached to the above and foregoing resolution and transmitted to the State legislature in Tallahassee, Fla., was the following:

House Concurrent Resolution

A concurrent resolution requesting the Congress of the United States to repeal title 26 sections 3475 and 4261 of the Internal Revenue Code of the United States, which levies an excise tax on the transportation of property and persons within the United States

Whereas the Federal excise tax on transportation was for the most part levied as an emergency revenue measure for the conduct of World War II, and in the case of the tax on transportation of persons for the purpose of discouraging unnecessary civilian travel, and was not intended as a part of the permanent rate structure, and is no longer necessary because the emergency created by World War II and the problems peculiar to it have ceased to exist; and

Whereas the country's railroads, airlines, truck and bus companies and water carriers are caught between increased costs and rate competition among themselves and with unregulated and private transportation, and the transportation tax increases the prices the users of the for hire transportation services must pay, and makes the for-hire transportation agencies involuntary collectors of a tax which drives business to private operations; and

Whereas the for-hire transportation industry is essential to the national defense and the well being of this industry must be safeguarded from the unnecessary and disrupting influence of the transportation tax which prevents for-hire transportation agencies from being able to compete for their fair share of the available volume of traffic; and

Whereas the transportation tax is most unjust to the Nation's railroads which are especially essential to the national defense because they move the largest share of troops, equipment and vital supplies in times of war and national emergency; and

Whereas the transportation tax is costly for the carrier to collect and administer and thus adds to the total freight bill by increasing the carrier's overall costs, putting an extra burden upon the carrier and on the shipper through high rates; and

Whereas the transportation tax, because of its nature or application tends to become discriminatory as to communities and individuals, and restricts trade areas, thereby interfering with the free flow of commerce within the United States, and the State of Florida is particularly affected because its shippers must ship their commodities for long distances to reach markets; and

Whereas the transportation tax rate is a fixed percentage of the fare or freight rate, and is substantially increased without any increase in the tax rate every time it is necessary to increase passenger and freight rates; and

Whereas the for-hire transportation agencies are especially important to the State of Florida because Florida is an importer, i. e., more goods and people come into the State and remain than go out, and this means that the transportation tax adversely affects the State of Florida to a point approximating a lack of constitutional uniformity; and

Whereas the for-hire transportation agencies are essential to the well-being of the large tourist trade in the State of Florida and the State of Florida is especially interested in protecting and developing its vacation and tourist travel and cheaper transportation costs will aid in the accomplishment of this purpose; and

Whereas transportation is in no sense a luxury but is a vital necessity and there is, therefore, sound reason for distinguishing between the transportation taxes and other excise taxes that are imposed upon luxury items; and

Whereas the benefit the public in general will derive from the repeal of the transportation tax will far outweigh the loss of revenue to the Federal Government; and

Whereas there is presently pending before the Congress of the United States legislation which would repeal the tax on transportation of property and which would repeal the tax on transportation of persons: Now, therefore, be it

Resolved by the House of Representatives of the State of Florida (the Senate concurring), That they be placed on record in favor of the repeal of the 3 percent Federal transportation tax on all commodities shipped, and the repeal of the 10 percent transportation tax on all passenger fares; and

Resolved, That this resolution be forwarded to Representative FORAND and the members of the House Subcommittee on Excise Taxes with the recommendation that serious consideration be given to supporting the repeal of excise taxes as applicable to the movement of people and goods via for-hire carriers; and

Resolved, That the members of the Florida delegation in Congress do all within their power to bring about the repeal of the Federal transportation tax, and be urged to pursue this matter as diligently as possible in order that the State of Florida might reap the benefits which would be forthcoming.

Mr. Speaker, in Florida this transportation tax has become a nuisance. Fishing boats were required to contribute an aggregate sum of about $100,000 to the United States Treasury Department as a transportation tax. After some 7 years of litigation, the courts have held that the tax was unlawfully collected and must be refunded—*Smith* v. *U. S.* (110 F. Supp. 892); *Walker et al.* v. *U. S.* (144 F. Supp. 440; affirmed 234 F. (2d) 910); *Davis* v. *U. S.* (235 F. (2d) 174); *Smith* v. *U. S.* (157 C. C. H. 9550 (5th Circuit), decided April 3, 1957).

As shown by my remarks in the CONGRESSIONAL RECORD of April 13, 1955, in some areas no effort was made to collect the tax. The court found that the tax varied in different localities. In some places the tax was collected at the rate of about 5 cents while under identical circumstances on other boats the tax was collected at the rate of 60 cents on a $5 fishing trip.

Because of the inherent nature of transportation, as legally defined, much travel and the movement of various commodities, goods, wares, and merchandise, have been held by the courts to be nontaxable. The unauthorized assessment and collection of the tax has resulted in considerable litigation throughout the United States with its attendant expenses to both the Government and the taxpayer. The most satisfactory solution to this problem is to repeal the transportation tax law.

The effort to expand the statute by administrative rulings to impose the tax on articles and activities not specified in the statute is not limited to fishing boats but includes such tonnage as wood—*Masonite* v. *Fly* (182 F. (2d) 934; 194 F. (2d) 257); building materials—*Earl* v. *Babler* (180 F. (2d) 1016); earth—*Ellis* v. *U. S.* (187 F. (2d) 698); stone—*Kerns* v. *U. S.* (204 F. (2d) 813); oil—*Jones* v. *Continental Oil* (141 F. (2d) 923); *Continental Oil* v. *Jones* (92 F. Supp. 927).

Now, I understand, in some places an effort is being made to collect the tax on sightseeing in disregard of a regulation expressly excluding sightseeing from the tax.

In view of the foregoing facts, H. R. 2867, legislation to repeal the transportation tax, should receive early consideration.

Maple T. Harl

EXTENSION OF REMARKS
OF
HON. WAYNE N. ASPINALL
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. ASPINALL. Mr. Speaker, I rise to express my deep sorrow for the passing of Maple T. Harl, a distinguished citizen of Colorado. Mr. Harl will be remembered in Washington for his outstanding service both as member and Chairman of the Federal Deposit Insurance Corporation, but we who were honored to call him friend will remember him most for his unstinting service to his State and to his country. Death called him just when he was making preparation to terminate his service with the FDIC so that he might return to Colorado. Had this been possible he might have heard the tributes which must now echo in the place left empty by his passing.

For one who gave so much of himself in the service of others, there is little to say but that he will find a welcome in that land where service to others is an important key.

I should like also to include with my remarks the story of his passing and the editorial from the Daily Sentinel of Grand Junction, Colo.:

[From the Grand Junction (Colo.) Daily Sentinel of April 22, 1957]

MAPLE T. HARL

Of the many Coloradoans who have held high position in our Nation's Capital, none was more devoted to his home State than was Maple Harl, whose death occurred in that city last Wednesday. None was ever more ready to give of his time and energy and lend his influence where possible when a call went to him from Colorado. While his home was in Denver, no taint of sectionalism biased Maple Harl's efforts to advance the welfare of his home State. That many western Coloradoans early discovered whenever our section needed "a friend at court." His help was of inestimable value in our city's successful efforts to secure Walker Airfield and the Veterans' Hospital. But whether the project sought was big or little, Harl was ever ready with his assistance.

Maple Harl first went to Washington as a member and chairman of the Federal Deposit Insurance Corp., a position to which he was appointed by President Truman. Testimony to his exceptional qualities as financier, banker and administrator was President Eisenhower's request that he stay on as a director of the board; from which post he was retiring late in the summer to return to his beloved Colorado when death came to him.

Mr. Harl was a director on the boards of many of our State's biggest business and financial institutions. As a member of the D. & R. G. W.'s board of directors perhaps he was best known to local residents among whom he had many personal friends who today join with countless others in all parts of the State in mourning the loss of this fine citizen.

[From the Grand Junction (Colo.) Daily Sentinel of April 18, 1957]

MAPLE T. HARL, COLORADO BOOSTER, DIES AT AGE 64

WASHINGTON.—The career of a great Colorado booster and builder ended here today with the death of Maple T. Harl, 64, financier and director of the Federal Deposit Insurance Corporation since 1945.

Mr. Harl died in Walter Reed Army Medical Center yesterday afternoon following a heart attack a few hours earlier.

The former Canon City newsboy, Denver banker, and director of many corporations, lived in Grand Junction at one time and was a faithful friend of the Western Slope when his influence was called for by friends of the region.

Walker Field and the veterans' hospital in Grand Junction mark two developments secured for the area with his help in high places.

Mr. Harl's body will lie in state in Washington until tomorrow, when it will be taken by train to Denver for burial.

Funeral services will be held Monday at Olinger's Funeral Home with interment in Fairmount cemetery, Denver.

A native of Marshall, Mo., Mr. Harl called Colorado his home for 51 years.

In an interview with the Daily Sentinel last February, Mr. Harl said he expected to leave Government service this fall.

"I'll never retire," he said at the time. "I plan to continue to be connected with the financial world in some way."

He was a member of the Denver & Rio Grande Railroad board of directors and a board member of the United American Life Insurance Co. and the Glenn L. Martin Co. He was reelected to a new 3-year term as a director of the railroad only last week.

Mr. Harl was Colorado bank commissioner from 1939 until he came into the Federal service at the behest of then President Harry Truman and prior to that had been active in banking and investment circles in Colorado.

The FDIC director was a past national commander of the Disabled American Veterans and was active in the American Legion and Veterans of Foreign Wars.

He was a trustee of Colorado Woman's College and a Mason.

Mr. Harl entered Walter Reed for treatment of an arthritic condition, a hangover from his service in Europe during World War I. He enlisted in the Army as a private and rose to the rank of major on the staff of the late Gen. John Pershing.

He is survived by his widow, a daughter, Mrs. Jean Stockmar of Denver, and three grandchildren.

The Honorable Barratt O'Hara's Diamond Jubilee Dinner

EXTENSION OF REMARKS
OF
HON. GORDON CANFIELD
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. CANFIELD. Mr. Speaker, I wish I could have attended BARRATT O'HARA'S diamond jubilee dinner in Chicago on Thursday, April 25. The warm-hearted, silver-haired gentleman from Illinois is down in my book as one of my unforgettable Congressmen and it does me no end of good to be in his company, to hear

him reminisce on his adventuresome and interesting life, to absorb his wholesome philosophy which ever accentuates his concern for the less fortunate in life.

We know Mr. O'HARA in the House today as our only Member who served in the Spanish-American War. Mere mention of his name electrifies the men of 1898 and their families when they assemble in my area. I thought I had some real experience in journalism until I really looked into the history of my colleague who is now beginning to say the Spirit of '76 is invincible. And who but the other House O'HARA, Republican JOSEPH PATRICK, of Minnesota, can cause House microphones to tremble in the manner of the Illinoisan?

BARRATT has been exceedingly kind to me. Somehow, I sense he has sort of an affection for me as he does all his colleagues. I like the way he treats his secretary, Marie Crowe, coauthor of a number of his books. BARRATT is happy at 75 and I am happy because he is.

Plea for the Public Defender

EXTENSION OF REMARKS
OF
HON. STEWART L. UDALL
OF ARIZONA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. UDALL. Mr. Speaker, as a sponsor of legislation designed to provide adequate representation for indigent defendants in criminal cases in the United States courts—H. R. 3791—I was deeply interested in an article which appeared in the April 21 issue of the New York Times magazine. This article, entitled "Plea for the Public Defender," was written by Deputy Attorney General William P. Rogers. Mr. Rogers, in my opinion, has made a most effective statement of the case for the public-defender system, and I commend his article to our colleagues who are interested in steps which might help us more fully realize the ideal of our legal system—equal justice under law.

The article follows:

PLEA FOR THE PUBLIC DEFENDER

"Do you have a lawyer?"

This question is asked daily in criminal cases by judges in courts throughout the land. It poses no serious problem to those accused of crime who are able to afford a lawyer. But what about the large numbers of men and women who are charged with law violations and are not able to retain counsel because they haven't the money for the fee? What happens when they answer "No"?

The sixth amendment to the Constitution of the United States provides that "in all criminal prosecutions, the accused shall enjoy the right * * * to have the assistance of counsel for his defense." This provision safeguards human rights by recognizing that the average person is not sufficiently skilled in the law competently to defend himself against a criminal charge. It means that in all criminal proceedings, involving a felony, the Federal courts are without power or authority to deprive any person of his life or liberty unless he has counsel or expressly waives the assistance of counsel. To maintain fundamental fairness and right, due process of law imposes the same requirement on the States.

Certainly a person charged with crime who is unable because of poverty to employ counsel should be defended in all his rights as fully as is the accused who is able to engage a lawyer. Yet, as a Nation, what have we done to make meaningful for the poor and friendless this right to counsel?

The answer in all the Federal courts and in a great many State courts is that we rely wholly upon charity or the uncompensated services of lawyers to provide counsel for the indigent. A recent survey showed that only three States—Connecticut, Colorado, and Rhode Island—have a statewide public defender system. Including these States, public-defender offices have been established in only 31 cities. As a result of this poor showing, the effective assistance of counsel which should be provided is, in fact, too often left to chance.

Under the present generally prevalent system, when a defendant who wants a lawyer cannot afford one, it becomes the duty of the court to appoint counsel for him. Often a lawyer who happens to be in court is requested by the judge to assume the defense. In rural areas where the criminal calendar is relatively light, this practice may not impose a serious burden, although its does not necessarily insure that competent criminal lawyers are obtained in all cases.

In heavily populated areas, such as the southern district of New York where some 700 defense assignments are made each year in Federal court such a haphazard system would become hopelessly bogged down. There, the Legal Aid Society, a voluntary organization supported entirely by private funds, employs full-time private defenders to present accused indigents. Because of the competence of the service it provides, the court relies almost entirely on this source when making assignments. In other jurisdictions, however, members of the bar generally volunteer their services and, when called upon by the court, assume the defense without charge.

This frequently entails a heavy burden on the lawyers. An example was the respected Washington, D. C. lawyer of modest means who several years ago was appointed in a long conspiracy case involving many defendants. He finally had to mortgage his home to support his family and pay expenses during the trial, which lasted 8 months. It is a tribute to the bar that the courts have been able to find lawyers—often called upon again and again—who are willing to accept such assignments.

Another trouble with the system is that miscarriages of justice may occur because the poor have counsel assigned to them who are not fully competent to defend against criminal charges. The practice of criminal law is a highly specialized art. Young lawyers, without prior experience, often seek court assignments to gain trial experience. Sometimes they prove to be fine defense lawyers; sometimes they do not. In any event, as Mr. Justice Wiley Rutledge observed: "Serious criminal cases are not proper subject matter for legal apprentices, however capable and hardworking."

Moreover, it takes time, money, hard work, and skill to prepare a defense that will fully safeguard the rights of the accused. Unless a lawyer can be found who is willing to provide his own money as well as effort, thorough investigation of the facts may not be made, key witnesses who live at a distance may not be interviewed, and material evidence may not be procured to protect a penniless client.

While the competency of the defense under the present system is subject to question, an even more serious charge can be made. This concerns the technique of virtual extortion that a very few unscrupulous lawyers use. For these few, a person who cannot raise money for bail is always a likely target. He is in jail, perhaps for the first time, and is bewildered and scared.

Thereupon our "friend of the poor" makes his appearance. Preying on fears and uncertainties, the lawyer emphasizes the dire consequences which will follow unless the accused has someone to defend him. If the accused knows that the court will appoint counsel, the lawyer tells him, "Those fellows won't help you; they don't get paid, and therefore won't take an active interest in your case." Once the accused is persuaded to let such a lawyer take his case, pressure is brought to bear on him and on his friends and relatives to raise money, regardless of the sacrifice, to pay the lawyer's fee. While it should be emphasized that such practices are rare, they should not be permitted to occur at all.

The problem of securing adequate representation for the poor is by no means new. But with the growth of our population and economy it has become most serious. During the past 15 years approximately 35,000 criminal cases, on the average, were commenced each year in the Federal courts involving about 40,000 defendants. Those in daily contact with the courts state that, by conservative estimate, at least 1 out of every 8 defendants does not have the means to employ an attorney. On this basis, counsel are appointed to represent at least 5,000 defendants in the Federal courts yearly.

Attorney General Herbert Brownell, Jr., has aptly likened this system to relying on a volunteer fire department. In this modern age with its great crowded cities, no one would think of entrusting the protection of life and property from the hazards of fire to any but a full-time, trained, and paid fire department. As a committee of the Judicial Conference of the United States, concerned with indigent litigants and headed by Judge Augustus N. Hand, reported in 1943:

"To call on lawyers constantly for unpaid service is unfair to them and any attempt to do so is almost bound to break down after a time. To distribute such assignments among a large number of attorneys in order to reduce the burden upon any one, is to entrust the representation of the defendant to attorneys who in many cases are not proficient in criminal trials, whatever their general ability, and who for one reason or another cannot be depended upon for an adequate defense. Too often under such circumstances the representation becomes little more than a form."

What is the remedy for this situation? Obviously, it is the establishment of some form of paid public defender system in all Federal as well as State courts.

There is at present in Congress a bill that has the endorsement of the Department of Justice, the Judicial Conference of the United States, and legal aid societies. If enacted, it would authorize the Federal district courts in large metropolitan centers to appoint public defenders either as full-time or part-time officers of the courts, as the volume of work requires. In less populated districts, where the court concludes that a public defender is not required, the court would be authorized to appoint counsel in particular cases and to pay reasonable compensation. In effect this would combine the best features of both the public defender and the assigned but compensated counsel systems.

It is difficult to say with certainty what a public defender system for the Federal courts would cost. The pending legislation would authorize a maximum annual salary of $10,000 for full-time public defenders and a payment of $35 per day with an annual ceiling of $5,000 in districts that appointed counsel for specific cases.

However, about 60 percent of the cases requiring a public defender are concentrated in a very few congested court districts. Pre-

sumably only these would require full-time public defenders. In the great majority of districts the work would be part-time on a case-to-case basis. The total Federal cost might not exceed $250,000 a year. To this would be added the costs of the plan in State courts.

In addition to insuring the full constitutional guaranty of a fair trial to the underprivileged, the public defender system would provide a number of other advantages.

If the accused had no real defense, the public defender would be expected honestly to advise him to plead guilty, thus avoiding the expense and time of an unnecessary trial. If the defendant had a good case, he would have the assurance of being defended by competent counsel who was being fairly compensated for his services. He would be represented by an attorney experienced in criminal practice and qualified fully to safeguard his legal and constitutional rights.

Another reason for establishing the office of public defender for the poor relates to shaping a prisoner's attitude toward society after he has been convicted and served his term in jail. It has been pointed out that the correctional process for a prisoner cannot begin to operate until the bitterness engendered in him by the legal process has been overcome. The poor and helpless prisoner who rightly believes that he was not adequately defended leaves the courtroom with a heart full of hate.

James V. Bennett, Director of the Bureau of Prisons, receives a constant flow of mail from inmates of Federal prisons alleging that they were deprived of counsel or that the assigned counsel was inadequate. A typical letter reads:

"I have been sentenced for 2 years and 3 years' probation. When I was judged, I was asked by my attorney to plead guilty. Please believe me, I didn't know, nor did anyone explain to me, the meaning of pleading guilty. I have never in my whole life committed any crime. Since I began serving this sentence I have learned that by pleading guilty I have committed myself to something that I was not aware of. This is understandable when you realize that I have had but 4 years of schooling and the ways of the courts were foreign to me."

A person who believes he has been wrongfully imprisoned many petition the court for redress. Many of these petitions filed by Federal prisoners are based upon a claimed denial of counsel or the allegation that assigned counsel was indifferent or not qualified.

While the public-defender system will not solve all of these problems, it will go a long way toward minimizing errors, misunderstandings, and injustices. In a number of States where the system has been in use for years, it has proved eminently successful.

Some objection to the plan comes from attorneys whose practice of criminal cases, they say, might be reduced. It would seem that, if these attorneys are deprived of clients who lack the money to pay for their services, the loss cannot be a great one.

Shortly before his death Mr. Justice Robert H. Jackson expressed eloquently the principles that call upon us as a nation to adopt, in the interest of justice, a public-defender plan for the poor. He said:

"We believe in law as a growing and progressive science of civilized life, not as a closed doctrine like the law of the Medes and Persians. Our profession is dutybound to supply bold and imaginative leadership to bring and keep justice within the reach of persons in every condition of life, to devise processes better to secure men against false accusation and society against crime and violence, and to preserve not merely the form of constitutional government but the spirit of liberty under law as embodied in our Constitution."

Old Granddads Meet for Fellowship

EXTENSION OF REMARKS
OF
HON. SAMUEL N. FRIEDEL
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES
Wednesday, May 1, 1957

Mr. FRIEDEL. Mr. Speaker, it is a fact that due to our great technological and medical progress, the number of our so-called elderly people is constantly increasing. This is all to the good, for the world can profit by their years of experience and worldly wisdom. Whatever the world has today is a heritage from the past, for which we are greatly indebted to our fathers and grandfathers.

I cannot help but feel that if we, of the present generation, would heed the words of wisdom of our grandfathers, which they gained through long years of solving their own problems, this would indeed be a far better world and many of the problems that we face, such as juvenile delinquency and other matters, could be resolved in the light of their experiences. Our elders are constantly proving their usefulness to us in innumerable ways, and we should profit from their valuable contributions to make this a better world.

On April 18, 1957, in the Evening Sun of Baltimore, Md., I noticed a very interesting article entitled "Old Granddads Meet for Fellowship," which I deem worthy of inclusion in the pages of the CONGRESSIONAL RECORD, and under leave to extend my remarks, I include that article, which is as follows:

OLD GRANDDADS MEET FOR GOOD-FELLOWSHIP

To discuss the pastimes of grandfathership and share an evening with good companions, grandfathers from the Baltimore area assemble once a month at the VFW hall in Rossville, Md.

The Old Granddads Club of America, Rossville Council No. 1, was founded in September 1954, with a membership of 15 grandfathers who live in and around Rossville, a small community in eastern Baltimore County on the Philadelphia road.

Since then the membership rolls have swelled and now list 148 grandfathers, some coming from as far away as Anne Arundel County.

DISCUSS CLUB'S PROJECT

According to Carl Mohr, secretary of the Old Granddads Club, an average of about 50 members attend each meeting.

The members discuss current projects before the club and the many and varied problems arising from their relationships with their grandchildren.

The avowed purpose of the organization, as stated in its constitution is "* * * granddads of different stations of life may meet and discuss various topics that may create a better relationship between granddads and grandchildren, which may reduce in a way a great deal of unnecessary juvenile delinquency that now prevails."

HOLD ANNUAL PARTY

Each year the granddads throw a Christmas party for local children under 10 years old. It is exhausting and expensive, but well worth it, they feel. To raise the necessary funds, the club—whose dues are a dollar per year—sponsor oyster roasts, crab feasts, or ham suppers.

Howard E. Conners is president of the club; John A. Smith, vice president; Mr. Mohr, secretary; Vincent Arrigo, treasurer; William McClure, chaplain; and George Mohr, sergeant at arms.

The oldest grandfather in the club, Fred Kreisel, is 85; the youngest, less than half that. He is 42-year-old Robert C. Weeks.

Polish National Day

EXTENSION OF REMARKS
OF
HON. SIDNEY R. YATES
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. YATES. Mr. Speaker, on this day 166 years ago, a great progressive and democratic document was signed. On May 3, 1791, the constitution of Poland was enacted. It was a logical product of the traditional allegiance of the Polish people to the principles of liberty and self-determination. This document has remained a cherished declaration of belief in justice and free expression down through the years, despite the encroachments attempted upon it by hostile forces. It is yet a constant reminder to the Polish Nation of Poland's heritage of freedom, a heritage that cannot be denied even by the oppressive force of brutal domination.

The commemoration of National Day provides us with an opportunity to pay homage to the Polish people who, moved by their love of freedom and independence, continue to strive unceasingly to live by the precepts of their constitution, to regain complete liberty from oppression, and to restore their highly valued ties with a Western community in full concord with their aspirations.

This past year's events in Poland have shown the unswerving determination of her people to regain that traditional freedom. "For God and Country" is the national motto of Poland, and to God and their country they dedicated their very lives. In the face of a stunning display of overwhelming force, the Polish people heroically—and alone—took the lead in demonstrating the total bankruptcy of Communist policies. By demanding bread and freedom they showed that communism has brought Poland to the brink of economic ruin. By demanding the end of the Communist collectivization experiment, they showed that communism has turned a nation once called the granary of Europe into a nation unable to feed her own people. By demanding freedom and the withdrawal of the Soviet Army, they showed the hatred and contempt inspired by Russia's military and political machine.

Today the celebration of National Day in the United States takes on an added meaning, for some measure of those freedoms have been won back by the heroic people of Poland. Economic aid has been sought and gained from the West; small shops are back in business in the cities and towns; forced collectivization of agriculture has ceased, and over 80 percent of the collective farms have been dissolved; and the Catholic Church, long the victim of Soviet-imposed tryanny,

has been freed of much of the restrictive pressure. Today, for the first time since the subjugation of Poland by the Soviet Union, the celebration of this date as National Day is permitted, although it may only be commemorated privately.

In the long view of history, the Communist system of government forced on Poland by the diabolical might of Russia is only transitory. Poland as a nation successfully opposed corruption of her principles of freedom in the past, and with her boundless devotion to liberty and democracy, will emerge victorious from Communist oppression. But she needs the encouragement and assistance of fredom lovers everywhere, and her history and record show that she deserves such encouragement and assistance.

When word of the Hungarian uprising reached the people of Poland, the nation as a whole manifested its complete sympathy and fullhearted assistance. In every Polish town and village a committee for "Help to Hungary" was formed. The people of Poland, though in dire economic straits themselves, thought well enough of the Hungarian battle for freedom to offer their own sorely needed food and clothing. We can hardly do less for Poland in its struggle out of enslavement.

Mr. Speaker, the United States has always championed the right of any people to choose their own system of government, for as Secretary of State Dulles has said, America must "encourage the evolution of freedom." Until the people of Poland regain their freedom, our own system of government is the less for it. The poet John Donne said it well: "Any man's death diminishes me, because I am involved in mankind."

We must pledge ourselves, on this anniversary of the Polish Constitution, to the support of any nation striving to be free of oppression; and to the brave people of Poland we must dedicate our unrelenting efforts to bring freedom from human bondage.

William H. Stafford, Statesman

SPEECH
OF
HON. LAWRENCE H. SMITH
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, April 29, 1957

Mr. SMITH of Wisconsin. Mr. Speaker, the death of William H. Stafford of Milwaukee means that Wisconsin has lost one of its outstanding citizens. For 20 years he served as a Member of this body representing the people of the Fifth Congressional District of Wisconsin.

As a boy I recall the activities of Mr. Stafford as he was well known in Racine, my home city. A review of his work as a Member of this great body reveals that he was a sound legislator. He was not given to breezy demagogic orations but was content, as we say in Wisconsin, to "saw wood." He had a job to do in this body and he did it without fuss or fanfare. The fact that he was a member of the Appropriations and Military Affairs Committees, too, is evidence of the high regard which the leadership in this body considered him.

My early recollections of his activities here came as a result of his attitude and his vote against our entry into World War I. He followed the leadership of that great American, Senator Robert M. La Follette, Sr. I think it can be said Mr. Speaker, that time has vindicated the action of Mr. Stafford on that proposition.

After leaving this body, he returned to his home city, Milwaukee, where he practiced law for many years, in fact, I believe up until the time of his death.

The Republican Party of Wisconsin can be proud of the record that Bill Stafford made as a Member of this great body.

Theodore Roosevelt Centennial

EXTENSION OF REMARKS
OF
HON. STEVEN B. DEROUNIAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. DEROUNIAN. Mr. Speaker, it is my pleasure to request that there be printed in the Appendix of the RECORD a concurrent resolution passed by the New York State Legislature on March 30, 1957, setting up a committee to work with the Theodore Roosevelt Centennial Commission, created by the United States Congress, for the celebration of the 100th anniversary of the birth of the great Theodore Roosevelt:

Resolution 64

Concurrent resolution creating a joint legislative committee to cooperate with the Federal Commission in honoring the memory of Theodore Roosevelt and celebrating the centennial anniversary of his birthday and making an appropriation for its expenses

Whereas the Congress of the United States has created the Theodore Roosevelt Centennial Commission of 15 members, including President Eisenhower, Vice President Nixon, and 4 Members of Congress from New York State; and

Whereas Theodore Roosevelt was born in New York State, grew up in New York State, and served as a member of the New York Assembly and as Governor of New York before going on to become President of the United States; and

Whereas the year 1958 is the centennial anniversary of the birth of the great Rough Rider; and

Whereas the State of New York is justly proud of her citizen who acquitted himself so well in war and peace; and

Whereas it is fitting and proper that the State of New York should cooperate with the Commission created by Congress in the celebration of the centennial anniversary of Theodore Roosevelt's birthday: Now, therefore, be it

Resolved (if the senate concur), That it is the sense of the legislature that the State of New York should cooperate and lend assistance to the successful celebration of the centennial anniversary of Theodore Roosevelt's birthday; and be it further

Resolved (if the Senate concur), That a joint legislative committee be and it is hereby created to serve until December 31, 1958, to be known as the joint legislative committee for the Theodore Roosevelt centennial. Such committee shall consist of 3 members of the senate, to be appointed by the temporary president of the senate; 3 members of the assembly, to be appointed by the speaker of the assembly. Any vacancy in the membership of the committee shall be filled by the officer authorized to make the original appointment. Such committee shall, at such time or times as may be appropriate: (a) attend, on behalf of the State of New York, at appropriate ceremonies or other occasions of the centennial celebration; (b) formally convey at such ceremonies and occasions the greetings and felicitations of the State of New York; and (c) extend suitable greetings and courtesies to representatives from the Congress of the United States and other persons who may participate in or attend the centennial celebration. Such committee is empowered otherwise to act on behalf of the State in the observance of the Roosevelt centennial. Such committee may request and shall receive from all public officers, departments, and agencies of the State and its political subdivisions such cooperation and assistance as may be necessary or appropriate to carry out the purpose of this resolution; and be it further

Resolved (if the senate concur), That the sum of $10,000, or so much thereof as may be necessary, is hereby appropriated from the contingent fund of the legislature for the necessary expenditures of such committee, payable on the audit and warrant of the comptroller on vouchers certified and approved by the chairman of the committee in the manner provided by law; and be it further

Resolved (if the senate concur), That copies of this resolution be transmitted to the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States, and to each Member of Congress duly elected from the State of New York.

By order of the assembly:
ANSLEY B. BORKOWSKI,
Clerk.

In senate, March 30, 1957, concurred in without amendment.

By order of the senate:
WILLIAM S. KING,
Secretary.

Clergymen Outline Spiritual Implications of Labor Movement

EXTENSION OF REMARKS
OF
HON. GEORGE M. RHODES
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. RHODES of Pennsylvania. Mr. Speaker, three distinguished clergymen addressed the recent convention of the United Auto Workers Union on the spiritual, moral, and ethical implications of the labor movement. They were Msgr. George G. Higgins, director of the social action department of the National Catholic Welfare Conference; Rabbi Morris Adler, of Detroit; and Methodist Bishop G. Bromley Oxnam, of Washington. Under leave to extend my remarks in the Appendix, I include excerpts from the addresses of these clergymen, reprinted in the April 20, 1957, issue of the AFL-CIO News:

THREE CLERGYMEN OUTLINE SPIRITUAL IMPLICATIONS OF LABOR MOVEMENT

Monsignor Higgins: "It is my firm conviction that the American labor movement, in spite of its current problems, is basically sound from the point of view of Christian

social ethics and, in spite of its many shortcomings, a tremendous influence for good within the American community.

"To our way of thinking, it has certainly justified the encouragement and support which the Catholic Church has given it over the years and which it will continue to give it.

"The labor movement at the present is confronted with a very serious crisis—perhaps the most serious in its entire history. It is basically a moral and spiritual crisis and one which has its roots within the labor movement itself.

"Generally speaking, in the past the labor movement could, with a certain amount of justification, blame its troubles on real or alleged enemies outside its own ranks.

"Be that as it may, the labor movement's principal enemies are today within the fold. Labor is now discovering that no particular class of people in society has a monopoly on virtue, not even the workers. If the belated discovery of this self-evident truth is temporarily causing the labor movement a certain amount of embarrassment and discomfiture, in the long run it will undoubtedly be good for its soul.

"Congressional investigations, ethical practices committees, public review boards * * * can accomplish very little unless the rank and file are convinced that they have a moral obligation to assume their full share of responsibility for the conduct of union affairs."

Rabbi Adler: "Two facts mark our age above all others; one, the enormous extension of power that man commands * * * the new dimension of destructiveness which has come into human life.

"The second fact is the smallness of this contracted world and the consequent interdependence of all its parts.

"That added power must be matched by heightened moral sensitivity and social responsibility.

"Will our social system incorporate the disciplines of a higher morality so that our advances in technology, and in the tapping of unlimited power, may serve man and his welfare rather than make man the serf of the machine, the captive of the very engines he himself has devised?

"Will our thinking be geared to the fast-moving tempo of our life or will we content ourselves with the platitudes of the past and the clichés of yesterday? Will we preserve 18th century mentalities in a 20th century world?

"No group in the entire fabric of American life has striven to meet these issues as honestly, as morally and as unflinchingly as labor, and the UAW in particular. From labor there have come to many of us outside of its ranks comfort and hope. For that I humbly thank you."

Bishop Oxnam: "Sometime ago I was talking to Governor (Thomas E.) Dewey. He was still governor. We were discussing an economic question and the governor said, 'Bishop, when a minister discusses economic questions, he is just plain fuzzy minded.'

"I said, 'Governor, you may be right, but * * * what the preachers wrote into the social beliefs of the churches in 1908, you wrote into the platform of the Republican Party in 1948. In other words, we were fuzzy minded just 40 years before you.'

"I am happy to say there isn't a belief in the churches as written in 1908 that is not today in the laws of the United States or in the practice of our social lives.

"It is one thing for a preacher to say, 'Our Father.' It is another to live up to the ethical implications that flow from that. * * * It is a little bit embarrassing as a churchman to be taught the meaning of solidarity of the human family * * * by the American labor movement."

In Commemoration of Poland's Constitution Day

EXTENSION OF REMARKS
OF
HON. JAMES T. PATTERSON
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. PATTERSON. Mr. Speaker and distinguished colleagues, tomorrow we pause to celebrate Polish Constitution Day. It was on May 3, 1791, that a new birth of freedom occurred in Poland, and each year freedom-loving Polish people commemorate this day, even though during the past 13 years in Poland they have been forced to do so in secrecy.

Polish Constitution Day means to the American people more than just another historic date. For indeed the Polish people have, throughout the years, become so intricate a part of the American Republic that an unshakable bond of friendship exists between the two countries. Some of our finest citizens are of Polish descent and they, along with others, have worked unceasingly to elevate our Nation to a position where today we stand foremost among the world's powers.

And, Mr. Speaker, today let us also remember those heroic Polish individuals, like Casimir Pulaski and others who took so outstanding a part in the American Revolutionary War and even sacrificed their lives for the cause of liberty on this continent. When we think of those great men, we can more deeply comprehend the dauntless spirit and invincible fortitude with which the patriots of Poland seem determined to shake off the Soviet yoke, and which have commanded the admiration of the entire world, including no doubt that of the Soviet tyrants themselves.

It was 13 years ago, Mr. Speaker, that the last vestige of freedom disappeared in Poland when the Soviet Army began its oppression of the people. Since that time, Poland and other victims of Soviet tyranny have looked to the West with hope and confidence that their freedom would be an important goal of the United Nations. Unfortunately, largely through reluctance of the Soviet Union, the United Nations has failed miserably in the execution of its solemn obligation of fostering the right of national self-determination among nations, and Poland together with other captive nations remains at this very moment a victim of gross neglect of duty on the part of the United Nations.

Mr. Speaker, we in the United States wish to see our freedom-seeking friends in Poland completely free from the chains of Communist bondage. We wish to see the sacred political right of national self-determination restored in Poland. The demands made last July by the Polish people for bread and freedom from Russian oppression were only one more positive indication that national self-determination is not enjoyed in that country.

Now it is true that the bloodless revolt against the Comumnist regime last July in Poznan did result in liberalized policies toward the populace. Poland is more independent of Moscow today than she was 1 year ago, and certain discernible traces of democracy can be found in the country, to the dismay of the Kremlin. But Mr. Speaker, the Polish people still have a Communist government—the same form of government that has kept the people in chains now for 13 years—and just as a goose is a goose, a fox is a fox, and a snake is a snake, so is communism communism, even though some propagandist might attach the prefix national before the term in order to further hoodwink the victims. What the people of Poland want and deserve, my friends, is democracy—not communism.

Therefore, Mr. Speaker and my distinguished colleagues, as we commemorate Poland's Constitution Day, let us remember that it is not kind words, but rather concrete action that brings freedom to suppressed nations. And I believe that one of our highest tributes to Poland would be the passage of a resolution by this body that condemns the Soviet Union for its unwarranted interference in the internal affairs of Poland, and at the same time calls upon the United Nations to take concrete action designed to restore to Poland and other captive nations the right of national self-determination.

Poland's Struggle for Freedom

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. ANFUSO. Mr. Speaker, May 3 of each year marks the anniversary of the adoption of the Polish Constitution of 1791, one of the first democratic documents of its kind in Europe and one of Poland's great contributions to the development of the concept of human freedom. On this occasion it has become customary for the Members of Congress to express the friendship of the American people toward the people of Poland and to wish for them the early liberation of their country from Communist oppression.

This year the hope for their liberation seems more realistic. A series of events which have taken place during the past year afford all freedom-loving people greater hope and encouragement in the struggle for Poland's freedom. The Poznan uprising last June, the bloodless revolt led by Gomulka last October, and the heroic Hungarian revolution, have demonstrated the total bankruptcy of communism and its influence in the eastern European satellite countries.

The requests for bread, freedom and the withdrawal of Russian troops from Poland only proved that communism has brought Poland and the other subjugated countries to a state of economic ruin and political enslavement. Of particular interest was the fact that the request for withdrawal of the Soviet Army from Polish territory emphasized in no uncertain terms that the Polish nation does not desire to be a part of the Soviet military bloc.

The events of last October have brought a certain degree of liberalization in Poland. The Gomulka government is seeking greater freedom for its people, independence from the Soviet Government, and a closer rapproachment with the West. At the same time, Russia is giving clear indications it will not tolerate a return of democracy in Poland. This perhaps may foreshadow a clash sometime in the future.

In this struggle of the Polish nation to achieve freedom, the eyes of its people are turned primarily toward America for encouragement, for friendship and for sympathetic understanding. It is, therefore, most appropriate to utilize this occasion of the anniversary of the Polish Constitution for expressing our solidarity with the people of Poland. To them and to their kinsmen in America, who have never forgotten them in their tragic plight under the yoke of communism, we send our heartfelt greetings and our best wishes that Poland will soon be truly liberated and join the family of nations as a free and independent nation.

Facts About the Confectionery Industry in Massachusetts

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD I wish to include a statement of facts about the confectionery industry in Massachusetts, which has been compiled by the New England Manufacturing Confectioners Association, 261 Franklin Street, Boston, Mass. This information will be of interest to each and every Member of the Congress.

The statement follows:

FACTS ABOUT THE CONFECTIONERY INDUSTRY IN MASSACHUSETTS

1. Confectionery manufacturing is one of the ten leading manufacturing industries in Massachusetts.

2. There are 155 manufacturing confectioners in Massachusetts, including 30 manufacturing wholesalers and 125 manufacturing retailers.

3. For many years Massachusetts ranked first in the manufacture of candy and still is the leading center for packaged chocolate candies.

4. The candy produced in Massachusetts has a retail value in excess of $180 million.

5. Massachusetts produces about 12 percent of all candy made in the United States with only Illinois, Pennsylvania, and New York exceeding that percentage.

6. Capital invested in real estate, machinery, inventory, and other assets is in excess of $50 million (not including rented property which is quite substantial).

7. There are approximately 10,000 employed in the industry of whom 3,500 are men and 6,500 women.

8. The total payroll is in excess of $25 million. Wages are in line with prevailing rates of other industries.

9. Massachusetts candy manufacturers use millions of dollars of dairy and agricultural products produced or processed in part at least in Massachusetts: 9,500,000 pounds of milk, butter, eggs; 100 million pounds of sugar; 49 million pounds of corn sirup; 11 million pounds of peanuts; 3,200,000 pounds of tree nuts.

Massachusetts candy manufacturers also use vast quantities of fruits, flavoring materials from domestic sources, and cocoa beans, coconut, and other products grown in other parts of the world.

10. On the candy-consuming side of this picture, 83 million pounds with a retail sales value of $60 million are eaten annually in Massachusetts.

Solons

EXTENSION OF REMARKS
OF
HON. CARL T. DURHAM
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. DURHAM. Mr. Speaker, it occurred to me that the Members of the House would be interested in seeing an editorial in my hometown paper, the Chapel Hill Weekly, written by Louis Graves, former owner and editor of the paper and now a special contributing editor. Mr. Graves has written of the derivation of the world "solon," and I think my colleagues will be interested in his editorial, which appeared in the April 30, 1957, issue of the Weekly:

SOLONS

You have noticed, of course, the frequent use of the word "solons" in the North Carolina newspapers. I do not see it in any of the 4 big city papers I read regularly, 2 from New York, 1 from Boston, and 1 from Baltimore. Whether or not it appears in papers in other parts of the country I don't know.

The word is used to mean the members of legislative bodies, Congress and the legislature, and almost always appears in the plural. Also, it almost always appears in a headline, not in the body of an article. The reason for its being desirable for a headline is that it is short: it serves as a substitute for Members of Congress or members of the legislature. As a headline word it is like Ike for Eisenhower or the President, or like probe for investigation.

I suppose there must be a great number of people who see the word "solons" in the newspaper without knowing where it came from, and it occurs to me to set down here a few lines of information about its source.

Solon was an Athenian statesman of six-hundred-and-something B. C. He was also a poet and a warrior, but his poetry and his military exploits were minor achievements. He is spoken of, when he is spoken of at all, as a lawgiver. Probably the members of our legislature would be pleased to know, when they see themselves called solons, that Solon was a reformer. He helped the peasants who were being defrauded by landholders, outlawed contracts in which a person's liberty might be pledged, and regulated the expenses of funerals and other functions. In general his reforms were a move toward moderate democracy.

I suppose that the two most famous lawgivers in history are Moses and Solon. Moses, on account of being in the Bible, is vastly the more famous of the two. The name Moses contains the same number of letters as the name Solon. This may prompt somebody to say: "Moses being as short a name as Solon, and the man Moses being so much better known than the man Solon, why don't the headline writers use the name Moses for members of legislative bodies? Examine carefully the spelling of the two names and you will see why. Moses ends with an s. To make it a plural the headline writer would have to add -es. So, the members of the legislature would be Moseses. That would be an impossible word for a headline.

I don't know what to suggest, but I do wish the newspapers that use the word "solons" day after day would find some substitute. It gets very tiresome.

New Hampshire Rejects Aid to Tito Program

EXTENSION OF REMARKS
OF
HON. LAWRENCE H. SMITH
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. SMITH of Wisconsin. Mr. Speaker, under leave to extend my remarks I am including an article from the Manchester (N. H.) Union Leader containing the results of a recent poll on the aid to Tito program. The people polled by this great newspaper rejected completely the idea that we should be doing business with Communist Yugoslavia.

The article follows:

READERS OBJECT TO HELPING REDS, 1,657 TO 17—NEW HAMPSHIRE POLL RAPS TITO AID

The recent poll conducted by the Union Leader on the question of economic aid for Marshal Tito of Communist Yugoslavia shows that 99 percent of the ballots received expressed opposition to such aid.

Readers were asked to check one of the following alternatives: "I am opposed to further aid for Tito of Communist Yugoslavia" or "I am in favor of continued aid for Tito of Communist Yugoslavia."

ONLY 17 IN FAVOR

Of the 1,674 ballots received in the poll conducted on March 14, 15, 16, 18, and 19, only 17 persons expressed themselves as being in favor of aid for Tito.

The results are in sharp contrast with an earlier poll conducted by Representative PERKINS BASS in which he said a "surprising" 62.6 percent of those polled were in favor of aiding the Yugoslav dictator.

It is reported that Mr. BASS conducted his poll only in the 2d District. Results of the Union Leader poll in the 2d District show that 468 of 477 persons or 98.1 percent of those who sent in their ballots were opposed to aid for Tito.

Results from the 1st District show that 1,168 of the 1,176 ballots received, or 99.3 percent, were opposed to sending tax money to Red Yugoslavia.

All of the replies received from out of State were opposed to aid for Tito.

The grand total of 1,674 replies nearly equaled the almost 2,000 ballots returned in an earlier poll, protesting the proposed visit of Tito to the United States.

Issuance of Tax Writeoff Certificates to Idaho Power Co.

EXTENSION OF REMARKS
OF
HON. AL ULLMAN
OF OREGON
IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1957

Mr. ULLMAN. Mr. Speaker, today I received a letter from Mr. Clyde T. Ellis, general manager of the National Rural Electric Cooperative Association. Mr. Ellis's letter contains an excellent summary of the serious issues raised by the recent decision of the Office of Defense Mobilization, granting the Idaho Power Co. accelerated tax amortization certificates for two small dams on the Snake River.

Mr. Speaker, I believe the contents of this letter will be of great interest to my colleagues and I ask that it be included in the Appendix of the RECORD:

The letter follows:

NATIONAL RURAL ELECTRIC
COOPERATIVE ASSOCIATION,
Washington, D. C., May 1, 1957.

Hon. AL ULLMAN,
House Office Building,
Washington, D. C.

DEAR MR. ULLMAN: As you know, on April 25, 1957, the Office of Defense Mobilization granted Idaho Power Co., a Maine corporation, an accelerated tax amortization certificate on Brownlee and Oxbow Dams on the Snake River in the amount of $65,198,000.

This action, granting a Federal subsidy reward to the power company for killing the high Hells Canyon Dam and partially destroying a great natural resource simply cannot be tolerated by the American people. ODM's action should assure congressional passage of the Federal Hells Canyon legislation sponsored by Senator WAYNE MORSE (Oregon) and Representative GRACIE PFOST (Idaho), Representative AL ULLMAN (Oregon), Representative EDITH GREEN (Oregon), Representative LEE METCALF (Montana) or CHARLES PORTER (Oregon).

The Idaho Power Co. has asked for and hogged a $30.5 million interest-free loan to build two run-of-the-river runts on the Snake in lieu of the Federal Hells Canyon project. In applying for its Federal Power Commission licenses, the Idaho Power Co. testified and the America's Independent Electric Light and Power Companies stated in a million-dollar advertising campaign that Idaho Power Co.'s proposed plan would not cost the Nation's taxpayers a dime. This recent action by ODM is a contradiction of these statements and amounts to a serious charge, it seems to me. The interest-free Federal power company loan projected over the 50-year normal life of hydroelectric projects will give Idaho Power a total subsidy of $329.3 million, more than three times the cost of the two little dams.

The Congressional Joint Committee on Internal Revenue Taxation, under the chairmanship of Senator Harry BYRD (Virginia), completed a study of the rapid tax amortization program this past January, in which it concluded, "Rapid amortization is a form of government assistance to private manufacturers, or, bluntly, a subsidy". This same interpretation has been upheld in Federal Court and by the Federal Power Commission. Under the disguise of "defense" this Wall Street-controlled Maine corporation is seeking to justify its blatant raid on the Federal Treasury. In actuality, the Idaho Power Co. is sacrificing precious kilowatts needed for defense purposes, and has asked, and has been granted by ODM a subsidy from the American taxpayers' pocketbook to finance this sacrifice of the people's resource for its own gain.

The tax subisidies for Idaho Power flouts the entire purpose of the Defense Mobilization Act. The act's sole purpose was to induce business to construct for defense purposes that which it would not otherwise construct. Idaho Power's partial development and simultaneous partial destruction of the Snake River resource would thus be a subsidized betrayal of defense.

The high Hells Canyon project proposed by the Army Corps of Engineers and built by the Federal Government would not cost the taxpayers of America a cent. It has been proven over and over again that these highly feasible multiple purpose projects return the total Federal investment to the United States Treasury plus interest over a very short period of time and in the long run actually result in a profit for the Federal Government.

Moreover, the high Federal Hells Canyon Dam would produce 400,000 kilowatts more prime power than the Idaho Power Co. runts. To forever waste this precious resource would be an unforgiveable sin. Power from the Federal dam would cost consumers 2.7 mills per kilowatt-hour, whereas the cost from the Maine corporation's dams would be 6.69 mills per kilowatt-hour.

Additionally, the high Federal Hells Canyon Dam would provide 1.3 million acre-feet of flood control storage more than the Idaho Power's scheme, and 2.88 million acre-feet more usable storage capacity than the Idaho Power's dams.

Furthermore, vast low-grade phosphate deposits in Idaho would be developed for needed low-cost fertilizer if the Federal high dam is built. They cannot be developed with the less abundant, higher-cost power from the private development.

The $329.3 million ultimate subsidy for Idaho Power exceeds the cost of the two projects by $226,222,781. The estimated cost of Brownlee and Oxbow is $103,070,000. Thus we, the taxpayers, would be giving the Wall Street monopoly the dams, losing a high percent of the site's power potential, losing all the benefits and giving the company a big extra cash windfall besides.

Without the high Hells Canyon Dam and the other developments that should follow, the northwest faces an energy shortage that staggers the imagination. Already the Bonneville Power Administration, which markets the Federal wholesale power from the dams, has put a lid on the rural electric systems in their resale of power for larger uses.

The only answer to this unjustifiable outrage is for the Congress to immediately call up and pass the legislation authorizing a Federal high Hells Canyon Dam.

I urge you to seek immediate passage of the Federal high Hells Canyon bills.

Sincerely,

CLYDE T. ELLIS, *General Manager.*

LAWS RELATIVE TO THE PRINTING OF DOCUMENTS

Either House may order the printing of a document not already provided for by law, but only when the same shall be accompanied by an estimate from the Public Printer as to the probable cost thereof. Any executive department, bureau, board, or independent office of the Government submitting reports or documents in response to inquiries from Congress shall submit therewith an estimate of the probable cost of printing the usual number. Nothing in this section relating to estimates shall apply to reports or documents not exceeding 50 pages (U. S. Code, title 44, sec. 140, p. 1938).

Resolutions for printing extra copies, when presented to either House, shall be referred immediately to the Committee on House Administration of the House of Representatives or the Committee on Rules and Administration of the Senate, who, in making their report, shall give the probable cost of the proposed printing upon the estimate of the Public Printer, and no extra copies shall be printed before such committee has reported (U. S. Code, title 44, sec. 133, p. 1937).

GOVERNMENT PUBLICATIONS FOR SALE

Additional copies of Government publications are offered for sale to the public by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., at cost thereof as determined by the Public Printer plus 50 percent: *Provided,* That a discount of not to exceed 25 percent may be allowed to authorized bookdealers and quantity purchasers, but such printing shall not interfere with the prompt execution of work for the Government. The Superintendent of Documents shall prescribe the terms and conditions under which he may authorize the resale of Government publications by bookdealers, and he may designate any Government officer his agent for the sale of Government publications under such regulations as shall be agreed upon by the Superintendent of Documents and the head of the respective department or establishment of the Government (U. S. Code, title 44, sec. 72a, Supp. 2).

PRICE OF THE CONGRESSIONAL RECORD

The Public Printer is authorized to furnish to subscribers the daily RECORD at $1.50 per month, payable in advance.

Remit by money order payable to Superintendent of Documents, Government Printing Office, Washington 25, D. C.

CHANGE OF RESIDENCE

Senators, Representatives, and Delegates who have changed their residences will please give information thereof to the Government Printing Office, that their addresses may be correctly given in the RECORD.

RECORD OFFICE AT THE CAPITOL

An office for the CONGRESSIONAL RECORD is located in Statuary Hall, House wing, where Mr. Frank Brodie is in attendance during the sessions of Congress to receive orders for subscriptions to the RECORD at $1.50 per month, and where single copies may also be purchased. Orders are also accepted for the printing of speeches in pamphlet form.

CONGRESSIONAL DIRECTORY

The Public Printer, under the direction of the Joint Committee on Printing, may print for sale, at a price sufficient to reimburse the expenses of such printing, the current Congressional Directory. No sale shall be made on credit (U. S. Code, title 44, sec. 150, p. 1939).

Appendix

What To Expect From Foreign Aid

EXTENSION OF REMARKS
OF

HON. ALVIN M. BENTLEY

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. BENTLEY. Mr. Speaker, under leave to revise and extend my remarks in the Appendix of the RECORD, I wish to insert the following article from the May 1957 issue of the magazine Nation's Business entitled "What To Expect From Foreign Aid":

WHAT TO EXPECT FROM FOREIGN AID

(By Howard S. Piquet)

Congress soon must decide the wisdom of adding new billions to the $64 billion of American taxpayers' money which already has been made available to the world since the close of World War II.

The decision facing Congress is:

1. Should any or all of the more than 2,000 foreign-aid projects now under way be discontinued?

2. Should they be continued as they are?

3. Should they be modified, and how?

Much of the debate leading to the final decision will center around the question "How much?

This is not the only important question of interest to Americans.

One of our national weaknesses is failure to distinguish between the simple and the complex. We debate foreign aid as though we are dealing with simple aggregates that are either all good or all bad.

The fact is that foreign aid is not a simple—or even a single—issue. It is a bundle of issues as well as part of the much larger problem of foreign policy.

The question we really need to answer then is:

How far can we depend on foreign aid as an instrument of our foreign policy?

For the first time in 10 years we are making an intensive effort to answer that question. The Senate, through its Foreign Relations Committee and a special committee on foreign aid, has already released a number of the research reports being made under its auspices and has been holding hearings on them.

It is also sponsoring 10 on-the-spot surveys of our foreign-aid programs.

The House Foreign Affairs Committee is making its own studies.

The administration has sent a Citizens' Committee, headed by Benjamin Fairless, around the world to see what foreign aid is accomplishing. The Committee's report proposes that foreign-aid programs be continued at about their present levels, with greater emphasis upon the making of private investments.

Also, the President's International Development Board, headed by Eric Johnston, has recommended a large, long-range aid program for economic development.

The administration's proposals for next year's foreign aid program will be based upon some sort of compromise between these reports.

So it seems likely the American people will be committed to adding new billions to the $64 billion they have already made available to other countries. More than $49 billion of this has been outright grants and slightly less than $15 billion has been loans and credits. Through the past decade we have been helping other countries to the extent of slightly more than 1.8 percent of our gross national product.

It is reasonable that a people with this kind of continuing investment in foreign aid should ask such questions as:

What are we trying to do?

How could we do it better?

What's wrong now?

The basic answer to the first question is simple enough: We are trying to protect the United States.

THE PURPOSE

If it is true that the arc extending from the Aleutian Islands through Japan, Korea, Formosa, and southeast Asia is the western frontier of the free world, it follows that it must be defended militarily.

Because of the need for defending it, our foreign-aid programs, since 1950, have taken on more and more of a military complexion. Of the nearly $5 billion the administration asked for foreign aid last year, $3 billion was for direct military assistance and an additional $1 billion was to support the economies of countries whose military strength is essential to our own safety.

In only one area—Latin America—is economic aid larger than military aid. However, the total sums being spent in that part of the world are relatively small. About 36 percent of all nonmilitary aid currently goes to Asia and 29 percent to the Near East and Africa.

Almost one-half of direct and indirect military aid goes to Asiatic countries, principally in the Far East. One-fifth goes to Western Europe and about 15 percent to the Near East and Africa. Another 15 percent is not earmarked by region.

Unless military assistance can be justified in terms of the military security of the United States, it cannot be justified at all.

The cost of maintaining a Korean or free Chinese soldier is but a fraction of the cost of maintaining an American soldier.

Since it is the judgment of our military authorities that the nationals of these countries make excellent soldiers when properly equipped, we would be acting contrary to our own self-interest if we did not rely upon them as far as possible for military defense.

Much can be said for not including military assistance and defense support as a part of foriegn aid at all. What we spend to strengthen the military establishments of such countries as Korea and our NATO partners might more properly be considered as part of our military budget.

If these two items are viewed as part of the military budget, the magnitude of the foreign-aid problem shrinks enormously.

What is missing in much of our foreign-aid activity is an appreciation of the differences between the problems that we face in different parts of the world.

This can be illustrated by examining our foreign-aid programs within a given area, such as the Far East. What is appropriate in one country can be quite inappropriate in another.

In Korea, for example, our problem is almost entirely military. Korea is still in a state of suspended war. Her hopes rest upon the presence of American and other United Nations troops on her soil. Koreans feel that as long as these troops remain there, Korea will not be abandoned to the Communists should the latter decide to move again.

Without substantial economic aid for a long time to come it will not be possible for Korea to establish anything approaching a self-supporting civilian economy.

As long as it is our policy to maintain the present line of defense in the Pacific, the objective of our foreign policy in Korea is clear. Foreign aid, military and economic, is the key here.

In Formosa our intention from the start has been to prevent the island from going Communist. This has been accomplished.

As long as we intend to hold the present line of defense in the Pacific it is also necessary that the military defense of Formosa be assured. But since 1950 we have gone a long way in providing aid for other purposes. Whether we should be spending so much there, relative to other areas, is debatable. Economically, Formosa is relatively prosperous. The total volume of industrial production is 70 percent higher than the highest level that was reached under Japanese rule. If Formosa did not have to maintain so large a military establishment its economy could stand on its own feet.

In the Philippines, because of our unique relationship to that nation, whatever we do, or fail to do, there is maximized in importance throughout Asia.

Although the Filipinos are disposed to spend little of their own budget for defense, they are willing to provide military manpower if the United States will provide funds and equipment.

The natural wealth of the Philippines is great, but the people don't seem to be able to exploit it. In fact, top managerial skill is one of the country's most serious shortages. Here is an area where the United States can make a lasting contribution. On the capital investment side, there are serious obstacles, largely of the Filipinos' own making. Their tax system favors real estate, with the result that capital stays invested in land in preference to taking risks in industry.

The Philippines would undoubtedly welcome a great deal of aid from the United States. Because of our large military aid programs in Korea and Formosa, the level of aid that we give to the Philippines is a touchy question that needs to be examined at the highest levels.

Japan is probably the area most challenging to United States foreign policy. If she were to desert the free world our position in the Pacific would become practically untenable.

The islands lack resoruces and are overpopulated. Japan's existence depends upon her ability to sell manufactured goods to other countries to pay for the raw materials which she has to have.

At present Japan is relatively prosperous.

Fundamentally, however, the economy is in a precarious position. Economic recession elsewhere in the world would quickly be communicated to Japan. Similarly, action by other countries against the importation of Japanese merchandise could wreck her.

For these reasons, direct aid is not as important to our policy in Japan as elsewhere.

Most of the $3 million being spent there is to help organize Japanese-American productivity teams to improve the efficiency of Japanese industry. Our Military Establishment also provides jobs for many Japanese. However, the assistance that Japan wants, and needs, is access to raw materials and world markets.

Basically, the Japanese people are friendly to the United States. As victors in the war, we did not pillage and plunder, but helped them when they needed it most. This they remember.

Superimposed upon this floor of good will, however, is a coating of anti-Americanism which is partly of our own making. Intelligence and imagination on our part can eradicate this feeling. Obtuseness, however, could lead to disaster.

The Japanese have cooperated well in curtailing trade with the Communist bloc. However, when they see some of the countries of Western Europe trading with Red China they wonder why they should continue to cooperate—a feeling that is aggravated by the prohibitions against Japanese goods that these same countries are imposing.

At the same time, they smart under the criticism that they are not spending enough for military preparedness—notwithstanding the fact that only a decade ago the United States insisted that they write into their constitution a prohibition against rearmament.

Expansion of our foreign-aid program in Japan is not the answer to the problem. In fact, if we were to increase our aid there we might actually do as much harm as good.

What is needed is imaginative thinking—far more imaginative than we have shown under our present trade policy—to evolve means whereby the Western World would, in fact, absorb a larger quantity of Japanese goods. The Japanese would like to do the thing that we can best afford to see them do—diversify their exports more widely.

In Thailand, the people are prosperous. They are well fed and produce a sizable surplus of rice. They do not have great aptitude for industry and they are fervent in their love of independence, which they have never lost. There is some danger that if we encourage them to industrialize, the Thai people might, on the one hand, become less happy and, on the other, become a tastier morsel for aggression-minded dictators.

In India nationalism is intense. Whatever we do there must be done in such a way as to avoid giving any impression that we are trying to tell them what to do. As long as India does not line up with the Communist bloc, but maintains her own brand of democracy, we had better be thankful.

To try to improve the lot of the Indians via direct economic aid would be a most difficult undertaking.

But to stand ready to assist India by way of investments, with no strings attached, while recognizing the right of Indians to pursue their own way of life, might be the most important thing that we can do there. In any event, most of the foreign aid of the kind being given to Korea and Formosa would be out of place in India.

SOME MAJOR DIFFICULTIES

The United States has been intimately involved in world affairs for a relatively short time.

We should not be ashamed of what we have done internationally. We have progressed remarkably in 15 years. What we need now are the skills in foreign relations that normally come only after generations of experience. Foreign aid is a potent instrument, but it must be used carefully and with discrimination. Still, examination of our aid programs in the field raises certain fundamental questions. Until they are answered, other questions as to details seem minor.

1. Are we trying to do too much, too quickly?

As the report of the Fairless committee points out, more than 2,000 foreign-aid projects are underway at present. It is doubtful whether there are enough people in the United States who know enough about the countries concerned to administer so many projects effectively.

Instead of deciding upon the dollar volume of foreign aid and then trying to get as many good people as possible to man the posts needed to administer that size program, it might be better first to ascertain the number of qualified people available and to adjust the aid programs accordingly.

Even with excellent administrators, it is probable that a small number of larger projects in a foreign country would be more effective than a large number of smaller projects. When the number of competent people available is limited this observation becomes even more important.

2. The number of Americans in the field who really understand the problems of the countries in which they operate is limited

It is almost impossible to administer a foreign aid program effectively without an understanding of the people of the country where we are operating, of its history, its culture, and its language.

Our top-ranking people in the field appear to be well-qualified except possibly for the linguistic requirement. But, in the down-the-line jobs we need better qualified people.

This is not to criticize the individuals who occupy these posts because, for the most part, they are sincere, hard-working public servants. The purpose of the observation is to urge the establishment of training programs throughout the next decade to train the number of people that are needed.

3. Our representatives in the field tend to keep their sights too low

Unless those who are administering foreign aid programs are fully aware of what the United States is trying to do, it is almost inevitable that paper pushing will take the place of analytical thinking.

There is too much emphasis upon "how much?" and "how quickly?" and far too little upon the "how?" and the "why?"

The meeting of deadlines for the completion of individual projects is less important than a continuing, searching, analytical review of the effectiveness of the aid program, as a whole, in a given country.

4. In some countries our personnel is being rotated too rapidly

In a hardship post, such as Korea, the tour of duty of American personnel is approximately 18 months. It takes much longer than this to learn the day-to-day aspects of one's job, not to mention learning something about the country's history, culture, and language.

Rapid rotation makes it difficult to administer our programs effectively. Sometimes, in case of disagreement between the national of the country receiving aid and the American responsible for administering it, the former has only to wait a few months until an inexperienced American replacement appears.

Unless a substantial number of qualified Americans stay on the job and see the programs through, we are going to be plagued by indecision and inefficiency.

5. There is unnecessary delay in making funds available to our field staffs

At present it takes more than 6 months to allocate funds to our people in the field, even after Congress has appropriated the money.

On top of this Congress requires that all but 20 percent of the funds appropriated in any fiscal year must be spent in the first 10 months of the year.

This leaves a period of 4 months, or less, in which to spend the funds for an entire fiscal year. It would be difficult to evolve a system better calculated to encourage haste and waste.

6. There is too much centralization of detailed decision making in Washington

Even after funds have been allocated, most contracts must be approved in Washington.

This has the double disadvantage of delaying actual decision making and of discouraging competent people from wanting to remain in the field.

With competent people in the field there would seem to be little reason why, within broad limits, the field administrators should not be allowed considerable leeway in the making of decisions as to detail.

7. Nationals of the countries receiving aid should play a greater role in initial planning

Although in some countries the nationals are brought in to consult with Americans during the early stages of an aid program, this is not always the case.

As far as feasible this should be done in order that aid will be cooperative. It helps avoid the impression that the United States is trying to tell other countries what to do.

8. The American public is inadequately informed regarding conditions in the countries receiving aid

We have an extensive program for disseminating information abroad regarding the United States.

The United States Information Agency is not permitted, under the law, to disseminate information in the United States.

It is important that Americans know more about the problems of the countries where they are giving aid. In some instances the public is actually misinformed regarding the nature of the problem.

There would seem to be room for some private organization—some foundation perhaps—to enter this field on a purely educational basis. A propaganda machine and program would be dangerous.

Since World War II we have demonstrated that we can produce, and share, great quantities of wealth. What we have not demonstrated is realization that, in granting foreign aid, the most important question is not its volume. A smaller amount of aid, given in a way that cultivates cooperation and good will, is more effective than a larger amount administered mechanically.

Chicago Honors a Great Army Engineer

EXTENSION OF REMARKS
OF
HON. BARRATT O'HARA
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Monday, April 29, 1957

Mr. O'HARA of Illinois. Mr. Speaker, by unanimous consent, I am extending my remarks to include the address of Judge Walker Butler at the dinner in Chicago on April 23, 1957, of the Society of American Military Engineers honoring Gen. Paul Berrigan, as follows:

Distinguished gentlemen at the speaker's table, equally distinguished ladies and gentlemen out in the audience, it is a privilege to have the opportunity to say a few words at this gathering tonight. I had the same honor, a year ago, to speak at the meeting at which time this organization inducted into office General Berrigan as commander of this post.

As I look back at what has been developing and what has been done in the course of the past year, I rejoice, as I am sure you do, at the fact that we have finally been successful in awakening an adequate number of groups and individuals here in the Midwest as to the possibilities and the necessities presented by the waterway facilities of our immediate vicinity. Throughout our country, in fact, people are beginning to take note that here, in Chicagoland, we have, by reason of the natural location of the

city of Chicago at the junction of the Illinois Waterway and the Great Lakes system, tremendous possibilities of development that no other city in the world can possibly equal, if we just have the men, the energy, and the determination to make use of what nature has provided for us here.

YEAR OF GREAT PROGRESS

Looking back at this year, thinking over the numerous developments that have taken place since General Berrigan took office as president of this organization a year ago, I can't help but reflect, and I hope that the people of the Chicago area are aware, as those of us in this room are aware, of the tremendous good fortune that came to Chicago when Gen. Paul Berrigan was assigned to this division.

During the years gone past we have become accustomed to excellence in service, to enthusiasm and cooperation, and to leadership in planning from the men who have led the Corps of Engineers in the Middle West. But never in the history of this organization—or in the history of the Middle West—have we had a man occupying the top spot in the Corps of Engineers who has given so wholly of himself and who has produced so much in the way of results, as has General Berrigan. I am delighted to have the opportunity here tonight to voice that considered opinion.

I could talk of a half dozen instances, of which I have personal knowledge, that demonstrate the unexcelled cooperation provided by the general and his staff. I know there are many other instances you folks know about. I am thinking, for example, of one important instance. I am thinking of the fact that it became vitally important to the development of a deep water harbor at Lake Calumet, that something be done with reference to the program for dredging that had already been scheduled for something like a year and a half ahead. I think it was in the 1955 schedule—if I am not mistaken. At any rate, it was something like a year and a half away—and it was needed immediately. Any of you who have had experience, as I have had, of dealing with government—I don't mean Federal Government alone—I mean any government—to get them to revise a schedule that had finally been agreed upon by those in charge of scheduling operations, will understand the feeling of hopelessness we had in our ambition to try to advance that scheduling of the dredging by 6 months. Maybe, we thought, if we had a couple of miracles, we might advance it 7 months, perhaps even 8.

To sum up what might have been a long, long story: We had the unprecedented result of having that scheduling advanced the full 18 months, so that it started right then, when we needed it. There is just one man in this room tonight that I know of who is entitled to the lion's share for having done that tremendously important and vastly valuable thing for the people of all the Middle West—and that is the gentleman we are honoring here tonight, at the conclusion of his first year of service as president of this organization—General Berrigan.

CONTRIBUTION TO CAL-SAG

I have had other experiences with him. For example, when it became a question of the continuation of work on the Cal-Sag Channel, when that tremendously important job faced the possibility that it was about to be halted—if we didn't furnish local cooperation required by the 1946 Rivers and Harbors Act—there was only one solution which could be worked out. That was the necessity of going to the legislature at Springfield 5 minutes after they opened their doors. No, I guess it was 2 minutes. They hadn't the opportunity to find their seats when the bill was introduced that would provide for the issuance of $6 million in non-referendum bonds for the purpose of acquiring land needed for spoil sites—needed for the relocation of utilities, and the various other things specified by the Congress as the things that had to be done by local interests before the Congress would consider an application to continue Federal appropriations. The committee of Congress had made it plain that it must be done, and done now. In that emergency, again, we had the invaluable assistance of the gentleman we honor here tonight. We drafted him to go to Springfield with us. It was my very great pleasure to present him to my former colleagues, the members of the senate in the General Assembly of Illinois.

As I said to him later, when he finished speaking, he had so forcefully presented the facts and figures at his fingertips and so logically presented the entire problem that he had the unprecedented experience of walking off the witness stand in the senate chamber without any member asking a single question. That bill was one of the first passed by the 1957 session, and it was promptly signed by Governor Stratton. General Berrigan, I salute you, for the grand help you gave to the people of this community, who have been fighting all these years to get something done for the waterways.

COOPERATION IN PROBLEMS

I could talk about a number of other experiences that I have had with our guest. Those I have related are just two examples of the great fortune the people of our community have had in obtaining the leadership and the patient cooperation that this man has displayed, trying to solve the intricate problems we have had here in Chicago. Perhaps this could be best summed up with the statement that at long last we had found a leader who not only understood the many problems confronting us—because he had devoted hours and days and weeks to a study of those problems—but most of all we found a man who inspired confidence in the highest degree.

Those of us who aren't directly connected with the Corps of Engineers, those of us who have stood, as it were, on the sidelines, and over the years have tried to stir up some enthusiasm to get the thing done—because we felt primarily it was a crime to have that advantage given to this area by nature, and not have enough sense to make use of it, those of us who recognized what a tremendous factor the completed Cal-Sag Channel will be in strengthening our national defense—we have been mightily inspired and encouraged by the example of this man, quietly and without fanfare, who has fitted right into the team as if he belonged on it all the days of his life, within short order after his arrival in Chicago. It demonstrated to us that he not only has the academic skills of a top-flight engineer, but he has the willingness to work with people. He has the ambition to see something performed, to see a job done.

It is that kind of men, God knows, that we need—people who deal with public work, conscientiously and efficiently. So here tonight, I am delighted to have the chance to say these few words of appreciation to him for what he has done for our community, as well as for the country at large.

NEED FOR PUBLIC WORKS

I was very much interested, just a day or so ago, to read a comment that came from a man who ought to know what he is talking about, Maj. Gen. John Bragdon, retired. He is President Eisenhower's special assistant and coordinator on public works planning. He said, and you may have seen it in the papers last Saturday or Sunday, "Public works problems are among the major ones involved in the complexities arising from overlapping jurisdiction within the metropolitan areas; the tremendous and growing need for public works exists throughout the country."

He urged that comprehensive and long-range planning for public works should be undertaken by the governmental body closest to the people, to the maximum ability of local governments to finance them. From the standpoint of taxpayers who pay for these things, they ought to be delighted to have somebody working at this job who gets it done. General Bragdon quoted Department of Commerce figures of 1954, showing the estimated requriements of State and local public works at $204 billion, and went on to say: "If we had decided to catch up in 10 years, from the standpoint of State and local governments, they would have to be spending more than $20 billion a year on new public works. Actually, the current rate is far short of this." I have quoted that to you to give you some idea of the overall importance of the kind of things with which General Berrigan has been engaged.

The production and provision of public works to take care of the tremendously increased demands of a population which is growing by leaps and bounds is very necessary. While I am on this subject, I will not be digressing too much—certainly not too long—if I make this comment: Those of us who are interested in public service cannot help but run head-on into a situation that gives us a great deal of concern. All of us, of course, are interested in and have approved plans that permit one who has spent years of his life doing a good job to look forward to security when the time comes that he is no longer able to carry his full share of the load.

SHAME IN FORCED RETIREMENTS

What I have to say here could not possibly be interpreted as a diatribe against pension plans and retirement plans, and that sort of thing, but I become concerned, and I become confused, when I see plans that require mandatory retirement of men in the full flush of their youth, at the age of 50, 51, or 52 years, who, by reason of our Federal laws governing our Army personnel, are required to step down under a mandatory retirement system that takes out of circulation these men right at the peak of their performance. To my mind, that is one of the crying shames of the age—the fact that that sort of thing should be tolerated.

A man who has the opportunity to spend 30 years in the active practice of his profession—I am speaking particularly of engineers now—I talk about that because they certainly suffer most of all under this inequitable system. Why, my friends, there is a provision under this compulsory retirement system that permits 10 percent of veterinarians to be retained. Somebody told me that the Army had been mechanized, and, therefore, certainly I would be justified in believing that the role of veterinarians would be somewhat reduced in importance to what it was at the time this law was passed.

Yet, there is a provision for the retention of 10 percent of the veterinarians, doctors, chaplains, whose importance I won't minimize—or other medical services. But no such provision is made for the retention of an engineer who has devoted 30 years of his life to learning the problems, and how to conquer those problems which lie within his province.

TIME TO EFFECT CURE

To my mind, it is time that something be done to bring in effect a cure of that situation. It is a tragic thing, not only to the taxpayer who has paid for the development and the training of that man, but it is a tragic thing to the man himself. At the age of 51 or 52 years, he finds himself forcibly separated from the service at a time when he is not being sought by industry because he is over 45 years of age—the time when the only thing left to him is to go out and develop his own business from the ground up. That just doesn't make sense. It is time

something was done about it. It is time that those of us who have the privilege of standing up in public and talking about that subject should present the facts on an inconsistent and indefensible situation.

The Chief Executive of this country ought to issue an Executive order suspending the effect of that kind of compulsory retirement, during a time when the need for trained engineers is so great and the necessity is equally great for the development of public works—certainly the public works we are talking about are the very ones the Corps of Engineers and all other engineers are required to be interested in.

Some kind of provision must be made that the men who have 30 years of experience under their belt who have acquired the know-how through the hard knocks of practical experience and who, for my part, are mere youngsters of 50 years, shall not be tossed into the discard. The idea of telling us that these fellows who graduated from West Point in 1926 or 1927 should now be forcibly retired strikes me as one of the most wasteful suggestions in many a year. Tonight we ought to be thinking about that problem. We ought to be thinking about what we can do to make certain that the man who has just reached the peak of his performance shall be given the opportunity to continue to deliver the goods, in service to the American public.

NEED FOR MORE ENGINEERS

As you consider that, think about what a crime it is to permit a reduction in the number of those actively practicing engineering. My attention was called this morning to an item that appeared in one of the morning papers which I thought might be interesting to you. It is entitled "A Message From Moscow" and is quoted from the news agency Tass:

"There were nearly four times as many engineers and technicians in Russia in 1952 as there were 25 years ago."

It goes on to talk about the production of materials. The thing that struck me was that, over there, they are producing more and more engineers, and they are giving them the opportunity to serve. Over here, we are producing engineers, but when they reach the age of 51, 52, or 53 years, we say, "You may no longer serve. You have fulfilled your usefulness so far as the Corps of Engineers is concerned."

To my mind, that is something we ought to do something about.

Finally, I saw a quote the other day that I thought might bear repetition here tonight. If I sound to you like I am very enthusiastic over the opportunity that has been given me to be associated with General Berrigan, that is exactly the impression I want to leave with you. I would like to quote these few words from one of our great industrial leaders who spoke before a national forum just a few days ago. He was speaking about our general situation here in this country.

FUTURE NOT FOR LITTLE MEN

He said, "When I see our population doubling, and perhaps redoubling in a single century; when I see the standard of living rising all over the world; when I contemplate the enormous drain upon our natural resources in the coming century; when I witness man's first faltering steps in an atomic age; when I watch him seeking to penetrate outer space; when I see him trying to harness the rays of the sun; when I observe his determination to unlock (if he can) the ultimate secrets of the universe, such as the creation of matter out of energy; when I comprehend in short the boundlessness of his expectations, I do know one thing. The future is not for little men with little minds. It is not for men without vision, who fear progress. It is not for timid men who early were frightened by the story of Frankenstein. No. The future is for men who dare to have great expectations, and who, with the guidance and encouragement of all the people for whom they strive will also have the courage, the persistence, the wisdom, and the patience to transform those expectations into reality."

That, ladies and gentlemen, is the kind of man Gen. Paul Berrigan has shown himself to be since the day he arrived in our midst.

A Practicing Lawyer Looks at the Labor Board

EXTENSION OF REMARKS

OF

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. WRIGHT. Mr. Speaker, under leave to extend my remarks, I include the thoughtful and informative remarks of the Honorable Joseph A. Jenkins, member of the National Labor Relations Board, before the Sixth Labor Law Institute of Southern Methodist University:

A PRACTICING LAWYER LOOKS AT THE LABOR BOARD

(Remarks of Joseph A. Jenkins, member, National Labor Relations Board, before the Sixth Labor Law Institute of Southern Methodist University, Dallas, Tex.)

When, as an attorney in private practice, one of my cases was under consideration of a Government agency in Washington, the question often would flit through my mind: "What on earth can those people be doing with my case all this time?" So, when I came to Washington as a member of the National Labor Relations Board last month, that was one of the things that I had promised myself I would find out: Just what happens to a case before the National Labor Relations Board when it gets up to the Board in Washington? I would like to pass on to you something of what I have learned during my 29 days' tenure on the Board. And, if I appear to dwell on detail, please bear with me; I do so only to demonstrate the manner and amount of the attention and time which are devoted to the cases that are contested up to Board decision.

Of course, it is a hoary truism that time is of the first importance in labor-management relations. So, as a point of departure in my look at the Washington operations, it seemed a good idea to check on the time element in a few cases. I was sworn in on March 28. That afternoon cases for the Friday agenda were put on my desk. I participated in two decisions on March 29. For that reason I chose those first two decisions as a point of departure in examining Washington operations. While neither of these cases turned out to be average cases in the statistical sense, they do seem to be fairly typical of Board operations. One was an election case, and the other a secondary-boycott case.

The election case was with the agency 133 days from the time the petition was filed until the Board issued its decision, directing an election. However, for 20 days of this time, the case was more or less in cold storage, while unfair labor-practice charges which had been filed against the employer after the representation hearing were investigated. The charges were dismissed by the general counsel, so the case rolled on through the mill. But what I was primarily interested in was, How long was the case before the five-member Board? Counting from the time that the case was actually assigned to a Board member, after the charges had been dismissed, 58 days elapsed before the Board's formal decision was mailed to the parties. However, it should be noted that this case reversed an earlier precedent and laid down a new rule on bargaining units in wholesale operations. Breaking these 58 days down a bit further, 45 days were occupied in analyzing the issues in the record, reaching the initial decision by the five members, preparing a draft opinion and circulating the draft among the Board members. Eleven days later, all five Board members had approved the draft, and 2 days later the decision issued.

The secondary boycott case was technically pending before the Board in Washington 133 days. That dates from the day the trial examiner issued his intermediate report and recommended order. Thirty-one days later the parties had filed their exceptions and brief. The case was then ripe for the process of decision, but it hit a snag. It was 69 days before a Board legal assistant was available to begin work on it. Thereafter, 64 days elapsed between the time the actual work of deciding the case began and the issuance of decision. Of these 64 days, it took 44 days for reading the record, making a decision by the Board members and preparing a draft opinion in accordance with that decision. Twenty days after the draft opinion was circulated among the Board members, the decision issued. In connection with this case, it is an interesting sidelight to note the time which elapsed in the collateral proceeding for the injunction which the statute requires to be sought on secondary boycott complaints. This proceeding in the Federal district court extended over 136 days, from the filing of the petition to the court's decision on the issue of whether there was reasonable cause to believe that the union had violated the act.

Of course, neither of these cases is yet closed. The election ordered still must be held. And it is possible that it might yet spawn a flock of objections. The Board's order in the secondary boycott case has to be complied with or enforcement sought in the courts. Also, as I mentioned, these are not exactly average cases in terms of time. A check of official statistics shows a median average in 1956 for an unfair labor practice case was just a trifle under 365 days from filing of charge to Board decision, compared with 281 days for the secondary boycott case we've been following. Moreover, the statute requires that a priority be given to the investigation of boycott cases. On representation cases, the average for 1956 was about 90 days from petition to decision. Of course, in both these average figures, I am speaking of contested cases that are carried up to the Board in Washington, not those that are settled or disposed of in the field.

In mentioning these figures of days and months I would not want to leave you with a picture of the four Board members who were then on the job as sitting around in their swivel chairs waiting for these two cases to come to the boil of decision. For example, they handled a few other matters during the 133 days that the boycott case was in Washington: They issued decisions in 469 contested cases and in 169 others requiring formal Board decisions—a total of 638 cases in which the litigants had piled up a mere 113,642 pages of transcript, not counting the briefs, exceptions, and such supplemental reading material. Also, of course, during this same period the Board members had their free time to deal with the usual run of motions for reconsideration and the varied procedural matters that counsel, statutory requirements, and administrative due process can raise.

Having waded with me through this swamp of statistics, perhaps you will be willing to come a few steps more on the dry land of Board case-handling procedure. The grand central station for cases coming to the five-

member Board in Washington is the executive secretary's office. He is the Board's equivalent of a clerk of the court. But he has more responsibility for getting the cases through to decision than a court clerk ordinarily has. One of his minor jobs is assigning cases. I say "minor," because cases usually are assigned to the Board members by rotation. When a case arrives in the executive secretary's office it is seldom—if ever—ready for assignment because of the pending backlog.

An unfair labor practice case is transferred to the Board when the trial examiner issues his intermediate report. Of course, at that time it cannot be known whether the case will ever be assigned to the Board members for decision; however, most of them are. Only about 12 percent of the unfair labor practice cases that are carried to a hearing stop with the parties' acceptance of the trial examiner's findings. So the case has to await assignment until the General Counsel or the other parties file exceptions and supporting briefs. This seldom takes less than the 20 days allowed by the statute and sometimes considerable more as extensions of time are sought and granted for valid reasons.

At the first of this month, for example, the Board had 270 cases on assignment to the Board members and an additional 131 cases ready and waiting assignment. Fifty-one more were on hand, but not yet ready for assignment, and 15 of these were unfair labor practice cases which were expected to be closed by compliance with the trial examiners' recommendations.

Technically a case goes from the executive secretary to a Board member. Actually it goes to a legal assistant of the member. Each member has a staff of legal assistants—currently about 14 are attached to each member. As the rest of the world, they are divided into Indians and chiefs. Each Board member has a chief legal assistant and usually 2 or 3 supervisors. The rest are what you might call the frontline Indians. They are the men and women who have the job of wading through all those pages of transcript and briefs to find the pertinent parts and the essence of the case. As they go along, guided by the supervisors, they sort out the simple and the complex, the hard and the easy—the points that are well settled from those that have never been tackled before. After they have determined the issues of the case, then they must seek out the law covering these points. I am told that, once in a while in their researches, they even find two Board decisions on the same point which might be said to be inconsistent with each other. And I am told also that they are not shy about pointing out these apparent inconsistencies to the Board members.

The fruit of this effort is a case analysis memorandum, usually as brief as a brief and similarly interlaced with citations to the record, the briefs and the books. This memorandum accompanied by the record, the briefs and the other supplemental reading matter make their way up through the supervisor and the chief legal assistant to the desk of the Board member. After the Board member has digested this material, there is ordinarily a case conference consisting of the legal assistant, his supervisor, the chief legal assistant and the Board member. The member, if satisfied, then approves the memorandum for circulation to the other Board members. It is then that the real job of deciding the case begins.

After the individual members have had time to digest the case, it then goes on the Board's case agenda for concerted consideration. These meetings, customarily called 3 days a week, are marked by a thorough and exhaustive discussion of the case and its issues, and exchange of views. This is the time of decision, and the discussion culminates in the vote of the Board members. The legal assistant assigned to the case and his supervisor and the chiefs are present for this discussion. The legal assistant notes the reasoning upon which the case is decided, and prepares a draft of an opinion accordingly. Occasionally, 1 or 2 members may disagree with the majority's decision, or its rationale. The dissenting member—or one of them—then has one of his legal assistants prepare a draft of a dissenting opinion for approval. The dissenting opinion, of course, also circulates to all Board members. I am told that on some occasions such dissents have been so powerful as to dissolve the original majority into a dissenting minority. But I am sure that dissenting members rarely even hope for so much. I still have my first dissent ahead of me. The two cases I mentioned participating in were both unanimous decisions of all five members, as is the case with the great bulk of decisions.

This obviously is a time-consuming process. As a consequence, the Board follows it only in cases which present novel, important, or difficult issues. Otherwise, the 5-member Board would never be able to keep up with its caseload, which requires it to turn out decisions in more than 110 contested cases every 20 regular working days. One shortcut that the Board employs in cases which appear to be clearly controlled by well-established precedent is to have the legal assistant draft a tentative opinion under his individual member's direction instead of a case analysis memorandum. In representation cases, this has been carried a step further in what Board personnel call the "short form." This is a form on which has been printed the stock language of Board decisions with space provided for typing in the specific data relating to the particular case.

But probably the most important step the Board has taken to expedite cases was to establish 5 3-member panels, as permitted by the act. Each member is chairman of a panel. While each panel meets, the two remaining members are free to study cases for the Board's case agenda and his own panel and to carry on other necessary business of his office. Meanwhile, the process of deciding cases goes forward. However, here, as with all the other shortcuts I mention, any one Board member has the power in any case he sees fit to call it up for consideration at an agenda meeting of the full Board. The panels handle most of the cases which are clear-cut enough to be prepared originally in draft form rather than dealt with by the memorandum process.

But even with these aids and shortcuts in paperwork, I have still found during my brief tenure that a Board member has indeed a full day. Not only is it necessary to study the essential papers of the cases with great care and consult frequently with your legal assistants but it is a great necessity to consult informally with your fellow Board members in order to understand their points of view and to get the benefit of their thinking on the broad matters of policy and administration.

Board members do not work any 40-hour week. Usually it is necessary to take a briefcase full of papers home at night so as to have an opportunity to go over the intermediate reports and various briefs involved. Considering the vastness of the territory covered, the number of cases involved, and the complexities of the issues, it seems to me that the Board is doing a fair job of turning out its cases. Nevertheless, we are constantly seeking ways and means of improving our production while at the same time maintaining a high quality of work. Our policy is to turn out cases as fast as time permits, considering the built-in delays in the form of time for filing briefs, etc., and considering the limited funds and personnel at our disposal.

The mention of policy leads into another topic which I early found to be the subject of much discussion in Washington and which I would like also to discuss briefly with you today. That is the matter of the Board's jurisdiction. I am sure that there is a good deal of interest and concern among you gentlemen as to the impact and implication of the Supreme Court's recent decisions in the Guss case and its companion cases.[1] I can assure you that there is no less interest and concern in Washington.

As to the scope of these preemption decisions, I'd like to call your attention to the first appraisal of them by a State court which I saw just before I left Washington. The opinion was that of a trial court in Illinois, where the judge said in a picketing case involving a retail automobile dealers' association:

"It is my opinion from a reading of these cases that the entire field is preempted by Congress; it is preempted and the State courts lack jurisdiction. I think the National Labor Management Act provides a comprehensive system for dealing with labor relations and dealing with unfair labor practices affecting interstate commerce."[2]

The judge went on to say: "I think the National Labor Relations Board, either directly or indirectly, controls all of the alleged unfair labor practices that are alleged here and has exclusive jurisdiction to determine the issues in controversy. The questions of picketing, boycott activities, secondary boycott, consumer pressure, and economic pressure for the purpose of obtaining recognition or union-shop agreements are, in my opinion, either directly or indirectly recognized and dealt with by the national act."

From some experience in dealing with the uncertainties of legal interpretation, I will not undertake at this moment to say whether this State court's reading of the Guss case defines with precision either way the reaches of the Supreme Court's opinion.

Also it should be noted that, in delving into this highly controverted field, I am not undertaking to speak in any way for my colleagues on the National Labor Relations Board. I shall confine myself merely to mentioning some of the possible avenues of dealing with the no-man's land which the Supreme Court found to exist between the present Federal field of activity and the limits of State power to act.

There appear to be four major alternatives:

1. Congress can act to reduce the area of Federal preemption;
2. The Board itself can lower its jurisdictional standards to extend its field of action;
3. The no-man's land can continue pending legislative or administrative action; or
4. The States can act to fashion statutory machinery so that the Board can, within the limitations of the existing Federal law, cede jurisdiction.

The Supreme Court made it amply clear in the Guss opinion that the only thing decided in these cases was that Congress had occupied and thereby preempted the field of labor-management activities covered by the Taft-Hartley Act when such activities affect interstate commerce. The Court also made it equally clear that Congress could, if it chose, reduce the extent of its preemption. The Court noted that "Congress is free to change

---

[2] *Puckett Buick Co.* v. *International Brotherhood of Teamsters*, Circuit Court of Knox County, Ill., Chancery No. 16485, reported in Daily Labor Report (BNA) April 19, 1957 (Judge Burton A. Roeth).

the situation at will." In this situation, it seems to me that Congress, if it wishes to act, has at least four choices:

First, it could declare the States free to act whenever the national Board declines to assert jurisdiction.

Second, it could permit such State action if consistent with the Federal law.

Third, Congress could empower the national Board to cede jurisdiction to the States in certain cases without the current requirement of consistency.

Fourth, it could define the Federal jurisdiction more precisely, and expressly leave the remainder of the field to the States.

If there is no action by Congress, then, the national Board must ultimately decide whether or not it should take any action. The Board, of course, could lower its standards for asserting jurisdiction. However, this might raise 1 of 2 problems, or perhaps even both of them: The Board's handling of cases would be slowed down by the influx of new cases. Or, it would be necessary for the Board to go to Congress for additional funds to handle the added load of cases.

One of the principal evils of delay in law administration, of course, is that it actually weakens the force of the law. One party or another in effect often loses his rights by the long delay in their vindication. So, if delay in adjudication were the only problem arising from a lowering of the Board's jurisdictional standards, it has been suggested that this might be counteracted by wider use of the Board's discretionary power to seek Federal court injunctions against conduct which the general counsel has denominated an unfair labor practice in a formal complaint.

Which of these four major alternatives will be followed I do not pretend to know. However, this much is certain: To some managements and employees of companies which are too big for State and simultaneously too small for Federal coverage the current situation may well prove unbearable. For example, the Illinois case I referred to earlier involved 10 retail automobile dealers and 2 labor organizations who have been embroiled in a labor dispute marked by picketing since May 1956.

If the Board lowers its jurisdictional standards will it be able to act on time to extend the benefits of the statute to small employers plagued by secondary boycotts, or act on time to guard the rights of employees guaranteed by section 7 of the act?

To my mind the jurisdictional problem is one of grave national concern, and I sincerely hope that it will be worked out satisfactorily, as its solution will have a profound and lasting impact upon the lives of the citizens of these United States.

Property Rights Voided

EXTENSION OF REMARKS
OF
HON. PAUL BROWN
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. BROWN of Georgia. Mr. Speaker, under leave to extend my remarks I include a timely editorial from the Augusta (Ga.) Chronicle of Tuesday, April 30, 1957, which propounds the question, in view of the Supreme Court's decision in the Girard College case:

Does any citizen of the United States any longer have the right to dispose of his own private property as he sees fit?

The editorial follows:

PROPERTY RIGHTS VOIDED

The United States Supreme Court, as it is now constituted, seems bent on stripping the States and individuals of their most cherished and fundamental rights.

Pursuing its policy of forced integration, the Court has ruled that Philadelphia's Girard College cannot exclude Negroes although it was established from funds left in a will which specifically directed that the school be built for poor white boys.

The high tribunal said that the board of directors of City Trust of Philadelphia, which administers Girard College, is an agency of the State of Pennsylvania; therefore, the Court decided, the college must come under the terms of its desegregation edict.

It mattered not to the justices that Stephen Girard, who died in 1831, directed the city in his will to establish and operate the college with admission limited to poor white orphan boys.

What the Court has said, in effect, is that a will which was binding in 1831 is not binding today; that a citizen of the United States, indeed, cannot direct the disposition of his own property.

* * * * *

What are we coming to in this country when the judiciary usurps the right of private property?

It is noteworthy that this right was upheld, as it properly should have been, by the Pennsylvania Supreme Court which found itself reversed by the United States Court in upholding the will. In the State court's opinion it said:

"It is one of our most fundamental legal principles that an individual has the right to dispose of his own property by gift or will as he sees fit. This right is so much protected that a testator's direction will be enforced even though contrary to the general views of society."

Those who believe in constitutional government were astonished when the Supreme Court, in its desegregation edict, made a decision based on sociology rather than on law. They are appalled now to see the Court, in its Girard College ruling, nullify, in effect, the right of the individual to do what he wants with his own private property.

The possible far-reaching effects of this latest judicial decision are frightening.

* * * * *

In view of this decision, does any citizen of the United States any longer have the right to dispose of his own private property as he sees fit?

This time, the high Court hung its decision on the peg that this particular trusteeship constituted an official agency. Next time, it might decide that it doesn't need any peg at all—that a man's will must be administered according to the whim of the Court.

An Open Letter to Members of Congress

EXTENSION OF REMARKS
OF
HON. JAMES B. UTT
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. UTT. Mr. Speaker, under leave to extend my remarks, I would like to include a very thought-provoking letter recently sent to me with the title "An Open Letter to Members of the Congress":

MY DEAR CONGRESSMAN: I have just read an interesting book—a prepublication copy of Eugene W. Castle's The Great Giveaway. It will be on the newsstands April 15 (published by the Regenery Co., of Chicago). It is a book which I most earnestly commend to the attention of every Member of the Congress.

This book is a factual discussion of the realities of foreign aid. Its theme is the foreign giveaway program, which big business, the big banking industry, big labor, and big government have exploited at the expense of the taxpayer; self-interest and self-aggrandizement which may mean the sacrifice of our national security.

Special interests and minority groups have been effective in putting over class legislation, but there is a rising ground swell of public protest, which at its crest will override special interests and minority self-seeking groups.

There is not only a grassroots rebellion against the unparalleled, recommended budget. A tax protest is in the making, as shown by the resolutions of 33 States for reconsideration of the Federal income tax, which will put the Boston Tea Party in the shade. It should completely revolutionize our tax structure and tax spending. It must, if we are to continue solvent as a nation. Mr. Castle has sensed the cause of this popular movement, and his book is a restrained, documented presentation of an all important national issue.

In the coming congressional elections the people will demand the right to be heard on the continuance of foreign aid. They will insist on immediate liquidation of all foreign giveaway programs.

The American people, regardless of party affiliations, want to end, and immediately, the squandering of their tax money on foreign aid. But they are not consulted as to their choice between continued suicidal spending, or reduction of taxes.

For a Government to borrow billions, as Mr. Castle points out, in order to give them away to foreign countries, is incredible folly.

Each year, patriotic members of the House vote for reduction and ending of foreign aid, only to have the "colossal super spenders"—a majority of the Senators, vote to increase the tax money to be spent without stint—money deducted from business, salary, wages or income.

Some Senators each year talk about reduction in foreign aid, but wind up voting for the free and unrestrained expenditure of tax money for such foreign aid.

"The time to close down Uncle Sam's Gift Shop is now," says Mr. Castle. After reading this book, I am sure you will agree with the author.

The question of foreign aid can only be answered by the Congress. Without appropriations, the giveaway will cease. The time has come to end the plundering of American taxpayers.

"What is mutual about the program of foreign aid?" asks Mr. Castle.

MSA in 1953 was transformed into FOA, to be liquidated in 1955. But, transformed again into ICA, it received a facelifting, and in 1956 another shot in the arm to the tune of $4 billion.

Gen. Patrick J. Hurley discovered and exposed the diversion of lend-lease equipment by Britain to our disadvantage—a fraud upon the American people and scandalous perversion of the intent of lend-lease. (Lohbeck: Patrick J. Hurley, The Regenery Co., Chicago, 1956).

The United Kingdom Commercial Corporation, a British Government owned institution, had been formed for the purpose of using American loans and American lend-lease supplies to establish an international trade monopoly throughout the Middle East, Africa and elsewhere.

Do you remember when we, in the United States, were unable to buy automobile tires during the war years, the British were selling

American lend-lease supplied tires in Iran? Just one example of British perfidy. There are many more.

We did sustain Britain, but now under her own steam, supplemented even by 40 billions of American aid, she apparently is not even a second-class power—a suppliant for handouts, waiver of interest payments on old loans, and a continual burden on American taxpayers, unless Congress puts a stop to Federal giveaway programs.

Mr. Castle cites the $6 billion worth of oil, gasoline, tanks, tractors, and all kinds of merchandise stored abroad during World War II. This we made available to the British at 10 cents on the dollar over a long period; but spending of any proceeds (which we will never receive) was restricted to the United Kingdom or some British possession.

Such disinterested observers as William Randolph Hearst, Jr., and Mrs. Norman Chandler, inform us there is no need for further foreign aid—countries abroad have never been so prosperous—but visionaries, such as Hoffman (out-Stassening Stassen), using White House visits for publicity propaganda, inform us that $200 billion over the next 5 years will be necessary for the administration program of "peaceful foreign aid."

In 1955, the FOA, under the discredited Stassen, in a single day gave away to the British $3 million worth of "fruit cocktails and canned pears, plus $6 million worth of fresh oranges, lemons and grapefruit, and cooked chicken, butter, cheese, milk, eggs." We not only, says Mr. Castle, announced the "come and get it for nothing" program, but we paid the freight for ocean transport. We aim to please.

Over $1 billion of MSR funds were used to finance the sale overseas of surplus United States agricultural commodities in the last 3 years. Who received the benefit of the bargain basement prices, asks Mr. Castel? Britain, of course.

Whether, through the "front door of dollar," or the barn door of "agricultural giveaway," we are squandering our national resources at the expense of the American taxpayer.

"The American people," says Mr. Castle, "have given of their treasure to support NATO in the staggering amount of $280 billion—equivalent to the total of the national debt."

Staggering. Yet true.

Since World War II, we have handed out the colossal sum of $55 billion, an amount equal it is estimated to the assessed value of the 13 biggest cities of this country.

The bookkeeping is so complex that last year there was the "lost" item of $363 million, but this didn't even cause a ripple of presidential concern. The Congress even doubled its appropriation, and, expenditures for additional public buildings, featuring a $56 million State Department annex, go on unrestrained. Incidentally, the administration budget contains new Federal programs, requiring, according to Senator BYRD, approximately $9 billion, of which some $2 billion would be spent during the coming fiscal year. Indefensible.

At home, MS, and its successors, continue to siphon out American tax dollars for the giveaway spending spree.

Investment by each Member of Congress in a copy of Mr. Castle's book, might bring invaluable results.

Some conclusions are inescapable:

1. Organizations, with world government as their objective, are insidiously striving for, and unless Congress acts under its legislative power, will ultimately be given the power to tax and spend to an unlimited extent. This would mean the loss of our national sovereignty.

2. Through passage of the Reciprocal Trade Act, the Congress virtually amended the Constitution of the United States, without conforming to the constitutional provisions for amendments, and thereby improperly delegated and transferred the constitutional responsibility of the legislative branch of Government.

3. Profligacy of giveaway programs has stifled the legitimate investment of private capital in other countries.

4. The socialistic program of boondoggling billions for Asia and Africa, and bundles of billions for Britain, was attempted in spite of the known political hazards, internal insecurity, lack of consumer purchasing power, which staved off the investment by private capital. Can our Government, by continuing to squander our national resources, do what private industry declined to do?

5. In the face of Federal governmental limitations at home, how can we justify ICA plans abroad for "improvement of transportation facilities, highways, powerplants, schools, public buildings and other public works, programs in industry, mining, fisheries, health, education, housing, irrigation and flood control"?

6. The major premise of FOA and ICA, namely, "the entire free world economy, is directly tied in with the rate of increase of production and consumption of the less developed countries" is fallacious. On the termination of FOA in 1955, it should never have been revived under its new name ICA. It is basically unsound.

7. The injunction against "entangling alliances" has been violated by the "cooperation programs" with some 60 or more foreign countries for "social betterment," to which has been pledged the full might of our Armed Forces.

8. Our material prosperity is linked—not with the underdeveloped countries of India and Africa, or even the British Isles, but is built around our own sparkplugs—autos, steel, building construction.

9. The time may not be far distant when we will be told how much we will have to contirbute to the rest of the world for social betterment, at the sacrifice of educational needs at home, and requirements of our own industry for construction and consumer goods.

10. The question I would like to place before the Congress is: Is not our inherent right to own property jeopardized and violated by taxation, when the money derived therefrom is expended on foreign giveaway programs?

Let us get back, and immediately, to constitutional government.

Very sincerely yours,

W. JEFFERSON DAVIS,
President, the American Academy of Public Affairs.

What You Get When You Get an Education and Is It Worth It?

EXTENSION OF REMARKS
OF
HON. CLEVELAND M. BAILEY
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. BAILEY. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I wish to call the attention of my colleagues to an excellent article under the caption, "What You Get When You Get an Education and Is It Worth It?" by the Honorable Charles A. Duffield, of West Virginia, which appeared in a recent issue of the News Leader, published at Richwood, W. Va.

Judge Duffield's approach to this subject is somewhat unusual, but nevertheless effective in that it brings to the readers new vistas of what it means to have an education and what possibilities are open to those who take the time and expend the effort necessary to become educated.

The article follows:

WHAT YOU GET WHEN YOU GET AN EDUCATION AND IS IT WORTH IT?—HIGHLIGHTS OF A TALK BY CIRCUIT JUDGE CHARLES DUFFIELD BEFORE A GROUP OF WEBSTER COUNTY EDUCATORS AT CAMP CAESAR LAST WEEK

Looking to the Darwin theory of evolution, we find that our forefathers, or ancestors, once lived in caves, the cavemen. Those were the days of might making right. Only the strongest and best fitted survived. Prehistoric man sought the cave as his home, he was an individualist, seeking to live with his mate alone; he could not trust his neighbor, and he had no friends; the cave offered him protection from the elements and his enemies, and he gathered his living from the fruit of the trees and vines. Later he learned that he could more effectively use a club in killing wild game, or another caveman who might seek to take his cave, his food, or his companion. But he had to be constantly on the alert, lest he be killed or imposed upon by another more strong and cunning. He knew only the law of the jungle—take anything you are powerful enough to take—kill, with or without reason—survival being the only objective in life. Then one day Caveman A and Caveman B got together and agreed that neither was powerful enough to kill Caveman C, who had a better cave, a beautiful wife, so they thought, and a fat wild hog he had just killed, but the two of them together could murder C and take his earthly possessions. This they did, and as might be expected, even of cavemen, they shared the cave and the hog, and fought over the woman. And when other cavemen learned of this successful, though unholy combination, they began to associate themselves together for the common good. So in this manner, men learned of the benefits of association, education you might call it, and society began, as well as organized welfare.

The cradle of education is in the Garden of Eden. The giving of a command by one in authority, the first law of the land, and the man learning through experience the bitter way.

Education consists of a continuous process of learning. It begins at birth and ends with death.

When the baby in the basket begins to take notice of light and darkness, to associate things one with the other, to notice people, moving objects, etc., it is beginning its educative process. When it learns to sit up, crawl and walk, it is becoming educated. By the time the child enters the first grade it has acquired much education from its parents, brothers, sisters, playmates, and other people. These things it has learned by training, teaching, conversations, reading, observations, yes, and even from watching television.

Some of these out-of-school influences, both before entering school and afterward, have done much to shape the education of all of us.

Much of our education we have acquired out of the schoolroom, from our employers, employees, associates, and what we read and see. The educating process continues as long as life itself.

Education consists of learning to keep our emotions and passions within proper bounds.

How different most people would be without the advantage of an education. Without education we would be on a low level, scarcely better than beasts. Without education we

would be uncivilized—just like Mr. Caveman A and B, or their victim C. We would not control, or attempt to control, our emotions and passions toward our fellow man. Education tends to restrain people from violence toward others. Most of our more heinous crimes, such as rape and incest, are committed by the illiterate. The ability of civilized man, educated man, to keep his emotions within proper bounds, distinguishes him from the beast in the jungle. The educated man does not resort to claw and tooth to settle his differences with his fellow man, but he obeys the rules established by civil law. * * * That his problem might be settled in a peaceable manner. Uncontrolled emotions and unsubdued passions are a visible weakness, and in many instances the mark of an ignorant man.

Education consists of directing to good purpose energies and abilities which otherwise might be left dormant, or turned to selfish purpose.

Many men, although money makers, have not learned through the educative process, how to use their abilities, for money making alone does not spell education, and a man who is greedy, selfish, without consideration for the feelings and well-being of his fellowman, and ruthlessly runs him down in his mad scramble for the dollar, is not an educated man—he is not living, for man does not live by bread alone.

Education consists of learning, or adopting, an honest and satisfying philosophy of life, and finding a suitable field of work.

Education enables a man to find his proper place in life, the occupation or profession for which he is best suited, where he can be the most productive, spend his efforts for his own personal wellbeing, and as a true part and worthy asset of society. Every man can have a worthwhile and useful place in society if he possesses an average amount of intelligence, energy, ambition, character, and sincere desire to find that place. Without education he is nothing more than a hit-and-miss proposition, driftwood floating with the current of life.

Education consists of preparation for meeting and solving real problems.

Education is more than learning the fundamentals of reading, writing, and arithmetic. One can learn in school much about physics, chemistry, law, medicine, and engineering, but this is only part of the foundation of an educated person. One must also create and acquire a love for good music, art, and literature, for an appreciation of these will keep the mind and soul in tune.

As man becomes educated he will learn to be tolerant of the thoughts and views of others.

An educated man loses his prejudices against other races, religions, creeds and colors. As our society becomes closer knit, he will try to learn the problems of his fellow man, other races and nations, and before he criticizes and condemns, he will get, or try to get, all the true and pertinent facts. Yes, before he takes the other to task he will first walk in the moccasins of the other man.

Education will teach us to be humble, and a nation void of humility cannot be a happy nation. A proud, conceited, arrogant, and overbearing nations of people are digging their own national graves.

Education teaches man to be forgiving and even though it comes naturally to hate our enemies, and sometimes even wish to destroy them, the greater and broader a man's learning, the quicker and easier will he forgive the wrongs done him by others. Forgiving is not only educational, it is, in fact, divine, and for this lesson we are again reminded of the Man on the Cross, who although falsely accused, unlawfully tried, and condemned to be judicially murdered, in the midst of excruciating pain, torture and torment, was still mindful of the trouble and tribulations of others, and while He hung on the cross He forgave the sins and saved the soul of the thief who hung beside Him, and with the true spirit of an educated and righteous man, He looked to His Father in heaven and asked Him to forgive His executioners, for they knew not what they were doing.

Education consists of acquiring knowledge, skills and attitudes which assist one in maintaining good health, a reasonable amount of economic security, and genuine happiness in life.

One of the most important items in education is attitude, which is a state of mind, conscious or subconscious, toward a particular matter or person. One's attitude, or his feelings, toward his neighbor, members of his family, his employers or employees, his teacher, the state, his government, or society as a whole may be good and wholesome, or it may be poor and bad.

The Death of Senator McCarthy

EXTENSION OF REMARKS
OF
HON. EDGAR W. HIESTAND
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. HIESTAND. Mr. Speaker, in sharp contrast with some editorials berating the late Senator JOSEPH R. MCCARTHY, after he is dead and cannot fight back, comes this one from the Los Angeles Times of May 4, 1957.

To me, it is so well expressed, especially in the last few lines, that I ask unanimous consent that it be inserted in the CONGRESSIONAL RECORD:

THE DEATH OF SENATOR MCCARTHY

The death of JOE MCCARTHY has already set off the liberals. Before he is buried they are eager to find where his grave shall be and desecrate it. The British, curiously enough, the people we have been so busy saving from their own wrack, are most particularly vindictive.

HIS BRAVE DAYS

What was there about this rather gallant axman that set about half the world against him? In his brave days, we think, he did a lot of good. He showed that our State Department was pretty well seeded with Communist sympathizers. He did not root them all out, but he made the Department very uncomfortable for them. If there is a right or wrong about this Communist business, MCCARTHY certainly drew the line. After him everybody knew which bank of the Jordan he was standing on.

He made grave mistakes. His last inquisitions seemed to most people to be offensive. But on the whole he was right. He knew, either by instinct or through information, that there was something soft, if not decayed, in the State Department, and in other Departments too.

This was a disagreeable business, and it was very easy to hate MCCARTHY. A large faction of Romans hated Cicero when he took after Catiline and had him strangled. The same people rejoiced when Mark Antony sent after him and had his throat cut. This was a victory for liberalism, or so they said.

Until almost the end the Times supported Senator MCCARTHY in his disagreeable work—the rousting of Communists and their sympathizers. It is surely true that if he had not stormed against them many of them would not have been found out. He purged our Government of many men who should never have been in it.

And in all the uproar, something like a 12th century melee, there was nobody hurt who shouldn't have had a bruise.

We paraphrase an editorial we wrote 2½ years ago: There is no question about it (we said then): if MCCARTHY had not stormed and raged a good many of those dubious and dangerous people would still be practicing subversion in the subterranean levels of the bureaucracy, particularly in the State Department.

RIDING INTO THE FRAY

MCCARTHY was no hero, or at least we don't think he was. But he had the courage to ride into the dirty fray, into a battle wherein his opponents had no compunctions about fighting fairly, and take his lumps as he gave them. Senator Robert A. Taft, the great man of our generation, took a hard look at MCCARTHY and let him go—and he could have stopped him.

MCCARTHY made his mistakes after Taft died. They were silly mistakes, and he can't be forgiven for them, but they were honest mistakes. The man could be a fool, but he had guts. When Taft died MCCARTHY's judgment died with him.

And now that MCCARTHY himself is dead, and the self-accusing British execrate him, take another look around. Who is he who hated MCCARTHY so much who should be loved so much by the rest of us?

The Bureau of the Budget

EXTENSION OF REMARKS
OF
HON. F. EDWARD HÉBERT
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. HÉBERT. Mr. Speaker, at long last a distinguished columnist has struck at the wide powers of the Bureau of the Budget.

George E. Sokolsky is one of the most honored and influential columnists on the American scene today. His sound thinking and cold logic have merited the position which he occupies in the fourth estate.

In two recent articles, the latest of which I am directing to your attention, Mr. Sokolsky has pinpointed the real target for attack in the fight for economy and a return to constitutional government. I am not impressed with the suggestion to remove the head of the Bureau of the Budget. Another individual would be named head of the budget and the same old abuses and usurpation of power would continue.

The real way to fight is for a sufficient number of Members of Congress to dedicate themselves to curbing the unauthorized power being used by the Bureau of the Budget. Let us not kid ourselves. The reason the Bureau of the Budget exerts such power is because Congress allows the Bureau of the Budget to run wild and rampant.

All of us know that when a bill is returned from a department with the notation "Objection is interposed by the Bureau of the Budget," the proposed legislation is deader than the dodo bird. Some chairmen will not even allow their committees to consider legislation unless approved by the Bureau of the Budget.

During consideration of legislation on the floor of this body the question is frequently asked, "Does the Bureau of the Budget approve this legislation?"

It is about time that Congress reclaim its lost power and function as it is scheduled to function under the terms and language of the Constitution.

Delegation of power by the Congress through lack of assertion provides tacit consent for such abuses and is legally and morally wrong.

Mr. Sokolsky has pointed up these dangers in this splendid article. I hope it will not be the last he writes about the Bureau of the Budget and I do hope that some columnists, as prominent and respected as Mr. Sokolsky, will take the cue from him and get into the fight to educate the American people of the dangers confronting them. Too precious few people know of the effect the Bureau of the Budget has on their very lives, their very existence.

Here is Mr. Sokolsky's article from the pages of the New Orleans States:

WHERE DOES BUREAU GET ALL ITS AUTHORITY

(By George E. Sokolsky)

Before we all go broke, let us have a look at the Bureau of the Budget which has expanded itself far beyond the intention of Congress which created it.

According to the Constitution, all appropriations are to be made by Congress, originating in the House of Representatives. The Bureau of the Budget was created by Congress to assist Congress in gathering the data necessary for making appropriations.

So what happens? The Bureau extends itself into a forceful arm of Government, usurping powers which the Constitution gives to Congress and to no one else. Congress cannot delegate its authority over appropriations to the Bureau of the Budget, but because many Members of Congress are hard pressed and no good at simple arithmetic, they ask the experts in the Bureau of the Budget whether an idea for spending the taxpayer's money is good or bad and when the reply comes back: "The Bureau of the Budget interposes no objection," the item finds itself in the budget and the money gets spent.

Where does the Bureau of the Budget get the authority to interpose or not to interpose an objection? That is the question. Search high and low and you will find no such authority. That power lies in Congress and in Congress alone. It has not been delegated to the Bureau of the Budget. It cannot under the Constitution be delegated to the aforesaid Bureau.

Nevertheless, it is a fact that it is this Bureau which has come up with the $71.8 billion budget that suddenly has become sacrosanct and that the chosen representatives of the American people do not know how to cut.

Most suggestions during the past week or two for cutting the budget down to size have been political phonies to give the impression that something is being done about the budget while actually nothing is being done.

Why elect Members of Congress at all? Why go through the hocus pocus every 2 years of choosing Members of the House of Representatives when the most important task they perform, namely, controlling the expenditures of the government, is performed by a nonelected bureau of government, in no manner responsible to the people?

A Member of Congress wrote to me:

"Do you know that witnesses for the departments cannot voluntarily express opinions contrary to the views of the Bureau of the Budget?

"Do you know that after Congress has appropriated funds, the several departments, particularly the military, must again ask permission of the Bureau of the Budget to spend the money thus appropriated?

"Do you know that after Congress has authorized certain strength in the Defense Department, the Bureau of the Budget reviews the authorization and makes the determination as to what extent the authorization will be allowed?

"Do you know that the Bureau of the Budget maintains its own staff of engineers and experts which in practice and effect supersedes any similar staff or Congress?"

In both parties, the institution of the leadership has gained strength because the leadership can get favors from the White House which are no longer available to individual Senators and Representatives, most of whom can no more see President Eisenhower to talk to about home problems than they can discuss such matters with Queen Elizabeth.

Odd Arrangements for Glen Canyon

EXTENSION OF REMARKS

OF

HON. JAMES B. UTT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. UTT. Mr. Speaker, under leave to extend my remarks, I would like to insert the following editorial which appeared in the April 24 issue of the Los Angeles Times. In view of my introduction of H. R. 6575, which proposes the repeal of the upper Colorado River project, I desire to give an opportunity to all the Members of this body to read this editorial by Constantine Halliburton.

HOLE IN HOOVER DAM—ODD ARRANGEMENTS FOR GLEN CANYON

(By Constantine Halliburton)

If the Bureau of Reclamation drilled a big hole in Hoover Dam, the water and power supplies of southern California, Arizona, and Nevada would suffer no more than they will if the Bureau follows its own plans for construction of the gigantic new $421 million dam and powerplant at Glen Canyon.

That may seem an extreme statement, but before substantiating it a few other situations pertinent to the Glen Canyon project, to stand on the Colorado River at the Utah-Arizona line, should be set forth.

When the Reclamation Bureau recently made public its specifications for the dam, water and power officials of California, Arizona, and Nevada jumped with fright. The Bureau plans called for letting down during construction of the dam as little as one-tenth the amount of water required by downstream users. Projects vital to the economy of the lower basin would be wrecked by such operations.

Various contingents hurried to Washington to get an explanation. California's emissaries were Northcutt Ely and Robert L. McCarty, special counsel for the Colorado River Board of California, and the board's chief engineer, Raymond Matthew. They were received by Assistant Secretary of the Interior Aandahl and Assistant Reclamation Commissioner Nielsen. What they learned left them not a little dismayed.

Neither Aandahl nor Nielsen had ever seen the Bureau's specifications for Glen Canyon Dam. In fact, the specifications, which were prepared by Bureau engineers in Denver, had not even been submitted to Reclamation Commissioner Dexheimer's office in Washington, nor to the office of Interior Secretary Seaton, for review. No one in Washington seemed to be aware that the plans violated Federal statutes and threatened every project and every power contract in the lower basin.

Plans for the start of a $421 million Federal project had gone out without the officials responsible for them even bothering to learn what was in them. Nielsen told Ely, McCarty, and Matthew he would send for the specifications which already had gone out for bids.

The next episode of the Glen Canyon drama was hardly less startling. The Bureau announced that bids for the main dam structure, to cost about $135 million alone, would be opened on April 11.

In the next breath the Bureau revealed that a board of engineers, not connected with the Government, had been named to review the specifications and report on them. But the engineers would not be able to meet before bids for the dam were opened.

And that is what happened.

What if the independent engineers reported that the Glen Canyon specifications were inadequate, that changes in design were necessary to provide a greater safety factor, that the type of dam specified was not suitable for the foundations at the site?

Did the Bureau know that the independent engineers would approve the plans, even through they had not yet seen them?

If the Bureau didn't know this, why didn't it hold up the opening of bids until the independent engineers had a chance to study the specifications? That was the procedure Congress demanded in the case of Hoover Dam, and the cost of Hoover Dam was greatly increased by changes made by the independent engineering board that passed on it.

According to the Bureau, the independent Glen Canyon board will not meet until late this month, but the bids are already opened. Drastic changes may have to be made in the specifications, and this would be costly for all concerned. At the very least, some specifications must be changed if Federal statutes are to be obeyed and Hoover Dam and other lower-basin projects are not to be damaged, or even wrecked.

Present Bureau plans call for the release of only 1,000 cubic feet per second from Glen Canyon during a part of the construction period and 3,000 during another part. The average requirements for projects below Glen Canyon are more than 10,000 cubic feet per second. Therefore, the Bureau plans to release only one-tenth to one-third of the water necessary to meet lower-basin contracts.

What's going to happen to Hoover Dam under such a scheme? Because of low water, Hoover Dam's power output is already cut about 40 percent. The more water captured by Glen Canyon, the more Lake Mead, back of Hoover Dam, will have to be drawn down, and right now Lake Mead is less than half full.

Colorado River Board Chairman Fred W. Simpson has demanded a meeting with Secretary Seaton on the whole matter. So have Arizona and Nevada officials. Only silence has come so far from Seaton.

One other phase of the case has water and power engineers deeply concerned. That is the bureau's design of Glen Canyon Dam. It would be about 700 feet high, almost as high as Hoover Dam, but it is designed as a thin arch type. Bureau officials admitted to Congress that the rock on which Glen would stand is weakly cemented together. Hoover Dam, much heavier than Glen would be, stands on solid granite many times stronger than the rock in Glen Canyon.

The 185-mile-long reservoir behind Glen Dam would hold 26 million acre-feet of

water. Independent engineers have told this writer that if Glen Canyon Dam should give way under this enormous pressure, all other projects below it, including Hoover Dam, would be wiped out, thousands of lives would be lost, and the lower basin of the river would be devastated.

One clue which might help to explain the peculiar actions of the bureau is in the law authorizing Glen Canyon. The dam is part of the gigantic upper Colorado River project consisting of 4 dams and 11 participating irrigation projects. The bureau has admitted that the participating projects could not pay for themselves.

This is where Glen Canyon Dam comes into the picture. It would be built several hundred miles downstream from the participating projects and none of the water stored behind it could be used for irrigation. But that stored water would be used to make hydro power, and the power revenues would be used to pay for the infeasible irrigation projects.

Who would buy Glen Canyon power? Why, the people of southern California mostly; the same people who would suffer the greatest if the bureau's Glen Canyon shenanigans are permitted to succeed.

Employment of the Handicapped: A Community Responsibility

EXTENSION OF REMARKS
OF
HON. JOHN J. DEMPSEY
OF NEW MEXICO
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. DEMPSEY. Mr. Speaker, I am quite proud to announce to the Members of the House of Representatives that Miss Denny Sue Carlisle, of Albuquerque, N. Mex., placed third in the 1957 national essay contest of the President's Committee on Employment of the Physically Handicapped. This young lady's discussion of American public responsibility to employ the handicapped is an excellent presentation, one which all should have an opportunity to read. Therefore, I am inserting here a copy of her essay:

EMPLOYMENT OF THE HANDICAPPED, A COMMUNITY RESPONSIBILITY

When I think of the physically handicapped, I am reminded of 2 years ago when I first began to work as a summer playground instructor. It was my first day on the job, and I was delighted to find several children waiting for me when I arrived on the school ground. I immediately noticed one little boy in a little red car. I thought it strange that he was not riding a bicycle like the other children, but I soon found out that Frankie couldn't ride a bike. He had been injured at birth and his legs never had developed as a normal boy's should. This proved, however, not to be a handicap to Frankie; he was the most active boy I had on the playground that summer. One of the things I learned was that he wanted no sympathy, and furthermore, he wanted to be treated like any other boy. He could walk on crutches, and he participated in dancing, singing games, and the other sports. I found him most helpful and a willing worker. He was always cheerful, and he added immensely to the atmosphere of the schoolroom. He was loved by his classmates, and his opinion was held in high esteem by all of them. I didn't see Frankie again until this year. I took my brother to his Boy Scout meeting one evening not long ago, and I noticed that Frankie was playing the bugle for the troop. Upon inquiry, I found that Frankie was an avid scouter who participated in practically every phase of scouting that was offered. I began to think of the days when Frankie will be applying for a job. Surely he will have no difficulty, because of his wonderful background and training. And by the time he is out of school, hiring the handicapped will be as normal as hiring anyone else. That is, if the community promotes this idea now. With all people there is a strong feeling of wanting to be a useful part of society. Probably one of the most important phases of growing up is the satisfaction that comes by being independent. In the normal course of events, we all grow up and take this much coveted place in society.

But the handicapped person, who is unable to find useful employment, must feel, I am sure, the same frustration felt by a child who is never allowed to become independent.

Fifty years ago, the fact that someone in the family was physically handicapped was something to be ashamed of, a sort of disgrace. No means of education were offered these people and it was believed that they would be better off dead. There were certainly no means of employing such people and they were hidden away in dark rooms of their homes, to waste away what might have been useful and fruitful lives.

But such was not the case with a certain young woman named Helen Keller. She was handicapped more than other handicapped people; she was deaf and blind. She not only learned to talk and read, but she paved the way for many others. Here was a woman who would not let an enormous handicap stand in her way.

But must we leave all the work to people like Helen Keller? You and I are working under a distinct advantage. We can read, write, talk, see, hear, walk, dance, and do many other things which are taken for granted. It is up to us, the people who make up the community, to see that the handicapped of our community are educated and employed and given the same advantages as the more fortunate.

It is the community's responsibility to make a survey of jobs and occupations that can be successfully pursued by various types of handicapped people. There are statistics at our fingertips. We, the businessmen and women of the community need only to call local agencies that are working for the advancement of the physically handicapped and offer our help.

The blind can be employed in innumerable jobs such as operators, typists, developers in the photography industry, silk screeners, and many other jobs that require skilled workers with hands and feet.

The person crippled in his legs is often quite proficient with his hands and can be employed in numberless occupations, such as music, vocational work, arts, crafts, dress designing, sewing, and manufacturing.

If the handicapped is well educated, there is no limit to the many opportunities in banking, business, teaching, and any other field where there is a need for specialized education.

Often rehabilitation and education are required to give the handicapped person confidence enough to go into gainful employment. We have many such schools and many graduates of them in our community today. It has been proved that the physically handicapped person is just as efficient, if not more so, than the physically normal one.

The employer who is courageous enough to set a precedent soon finds that not only his business has often gained in efficiency, but that his own sense of satisfaction in helping a fellow man has increased his personal self-respect and enjoyment of life.

We pride ourselves on advancing more rapidly than any other people before us. We have expanded and become bigger and better in business. We have research scientists constantly looking for newer and better living methods. We've become a highly advanced society of people, used to easier living, and constantly hoping for better things for the coming generations. Let's not forge ahead in every other field and leave our handicapped in that dark room. Let's advance with the times and employ the physically handicapped.

The only way that we can be sure that Frankie and his physically handicapped equals all over the Nation will be employed is for us as individuals and members of an alert community to do our best for this cause today.

You are your community.

You be the one to open the door for a handicapped person.

Yadkin Flood Control

EXTENSION OF REMARKS
OF
HON. RALPH J. SCOTT
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. SCOTT of North Carolina. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an editorial taken from the Elkin Tribune, Thursday, April 25, 1957:

YADKIN FLOOD CONTROL—PROBLEM TAKES ON ADDED IMPORTANCE TO STATE AS WELL AS THIS SECTION

It is encouraging to learn the Yadkin flood-control project, which has been pretty much kicked around since it received its first real momentum after the disastrous August 14 flood of 1940, is once again in the limelight, having been removed from a purely local category to one of Statewide importance in securing new industry for North Carolina, and for providing water for a number of North Carolina cities, including Winston-Salem, Greensboro, and High Point.

As yet no actual move to construct a flood-control dam has been started, but a survey report from the Army Corps of Engineers and the question of a $160,000 appropriation will come before the Senate Commerce Committee within the next 3 weeks, and delegations from Elkin, North Wilkesboro and other affected areas along the river are organizing for trips to Washington and appearances before the committee. The National Rivers and Harbors Congress has classified the project A–1 and recommended immediate action.

As things now stand the cost of a dam on the Yadkin to assure flood control, would cost an estimated $9 million. And as we understand it, the backed-up waters would not affect the "Happy Valley" section of Caldwell County, which has played its part in blocking any effective flood control during the past 16 years.

Perhaps too many people who live without the Yadkin flood area, and to Members of Congress who make up the Senate Commerce Committee, news of floods along the Yadkin seem remote and unimportant. For it takes actual physical contact with a flood to reveal the terrific damage of water thundering down a valley to inundate and destroy countless millions of dollars in property and crops, as well as to claim lives.

It has been over 16 years since the Yadkin jumped its banks and wreaked untold dam-

age through the valley. But no man can say when it will do the same thing again. Perhaps tomorrow, perhaps next week, perhaps next year. But there can be little doubt that, as floods have come in the past, they will come in the future. And it has been estimated that due to the decrease in timber and ground coverage since 1940, should as much rain fall now as it did that year, the flood would crest 5 feet higher, which would put it on the main floors of many Elkin main-street stores. Only those of us who have experienced these floods know what such a thing can mean.

But we should remember that not only is flood control important simply to prevent the river from flooding the valley, but also as a long range project important to the future industrial growth of our State. Water is becoming more and more vital in many ways as recent dry spells have caused wells to fail and streams to slacken or run dry. A flood control dam on the Yadkin would conserve water and during dry spells make it available for industry and for the use of towns and cities.

Of course this newspaper, which has seen more than one flood sweep down the valley, is in favor heart and soul of flood-control measures that will remove the threat of catastrophe from above the valley's collective heads. And we hope that those in Washington in whose hands such control rests, will be able to gain a picture of the death, danger and destruction which a flood along this uncontrolled river entails.

On Cutting the Budget

EXTENSION OF REMARKS
OF
HON. JACK WESTLAND
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. WESTLAND. Mr. Speaker, under leave to extend my remarks, I would like to present an editorial from the Arlington Times, a weekly newspaper published in the second district of the State of Washington. In this editorial, publisher Jack Carpenter, I believe, has outlined the problem that Congress faces in trying to cut the budget.

This Congress has embarked on a sincere and hard-working campaign to try to cut the fat from the Federal budget. We have pored over appropriation bills item by item and have cut where we believed cuts to be judicious. I know that if the American people realized fully the situation as described in the Times editorial, the decision as to whether the services asked for are worth the extra taxes paid could be made more easily by each citizen. This editorial gets to the point of the Government's financial operations and outlines in unvarnished terms the sacrifices necessary to achieve economy.

Text of the editorial is as follows:

YOUR SERVANTS GIVE ORDERS

We Americans are wont to kid ourselves about the principles of democracy, in which government functions by the consent of the governed; in which government officials are the servants of the people.

Yet the fact remains that while we elect certain officials, our Government has become a great despot.

This fact was made known to the average citizen during the past month in no uncertain terms, when the treasuries of business institutions and private citizens were drained almost white by the huge tax bill that almost freezes up business during the months of March and April each year.

Those tax statements each bear a threatening clause that tell the "master citizen" what will happen to him if he doesn't pungle up without delay.

However, when we get the bill paid and have time to think about how our Government gets that way, we find that the citizens who are doing the sweating over paying the bill are the cause of it all.

We clamor for economy in Government at one time, then when the legislature meets we send letters, telegrams, and hire lobbyists to get through legislation for projects that cost money.

We ask Federal and State aid for schools, for highways, for flood control, for buildings, etc., all of which we hope will bring the money from some other locality.

Right now the whole country is conscious of the huge Federal budget. Everybody is clamoring for a reduction in the budget, but the only place where we can all agree to reduce spending is in foreign aid.

Of course, we in Washington will not complain if some reductions are made in allotments for projects in California, or some other State, but for goodness sake don't cut any appropriations scheduled for Washington.

With that spirit prevalent, Mr. average citizen, you can rest assured the Federal, State, county, city, and school district budgets will continue to grow bigger, and after all those servants are only doing your bidding when they point the tax statement at you and say "pay up before April 15 or else."

Breaching Our Frontline

EXTENSION OF REMARKS
OF
HON. HARRY G. HASKELL, JR.
OF DELAWARE
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. HASKELL. Mr. Speaker, the American people would like to see a substantial reduction in Federal expenditures in areas where reductions can safely and reasonably be made. I am convinced that there are many such areas. There are undoubtedly cuts that can safely be made in the funds requested by the State Department, but the $47 million reduction voted in the House just does not make sense.

An editorial in the Wilmington Morning News of May 2 points up the perilous gamble involved in this fantastic cut far better than I can. Under leave to extend my remarks in the RECORD, I include that editorial:

BREACHING OUR FRONTLINE

Do you agree with this statement?

"The United States has never fought a foreign war that could not have been avoided. Even though we were attacked, different policies and better diplomacy could have prevented war or kept us from being drawn in."

We don't know how true this is. It has been said, though, by great numbers of Americans during and after the War of 1812, the Mexican War, the Spanish-American War, World Wars I and II, and the Korean war. And in each case there is at least a certain amount of truth in the statement. It is easy now to point out mistakes of omission or commission by Presidents Wilson, Roosevelt, and Truman and their Secretaries of State. If they hadn't made those mistakes, war might have been avoided.

But the American people, though quick to blame their leaders when it is too late, show suprising indifference before the fact. The war which our Government today is trying to prevent is world war III. The governmental machinery on which prevention depends consist of the State Department and the Foreign Service. Yet there is hardly an audible word of protest from the public when the House votes to cut the State Department budget by 26 percent.

Such a cut, in a time of rising costs, growing international problems and responsibilities, increasing danger, and expanded operations, might result in errors of omission or commission that would make world war III inevitable. In the heartfelt words of Secretary Dulles to a Senate Appropriations Subcommittee Tuesday: "The total effect of these cuts would be to breach gravely the front line of our defense of peace and freedom in the world * * * a false economy, not compatible with the peace and security of the United States."

Is that what Americans want? They aren't saying it isn't. Mr. Dulles is telling us, in effect, that if the State Department is forced to cut back on personnel, on training, on foreign contacts an information, it is bound to make more mistakes and omissions and it may fail to prevent war. Once world war III starts, it will do no good to blame our leaders. But it is not too late to give them the tools to do the job they are trying to do.

Mr. Dulles did not confine himself to generalities. He gave a business-like report, showing how our operations have expanded and why they are necessary. He noted that in Washington alone State Department employees put in 119 man-years of unpaid overtime in the last 30 months. He noted that the Soviet Union has been rapidly enlarging its own diplomatic service, roughly doubling its personnel in the last 4 years. (If Russia doubled her army, would we want to reduce owns?)

Mr. Dulles concluded by saying: "The danger which could result from matters going wrong is becoming infinitely great; indeed, it surpasses human comprehension. * * * No investment that the people make in their Government pays so high a return as the modest investment required to maintain an efficient State Department and Foreign Service."

But it's up to the people of the United States. If they continue to seem indifferent, the cuts will stand and America's future will stand in jeopardy.

Address by Judge Walker Butler

EXTENSION OF REMARKS
OF
HON. CHARLES A. BOYLE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, April 15, 1957

Mr. BOYLE. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address by Judge Walker Butler:

ADDRESS DELIVERED BY JUDGE WALKER BUTLER AT SOCIETY OF AMERICAN MILITARY ENGINEERS DINNER MEETING ON TUESDAY, APRIL 23, 1957, AT THE WESTERN SOCIETY OF ENGINEERS BUILDING, CHICAGO, ILL.

Distinguished gentlemen at the speaker's table, equally distinguished ladies and gentlemen out in the audience, it is a privilege

to have the opportunity to say a few words at this gathering tonight. I had the same honor, a year ago, to speak at the meeting at which time this organization inducted into office General Berrigan as commander of this post. As I look back at what has been developing and what has been done in the course of the past year, I rejoice, as I am sure you do, at the fact that we have finally been successful in awakening an adequate number of groups and individuals here in the Midwest as to the possibilities and the necessities presented by the waterway facilities of our immediate vicinity. Throughout our country, in fact, people are beginning to take note that here, in Chicagoland, we have, by reason of the natural location of the city of Chicago at the junction of the Illinois Waterway and the Great Lakes system, tremendous possibilities of development that no other city in the world can possibly equal, if we just have the men, the energy, and the determination to make use of what nature has provided for us here.

Looking back at this year, thinking over the numerous developments that have taken place since General Berrigan took office as president of this organization a year ago, I can't help but reflect, and I hope that the people of the Chicago area are aware, as those of us in this room are aware, of the tremendous good fortune that came to Chicago when Gen. Paul Berrigan was assigned to this division. During the years gone past, we have become accustomed to excellence in service, to enthusiasm and cooperation, and to leadership in planning from the men who have led the Corps of Engineers in the Middle West. But never in the history of this organization—or in the history of the Middle West—have we had a man occupying the top spot in the Corps of Engineers who has given so wholly of himself and who has produced so much in the way of results, as has General Berrigan. I am delighted to have the opportunity here tonight to voice that considered opinion. I could talk of a half dozen instances, of which I have personal knowledge, that demonstrate the unexcelled cooperation provided by the general and his staff. I know there are many other instances you folks know about. I am thinking, for example, of one important instance. I am thinking of the fact that it became vitally important to the development of a deep-water harbor at Lake Calumet, that something be done with reference to the program for dredging that had already been scheduled for something like a year and a half ahead. I think it was in the 1958 schedule (if I am not mistaken). At any rate, it was something like a year and a half away—and it was needed immediately. Any of you who have had experience, as I have had, of dealing with government—I don't mean Federal Government alone, I mean any government—to get them to revise a schedule that had finally been agreed upon by those in charge of scheduling operations, will understand the feeling of hopelessness we had in our ambition to try to advance that scheduling of the dredging by 6 months. Maybe, we thought, if we had a couple of miracles, we might advance it 7 months, perhaps even 8.

To sum up what might have been a long, long story: We had the unprecedented result of having that scheduling advanced the full 18 months, so that it started right then, when we needed it. There is just one man in this room tonight that I know of who is entitled to the lion's share for having done that tremendously important and vastly valuable thing for the people of all the Middle West, and that is the gentleman we are honoring here tonight, at the conclusion of his first year of service as president of this organization—General Berrigan.

I have had other experiences with him. For example, when it became a question of the continuation of work on the Cal-Sag Channel, when that tremendously important job faced the possibility that it was about to be halted, if we didn't furnish local cooperation required by the 1946 Rivers and Harbors Act, there was only one solution which could be worked out. That was the necessity of going to the legislature at Springfield 5 minutes after they opened their doors. No; I guess it was 2 minutes. They hadn't the opportunity to find their seats when the bill was introduced that would provide for the issuance of $6 million in nonreferendum bonds for the purpose of acquiring land needed for spoil sites—needed for the relocation of utilities and the various other things specified by the Congress as the things that had to be done by local interests before the Congress would consider an application to continue Federal appropriations. The committee of Congress had made it plain that it must be done, and done now. In that emergency again we had the invaluable assistance of the gentleman we honor here tonight. We drafted him to go to Springfield with us. It was my very great pleasure to present him to my former colleagues, the members of the senate in the General Assembly of Illinois.

As I said to him later, when he finished speaking, he had so forcefully presented the facts and figures at his fingertips and so logically presented the entire problem that he had the unprecedented experience of walking off the witness stand in the senate chamber without any member asking a single question. That bill was one of the first passed by the 1957 session, and it was promptly signed by Governor Stratton. General Berrigan, I salute you for the grand help you gave to the people of this community, who have been fighting all these years to get something done for the waterways.

I could talk about a number of other experiences that I have had with our guest. Those I have related are just two examples of the great fortune the people of our community have had in obtaining the leadership and the patient cooperation that this man has displayed, trying to solve the intricate problems we have had here in Chicago. Perhaps this could be best summed up with the statement that at long last we had found a leader who not only understood the many problems confronting us—because he had devoted hours and days and weeks to a study of those problems—but most of all we found a man who inspired confidence in the highest degree.

Those of us who aren't directly connected with the Corps of Engineers, those of us who have stood, as it were, on the sidelines, and over the years have tried to stir up some enthusiasm to get the things done—because we felt primarily it was a crime to have that advantage given to this area by nature, and not have enough sense to make use of it, those of us who recognized what a tremendous factor the completed Cal-Sag Channel will be in strengthening our national defense—we have been mightily inspired and encouraged by the example of this man, quietly and without fanfare, who has fitted right into the team, as if he belonged upon it all the days of his life, within short order after his arrival in Chicago. It demonstrated to us that he not only has the academic skills of a top-flight engineer, but he has the willingness to work with people. He has the ambition to see something performed, to see a job done.

It is that kind of men, God knows, that we need—people who deal with public work, conscientiously and efficiently. So here tonight, I am delighted to have the chance to say these few words of appreciation to him for what he has done for our community, as well as for the country at large.

I was very much interested, just a day or so ago, to read a comment that came from a man who ought to know what he is talking about, Maj. Gen. John Bragdon, retired. He is President Eisenhower's special assistant and coordinator on public-works planning. He said—and you may have seen it in the papers last Saturday or Sunday: "Public-works problems are among the major ones involved in the complexities arising from overlapping jurisdictions within the metropolitan areas; the tremendous and growing need for public works exists throughout the country." He urged that comprehensive and long-range planning for public works should be undertaken by the governmental body closest to the people, to the maximum ability of local governments to finance them. From the standpoint of taxpayers who pay for these things, they ought to be delighted to have somebody working at this job who gets it done. General Bragdon quoted Department of Commerce figures of 1954 showing the estimated requirements of State and local public works at $204 billion, and went on to say: "If we had decided to catch up in 10 years, from the standpoint of State and local governments, they would have to be spending more than $20 billion a year on new public works. Actually, the current rate is far short of this." I have quoted that to you to give you some idea of the overall importance of the kind of things with which General Berrigan has been engaged.

The production and provision of public works to take care of the tremendously increased demands of a population which is growing by leaps and bounds is very necessary. While I am on this subject, I will not be digressing too much—certainly not too long—if I make this comment: Those of us who are interested in public service cannot help but run head on into a situation that gives us a great deal of concern. All of us, of course, are interested in and have approved plans that permit one who has spent years of his life doing a good job to look forward to security when the time comes that he is no longer able to carry his full share of the load.

What I have to say here could not possibly be interpreted as a diatribe against pension plans and retirement plans, and that sort of thing, but I become concerned, and I become confused, when I see plans that require mandatory retirement of men in the full flush of their youth, at the age of 50, 51, or 52 years, who, by reason of our Federal laws governing our Army personnel, are required to step down under a mandatory retirement system that takes out of circulation these men right at the peak of their performance. To my mind, that is one of the crying shames of the age—the fact that that sort of thing should be tolerated.

A man who has the opportunity to spend 30 years in the active practice of his profession—I am speaking particularly of engineers now—I talk about that because they certainly suffer most of all under this inequitable system. Why, my friends, there is a provision under this compulsory retirement system that permits 10 percent of veterinarians to be retained. Somebody told me that the Army had been mechanized, and therefore, cedtainly I would be justified in believing that the role of veterinarians would be somewhat reduced in importance to what it was at the time this law was passed. Yet, there is a provision for the retention of 10 percent of the veterinarians, doctors, chaplains, whose importance I won't minimize—or other medical services. But, no such provision is made for the retention of an engineer who has devoted 30 years of his life to learning the problems, and how to conquer those problems which lie within his province.

To my mind, it is time that something be done to bring in effect a cure of that situation. It is a tragic thing, not only to the taxpayer who has paid for the development and the training of that man, but it is a tragic thing to the man himself. At the age of 51 or 52 years, he finds himself forcibly separated from the service at a time when he is not being sought by industry because he

is over 45 years of age; the time when the only thing left to him is to go out and develop his own business from the ground up. That just doesn't make sense. It is time something was done about it. It is time that those of us who have the privilege of standing up in public and talking about that subject should present the facts on an inconsistent and indefensible situation.

The Chief Executive of this country ought to issue an executive order suspending the effect of that kind of compulsory retirement, during a time when the need for trained engineers is so great and the necessity is equally great for the development of public works—certainly the public works we are talking about are the very ones the Corps of Engineers and all other engineers are required to be interested in.

Some kind of provision must be made that the men who have 30 years of experience under their belt, who have acquired the know-how through the hard knocks of practical experience and who, for my part, are mere youngsters of 50 years, shall not be tossed into the discard. The idea of telling us that these fellows who graduated from West Point in 1926 or 1927 should now be forcibly retired strikes me as one of the most wasteful suggestions in many a year. Tonight, we ought to be thinking about that problem. We ought to be thinking about what we can do to make certain that the man who has just reached the peak of his performance shall be given the opportunity to continue to deliver the goods, in service to the American public.

As you consider that, think about what a crime it is to permit a reduction in the number of those actively practicing engineering. My attention was called this morning to an item that appeared in one of the morning papers which I thought might be interesting to you. It is entitled, "A Message from Moscow" and is quoted from the news agency Tass; "There were nearly four times as many engineers and technicians in Russia in 1952 as there were 25 years ago." It goes on to talk about the production of materials. The thing that struck me was that, over there, they are producing more and more engineers, and they are giving them the opportunity to serve. Over here, we are producing engineers, but when they reach the age of 51, 52, or 53 years, we say, "You may no longer serve. You have fulfilled your usefulness so far as the Corps of Engineers is concerned."

To my mind, that is something we ought to do something about.

Finally, I saw a quote the other day that I thought might bear repetition here tonight. If I sound to you like I am very enthusiastic over the opportunity that has been given me to be associated with General Berrigan, that is exactly the impression I want to leave with you. I would like to quote these few words from one of our great industrial leaders who spoke before a national forum just a few days ago. He was speaking about our general situation here in this country.

He said, "When I see our population doubling, and perhaps redoubling in a single century; when I see the standard of living rising all over the world; when I contemplate the enormous drain upon our natural resources in the coming century; when I witness man's first faltering steps in an atomic age; when I watch him seeking to penetrate outer space; when I see him trying to harness the rays of the sun; when I observe his determination to unlock (if he can) the ultimate secrets of the universe, such as the creation of matter out of energy; when I comprehend in short the boundlessness of his expectations, I do know one thing. The future is not for little men with little minds. It is not for men without vision, who fear progress. It is not for timid men who early were frightened by the story of Frankenstein. No. The future is for men who dare to have great expectations, and who, with the guidance and encouragement of all the people from whom they strive will also have the courage, the persistence, the wisdom, and the patience to transform those expectations into reality."

That ladies and gentlemen, is the kind of man Gen. Paul Berrigan has shown himself to be since the day he arrived in our midst.

Alabama Looks at Its Industry

EXTENSION OF REMARKS
OF
HON. GEORGE HUDDLESTON, JR.
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. HUDDLESTON. Mr. Speaker, it was my pleasure to insert in the CONGRESSIONAL RECORD last week an article calling attention to the eighth annual observance of "Alabama Industry Days."

This Statewide observance from April 28 through May 4 put Alabama's industrial might on exhibit. It also afforded ample opportunity to review Alabama's rapid industrialization and the numerous economic advances which have resulted in recent years.

Expanding industry has revitalized our State's entire economy.

Alabama is fast becoming more urban than rural. But just as drought and insects once adversely affected the State's economy when it was based entirely on agriculture, other factors now sometimes cause changes in our industrial economy. However, our economy as a whole is now well balanced between agriculture and industry. In fact, industry itself is logically diversified in our State.

Alabama's present economy, therefore, is basically healthy and stable.

As an honest and forthright appraisal of our current economic condition, under leave heretofore granted, I insert in the RECORD an editorial from the Birmingham News, one of the South's greatest newspapers, entitled "Alabama Looks at Its Industry." The editorial appeared in the News on April 30, 1957:

ALABAMA LOOKS THIS WEEK AT ITS INDUSTRY

This week, April 28 through May 4, is being observed again throughout the State as Alabama Industry Days. Sponsored by the Associated Industries of Alabama, the University of Alabama, the Alabama Press Association, the Alabama Broadcasters Association, and the Alabama Junior Chamber of Commerce, this annual event is designed to help bring to all of our people a fuller understanding and appreciation of what industry means in our community and individual lives.

As in previous years, many Alabama manufacturing concerns this week are holding open house and conducting plant tours to give people an opportunity to see industry in action. In numerous cities and towns, retail merchants are featuring window and store displays, showing Alabama-made products. The story of Alabama industry and its progress is being given special emphasis by the press, radio, and television.

Alabamians will learn this week that industrial activity in the State is being maintained at a generally high level. The concensus of business leaders queried in a recent Associated Industries survey was that while 1957 will not be as good a year as 1956 in terms of profits, the volume of business will hold up satisfactorily.

Last year several of the State's major industries, notably steel, textiles and lumber, were beset with strikes and other temporary troubles, but even so total industrial activity, according to the University Bureau of Business Research, advanced over the previous year. Substantial gains, the bureau reported recently in its annual business survey, were made by many smaller but often faster-growing industrial lines. Impressive growth and vigor were shown by such industries as chemicals, aluminum, cement, machinery, transportation equipment, shipbuilding, and paper, pulp, and paperboard.

The rate of economic development varies in different years, but there are good reasons sustaining the belief that Alabama's industrial growth is continuing at a healthy pace. Our citizens will find much that is encouraging and gratifying in surveying the State's industrial scene during Alabama Industry Days.

Wilkesboro Dam

EXTENSION OF REMARKS
OF
HON. RALPH J. SCOTT
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. SCOTT of North Carolina. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an editorial taken from the Winston-Salem Journal, May 2, 1957:

THE WILKESBORO DAM

The new Army Corps of Engineers' report strongly recommending the Wilkesboro Dam plan for flood control on the Yadkin River should be approved by Congress. This would clear the way for action on an urgently needed flood control program in the upper Yadkin Basin which has been too long delayed.

The Wilkesboro project has been opposed by landowners having property in Wilkes and Caldwell Counties above the proposed dam site. They say it would inundate their land. The Corps' report takes cognizance of this opposition and says the dam now proposed has been designed to prevent any such inundation. Then the report compares the Wilkesboro Dam project with three alternate plans embracing multiple dams on tributaries to show that these projects are not economically feasible, because of high costs, and that they would provide less flood control and water resources benefits. The Wilkesboro project would cost much less, cover less ground, provide more benefits, be constructed much quicker, and cost less to operate and maintain.

The report re-emphasizes the urgent need for effective flood control in the Yadkin Valley. It shows that the annual average damage from floodwaters in the upper Yadkin Basin is $313,000. Industrial and commercial properties in the area subject to flooding exceeds $15 million, with a total employment of approximateley 2,000. The flood stage on the Wilkesboro gage is 12 feet, and from 1899 to 1955, this flood stage was equaled or exceeded in 6 years out of every 7. In the disastrous floods of 1940 the Wilkesboro gage reached 36.7 feet. Flood damage that year ran into the millions.

It seems obvious even to those not versed in hydraulic engineering that, in times of heavy rainfall in the mountainous terrain of Wilkes and Caldwell, the rapid and volumin-

ous flow of rain water down the hills of the Yadkin Valley could not be controlled by a few catch-basin dams on tributary streams. At such times much floodwater runs directly into the river. Small dams might well fit into an overall flood-control program, but some larger dams on the main river are essential for adequate regulation of stream flow.

The plan of the Army engineers is based on years of study. The Soil Conservation Service, which aided in a limited degree in the resurvey upon which the present corps report is based, says it neither agrees nor disagrees with the report findings. But an SCS study made in 1941 indicates that the small multiple dam plan would not afford adequate flood control for the valley.

Congress should accept the Wilkesboro Dam project as an important first step in the development of a comprehensive flood control, stream regulation, and water conservation program for the whole Yadkin Basin. In so doing it will prepare the way for the evolution of a State-Federal water control and use program which will protect not merely the interests of a few landowners in the valley, but the interests of all the 1,250,000 people who live in and near the Yadkin Basin in North Carolina.

Disabled American Veterans Oppose Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, I am including in the RECORD a letter addressed to me by the director of legislation of the Disabled American Veterans expressing opposition to the veterans' provisions of H. R. 6659. In this letter, the Disabled American Veterans has expressed opposition to the transfer of any part of the veterans' housing program from the Veterans' Administration to other agencies. The Disabled American Veterans is also opposed to using the trust fund of the national service life insurance program for the purchase of housing loans. The Disabled American Veterans' letter follows:

DISABLED AMERICAN VETERANS,
Washington, D. C., April 10, 1957.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs, House of Representatives, Washington, D. C.

DEAR MR. TEAGUE: Your letter dated April 9, 1957, addressed to National Commander Joseph F. Burke, enclosing a copy of H. R. 6659 and requesting an expression of the views of this organization relative to the portion of the bill which affects the veterans' housing program, has been carefully considered.

Commander Burke is now in the Far West on official business and while he has not been consulted on the latest development in the matter of proposed legislation on the subject of housing for veterans I know from previous discussions with him and based on my knowledge of organization policy that I can speak for the commander on this important topic.

The Disabled American Veterans is opposed to H. R. 6659 and its provisions affecting veterans and their families and we cannot help but feel that the Banking and Currency Committee has infringed somewhat upon the jurisdictional prerogatives of the Committee on Veterans' Affairs in this matter. It seems to us that such a tendency, if followed to any notable extent by various congressional committees, could bring about a condition bordering on legislative chaos which would certainly not be to the advantage of veterandom. In other words, the DAV believes that your committee has and should be permitted to retain jurisdiction over proposed legislation affecting veterans and their dependents. This organization is opposed to raising the interest rate or attaining such result by indirection, opposed to using any part of the NSLI fund for housing loans or other extraneous purposes, and we are flatly against any move that would transfer functions of the Veterans' Administration to other agencies. Attached for your ready references are copies of my letter to you dated April 5, 1957, and my wire to Chairman Brent Spence of April 2, 1957.

Sincerely yours,
OMER W. CLARK,
National Director of Legislation.

Thomas E. Murray, Member of the Atomic Energy Commission

EXTENSION OF REMARKS
OF
HON. MELVIN PRICE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. PRICE. Mr. Speaker, I would call to the attention of Members of the House an editorial which appeared in the New York Journal-American of Thursday, May 2, in which the publishers of that great newspaper express the hope that the President will reappoint Thomas E. Murray as a member of the Atomic Energy Commission.

The editorial very wisely points out that "the members of this Commission, important as it is to our national security, should be men of the highest integrity, intellectual courage, and specialized knowledge."

The editorial refers to a letter which 10 members of the joint congressional Committee on Atomic Energy directed to the President urging the reappointment of Mr. Murray. As one of the signers of this letter, I would like to make it clear, as I have already done on the floor of the House, that we were not acting in an official committee capacity, but as individual Members who were aware of Mr. Murray's great contribution to our atomic energy program. Being among those Members of Congress who by our position on the joint committee follow this program most closely, we believe, as the Journal-American editorial states, that it is "in the interests of the common good to have on the Atomic Energy Commission a man of Mr. Murray's experience, brilliance, and honesty."

Thomas Murray has never permitted political considerations to interfere with his work on the Commission. His efforts have always been directed toward what he believed to be for the good of his country.

I certainly join the Journal-American in expressing the hope that the President will reappoint Mr. Murray.

The editorial to which I refer follows:

THOMAS E. MURRAY

The Atomic Energy Commission is a supremely important agency. This being so, its members should be men of the highest integrity, intellectual courage, and specialized knowledge to direct this Nation's nuclear development both for security in war and its uses in peace.

In our opinion Thomas E. Murray fulfills all these conditions.

Nor are we alone in that belief.

A letter has just been made public urging President Eisenhower to reappoint Commissioner Murray, whose term expires June 30. The letter was signed by all 10 Democratic members of the Joint Congressional Atomic Energy Committee and 1 Republican, Representative JAMES T. PATTERSON, of Connecticut. We think it reflects the views of many Americans.

There is a growing feeling in Washigton that Commissioner Murray will not be reappointed. The reasons for that opinion seem to be that he is a Democrat, that he is a holdover from the Truman administration, that he has become known as a dissenter and sometimes has opposed the policies of the present administration.

None of these reasons is valid.

As the letter signed by the Atomic Energy committeemen points out, Mr. Murray has never permitted political considerations to get in the way of "the common good of the United States."

His dissenting has always been in the direction of what he believes the common good to be.

In this connection we offer an excerpt from the CONGRESSIONAL RECORD of April 18, this year. Mr. Murray was credited by Representatives JOHN W. MCCORMACK, of Massachusetts, and CHET HOLIFIELD, of California, as having been largely responsible for the development of the small A-weapons program, to which majority opinion was at first skeptical or indifferent.

We have not always been in agreement with Mr. Murray's views, nor have the Congressmen who support his reappointment. But we would like to ask: Is it not in the interest of the common good to have on the Atomic Energy Commission a man of his experience, brilliance, and honesty? Is not dissent by such a man often of more value than acquiescence?

It is our hope the prevailing feeling in Washington is wrong. It is our hope the President will reappoint Mr. Murray.

Fifteenth Anniversary of the Military District of Washington

EXTENSION OF REMARKS
OF
HON. JOHN L. McMILLAN
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. McMILLAN. Mr. Speaker, yesterday the Military District of Washington, United States Army, observed its 15th anniversary. Because of the holiday, the district is celebrating the anniversary today.

It is fitting and appropriate at this time for this House to recognize the responsibilities and accomplishments which the Military District of Washington has achieved over the past 15 years.

Although small in area, the district is responsible for many vitally important Army units, installations, and ceremonial functions in and around the Capital.

Headed by Maj. Gen. John G. Van Houten, the Military District of Washington is primarily responsible for the defense of metropolitan Washington and the extensive needs of the Department of Defense.

Military and civilian personnel working within the district should be thanked on this occasion for the faithful performance of their duties which have contributed greatly to the success of the command.

The installations within the command have demonstrated their interest in local community activities and have been responsible for establishing a feeling of mutual understanding between the military and civilian population.

It is with these thoughts in mind that I am happy to submit the following report of MDW's responsibilities for insertion in the CONGRESSIONAL RECORD:

MDW To CELEBRATE 15TH ANNIVERSARY MAY 5

The Military District of Washington (MDW) will observe its 15th anniversary on May 5. Organized under that designation in 1942, it was established solely to meet the needs of the Nation's Capital. Before coming into being 15 years ago several other organizations existed from time to time but were more limited in scope and authority.

Today, MDW as it is commonly known, has two specific functions:

To provide a well-organized and responsible support in defense of the Capital in the event of an emergency, and

To perform the numerous services required by the Department of the Army in the Washington area.

Commanded by Maj. Gen. John G. Van Houten, MDW is limited geographically, but within this small area many installations, activities, and units of differing characteristics exist.

With its headquarters in building T-7 at Gravelly Point, (a 5-minute walk from Washington National Airport), MDW includes 6 counties in Virginia: Arlington, Fairfax, Prince William, Stafford, King George, and Westmoreland; 5 in Maryland: Calvert, Charles, Montgomery, Prince Georges, and St. Marys—including the District of Columbia.

Installations under MDW command include Fort Myer (home of the Army Chief of Staff Gen. Maxwell D. Taylor, and Air Force Chief of Staff Gen. Nathan F. Twining); Fort Lesley J. McNair, located in southwest Washington (home of the National War College and the Industrial College of the Armed Forces); and Cameron Station in Alexandria, Va., charged with the shipping of Government property, packing, crating, and shipping the household effects belonging to Armed Forces personnel. Also located here are a number of small technical units.

In addition, the headquarters is responsible for the First Arctic Test Center stationed in the far north at Fort Churchill, Manitoba, Canada, and has courts-martial jurisdiction over all military attachés abroad.

MDW's responsibilities are basically similar to those of the six continental Army commands. Its special responsibilities involve the Department of the Army and various other Government agencies.

Not to be confused with military districts established in all States and the District of Columbia which are charged with the administration of Reserve and National Guard recruiting activities, MDW is, for the most part, not directly concerned with these activities.

Some of the more important functions, as far as the public and the Capital are concerned, involve the Army's oldest regiment, the 3d "Old Guard" Infantry Regiment with headquarters at Fort Myer, and a battalion at Fort McNair.

This famous regiment is the ceremonial honor guard for the President and as such leads the inaugural parades. The 3d also participates in receptions for foreign dignitaries visiting Washington. Arrangements for arrivals and departures, which involve split-second timing, security measures, and traffic control—all rest on MDW.

One of the most impressive duties which soldiers of the 3d Infantry perform is the constant vigil at the Tomb of the Unknown Soldier. Here specially selected men pace before the tomb night and day, rain or shine, 24 hours a day, 365 days a year.

Tens of thousands every year witness the changing of the guard at the tomb which occurs every hour on the hour.

The 3d is also responsible for honor guards in military funerals held at Arlington National Cemetery, the burial place of the Nation's heroes.

The United States Army Band—one of the country's outstanding military bands—makes it headquarters at Fort Meyer as does the newly created United States Army Chorus. MDW is responsible for the activities of both groups.

MDW, through its Headquarters Commandant, administers the vast complex operation of the world's largest office building—the Pentagon. It supervises the internal security guard forces of this and seven other defense building in the Washington area.

It also provides support for the capital's antiaircraft defense groups, the Army Map Service, the Army Command and Management School, the White House Motor Pool, and the White House Communications Center which receives and transmits information of the greatest importance to this country and the free world.

Under MDW control is the Third Transportation Co. (helicopter) stationed at Davison United States Army Airfield, adjoining Fort Belvoir. The Army aircraft at Davison range from small to large helicopters, from L-19 fixed-wing planes to multiengine Army planes.

Despite these many and varied functions, the Military District of Washington exists primarily to met Washington's defense needs. This is symbolized by its patch—the Washington Monument crossed by a large two-handed sword, an emblem of protection.

In the field of community relations, MDW has during the past year participated in a variety of programs aimed at bringing the Army and the public closer toegther for the betterment of mutual understanding.

Sunday ceremony parades, initiated by this headquarters to honor deserving national organizations, opened the summer season on April 15. The honored organization was the Daughters of the American Revolution, an organization with a membership of 182,000. A citation was presented to the DAR by the commanding general, MDW, honoring the society's high patriotic aims and achievements.

On April 18 the second in the series, honoring 4 Congressmen, veterans of World War II, was staged before a distinguished assemblage, including some 100 Members of the Senate and House. Secretary of Army Brucker highlighted the ceremony with the presentation of the Bronze Star Medals to the Congressmen veterans.

On May 6, 18,000 Girl Scouts were present at Fort Myer on the occasion of MDW's salute to their organization.

More than 60 nations were represented on June 3 when the Military District of Washington honored the military attachés of all embassies in Washington. Approximately 130 military attachés, their families, other embassy personnel and the general public attended.

On June 10, Eric Johnston, representing the motion-picture industry, received the salute of the troops in a parade honoring the Motion Picture Association of America.

Organizations so honored at the 3d Infantry Regiment's Sunday parades for the 1956 season are as follows:

April 15, Daughters of the American Revolution.
April 18, congressional award ceremony.
April 22, Inter-American Defense Board.
April 23, National Security Training Commission.
April 29, normal retirement.
May 6, Girl Scouts of America.
May 13, award of DSC.
May 27, normal retirement.
June 3, military attachés.
June 10, Motion Picture Association of America.
June 17, 4-H Clubs.
June 24, general officers retirement.
July 1, Armed Services Hospitality Committee.
July 15, Legion of Valor.
July 22, American Legion Boys Nation.
July 29, Chaplains Corps.
July 31, general officers retirement.
August 5, Kiwanis.
August 12, battalion retreat parade.
August 19, normal retirement.
August 26, regimental retreat parade.

The above ceremonies were in addition to routine retirement parades, both at Forts Meyer and McNair. In connection with retirement ceremonies, the most notable was the retirement of General Gruenther at Fort McNair. It is believed these parades admirably serve in fulfilling community relations objectives in a most effective way.

FORT CHURCHILL

Easily the highlight of the period was the International Geophysical Year rocketry project at Fort Churchill which ran through October and November. Approximately 230 visitors from all parts of the United States visited the rocket-launching site each day from August 13 to August 20. An officer was appointed to tell the visitors of the difficulties encountered during construction of the rocket site. Also, an officer from the IGY project talked to the visitors, telling them what the scientists hope to gain from the rocketry program. This program was established so that Fort Churchill could show, at least to a small portion of the American public, what the United States Army is doing away from the United States.

SPEAKERS

In line with the Chief of Staff's desire for maximum emphasis on "selling the Army" through the medium of officers qualified to speak before the public on the Army's programs, problems, and achievements, letters were sent to more than 40 representative civic, patriotic, professional and luncheon organizations in the Washington Metropolitan area, informing them of the availability of qualified speakers and the loan of selected Army films obtainable from MDW headquarters. As a result of these 40 queries, 37 speaking engagements were booked.

The most popular of the films loaned to various organizations were the "Nike Guards the Nation's Capital," "Diary of a Sergeant," "Guided Missiles," and "Military Use of Helicopters."

In addition to performing the normal duties required of any military headquarters, MDW provided full military honors for 2,267 funerals; 65 VIP arrivals and departures, 115 wreath-laying ceremonies; and 420 miscellaneous public events and ceremonies in 1956.

Address by Hon. John W. McCormack at the Democratic Banquet, National Guard Armory, Washington, D. C.

EXTENSION OF REMARKS
OF
HON. CARL ALBERT
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. ALBERT. Mr. Speaker, the distinguished majority leader, the gentleman from Massachusetts [Mr. McCORMACK], delivered an outstanding address at the Democratic banquet held at the National Guard Armory here in Washington last Saturday evening. In this address Mr. McCORMACK outlined forcibly and succinctly the real political issues of the day and he demonstrated by concrete examples the total lack of unity in the ranks of the Republican Party.

The full text of this fine speech follows:

We are honored and so glad to have with us this evening a great Democrat, a fighting Democrat, a man who steered our ship of state with vision, with firmness, with courage, a man who will go down in history as one of the great Americans of all times, our valued friend, former President Harry S. Truman.

Harry S. Truman assumed the grave responsibility of Chief Executive of our country, and the leader of the Free World on the death of another great American—the immortal Franklin Delano Roosevelt.

The great humanitarian, Franklin Delano Roosevelt, gave to our country the leadership of hope and confidence that rehabilitated our country economically, politically and idealistically, from the depths of despair of the greatest depression of all times.

He also gave to our country the vision that saw and thwarted the evil designs of Hitler and nazism. He gave to the country and to the world the leadership that brought about victory in World War II.

The Democratic Party can point with justifiable pride to Franklin Delano Roosevelt and his great contributions in time of peace and in time of war.

Upon his death, Harry S. Truman assumed the office of President, and was elected in his own right in 1948 after one of the most amazing and spectacular campaigns in the political history of America.

During his service, the world faced with the menace of atheistic communism, Harry S. Truman met and faced the problems of his period of service in stopping and containing communism, in building America internally, and with a vision and courage that marks him as one of the greatest Americans of all times.

The world knew that while he was President, Harry S. Truman made his own decisions. The Communist and non-Communist world knew that when he made a decision, Harry S. Truman meant it.

There was no shifting from day to day or week to week on his part in the foreign policy of our country. He was firm without bullying. He was definite, consistent, courageous in his leadership, and in the making of policy in our national interest and in the carrying out of that policy.

During his service as President, the one man in the world that the evil-minded men in the Kremlin respected because they feared him, was Harry S. Truman.

Like Franklin D. Roosevelt, the Democratic Party can point with justifiable pride to Harry S. Truman, the courageous President.

And Wednesday next, May 8, is his birthday anniversary.

I know I express your sentiments and those of millions of others in extending our congratulations to President Truman and in wishing him and Mrs. Truman many, many more years of continued happiness.

There are countless millions of Americans who wish we had Harry S. Truman, or one like him, in the White House today.

The 1956 campaign made political history in America. The political phenomenon was the election of a Republican President and a Democratic Congress.

Our candidate for President, Gov. Adlai Stevenson, made a great campaign, a courageous one, based on intellectual honesty. He avoided no issue. He stated his position clearly. He stuck by his position despite the political distortion of his views by the Republican campaigners. His intellectual honesty in discussing issues that others would avoid was an education to the American people of a beneficial nature. For example, his courage in stating his position on the indescribably destructive nuclear bombs, which position was distorted for votes by the opposition, was an illustration of the statesmanlike manner in which he conducted his campaign.

While he failed of election, he emerged therefrom the real victor, enjoying the respect and confidence of the American people.

For we now see his views, so courageously stated, deliberately distorted during the campaign by the Republican high command, are now being adopted by the present administration as the policy of our Government.

On a straight political level between the 2 great political parties, the results of the 1956 campaign show that the people prefer the Democratic Party over our political opposition.

We can look forward with confidence to a great Democratic victory in 1958 on the National, State, and local levels, and a complete victory in 1960 with the election of a Democratic President. There are definite signs why we can make that forecast. With a Republican President, the Democratic Congress on the national level is giving our country the visionary and constructive leadership so necessary for our national interest in the field of foreign affairs and for our best interest in the field of domestic affairs.

With Democratic Presidents of recent past—the Republican Party—even when in control of Congress, was a mere party of blind opposition.

That is not the intended and proper role of a political party under constitutional government. With a Republican President, the Democratic Party in Congress has performed its intended and proper duties—of constructively supporting when in agreement, and constructively opposing when in disagreement.

The people are aware of this leadership and approve it.

The Democratic Party is the part of progress—the party of the people. It is generally known, and growing rapidly, that big business and those who favor tight money conditions are the hidden and actual forces in control of our Government.

The economic groups and millions of Americans who are discriminated against and adversely affected by this nonelected hidden control—for example, the farmers, the small-businessmen, the homeowners, those who want our great public resources protected from selfish, private exploitation, and others—know they can only look to the Democratic Party to bring to them the consideration and the justice to which they are entitled. Before this Congress is over, under democratic leadership, legislation beneficial to them will be enacted into law.

Another sign is the evident fact that the Republican Party is sharply divided—that it is splitting into bitter groups and factions—incapable of giving the country responsible leadership so necessary in this trying period.

It is plain now that the old guarad and the Republican isolationists are no longer hibernating—they are no longer underground. It is also evident that a bitter fight for control of the Republican Party machinery with a view to the next Republican National Convention is going on and that the evidenced skirmishes of today will become the bitter battles of tomorrow, and this is most unfortunate at a time when national unity is vitally important.

As the people more and more realize this fact—appreciating that with such sharp division there cannot be responsible leadership in the Republican Party—and that the Democratic Party is giving responsible leadership, they will more and more turn to the Democratic Party as the party of responsible leadership and action.

For the Democratic Party is more organically united today than it has been for years—and that organic unity will grow and grow between now and the elections of 1958 and later—the presidential election of 1960.

In connection with this we must encourage in every way possible the organization work on the precinct level, the building up of all elements of the party, and particularly the building up of the women's organization, and, of vital importance, the building up of the Young Democratic organization and the attraction to our party of the youth of America.

On the question of the split in the Republican Party and its inability to function and serve the people in a responsible manner, pertinent and powerful evidence exists in support of the same.

For the rollcall records of the House for this session to date shows that the Republican Members of Congress are not supporting the recommendations of the President of the United States, the leader of their party.

It is very evident from a number of rollcalls in the House of Representatives that on recommendations made by the President, the great majority of his party are voting against him. In other words, the President goes one way—and the majority of his party in Congress goes the other way.

On April 4, 1957, rollcall No. 38 shows $204,000 was stricken from the budget estimate of the President in relation of the Office of Solicitor in the Department of Labor. This amount was necessary to carry out organic legislation of a beneficial nature. On that vote 241 Members voted in favor of the reduction and 171 against it. A breakdown of this rollcall shows that that 88 Democrats voted for the reduction and 129 Democrats against it. On the other hand, 153 Republicans voted for the reduction and only 42 against it. A vote against the reduction was a vote to support the budget estimate of the President.

On the same day, rollcall No. 40 was a vote on reducing the President's budget estimate by $136,000 in connection with carrying out laws relating to veterans' reemployment rights. That motion to reduce was defeated by a vote of 275 to 137, but the rollcall vote is very interesting on the Republican support in the House of Representatives of the recommendation of their leader. For the rollcall vote saw that only 30 Democrats voted for the reduction and 187 against. On the other hand, 107 Republicans voted for the reduction and 88 against.

On the same day there was another rollcall vote, No. 41, involving a reduction of $442,000 from the President's budget estimate for the Bureau of Employment Security. That reduction carried by a vote of 214 to 205. The rollcall breakdown shows that 72 Democrats voted for the reduction and 150 Democrats voted against it. On the other hand, 142 Republicans voted for the reduction and

against President Eisenhower's recommendation, and only 55 voted against it.

On the same day, rollcall No. 42 was an amendment to reduce grants to States for unemployment compensation by $12,186,000. That motion carried by a vote of 220 to 200. A breakdown of the voted shows that 64 Democrats voted for the reduction and 159 voted against it. There were 156 Republicans who voted for the reduction and only 41 against it.

On the same day there was rollcall No. 45 to reduce the appropriation for the Bureau of Labor Statistics by a sum of $346,000. That motion carried by a vote of 217 to 201. The breakdown shows that 83 Democrats voted for the reduction and 139 against, but 134 Republicans voted for the reduction and 62 against.

On rollcall No. 46, which was a motion to reduce by $21,000 the appropriation for the Women's Bureau in the Department of Labor, this motion was defeated by a vote of 210 to 206. Its breakdown shows 61 Democrats voted for the reduction and 161 against. The rollcall vote shows 145 Republicans voted for the reduction and only 49 against.

On the same day there was rollcall No. 47 to reduce appropriations for the Wage and Hour Division of the Department of Labor in the sum of $288,000. This is a very important activity. This motion carried by a vote of 214 to 205. The breakdown shows 72 Democrats voted for the reduction, and 150 Democrats voted against it. It shows that 142 Republicans voted for the reduction and only 55 against it.

Rollcall No. 49 was a motion to reduce in the sum of $1,482,000 appropriations for the Office of Education. If this had carried, appropriations in connection with the retarded and exceptional children of our country would have been wiped out. This motion to reduce was defeated by 1 vote, 207 to 206. The rollcall shows that 73 Democrats voted for the reduction and 146 voted against it. It also shows that 133 Republicans voted for the reduction and only 61 against it.

Rollcall No. 50 on the same day was a motion to strike out $50 million recommended by the President for grants to States in connection with the control of the pollution of our rivers and streams. This was defeated by a vote of 231 to 185. The rollcall shows that 35 Democrats voted for the reduction, but 186 Democrats voted against it. On this important rollcall 150 Republicans voted for the reduction and against their party leader's recommendation, and only 45 Republicans voted against it.

On April 17, 1957, there was roll call No. 64 which is a very interesting one which involves the field of foreign affairs. The bill making appropriations for the State Department was before the House. A motion was made to reduce the appropriation for contributions to international organizations in the sum of $7,039,958. That motion was defeated by a vote of 205 to 156. A breakdown of the roll call is very interesting—showing that 68 Democrats voted for the reduction and 131 voted against it. On the other hand, 98 Republicans voted for the reduction against their party leader's recommendation, and only 74 voted against it.

These series of roll call completely support the fact that the Republican Party is split—that the Republicans in Congress are not supporting their party leader, who is the President of the United States, and that the people cannot look to the Republican Party for responsible leadership. The evidence clearly shows that the constructive actions are on the part of the Democratic Party in Congress and that it is the party of responsibility.

We read in the papers in recent days that President Eisenhower, upon his return from his recent vacation in Georgia, was going to the country to fight for his budget recommendations. Instead of going to the country to fight for his budget recommendations, I might suggest that what the President should do, based upon actual roll call records, is to try and gain control of his own party in Congress, and to stop members of his own cabinet from rebelling against him.

It was only a few months ago that the Republicans under the leadership of Secretary of the Treasury Humphrey, and the President remaining silent when he should have acted, that they thought they were politically smart. The trap was set for the Democrats in the President's budget but it has closed the teeth on the Republicans.

They were just too smart for their own good.

The leader of the Republican Party, as President, realizes that he must now go to the people in an effort to prevent a too sharp reduction in his budget recommendation and particularly in the field of foreign assistance. As political leader he let things drift; now as President he belatedly realizes that the situation has gotten beyond his control and he must fight to try to get back control of the situation.

But the roll call votes in the House of Representatives clearly show that the fight is in his own party, starting with the Secretary of the Treasury, George Humphrey. It will be interesting to see how successful the President will be in having his party in the Congress follow him.

The country is witnessing a President deserted by the great majority of his own party in the Congress. The country is watching the spectacle of this desertion by his own party at the outset of the President's second term, with the rebellion in his own party started by his own Secretary of Treasury. If any member of Franklin Delano Roosevelt's or Harry S. Truman's cabinet had done that, they would not have long remained a member of their cabinets.

It is fortunate that the country has a Democratic Congress at this time.

So, with the constructive action of the Democratic Party—coupled with the fueding and the lack of unity in the Republican Party—and with the fact that despite a Republican President the people can only look to the Democratic Party for responsible leadership—the prediction can be made with confidence of a great Democratic victory in 1958—and a complete victory with the election of a Democratic President in 1960.

Anthracite Week Proclamation

EXTENSION OF REMARKS
OF
HON. DANIEL J. FLOOD
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. FLOOD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following proclamation by Mayor Luther M. Kniffen, of Wilkes-Barre declaring the week of May 6 through 11 to be set aside as Anthracite Week:

ANTHRACITE WEEK PROCLAMATION

Whereas the continuing welfare of this area depends upon the production of anthracite; and

Whereas greater Wilkes-Barre proudly continues its status as the anthracite capital of the world; and

Whereas high anthracite payrolls and high anthracite tonnage figures reflect the success of the community; and

Whereas anthracite is a clean, economical, and efficient fuel; Now, therefore,

I, Luther M. Kniffen, mayor of the city of Wilkes-Barre do declare the week of May 6 through 11 to be set aside as Anthracite Week, and I call upon the community to reflect the benefits of the anthracite industry which accrue to themselves individually and to the community collectively, and wherever possible and expedient to buy, burn, and boost anthracite.

LUTHER M. KNIFFEN, *Mayor.*

American Legion Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, H. R. 6659, reported by the House Banking and Currency Committee and titled "The Housing Act of 1957," creates a veterans' housing program in FHA. It contains several amendments to the veterans' housing program under the Servicemen's Readjustment Act of 1944, which is under the jurisdiction of the Committee on Veterans' Affairs. H. R. 6659 also proposes to amend the National Service Life Insurance Act and use a part of the reserve fund of the national service life insurance program for investment in FHA veterans' preference 5 percent loans. The National Service Life Insurance Act is under the jurisdiction of the Veterans' Affairs Committee. The Veterans' Affairs Committee considered and rejected the proposals to use a portion of the national service life insurance fund for purchase of veterans' home mortgages early in the session.

The American Legion has expressed its opposition to the veterans' provisions of H. R. 6659. The position of the American Legion is outlined in the following letter which I have received:

THE AMERICAN LEGION,
April 9, 1957.

Hon. OLIN E. TEAGUE,
Chairman, House Veterans' Affairs Committee, House Office Building, Washington, D. C.

DEAR CONGRESSMAN TEAGUE: The American Legion is deeply concerned over H. R. 6659, introduced on April 4, 1957, by Congressman SPENCE, after having been reported by the House Banking and Currency Committee. As you know, this act would be known as the Housing Act of 1957.

I realize this bill was not reported by the House Veterans' Affairs Committee, but I respectfully submit that the provisions of the bill, if enacted, will alter, change, or affect the veterans' housing program created by legislation over which your committee has jurisdiction.

The American Legion opposes any transfer of a veterans' program from the Veterans' Administration to the Federal Housing Administration. We believe also that all veterans would object to national service life insurance funds being used to underwrite or subsidize either VA or FHA programs at a 5 percent interest rate when their own program was turned down for a 5 percent interest rate. This could hardly be considered as consistent.

We realize this bill will not come before the House Veterans' Affairs Committee, but we do urgently request your help in protecting the Veterans' Administration program when H. R. 6659 is considered on the floor of the House.

Thanking you for any consideration you can extend to my request and with warm regards, I am,

Sincerely,

W. C. "DAN" DANIEL.

Food for Thought

EXTENSION OF REMARKS
OF
HON. ELIZABETH KEE
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mrs. KEE. Mr. Speaker, a young constitutent of mine wrote to me recently about a problem which is plaguing a good many adult minds today—the question of continuing United States economic aid to other countries. Because Mary's question, in varying forms, is repeated so frequently in my daily mail, I am publishing my answer to her letter, feeling that it may be of general interest and may serve to offset some of the misinformation being circulated as the House prepares to take up the President's foreign aid program. Here is what I wrote to Mary:

DEAR MARY: It is certainly nice to have a letter from you and I shall do my best to answer the question you asked me. You would like to know why it is that this wonderful country of ours helps other countries by giving them food for their poor people when we ourselves in the United States need food as much as the other countries do.

Well, Mary, I think I can guess at what has prompted you to ask this question. You are probably thinking that the United States should first take care of its own needy before caring for those of other lands. But this, my dear, is exactly what your country has done.

First, let me explain that we in the United States are blessed with an overabundance of food, more than we can ever possibly hope to consume. Across the Nation, our storehouses are fairly bursting with wheat and other grains, with butter, meat and pork products, and with a great many other food commodities that can be preserved and stored. These are what you hear referred to as our "surplus foods."

It is these surpluses—for which we have no domestic markets big enough to exhaust them—that force down the prices our farmers receive for what they raise and this creates hard times for our farm families. So then, you might ask, why don't we just sell these surpluses to the foreign countries and let them feed their own people?

The chief answer to this is that these nations do not have United States dollars to pay for the foodstuffs they might wish to buy, while our American producers are unwilling to accept other nations' currency because it has no purchasing power in this country. In other words, you could not spend this foreign money at the corner store as you would our own nickels, dimes, and quarters.

So to help our own farmers to receive better prices for their products; to have this surplus food serve a useful purpose instead of going to waste and having to be destroyed; to aid the hungry people of many lands, including our own, and to save underprivileged countries from the false promises of communism to which people are sometimes tempted to turn when they are desperate and starving; to accomplish all these good things, your Congress, a few years ago, set up what is called the surplus food-distribution program.

This program authorizes the President of the United States, at his discretion, to use our surpluses to relieve hunger wherever it exists in the world.

But your Congress did not stop here, Mary. Or perhaps it would be more correct to say that it didn't just begin here. Because Congress first provided that the wants of our own people must be met before any food is sent abroad.

That is why we have, today, a school-lunch program in every one of our 48 States—a program that provides hot, nourishing meals daily to millions of American schoolchildren throughout the school year. And it is also why our charitable institutions and State welfare agencies are able to distribute tons and tons of free food annually to our own needy.

It might surprise you to know that just in the first 9 months of this fiscal year, from July 1, 1956, to March 31, 1957, West Virginia has received 5,800,000 pounds of surplus food for its school-lunch program; 2,900,000 pounds have been consumed in our State charitable institutions; and 22,900,000 pounds have been distributed to our needy through our State public-assistance program.

What do these surplus foods consist of? Included in the list are: Wheat flour and cornmeal; dairy products such as butter, cheese, and dry milk; pork products such as canned ham, pork in gravy, and luncheon meat; dried beans, rice, and fresh prunes; cottonseed oil, lard, shortening, and some sweetpotatoes. People can manage to subsist fairly well on the menus this list will provide.

So you see, Mary, we must never jump to conclusions, nor always believe all that we read and hear discussed until we have taken the trouble, as you have in this instance, to find out the facts for ourselves.

This great Nation of ours does, indeed, hold out a helping hand to hungry people of other lands—as I am sure you are proud and happy to have your country do. But let us never forget that at the same time that we give this aid to others, we are also serving our own interests. For by stamping out want and suffering wherever we find it, we help to prevent war as we prove to the world that democracy really works for all people.

That is what I have written to Mary, a young person who will one day have to uphold the ideals and traditions of our Nation as we do today. There are, of course, many other vital factors which must be taken into account as we weigh the pluses and minuses of the costly programs of foreign aid we have carried on since the end of World War II.

These programs have by no means been devoid of self-interest. They have contributed immeasurably to our own security and economic advancement. We must surely realize by now that our two oceans no longer present impenetrable barriers against Communist aggression and attack; and that since we must have a world market for the things we produce—or face an even worse economic depression than the one we experienced in the 1930's—we would not long survive as a free nation surrounced by hostile Communist satellites.

These are the unhappy facts we must face as Congress takes up the foreign-aid program for fiscal 1958. Nonetheless, it would seem to me that a more modest-aid program, accompanied by a sound foreign policy, wisely and temperately administered, is in order. For the American taxpayer cannot indefinitely continue to support the tremendous burden of the foreign military and economic aid programs we are presently carrying.

As Mary might have put it: How long shall we continue to help the people of other countries when we need some of this help for ourselves?

Customs Supervision

EXTENSION OF REMARKS
OF
HON. JOHN W. McCORMACK
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks I include a memorandum in justification of the proposed bill which is designed to prevent undue relaxation of customs supervision. In my extension of remarks, I also include a copy of the bill which I have introduced. The purpose of this bill is to more effectively protect the American people against the extensive smuggling into our country that is being carried on. This has particular reference to the smuggling into our country of narcotics, with its undermining effect. The passage of the bill will also have an important effect upon increased tariffs of our Government. In other words, the purpose of this bill is (1) to prevent smuggling; and (2) to enforce the tariff laws of our country.

The memorandum follows:

MEMORANDUM IN JUSTIFICATION OF BILL I HAVE INTRODUCED TODAY WHICH PREVENTS UNDUE RELAXATION OF CUSTOMS SUPERVISION

The primary purpose of the amendment proposed is to define more clearly the scope of administrative discretion to provide customs supervision of export-import activities which are by law subject to such supervision.

The need for the amendatory definition proposed has been made apparent by the way in which the Treasury Department and the Bureau of Customs have interpreted section 22 of the Customs Simplification Act of 1953. They have assumed a discretion to curtail essential supervisory functions which the law does not give. The actions taken thus far stand as a threat to survival of traditional safeguards heretofore deemed mandatory under the law. The integrity of those safeguards must be restored.

The section in question added a new provision to the tariff laws entitled "Customs Supervision" (sec. 646 of the Tariff Act of 1930, as amended, 19 U. S. C. 1646a). It was enacted for the specific purpose of relieving the Treasury from having to change existing practice under the marking and comparable provisions of the law so as to conform to outstanding court decisions which had held such practices not in compliance with the supervision requirement.

It was made clear by both Houses that the limited purpose and intent of section 22 was to validate certain existing practices of which the Members of Congress had been informed in the course of hearings on the

section. Both the House and the Senate reported the section in the same wording it contained when introduced at the instance of the Treasury Department and when subsequently enacted. The Senate Committee on Finance stated on July 6, 1953 (S. Rept. 632 on H. R. 5877, 83d Cong., at p. 16):

"Section 22 adds a new provision to the Tariff Act of 1930 to permit the Secretary of the Treasury, in his discretion, to determine the degree of supervision by customs officers over activities which are required to be carried out under customs supervision. According to Treasury experts this ratifies and confirms existing practice. In many instances it has been impossible, because of limited budget and manpower, for the Treasury to conform rigidly to the laws interpreted by the courts as requiring constant and specific supervision of certain importing processes. By allowing a more efficient distribution of manpower this provision would make possible better supervision than is presently possible."

And on July 9, 1953, the House Committee on Ways and Means reported the provision with the following statement (H. R. Rept. 760 on H. R. 5877, 83d Cong., at p. 20):

"This section ratifies and confirms existing practice. It does not authorize relaxation of any safeguards against smuggling."

It is certain therefore that the Members of Congress intended by section 22 merely to confirm and ratify by statute the existing administrative practice in providing less than continuous Customs supervision for certain types of import activities ony. It is equally certain that the new provision was not intended as a partial repealer of long-standing statutory provisions requiring direct and immediate supervision and inspection by Customs of those activities most likely to involve danger of smuggling and frauds upon the revenue.

The foregoing definite statements of a legislative purpose to confirm existing practice, as disclosed by testifying "Treasury experts" to the Members of Congress, were made against a background of overt disclaimer by such experts of any thought of using the new section as authority for changes in practice with respect to customs supervision. More particularly, Treasury officials acquiesced emphatically in the stated position that section 22 was not a blanket provision to relax generally the degree of supervision required by law in connection with customs procedures. It would operate, they insisted, only to preserve such intermittent supervision as was already practiced with respect to marking and comparable activities which were directly affected by the adverse court decisions intended to be nullified by the new section. This appears most forcefully from the following colloquy on section 22 which occurred during the testimony given in 1951 hearings before the House Ways and Means Committee on the Customs Simplification Act (H. R. 1535, 82d Cong., August 8, 1951) at pages 183, 185–187:

"Mr. NICHOLS (Assistant General Counsel, Treasury Department). * * * The purpose * * * of this section is to ratify existing practice, and there is no immediate intention to effect any changes in existing practice.

* * * * *

"Mr. MILLS. Mr. Nichols, in the analysis, on page 40 you point out, 'For example, section 304 (c),' etc. I can well understand that it is not necessary or it should not be required that a man continue in supervision over the proper marking of goods after importation, but your use of the words 'For example' would lead me to believe that there are other situations where you are now required to keep a man in constant supervision of certain operations and certain acts under court decisions that you are attempting to remove here.

"Now, what are some of the other situations?

"Mr. NICHOLS. Mr. Johnson will answer that.

"Mr. JOHNSON (Assistant to the Commissioner of Customs). The only court decisions we have are these two particular ones, but the supervision situations are numerous.

"For example, there is supervision of unlading a ship, that is, the taking off of the goods. Now, we feel that the supervision of the unlading, for example, of an oil tanker is very different from the unlading of a ship carrying packaged merchandise. The tanker needs a preliminary inspection, and then occasional visits to see that the cargo is going off in the normal fashion; whereas, for a package ship a man must be there to inspect every sling of packages that comes off the ship.

"Mr. MILLS. That is what I was getting at. You do not intend to relax the constant supervision in such a situation as the latter?

"Mr. JOHNSON. No, sir; but we do feel that adequate supervision of marking is merely such attendance of customs officers as will assure that the goods that were imported were all actually marked.

"Mr. MILLS. I can understand that.

"Mr. JOHNSON. The segregation of commingled merchandise, which we talked about earlier, is again something that does not require the constant presence of a customs officer.

"Mr. MILLS. But this relaxation would not mean that there would not be someone constantly in supervision—let me say it as we say it in Arkansas—of the unloading of a ship, where there are many and divers packages and items involved? You would still have constant supervision there?

"Mr. JOHNSON. Yes. And may I state, sir, that this does not propose any actual relaxation at all. It merely requests confirmation of the practice that has always existed, and which has been disapproved by the court in these two cases.

* * * * *

"Mr. NICHOLS. * * * I wanted to say, to clarify the question of changing existing practices, that we have no plan in mind to change existing practice with respect to the supervision required with respect to the marking requirements, or any other requirements. Obviously, we cannot see into the future and be sure that commercial practices will always remain the same, or, for that matter, that the legal requirements that we are enforcing in connection with this supervision will always remain the same.

"Mr. MILLS. Let me ask you a question right on this point, that I have been interested in for a long time.

"When shipments come from a country that engages in the legal traffic of opium and dope, and other items that are illegal in the United States, do you very carefully scrutinize the unloading and contents of such packages as may be on the ship from those countries?

"Mr. JOHNSON. We have a little informal terminology, in which we designate certain ships as 'hot' ships, and others just go without that designation.

* * * * *

"Mr. MILLS. And this section of the bill would not mean any relaxation or any letup in close supervision in those kinds of cases?

"Mr. JOHNSON. This has absolutely no relationship to enforcement work.

"Mr. MILLS. I knew in my own mind it did not, but I wanted the record to so indicate.

"Mr. COOPER. The fact is that nobody and nothing can come into this country without complying with the law of this country.

"Mr. NICHOLS. That is correct.

* * * * *

"Mr. KING. Who has the responsibility of supervising a ship's personnel when they leave the ship?

"Mr. JOHNSON. That is customs, sir. The customs mans the border. And in a big case, of course, there may be internal connections, and the customs and narcotics will then cooperate immediately on the same case."

Once the section under discussion in the foregoing passages became law, however, the Treasury Department accepted no such limited purpose in its interpretation of the authority granted by the new provision. Instead, the Department acted forthwith to make far-reaching changes in existing regulations so as to provide for relaxation generally of customs supervisory practices. The Simplification Act, which contained section 22, was enacted on August 8, 1953, effective September 7. On September 9, the Treasury Department promulgated a new general regulation which extends to every customs procedure required by law. With respect to all such procedures, the regulation authorizes supervision by customs officers to be by occasional verification whenever a principal customs field officer should so direct. The regulation reads (T. D. 53336, 18 Federal Register 5424–5425):

"PART 23—ENFORCEMENT OF CUSTOMS AND NAVIGATION LAWS

"10. In view of the addition of the new section 646 to the Tariff Act of 1930 by section 22, Customs Simplification Act of 1953, part 23 is amended by the addition at the end thereof of a new section 23.35 to read as follows:

" 'Sec. 23.35. Customs Supervision: Except as otherwise prescribed in the regulations of this chapter or by instructions from the office of the Secretary of the Treasury or the Bureau in particular cases, whenever any action or thing is required by the regulations of this chapter or by any provision of the customs or navigation laws to be done or maintained under the supervision of customs officers, such supervision shall be direct and continuous or, if the principal customs field officer shall determine that less intensive supervision will assure proper enforcement of the law and protection of the revenue, by such occasional verification as such officer shall direct. Nothing in this section shall be deemed to warrant any failure to direct and furnish a required supervision or to excuse any failure of a party in interest to comply with the prescribed procedures for obtaining any required supervision (sec. 624, 46 Stat. 759, sec. 22, 67 Stat. 520; 19 U. S. C. 1624, 1646).' "

This blanket provision was only the beginning. The Treasury has since used it to justify relaxation of customs supervision in numerous separate areas. For example, there is no longer any customs supervision of the lading of bonded oil. Signing of the ship's log by a lading inspector has been dispensed with entirely, and the entire operation is handled upon documents prepared by the importers themselves.

Other examples of relaxation of customs supervision occur in passing free of duty hundreds of thousands of mail packages without any examination by customs, in the export of merchandise for benefit of drawback without supervision, in merely spot-checking of passengers' baggage in certain instances, in allowing certification of exports from carriers' records without having the exports supervised by customs officers, in eliminating supervision of unlading of duty-free bulk cargo even though there is dutiable or general cargo on board or being discharged from the same vessel, in requiring the assignment of a single customs officer to perform all customs functions in connection with a vessel, or even a number of vessels at the same pier—a requirement which precludes any kind of real supervision over the operations involved. Further examples could be taken from virtually every phase of customs activities.

Some of the practices in curtailing customs supervision just noted, as well as others of the same character, were actually put into effect by the Bureau of Customs before and during the period when Congress was considering section 22 for enactment. But the Members of Congress were not apprised of the facts in this respect and were not made aware that section 22, if enacted, might be construed as a blanket approval of such practices. The section has been so construed by the administrative department. It is being looked upon as "blank check" authority to relax to an alarming degree the essential function of supervision and inspection by customs.

Nothing is more fundamental than that the customs service was established to supervise the activities of importers and exporters and to inspect the merchandise which enters and leaves this country. Congress has long realized and articulated in the basic legislation the importance to enforcement of the tariff laws of direct and active supervision by customs officers. The remarks of the chairman of the House Ways and Means Committee in the 66th Congress, addressed to a drawback provision in the tariff laws, are highly pertinent (hearing on general tariff revision, p. 4199):

"* * * If you give discretionary power in the law, you may make this provision very ineffective, for you may get men in office who will disregard their duties, as is the case in many instances right now * * *. I do not want to see a law written that leaves these powers discretionary where they can be made mandatory and apply justly and equitably."

Congress has never indicated an intention to have the enforcement of the tariff laws depend entirely upon the supposed integrity of carriers, importers or exporters. Indeed, supervision and inspection of their activities have always been deemed essential. Even though customs officials temporarily stationed in a certain area have confidence in the reliability of personnel representing certain carriers, importing or exporting firms at that time, the law does not contemplate the relinquishment, on affirmation of good faith, of the historic duty to supervise. Personnel changes may come, both in the customs service and in the private companies subject to their inspection and supervision, but the overriding necessity for supervision remains. Congress did not intend section 22 to be a wholesale authorization to the administrative department to ignore its obligation to inspect and supervise. Yet the section has been construed, at the very worst, to supply the agency with a weapon to nullify or veto the tariff laws, and, at the very minimum, to provide the agency with a tailor-made alibi for laxity in enforcement of the law.

In addressing the House of Representatives on August 20, 1954, Congressman JOHN W. MCCORMACK, of Massachusetts, expressed grave concern over the trend toward lax administration of the customs laws which had, even by then, become conspicuous:

"The Customs Bureau has, in recent years, extended the calculated-risk theory in connection with the supervision of the activities of carriers, importers, travelers, and others to an extent never contemplated by Congress when it passed the Tariff Act. Congress never planned that the barrier of customs protection should be made vulnerable by administrative relaxation of safeguards to an extent entirely out of keeping with the original intent.

"Packages arriving by mail are passed with only the briefest screening, and 95 percent of them receive no examination. Upon the arrival of vessels and aircraft only a spot-check examination is made of passengers' luggage. The physical searching of vessels and aircraft and other carriers has been lessened. The once vigorous routine of customs inspection is no longer vigorous or routine."

But with section 22 unmodified in the law, the administrative department has felt no compulsion to change the trend since Congressman MCCORMACK's warning. Administrative relaxation of customs supervisory functions has continued unabated and has even accelerated in many instances.

Amendment of section 22 is imperative therefore to confine section 22 to the purposes intended by the Congress when the provision was enacted and thereby to end the dangerous policy of calculated risk now followed widely in the administration of the customs laws under color of authority granted by the section as it stands at present.

A BILL TO AMEND THE TARIFF ACT OF 1930, AS AMENDED, SO AS TO PREVENT UNDUE RELAXATION OF CUSTOMS SUPERVISION AS A SAFEGUARD AGAINST SMUGGLING AND FOR THE PROTECTION OF THE REVENUE, AND FOR OTHER PURPOSES

Be it enacted, etc., That section 646 of the Tariff Act of 1930 (U. S. C., 1956 Supp., title 19, sec. 1646a), as added by section 22 of the act of August 8, 1953 (67 Stat. 520), is amended to read as follows:

"SEC. 646. Customs supervision; restriction on administrative discretion.

"Wherever in this act any action or thing is required to be done or maintained under the supervision of customs officers, such supervision may be direct and continuous or by occasional verification as may be required by regulations of the Secretary of the Treasury, or, in the absence of such regulations for a particular case, as the principal customs officer concerned shall direct: *Provided*, That nothing contained in this section or elsewhere in this act shall be deemed to authorize regulations by the Secretary of the Treasury or directions by a principal customs officer or other administrative official which permit less than direct and continuous customs supervision of the boarding, unlading and lading of vessels, aircraft (whenever required by statute or regulation to report for customs treatment), and vehicles arriving from or departing for any foreign port or place or carrying foreign cargo; the examination of baggage and personal effects of persons (passengers and crews); the delivery of foreign cargo; the lading of in-bond oil for bunkers; and the lading, unlading and sealing of bonded stores; or which permit customs examination of fewer than 25 percent by number of the mail packages arriving in the United States from foreign ports or places; or which require any customs officer or employee to certify to the accuracy of records, reports, documents, or papers of any kind or description prepared in connection with any aspect of customs treatment of persons or goods, by entering his name and title thereon or otherwise, in any instance where his supervision of the activity subjet to customs treatment to be certified to has not been personal, direct and continuous."

Senator McCarthy: The Republic Has Lost a Stalwart Defender

EXTENSION OF REMARKS

OF

HON. TIMOTHY P. SHEEHAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. SHEEHAN. Mr. Speaker, countless millions of American citizens will agree with the thoughts stated in the following editorial from the Chicago Tribune of May 4, 1957:

A VALIANT FIGHTER

If Senator JOE MCCARTHY had been a Communist sympathizer or agent, given to invoking the fifth amendment, the chant would now be rising from every liberal minaret in the land that he was hounded to his death by false accusations. The cry would be heard that he was a victim of character assassination and that he was driven to death through persecution by insinuation.

We have heard these lamentations every time a Communist has dived out of a high window or jumped off a roof. When Harry Dexter White, the Communist agent in Henry Morgenthau's Treasury Department, died 4 days after he had been called before the House Committee on un-American activities, one liberal mouthpiece termed him the "victim of a special sort of tyranny" in the form of our modern American style inquisition.

When Laurence Duggan, former State Department official and director of the Institute of International Education, having been named as a Communist, catapulted to death from the window of his 16th floor office, copious tears were shed on the theory that an act of desperation had been occasioned by a groundless accusation.

The U. N. general counsel, Abraham H. Feller, like Alger Hiss a graduate of New Deal Washington, also exited life through a 12th floor window after the Senate Internal Security Subcommittee had become interested in the number of Communists who had moved into key U. N. posts. As usual, the liberal line was that he had been put under the strain of defending his associates against indiscriminate smears or exaggerated charges.

We have heard the same outcry again recently, when E. Herbert Norman, Canadian Ambassador to Egypt, jumped off the roof of a high building in Cairo, a few days after the same subcommittee had revived charges of his onetime Communist connections. The editorial tirade of one liberal organ in New York was launched on the note, "Whether Mr. Norman was literally driven to his death by the actions of Senator EASTLAND's Internal Security Subcommittee and its chief counsel, Robert Morris, may not be susceptible of proof." But—and you can easily fill in the rest.

We do not expect to hear the death of Senator MCCARTHY bemoaned in such terms. The Senator was no Communist; hence he was no hero to the liberals. He was a patriotic American and a determined opponent of Communists. And because of that he was made the target of the greatest organized smear campaign of our day. Every liberal commentator and newspaper lost no opportunity to vilify him. The White House palace guard plotted his ruin. The President singled him out for studied insults. His political enemies ganged up on him.

The term "McCarthyism" was coined to make him appear contemptible, but no sensitive lover of Moscow was ever pilloried with such violent animosity as was Senator MCCARTHY in the public hearings that revolved around the petty issue of a promotion that never materialized for a member of his staff who was drafted into the Army as a private.

There followed the lynching bee in the Senate which reached a predetermined judgment that Senator MCCARTHY's conduct was to be "condemned."

Even JOE MCCARTHY's honorable service as a marine in the Pacific war was questioned, and it was implied that somehow he was not entitled to the combat medals he had won. Insinuations were made that he was a tax evader, but, when the Internal Revenue Service completed its investigation, it was found that Senator MCCARTHY had overpaid his tax and was entitled to a refund.

No man in public life was ever persecuted and maligned because of his beliefs as was Senator MCCARTHY. All of the phony martyrs of "ordeal by slander" lumped together

never absorbed a fraction of the abuse that was visited on him. He took it all without a whimper and stuck to his guns. The Republic has lost a stalwart defender.

Resolution on Lithuania

EXTENSION OF REMARKS
OF
HON. DANIEL J. FLOOD
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. FLOOD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution on the anniversary of the declaration of independence of the Republic of Lithuania:

At the observance of the 39th anniversary of the declaration of independence of the Republic of Lithuania, under the auspices of the Lithuanian American Council of Greater New York, on the 17th day of February 1957, at Webster Hall, New York City, the following resolution was unanimously adopted:

Whereas Lithuania, since the 13th century had been an independent kingdom and grand duchy, but in 1795 was partitioned between Russia and Prussia during a brief period in 1812 regained her independence and during subsequent revolts rose against Russia, again revolting in 1905, after a 40-year complete ban on all Lithuanian printing, during all of which time the spirit of freedom was never extinguished; and

Whereas the Lithuanian Taryba proclaimed the restoration of the independence of Lithuania in Vilnius, February 16, 1918; and

Whereas Lithuania during her two decades of independence demonstrated her ability to advance and prosper in all fields of endeavor, social, cultural, economic, and political; and

Whereas the people of Lithuania helped this country to establish its independence and then contributed toward its development; and

Whereas since June 1940, Soviet Russia has enslaved Lithuania, subjecting her people to brutal terror and oppression in her efforts to conquer all freedom-loving nations; and

Whereas the Government of the United States solemnly condemned the Soviet aggression against Lithuania, Latvia, and Estonia in a statement dated June 23, 1940, and refused to recognize the forcible annexation of Lithuania by the Soviet Union, and it continues to deal with the diplomatic and consular representatives who served the last independent governments of these states: Now, therefore, be it

Resolved, That the United States, cast by destiny to lead mankind toward the goal of a just and lasting peace, should take the initiative in the United Nations in championing the cause of Lithuania and other enslaved nations; and be it further

Resolved, To call upon the United States Government to aid the people of Lithuania in restoring their freedom, human rights, and political independence; and be it further

Resolved, That we demand that the Soviet Union's armed forces, the Russian Communist Party, and terrorist police forces be withdrawn from Lithuania and other invaded countries and that their deported nationals be returned to the sanctity of their own homes; and be it finally

Resolved, That we express our thanks to the President of the United States and the Secretary of State for their many pronouncements and encouraging words that they will never abandon the captive nations, to Governor Harriman and the friends of Lithuania in the Senate of the United States and the House of Representatives, and leaders of both Republican and Democratic Parties for their statements in their political platforms on liberation.

LITHUANIAN AMERICAN COUNCIL OF GREATER NEW YORK,
STEPHEN BREDES, *President*.
DR. VLADAS VILIAMAS, *Secretary*.

A Fine Tribute to Congressman Victor L. Anfuso

EXTENSION OF REMARKS
OF
HON. ALBERT P. MORANO
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. MORANO. Mr. Speaker, a very fine tribute was paid recently to our distinguished colleague, the Honorable VICTOR L. ANFUSO, of New York, by one of the major New York metropolitan newspapers. In its issue of April 18, 1957, the Daily Mirror devoted its feature column, Only Human, to a biographical study of some of the highlights in the career of our colleague.

The feature, Only Human, ably written by Sidney Fields, is widely read in the New York metropolitan area. Leading citizens in this area consider it a signal honor to be the subject of this feature. Our colleague, Congressman ANFUSO, certainly deserves this honor.

Throughout his entire life, as well as during his service in Congress, ANFUSO has always shown a deep and abiding interest in little people. The plight of the postal workers and their families struggling to make ends meet, the problems of consumers battling with the high cost of living, the difficulties encountered by the farmers, the efforts of the people who labor in the big industrial areas to maintain a living wage and decent housing, the struggle for survival on the part of small-business people, the efforts of minority groups to obtain civil rights and liberties—all of these find a sympathetic response in ANFUSO's heart and a burning desire to be helpful in every way possible.

It is no wonder that he is popular with the masses of New York, who know him as their friend. It is no wonder that he is being widely mentioned as his party's nominee for the United States Senate in the 1958 election. VICTOR ANFUSO is a great public servant, one who recognizes that public office is a public trust. He is a sincere spokesman and an able representative of the people of his district.

Mr. Speaker, I consider it a privilege to insert this article about our colleague in the RECORD and commend it to the attention of the Members of both Houses:

ONLY HUMAN
(By Sidney Fields)

The closest Congressman VICTOR ANFUSO ever got to a farm was peddling vegetables when he was a kid in Brooklyn. And he now has a flowerpot in front of his home. But he's one of the more articulate members of the House Agriculture Committee.

"Someone on that committee should represent the viewpoint of the city and the consumer," he says. "Until I was appointed it was filled with men representing particular interests, like potatoes, corn, cotton."

It was his idea to strengthen the committee by creating a permanent watchdog group for the consumers. He was made chairman of the Permanent Consumers Subcommittee, which makes its first preliminary report next week, and will ask such questions as:

Why did farm income drop in the last 10 years while food prices zoomed?

What causes the big spread in prices for eggs, poultry, milk, bread, coffee between the source and the housewife?

What effect does the trading-stamp craze have on food prices?

"It seems the consumers and farmers are in a squeeze," say ANFUSO. "We'd like to know why."

Stocky, dapper, 52, VICTOR L'EPISCOPO ANFUSO represents the 440,000 people of the Eighth Congressional District in Brooklyn, which covers Williamsburgh, Greenpoint, and Bushwick, where he lives with his family. He has twin sons, Francis and Joseph, 8; 2 daughters, Marianina, 13, and Diana, 22, a schoolteacher; and his eldest son, Victor, Jr., is a St. John's law student.

ANFUSO comes from Gagliano Castelferrato, Sicily, a name bigger than the town's population. He was the younger of 5, and when he was 9, his father, a shoemaker, died. So the family migrated to Brooklyn. He had his first brush with education when he and his shoeshine box were picked up by a truant officer.

"Who explained that here kids have to go to school," ANFUSO says. "So I worked after school."

He peddled fruit and vegetables from a pushcart and wagon and was a furniture salesman in his brother's store when he attended law school at night. He opened his office above the store when he passed his bar exams. At 23 he became a candidate for the New York State Assembly and had 1 big street corner speech broken up by opposition hoodlums.

"The next day they put a gun in my ribs and ordered me to quit," he recalls. "I didn't. I looked like a sure winner on election day until the last district reported 495 votes for my opponent and zero votes for me. Rigged. That lost the election for me by 21 votes."

He built a successful law practice, organized the Italian Board of Guardians to curb delinquency, served in political intelligence with the OSS in Italy during the war, and was elected to Congress in 1950. Redistricting wiped out his seat in 1952. He was appointed a city magistrate in January 1954 and, when he ran for Congress again, resigned from the bench the following August.

"There was nothing in the law that said I had to resign," he said, "but ethics told me I should."

He was elected and relected again last year. In Congress he's best known for his efforts in behalf of minorities, and postal employees, having won them their first big raise—$600. ANFUSO insists they still aren't paid according to the service they give us.

"Unlike other Federal Departments, the Postmaster General thinks the Post Office should be run at a profit," he says. "That's wrong and that's taking it out on the postal workers."

Right now his big job is the Consumers Subcommittee, whose coming inquiries should cause a stir. One, directed at the three-hundred-odd trading stamp companies, wants to know if stamps increase food prices; why the gifts redeemed by stamps are listed at retail prices but bought by the companies in vast quantities at low wholesale prices, and why the companies pay taxes only on the 60 percent of the stamps redeemed, not the 100 percent sold.

"We've also found that food prices have jumped 24 percent while farm income dro-

ped 16 percent from 1946 to 1956," says ANFUSO. "There seems to be an unnecessary increase in processing and wholesaling. The answers we get should be very interesting."

Navy Discrimination

EXTENSION OF REMARKS
OF
HON. LEON H. GAVIN
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, April 15, 1957

Mr. GAVIN. Mr. Speaker, I should like to invite the attention of the House to two newspaper stories which tell the plight of a career Navy family which has been discriminated against because of an unfortunate circumstance.

The story involves a Navy commander who was retired after almost 30 years' active service and who was subsequently involved in an incident which resulted in the death of another man. After the officer was sentenced to 5 years in the penitentiary, the Navy retaliated by obtaining the President's approval to drop the commander from the retired rolls, thus wiping out the retirement pay on which his wife and two minor children depend.

The authority under which the Navy took this action, Mr. Speaker, is contained in a little-used section of the Uniform Code of Military Justice which states that the President "may" drop officers from the rolls if they are convicted by a civilian court. As one of those who served on the House Armed Service Subcommittee which originally reported the Uniform Code, I doubt that it was the intention of Congress to penalize the families of retired officers.

In fact, it has been pointed out in the past that retired officers should be subject only to the same judicial processes as the ordinary civilian.

Only recently the House Veterans' Affairs Committee and the Senate Finance Committee reported legislation touching on this problem. Both committees stated that to deny a man his retired pay because of a conviction by a civilian court "would be imposing an additional penalty."

The disability pensions of disabled veterans are not similarly affected, and, since retired pay is earned and not a gratuity, it is difficult to understand how the Navy reached the decision it made in this case. Particularly, since the officer's family is made to suffer. There can be no doubt that the family is discriminated against when we acknowledge the fact that the same action could not be taken against the family of a disabled veteran in similar circumstances.

Mr. Speaker, I know all Members will want to read the details of this case, and I insert herewith stories which appeared in the Washington Star of April 28 under the byline of Mary McGrory, one of the Star's top-feature writers, and another which appeared in the Army Navy Air Force Journal on April 27. I also am including a journal editorial which questions the wisdom of this action and points up the injustice suffered by the wife and children.

I am in complete agreement with the Journal editorial's statement that—

Whatever course the Navy takes, it should keep in mind that retired pay is earned pay and that Armed Forces morale will be shattered if military personnel learn that this benefit can be wiped out with the stroke of a pen.

The articles and editorial follow:

[From the Washington Evening Star of April 28, 1957]

RUEGERS HOPE TO WIN BACK KILLED PENSION

(By Mary McGrory)

An Alexandria Navy wife is hopeful that President Eisenhower will reconsider his action cutting off her husband's service pension.

The trouble that Mrs. R. B. Rueger is in began on New Year's Eve, 1955, when she and her husband, a retired naval officer, were running a benefit turkey shoot in their Franconia, Va., farm.

On that night her husband shot and killed Leonard Dodson, a Fairfax County neighbor. The shooting followed a scene and fight, in which Rueger, who is described by his family as "a very quiet man," was, according to his wife, badly beaten by Dodson and his friends.

Rueger, who had risen from the ranks to become a commander in the Navy, pleaded guilty to voluntary manslaughter in Fairfax Circuit Court and was sentenced to 5 years at hard labor by Judge Arthur W. Sinclair, who said he considered Rueger excellent probation material because of his unblemished 29-year Navy service.

By this time the Ruegers, who between them have 5 children, the eldest 22 and the youngest 10, were beginning to worry some about money. Most of their life savings went to meet a $15,000 out-of-court settlement of a suit for $25,000 brought against them by the widow of Leonard Dodson.

PLANNED TO START OVER

Because of high feeling in the countryside, they gave up their farm in Franconia and moved into Presidential Gardens apartments. Mrs. Rueger, a slight blond who wears the toreador pants and the kerchief-over-pin curls of a teen-ager, began the bus trips to Richmond to the Virginia State Penitentiary for visits that are permitted families of prisoners every other weekend.

The prospects, while not bright, were not hopeless. With his monthly pension of $438 as a stake, they planned to start over again. Rueger is eligible for parole in November. His wife says that although he only went through the first year of high school, he was found to have the highest I. Q. in the history of the prison, and that he has been given his high-school diploma.

But new trouble came to the Ruegers last September in the form of a letter from Vice Admiral J. L. Holloway, Jr., Chief of Naval Personnel, informing Mr. Rueger that recommendation would be made to the President to have him dropped from the rolls of the Navy.

Enclosed in the letter was a resignation blank. The letter pointed out that a possible advantage in separation by acceptance of resignation as against discharge is that "the factual case of your separation will not appear on the face of the discharge orders." By signing, Rueger would forfeit all benefits earned during his service career.

Rueger appealed, as was his privilege, the Navy action claiming he was no longer in the Navy. So did his wife, in repeated letters.

NOTIFIED OF ORDER

But on April 11 of this year, Rueger was notified that the President had signed an order dropping him from the rolls and that he was to consider the letter his discharge. This means the end of the monthly pension.

It has meant that Mrs. Rueger, who never had a job in her life has enrolled in business school, learning typing and shorthand. It will probably mean that 10-year-old Robert Rueger, Jr., will have to be withdrawn from Linton Hall Military Academy.

"In time, I'll know just what it means," says Mrs. Rueger. "We had planned on that pension to start again—that was our only hope of surviving."

Mrs. Rueger has appealed her husband's case to the House Armed Service Committee, which, according to the Army-Navy-Air Force Journal, has asked the Navy to review the matter.

The journal explains that under the terms of the Uniform Code of Military Justice, the President may, although it is not mandatory, drop from the rolls any commissioned officer sentenced to a prison term by a civil court.

According to the Journal, the authority is permissive and seldom used. The Army recalls only one case, still pending, when it was invoked, the Air Force never has used it, and the Marine Corps can recall no such case in the past 5 years. The Navy, however, has used it in 5 cases in the past 10 years.

Two congressional committees have stated that "to deprive a man of his retirement pay because of imprisonment would be imposing an additional penalty."

[From the Army-Navy-Air Force Journal of April 27, 1957]

PRESIDENT'S ACTION STRIPS RETIREMENT BENEFITS FROM NAVAL OFFICER'S FAMILY

President Eisenhower—acting on the advice of the United States Navy—has signed papers which spell the end to financial security for a 40-year-old Navy wife and her two minor children.

The calamity is the second misfortune to befall the family in the last 16 months.

Prior to 1956, the father, mother, and 5 children (2 of whom are serving in the Armed Forces) constituted an average American family. Their only worries were the minor problems which occasionally confront all families.

The father was retired in the summer of 1955 after almost 30 years' service in the United States Navy, during which time he rose through the enlisted, warrant officer and officer grades to the rank of commander. His earned retirement assured his family an income for the rest of their lives—or so they thought.

Four months after he left the Navy (with commendations attesting to his many years of faithful, loyal, and honorable service), the officer became involved in an incident which resulted in the death of another man and in the commander's conviction for manslaughter. He was sentenced to 5 years in a Federal penitentiary.

The family converted almost all of their personal property and life savings into cash—a sum of $15,000—which was turned over to the widow of the deceased man as partial restitution for her loss.

Now began a new way of life for the family.

The Navy wife moved into a small apartment with her 2 youngest children, a girl, now 17, and a boy, now 10, attending military school. An older daughter is employed and two older sons are serving in the Navy and Marine Corps.

To prepare herself for a job to supplement the family income and help gain back some of the lost savings, the mother entered a business school where she studies during the week while her children are at school.

The only bright spot in her new role was the knowledge that her husband's retired pay would enable her to keep her family together—fed, clothed, and in school—until his return. If his incarceration ran the full 5 years, she knew, he would be 53 when re-

leased and would stand little chance of finding a job.

On weekends, as she traveled to the penitentiary in a distant city, she tried to concentrate on this one pleasant aspect of the future—the fact that her husband's retired pay would permit them to make a fresh start when his confinement ends.

Then, 6 months ago, a new blow fell.

The Navy informed her husband that it was contemplating action to drop him from the retired rolls and sever his retirement pay. As an alternative, he was advised, he could submit his resignation under conditions other than honorable, forfeiting all benefits earned during his service career.

Under the terms of the Uniform Code of Mililtary Justice, the President may, although it is not mandatory, drop from the rolls any commissioned officer "who is sentenced to confinement in a Federal or State penitentiary or correctional institution after having been found guilty of an offense by a court other than a court-martial or other military court, and whose sentence has become final."

The authority is permissive, and Pentagon sources indicate that it has been seldom used. No separate records are kept on the subject, but the Air Force states that it has never used the authority, the Army recalls only 1 case (which is still pending), the Marine Corps says it would have to carefully research all its records to give a complete answer, but can recall no such case in the last 5 years. The Navy, on the other hand, knows of a least "5 such cases" in the last 10 years in which it has obtained the President's approval to drop officers from the rolls under this authority.

In the case of the commander convicted of manslaughter, he refused to resign and pleaded with the Secretary of the Navy not to drop him from the retired rolls. However, the Navy in a letter dated April 11 and signed by a minor official, has now advised him that "the President of the United States dropped you from the rolls of the United States Navy effective March 8, 1957."

The letter continues, "You will not be issued a certificate of discharge; this letter is to be considered to serve in lieu thereof."

Curiously, on the very date on which the Navy letter was written, a committee of the United States Senate was having printed a report which states in part that to deprive a man of his retirement pay because of imprisonment "would be imposing an additional penalty." Only a few days earlier, the House Veterans Affairs Committee made the same statement.

Both reports cover legislation—since approved by the Congress and now at the White House—which bans pension payments to veterans and widows receiving nonservice connected disability if they are incarcerated in prisons for more than 60 days. However, the ban is in effect only from the 61st day until the prisoner is released.

Furthermore, the new law permits the Veterans' Administration to apportion and pay to the wife and children of a veteran the pension which he would be eligible to receive if he had not been imprisoned.

In reporting the legislation to their respective Houses of the Congress, both committees said this: "In the case of compensation for a service-connected disability the committee is of the opinion that that is an entirely different benefit, based on disability, and to deprive a man of his service-connected compensation would be imposing an additional penalty. The same is true of retirement pay which is paid on an entirely different basis from pension."

The wife of the former Navy commander has appealed to Chairman CARL VINSON, Democrat, Georgia, of the House Armed Services Committee for help. Both she and her husband believe that the President's action imposes double punishment and that, in addition, it penalizes the wife and children.

The House Armed Services Committee has asked the Navy to take another look at the case. This review is now in process.

[From the Army Navy Air Force Journal]

PENALIZING RETIRED'S FAMILY

There is some question that President Eisenhower may not be personally aware of the hardships which will result for the wife and children of a career Navy officer who has been dropped from the retired rolls because he is serving a prison sentence for manslaughter (see story).

Had he known that two committees of the Congress have only recently stated the philosophy that withdrawal of an imprisoned man's retirement pay "would be imposing an additional penalty" on the man, the President might have turned down the Navy's recommendation.

Had he known that, in effect, he was penalizing the wife and children of the officer concerned, he might have turned down the recommendation on that basis alone.

Although there is permissive authority in the law for the President's action, argument can be raised that the law places retired members of the Armed Forces in double jeopardy. There also is strong argument, and ample evidence in congressional hearings to back it up, that military retired pay is "earned pay" which the Government has no legal, certainly no moral, right to take away.

Congressional committees have reiterated year after year that the low salaries of military men and women are compensated for in part by the United States Government's contribution to their retirement fund.

Another argument against the Navy's case and the President's action is that imprisonment does not affect the service-connected disability pay of veterans. They continue to receive such pay both during confinement and after they are released. It is noteworthy, too, that many of those on the disability rolls have only a few days, weeks, or months of service to their credit.

This, then constitutes a double standard. It means that a career officer who has devoted 30 years to serving his country can lose even those benefits which he has earned if he is convicted of a crime. The disabled veteran who commits the same type of crime continues to enjoy the full benefit of his disability pay.

Whatever course the Navy takes, it should keep in mind that retired pay is "earned pay" and that Armed Forces morale will be shattered if military personnel learn that this benefit can be wiped out with the stroke of a pen.

Israel Independence Day

EXTENSION OF REMARKS

OF

HON. JAMES ROOSEVELT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. ROOSEVELT. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement commemorating Israel Independence Day:

ISRAEL INDEPENDENCE DAY

May 6 is the ninth anniversary of Israel's independence. It is a day that symbolizes Jewish achievement. Within 9 years the ideal of Zionism has been transformed from the planning stage to actuality. To create a nation and an army within such a short space of time is a near miracle. Israel has struggled against great odds, but has proved that she could survive pressures from the Arabs on the one hand and from the Great Powers on the other. I would like to congratulate Israel on this happy anniversary.

Like America, Israel is a nation of pioneers, a nation of diverse origins, held together by a common faith and beliefs. Politically and strategically, too, the interests of Israel and the United States run parallel. Politically, both nations are opposed to Communist infiltration in the Middle East, while their mutual interests demand strategic cooperation.

It is now more than ever necessary for the United States to close ranks with Israel. As Britain has withdrawn from Suez, and British prestige in the Middle East has diminished, it has become clear that the United States must assume Britain's former role. And keeping the region on the side of the free world will require military and political as well as ideological and economic strength. If war comes to the Middle East, America must have allies and points of support. Under such conditions, Israel may well prove to be one of America's most important assets in the Middle East.

At Munich, Chamberlain saw only the risks associated with participating in little wars and forgot that as England abandoned strong points it was more and more exposed to the danger of a world war. America must not make the same error. America must support the outposts of the West such as Israel, whose security and integrity are essential to American strategic interests and to American strategic needs. Traditionally, the United States has been on the side of the underdog. Israel is a small, democratic nation which has opted for freedom and needs American support for survival. The United States cannot afford to abandon Israel and the values and achievements which it represents.

No Time To Back Out

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include a timely and well considered editorial, No Time To Back Out, appearing in the May 3, 1957, issue of the Catholic Standard, Washington's archdiocesan newspaper. The editorial will state, among other things, "But there can be no further concessions without surrender."

The editorial follows:

NO TIME TO BACK OUT

Perhaps the present crisis in Jordan, or another in the continuing waves of crises there, will provide a final showdown on our Middle East doctrine. We have guaranteed the integrity and independence of the countries there against Red aggression and subversion. We could not do less. Anything less would be surrender of the Middle East to the Reds, and the Middle East is the handle to all Europe.

If the showdown comes, let us face it with courage and decision. For it is only courage and decision that will win. In this test of force, if Russia persists in her efforts, it is only courage that will prevail and save the Middle East as well as Europe and ourselves.

Naturally, we must expect unfair and bitter opprobrium from the Reds and their allies for supporting the only stand that will stop them. We shall be called every vile epithet and accused of every crime of which the Reds are guilty because we have thwarted them. But we can also expect some fair criticism from the French and English because we have been sucked into the vacuum caused by our halt of their activities in Egypt. This criticism must be borne, for prescinding from how we got into the vacuum we must occupy it or give it to the Reds. Our French and English allies certainly grant that.

This is preeminently a time for solidarity in our citizenry and all those devoted to freedom. We have done everything possible to prevent war without yielding the whole world to the Reds, and it can be argued that we have jeopardized the world by our extensive concessions. But there can be no further concessions without surrender. We cannot back out without getting shot in the back.

Fred Crawford's Service

EXTENSION OF REMARKS
OF
HON. WAYNE N. ASPINALL
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 2, 1957

Mr. ASPINALL. Mr. Speaker, during my recent illness I was informed of the untimely passing of our former colleague, Fred Crawford, of Michigan. His death was a tremendous shock to me. Fred Crawford and I served together on the Committee on Interior and Insular Affairs and during that time I acquired a great deal of respect for his thinking and approach to matters coming before our committee.

Mr. Crawford was vitally interested in the Territories of our Nation, Alaska, Hawaii, Puerto Rico, the Virgin Islands, and Guam. He had visited each of these Territories on a number of occasions to better understand and appreciate the problems and ultimate desires of their people. He strongly supported statehood for Alaska and Hawaii and self-government for the people of the other Territories. He devoted his energies and time to render all assistance possible in bringing about such realization at the earliest possible opportunity.

In addition, Mr. Crawford was very familiar with my area, having resided in Colorado in his earlier years. During his residence in Colorado, he had traveled extensively throughout the Western States and had acquired a thorough and extensive knowledge and understanding of the potential development of our resources and their ultimate benefit to the national progress.

Since his retirement from public life, Fred Crawford frequently visited the Capitol and seldom failed to stop by for a chat. I greatly enjoyed our visits and discussions on matters of mutual interest.

Mrs. Aspinall and I should like at this time to extend to his widow and son our heartfelt sympathies in their great loss. I would also like to include as a part of my remarks Senator Gruening's letter of recent date to the Washington Post and Times Herald on the service of Fred Crawford.

The letter follows:

FRED CRAWFORD'S SERVICE

Fred L. Crawford, who died suddenly April 13, was for 18 years a member of Congress, representing the Eighth Michigan District from 1934 to 1952.

From his first term he was a member of the House Committee on Insular Affairs. His service in Congress was unusual in that he continued to serve on committees dealing with the United States Territories and island possessions. Most Members of Congress understandably aspire to committees related to the interests of their districts, which helps their standing back home.

Fred Crawford, however, early developed a keen sympathy for the problems of the disadvantaged people of the outlying areas and stayed with them.

It was somewhat ironic that when, after several years as the ranking Republican member fo the Committee on Interior and Insular Affairs, his party captured the 83d Congress, and he would have, for the first time, been that committee's chairman, he had been defeated in the primary.

At that time he had visited every territory and island possession several times and was more familiar with their needs and problems than an Member of Congress.

This familiarity and his innate sensibilities enable him to contribute mightily to the goals he believed in, the maximum of self-government attainable for Uncle Sam's dependent areas, goals which corresponded with their own aspirations.

He played a major part in securing for Puerto Rico the precise status that its people wanted, neither statehood nor independence, but as an associated free state. For Guam and the Virgin Islands he helped secure acts which greatly increased their measure of home rule.

For our only two incorporated territories, Alaska and Hawaii, inchoate states, by definition of the Supreme Court in the so-called insular cases of half a century ago, he sought the implicity promised statehood to which their citizens have long aspired.

Fred Crawford did not lose one whit of his interest in these causes when he retired to his farm on the outskirts of the District in January of 1953. He bore his defeat the previous fall philosophically and in the best of spirit, fully aware that his preoccupation with the outlying American areas had not helped but had actually hurt him with his constituents.

"I knew it wouldn't help me out in Saginaw, and it didn't, but I would do it again if I had it to do over," he remarked cheerfully at the time.

Fred Crawford spent the last days of his life volunteering his time to visit some of his former colleagues to present to them his view of the desirability of supporting statehood for Alaska.

Alaskans, many of whom got to know him personally, will remember him gratefully.

ERNEST GRUENING.

WASHINGTON.

Who Should Pay the Postal Deficit?

EXTENSION OF REMARKS
OF
HON. GORDON H. SCHERER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. SCHERER. Mr. Speaker, I live in the Mount Washington community in my Congressional District. The area is served by a fine weekly newspaper, the Mount Washington Press, edited and managed by Mr. Arnold H. Nichols.

The Mount Washington Press, in its April 18 edition, carried a front page editorial by Mr. Nichols entitled, "Who Should Pay the Postal Deficit?" It is the best and most comprehensive analysis of this vital problem facing the Congress that I have read.

I am, therefore, asking that this fine editorial be printed in the CONGRESSIONAL RECORD so that all of my colleagues may have the benefit of Mr. Nichols' thinking.

The editorial follows:

WHO SHOULD PAY THE POSTAL DEFICIT?

Since the establishment of the United States Post Office the citizens and businesses of these States have received excellent postal service under a Government agency which operates under the laws prescribed by the United States Congress. In the past few years we have seen changes that have doubled the cost of first class letter mail, and postal cards. There have been substantial increases in third class (bulk or advertising mail) postal rates and fourth class (merchandise mail) postal rates as well as changes and restriction in the use of third and fourth class mail. Yet, in the past 78 years the only increase in second class (newspapers, magazines) postal rates has been a moderate raise in the cost of sending such mail outside of the county of publication.

Recently Congress has been playing cat and mouse with a deficiency appropriation for the Postal Department. First the appropriation was cut and then, when an appropriation was approved it was less than enough to operate the post office at its usual pace.

The postal deficit is primarily due to the fact that second class mail (newspapers and magazines) is carried at a loss * * * a big loss. Recent studies have proven that letter mail makes a little margin for the post office. Even bulk mail (advertising) carries its own weight and fourth class (parcel post) almost pays its way.

We have what is probably the best postal system in the world as regards speed and service. Some of the methods used, particularly the bookkeeping systems, are reputed to be outmoded but this doesn't seem to hinder the delivery of mail.

It seems to us (and we feel we have a right to express strong feelings, for in the past 19 years we have personally mailed scores of tons of second and third class mail) that Congress should either accept the fact that postal rates are inadequate and order our taxes to pay the difference or get off the fence between the tax-paying public and the powerful lobby which wishes to maintain the status quo of second class postal rates.

Why is it that Congress has refused to even consider placing the postal load where it belongs when President Eisenhower, in his first State of the Nation message, over 4 years ago, made the recommendation that second class rates be revised to a more realistic status?

The source of the opposition can be from only two directions * * * lobbys and influences of the big magazine interests and the misguided pressure of small newspapers within the local congressional districts who think an increase in second-class postal rates might cost them money.

To make the newspapers' position first we can eliminate most large daily papers since their circulation is primarily by means other than direct mail. The surburban and rural weekly papers usually use the post office as the most important and least expensive part of their circulation departments. The reason is simple.

Assume that a rural county seat newspaper has 3,000 subscribers within the county and it is approximately the size of this edition * * * The most that could be charged for postage on a single edition would be about $3.50. If there are towns within the county which do not have city delivery there is no charge at all for the subscribers in that town so long as the newspaper separates the free in country from the chargeable copies which are delivered by mounted routes, rural routes, and star routes. There are thousands of rural newspapers throughout the country which pay only a couple of dollars a week for their entire local (county) delivery.

Much of this may be justified in the light of public service in rural counties, yet the rates could be doubled or trebled without danger to the economy of any moderately healthy weekly newspaper. A few more subscribers or a few pennies increase in subscription rate or a few more inches of advertising would pay the difference and, at the same time, put the post office on a stable basis.

Now, let's take the other beneficiary of the second-class postal rates—the national magazines. Here is big business being subsidized by tax funds. Here is competition for the local newspaper, rural weekly or daily, the local radio or television station. Here is a subsidy-supported business which is receiving the benefits of a law passed while the Indian wars were in progress. In those days our Government was interested in public information and wished to encourage the publication of news and information to our widely scattered populace.

There were no telephones, very little telegraph, radio was unheard of and TV hadn't even been dreamed of. Congressmen were anxious for their constituents to know what they were doing.

So the postal law was approved which allowed the acceptance of printed matter with a regular interval of publication, addressed to paid subscribers, at postal rates which would encourage the printers to go into the newspaper and publication business. The rates were low even for 1879 * * * 1 cent per pound for delivery within the county and if the subscriber would walk to the post office once a week he could receive it without charge to the publisher. Copies addressed to subscribers outside of the county could be mailed at the rate of 1½ cents per pound for the reading portion and at a rate up to 7 cents per pound for the advertising portion dependent upon the distance sent.

Briefly and simply this is the original basis for second-class postal rates. A basis which was equitable 78 years ago. Until 1952 it remained the same. Then a revision was made which, over a 3-year period, raised the rate for copies mailed outside of the county 30 percent but using the original method of computation.

As a result of this a large national magazine recently (April) published an edition of nearly 400 pages (2 pounds and 3 ounces) and allowed the United States Post Office to deliver it to almost 4½ million subscribers at a cost for the reading portion of less than 2 cents per pound (your average letter costs about 30 times this rate). This magazine took in over $4,500,000 in advertising on this edition.

In 1879 there were no automatic presses. Neither were there tremendous industries and businesses which would make possible a 4½ million single edition of a magazine.

In 1879 the average publisher printed on a press which was powered by the printer's meager breakfast. He was interested in profits, of course, because he wished to eat better, just as many weekly publishers do today. But, in 1789 a printer was a career man who was dedicated to the local community.

Times have changed. The ancient provisions of the second-class mailing privilege (and that is what it is called) should be brought up to date. The ancient subsidization of the local printer who was willing to publish a weekly newspaper has now become subsidization of big business. Today the small publisher will do better by paying a more equitable postal rate as long as the large magazines do the same.

The grassroots publisher needs a change. The national magazines enjoy the old rates. Congressman * * * which side of the fence looks best?

High Hopes for Cuts in Federal Spending Budget

EXTENSION OF REMARKS
OF
HON. RALPH HARVEY
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. HARVEY. Mr. Speaker, under leave to extend my remarks in the RECORD I include the following article from the Shelbyville (Ind.) News:

REPORT FROM CONGRESSMAN HARVEY—SEES HIGH HOPES FOR CUTS IN FEDERAL SPENDING BUDGET

Growing sentiment in Congress favoring a reduction of between $4 billion and $5 billion in the proposed Federal budget for the fiscal year starting July 1, is seen by Congressman RALPH HARVEY, of Indiana's 10th Congressional District.

In a telephone interview from his Washington office, Congressman HARVEY told the News that he had high hopes for such a reduction in the proposed $71.8 billion Federal budget for the coming fiscal year—the largest in United States peacetime history.

Back in Washington following the Easter holiday, Representative HARVEY whose district includes Shelby and nine other Hoosier counties, said that he had found very genuine interest in the budget situation in meetings held with constituents while home on vacation. He also said he had received a goodly amount of mail from voters of his district regarding budget reduction.

"Encouraging cuts amounting to about $1 billion in the budget" already have been approved by the House of Representatives, Representative HARVEY pointed out, and he said he had high hopes that total reductions amounting to between $4 billion and $5 billion will be made by Congress within the next few weeks.

Asked in what general categories of the proposed budget he thought cuts could be made, together with the approximate amounts in each, the Congressman said he believed reductions could total $2 billion or more in defense appropriations; $1 billion or more in foreign aid, and the rest of it, $1 billion or more, in a whole series of domestic appropriations.

While expressing the belief that as much as $5 billion can be cut from the proposed spending budget for the new year, Representative HARVEY described as unrealistic any hopes for cuts of as much as 20 or 30 percent.

In the matter of Federal tax reduction, the Hoosier Congressman told the News that "I do not think we should contemplate a tax cut unless the budget is cut deeply enough to safely provide for such action."

Retirement of the huge Federal debt—amounting to approximately $275 billion—"should be given priority over any tax reduction," Representative HARVEY declared. He pointed out that America's taxpayers now are paying more than $7 billion annually just to pay the interest on the national debt. "I am more concerned over this situation than anything else," he said. "I believe we should plan for debt reduction, perhaps paying about 2 percent of the debt principal each year over the next 50 years." Representative HARVEY expressed fear that if debt reduction is not actually provided for on a regular annual basis, the Nation will sink into a financial abyss from which there can be no return.

"When government contributes to deficit financing it also contributes to inflation," he asserted. He added, however, that "there is also an inflationary force in the free bargaining rights of industry and labor." Each time there is a new round of wage increases, Representative HARVEY said, without an accompanying increase in productivity, the American dollar loses some more of its value. "Private business, as well as Government," he said, "is responsible for the inflationary spiral which has hurt us all."

Pan American Airways

EXTENSION OF REMARKS
OF
HON. EDWIN B. DOOLEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. DOOLEY. Mr. Speaker, I request unanimous consent to extend my remarks in the RECORD and include a statement from the Wall Street Journal of recent date concerning the Pan American Airways. It has been thought by some that Pan American Airways ties with Latin lines costs the Government tax money. The CAB recently ordered an inquiry into the United States carrier's relationships with South American airlines, and the following article by staff reporter of the Wall Street Journal refutes that viewpoint. I feel that it is worthy of being reprinted in the RECORD:

NEW YORK.—Pan American World Airways has been saving money for United States taxpayers through its relationships with affiliated Latin American airlines, John S. Woodbridge, Pan American's controller, said. The ties have not added to the airline's subsidy bill, he stated.

Mr. Woodbridge made the statement when asked about the company's position in regard to a general inquiry into Pan American's accounting recently ordered by the Civil Aeronautics Board. He said that in the past 3 years alone, the big United States carrier has received $10 million from the affiliated airlines in the form of commissions, fees, dividends, and interest.

On March 8 the CAB issued an order instituting a general investigation of Pan American's bookkeeping in regard to its relationships with such affiliated carriers as Aerovias Nacionales de Colombia (Avianca), Panair do Brasil, and Compania Mexicana de Aviacion (CMA), in which Pan American holds a minority stock interest.

Numerous other affiliations with airline, service, hotel, or real-estate concerns were cited for investigation in the order. Some of the accounting to be examined dates back to 1938, when the Civil Aeronautics Board was established. The Board said it wanted to see whether there had been a proper distribution of revenues and expenses among the affiliates, and to determine whether the public interest had been adveresely affected.

On March 20 the Board issued another order, reopening the Transatlantic Final Mail Rate Case for 1954 which is now before the

District of Columbia Appeals Court for review. The Board again talked about accounting procedures and audits, and said that from 1946 through 1953 Pan American's properly recognizable expense may have been overstated by as much as $6,500,000. The Board also cited other instances where the big airline might have been lax in charging sufficient expenses against affiliates. But it noted that Pan American had yet to be heard, and that it was possible the questionable areas in the company's accounting may have already been compensated for to some extent in other mail-rate cases.

Mr. Woodbridge noted the main isue in the CAB investigation seems to be whether Pan American's transaction with its foreign-flag affiliates has resulted in any extra subsidy burden on American taxpayers.

"I'm certain that this investigation will prove exactly the opposite," the PAA comptroller declared, adding that the company welcomes the investigation.

Mr. Woodbridge said that Pan American had saved money by sharing operating bases with the affiliates and by doing maintenance and overhaul work for them at fair prices which absorbed considerable of Pan American's overhead costs and thus reduced its own maintenance and overhaul expenses. He claimed that Pan American had fostered the growth of these Latin American carriers, and that they now were feeders of traffic into Pan American's air network.

Books of the larger affiliated companies are audited by Price, Waterhouse & Co. Others have local auditors or use the services of Pan American's internal auditors.

Next step in the CAB proceedings in regard to Pan American will probably be a request by the Board to the appeals court to remand the transatlantic mail case to the Board for further examination. It is understood Pan American will not object to this procedure, although reserving its position that the CAB has no legal right to reopen the case.

Don't Be Fooled

EXTENSION OF REMARKS
OF
HON. E. ROSS ADAIR
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. ADAIR. Mr. Speaker, a recent editorial in the Steuben Republican, published at Angola, Ind., by Edward D. Willis and Henry E. Willis, brings forcefully to mind again the fact of the continuing danger to this country from communistic activities. Knowing that this is a matter of concern to all patriotic Americans, under leave to extend my remarks, I include it herewith:

DON'T BE FOOLED

Just because the Communist Party has not been so belligerent in recent months is no indication that they have changed their overall aim and are now friends with the West or respect our might. This "change of pace" is one of the many tricks in the bag of master Communists. They always like to keep the other fellow guessing. And just when we are tired of it all and want to settle down in a peaceful situation is just the time they will appear to be our close friend so we will slide into the false security of wishful thinking.

One thing is certain: The members of the Communist hierarchy have never for a moment given up their eventual aim at world domination. This master plan of dictatorship is aimed directly at the United States because they realize that we, as the strongest country on the face of the earth, must be overcome before they can achieve their goal.

So be alert, America, and be strong. The consequence if we are not? Ask the Hungarians, Czechs, Poles, Lithuanians, and any of the others who have fallen under Russian domination. They will leave all possessions behind and even risk their lives to get from behind the Iron Curtain.

Oddfellow's Tribute to Tomb of Unknown Soldier

EXTENSION OF REMARKS
OF
HON. JOHN DOWDY
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. DOWDY. Mr. Speaker, on yesterday, May 5, 1957, the International Order of Oddfellows held its 23d pilgrimage to the Tomb of the Unknown Soldier at Arlington Cemetery. Wreaths were laid for the sovereign grand lodge and many of the grand lodges.

Sovereign Grand Master L. S. Bridges, of Louisiana, delivered the main address on this occasion.

I ask unanimous consent that this Oddfellows' tribute may be inserted in the Appendix of the RECORD:

Officers and members of the sovereign grand lodge, officers and members of the international association of Rebekah assemblies, distinguished guests, madam president, international association of ladies' auxiliaries, patriarchs militant, general commanding officers, chevaliers, ladies, and friends, it is a great pleasure and a high honor for me to be here and represent the Oddfellows and Rebekahs of the world in this sacred ceremony. I admit that it is exceedingly difficult for me to speak the sentiments of your hearts, but in my feeble way I hope I shall be able to put words together which will convey your thoughts, and express your feelings toward this sacred moment. The warm inspiration I receive from your presence gives greater strength to my faith in you, in your philosophies of life, and in the principles you live daily. Your faith has brought you here today to do homage to the Unknown Soldier and the men of Arlington. May you never become so engrossed in your daily living that you see no time for expression of faith in these dead.

There has been, and will always be a time for people to express their faith—faith in God, faith in one's fellow man, faith in the future of America. It is upon this faith that Americans have built, and will continue to build, a great nation—strong in people, strong in wealth, strong in industry, strong in Christianity. Those of us who read history become thrilled at the progress of our great nation, but we become disheartened when we read how the faith of American people is being shaken by conflicts which challenge the American way of life these soldiers died to preserve. Between the America of yesterday and the America of tomorrow, stands our generation. To us has fallen the duty of preserving the honor, the strength, and the glory these men gave to the America of today.

In meeting the conflicts which have challenged our way of life, America has always produced and used men of great renown, many whose faces are found in historical galleries, and who have left mighty histories of welfare and fearlessness on the pages of time. All down through the years men have enlisted in the struggle for freedom and have stood before America's altars as recruits in the fight for the liberty Americans have always loved. Struggles to maintain it have been demonstrated many times on the battlefields. Men of spiritual forces and purity of purpose have uttered it from the political and religious platforms.

"God grants liberty only to those who love it, and who are always ready to guard and defend it," are famous words expressed by the great statesman, Daniel Webster, at the laying of the cornerstone of Bunker Hill Monument in 1825. No doubt having this feeling in his heart, Webster then foresaw very far into the future when liberty and freedom of God-fearing people would again be challenged, and when men who loved peace above all principles, would have to lay down their lives in defense of such a cause. Today, we come face to face with this true vision as it has become a reality.

Early history has insisted that victory in battle or war belonged to better generals, Caesar, Napoleon, Mussolini, Stalin, Hitler, and others, because they had military genius, superior skill, and judgment. But this is not true today, for victory in war depends upon the genius of the nations involved. The peoples of these nations all fight in the battle. Preparation for the course of victory does not begin in military camps or in military headquarters, but it starts far back in the schoolrooms and on the playgrounds, in the way people live, work together, and achieve individuality and personal independence. Preparation for victory goes on in the nation's streets, in the offices, in the factories, in the legislatures, in the planning rooms, and in all other great institutions, before it is brought to the battlefield to be fought by the men in the trenches—the common soldiers. Such victories have been fought, and, as a result, the mortal remains of thousands of soldiers are now lying at rest in the bosom of the earth.

One main reason we have come here today is to pay tribute to the fighting men who fought a struggle between liberty and imperialism. It was not until some 7½ million men, the pride of many nations, had laid down their lives that America realized what a catastrophe the fighting men had faced on the battlefront.

A second reason we are here is not only to pay tribute to those who fought our battles, but to offer a prayer from our hearts in thanksgiving for the hour when the guns were silenced on the battlefield, and the roar of the cannons were heard no more.

Let us consecrate our lives anew to the cause for which these men of Arlington gave their lives: To resolve that our Nation shall never be devastated by the god of war; that henceforth this Nation, along with others, shall live in peace and harmony: And that human greed for power and riches shall never again demand the sacrifice of human life.

This Unknown Soldier is a representation of the thousands of men who died for liberty and freedom. He lies in this narrow cell of stone that guards his body, while his soul now rests in that spirit called America. His tomb is an expression of our respect and an acknowledgment of our great debt to all men who died for our country and its safety. We do not know the name of the soldier who is buried here, or what his exploits were. But we know that, as a symbol, he stands for the many great deeds of men and women in the ranks who constitute the most important factors in our victories. We must have a higher regard for these, who with infinite patience and unselfish zeal fought our battle. They knew the value of sacrifice. They looked upon mankind from the viewpoint of human sympathy. They knew that the true

gage of man is not his rank or his wealth, or distinction in life, but what principles he holds in his heart.

Year after year men of all walks of life stand here, as we now stand, and hear great men in world's affairs reiterate these words of Abraham Lincoln, "We here highly resolve that these deal shall not have died in vain." Today, we can also hear plainly rising in our ears this declaration of President Harding, "There must be, there shall be, the commanding voice of a conscious civilization against armed warfare." Yes, it is such war which robbed this soldier of life and name and brought death to comrades of all nations.

Day after day the Nation pours out its heart of pride and glory for this nameless American. From the time the first crash of the minute gun roared its knell for the dead from the shadow of Washington Monument, people have come to pay him honor. They have lined the streets and have flowed like a tide over the slopes about his burial place, in order to exemplify a pride far beyond the reach of shouting and clamor for this nameless soldier who died for honor of a great flag. The glamor and greed of men to gain the world cannot hush the voice of this American soldier. He was not afraid to fight for the triumph of the right and reign of these freemen.

The millions of past and future members of the Independent Order of Odd Fellows will never be able to pay even a small portion of the debt of gratitude to these fighting men of Arlington. As a fraternity, we may be privileged to pass through the banks of humanity and travel between the human borders of the way of victory this great Nation has made for itself, we may be able to band together in one great organization and carry on our humanitarian activities, we may call ourselves soldiers and patriarchs, who never shirk from the responsibility of rendering a service to the needy, but there is one thing we can never do, and that is follow in this soldier's footprints, which are so indelibly marked upon the soil of this great country, and upon the soils of other nations under whose flag he fought. A desire to defend democracy, freedom, and preserve peace was so deeply embedded in his heart and soul that within him was set a restlessness which only death satisfied.

The principle of our great fraternity is the measure these men of Arlington used in aiding nations to extend the influence and teachings of the Golden Rule and to imbue the rising generations with the sacred truth of the fatherhood of God and the brotherhood of man. Their efforts and supreme sacrifices have won the plaudits of generation after generation and those yet to come. This fraternity is one institution privileged to come and pay tribute to those who paid the supreme sacrifice, and as members, we are imbued with the responsibility to see that their sacrifices are not all in vain. We must not rest peacefully and expect love of freedom to imbed itself in the hearts of all peoples. It should be our highest aim to lift the love of freedom to a higher plain, where its power may be seen and felt by all mankind.

The best in man must be the greatest concern of each one present here, and in these strenous times, we must promote the freedom we enjoy by putting into practical effect friendship, love, and truth. We must not build for pleasure or temporary pride only, but for the health and morals, the welfare and prosperity of the future as well.

In bringing my part of this ceremony to a close, may I thank you Odd Fellows, and Rebekahs, and friends for giving me this respectful and patient audience. As we go our separate ways now, may we be aroused to spiritual action to build for all mankind a temple crowned with the garlands of affection, with a foundation stone laid on that freedom, which though "crushed to earth shall rise again." May our hearts which are always throbbing for the cause of suffering humanity, be draped with the insignia of love. May we join hands with that mighty band that no man can number whose banners of kindness float in the sunlight that gilds the deep gorges of the earth and waves in the breeze that kisses the mountain peaks. Let us triumph in victories and be able to sing loudly with the voices of angels, friendship has won her laurels; love has subdued the world; freedom, the mighty, now prevails.

Senator Joseph McCarthy

EXTENSION OF REMARKS
OF
HON. JOHN E. HENDERSON
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. HENDERSON. Mr. Speaker, the people of Wisconsin and the Nation have today paid their respect to the memory of the late Senator Joseph McCarthy whose death occurred last Thursday. His passing marks the end of a chapter in American history. His firm belief in the dangers of communism and the threat of that doctrine to democratic principles moved him to wage a powerful campaign that carried the American public to a feverish pitch as millions spent countless hours watching his activities on television. McCarthy, convinced of the dangers of communism awakened America to the extent of those dangers.

I will not say more on the subject of his controversial methods. Much has been said and written in the days since his death, by leaders of nations, by his colleagues, his friends, and his enemies. Senator McCarthy had a singular place in the thoughts of the people of the 15th District of Ohio. The following editorials, the first from the Marietta (Ohio) Times of May 4, 1957, and the second from the Zanesville (Ohio) Signal of the same date, are illustrative, and I commend the authors for their thoughtful approach and treatment:

[From the Marietta (Ohio) Times of May 4, 1957]

TUMULTUOUS CAREER ENDS

Senator JOSEPH R. MCCARTHY, of Wisconsin, was probably the most controversial figure in this country in a generation. A relentless hunter of Communists in the Government, his methods and the results he obtained divided the people into two camps. One of these proclaimed him the symbol of Americanism and gave him highest praise and commendation. To the other he was the symbol of witch-hunting frenzy and it stamped him as a ruthless destroyer of reputations.

For 4 years Senator MCCARTHY was the key figure in the investigation of Reds, as chairman of the Senate Investigations Subcommittee. His probing stirred the country as he pointed out Communists in more or less responsible positions in the Government. His activity along this line culminated in his big controversy with high Pentagon officials, including the then Secretary of the Army Robert T. Stevens, when MCCARTHY charged that the Pentagon was coddling Communists.

This hearing led to an investigation in 1954 by a special Senate committee, which filed charges against the Wisconsin Senator. The Senate followed with a vote of condemnation of Senator MCCARTHY, based on the committee report. It found him guilty of obstructing the constitutional processes of the Senate and of breaching senatorial ethics, offenses that meant little to most people.

Since this censure Senator MCCARTHY had fallen into the background. Once a dominant figure in the Senate, he had been relegated to a position of comparative obscurity. In the eyes of many fellow Senators and his political and other enemies he had been discredited. Perhaps he violated the rules of the Senate and was ruthless in his prosecutions, as they maintain. But in the opinion of millions of citizens he performed a most valuable service by his fight against communism, in which he showed no favor to the high or the low.

Senator MCCARTHY'S tumultuous career ended when he was only 47 years of age, but he will long be remembered for his bold, vigorous, and effective effort to make his country safer.

[From the Zanesville (Ohio) Signal of May 4, 1957]

CONTROVERSIAL AMERICAN

Anyone who would permit prejudice against Senator MCCARTHY to blind himself to the Wisconsin Republican's useful service to his country is being unfair to himself as well as the memory of the Senator.

Thoughful Americans today are mourning the untimely end of his controversial career. Although there are many who disagreed with his methods, there are few truly patriotic citizens who will question his objectives.

In his zeal to expose communism, the Senator frequently spoke for the sake of newspaper headlines without fully documenting his statements. Thus the word "smear" became widely used to describe his tactics.

As it turned out, a few were smeared unfairly; a great many others who were smeared deserved more than they got. It was amusing that the more leftwing his victims, the more they complained of the Senator's meat-ax methods.

More ruthless tactics in the hands of Communists have been used time and again to advance their political aims and a great many people were happy to see them get at least a mild dose of their own medicine, even at the expense of an occasionally innocent bystander.

It seems fairly well established that few of the so-called innocents were completely so; the majority of the people mentioned as Reds or fellow-travelers by Senator MCCARTHY turned out to be so closely associated with traitors as to deserve a certain amount of tarring with the same stick.

Senator MCCARTHY'S name will be remembered for years to come; not only as a symbol of the witch-hunt tactics his opponents accused him of, but also as an example of a man who recognized communism for what it is—a serious menace to the American way of life as well as the peace of the world.

Methods Were Questioned but Not Patriotism of Senator McCarthy

EXTENSION OF REMARKS
OF
HON. VINCENT J. DELLAY
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. DELLAY. Mr. Speaker, I would like to join with my colleagues in paying tribute to the memory of Senator JOSPEH

R. MCCARTHY, by inserting in the Appendix of the CONGRESSIONAL RECORD the following editorial from the Hudson Dispatch of May 4, 1957, which so aptly expresses my feelings:

METHODS WERE QUESTIONED BUT NOT PATRIOTISM OF SENATOR MCCARTHY

While his critics, and many of them were bitterly so, questioned the methods used by United States Senator JOSEPH R. MCCARTHY, of Wisconsin, they did not asperse his patriotism.

No man can become such a controversial figure in American life as did he without making many opponents and even enemies.

For the 6 years between 1950 when he spearheaded a senatorial subcommittee probing the Army, until the end of the presidential campaign on November 6, 1956, there was no national figure that caused so much discussion, so much praise, and so much invective.

But the former Marine Corps captain was prepared to stand abuse, for he realized that when one pulls no punches that he must expect to absorb counterattacks with equanimity.

When he died at the age of 47 in Bethesda Naval Hospital, Maryland, Thursday night, the career of one of the Nation's most vigorous opponents of communism ended.

In 1954 Senator MCCARTHY reached the peak of his political career in the battle with Army officials.

He charged that they were seeking to cover up subversives. They, in turn, accused him of browbeating witnesses and misleading statements.

Through the medium of TV millions of Americans sat with him through the Senate investigation that followed his own. They became familiar with his interruptions—"Mr. Chairman * * * point of order."

Growing out of that investigation was a Senate inquiry into his conduct and a vote of condemnation against him. That was the beginning of his eclipse.

His health then began to decline more obviously. His muscular frame—he was once a promising amateur boxer—puffed out with fat which he later lost by a rigid diet.

Acute hepatitis was the illness that killed him.

The onetime farm boy from Appleton, Wis., had gone a long way. "JOE" MCCARTHY—he liked to be called "JOE"—became a name mentioned in almost every household.

Often mentioned in his heyday as a possible presidental candidate—he would have been the first Roman Catholic to receive the GOP nomination—Senator MCCARTHY locked horns with two Presidents. Democrat Harry S. Truman sought to brush him aside as, in Mr. Truman's words, "a pathological case." Republican Dwight D. Eisenhower supported Mr. MCCARTHY for reelection in 1952, though without visible enthusiasm, and later treated him with an icy disdain which undoubtedly was a factor in the Senator's political eclipse.

Not many statesmen, in so brief a time in the national limelight, project into the English language of our country a new word. Like the late President Warren G. Harding, whose coined word, "normalcy," found its way into the dictionary. So the word, "McCarthyism," was coined through the Senator's vigor and daring in championing the cause of Americanism versus communism. It was, however, coined by his enemies rather than by his friends, and bore a disparaging connotation to some and a glorification of their hero to those staunch and loyal backers of the intrepid Wisconsin Republican.

Who will now take up the gonfalon that dropped from the hands of the champion fighter? Is there any Member of the Senate who could grip the imagination as did Senator MCCARTHY in his all-out battle against Communists and all they represent?

Mortgage Bankers Association Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, I am including in the RECORD a letter addressed to me dated April 11, 1957, from the Mortgage Bankers Association expressing disagreement with the provisions of H. R. 6659 affecting veterans' housing. The Mortgage Bankers Association has specifically expressed opposition to the FHA veterans' preference section of the bill, the proposal to use part of the trust fund of the national service life insurance program for the purchase of 5 percent FHA veterans' preference mortgages, and the proposal to fix limits on charges, fees, and discounts. The letter of April 11, 1957, follows:

MORTGAGE BANKERS ASSOCIATION OF AMERICA,
Washington, D. C. April 11, 1957.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs, United States House of Representatives, Washington, D. C.

DEAR MR. TEAGUE: I have your letter of April 9 which requests my views on those parts of H. R. 6659, as reported by the House Committee on Banking and Currency, which relate to the Servicemen's Readjustment Act of 1944, as amended, and the National Service Life Insurance Act.

Since a representative of this association has testified regarding these matters both before the House Committee on Veterans' Affairs, of which you are chairman, and before a subcommittee of the House Committee on Banking and Currency, I can, in replying to your letter, set forth the position of the Mortgage Bankers Association of America on the various points.

Section 103 of H. R. 6659, as reported, amends section 203 of the National Housing Act and would authorize within the Federal Housing Administration a new program of sales housing insurance for veterans. The Mortgage Bankers Association of America has for many years been opposed to special insurance programs within the FHA. We have stated our position on this matter on many occasions and before various committees of Congress.

In testifying before your own committee on January 30 of this year, Mr. Robert Tharpe, who represented the association, pointed out that our association had supported an extension of the GI home-loan program for veterans of World War II and that the association now recommended a general lowering of FHA downpayments so that there would be within the FHA a means of meeting the needs of veterans for home loans when the present program for veterans of World War II expires. Mr. Tharpe recommended against any special program in FHA limited to veterans.

In testifying before the Subcommittee of the House Banking and Currency Committee on March 6, 1957, Mr. Tharpe specifically pointed out that while either the provisions of H. R. 3602 or H. R. 2584 would be acceptable to the association, those bills contemplated no special title or program within the FHA for veterans, but rather a general revision of FHA requirements for all borrowers.

Thus, it would be the recommendation of this association that the provisions of section 103 of H. R. 6659 be deleted and in lieu thereof a proposal be substituted which would reduce FHA downpayment requirements generally. It is our opinion that such a change would be much more advantageous to veteran borrowers and to the economy of the country as a whole than the creation of any special program within the FHA for use only by veterans. In addition, may I point out certain of the subsections of section 103 which in our opinion are particularly objectionable—namely, the subsection which authorizes the FHA Commissioner to establish maximum sales prices for houses insured under the new proposal, the subsection which gives to a subsequent purchaser all the benefits which a veteran would have under the section and the subsection extending the privileges available to veterans under the proposed FHA program beyond the date now fixed for the expiration of the VA home-loan-guaranty program for World War II veterans.

The establishment of sales prices is an idea totally foreign to the statute under which FHA is functioning. Also, we can see no reason why someone who purchases a home from a veteran should be relieved from the obligation of paying insurance premiums which all other borrowers pay for home loans insured by the Federal Housing Administration.

The subsection which would extend the new program beyond the present expiration date of the GI home-loan-guaranty program for veterans of World War II seems particularly unfortunate. It would seem to us that testimony before your own committee has made it very clear that the provisions for termination, as now provided in legislation approved by your own committee and passed by the Congress, ought to be adhered to.

There are two other sections of H. R. 6659 with which we wholeheartedly disagree and which we will urge be eliminated.

Section 205 authorizes the Secretary of the Treasury to invest up to $1 billion of the national service life-insurance fund in veterans' mortgage loans which would be insured by FHA under the new proposal. In testifying before your committee, Mr. Tharpe clearly pointed out the reasons why, in our opinion, such a proposal is not in the best interests of veterans nor of the Government, and in testifying before the subcommittee of the House Banking and Currency Committee, Mr. Tharpe repeated this conclusion and pointed out further that the association agreed entirely with the remarks of Mr. W. Randolph Burgess, Under Secretary of the Treasury, which he made before your committee on February 6, 1957.

Section 503 directs the Federal Housing Commissioner and the Administrator of Veterans' Affairs to fix limits on charges, fees, and discounts imposed in connection with housing financed under the National Housing Act or the Servicemen's Readjustment Act of 1944. I recognize that this matter of discounts is a perplexing problem to the Congress; nevertheless, the Congress attempted once before to legislate on this matter, and the legislation was very similar to that proposed in H. R. 6659. The experience with the legislation was so unsatisfactorily that the FHA Commissioner and the Administrator of Veterans' Affairs urged Congress to repeal this legislation, and the Congress did so. Of course, this association has always been opposed to discount controls as being neither in the best interests of veteran borrowers nor other borrowers; but it would seem to us that, even if you disregarded the advice of lenders on this matter as being prejudiced, it would be extremely foolish to repeat again an error which was recognized as such by all parties who were concerned with its administration.

While we regret having to disagree with the many members of the House Committee on Banking and Currency, with whom we have always had the friendliest of relations, in this instance we believe that the provisions referred to of the bill the committee has reported are in error. We are in entire agreement with what we understand to be the decision of the Committee on Veterans' Affairs to endeavor to have these provisions deleted from the bill, and to provide as a substitute an amendment along the lines of H. R. 3602 or H. R. 2584.

Very sincerely yours,

JOHN F. AUSTIN, Jr.,
President, T. J. Bettes Co.,
Houston, Tex.

Educational Activities of Special Interest to the Armed Services

---

EXTENSION OF REMARKS
OF
HON. JOHN W. McCORMACK
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. McCORMACK. Mr. Speaker, under leave to revise and extend my remarks I am inserting in the CONGRESSIONAL RECORD an exchange of letters between the Special Subcommittee on Donable Property of which I am chairman and the Comptroller General of the United States.

The special subcommittee has before it a number of bills which would extend the donation of surplus property to many additional groups and activities including fire-fighting organizations, community organizations, tax-supported public recreation agencies, State defense forces, publicly owned water and sewer districts, 4-H Clubs, Youth Camps, first aid crews, and so forth.

The Secretary of Defense has heretofore determined under a provision of law that a number of groups, institutions, and so forth, are "educational activities of special interest to the armed services" and has donated surplus property to them.

Since the volume of donations by the Secretary of Defense has been considerable and the possible inclusion of other donees under existing bills would greatly add to the donable program, the Special Committee on Donable Property thought it advisable to request the Comptroller General for a clarifying decision as to authority for the inclusion of existing donees and the extent to which he can include others. The letters follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
OFFICE OF THE MAJORITY LEADER,
Washington, D. C., February 5, 1957.

Hon. JOSEPH CAMPBELL,
Comptroller General of the United States, Washington, D. C.

DEAR MR. CAMPBELL: The attention of the Special Subcommittee on Donable Property of the Committee on Government Operations, House of Representatives, has been called to interpretations of section 203 (j) (2) of the Federal Property and Administrative Services Act, Public Law 152, 81st Congress, as now in effect, with reference to which your opinion is requested.

The following questions are respectfully submitted to you by the Special Subcommittee on Donable Property for your consideration and interpretation:

1. Are the activities listed in the directive, No. 4160.10 and amendments, of the Secretary of Defense eligible donees within the intent of the statute?

2. If not, which qualify as donees within your interpretation?

3. If so, what limitations would be applicable with respect to additional donees?

However, in construing the above Public Law the subcommittee has no intention of confining you to the above questions in requesting your interpretation.

The main purpose of this request is to have a determination as to whether or not the Department of Defense has made administrative interpretations which have included organizations that are not authorized by law or are contrary to the intent of Congress.

If not, what are the limitations to the inclusion of other similar organizations, national, regional, or local, so that they will not have to resort to legislative processes?

The following language will be noted in section 203 (j) (2), as now in effect:

"In the case of surplus property under the control of the Department of Defense, the Secretary of Defense shall determine whether such property is usable and necessary for educational activities which are of special interest to the armed services, such as maritime academies or military, naval, Air Force, or Coast Guard preparatory schools * * *."

You will also note in the same subdivision the authority of the Secretary to make certain determinations in relation to the above.

There is herewith enclosed a copy of Department of Defense Directive dated April 27, 1953, No. 4160.10; Directive Transmittal of June 23, 1954, No. 54–69; Directive Transmittal 54–77 dated July 23, 1954; Directive Transmittal No. 55–83 dated June 22, 1955; Directives System Transmittal No. 4160.10–ch. 4, dated June 18, 1956; Directives System Transmittal No. 4160.10–ch. 5 dated June 28, 1956, and Directives System Transmittal No. 4160.10–ch. 6, dated September 13, 1956.

Your attention is particularly directed to organizations such as contained in Department of Defense Directive Transmittal of June 23, 1954, No. 54–69, and Department of Defense Directive Transmittal dated September 13, 1956, No. 4160.10–ch. 6, and similar organizations, and whether or not under Public Law 152, as amended, such action can be administratively taken by the Department of Defense.

Sincerely yours,

JOHN W. MCCORMACK,
Chairman, Special Subcommittee on Donable Property of the Committee on Government Operations.

COMPTROLLER GENREAL
OF THE UNITED STATES,
Washington, April 9, 1957.

Hon. JOHN W. MCCORMACK,
Chairman, Special Subcommittee on Donable Property,
Committee on Government Operations,
House of Representatives.

DEAR MR. CHAIRMAN: This refers to your letter of February 5, 1957, and enclosures, concerning Department of Defense interpretations of section 203 (j) (2) of the Federal Property and Administrative Services Act, as amended, and requesting our opinion as to whether the administrative interpretations include as eligible donees of surplus property under control of the Department organ-

izations that are not authorized by law or are contrary to the intent of Congress.

Subsection 203 (j) (3) of the original Federal Property and Administrative Services Act (63 Stat. 387) provided in pertinent part as follows:

"In the case of surplus property under the control of the National Military Establishment, the Secretary of Defense shall determine whether such property is usable and necessary for educational activities which are of special interest to the armed services, such as maritime academies or military, naval, Air Force, or Coast Guard preparatory schools. * * *"

This subsection was renumbered "203 (j) (2)" and the language was reenacted without change, except for the substitution of "Department of Defense" for "National Military Establishment" by the act of July 3, 1956 (70 Stat. 493). A further sentence of the section authorizes the allocation of the surplus property determined usable and necessary for such purposes for transfer by the Administrator of General Services to the appropriate State agency for distribution to such educational activities.

Designations of eligible donees are set forth in Department of Defense Directive 4160.10, a copy of which you enclosed with your letter, and our attention is directed particularly to such organizations as Camp Fire Girls, Inc., Boys' Clubs of America, Inc., and similar organizations. The similar organizations designated in the directive are national headquarters, Boy Scouts of America, and national headquarters, Girl Scouts of America. The dates of original designation of these organizations are as follows: Boy Scouts, May 12, 1951; Girl Scouts, March 6, 1952; Camp Fire Girls, June 23, 1954; and Boys' Clubs of America, September 13, 1956.

You submit the following specific questions for our consideration:

"1. Are the activities listed in the directive, No. 4160.10, and amendments, of the Secretary of Defense eligible donees within the intent of the statute?

"2. If not, which qualify as donees within your interpretation?

"3. If so, what limitations would be applicable with respect to additional donees?"

The specific illustrations enumerated in section 203 (j) (2) of the Federal Property and Administrative Services Act of 1949, as amended, gives rise to doubt as to the propriety of including, as eligible donees, organizations such as indicated above. However, the matter must now be considered in the light of the principle that a contemporaneous construction given an act of Congress, while not controlling entitled to great weight and should not be overturned except for cogent reasons. See *Brown* v. *United States* (113 U. S. 568); *Great Northern Ry. Co.* v. *United States* (315 U. S. 262). Also, it has been held that an administrative construction of a statutory provision—not required to be charged by the legislature—must be deemed to have received legislative approval by a reenactment of such provision without material change. *McCaughn* v. *Hershey Chocolate Co.* (283 U. S. 488); *Helvering* v. *Reynolds Co.* (306 U. S. 110); *National Labor Relations Board* v. *Gullett Gin Co.* (340 U. S. 361). Designations of the organizations, with the exception of the administrative designation on September 13, 1956, of Boys' Clubs of America, were a matter of record of which the congressional committees were apprised before reenacting the legislation without material change. Thus, on pages 48 to 52 of the hearing before the Subcommittee on Reorganization of the Committee on Government Operations, United States Senate, 84th Congress on S. 3693 (S. 1527 and H. R. 7227)—the latter of which bills became the act of July 3, 1956, referred to above—the committee was advised of the designation by the Department of Defense of the Boy Scouts and Girl Scouts of America and Camp Fire Girls as eligible donees. On such pages there were incorporated into the record the listing in detail of these and other organizations designated as eligible as well as the regulations of the military departments under the involved provision of law. Also, on page 15 of Senate report 2267 on H. R. 7227, there is quoted a letter of the Department of Defense reporting that donations were being made to 46 schools and educational activities designated as being of special interest to the Department. The fact that organizations such as the Boy Scouts and Girl Scouts of America and the Camp Fire Girls were considered as eligible donees was brought to the attention of the Congress on numerous earlier occasions. See in this connection, page 16, hearing before the Committee on Government Operations, United States Senate, on H. R. 3322 and S. 1004, 84th Congress, April 21, 1955; page 321, hearings before the Special Subcommittee on Donable Property of the Committee on Government Operations, House of Representatives, on H. R. 3322, 84th Congress, February 15, 17, and 21, 1955; pages 94 and 96, of the February 1955 report to the Commission on Organization of the Executive Branch of the Government prepared by the Task Force on Use and Disposal of Federal Surplus Property; and page 224, Donable Surplus Property Program Hearings before a subcommiteee of the Committee on Government Operations, House of Representatives, 83d Congress, April 20, 21, 23, and 24, 1953. In view of the rules of statutory construction referred to above and the circumstances here involved we conclude that the designations by the Department of Defense of Boy Scouts, Girl Scouts, and Camp Fire Girls as eligible donees are within the intent of the statute as now in effect. Also, since Boys' Clubs conduct educational activities (*Boys' Club of Detroit* v. *Pakula* (69 N. W. 2d 348)), and otherwise appears to be similar in purpose to the aforementioned organizations, the designation of such organization appears proper. Accordingly, your first question is answered in the affirmative.

The second question, being based upon a negative reply to the first, does not require consideration.

Your third question concerns limitations applicable to additional donees, and the question as hereinabove quoted is restated and enlarged in your letter as "What are the limitations to the inclusion of other similar organizations, national, regional, or local, so that they will not have to resort to legislative processes?"

Inasmuch as the words of the statute "such as maritime academies or military, naval, Air Force, or Coast Guard preparatory schools" are not, for the reasons heretofore discussed, viewed as precluding noninstitutional-type organizations, the limitations to the inclusion of other similar organizations would appear to be the facts of each particular case. Thus, where the facts regarding the activities of an organization would reasonably support a conclusion that it was engaged in educational activities, and such activities are deemed by the Secretary of Defense to be of special interest to the armed services because the activities of the organization are designed to develop the minds, bodies, and character of young people in qualities that reasonably might be expected to contribute to their usefulness in the defense of the Nation, or for other reasons, an administrative designation of such organization as an eligible donee would meet the requirements of the statute. The national, regional, or local aspects of an organization, except as to administrative problems which might arise as a result thereof, would not appear to be determinative. Your third question is answered accordingly.

Sincerely yours,

JOSEPH CAMPBELL,
Comptroller General of the United States.

Postal Emergency May Bring Rate Action

EXTENSION OF REMARKS
OF
HON. WILLIAM M. COLMER
OF MISSISSIPPI
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. COLMER. Mr. Speaker, the problem of the operation of the Post Office Department is back with us again. It has always been my contention that this Department should be self-sustaining. Those who use the service should pay for it. There is no logical reason why this Department of the Government should be operated continuously upon a deficit basis. Now that the country seems to have awakened to the deplorable fiscal situation and apparently realizes the necessity for retrenchment and economy in Government, I am very much in hope that the Congress will enact a postal increase bill which will put this Department upon a sound basis. Such a bill is now under consideration in the appropriate committees of the House and Senat. As one of the minority who supported such legislation last year, I should like to see a reversal of the unfortunate failure of that bill to pass.

In this connection, Mr. Speaker, I submit herewith a very timely editorial from my hometown newspaper, the Chronicle-Star and Moss Point Advertiser of Pascagoula, Miss.

The editorial is as follows:

POSTAL EMERGENCY MAY BRING RATE ACTION

The unusual—perhaps hasty would be a better word—manner in which Congress acted to grant the Post Office Department a $41 million appropriation so it could resume normal operation may have a healthy effect.

The nationwide publicity and furor created by Postmaster General Summerfield's action in curtailing services may point up the need to—

1. Trim postal services to fit revenues, or

2. Increase postal rates to a point where revenues will offset operating costs.

The Department has been operating with a constantly increasing deficit which for this fiscal year will probably find expenses more than a half billion dollars in excess of revenues.

It is probably true that if the Department modernized its mail-handling practices and generally streamlined operations, money could be saved. We are years behind Great Britain in mechanization of mail handling.

But nevertheless, the fact stands that there has been no substantial increase in postal rates for the past 25 years. In 1932 the first-class letter rate was the same as it is today—3 cents. Some small increases have been made in other rates but not enough to even dent the difference between cost of handling mail 25 years ago and today.

Summerfield—and predecessors—have for years appealed for rate increases.

But Congress has consistently turned a deaf ear as the deficit continues to mount.

Taxpayers aren't being saved any money because Congress refuses to raise rates. If there is a half-million dollar deficit, who pays it?

You're right, the taxpayer. It is reflected in the national budget they underwrite with income and a host of other Federal taxes.

Who gets the major benefit of the low postal rates?

A small group comparatively speaking—who are heavy users of postal services, par-

ticularly in the second- and third-class categories.

The average American writes perhaps a hundred or so letters a year. Most rarely, or never, use the second- and third-class mails. An increase in the first-class letter rate from 3 to 4 cents would mean, then, that the average American would find his mailing expenses upped by about $1 annually.

We are not maintaining the Post Office Department should be a profit-making business. It is a service the citizen has a right to expect from his Government.

But it was never meant to be a subsidy for some business operations—as it now is.

In refusing to increase rates Congress is maintaining a fat subsidy for a few at the expense of many.

A Permanent U. N. Force

EXTENSION OF REMARKS
OF
HON. FRED SCHWENGEL
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. SCHWENGEL. Mr. Speaker, in connection with the concurrent resolution offered by my colleagues last Thursday to create a permanent U. N. force, I ask unanimous consent to have entered in the RECORD some observations on the need of such action by a constituent of mine, John D. Rockwell, of Mount Pleasant, Iowa. Mr. Rockwell is a student of government and devotes a considerable amount of time and energy to keeping peace in the world. I respectfully direct the attention of my collegaues to Mr. Rockwell's observations which concur in principle with the concurrent resolution. Mr. Rockwell's remarks follow:

It is vital that the United States at this time inaugurate the creation of a standing army by the United Nations.

A permanent force, second to none, supported by all member nations, according to their wealth and population.

To see that the will of the majority is honored by the recalcitrant few.

To see that every people has the right of unfettered self-determination as to the form of government it wishes to pursue.

To see that the will of the majority of the United Nations is carried out in all places and by all peoples.

This army should be under a supreme commander responsible only to the United Nations. He should be of the same caliber as Gen. Douglas MacArthur or Field Marshal Montgomery. The troops should be drawn evenly at so many per 1,000 population of member countries. It would be best if these troops served a 20-year or career hitch at sufficient salary to make such a career attractive and with adequate retirement pay and 30-day rotational leave per year. This United Nations army should include all the various services of modern warfare, answerable to the supreme commander.

It should be plain to anyone that such an army supported by at least 50 nations would eventually constitute a defense force per nation at a cost much below that of 50 such individual defense forces. Worldwide bases would be readily available everywhere. Short of war, such an organization might enforce its will upon an offending nation by complete ostracism. This would include the blockade, without an exchange of ideas or trade—legal or illegal; a complete blackout and a serevance of all relations by member nations. Such nation, upon indicating a desire to rejoin, should be forced to undergo a period of probation or limited privilege.

Man From Vietnam

EXTENSION OF REMARKS
OF
HON. EDWARD P. BOLAND
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Saturday, April 6, 1957

Mr. BOLAND. Mr. Speaker, a good friend of the United States and a great fighter against communism, President Ngo Dinh Diem, of Vietnam, will arrive in Washington on Wednesday for a state visit. Under leave to extend my remarks, I would like to have printed in the RECORD for the benefit of my colleagues a most interesting article about President Diem written by Foster Hailey and appearing in the New York Times Sunday magazine yesterday, May 5.

The article follows:

MAN FROM VIETNAM—PRESIDENT DIEM, ARRIVING HERE FOR A VISIT, IS THAT NATION'S SYMBOL OF INDEPENDENCE

(By Foster Hailey)

TOKYO.—The stocky man in the long black gown and flat black cap bent anxiously for a moment over his Secretary of State for Agrarian Reform, who lay on a gravel walk in the fairgrounds at Benmethout in south-central Vietnam clutching a bleeding side and left arm.

"They have shot me," murmured Do Van Cung.

There could be no doubt in the mind of President Ngo Dinh Diem last February 22 for whom the bullet had been intended. Had the assailant's automatic pistol not jammed after that one wild shot, the United States probably would not this week be greeting its distinguished Asian guest.

It was the first time since Mr. Diem became President of the Republic of Vietnam a year ago last October, that an attempt had been made to assassinate him. But there was no hint in his manner that he was perturbed. He stood for a moment, reported Le Journal d'Extrême-Orient of Saigon, "watching the crowd around him with his sharp and heavy look in an attitude of the most striking impassibility." Five minutes later, in a firm voice, he began his prepared talk. "Dear compatriots * * *."

All through the remainder of the hot morning he walked through dusty compounds and buildings to the fair with no added escort, chain-smoking cigarettes and chatting amiably with booth attendants and members of his entourage.

It was not the first time Mr. Diem had shown that high degree of courage that Ernest Hemingway once defined as "grace under pressure." And not just physical courage, but spiritual and moral courage as well. When he believes a course is right for himself and for his country he will defy the world, and has.

When he was under heavy compulsion from the Western Powers 2 years ago to agree to implementation of the Geneva accord for elections in all of Vietnam, he told a representative of his main foreign supporter—the United States Government—that he would not even go through the motions of discussing the matter with the Communists.

Washington was afraid that meant a renewal of war with the Communist north and let it be known publicly that it was displeased with his attitude. He still said "No."

Had an election been held in 1955, there is little doubt the Communists would have won. Ho Chi Minh, the Communist leader in Hanoi, was then—as he had been since 1945—the one great symbol of independence for the larger part of the people of Vietnam. Today President Diem is that symbol, the undisputed leader of one of the most promising old-young countries of southeast Asia.

President Diem has achieved that position in less than 3 years. It was only on June 26, 1954, that he returned from Paris to Vietnam after 4 years' voluntary exile—and 21 years out of public life—with a delegation from Chief of State Bao Dai of full military and civilian power.

There were few who gave Mr. Diem a chance of saving anything from the wreckage of his country. Dienbienphu had just been overrun by the Communists. The French were in full retreat. Ho Chi Minh was the national hero.

Mr. Diem had an army of 200,000 men, but it was poorly armed, only half trained, and French-led. Saigon and the Medong River Delta were under the control of the Binh Xuyen, a gang of river bandits who controlled the opium trade and prostitution in the Vietnamese capital.

Several times during the next few months he took the field with loyal troops against the Binh Xuyen. And by May 1955 he was able to announce his victory and tell of his hopes and plans for his country. The principal one was full independence.

With the military struggle behind him, Mr. Diem proceeded to consolidate his leadership by keeping his promises to his people. He promised land reform—and instituted it. He promised to eliminate every vestige of French rule—and did.

Events have proved that what the Vietnamese needed and wanted was a leader who pledged no allegiance to any one except themselves, one in whom they could put their trust and on whose honesty and integrity they could rely. They had followed Ho Chi Minh because, until Mr. Diem came along, they had been offered no other choice.

Almost as important, perhaps, is the fact that the President is an indefatigable traveler who has visited every part of the Republic since his assumption of office, shaking hands, mingling with the people, and speaking eloquently but simply to the crowds that turn out everywhere to greet him. Practically all of Vietnam's 12 million inhabitants must feel that they know him personally.

Mr. Diem's life would indicate that almost from the time he was old enough to think coherently leadership of an independent Vietnam had been his dream. He was born at Hue, capital of the then empire of Annam, January 3, 1901. He was the third son of Ngo Dinh Kha, minister and counselor to Emperior Than Thai, father of Dao Dai. Annam was a protectorate in the complex of protectorates, princely states and colonies that made up French Indochina.

He entered the mandarinate (a corps of high civil servants) on graduation from the school of administration at Hue, and at 32 was named Minister of Interior in the Annam Govefnment. When the French blocked his attempts at reform he resigned.

Although he was out of office, his abilities were so well recognized that he received several invitations during the war and the

immediate postwar years to join various governments. Bao Dai twice offered him posts—once in a puppet government under the Japanese and later under the French. Ngo Dinh Diem would have no part of either.

Ho Chi Minh—whom Mr. Diem says he has known, disliked and distrusted since 1929—also offered him a place in the government he set up after the war, after first holding Mr. Diem under arrest for 6 months. Mr. Diem spurned that offer, too.

Seeing no hope at home, with Ho Chi Minh's Vietminh ruling the countryside and Bao Dai dividing his time between big-game hunting in the highlands and bathing on the French Riviera, Ngo Dinh Diem left Vietnam in 1950 to plead his country's cause in the world's capitals.

He visited Japan and the Philippines and then went to the United States, where he lived for several months, with his headquarters at Maryknoll Seminary in Lakewood, N. J. He went on to Belgium in 1953, and then to France. When Bao Dai called him to his Riviera villa in June 1954, he was ready to accept the forlorn chance offered.

President Diem is unusual among Asian leaders. He is, first, a devout Roman Catholic. He also is a celibate. When still in his teens he considered becoming a priest, and took a vow of chastity which he renews daily by laying a spray of flowers on the shrine of the Virgin in the private chapel of Din Doch Lap (Independence Palace), where he lives.

He is also one of the hardest working government officials in the East or West, putting in a normal working day of 16 hours. He still finds time to study government, economics, and history, and to pursue his hobbies of hunting, photography, horseback riding, and rose culture.

Finally, he is one of the most Western-minded of Asian leaders. Some of this trait probably is attributable to his two close American friends and advisers. One if Wolf Ladejinsky, the controversial Russian-born economist and land-reform expert, whom President Diem hired as his personal adviser when Mr. Ladejinsky finally was forced to resign from United States Government service in 1955. Many of the reforms President Diem has sponsored in the last 2 years undoubtedly had their genesis in the breakfast conferences he holds with Mr. Ladejinsky 2 or 3 times a week.

The other American closest to him is Dr. Wesley R. Fishel, a young Michigan State College professor who heads a Michigan State advisory group to Vietnam. The group is helping the Government set up a modern taxation system and institute other reforms.

Another close friend and admirer is Lt. Gen. John H. O'Daniel, former head of the United States military assistance advisory group in Vietnam. General O'Daniel was almost alone among United States officials in retaining faith through the dark days of 1954 and 1955 that President Diem could bring order out of chaos and establish a stable government.

The President is not without critics. One complaint heard frequently from his countrymen is that he relies too much on his family for advice. One of his four living brothers is gazetted as his political adviser. Another is Ambassador to London. A third is Roman Catholic Bishop of the province of Vinh Long. An elder brother, who was a provincial governor, under the French, was killed by guerrillas in 1945.

Other criticisms heard are that President Diem insists on handling too many affairs himself, thus delaying important decisions, and that he had not moved rapidly enough in extending democratic elections. All provincial governors, for instance, still are appointed as in colonial days.

But Mr. Diem is in only the second year of 5-year term as President. His goal is a prosperous and united Vietnam by the time his term is over. He feels that the Chinese-supported Communist regime in northern Vietnam cannot survive. All information from there is that the people are restive. They know that in the south their fellows are freer and far better off. Diem has the patience to wait until the people of the north find intolerable the way of life that communism offers them.

Meanwhile he is striving with the help of about $200 million a year in United States aid and his own untiring efforts to raise the educational level of his people and give them land and a life of peace. A happy man on his own land is a poor prospect for communism, he says.

Dilemma of Democracy

EXTENSION OF REMARKS
OF
HON. FRED SCHWENGEL
OF IOWA
IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. SCHWENGEL. Mr. Speaker, one of the students who is a guest of mine this week as a participant in the "Week in Washington" project which I sponsor in cooperation with the Citizenship Clearing House of the State University of Iowa, is Larry Popofsky, of Oskaloosa, Iowa, a junior at the State university. Mr. Popofsky has the distinction of winning the Hancher public speaking contest at the university last month and on the basis of this award he was chosen to represent Iowa at the Northern Oratorical League contest at the University of Minnesota last Friday. His address, "Dilemma of Democracy," has a message for each of us, and under leave to extend my remarks, I ask consent that it be printed in the RECORD. The address follows:

DILEMMA OF DEMOCRACY

(By Larry Popofsky)

During the bleak days at the outset of the Civil War, when chaos gripped our Nation's capital and indecision stifled positive action, Abraham Lincoln asked in anguish, "Must a government of necessity be too strong for the liberties of its own people, or too weak to maintain its own existence?"

Caught in a maze of conflicting forces which threatened national solidarity, President Lincoln found himself confronted by the great dilemma of democracy, a dilemma which becomes especially crucial when our national security is in jeopardy.

Today, as in Lincoln's time, the security of our Nation is ominously threatened. The new conditions created by the great world wars and the growing menace of thermonuclear weapons has erased the certitude of safety upon which we have so long relied. Militant international communism has also jarred Americans out of their 19th century idealistic lethargy and into an awareness of the impending struggle for existence.

In the wake of this great struggle, the dilemma of democracy has once again dramatically come to the fore. Let's look at the nature of this dilemma. Our American system of government is dedicated to the task of ensuring to all its citizens the fundamental freedoms, such as free speech. But can these rights be maintained when our Nation's security—its very existence—is under attack by radical forces both outside and within our own borders? In the past we have successfully faced the challenge of the right and the left without resorting to any unusual methods of suppression. But the present danger has appeared so critical that we have been unwilling to rely on our traditional institutional safeguards and have adopted a new set of suppressive measures. The rationale for these new actions is clear enough. Everyone is aware of the dangers we are compelled to face. Certainly we will not passively watch our Nation's governmental system crumble under radical onslaughts. Therefore, in the name of preserving our liberties and the form of government which makes these freedoms possible, we have found justification for suppressing radical groups.

Suppressive measures in a democracy, however, can be a double edged sword. While it is true that with slashes of this sword some of these forces inimical to our national security may be obliterated, yet at the same time the individual liberties of our citizens may suffer irreparable damage. During the past few years the all-pervasive craving for security, born in an era of blind emotionalism and unreasoning fear, has prompted Americans to seize that sword of suppression, heedless of the nature of the weapon.

Armed with a rationale for their use, we have watched Congress pass a series of laws designed to give us security from the threat of internal communism. The first was the Internal Security Act, passed over President Truman's veto in 1950. Its outstanding provision is the requirement that all Communist-front organizations register with the Government and face regulation. In 1954 Congress passed the Communist Control Act, which prohibits members of the party from seeking places on election ballots and thus, for all practical purposes, outlaws the party. Similar provisions can be found in the McCarran-Walter Immigration Act and the Taft-Hartley labor law.

The executive branch of the Government also has taken actions designed to promote security. These actions have assumed the form of far-flung loyalty-security programs and vigorous enforcement of antisubversive legislation.

As a result of these legislative and administrative acts, the fundamental rights cherished by Americans since 1776 have suffered a gradual erosion which today poses a greater threat to our Nation's security than that we have been trying to combat. President Truman recognized this threat when in vetoing the Internal Security Act he charged that such a measure was simply not necessary to meet questionable demands for national security and that its consequences would be dangerous to our freedoms.

These consequences have been appalling. The public scene has been characterized by the spectacle of perjury trials, charges of disloyalty based on the assumption of guilt by association, and a program of prosecution lacking such essential procedural safeguards as the right of a person to know and confront his accuser. The congressional investigating committee, a modern form of the inquisition, has been placed outside the guaranties of the Bill of Rights. Justice William O. Douglas, in a cryptic view of the situation, said, "Critical evidence may be the word of an unknown witness who is a paragon of veracity, a knave, or the village idiot."

The cumulative effect engendered by these laws has permeated almost every phase of American society. In Washington reporters complain of the inaccessibility of information and the infrequency of press conferences. In the realm of academic freedom the American Association of University Professors has censured 10 major university administrations, including 2 this week, for failing to observe recognized standards of academic freedom and tenure. Even the attitude of the average American citizen toward our basic freedoms has materially

changed. A study by Samuel Stouffer disclosed that while at the height of World War II only a quarter of the American people favored suppression of mild Socialist journals, today that view is shared by almost half of the population.

How does all this relate to the great dilemma of democracy? It means that in vainly grasping for security at any cost we have seriously endangered our individual liberties. The delicate balance between national security requirements and the needs of individual liberty has been seriously thrown out of kilter in America by these actions and the environment they have created.

The phrase "delicate balance," however, gives us a clue to the solution of our dilemma. The answer is not simply one horn or the other. Individual liberty and national security do not of necessity form an incompatible dichotomy. Both are needed for democracy to function properly in the present world crisis. The dilemma can only be resolved by achieving what Aristotle termed the golden mean. We cannot continue a futile search for absolute security for in so doing we endanger the very core of the democratic system. Nor can we expect to achieve absolute freedom. That such absolutes are attainable is the great delusion of our age, the delusion of the disciples of Karl Marx at one end of the political spectrum, and of the thin-lipped men of the right at the other.

The gravest fault in the present system is not the attempt to provide adequate security, but rather the failure to test proposed measures of security by the yardstick of long-established guaranties of freedom of the individual. The answer is not the abolition of security programs but a drastic revision bringing them within their proper historical context. We must reverse those legislative acts which infringe on our liberties and once again rely on long-standing laws to protect us, such as the Conspiracy Act of 1861. We must again place our loyalty programs on a sound basis and provide the normal constitutional safeguards to all those accused. We must rid ourselves of the psychology of fear and suspicion which has eaten away at our democratic system like acid.

These things can never be done unless we the people understand the dilemma of democracy and insist that a balanced relationship be reestablished. The power of an enlightened citizenry cognizant of the full meaning of democracy is tremendous. Often in the past it has been just such a sentiment among an aroused people which has halted what they considered to be unwise changes in our sacred traditions. This happened in 1937 when President Roosevelt's Court reorganization bill was defeated because of the moral resentment expressed by the great mass of people outraged by the proposal.

But for us to exercise this tremendous influence in the cause of preserving our liberties, we must regain our confidence in the solidarity of American institutions and traditions and overcome our indifference to the fate of those institutions. Only by faith in our democratic processes and an alertness to their preservation can we obtain the best possible security—the only real security compatible with our beliefs.

We must, above all, realize, as Adlai Stevenson has said, we cannot protect ourselves from our enemies by building barricades made of the broken cornerstones of free institutions."

The question which President Lincoln posed in 1860 does not present an unanswerable dilemma. Today, as always, the solution lies in the valley of the golden mean between the jagged edges of tyranny and anarchy. We can and must have both security and freedom.

United States Savings and Loan League Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, I am including in the RECORD, a letter dated April 10, 1957, from the United States Savings and Loan League expressing opposition to any shift of the veterans' program away from the Veterans' Administration. The league is also opposed to using the reserves of the national service life insurance program for the purchase of FHA veterans' preference mortgages. The letter of April 10, 1957, follows:

UNITED STATES SAVINGS AND LOAN LEAGUE,
Chicago, Ill., April 10, 1957.

Hon. OLIN E. TEAGUE,
Chairman, House Committee on Veterans' Affairs, House Office Building, Washington, D. C.

DEAR CHAIRMAN TEAGUE: In response to your letter of April 9, I am happy to indicate the position of the United States Savings and Loan League with respect to the veterans' sections of H. R. 6659. In general the league opposes the veterans' sections and endorses the position taken by your committee April 9.

Specifically, the United States League is opposed to any shift of the veterans' program away from the Veterans' Administration. While the establishment of a veterans' section under the FHA might technically leave the veterans' loan program undisturbed, as a practical matter it amounts to the same thing as placing the loan guaranty program under the FHA. The history of the operation of Government agencies on this point is only too clear. Thus we emphatically oppose section 103 (c), beginning on page 3 of the bill.

The league position with respect to National Service Life Insurance funds was stated before the House Banking Committee as follows:

"The league is opposed to the use of NSLI funds, primarily on the grounds that NSLI reserves are currently invested in Government securities, the sale of which would cause further tightness in money markets and largely defeat the objective of improving the flow of home financing. Further, the league shares the apprehension of other groups about using veterans' life insurance funds for various special purposes."

Thus the league is quite definitely opposed to section 205, beginning on page 16 of the bill.

The provision regarding control of discounts was added subsequent to the league's appearance before the committee. The league views discounts as a method of adjusting yields on fixed interest rate loans to market conditions, and does not look upon them as an illegal or improper device. There are such tremendous practical and administrative problems to discount control that even with the flexibility provided in that section we seriously doubt that the result will be worthwhile.

We realize, of course, that your committee has acted on the interest rate question, but we feel that any discussion of the veterans' home loan program should include our reiteration that an increase in the interest rate to 5 percent is the only truly effective way to rejuvenate the veterans' home loan progrom. We also believe that it is the simplest, fairest, and most economic method. Incidentally, the 58 percent increase in applications for FHA loans between December and February is an indication that the increase in the FHA rate has resulted in an actual increase in loan volume.

We hope that you and your committee will successfully oppose the various veterans' sections of the housing bill.

Sincerely yours,

STEPHEN SLIPHER,
Staff Vice President.

Why Poland Should Be Helped

EXTENSION OF REMARKS
OF
HON. RAY J. MADDEN
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. MADDEN. Mr. Speaker, the following statement sets out clearly and concisely some of the reasons why special consideration should be given to the problem of Poland's fight for freedom from the Communist dictators.

In this morning's news dispatches from abroad, a report again comes that a revolution is now fomenting in certain areas of Poland.

The Polish American Congress, in the following report, sets out practical reasons why aid should be given to this struggling nation at this time:

WHY POLAND SHOULD BE HELPED—A STATEMENT BY THE POLISH AMERICAN CONGRESS

Since the October upheaval in Warsaw, when, in the wave of unrest and discontent of the population, Polish Communists recognized the urgency of needed economic and political reforms, American sympathy for Poland has been growing rapidly. From humanitarian and, to some extent, diplomatic views, at least 90 percent of American press and radio and television commentators favor technical and economic help for Poland. However, in this gratifying wave of sympathy for the Polish people, a sense of apprehension could be detected. One question is being frequently asked: Whether, while helping Poland, we would at the same time strengthen the Soviet Union and communism?

The answer to this question is an emphatic "No," for the following reasons:

1. The Polish people are painfully aware of the fact that Communist concepts of economy and industrial planning have brought them to the brink of disaster. The Communists themselves accepted this truth by retreating from such spheres of economic activities as the collectivization of farms which has been brought to a standstill, and complete socialization of small private enterprises which has been abandoned.

These two examples prove beyond doubt that the Polish people have forced Communists to a considerable retreat from stubborn entrenchment in Marxist-Leninist theories and practices. And this is only the beginning. Given more time, and moral as well as material support, the Poles will eventually go farther on the road to complete independence.

2. Polish national interests, historic evolvement, as well as cultural and spiritual ties

with western civilization, clash with Communist designs for world domination. Polish implacable hostility toward communism in general and toward Russian colonialism in particular is a proven fact of history.

There is no danger, that by helping Poland economically we would be strengthening communism and the Soviet Union. On the contrary, stronger and more independent Poland would mean a gradual retreat of communism in central and east Europe and would effectively oppose Russian designs for conquest.

Another argument is being set forth even by people whose sympathy toward Poland is sincere, that there is a great risk involved in helping the Polish people now. They say that American aid for Poland would provoke Russian wrath against the Poles. They add that the Polish people have already aroused Russian antagonism to a breaking point.

Let us bear in mind, therefore, that the Poles are well aware of the risk. They are willing to take it. The very fact that they asked us for help instead of begging the Kremlin for handouts, proves beyond doubt that Poland wants to return to the western family of nations where her national birth placed her a thousand years ago. The Poles have already taken a risk by turning to the West. It should be evaluated as a calculated risk. They are risking far more in turning to us than we are risking in granting them help.

The stakes are high and worth the chance both for Poland and for the United States. In the long view of history, the Communist system of government forced on Poland by the might of Russian army is only transitory. Poland, as a nation, successfully opposed russification in the past and, with her boundless devotion to freedom and democracy, will emerge victorious from Communist oppression. But she needs our help and fully deserves to be helped in her hour of dire need.

Finally, some aspects of Poland's foreign policy are being used in arguments against a large-scale help. We should remember that Poland's current foreign policy is not of her own choice. It has been linked to Russia with full consent and support of the Western Powers at Yalta. Poland is not yet able to follow an independent course in foreign affairs. This can develop only in accordance with the amount of material and moral help that Poland could get from the West.

The T–44

EXTENSION OF REMARKS
OF
HON. EDWARD P. BOLAND
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. BOLAND. Mr. Speaker, the Army last week adopted the new lightweight T–44 Springfield Armory developed rifle to replace the Garand M–1 as the standard shoulder piece for ground troops. Under leave to extend my remarks, I would like to have printed in the RECORD an editorial on the Army's rifle decision taken from the Springfield (Mass.) Union on May 3. The editorial points out that the awarding of substantial orders for the production of the new rifle at the Springfield Armory would be the logical development of the T–44's creation at that installation.

The editorial follows:

THE T–44

Springfield maintains its identity as the matrix of the standard infantry shoulder weapon with the Army's acceptance of the T–44 as the basic small arm of United States ground forces. The T–44, a light automatic rifle, was designed at Springfield Armory. Eventually it will replace the M–1, or Garand, which supplemented the old .30-caliber Springfield rifle, both of these famed weapons having been the products of our armory designers, and both having contributed to this city's economy through local manufacture of a large part of the Army's supply.

What the T–44 will mean to Springfield economically is conjectural, in a sense, but Representative EDWARD P. BOLLING says that it looks good for the armory to maintain its 2,500-man work level. In view of some employment cutbacks and alarming but disproved indications that more might be in store, the prospect is encouraging.

No one wants the return of wartime conditions that swelled the Springfield payroll to over 6,000 during the Korean struggle. At the same time, the armory, as an integral factor of the city's prosperity, is an essential establishment. A body of skilled labor has been built up over the years and, of course, it can be maintained only by adequate employment. To dissipate it by the near-cessation of manufacture, as was contemplated last year, would be to weaken the national defense, since we must assume that as long as wars are fought the men on the ground will do much of the fighting, in spite of predictions of full push-button warfare. Ground forces fight largely with rifles.

The results of exhaustive tests indicate that they will have an excellent rifle in the T–44, which proved superior to the Belgian and other models in the extensive trials that preceded the Army's decision to adopt it. It is light, shoots 20 rounds with one pull of the trigger, and is effective under all climatic conditions. It will become the basic weapon of infantrymen in NATO forces, as well as those of the United States. The award of substantial orders for its production to the Springfield Armory would be the logical development of its creation at that installation.

Milepost

EXTENSION OF REMARKS
OF
HON. CHARLES O. PORTER
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Monday, April 15, 1957

Mr. PORTER. Mr. Speaker, we live at a pace that sometimes causes us to forget the simple and wonderful pleasures. One of these is fishing. In the district I represent fishing is a major sport enjoyed by young and old. One appreciative fisherman is Charles V. Stanton, editor of the News-Review of Roseburg. His editorial of April 27, 1957, entitled "A Fisherman Is Born," tells well a story which is as old as time itself.

The editorial follows:

A FISHERMAN IS BORN

(By Charles V. Stanton)

He wasn't very big—but, then, no one is big at 10 years of age.

Maybe, though, if he were a little bigger he wouldn't feel so much like he was going to burst. It was awfully hard to keep all that pride in a 10-year-old body, especially as he caressed, as he did now, the shiny, new fishing rod and its companion reel.

Dad had brought them to him last night after he'd gone to bed.

Dad had come into the bedroom, turned on the light, and then from behind his back brought out the fiber case with the new rod, the box with the reel, and the spool of line.

"Tomorrow," Dad said, "is the first day of fishing season. You've never had your own outfit. You've always used one of my old ones. So this one is yours. It's brand-new. You must take care of it.

"And tomorrow you may go fishing alone. I know that the creek over on the back of the farm isn't as big as the river where you and I have fished together, but there are fish in the creek and you may go there by yourself. Your mother will have a lunch ready for you and you may go right after breakfast."

Then Dad had gravely shaken hands, voiced a hearty "good luck," turned out the light, and departed.

THE SEASON OPENER

He hadn't slept much. Lying there in the dark, he had removed the rod from its case and fondled it time and again. He had spun the reel, trying click and drag. As soon as daylight came, he had roused to wind the new line onto the reel.

Mother, at breakfast time, hadn't taken too kindly to the idea of his traipsing off clear across the farm to fish by himself, but Dad had settled that.

"Bud and I opened the season together last year," Dad reminded her. "I can't get out today, but there's no reason Bud should stay home. He knows how to fish and he knows how to take care of himself. He'll be O. K."

Now he was off by himself, the first time he had ever fished alone. He carried the new outfit carefully as he crossed the fields and familiar woods on the way to the creek that came out of the mountains to flow through the woodlot and meadows.

Soon he would be there. He knew just the pool.

He would stop well back from the creek. He would take a worm from the can he had filled in the barnyard and would loop the worm on the hook.

He recalled how Dad had shown him the way to put on the worm, carefully making loops that weren't regular, because that wouldn't be natural, and keeping the hook, particularly the point, hidden.

Then he would bend low and slip up very quietly to the water, just like Dad had taught him to do, and he would drop the worm into the pool right near an overhanging limb, keeping himself hidden behind the old stump, and he would be sure and make no sudden movement until he had his fish hooked.

A DAY TO REMEMBER

And after he had fished out the pool, he would move on down to where the creek went through the rock cut that he always called the gorge. It really wasn't a gorge at all—just a place where the stream had cut through a small rise in the land.

He and Dad sat there one day and ate their lunch and Dad had pointed out to him how the creek had once gone a long way around the rise, and how it had taken many, many years for the little stream to wear away a grain of sand at a time until it had made the shorter course.

And Dad had told him something he only half understood, that sometimes a person must have a lot of patience to fight against obstacles in life, but if he just kept working away, never stopping, always pushing ahead to his objective, he was sure to succeed; but to remember the stream had to work hard and for a long time.

And as he thought back to what Dad had told him he wished that Dad was along now—or did he?

He sure had a swell dad. Dad understood. He understood that a 10-year-old was grown up. Well, maybe not quite grown up, but almost. And he understood that there were times when a man needed to get off by himself. He understood, too, that there's a lot

of difference between your own fishing outfit and a hand me down.

Now trudging along the trail, almost in sight of the water with excitement rising, there was realization that this would be a day to remember.

Dad sometimes said something about a day being a milepost. This must be what he meant.

Veterans of Foreign Wars Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, I have received a letter from Veterans of Foreign Wars expressing opposition to the veterans' provisions of H. R. 6659. VFW has pointed out that the organization is opposed to any legislation which threatens the dismemberment of the Veterans' Administration by transferring a veterans' benefit program to another Federal agency. Opposition of the Veterans of Foreign Wars to H. R. 6659 is based on the concern of that organization that the bill is an indirect method of raising interest rates on veterans' housing.

The letter which I have received from the Veterans of Foreign Wars follows:

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Washington, D. C., April 29, 1957.

Re H. R. 6659.

Hon. OLIN E. TEAGUE,
Chairman, House Committee on Veterans' Affairs, House Office Building, Washington, D. C.

DEAR MR. CHAIRMAN: I regret the delay in answering your inquiry concerning the above-captioned bill which has been reported by the House Committee on Banking and Currency.

This bill, H. R. 6659, would, no doubt, have an appeal to some veterans who have not carefully thought it through. However, in my opinion, which is supported by our professional staff in Washington, the bill poses a threat to future congressional committee jurisdiction over veterans housing legislation, as well as a threat toward the ultimate transfer of the administration of the veterans' home-loan program from the Veterans' Administration to the Federal Housing Administration.

The VFW will be unable to support H. R. 6659 largely for the reasons stated in the preceding paragraph. In addition, the bill, while offering some preferences to veterans in obtaining FHA insured loans, indirectly increases interest rates to veterans from 4½ to 5 percent. It occurs to me and to our staff that this indirect increase in the interest rate constitutes one of the major objections to the legislation.

The national organization of the Veterans of Foreign Wars has had longstanding policies supporting jurisdiction by the House Committee on Veterans' Affairs over legislation specifically affecting veterans and the dependents of veterans; opposing any legislation which threatens the dismemberment of the Veterans' Administration by transferring the administration of veteran-benefit programs to other agencies; and has opposed specifically any further increase in the interest rate applicable to GI loans for veterans.

Trusting this information answers your inquiry and assuring you that we are continuing our support of your bill to expand and liberalize the direct-loan program for veterans which has been approved by the House of Representatives, I remain,

Sincerely yours,

COOPER T. HOLT,
Commander in Chief.

Broader Facilities Needed in Texas for Mentally Retarded

EXTENSION OF REMARKS
OF
HON. JIM WRIGHT
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. WRIGHT. Mr. Speaker, the Fort Worth Star Telegram has rendered a significant public service in the printing of a series of articles by Blair Justice on the increasingly important, but little understood problem of retarded children.

Under leave to extend my remarks, I am inserting four articles in which Mr. Justice has performed a very sensitive work in portraying the problems of educational facilities and public acceptance and understanding of these children.

THE TRAINABLE—I: MUCH BROADER FACILITIES NEEDED IN TEXAS FOR MENTALLY RETARDED

(By Blair Justice)

The child looking at you in the adjacent picture is a mongoloid. He is what people call mentally retarded. His name is Donnie Biser and he lives at 4324 Donnelly with his parents, Mr. and Mrs. LaVerne Biser. He his a normal 9-year-old sister named Carol Sue and an normal 6-year-old brother named Roland.

Donnie is just one of a number of mentally retarded children who will appear in pictures and stories in the Star-Telegram in coming days.

All will be named. Their parents want it that way. They want society to become aware and, if possible, to accept these children, these victims of mental retardation.

Just what is mental retardation? As the term will be used in this series, it means a brain that has been damaged or impeded in its growth, or for any reason is deficient. Retardation can result before birth—from any of approximately 100 causes including certain diseases, authorities report.

CAUSE IS NOT KNOWN

Donnie is called a mongoloid because his slant eyes and facial features resemble those of the Mongolians of Asia. No one knows specifically why children are born with such a condition.

But the fact is that, like other mentally retarded children, they are born; they are a part of society and there is a decision to be made as to what to do with them.

If you find the subject or pictures "depressing," then the decision will have to be made by others willing to face these children.

As you can see, Donnie has a broad, flat face and coarse features. He also has a thick tongue, stubby fingers, and short arms and legs (all characteristics of mongoloids).

Mongoloids are not representative of all mentally retarded children. Other boys and girls with mental impairment have no physical manifestations of it at all. Some even are extremely attractive and beautiful children. These also will be pictured and written about.

BILL WOULD AID THEM

Why a series on any of these children?

One of the reasons is this: In the next few weeks, perhaps even in the next several days, the legislature of this State has a decision to make. And it is your decision just as much as it is the people who represent you in Austin.

A bill has been introduced to provide public-school funds for mentally retarded children in the so-called trainable group.

There are many interpretations of what trainable means, but it is generally accepted as meaning children who cannot learn (many can never learn to read, write or work any arithmetic). Their I. Q.'s are believed to be between about 25 and 50.

What most can learn is training in self-care, getting along with people, and a limited amount of usefulness to others.

The State already provides Gilmer-Aikin funds to local school districts for the so-called educable mentally retarded. These children, authorities say, can learn up to fifth or sixth grade subject matter by the time they are 16 or 17 years old. Their I. Q.'s are accepted as being between about 50 and 70.

HALF CHRONOLOGICAL AGE

Donnie is one example of the mentally retarded children believed to be in the trainable category.

Donnie's mental age, his mother says, has been tested as being between 3 and 4. That means his behavior and thoughts are roughly analagous to those of a normal child about 3½ years old. Donnie's chronological age is 7½.

Since he can do just about half of what an average 7½-year-old child can do (in test situations), Donnie's I. Q. is estimated somewhere between about 0 and 50 (100 is taken as average).

Unlike the educable child, Donnie and the so-called trainable are never expected to be able to support themselves or be self-sustaining members of society. The best the authorities can tell, these children will reach a mental age of between 3 and 7 at maturity.

EDUCABLE MOST NUMEROUS

Now, the trainable do not constitute the biggest percent of the mentally retarded. The educable are most numerous, according to authorities. (There is yet a third, smaller category called the custodial. These are below the trainable and may be so helpless that the term human vegetable is applied to them by some people.)

The trainable are numerous enough (an estimated 19,970 in Texas) to make training them a fairly costly item to the people of Texas.

But the cost is probably not the major consideration. More important, many authorities believe, are the implications of this proposed legislative action—not only to the trainable but to all retarded children; not only to parents of the retarded but to all of the community.

WON'T TAKE SIDES

This series will neither support nor oppose the legislation concerning the trainable. It will, however, confine itself as much as is feasible to the trainable since it is these children on whom a decision must be made.

The emphasis will be on individual persons, by name and address. What may be said about the children mentioned may not apply to other mentally retarded even in the same group.

If there is one point the best informed authorities seem to agree upon it is this: No two cases of mental retardation are alike. The mentally retarded, like people more

fortunate, are individuals with individual differences.

THE TRAINABLE—II: TEXANS MUST MAKE CHOICE, THROUGH LEGISLATURE, FOR MENTALLY RETARDED

(By Blair Justice)

The boy whose picture you see with this story has learned to recognize his name, which is David Lee Roberts. He is now learning his address, which is 2412 South Jones. David is 7½.

Roger Gilliland, Jr., who will be seen later, is a 17-year-old boy who takes great pride in learning at school this year how to tie his shoestrings.

Jimmy Wrinkle, 16, has learned to talk in sentences. Five years ago when he entered his class his speech was limited to single words, "always whispered," according to his teacher.

These three boys are mentally retarded. Their levels of retardation are believed to be spaced between the severest and the mildest groups. The mentally retarded group in which they are classified is called the trainable.

IN PILOT CLASS

It is for children such as these that a bill is before the funds for special classes.

At present Roger and David are in classes at the Children's Opportunity Center, 3208 Ivey, and Jimmy is in a pilot class at West Van Zandt Elementary School.

The State's Gilmer-Aikin school funds are not available under present law either to the Opportunity Center or the West Van Zandt class for the trainable.

The same applies to the TCU Speech Clinic, where a third program for trainable children is offered in Fort Worth. Donnie Biser, the 7½-year-old mongoloid pictured in the first of these stories, attends classes there.

Roger, Jimmy, David Lee, and Donnie are examples of how those families with children of impaired mentality are coming forward in Texas wanting to know what society is going to do with them.

ON ALL LEVELS

The State is rapidly coming face to face with its mentally retarded—not only the trainable but those on all levels.

Regardless of whether society wishes to keep these children hidden or out of special public-school classes, the fact remains that they are stepping out into the open and are growing in number.

"It is safe to assume that there were almost twice as many mentally retarded children born in 1954 as there were in 1940."

Those are the words of the Board of Texas State Hospitals and Special Schools in its proposed capital budget before the legislature. The board is talking about Texas when it says twice as many mentally retarded are being born.

The reason for the increase is the fact there are twice as many births of all types now.

WHAT TO DO

Where to put the retarded? What to do with—or for—them?

The Austin State School has an 18 month waiting list of applications. These are from parents and guardians who believe institutional care is best for their mentally retarded children.

The big majority of parents try to keep their retarded at home. An estimated 80 percent of the retarded are outside institutions. And parents are coming forward seeking help for their children on a community level.

Each year the problem, both on the State and local level, becomes greater. Besides the rapid increase in birth rate, there are at least two other major factors:

1. New drugs and improved medical care are helping the mentally retarded live longer. Some of these children are particularly susceptible to infections, which formerly killed many in youth. Now antibiotics kill the infections.

2. More and more parents of mentally retarded children are banding together in organizations. They are demanding more care and services for their children.

RECOGNIZING SERVICES

A demand for bigger institutions has resulted from the fact that more parents are recognizing the improved services offered at State residential schools.

The special schools board says 300 new beds are needed for each of the next 10 years. Including auxiliary facilities the cost would be $10 million.

A nursery unit is proposed for housing severely retarded infants who become major problems at home.

"Texas is one of the few States that is not providing services to this group," says the board.

Of the 3,000 beds requested in the next 10 years, 1,000 are proposed for a unit in the Fort Worth-Dallas area in 1961.

State authorities contend that regardless of what action the legislature takes on providing local programs for the trainable, the need for State institutions is not going to diminish.

This series cannot possibly touch on the whole problem of mental retardation in Texas. It is too vast. By concentrating on action proposed for the trainable, it is hoped that some light is thrown on all retarded children in Texas.

Just how many are there of these trainable children?

The truthful answer is: Nobody knows.

The reason why will be in the next story.

THE TRAINABLE—III: MANY RETARDED JUST BEGINNING TO EDGE OUT OF BACK ROOM AND ATTIC

(By Blair Justice)

Until a few years ago Monte Young, now 12, was pretty much an unknown child.

Even if his parents, Mr. and Mrs. Homer Young, of 4210 Broadway Avenue, had no qualms about people seeing that he was a mongoloid, there was no place for Monte to go.

He couldn't go to school; his IQ was less than half that of the average child. He couldn't go to a special public-school class; there weren't any (there is a small one now).

He couldn't run and play with other children. His coordination was too poor and he was shy and timid.

He couldn't go talk with people. His speech was limited to a few single words and sounds.

So Monte mostly stayed at home. Unknown.

WHY NUMBERS NOT KNOWN

This is one of the major reasons why nobody knows how many mentally retarded children there are—particularly how many trainable and custodial (those most likely to stay out of sight of society).

As Walter Jacob points out in New Hope for the Retarded Child, there has never been an accurate and complete census of the number of mentally retarded of any kind.

How could there be? For years society's stigma was so strong that countless children (not Monte, but many others) were kept in attics and back rooms from fear someone might know they existed. Some are still there, authorities feel.

The estimate—or perhaps it should be called a guesstimate—of the National Association for Retarded Children is that 30 persons in every 1,000 are mentally retarded. Four of these 30 are believed to be in the trainable or semidependent group.

CARE FOR THEMSELVES

The trainable are those whose brains have been damaged or lack potential to the extent that the child cannot master such things as reading, writing, and arithmetic. They can be trained, most authorities believe, how to take care of their personal needs, how to be useful around or under close supervision and how to get along with themselves and others.

The Texas State Department of Education told a legislative hearing on the trainable bill that there are an estimated 19,970 of these children in the State, out of a total scholastic population of 1,997,000.

Fort Worth has about 3.4 percent of the State's scholastic population. This would give the Fort Worth area about 678 trainable children.

School authorities here feel this figure is too high. It is based on the assumption that 1 percent of the population is in the trainable mentally retarded group. There is no way of proving or disproving this, lacking a comprehensive census and an accurate means of diagnosing and classifying the mentally retarded.

FIVE HUNDRED ON ROLLS

This much is known: The Fort Worth Council for Retarded Children has on its rolls the names of 500 families in which at least 1 member is mentally retarded.

Only a year or so ago the roster listed 300 names. The increase came simply from people hearing and reading about the council. How many more there are is anyone's guess. No one knows how many of the present 500 are trainable.

Concrete evidence does exist, however, of how mental retardation compares in prevalence with other permanent afflictions, such as rheumatic heart disease, cerebral palsy, paralytic polio, deafness, blindness, epilepsy.

The State of Washington recently completed a census of handicapped children found in seven school districts. Mental retardation ranked first in every district, accounting for nearly three times as many children as any other handicap, exclusive of emotional disturbance.

NOT MENTAL ILLNESS

Mental retardation, it should be noted, is not the same thing as mental illness. Mental illness involves a disturbance in emotions and feelings and the ability of a person to adjust to his environment.

In mental illness there is often nothing wrong with the person's brain as far as its capacity and potential are concerned. In fact, the mentally ill person may be of high intelligence.

In mental retardation the brain is limited and the intelligence below normal. The brain has been damaged, impeded in its growth, or inherently lacks potential. There may be nothing at all wrong with the way it works in its limited sphere.

Some of the causes of retardation (there are supposed to be up to 100) will be discussed in later stories.

HOW MUCH FROM SCHOOLS

A more immediate question is, How far down in intelligence and potential are the public schools to go in their responsibility toward the individual and society?

Where does education and training, in a vocational sense, stop and custodial care in the classroom begin?

There are a number of questions such as these being asked in connection with the legislative bill to put the trainable in the public school classroom. There are a number of answers being given.

This series will try to explore both questions and answers, but to do so it must go to the people involved—to the educators, the parents of the retarded, to the retarded themselves, the community, the legislators, school administrators, the teachers, the people at the Austin State School, physicians, and mental retardation authorities.

THE TRAINABLE—IV: LAW SAYS ALL CHILDREN ENTITLED TO EDUCATION, INCLUDING RETARDED

(By Blair Justice)

If you walked into a public-school classroom and found that only 3 of the pupils—some as old as 16—were capable of writing their name, what would you think?

What if you found that more than half of this class of 9 had received instructions for 5 years and that still only 3 could count to 10?

Would you think that these children couldn't be educated and the public schools had no business with them?

Some Texas school administrations are privately questioning whether mentally retarded children who cannot be taught to read, write, or work arithmetic should be put in the public-school classroom.

PERSONAL NEEDS

The mentally retarded group called the trainable are such children. Authorities feel most can be trained to take care of their personal needs, to behave in an acceptable manner, and to be useful to a limited extent. But the authorities don't believe the children have the mentality to master the three R's.

The class mentioned at the start of this story is not a hypothetical one. It exists at West Van Zandt Elementary School, and the teacher, believing there is more to education than the 3 R's, frankly admits that after 5 years only 1 of her original 5 pupils can write her name without a copy to go by.

Other questions also are being asked in connection with the bill before the legislature providing State funds for special public-school classes for the trainable.

SCHOOL RESPONSIBILITY

Is it right that the time and effort of public schools be diverted toward children who are not ever expected to contribute to society?

Let Ray Graham, assistant superintendent of public instruction for the State of Illinois, answer that one. He has visited the trainable class at West Van Zandt.

Schools, he said, have a responsibility not only to the community and society but also to the individual and his family.

"How can one accept a belief in the American way of life without seeing that the school helps to maintain family unity when it helps with a problem of this kind?" he asks.

"I am convinced that the schools can supplement the home in training these children; the trainable child can improve in his ability to help himself, to care partially for himself, to work and play with others, to speak better, to listen better, to use his hands more effectively, live happily in a small group and inoffensively in larger groups."

ALL ENTITLED

And then there is the individual. What are his rights? What is the school's responsibility toward him?

The school law of the State of Texas in article 2902 states: "All children, without regard to color, over 6 years of age and under 18 years of age * * * shall be entitled to the benefit of the public-school fund for that year." (Note the "All" and the word "entitled.")

Says Chris J. DeProspo, professor of education at the City College of New York: "Thus it would seem to be the function of education in a democracy to insure that all children be given equal educational opportunities."

And what is the view of Dr. J. W. Edgar, commissioner of education for Texas? "Personally," he stated, "it is my opinion that trainable children shou'd have, through public support, full opportunity to develop their potential."

But another question being asked is: Instead of all this effort in behalf of the trainable, who can't contribute to society, why isn't more done in the way of special classes for the gifted who can contribute?

ALL ARE IMPORTANT

Graham's comments: "The democratic philosophy toward children or toward schools will not play one group against another * * * all children are important, and each child is important. There shall be no attempt to classify 'the sheep and the goats.'"

And here is the answer of a man who has a mentally retarded child himself, Dr. E. L. Pross, chairman of speech, drama, and radio in TCU's fine arts department:

"It would behoove the parents of the gifted to seek action for their children just as we are doing for ours." (The gifted are considered to have IQ's above 130.)

Some critics of the legislative action being sought for the trainable speak of it in terms of parent pressure.

"What's wrong with parent pressure?" asks Pross. "Legislation in this country comes only after a need is demonstrated. Who is better qualified than parents to demonstrate a need for this? We live with the problem 24 hours a day."

WEAK CASE

"Every parent who has a child who is atypical is interested in doing something to help him—whether the child is atypical because of polio or any other handicap, including mental retardation.

"We have a weak case in that our children are not likely to contribute to society. We must stand in line and wait. But as a taxpayer, I don't see why my child should be denied facilities just because he has an IQ below 50. There's nothing magic about that line."

(Under State law, handicapped children who are crippled, blind, deaf, or have speech defects are eligible for special education classes supported by the State.)

AMVETS Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS

OF

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, AMVETS has expressed its opposition to the veterans' provisions of the housing bill, H. R. 6659. AMVETS has expressed its conclusion that the bill will not in any manner serve the best interests of veterans and has specifically expressed its opposition to use of the reserve fund of the National Service Life Insurance program for the purchase of mortgages under the FHA veterans' preference program proposed by H. R. 6659. AMVETS has also expressed its opposition to those portions of H. R. 6659 which interfere with the operation of the veterans' housing program under the Veterans' Administration.

The letter from AMVETS to me follows:

AMVETS,
Washington, D. C., April 11, 1957.

The Honorable OLIN E. TEAGUE,
House of Representatives,
Washington, D. C.

DEAR MR. TEAGUE: This is in response to your letter of April 9, 1957, wherein you request AMVETS' views on those portions of H. R. 6659 affecting housing for veterans.

We have studied carefully the provisions of H. R. 6659 as it relates to veterans and have reached the firm conclusion that this legislation will not in any manner serve the best interests of veterans. Rather, it would have the practical effect of destroying the sound veterans housing program already established and being administered by the Veterans' Administration. AMVETS, therefore, must register its vigorous opposition to the so-called veterans preference provisions of this measure.

As you know, AMVETS, in concert with other major veterans organizations, have consistently opposed any increase in the interest rate on veterans home loans. The Committee on Veterans' Affairs has on two occasions this year rejected proposals to accomplish this purpose. Nonetheless, we are now confronted with a bill that will indirectly accomplish this unwarranted purpose. Even more objectionable is the fact that veterans must pay the higher interest rate under a program that lacks the safeguards and advantages of the program being administered by the Veterans' Administration.

In analyzing H. R. 6659, we note that section 205 would authorize the use of $1 billion of national service life insurance funds for the purchase of mortgages under the proposed FHA veterans preference program. It is inconceivable that the Congress of the United States would authorize the use of these funds, admittedly the property of veteran policyholders, for the purchase of 5-percent FHA mortgages when the 4½-percent Veterans' Administration guaranteed-loan program is in need of additional investment capital.

In the report accompanying H. R. 6659, the Banking and Currency Committee has emphasized that they have no intention of interfering in any way with the operation of the GI loan program. This philosophy, while commendable, is certainly not implicit in H. R. 6659. Any veteran who received an FHA veterans preference loan would, under the proposed legislation, be barred from any entitlement under the GI home-loan program. This provision most certainly interferes with the Veterans' Administration program.

In conclusion, Mr. TEAGUE, we of AMVETS reiterate our opposition to the veterans provisions contained in H. R. 6659. We earnestly solicit your active opposition to this measure and your support of an effective substitute that would liberalize FHA-insured loans for all citizens.

Sincerely yours,

DOMINICK L. STRADA,
National Commander.

Statement by Davis Y. Paschall

EXTENSION OF REMARKS

OF

HON. WATKINS M. ABBITT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. ABBITT. Mr. Speaker, the Governor of Virginia has recently appointed Dr. Davis Y. Paschall as State superintendent of public instruction to succeed Dr. Dowell J. Howard, whose death on February 23 was a grievous loss to public education in Virginia and the Nation. I believe that Governor Stanley, in making what he termed "possibly the most important appointment of my administra-

tion" was very fortunate in his choice of Dr. Paschall, who has served in the State department of education for 10 years successively as assistant supervisor of secondary education, supervisor of elementary education, associate director of instruction, and director of teacher education. Thus he brings to the top post in Virginia schools a thorough understanding of the State school system, sound professional training, unusual vision, and the conviction that a sound program of public free-school education must be based upon the fundamental tools of learning—reading, writing, and numbers.

Dr. Paschall received his early education in the schools of Lunenburg County, Va., where he lived on a farm. He has bachelors of arts and master of arts degrees from the College of William and Mary and earned his doctorate at the University of Virginia. He began his professional career as a classroom teacher and principal in the public schools of Virginia.

During World War II he served in the United States Navy as a communications officer aboard a a fleet minesweeper and later in the office of the Chief of Naval Operations. Upon his release from military service, he became field representative of the United States Office of Education for Virginia and then came to the State department of education.

Dr. Paschall is the recipient of the Sullivan award given in recognition of meritorious service to one's fellow man. He is a member of Phi Beta Kappa, Phi Kappa Phi, and Phi Delta Kappa.

He is active in community and civil affairs and is a past president of the Kiwanis Club, past zone governor of Ruritan national, and past district deputy grand master of the 27th Masonic district. He is married, has two children, and teaches an adult Bible class in the First Baptist Church in Richmond.

When Dr. Paschall accepted his appointment he issued the following statement, setting out his philosophy and general views on education, which is one of the finest statements on this subject that I have read:

STATEMENT BY DAVIS Y. PASCHALL

In acceptance of this appointment, I am overwhelmed by a deep sense of humility. It was my high privilege to know and work closely with Dr. Dowell Howard for the past 10 years. His integrity, devotion to duty, and outstanding contribution to education are increasingly felt under the sustained impact of his untimely passing.

I subscribe to the belief he held that we must constantly stress the fundamentals as the foundation of education. Those students planning to enter college should receive proper preparation for such entrance, and those leaving school for active life should be able to obtain in high school practical training of value to them in their field of work.

However much may be said for what should be taught, the effectiveness of instruction is determined by the quality of teaching. The most important essential for any school is that dedicated teacher who really cares and inspires in students a zeal to work, to think and learn; who encourages a respect for thrift, a love of country, a reverence for things spiritual, an appreciation of loyalty, and a sense of gratitude for noble sacrifice—that teacher who sees the old church at Jamestown, the ramparts at Yorktown, the Indian raid sites in the Southwest, and the quiet at Appomattox as mute memorials of sacrificial gallantry to those who valued some things more highly than personal security. To such a teacher we can trust our destiny.

Virginia has an efficient school system. I have visited classrooms from Lee to Accomac, and sincerely believe that we have an able and dedicated body of teachers, supervisors, and school administrators. I feel, however, that what is being done can always be improved, and in seeking this improvement lies our challenge. This challenge can be met if we can muster the wisdom on each problem to recognize those things that can be changed and those that cannot.

Our great school system has been realized through the hopes, efforts, and support of the people. I have a profound faith in the representatives of the people—the legislature and the governor—and our State board of education.

In these crucial times I am deeply aware of the unusually grave responsibility involved in this position. The fact that the problems are deep and complex is all the more reason that we should face them with intelligent study and avoid hasty decisions.

We can meet these problems if we will dispel unwarranted fears and the type of pessimism that lulls us into a do-nothing state of what's the use? We can meet them if we will earnestly strive for a consecrated bond of unity throughout this Commonwealth in the cause of education; if we will display the courage of dedicated conviction; and bring to bear the discipline of reason in all our deliberations.

In reflection on my experience as a farm boy in Lunenburg County, I recall my father's statement when we hitched the mules for a long day in the tobacco field: "Today, we will walk humbly and plow a straight furrow." This, with the help of divine providence, I shall endeavor to do.

The Farm Program—The $12 Billion Failure

EXTENSION OF REMARKS
OF
HON. WILLIAM E. MINSHALL
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 3, 1957

Mr. MINSHALL. Mr. Speaker, the following article, which appeared in the Wall Street Journal of May 6, is most thought-provoking, and I thought it would be of interest to my colleagues. The article follows:

THE $12 BILLION FAILURE

When a Secretary of Agriculture calls 25 years and nearly $12 billion worth of Federal farm programs a failure, it is time for Congress and the country to sit up and take notice.

And that is exactly what Mr. Benson is saying. "These costs undoubtedly would be borne willingly if the program solved the problems, but the problems have not been solved." In particular, he observes, this tremendous expenditure has made little or no contribution to the problem of low-income farmers, in whose name farm programs are frequently defended.

Mr. Benson is not advocating the immediate jettisoning of all Government aid to agriculture; in fact he has not yet explained in detail what revisions he will ask. But he is serving notice, in the most emphatic terms, that unless the United States begins to take a realistic attitude toward farming, the problems will magnify and multiply.

Various forces have combined to cause the failure of Federal intervention in agriculture. One is a technological revolution which has robbed the parity formula of meaning; it is useless to try to compare the highly mechanized, highly fertilized farm of 1957 with the bucolic tract of 1913. This same revolution has also made a mockery of Government acreage controls; per-acre output rises year after year despite the most stringent limitations on the number of acres planted.

But an even more basic reason is the assumption of farm legislators and administrators over the years that they could defy, indefinitely and with impunity, the laws of the market place. The classic instance was the continuation for neary 10 years after World War II of the rigid 90 percent of parity price support system which had been introduced as a wartime measure to spur maximum production of basic crops for war needs.

What happened was what was bound to happen. The time came when these increasingly costly rigid price supports no longer supported farm prices. The surpluses they generated grew so great that prices started tumbling; the prop collapsed under the weight of the burden it was supposed to prop.

Under Mr. Benson, the Agriculture Department wrung from a reluctant Congress as much change as was then politically possible—the substitution of flexible supports within a range of 75 to 90 percent of parity. No one contended that this was anything more than a step toward balancing supply and demand. Still, it was a helpful step; the accumulation of Government gluts began to taper off.

Yet the limited range of flexibility contains its own seeds of failure. The support level goes down when the crops are in surplus, but it goes up as the surpluses are disposed of. This is what now threatens; as supports head back to 90 percent, a new stimulus will be given to overproduction and new surpluses created.

For this vicious circle Mr. Benson claims no doctrinaire solution. Certainly he does not think the soil bank is either a practical or a moral answer; a program which subsidizes nonproduction is contrary to our tradition. He does believe the direction must be toward much lower price supports and away from tight production controls.

In other words, the goal must be a gradual return to a free market in agriculture. No other conclusion, indeed, is possible. Government intervention has been tried for a generation and it doesn't work.

This plain fact may still not move the Members of the congressional farm bloc; they have been ignoring facts for years. But it is a sign of hope that a Secretary of Agriculture has the courage to tell the truth about agriculture.

The Nation, perhaps, could afford this $12 billion. It cannot longer afford laws—and lawmakers—bent on building bigger failures for the future.

Pay Raises for Their Workers Sought by Los Angeles County Postmasters

EXTENSION OF REMARKS
OF
HON. CRAIG HOSMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. HOSMER. Mr. Speaker, the Los Angeles County Postmasters Association

is representative of post offices of all sizes—small, medium, and large. It thus speaks authoritatively comprising, as it does, a cross section of our entire postal system. Many Congressmen and Senators have received a letter from the association recommending increases in pay for postal workers and giving cogent reasons for the recommendation. For the benefit of my colleagues who may not have received the letter, its text is as follows:

'At their regular monthly meeting on March 14, 1957, the Los Angeles County Postmasters Association unanimously approved a motion directing a special committee to address a letter to the chairmen and all members of the Senate and House Post Office and Civil Service Committees informing them of the serious situation existing in practically all post offices in southern California which is becoming more and more acute.

Practically all postmasters in southern California are confronted with a very serious problem that definitely jeopardizes the future of the postal service, is costly, and is very inefficient. This same problem has affected most Government agencies, even the Armed Forces, to an alarming degree. Man cannot live and support a family on loyalty alone; and we cannot expect to recruit competent, loyal, intelligent employees on the meager salary received in comparison with industry, city, county, and State positions. We are getting what we pay for; therefore we experience a 33-percent turnover. In all the cities we have checked, policemen and firemen start in at a salary exceeding the top grade of a clerk or carrier, and have a 20-year retirement plan.

It is the unanimous opinion of the Los Angeles County Postmasters Association of the National Association of Postmasters of the United States that a thorough study of the salary structure should be made immediately to rectify the glaring inequities in order that the postal service will have a definite program to offer to reach the class of citizen that will be a credit to our Government. With this in mind we offer the following suggestions:

1. Today substitutes receive all the fringe benefits allowed regulars, and receive more money; therefore there is no incentive in accepting a regular status. In fact, they actually take a pay cut when appointed regular. It is therefore suggested that the regular position be advanced to the place of respect formerly held, one that substitutes will again look forward to accepting. It is recommended that the starting grade of a regular be raised sufficiently above the corresponding substitute grade to create an incentive to work for.

2. It is suggested that serious study be given to cost of living increases, or area wage, through a wage board such as is now in effect in industry. It is understood that a bill relative to this has been introduced by Congresswoman ST. GEORGE. It must be obvious that salaries on a national scale produce terrific inequalities. The salary received here could have only half the value of the same amount paid in other parts of the Nation.

Many, many words have been used regarding efficiency or inefficiency, economy, etc., but we in the field know that the vast turnover we experience is both costly and inefficient. Until the inequalities existing in our competition with industry, city, and county are corrected, it will continue so. Not alone is the cost a factor, but what is worse is the decline of the high esteem the public has held of the postal service. We cannot long continue to offer excuses for complaints that mount up daily—the patience of the public can be strained only so far. We feel that this is the most vital issue in the post office today, to so set up a salary schedule that we can get young people of intelligence and loyalty eager to become postal employees as a life career. Then, and only then, can we give the service to which the patrons are entitled. It is a tragedy that we pay such a meager salary to the men who, day in and day out, work for the greatest service organization in existence. As vital representatives of our Government, they deserve better treatment. We should endeavor to get the best we can procure of our citizens to carry out this task, and not the leftovers. The time for action is now. Let us not wait until the service reaches an alltime low.

Letter From F. C. Olander

EXTENSION OF REMARKS
OF
HON. CHARLES S. GUBSER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Friday, April 5, 1957

Mr. GUBSER. Mr. Speaker, under leave to extend my remarks I submit herewith for the attention of my colleagues a letter from Mr. F. C. Olander, of Watsonville, Calif., under date of April 10. I consider that Mr. Olander has given an excellent account of the problems facing small business.

The letter follows:

OLANDER'S,
Watsonville, Calif., April 10, 1957.

Hon. CHARLES GUBSER,
House of Representatives,
Washington, D. C.

DEAR MR. GUBSER: It has come to my atten that the Congress contemplates a change in the Fair Labor Standards Act so that the minimum wage for the retail industry would be $1 an hour and that the maximum workweek would be 40 hours per week.

It is true that this proposed amendment at present will apply only to the larger stores, but so did the Federal Unemployment Tax Act start with exemptions for 8 or less employees, and is now down to 4 or more employees. Our State sales tax started at 1 percent, if I remember correctly, and is now 3 percent, and, with the county now assessing another 1 percent, we have the grand total of 4 percent, and Lord knows when this will end.

At the present time, on sales tax alone we are receiving this money, taking time on every sale to collect the proper amount, holding it for 30 to 90 days, and then accounting for it to the State gratis. In addition, if we make an error, we are subject to not only payment, but a penalty is added. Likewise, if we are as much as a day late in reporting and remitting, a 10-percent penalty is added. I know; it happened to me.

I have owned and operated a retail store here in Watsonville for 23 years this month and employ from 5 to 12 people, depending on the season. I have always believed that independent business could and should stand on its own two feet, and that what we lack in huge capital resources, low-cost multiple chainstore advertising rates, carload purchasing power, etc., could be pretty well balanced by personalized attention to our customers and our business; but after examining year after year our increasing costs of operation, increased taxes of all sorts from Government to personal property, and the bookkeeping expenses of collecting and accounting for employees' income tax, unemployment tax, sales tax, to name only a very few, plus the necessity of instituting health and accident benefit plans, and so on, I am now beginning to conclude that we are rapidly reaching the point where, unless some very intelligent thought and consideration, not to mention tax relief, is accorded us, and soon, stores such as mine and its counterparts throughout the Nation will be as extinct as the proverbial dodo bird, either through inability to shoulder the load or in voluntary closing, which has happened recently in our town as well as throughout the country, due simply to the fact that there is insufficient remuneration for the amount of capital invested and the long hours of work necessary to operate successfully.

In short, even though the volume of sales has increased steadily year after year, the increased labor, taxes, and other costs, such as freight, telephone, advertising, supplies, and practically everything else, have increased out of proportion to the profits from these increased sales.

It may be of interest to note that in the so-called soft-goods lines the ratio of selling price to wholesalers' cost is still pegged at almost exactly the same margin as it was some 20 years ago. For example, goods costing $15 to $15.75 per dozen still retail at $1.98 in most stores; $22.50 per dozen at $2.98; $30 at $3.98, and so on, due almost entirely to hesitation of the smaller independent retailer to break these pricing methods in the face of chainstore competition who can and will maintain this ratio as long as is necessary to finally throttle independent competition. But let your independent retailer drop out of the picture, and I wonder how long it will take the large chains to revise this percentage to reflect present-day costs in their retail prices, and at what cost to the consumer.

I feel that I must apologize for this very lengthy letter, and I assure you that it was not intended as such at the start, but I sincerely hope that you and your constituents will keep the problems of the smaller retailer firmly in mind as the aforementioned as well as other legislation comes up.

Very sincerely yours,

F. C. OLANDER.

A Salty Objection to Mr. Summerfield's Rate Proposals

EXTENSION OF REMARKS
OF
HON. CHARLES O. PORTER
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 10, 1957

Mr. PORTER. Mr. Speaker, the appalling fact is that no studies have been made of the potential impact of the rate increases under consideration by the House Committee on Post Office and Civil Service. The Postmaster General strongly endorses the increases but he gives us no information about their economic effect on users of the mails. The increases are a step into darkness and the result may be tragic or near-tragic for many small businesses. The following well-written letter is one of many I have received from small firms which rely on third-class mail:

SALTWATER FARM, INC.,
Damariscotta, Maine, April 22, 1957

Hon. CHARLES O. PORTER,
United States House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN: I have a very simple way of estimating the damage which would

befall this business if the Summerfield rate bill is enacted.

We operate a mail-order business in live lobsters and clams as well as a number of tinned seafoods. It is a small business; it appeals to a specialized group of people who like seafood and like to cook it themselves.

Saltwater Farm was incorporated and began business on May 1, 1949, with an initial capital of $735 and one employee in a building rented for $1 for 3 months (shortly after the conclusion of the rental the building fell into the Damariscotta River, an event which explains the level of rent). The corporation now has its own offices, a shipping plant, and a separate storage plant, as indicated on the letterhead at left, with a regular weekly payroll of 12 to 14 the year round plus additional temporary help at busy seasons.

Audited financial statements reveal that the net profit of the corporation is less than 3 percent of sales, and that the net profit per thousand mailings has averaged $17.04.

Enactment of the 2½-cent rate would cut our net by 58 percent. Enactment of the 2-cent rate would cut our net by 29 percent.

I do not suggest that we would be driven out of business by such rates. In the past 8 years we have survived hurricanes, railroad strikes, 30-below weather, railway express strikes, and many other different kinds of crises. I think that we would stay in business out of pure cussedness.

I would not be interested, however, in staying in a business of perishable luxury foods for a margin of less than 2 percent. I should be forced, therefore, to eliminate all temporary help and at least 6 and possibly 7 jobs here. This reduction would be paralleled by the loss of 1 or 2 jobs at the company which makes our barrels, plus 1 lobster buyer, and other curtailments in the ice company, and so on. I would be reluctant to do this but I think it would be forced on us. I have four hungry mouths and minds at home and cannot, therefore, be much interested in operating a philanthropic institution for the greater glory of Mr. Summerfield.

Do not misunderstand me. I am not a believer in subsidies. If the Post Office Department finds it can't handle third-class mail at a rate economically sound for both mailers and the Post Office Department, I am not going to yell for a handout. But if the Post Office Department can't handle it, then they ought to let me know so that I can save the expense of list maintenance, geographical arrangement, facing slips, postage meter rental, tying machines, and all the other costly items which we must maintain in order to perform all the functions which the Post Office Department requires for third-class mail.

A word or two about this embargo business. Only a word or two because it is so appallingly bad that it's hard to talk about it and keep one's temper. We were planning a mailing in early June; we had to order envelopes, photography, printing, arrange temporary help, and do all the things necessary to bring a mailing to the point when it's ready for the post office. As soon as we have that done we turn right around and try to plan Christmas. If the Postmaster General retains the power to embargo a class of mail any time the whim overtakes him, we might just as well either give up or go on to the reduced basis right away. Supposing the Postmaster General gets a 5-cent, first-class rate and embargoes third-class mail some sunny afternoon in October. We should be faced with the choice of spending $35 more per thousand in order to make $17.04 or not mail at all, thus throwing away thousands of dollars of printing and getting stuck with thousands of dollars of inventory. It is not only intolerable; it's downright silly.

I rejoice to learn of your interest in this situation. If things like this Summerfield business keep on happening up there in Washington I am likely to vote Democratic, or at least split my ticket. You would recognize how seriously I regard the situation by putting such a statement in writing in Lincoln County, where a man can rob a bank, violate the Mann Act, and maybe even eat a South African rock lobster tail and not be considered to have any fundamental defect in his character, until he leaves the Republican Party.

Faithfully yours,

EDWARD A. MYERS.

Hope Springs Eternal

EXTENSION OF REMARKS
OF
HON. WALTER S. BARING
OF NEVADA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. BARING. Mr. Speaker, when I visited Reno, Nev., during the Easter recess of Congress, a sermon was delivered by my sister, Rev. Marjorie L. Baring, which impressed me as being particularly thought provoking. Because of the numerous favorable comments which this sermon has received, I should like to submit a copy of its contents to the RECORD.

The sermon follows:

HOPE SPRINGS ETERNAL

(Easter Sunday sermon by Rev. Marjorie L. Baring)

The message of Easter is a message of hope. I believe that we will all agree that if ever anything appeared dark and hopeless, from the standpoint of worldly circumstances, it was the day when our Saviour underwent the experience of crucifixion. To His disciples who had followed Him faithfully, this sorrowful event must have appeared to be a tragic and ignoble end to their beloved Master's mission. If ever there were despair and discouragement in the hearts of men, it must have been on that day known to Christian followers as Good Friday, when He whom we worship as the Light of the World, climbed the hill to Calvary on the darkest day in earth's history.

This hopeless picture, however, was not the end of the Christian narrative, despite what appearances might have indicated. Good Friday was a climax, really, to a glorious fulfillment that was yet to come. Perhaps you have wondered why the day which commemorates our Lord's crucifixion should be designated as Good Friday. I believe that for us, as students of the truth, there is a lesson to be gained therein, for beyond this day of sorrow, disappointment, and utter despair, lay a day which marked the beginning of an era of hope, promise, and fulfillment. With the resurrection of the Master Jesus on Easter morn, the light of truth returned to the world more resplendent than ever, for a knowledge of eternal life was born in the minds of men. Yes; the light of the world had returned, just as He had promised, and the darkness of Good Friday was dispelled.

Had it not been for Good Friday, there could have been no true realization of the renewal of life, on Easter, and men's minds may have remained in darkness. It would be well for us to remember that out of every trying experience which comes to us, no matter how dark and difficult it may seem, the circumstance carries within itself some element of good. If a lesson is gained from an experience, no matter how painful, then there is an element of good in it. Furthermore, the way that we react to an experience indicates the extent of our spiritual growth.

If it were possible for us to grow into a greater understanding without having to undergo painful experiences, it would be wonderful, but unfortunately mankind does not tend to learn and grow in this manner. Had the world truly believed the message of eteral life which Jesus came to convey, there probably would have been no need for Him to undergo the experience of death, in order to prove the everlastings of life. If we, ourselves, could learn the truth about life, and the purpose of our being here, without having to endure the process of learning by experience, we would be fortunate, indeed. If our minds were totally attuned to God, and our attention turned to introspection, meditation, and prayer, our lives would be devoid of suffering and pain. However, it is because man's attention is not wholly fixed upon God and the realities of His kingdom, that man is forced to learn about life through the school of hard knocks and unhappy experiences. Many times, it is through bitter experience, heartbreak, and desperation that we are brought to center our attention upon God.

Actually, we have come to this earth for the sole and express purpose of becoming aware of our divine nature, and our existence in the everlasting life of God. The purpose of our earthly incarnation is to learn who and what we are. It is through the experiences which come to us in life that we gain this understanding. Experiences are the lessons by which we are ultimately taught the spiritual truths of God. Mankind seldom learns through the experience of pleasure. It is usually through suffering and hardship that man's mind is forced to seek for God, and it is usually in anguish or in desperation that man looks to God for deliverance.

Although experience is the means by which we learn our lessons, sometimes we do not learn enough with just a single sorrow. It is sometimes necessary for the lesson to be repeated over and over again, the circumstances becoming more painful with each repetition, until our lesson is finally gained. Only when the lesson is etched into our hearts, or burned into our minds, or when it becomes a conscious awareness within our being, do we truly rise to a point of spiritual understanding.

Many times we hear people say, "I can't understand why this particular situation has come into my life over and over again." Actually, we will meet the same lesson repeatedly, until our reaction to the experience is such that we will be freed from its recurrence in our lives. If we ask, "Why has this happened to me?" it is evidence that we still have not learned the lesson which the experience offered to us to learn.

Let us take for an example an individual who has had unfortunate experiences in marriage. Simply by divorcing one's husband or wife as an escape from an unpleasant condition does not free the individual from that particular problem. Entering into marriage with someone else might bring the very same condition into one's life again until the necessary inner change has been made within the individual. Only when a change of consciousness has occurred can we finish with a particular lesson or experience, no matter how many changes we may make in our outer conditions or circumstances.

The person who fails in business may continue to undergo that experience again and again, until his state of consciousness is changed. When something happens within him, when he gains a consciousness of success rather than failure, he will no longer be subjected to the experience of defeat.

The individual who has had the experience of great sorrow in his or her life, and who has given way to grief and despair, is liable to meet similar trying situations and circum-

stances, until the attitude of grief and despondency is overcome.

We see then that the experiences of our earthly lives come to us for one purpose. They are the means by which we grow in spiritual understanding. The lessons which come to us by way of experience provide us with the means by which we grow in spiritual stature. We could go on until the end of time, so to speak, reading all of the spiritual books that have ever been printed, and yet possess no real and actual wisdom. A knowledge of spiritual principles is one thing and the ability to exercise them and put them into practice is quite another. Until we demonstrate in our lives the knowledge which we have gained in our minds we do not in any wise possess true wisdom. The possession of wisdom is the outgrowth of putting into practice the knowledge which we have gained, and we acquire this wisdom through the experiences which we undergo.

Not until we can look at every experience, no matter how difficult or seemingly heartbreaking, and recognize in it an opportunity for growth and the means by which we arrive at some element of good, are we freed from meeting the condition again. When we eventually can look upon every experience impersonally, as a spectator looks upon an event or happening, or as a mathematician looks upon a problem to be solved, then we will be free from the effects of so-called bitter experiences. Only as we become detached from a problem can we cease to be involved in it. Now we may say, "That is easier said than done." Yes, this is true, for the only way that it can be done is by discovering who we are. Only when this spiritual secret has been revealed to us can we overcome the problems and experiences which come to us to be solved.

When we truly know and understand that the God who lives in us can never be caught in the realm of things, we have reached a high degree of spiritual understanding. The God who lives in us is greater than any human circumstance. The God who lives in us, the true Thinker, is greater than any human thought—or any human fear. The God who lives in us is unaffected by any outward appearance or circumstance, and is incapable of being touched by suffering, inharmony, sorrow, deprivation or even death.

In seeking a text for tonight's sermon, I chose the subject, Hope Springs Eternal, which is taken from the immortal words of Alexander Pope in his Essay on Man, which reads, "Hope springs eternal in the human breast—Man never is, but always to be, blest." We are not referring here to that kind of hope which is akin to wishful thinking. Frankly, I do not believe that there is anything more discouraging to a practitioner of truth, after working with someone to overcome a certain difficulty or problem, to have that individual reply, "Well, I hope you are right,"—or, "I hope God will answer my prayer." This kind of hope reflects a negative state of mind. It carries with it an element of doubt. The kind of hope that I am speaking of here tonight is that hopeful state of mind which looks to the light, even in the appearance of abject darkness.

The hope which springs eternal (or the hope which springs eternal in the human breast) is a quality of divinity—something which is an eternal quality in the heart of man. There is something deep down, within us, which causes us to look up and beyond the condition of despair—to look beyond the crucifixion to the ressurrection. This quality of hope is the Divine Promise from within which silently whispers to the mind that in spite of the darkness of appearances, some good will come from the experience. It is that attitude of hope which convinces the mind that regardless of seeming difficulties, there is a way out of every adverse circumstance. It is only when we turn from this quality of hope, and listen to the discouraging arguments of the mind, that we suffer.

The eternal quality of hope leads us out from the cloud, and into the sunshine. This kind of hope expresses a positive, and not a negative, state of mind. It affirms the truth of God's goodness, regardless of the negative appearance. It sees God's presence in the midst of any and all indications to the contrary. It keeps its vision placed upon the true and the real, and it lives on in man's heart, inspiring him to press onward and upward toward the light. The seed, planted in darkness, grows up toward the light. We grow through the darkness of earth's trials into the light of God. While the spiritual growing pains may not always be easy, they are tempered when we do not allow the light of hope to dim. Hope such as this anticipates the dawn, after blackest night; the blossoming and flowering of spring, after winter's cold sleep; and the glory of eternal Life, beyond the shadow of death.

Yes, the message of Easter is a message of hope—hope in eternal life. The Master Jesus brought to the world a message of life and hope and immortality. By His exemplification of the victory of life over death, man was lifted out of ignorance into the Light of Life. By pointing to the eternal Spirit of God in all men, Jesus delivered mankind out of darkness into a new level of spirtual enlightenment and understanding, expressed by the Apostle Paul in the words, "Christ in you, the hope of glory." He further states, "That being justified by His grace (the grace of Jesus Christ), we should be made heirs according to the hope of eternal life."

St. John tells us that "God is love." This love of God is within us. Love springs eternal, or eternally, just as hope springs eternally, in the human breast. Love "beareth all things, believeth all things, hopeth all things, endureth all things." The Spirit of Christ in us, is our hope of glory. May each one of us who has been awakened to the Inner Christ, go forth to meet each new experience which comes to us in the spirit of Easter—in the resurrected consciousness—the consciousness which is filled with a knowledge of hope and triumph and life eternal.

Perspective of Germany

EXTENSION OF REMARKS
OF
HON. HENRY S. REUSS
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 30, 1957

Mr. REUSS. Mr. Speaker, under leave to extend my remarks in the RECORD, I would call the attention of the Members to a splendid anthology Perspective of Germany, just published by Intercultural Publications, Inc., in cooperation with the Atlantic Monthly. The anthology presents a cross section of Germany's postwar activity in the fields of art, music, and literature, as well as notes on German history by President Theodor Heuss, an article on Germany Today and Tomorrow, by Chancellor Konrad Adenauer, a piece on German scientific method by Werner Heisenberg, and observations on the political situation by Peter von Zahn, who is widely known in Washington for his reports on the American Political Scene for the German radio network.

Included is a section of beautifully done color reproductions of current German work in the field of art, sculpture, and architecture.

The Perspective series has previously concerned itself with anthologies on India, 1953; Holland and Belgium, 1954; Japan, 1955; Greece, 1955; Brazil, 1956; Indonesia, 1956; and the Arab World, 1956. Its publication is made possible through grants from the Ford Foundation to Intercultural Publications, Inc., a nonprofit corporation.

Perspective of Germany gives Americans a sense of the remarkable recovery made by Western Germany from the ruins of 1945, not merely in the material sphere, but in the cultural sphere as well.

Chancellor Adenauer concludes his contribution with this sentence:

I hope from the bottom of my heart that the Germany of tomorrow will be a unified and free Germany, able to perform important functions within the European union and making its full contribution to the peace and welfare of the whole world.

Americans everywhere will wish to join the chancellor in that hope.

Perspective of Germany is obtainable through Intercultural Publications, Inc., 60 East 42d Street, New York 17, N. Y., and can also be obtained at most bookshops and drugstores.

Governor Landon States That Rules and Regulations of the Federal Communications Commission Should Be Modernized

EXTENSION OF REMARKS
OF
HON. EDWARD H. REES
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. REES of Kansas. Mr. Speaker, under unanimous consent granted by the House, I am including a statement of Alf M. Landon, of Kansas, former Governor of our State. This statement was submitted by Governor Landon before a Senate Small Business Committee on April 29, 1957. Governor Landon calls attention to the needs of modification of rules of the Commission in respect to the operation of daytime radio stations throughout the country. Governor Landon's statement follows:

I am Alf M. Landon, of Topeka, Kans. I am the owner of fulltime Radio Station WREN, of Topeka, which operates on the regional channel of 1250 kilocycles with power of 5,000 watts. I also own a daytime-only station at Liberal, Kans. (KSCB) which operates on the class III regional channel of 1270 kilocycles with 1,000 watts. KSCB was built and went on the air in 1948. I have been a resident of Kansas since my boyhood and served two terms as Governor of the State. I have been active civicly and politically for many years.

I have been a member of the Daytime Broadcasters Association since it was first organized in January of 1954 because I feel that the aims and objectives of the organization seeking fixed and extended hours for the operation of the Nation's daytime radio stations are in keeping with the great need for additional radio broadcast service on the local level. I regret that I am unable to at-

tend the Senate Small Business Committee hearing in person to make this statement.

The State of Kansas has a population of 2 million people and we are served by a total of 46 standard AM radio broadcast stations. Twenty of these 46 stations are licensed by the Federal Communications Commission to broadcast only from local sunrise to local sunset. Sixteen of our Kansas daytime-only stations are located in communities that have no other standard broadcast facility on the local level. In these 16 communities, there is a blackout on local radio service when the sun goes down.

Liberal, Kans., is located near the Oklahoma-Kansas border in Seward County in southwest Kansas. The news and information as well as the many public service programs broadcast over KSCB is of vital interest and importance to the people of southwest Kansas and part of the Oklahoma Panhandle.

The rules and regulations of the Federal Communications Commission under which we are forced to operate today are basically the same as they were when first adopted some 25 years ago. Then, there were only some 600 radio broadcast stations serving the entire United States. Now there are over 3,000 stations serving the Nation. Forty percent of these 3,000 stations are licensed to operate during the daytime only.

The radio listening habits of people have changed during this quarter of a century. Many people much prefer a local radio service, a local radio service with stable hours of operation. What kind of a business is it that can adequately serve the people by having their hours of doing business changed every month throughout the year? It is Government's business to keep atuned to the needs of our people and then to administer our Nation's resources accordingly.

The daytime radio stations of the United States have tried for years to get the Federal Communications Commission to consider this matter of hours of operation, with an open mind, and the possible modernization of their rules and regulations to better serve in the public interest, convenience, and necessity.

The present rules of the Commission are antiquated and archaic, serving the large vested interests in the radio broadcast industry and not the public interest. My little daytime radio station at Liberal, Kans., is typical of over 700 other daytime stations throughout the United States which represent the only local radio advertising medium which hundreds of local merchants can economically afford to use. Practically all of the advertisers on KSCB at Liberal are small businesses. Any advertiser is reluctant to buy time and try to establish a radio advertising program in the late afternoon or early morning at times when he cannot establish the audience the year around. I heartily endorse the petition now before the FCC requesting the year-round fixed hours of 5 a. m. to 7 p. m. for the daytime radio stations. It is a step in the right direction to better serve the absolute needs of several million people in small cities and communities throughout our Nation.

I sincerely hope that the Senate Select Committee on Small Business will take the necessary steps to bring about prompt action on the part of the Federal Communications Commission and a solution to this problem which directly affects thousands of small businesses in America including both the small daytime radio stations and the small businesses which depend upon them as an advertising medium. A positive, affirmative solution to this problem by the granting of fixed and extended hours of operation for daytime stations is also in the best public interest. What little interference that might be caused in certain areas during the 2 or 3 winter months would more than be outweighed by the tremendous additional service that would thus be rendered to thousands and even millions of people on the local level.

It's Time To Curb the Supreme Court

EXTENSION OF REMARKS
OF
HON. OVERTON BROOKS
OF LOUISIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 2, 1957

Mr. BROOKS of Louisiana. Mr. Speaker, under leave to extend my remarks I present herewith an editorial which appeared in the Wednesday, May 1, 1957, issue of the Shreveport Times. The editorial speaks for itself and is as follows:

IT'S TIME TO CURB THE SUPREME COURT

It's about time for Congress to start drawing up some constitutional amendments defining and limiting the United States Supreme Court to the authority and responsibilities obviously intended for it by the writers of the Federal Constitution, and perhaps also to draw up some new legislation along the same line for the lesser Federal courts, all of which come under congressional jurisdiction.

Unless the Federal judiciary is curbed in this way, it seems likely that basic American freedom will simply be crumbled into meaningless dust by Federal court decisions, particularly at the highest level.

Two decisions handed down by the Supreme Court Monday—one dealing with integration and one with questioning of suspects concerning their part in or knowledge of Communist activities—may be law and may be constitutional. But, if so, they also demonstrate very clearly the need for something to be done by Congress both constitutionally and legislatively in connection with the Federal judiciary.

In one decision, the Supreme Court ruled that Girard College in Philadelphia, a privately financed institution which never has received a penny of municipal, county, or State money, could not deny admission to Negroes, although all of its operating money is from bequests left by a man who specified in his will that the institution was to be operated solely for "poor, white, male orphans."

Girard College was created through money left by Stephen Girard, who died in 1831. He designated the City Council of Philadelphia as administrator of funds for the college. In time the City Council of Philadelphia became so rotten that the State legislature stepped in and created an organization called the Board of City Trusts to administer any trust funds left to the city of Philadelphia.

Members of the board were to be and are appointed by the Board of Judges of the Court of Common Pleas of Philadelphia. Most of the members are businessmen, plus a few municipal officials. It administers two or three small trusts in addition to the Girard College funds, but the latter constitute its only big activity.

(Incidentally, part of Mr. Girard's original fortune consisted of 210,000 acres of Louisiana land in the vicinity of Monroe. About one-third of his estate was left to various charitable projects in New Orleans.)

The Supreme Court now has held, in effect, that Mr. Girard did not have a right to leave his money to charity of his own designation and in manner of his own desire. It contends that since the present administrative body of the college was set up by the State legislature, the college is an educational agency of the State and thus is subject to the Supreme Court's decision that no person may be excluded from a school because he is a Negro.

That is certainly farfetched and roundabout argument, even though it may be legally correct. If the Supreme Court can destroy charitable intent established by a man more than 125 years ago through the technicality that somewhere along the line a State legislature assumed authority to rearrange administration of a portion of his estate, why should the Court not go a step farther and rule on any or all charitable bequests by any individual?

Why should it not say that a man cannot bequeath money to the cancer fund unless he bequeathes money to the polio fund, since both are for the benefit of mankind?

There is another point: In many cities—including Shreveport to a small extent—there have been movements to establish special trusts to which persons of wealth could leave money, to be used for public welfare, with designation by the donor as to how the money was to be used. The Supreme Court seems to have ruled, in effect, that this cannot be done except under certain conditions of social philosophy established by the Court without benefit of statute or approval by the people.

In another decision Monday, the Court ruled that aliens who are being deported cannot be compelled to answer questions about their Communist activities or associations. In other words, if the Communists sneak some spies into the country under the immigration laws and they are discovered, the FBI cannot try to compel these spies to give information as to their activities. Aliens are not citizens of the United States and aliens being deported have no claim upon the United States or its rights or freedom or liberties.

The Supreme Court says that what it has done is in accord with the Constitution. Obviously it is high time to do something about either the Constitution or the Court.

How Much Money?

EXTENSION OF REMARKS
OF
HON. WRIGHT PATMAN
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. PATMAN. Mr. Speaker, I wish to include and commend to the attention of the Members an article entitled "How Much Money?" which appears in the March 1957 issue of the Progressive.

This article, written by Dr. Seymour E. Harris, chairman of the department of economics at Harvard University, deals with one of the most vital issues of our day. Dr. Harris is well equipped to write on this issue of monetary policy. He is one of this country's outstanding economists. He is the author of countless economic texts as well as a history of the Federal Reserve System. But Dr. Harris is more than just an academic theorist. He is a man who speaks out on the great social issues of the day. I sincerely hope that Dr. Harris' analysis of the monetary issue will receive the careful study it deserves by the Members of this body.

The article follows:

HOW MUCH MONEY?

(By Seymour E. Harris)

How much money do we need? Who should control the supply? These questions

recur explosively throughout all our history—and are very much with us again today. In the great debates over the Second Bank of the United States in Andrew Jackson's day of the 1830's; in the second quarter of the 19th century, the era of the Bimetallists and the Greenbackers; in 1920–21, the year of the Wall Street conspiracy, in the years of the great depression, when President Hoover would reduce the supply of money drastically by cutting expenditures and increasing taxes and Treasury Secretary Andrew Mellon would liquidate labor, liquidate stocks, liquidate the farmers * * * when the people get an inflation brainstorm, and finally now in 1957 when the Government, fearful of inflation, is trying to get interest rates up—in all these years the crucial issue has been, How much money and who should control the supply?

Why so much concern over the supply of money? The answer is that in a modern economy the supply of money determines to a great extent the volume of output and its distribution. Without money the employer is unable to hire workers and the consumer is unable to buy goods and services. If the supply is inadequate, there is less money to speed the movement of goods, and prices tend to fall. Falling prices brought on by deficiencies of money is one disease that the capitalist system cannot long endure; for then the businessman loses money and reacts by laying off workers, who in turn spend less, with the result that largr losses are incurred with further reduction of jobs.

Over all our history the so-called inflationists—those who demand more money and prefer the danger of inflation (rising prices) to the danger of deflation (falling prices)—seem to have had considerable success. In 150 years our monetary supplies increased by 3,500 times compared with rises of 400 times for national income and 28 times for population. (Money, by the way, includes not only paper money and coins but also deposits in banks which are subject to check. In fact, the last is by far the most important and accounts for most transactions.)

The Federal Reserve Board and the Federal Reserve Open Market Committee are entrusted with the responsibility of controlling the supply of money. Their technique consists of two devices: (1) open-market operations to increase the cash reserves of member banks, which in turn largely determine the amount of money the banks create by lending; and (2) manipulation of the rediscount rate, a tool used to force member banks to borrow from the Reserve bank at higher rates in inflationary periods and thus induce them to discourage borrowing by themselves making loans at higher rates.

In the 1956–57 debate over monetary policy, the Democratic Party generally has been critical of the restrictive policy of the Federal Reserve, and the Republicans generally support this policy. This is consistent with their roles in American history. The Democratic Party has always been the party of the little man, the debtor, the worker seeking a job or access to a new business through the use of credit. The Republicans have been in command in the great deflations of American history. In 1866–93 commodity prices declined by 43 percent. The Republicans were in power in all but 4 of these years. In the record deflation of 1929–32, it was President Hoover who was in the White House.

The interparty difference in monetary policy stems from a fundamental difference in ideology: The Republicans are the party of property and savings, whereas the Democrats are the party of jobs and protector of the debtor class. It is this latter group which is injured when prices fall, for it is forced to pay its debts when money is scarce—in dollars of higher purchasing power than those it borrowed.

Since the great depression the Democrats have tended to stress the objective of rising output more than price stability. This does not mean they do not want a stable monetary unit. Far from it. But they are also aware that the attainment of a rising output may necessarily be accompanied by some inflation. Then a choice has to be made. They are ready to pay the price of a modest dose of inflation, say a 3-percent increase of output annually against a 1-percent increase in prices—a proportion not greatly out of line with the history of the last 8 years. But they would be most unhappy with an inflation of, say 5 percent for each 1-percent rise in output.

Secretary of the Treasury Humphrey has often commented that the large rise of prices in the years 1939–42 resulted in robbery of savers. He has promised many times that this would not prevail under the Republicans. But his is not exactly a fair appraisal. The great inflations have been war-induced and are not the product of any one party's economics or ideology.

For example, expenditures in the course of 4 major mobilizations accounted for $528 billion, or 65 percent of all Federal expenditures over 163 years. In this same period, war or associated outlays absorbed $656 billion, or 80.5 percent of all Federal outlays. Moreover, 3 major wars account for 92 percent of the peak debt. In wartime, with its concentrated need of resources and the slow expansion of tax receipts, the Government has to depend heavily on monetary expansion to pay its bills, thus creating inflation. (The banks manufacture money which they lend to the Government to pay its bills.)

In early 1955, the Eisenhower administration embarked on its hard-money crusade. This was a surprise, for in both December 1952 and March 1953 the Federal Reserve Open Market Committee had found no sign of inflation. In looking back, I find no inflationary dangers justifying strong anti-inflationary measures. The price level had been surprisingly stable for 2 years; the Federal Reserve had reduced margins on stock market loans, thus encouraging speculation—a policy scarcely to be expected in an inflationary period; and despite later claims of dangerous accumulations of inventories, I could find little evidence of such a trend.

Why then did the administration suddenly find it necessary to increase the yield on Government securities by a greater percentage than in the previous 7 years? Why did the Federal Reserve at this time support the Treasury's hard-money policy? The answer lies partly in the events of recent history and partly in the views and attitudes of the new manager of the national debt, Randolph Burgess, Under Secretary of the Treasury.

Burgess has been one of the leading bankers in the country. He had been in the forefront of the groups fighting for what they called a free market for securities. This school believed that the Government had been issuing excessive supplies of money for years in order to keep long-term Government bonds at a price which would yield only 2 percent. Whenever the price tended to fall below what corresponded to a 2 percent yield, the Federal Reserve, under orders from the Treasury, would bolster the price of Treasury securities through the issue of additional money. But since the issuance of money was involved, this meant not only that the price of bonds was maintained but also that inflation was encouraged. Indeed, in 1951 under pressure from financial groups and others fearing the inflationary effects of these policies, an accord had been signed by the Treasury and Federal Reserve.

It has not always been clear just what this accord meant. To some, including Burgess and the President, it has apparently meant the independence of the Federal Reserve from Treasury control or, as the President has said, an independent Federal Reserve. This has not been my interpretation. The accord meant to me merely that the interests of the Treasury were not to determine monetary policy. Rather the Federal Reserve, the Treasury, the Housing Administration, and other interested agencies would determine policy on the basis of the best interests of the Nation.

The Accord also implied that monetary policy once more was to be flexible; that is, rates were to move up in periods of inflation and down in periods of depression. Hence monetary supplies would decline in periods of rising prices and increase in deflationary periods. But the idea that the Federal Reserve was to be independent strikes me as absurd. Once we admit that the Government has a responsibility for the health of the economy, we cannot subscribe to the theory of independence. The Federal Reserve, then, has to work out common policies with other branches of the Government to achieve such objectives as stability, growth, and equity.

Burgess seemed to believe in the independence theory; but in 1953 he appeared to take the lead in pressing the Federal Reserve into establishing a so-called free market for money. By offering securities at higher rates of interest, he hoped to induce investors to take more securities and thus make the security market independent of the issue of more money and free it from dependence on buying by the banks, a process which in turn resulted in increased supplies of money.

Despite the hard money policy, the Treasury failed to achieve one of its major objectives. In the years 1952–54, the banks continued to hold on to securities, and the Treasury was less successful in getting the banks to dispose of and the public to purchase them than the Democratic administration had been in the years 1945–52, when there was no recourse to a policy of higher rates.

In general, the Eisenhower administration depended much more on monetary policy than had the Truman administration. This is easily explained. The Democratic Party has always been more disposed to depend upon Government to stabilize the economy and help it grow than has the Republican Party. Since the potent weapons for control of the economic system are fiscal and monetary policy, and since fiscal policy implies the application of tax and spending policies to stabilize and stimulate the economy, the Republicans would be more disposed to use monetary policy—especially where monetary policy is interpreted as following the laws of supply and demand. Indeed, the originators of modern monetary policy in this country were the Democrats who established the Federal Reserve System over Republican opposition. But by the 1950's the Democrats had deflated monetary policy as a sharp weapon and were concentrating on fiscal policy.

By 1955 the leading Democrats had learned the lessons that Keynes, Hansen, and others had been preaching for a generation. In an able report the subcommittee of the Joint Congressional Committee on the Economic Report in 1955 said without quibble that the Government should spend more and tax less in periods of depression and spend less and tax more in periods of inflation. This committee also made it clear that fiscal policy is more effective when it places greater dependence upon income and similar taxes that automatically respond to changing economic conditions. The income tax is to be preferred to excise or property taxes not only on grounds of equity but also because it moderates economic fluctuations. For example, the fact that in the recent rising prosperity the yield of the productive income tax rose in response to higher incomes meant

that the inflationary trend was automatically checked to some extent because potential spending power was drained off by taxes.

Contrast these views with those of Secretary Humphrey and his friends. According to the Secretary, unless Federal expenditures are cut substantially in the years to come, we shall have a depression that will make our hair curl. He would resign, he said, should the Government resort to deficit financing in order to cope with depression. But the modern economist favors tax cuts when the economy is declining, with the result that more money is left in the hands of the public and spending is increased just when it is needed. The Secretary subscribes to an entirely different theory: when the economy is unusually prosperous so that a budgetary surplus is in prospect, taxes should be cut. Thus, the Secretary argues that when consumer spending is already too high, we should provide opportunities for the public to spend even more.

It is no wonder that the administration's anti-inflationary policies have not been highly successful. It depended excessively on the weaker weapon, and it did not even use this weapon effectively. In a way this was fortunate; for had it succeeded in its aims, it undoubtedly would have deflated the economy. In 1953–54 the administration drastically cut public expenditures and also introduced a hard-money policy. This was more than the economy could take, for both policies reduced spending; and in 15 months we experienced a decline of $15 billion of income instead of the expected $15 billion rise. This $30 billion error led the administration to reverse its monetary policy.

But in 1956, the Federal Reserve introduced a dear money policy once more. This time there were signs of inflation: the state of the stock market, the scarcity of raw materials, the wage-price spiral, and the large rise of prices in industrial markets which would have been much more serious in the absence of the decline in farm prices. Much more concerned with inflation than with the possibility of unemployment, the administration directed its major effort, as might be expected, on a rise of rediscount rates and attempts to keep reserves of member banks low. The objective was to raise the price of money—the rate of interest—and thus discourage borrowing and keep the supply of money from rising. Indeed, from 1953 on, the authorities were successful in keeping the supply of money down. In the first Eisenhower administration, it rose only about one-third as much as the relative rise in gross national product (GNP). This is an unusually slow rate of increase in the supply of money, and therefore one may be surprised that the economy moved ahead as well as it did in these years.

Failures of monetary policy rather than successes were responsible for this result. What happened was that as the Federal Reserve restrained the commercial banks, other financial institutions expanded at a dizzy rate. Insurance companies, finance companies, savings and loan associations, and especially the Federal credit agencies increased their activities enormously. In fact, from 1952 to fiscal year 1958 (estimated) loans and guaranties of Federal institutions will be no less than from $40 to $85 billion, an increase of 112 percent. Apparently the Federal Reserve did not let the various Federal agencies like the Federal Housing Administration and the Veterans' Administration in on the secret that they were forcing retrenchment. It was fortunate indeed that these branches of the Government were not on speaking terms. If they had been, our gross national product would be considerably less than the present $412 billion.

Perhaps the most important issue involved is the wisdom of a dear money policy. The objective, of course, is to increase the price of money in order to keep down the supply. But a reduction in the supply of money incites protests from those who are pinched by the resulting reduction of money, absolute or relative. The Government suffers, as is evident in the price paid for borrowed money. Secretary Humphrey admits that the rate of interest on Treasury issues rose from 2.49 to 2.67 percent in 1956. The cost of financing the national debt rose from $6.5 billion in fiscal year 1953 to an estimated $7.35 billion dollars in fiscal year 1958 (year ending June 30, 1958). With the public debt roughly equal in these years, the rise in interest charges becomes roughly 13 percent. Another way of looking at the problem is to compare the rates in vogue before the present administration came in with the long-term rate at the end of 1956: the rise was about seven-tenths of 1 percent, or a rise of 25 percent from the 1952 rate of 2.7 percent. That means once the entire debt is subject to refinancing at present rates, the cost of financing the rise in the same debt would be up about two billion dollars (average maturities are about 4 years).

This is an embarrassing development for a government which came to power on an economy program. A major increase of close to $1 billion a year, which might well rise to $2 billion, is to be found in the cost of financing the national debt. This is the administration that refused until recently to allow significant increases on the civil benefits budget despite the growth of the economy and the rise of prices. Another source of embarrassment is that the rise in rates has been concentrated on the large investors. Small investors, purchasers of E bonds, receive the same interest they did in 1952. Yet a purchaser of these bonds in 1944 would receive back in dollars of stable purchasing power 60 percent of what he invested (aside from the interest) and his compensation in higher interest rates would be only the slight increase granted in 1952. He receives no compensation for the rise in prices or the increase of interest rates of about 25 percent since 1952.

The large borrower is relatively unhurt by the increase in rates and the restraints on the manufacture of money. Large corporations have large surpluses and liquid balances and, moreover, have access to the capital market. Small borrowers—including farmers, home builders, and small businessmen—not only pay much higher rates from the beginning. They are the ones most likely to be squeezed out once the supplies of cash become scarce.

Many students raise the question whether the way out is credit restriction through higher rates. Inflationary pressures arise not only as a result of increases in the supply of money in relation to limited supplies of labor and raw materials and other factors of production, but also as rising wage rates followed by rising prices bring inflation directly. In response to the pressure of rising output and the wage-price spiral, the supply of money somehow responds. The history of the last few years suggests that the monetary authority finds it most difficult to withhold money under these conditions. Perhaps what is necessary is a more conservative wage-price policy. The rise of wages should be tied, for the economy as a whole, to rising productivity, and price rises should be related to the actual increases in costs.

In summary, monetary policy since 1952 has been no great success. In the first place, it was used clumsily in 1953. Second, the failure or incapacity to deal with the financial intermediaries has largely nullified its effects. Third, too great a burden was put upon monetary policy, in part because of unwillingness to make adequate use of fiscal policy and in part because of the inflationary effects of other Federal policies. Fourth, even when rates have risen, the authorities time and again, both in 1953 and 1957, have refused to assume the responsibility: they were merely reflecting market conditions, they insisted. Fifth, they have shown little concern over the inequities involved in rising rates. When some flexibility of money rates is needed, the managers of our economy must assume some responsibility for assuring the Nation that the effects will not be a diversion of capital to speculators against home builders and municipal authorities forced to borrow to build schools.

Social Justice Award to Senator Herbert H. Lehman

EXTENSION OF REMARKS
OF
HON. EUGENE J. KEOGH
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. KEOGH. Mr. Speaker, I have been requested and I am pleased to insert in the RECORD the following thoughtful and studied speech by former Governor and Senator Herbert H. Lehman made by him on the occasion of his acceptance of the social justice award of the Religion and Labor Foundation, Inc., at a luncheon held at the Sheraton-Astor Hotel in New York on Wednesday, April 24, 1957. It is as follows:

Thank you for your award. I appreciate it deeply. I know it to be a recognition not of me, personally, but rather of the principles with which I have been identified through the years. These principles have supported me more than I have supported them.

I am sure that all of you here today acknowledge these same principles. Indeed, the organization under whose sponsorship we are assembled is dedicated to translating these principles into a program of educational action.

Of course, action is the true test of principles. It is easy enough to pay compliments or to give lip service to liberal principles. But these principles have on meaning unless they can be translated into specific decisions and actions, in specific situations.

The subject of intergroup relations, to which this Foundation is dedicated, presents one of today's greatest challenges. To meet this challenge—of conflict and threats of conflict—many decisions and actions are called for.

Recent major developments in the field of civil rights and in the field of labor relations, among others, confront us with many hard questions which, in themselves, constitute a test of our principles.

Let me recite just few of these questions.

Are we for the total elimination of segregation in housing as well as in public schools? Are we, of the North, prepared to abolish segregation patterns in residential areas in our cities? Are we willing to make the walls of Harlem come tumbling down—and the walls of all Harlems in all cities?

Are we ready to fight for truly full equality for all those now being discriminated against, and for the elimination of all forms of segregation and discrimination?

The American people will have to answer these questions in the months ahead. Our national leaders will have to answer them. We liberals will have to answer them.

Hard questions are coming up, too, with regard to organized labor and its relationship to the general public—questions which arise from last year's hearings of the Douglas subcommittee, as well as from this year's

more highly publicized hearings of the McClellan committee.

What should the public do to help labor clean house, and to keep a clean house, both with regard to union operating funds, and to union pension and welfare funds?

What should the public do about those labor unions which are not democratically controlled, and which are, in fact, under the total dominion of self-perpetuating cliques and hierarchies?

These are only two questions out of many in this field which call for sober study, consideration, and reply.

All these questions and many others are arising as a result of concrete events and developments. The events are asking the questions. The questions are not political. In fact, they are scarcely heard at all in the political or public arena where such questions are rarely asked and never answered. Indeed the general public is largely unaware of both the questions and the answers.

The public's lack of awareness is the real danger. It has been said before—and I say again today—that one of our great national handicaps lies in the fact that today the general public is in the grip of an unjustified complacency—living in a dream world of peace, security, and prosperity.

Many, if not most, Americans, act as if they lived in isolation booths like those on the $64,000 Question program. The national atmosphere is heavy with lethargy and escapism. The chief emphasis of today is on not worrying about what might happen tomorrow.

Who is to blame for this apathetic spirit among our people?

Our political leaders, in both political parties, can be given some share of the blame. Most of them do not lead. They follow. They follow the polls—the Gallup and the Roper polls—and the Trendex and the Nielsen ratings.

Madison Avenue, and all it represents, including the radio and television industries, has had a considerable part in bringing about the present situation.

The merchandising, sloganizing, and commercializing techniques developed on Madison Avenue have now been ingrained into almost every phase of organized life in America—politics, education, recreation, even religion.

Packaging has become a national mania, for ideas as well as for commodities.

And in regard to ideas and proposals for action in all fields, the warning sign has gone up: Beware of inciting controversy. "Controversial" has become a word of damnation.

Successful conduct is being defined as safe conduct. Be all things to all men. Appear bold and courageous, but at the same time appear to be cautious, conciliatory, and peaceloving. It does not matter what you are, but only what you appear to be.

Perhaps the picture I have drawn is too harsh. But it reflects a true and steadily developing condition.

I want to emphasize that my remarks today are without political intent. They are nonpartisan.

The faults I have mentioned are too deep to be ascribed to any one administration or political party. If one party and one group of leaders bear a greater share of the blame, it is merely a question of proportion. My protest is against the whole.

I believe that what is mainly lacking from the spirit of these times, and from our conduct of social, political, economic, and foreign affairs, is a true sense of purpose and direction. We really do not know where we are going, or why. The protection of the status quo has become a major motive of our national policy. We theoretically favor some changes, but are unwilling to do anything or to take any risks to bring them about.

Thus, abroad, we have been less a leader of decision and action than a merchant of compromise and delay.

In most situations, our national tactic is to avoid responsibility for action and to urge our friends and allies to delay and postpone action, even in the most intolerable of situations, in the hope that, in time, the situation will resolve itself. Usually the situation does not resolve itself. Usually it grows worse and eventually confronts us, and the world, with a crisis.

Up to now, America has been able to avoid a true resolution of the many crises which have gripped and shook the world—in Indochina, Formosa, Hungary, Suez, and Sinai. Temporary truces and other standstill arrangements have helped ease the crises. But definitive solutions have been postponed, along with the inevitable and still-scheduled days of reckoning.

The overall result for us in almost every such crisis was to sacrifice a little more of our prestige and of the respect in which we were held in the world.

The cause of freedom and democracy has thereby suffered. The purposes of totalitarianism and tyranny have thereby advanced.

Recently we brought all our influence and power to bear against Israel to force a return to the status quo in the Middle East. We did this in the name of law and order, despite the fact that the status quo was a condition completely characterized by illegality and disorder.

What was the purpose behind our policy? Our officials said it was a moral purpose, to support the U. N. But it was a moral purpose to support the dictator Nasser, and his ally, Soviet Russia, in their murderous designs against free and democratic Israel? Was it a moral purpose to restore to Egypt the power to blockade Israel in the Suez Canal, and to guarantee to Nasser and the Kremlin final authority over the canal?

I say that this is morality turned upside down and inside out.

Usually our policy has been on the negative side. Less and less do we apply the totality of our power and influence for any leading purpose. Occasionally, as in the recent case of Israel and Britain and France, we do turn our power on our friends, but seldom on our enemies.

How shall the cause of freedom and democracy prevail; how shall the great principles to which we adhere prevail, if this be the attitude and policy of the United States?

Meanwhile, we are wasting the most precious thing left us in the world today—time and opportunity.

Why is all this so? I have a theory. I have already suggested that the trouble with our policy, both at home and abroad, is that it reflects no central purpose or design. I would say further that our policy has no firm core of morality or moral purpose.

If our present policies had such a moral core, it would transform everything.

Abroad, it would range us immutably on the side of freedom and democracy. The United States would have a realistic and flexible foreign policy without its being either devious or unpredictable.

If our domestic policy had a firm moral core, there would be no question concerning the future course of events in the field of civil rights. The executive and the legislative branches would then surely rally, despite all practical obstacles and opposition, to the aid of the judicial branch in pressing for the rule of law and the supremacy of human rights over all other considerations.

Victory would then soon come in the struggle for the right to vote, for the right to be free of the fear of lynching and mob violence, for the right of equal opportunity in employment and in education, and for all the rights enjoyed by all other American citizens, under the Constitution of the United States.

All of this would happen, in my judgment, if the Government and the general public advocated and supported a civil-rights policy centrally influenced by moral purpose.

If public policy toward labor had a firm moral core, there would be no miscalled right-to-work laws, which are, in fact punitive statutes designed to weaken and cripple labor unions. And to help cure the abuses within the labor movement, labor would not be afraid to ask Congress to set up statutory safeguards to help protect labor unions against the betrayals of the dishonest and the unscrupulous, and to help promote democratic practices within the unions.

I believe that today labor is understandably loath to make such proposals since it can be realistically anticipated that any labor legislation passed by this Congress would contain repressive provisions aimed not at helping labor, but at strangling and destroying it.

This situation would not obtain if our people, as a whole, had a dynamic and prevailing moral purpose.

If the executive and the legislative branches of the Government had such a prevailing moral purpose, an adequate priority would be given to the wholesale revision of that un-American and inhuman immigration and citizenship law, the McCarran-Walter Act.

Within recent days, the mere threat of delay in the delivery of mail was enough to spread screaming black headlines across the Nation and to force an emergency appropriation by Congress. Yet the delay of months and years in the emigration of parents and children from abroad to join their loved ones in this country, a delay resulting from the McCarran-Walter Act, gets little national attention, and no action whatever by Congress.

Yes, in these and other ways the policies of our Government show the lack of a moral core.

Of course, I do not think that moral purpose is gone from the hearts of the American people. Moral purpose is still the keynote of our national heritage, tradition, and culture.

In no western land is the tradition and spirit of the Judaic-Christian way of life more deeply ingrained than in ours. The original settlers of this continent broke the wilderness with the ax in one hand and the Bible in the other. Moral purpose was as much law as that written onto the statute books. The greatness of America was its conscience, as well as its freedom and the precepts of democracy.

The Declaration of Independence affirmed that men were free and equal in accordance with moral law, that the rights of men were unalianable and derived not from governments, or magistrates, but from the Creator of us all.

All men are equal before the law, equal in dignity, equal in their intrinsic worth, equal in their rights and basic immunities.

This heritage was built into the foundation stones of our Nation by such morally minded men as William Bradford of Plymouth Colony, Roger Williams of Rhode Island, William Penn of Pennsylvania, John Adams, one of the fathers of the Revolution, George Washington, James Madison, Thomas Jefferson and Abraham Lincoln—to name but a few.

This is the heritage of America, richer than the land, richer than the resources, richer than the worth of wealth derived from industry, agriculture or commerce.

This heritage grew out of the unique concept defined in the law of Moses and further set forth in the teachings of Christ and Paul and Peter.

These concepts and teachings have a present-day meaning for the issue of civil rights, the rights of labor, immigration, and many others.

We would do well to compare our spiritual traditions with some of our present practices, and to find in our traditions a new source of strength and support for our efforts as we face the challenge of the present and the future.

There is still time to mobilize our strength and regroup our forces for the tests which lie ahead, both at home, and abroad.

We must have faith in ourselves, but most of all in our purposes.

If we dare in all of our purposes, we will surely succeed in some of them.

This I Believe

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. MULTER. Mr. Speaker, it was my good fortune to attend on the night of Sunday, May 5, 1957, the dinner of the Albert Einstein College of Medicine of Yeshiva University at the Waldorf Astoria Hotel in New York.

The dinner was the occasion of the presentation of the 1957 Albert Einstein commemorative awards.

The awards committees were made up of distinguished men and women of national and international accomplishments and fame. They made excellent choices of outstanding personalities who have contributed much to the welfare of our contemporary world.

In his capacity of toastmaster of the dinner, former New York State attorney general, the Honorable Nathaniel L. Goldstein, presented each of the award winners to Dr. Samuel Belkin, president of the Yeshiva University, who, in turn, made the awards.

The award for accomplishment in the humanities went to Edward R. Murrow, commentator and television producer; in citizenship, to Ambassador John Hay Whitney; in arts, to Actor Paul Muni; in science, to physics professors, Dr. Tsung Dao Lee and Dr. Chen Ning Yang; and in medicine, to Dr. Samuel Levine.

All of the recipients of the awards responded with pertinent remarks of appreciation.

Appropriately enough, each took occasion to pay tribute to that great humanitarian and scientist, Albert Einstein, whose name is borne by our newest but already great college of medicine.

The highlight of the evening were the remarks of Mr. Murrow. Though brief, they were pointed and thought provoking. I am pleased to set them forth in full, as follows:

THIS I BELIEVE

President Belkin, distinguished guests, and friends, you have done me great honor; and, as Shakespeare said, "Beggar that I am, I am even poor in thanks."

To have his name linked, however remotely, with that of Professor Einstein is honor enough for any reporter. "A hundred times every day I remind myself that my inner and outer life are based on the labors of other men, living and dead. And that I must exert myself in order to give in the same measure as I have received, and am still receiving." Those words were Albert Einstein's, but he spoke, I think, for every worthy man and woman who deals with information in the mass media. To him a disinterested love for facts was not enough. He had to care about the bearing of those facts on hopes, fears, and destiny. He realized that fear, bigotry, and intolerance will not command the land unless most of us are silent accomplices.

By "freedom" he understood social conditions of such a kind that the expression of opinions, and assertions about general and particular matters of knowledge, will not involve dangers or serious disadvantages for him who expresses them. He believed in what might be called a reign of reason, which most of us have enjoyed, without buttressing its foundations.

Professor Einstein would, I think, have agreed with Milton, who said: "If the waters of truth flow not in a perpetual progression, they sicken into a muddy pool of conformity and tradition." He was conscious of the truth of what Lord Acton wrote in 1877: "There are in our day many educated men who think it right to persecute." There are indeed many men in our day who so believe.

Perhaps you will permit me a personal digression in order to apologize for my lack of formal attire. It is not due to persecution, or lack of a dinner jacket, but rather to the fact that I have but just come from a television program where such clothing would have been inappropriate. I am without embarrassment, and seek refuge in another quotation from Professor Einstein: "It would be a sad situation if the bag was better than the meat wrapped in it." Now that we have disposed of the bag, we may examine whether the "meat" can find words to say what he feels rather deeply.

You will not expect me to discourse upon Professor Einstein's scientific accomplishments; nor yet to expound upon the brilliant prospects that lie in the future for the Albert Einstein College of Medicine of Yeshiva University. It is the first medical school under Jewish auspices established in the United States. It was established to meet a need, and we are all aware of the desperate and urgent nature of that need.

Even at my advanced age, I have applied for admission to the Albert Einstein College of Medicine. That is only a slight exaggeration, for I did not actually try the patience of the admissions officer—merely asked for the application form for admission. It is a most revealing and, I suggest, important and unprecedented document. I am not asked to state my race; no questions are asked about my religion or nationality; no photograph is requested; the college is not curious as to my parent's birthplace; I am not required to give my mother's maiden name. You will have difficulty in finding a similar application form from any other institution of higher learning in this land. They are interested in what academic trails I have followed, and where I propose to go; interested in my qualifications rather than my ancestors. This, I suggest, is the essence of that overworked and often distorted phrase, "academic freedom." We have rather come to believe that it applies only to professors. In fact it means the right of scholars to pursue the truth wherever it may lead them; to search out the great teachers and to sit at their feet at any institution in the whole academic community. That is the real history and meaning of the migration of scholars from the Middle Ages to the present time.

Not all such migrations have been voluntary. There was a movement from Germany to this country that began in 1934. I should like to tell you a little about it, because I know the details—they have not heretofore been published, and even a brief recital of the facts will suffice to illustrate that the Albert Einstein College of Medicine is in the mainstream of a noble tradition.

When Hitler and his henchmen chopped off the highest branches of the German academic tree, those scholars sought exile in many countries. There was established in this country a small committee, to aid in the placement of these scholars in American universities. It included such names as Alfred Cohn, Ben Flexner, Fred Styne, Stephen Duggan, Alvin Johnson, Livingstone Farand, and others.

It was my privilege to prepare lists of the displaced German scholars, to circulate them to American universities, and then to go before the committee with applications for considerable sums of money to finance the first few years of their residence in this country. Several scores of professors came, and became part of our academic communities from Seattle to Boston.

All but an insignificant portion of the money we raised, from individuals, came from Jewish sources. The majority of the active members of the committee were Jews. In presenting applications to the committee I was never once asked: "Is this man a Jew?" The only questions were: "Is he a competent scholar of standing or promise?" and, "Are his services sought by an American college or university?" and finally, almost half of those we financed were pure Aryans even under Hitler's definition. They were men who, like their Jewish colleagues, refused to bend.

In those days—more than 20 years ago—we used to talk of the cross-fertilization of cultures that might result from this migration, and hope that American students would be stimulated. These men and women represented every academic discipline, and I have been fortunate enough to see the human dividends that have been produced by their labors. In north Africa, in Normandy, and in Korea I have talked with young Americans in uniform, asked them whether they had been to college, if so where? And had they happened to have a course under Professor X. Many times I have seen tired, tense faces come alive with memories of the classroom or seminar, and heard the remark: "He's the one who really started me reading," or, "He taught be to doubt," or "That's the one who really stretched my horizon." I can only add that my own small part in this operation has given me more satisfaction than anything I have ever done.

As I understand it, this award is in the general area of the humanities. In radio and television circles that's a pretty highbrow term. And yet the mass media must be concerned with it. It was Joseph Wood Krutch who said: "The humanities, as opposed to the sciences, are concerned with whatever is important to man, but cannot be measured, and is not susceptible to valid experiment."

So radio and television must concern themselves with the humanities, unless they choose to limit themselves to the function of entertainment. Television is growing so fast that those in charge of it have hardly time to administer it well, let alone to think of its place in civilization. If these instruments are to survive, they must strengthen and affirm the values that are the essence of our civilization. This being true, it is not enough to entertain the greatest numbers; there must also be full appreciation of our historic heritage, wise understanding of our institutions and traditions, familiarity with our classics in literature and the arts, and persistent attention to our ethical principles.

I am well aware that the bulk of the money that pays for television and radio comes from a relatively small number of corporations. Hence the thinking of the executives in these corporations will have a profound influence on what happens in television and radio. And that is saying that

they will greatly influence and could possibly directly influence the course of our civilization. And it is insisting that they cannot abdicate this responsibility by assigning it to an advertising agency.

We now know that our civilization can be snuffed out overnight. We know that while we ourselves did not create it, we ourselves can lose it. It is committed to us. We also know that we can save ourselves from nuclear destruction by buying a different civilization, one that does not include our values of freedom, or cherish like ours the dignity of the individual. We know we are not making this bargain.

We value our civilization. So we begin to know that we value it, if we are not to lose it. But if we are going to survive as a Nation and a civilization, we must do so consciously. This means that the mass media must pay more attention to the humanities.

The humanist is one who cares, and is preoccupied with what is worth caring about. Another characteristic of the humanist is that he is preoccupied with the mystery of personality. People for him are always persons, and in these days that often makes him lonely. Preoccupation with science turns persons into people—a statistic on a chart—tendencies and "characteristics symbolized by curves neatly drawn on graphs." The humanist is concerned not with manipulation, but with understanding. He is interested not only in events, but in character.

All too often in radio and television audiences are conceived and treated as people, not as persons. Quantitative response is, consequently, made the measure of quality. There is a willingness and, indeed, eagerness to answer the questions, What? And how? But not enough attention is paid to the Why?

T. S. Eliot said: "Teach us to care and not to care." "Teach us to sit still." It might be helpful if those who control television and radio would sit still for a bit and attempt to discover what it is they care about. They have great belief in the power and future of their instruments.

But all true belief is rooted in doubt, and there is not enough doubt in high places in the field of mass communications. There is a disposition to take us for what we are, and that in turn is likely to keep us where we are. If these devices are to be used in an effort to entertain all of the people all of the time, then we have come perilously close to discovering the real opiate of the people. If in dealing with events we concentrate on "what" and "how" and ignore the "why," then we are not really searching for anything.

Our commercial television and radio systems appear to be the alternative to State-operated and financed communications. By and large, we have freer speech, more information than any State-operated system. We have vastly more money to spend. The system is practically universal. It is, for the individual, both a privilege and a peril. And it is, for those who finance the system and those who select the programs, a responsibility in the field of communications never before borne by such a small group of men and corporations. I think it was Bernard Shaw who said: "You must get what you want, or you will come to want what you get."

I am sending this check for $1,000 to Mr. Alan Paton in South Africa. As most of you probably know, 150 men and women were arrested in South Africa on December 5, 1956, and charged with treason for their outspoken, complete, but nonviolent opposition to their government's apartheid program. Among those arrested are clergymen, teachers, and professors. The defendants are of all races and of many religious and political beliefs.

Mr. Paton himself is currently a defendant in the magistrate's court in Durban on a charge tht he took part in a public meeting at which native Africans were present without obtaining the prior consent of the city's mayor. In other words, the "crime" with which Mr. Paton is charged is that he attended and spoke at a meeting not unlike the meeting at which we are here gathered tonight. Funds are needed for the legal defense, and I venture to think that Professor Einstein would have approved the use of this fund for that purpose.

Oregon Economy Suffers From Tight Money

EXTENSION OF REMARKS
OF
HON. AL ULLMAN
OF OREGON
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 18, 1957

Mr. ULLMAN. Mr. Speaker, the present tight money policy being pursued by this administration has adversely affected many segments of our economy. Adequate testimony to the disastrous effect of this unfortunate policy on the district which I represent and on the State of Oregon in general is provided by some very significant figures which I have recently examined.

According to the Oregon State Unemployment Compensation Commission, "payments to insured unemployed reached $3,700,000 for the highest March in 20 years' history of the State unemployment compensation commission." The commission's bulletin continues by pointing out that in the State of Oregon there are currently "some 48,100 persons still without work, about 6,000 more than a year ago."

The same depressing picture is presented by considering current bank debits as reported by a publication of the University of Oregon, the Oregon Business Review. As bank debits are generally regarded as good indicators of current business activity, I think the figures for the Second Congressional District are significant:

	Number of banks reporting	Debits, February 1957	Debits, January 1957	Debits, February 1956	February 1957 compared with—	
					January 1957	February 1956
Upper Columbia River (The Dalles, Hood River, etc.)	9	22,439,289	28,041,546	23,126,455	−20.0	−3.0
Pendleton area	8	22,201,611	31,363,539	23,175,022	−29.2	−4.2
Central Oregon (Bend, Prineville, Redmond, etc.)	5	19,000,036	22,676,408	22,029,003	−16.2	−13.8
Klamath Falls, Lakeview area	5	21,945,107	30,871,816	26,613,227	−28.9	−17.5
Baker, La Grande area	8	19,627,249	25,747,871	21,124,123	−23.8	−7.1
Burns, Ontario, Nyssa	5	16,198,184	21,268,001	16,353,099	−23.8	−1.0

Reports of two banks in Baker County, which is included in my district and in which county I live, indicate the same trend. The First National Bank of Baker reported that demand deposits of individuals, partnerships, and corporations at the close of business on April 10, 1956, were $6,256,151.14. In a similar report for the close of business on March 14, 1957, this same item was listed at $5,945,599.33. Thus, demand deposits were down over $300,000.

The report of the First National Bank of Halfway, also in Baker County, showed a similar situation. At the close of business on April 10, 1956, demand deposits of individuals, partnerships, and corporations were listed as $642,020.88. A similar report for March 14, 1957, showed this figure had dropped to $592,470.27, or a drop of almost $50,000.

New unemployment applications in Baker County reflect the same unfortunate situation. During the month of March the Baker office of the State Unemployment Compensation Commission reported that there were 102 new applications filed as compared with only 50 filed 1 year ago. I cannot help but note that reports of the two banks in Baker County, which is the area in which Idaho Power Co. is constructing Brownlee Dam, indicate that the much heralded prosperity supposedly resulting from Idaho Power Co.'s activities does not exist.

Continuance of the present tight-money policy can only lead to further aggravation of an already unhealthy economic situation. The State of Oregon and the Second Congressional District can no longer continue to endure the form of economic strangulation which it is now experiencing.

Reliance on H-Bomb and Its Dangers

EXTENSION OF REMARKS
OF
HON. JOHN W. McCORMACK
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. McCORMACK. Mr. Speaker, under permission to extend my remarks, I include an educational and challenging article written by Hon. Thomas E. Murray, member of the Atomic Energy Commission, and appearing in the May 6, 1957, issue of Life magazine.

Commissioner Murray is one of the best qualified persons in the world to discuss the important question which is the subject matter of his article. This article and the views of Commissioner Murray as expressed therein should be read, studied, and analyzed as extensively as possible.

The article follows:

RELIANCE ON H-BOMB AND ITS DANGERS—THE MILITARY USES OF NUCLEAR ENERGY

(By Thomas E. Murray)

The recent British white paper on defense dramatically thrust into the forum of public argument the central issue of our times—the

military uses of nuclear energy. It also defined the major focus of argument in this sentence: "The free world is today mainly dependent for its protection upon the nuclear capacity of the United States."

Will the United States be strong enough to assume the staggering burden thus quietly imposed upon it? Are we moving, with sufficient sureness and speed, toward the development of a nuclear capacity that will be adequate in all respects for the protection of the free world? These are the grave questions that have now been opened to public discussion. I shall argue that the structure of our defense policies needs revision if we are to discharge successfully the full range of military responsibilities that we now bear.

The protection of the free world absolutely demands that two dangers be avoided. One danger is the so-called war of survival, waged with the immense new thermonuclear weapons. It is altogether possible, as I shall explain, that no nation would survive such a war. In order to avoid this danger the United States has hitherto laid heavy emphasis on the production of megaton bombs. The hope has been that this air-nuclear-retaliatory capacity will deter an enemy attack massive enough to launch us into a war of survival.

However, this heavy emphasis on megaton bombs has itself created the second danger, namely, the possibility of piecemeal defeat at the hands of international communism. We know that the enemy has made hydrogen bombs. We must suppose he has a megaton stockpile. The umbrella of a nuclear stalemate has been raised over the earth. For all we know, the enemy may have assisted in raising the umbrella precisely in order to provide a cover for a program of cautious aggression. In any case, we can be sure that in the perilous safety of its shade he will continue to act according to his nature, as a criminal outlaw. It is not likely that his outlawry will be so outrageous as to pull down the umbrella upon himself and upon us in a common ruin. But there will be minor outrages, as there have been. Since megaton bombs are designed only for desperate uses, the danger is that in moments of minor outrage our only recourse will be to moral indignation.

That is to say, we shall be defeated on each successive occasion when a minor aggression occurs, as in Hungary. Moral indignation is no substitute for the ability to protect by force the decencies of human life. Whatever the value of the big umbrella, we urgently need to have that decent, nicely calculated measure of nuclear force, valid as a threat and valid in use, which will deter or halt the minor aggressions of an enemy who in the ultimate instance will yield to no other suasion than force.

Sudden destruction or slow defeat—both of these alternatives must be ruled out with all the certainty that human prudence can achieve. The ruin of the physical fabric of civilization is too awesome a prospect to contemplate. Even more intolerable is the prospect of enforced submission to the injustice of creeping Communist domination. The problem is to find the path of policy that will lead us between these dreadful alternatives.

The presently prevailing policy of emphasis on megaton weapons may have saved us from sudden destruction—so far. But if we are to avoid the risk of slow defeat, we now need a new policy of emphasis on small nuclear weapons. The urgent demand of the moment is for a program of rational nuclear armament. I have been using this phrase to describe a structure of policies that will result in a stockpile that exhibits a properly adjusted balance between large and small nuclear weapons—all manufactured with an eye to their military usefulnesses, as these are calculated in the light of Communist military intentions.

A PATH TO PEACE WITH JUSTICE

Admittedly, perils lurk on both sides of the path of military and moral reason to which I am pointing. Nonetheless, though the path is lined with perils, at least it is not headed straight for them. It can lead us to that measure of military security that may legitimately be hoped for in a world where total security has become a vain dream. Moreover, it can also lead us toward the moral goal described by President Eisenhower in his second inaugural—"the building of a peace with justice in a world where moral law prevails."

Four factors have hitherto diverted us from the path of rational nuclear armament.

The first factor was technological. In the whole course of World War II the allied air forces let loose upon the enemy 1.5 million tons (one and a half megatons) of explosives. After the experiment at Eniwetok in November 1952, we had the secret of a weapon whose explosive force surpassed by many times the total World War II megatonnage. Weapons technology had hit upon an open end. The realization was quickly reached that there are no necessary practical limits to the megaton size of H-bombs.

As an engineer, I understand the seduction exerted by a technological open end. It is the instinct of technology to exploit the maximum possibilities of every discovery. Weapons technology could not have been expected to control its own instinct; the control should have been imposed on it by military policy, which judges the usefulness of weapons.

But here the second factor entered. Weapons technology seemed now to have fulfilled the military planner's perennial dream of the irresistible weapon. In particular, the H-bomb seemed to be the ideal weapon with which to justify the doctrine of strategic air attack and thus to furnish warrant for the dominance of the air arm. So it happened that military policy, under the spell of its own dream, fell captive to the technology that seemed to have realized it.

The captivity was reinforced by the third factor—the impact of world events. For instance, Korea made real the threat of Communist world domination; and it raised the specter of a general war. In response, America had to be made strong. However, it was not a question of acquiring limited strength for limited wars. Korea created a popular revulsion against the very idea of limited war. A kind of abstract strength was wanted—the kind of absolute strength that would match the supreme threat of world domination. This abstract strength could now be given very concrete definition in terms of the H-bomb. Further emphasis was thus laid on the production of these absolute weapons.

The fourth factor furnished the final emphasis—the powerful factor of costs. The general public is likely to assume that a big bomb must cost more than a small bomb. Moreover, given the plentiful supply of uranium ore out of which bombs are made, the popular assumption might be that we have by this time manufactured a complete collection of nuclear weapons, adapted to all possible uses—big weapons, and small ones, and middle-sized ones, all stocked and shining on the shelves.

The matter is not so simple. The cost of weapons involves not only money and materials but also a factor called efficiency in the use of materials. There is no lack of uranium ore; but there is only a limited number of the plants in which the ore is processed into fissionable materials. Our existent industrial complex for this purpose represents roughly a capital investment of $6.7 billion. In consequence we have only a limited amount of weapons-making material. Here the factor of efficiency enters.

A given quantity of material can be utilized in such a way as to produce a very large explosion. The same quantity of material can also be used in another way, to produce a smaller explosion. If the efficiency of a weapon is to be measured in terms of the ratio between the quantity of fissionable material used and the explosive results obtained, it is obvious that the small weapon is less efficient than the big one. Consequently, the small weapon is also proportionately more costly, in terms both of material and of dollars.

These four factors, therefore—the technological open end, the dream of the irresistible strategic weapon, the desire for abstract strength, and the factor of costs—have hitherto combined together to weight the scales of policy heavily in favor of the big cheap bomb.

What has been the military value of this emphasis? What military uses are served by these huge weapons, and by the possession of quantities of them? Are there limits to their usefulness? Are there consequently limits to the military value of a constantly enlarging stockpile of them? These are the next questions.

The multimegaton H-bomb was born in a vacuum of military strategy. No one had antecedently determined its uses. After the event, the vacuum was filled with confusion. The confusion is not surprising. The multimegaton bomb fits badly, if at all, the standards of military usefulness hitherto accepted. It is by nature a weapon of mass destruction. If you except certain special targets, such as a fleet at sea, it will perform least efficiently against classical military objectives—troops in the field or in reserve, aircraft aloft, supplies, communications. It will destroy airfields, at the price of slaughtering the civilian population in the area. It will be altogether efficient in annihilating beyond repair the industrial and human potential of great cities. But this terrible efficiency is linked to no reasonable military usefulness. Most theorists today agree that the destruction of industrial potential would make little, if any, sense in a multimegaton war, which would be a war of sudden catastrophe, not of slow attrition.

IF DETERRENCE SHOULD FAIL

The multimegaton weapon, therefore, had to create its own strategy. It is the old strategy of deterrence and retaliation; but now this strategy has all the newness of the new kind of weapon that gives it military substance. The military value of the strategy lies in the intrinsic link between deterrence and retaliation. "These weapons will either deter you or smash you"—so runs the reasoning. If there is any doubt about the intention of pursuing the second alternative if the first fails, the reasoning trails off thus: "These weapons will deter you—I hope; if not, you win." But this is the classic formula for a bluff.

America certainly does not wish to rest its national security on a bluff. Therefore, the complementary concepts of deterrence and retaliation are a strategy for war. They cannot simply be accounted a strategy for preventing war. The multimegaton weapons in our arsenal are designed for use. Has anyone defined the conditions of necessity under which they will come into use? I do not know. However, to pursue the argument about their usefulness, I shall assume that the conditions are one day fulfilled. Nuclear deterrence has failed. The Strategic Air Command is unleashed. It represents retaliation by multimegaton weapons, used in quantities, directed at the destruction of the enemy. We are precipitated into the war of survival.

That is to say, we are hurled into the midst of absurdity. In the whole doctrine and history of war in the civilized world it is a first principle that survival should never be made the issue in war. Whenever the principle has been violated (in World Wars

I and II), the result has been the climactic disaster of war, namely, the failure of war to achieve its political and moral ends, which are peace with justice. In the air-nuclear age this ancient principle has acquired all the evidence of an axiom. To put the question, who will survive, we or they, to the arbitrament of full-scale nuclear warfare is to decide that nobody shall survive, neither we nor they.

It might be that the belligerents could survive the almost immeasurable physical destruction and colossal loss of life immediately resultant from the blast and fire effects of great thermonuclear weapons used in quantities. It might even be that some of them could survive the effects of what is called external radiation (the immediate radiation from one multimegaton bomb alone will expose the population in approximately 7,000 square miles of territory to dangerous levels of external radiation). But under the conditions of unimaginable horror created by our hypothesis the word "survival" has already lost almost all its meaning. And what litttle meaning remains vanishes when one comes to what is called internal radiation from substances in the fallout.

One of these substances is strontium-90, a radioactive product of nuclear fission that causes bone cancer if it is absorbed in sufficient quantity by the human skeleton. At the moment, by official American acknowledgment, strontium 90 equivalent to 30 megatons of nuclear fission energy has been shot into the stratosphere as a result of test explosions. From the total quantity sent aloft so far, some 3 to 10 units of strontium 90 will be deposited in human bones—particularly children's bones—over large areas of the earth.

ABSURDITY OF WAR OF SURVIVAL

These amounts probably are not hazardous to health. But they afford a standard of measurement. The 10 units are one-tenth of the maximum concentration considered acceptable for the general population, with its large numbers of children, by the National Committee on Radiation Protection and Measurement and also by the International Commission on Radiological Protection.

How many megatons would be exploded in a full-scale nuclear war of survival? Let us say that ground bursts releasing 3,500 megatons of fission energy would sufficiently fill out the concept of destruction that would be the shared aim of both belligerents. The consequence for the inhabitants of the belligerent countries would be a strontium level in human bones of the order of 50 times the maximum considered acceptable. Moreover, some of this lethal substance would settle slowly and relatively evenly over the remainder of the earth. It would find its way from the soil into human bones, producing strontium concentrations that would be between 2 and 6 times a maximum considered acceptable for the general population. A whole generation, embracing tens of millions of people, in Russia, in the United States, in all the countries of the world, would be affected.

The figures I have used might have to be altered somewhat with the progress of scientific work. Some variation in the figures does not greatly matter. What matters is that some figures have to be put into the concept, war of survival, in order to test its realism. And when a set of not unreasonable figures is used, the concept blows apart into patent absurdity.

The inherent absurdity of a multimegation war sets limits to the military usefulness of immense thermonuclear weapons. In consequence, limits are also set to the validity of the strategy based on these weapons. Deterrence-retaliation may, if you wish, be called a strategy of survival—but only as long as the deterrence works, as long as it sustains the nuclear stalemate.

We must therefore have an arsenal of multimegation weapons sufficiently large to give the strategy built upon them its own limited kind of validity. But this arsenal need only be a limited one. There is a limit, set by the absurdity of a war of survival, beyond which these absolute weapons become absolutely useless.

The military value of the giant H-bomb is also limited from another point of view. It is not a fit means of retaliation against limited military aggressions supported by conventional or small nuclear arms. Instead of repressing a limited and localized aggression its use would tend to provoke the expansion of hostilities in the direction of that fearsome absurdity, the war of survival. But these limits, set to its retaliatory value, likewise affect its deterrent value. The strategy of deterrence-retaliation, as given military substance only by multimegation bombs, is no adequate guaranty of the security of the free world against some military version of Communist "salami tactics."

We come now to a more manageable military problem. There are issues, short of the impossible issue of survival, which may have to be settled by arms. Broadly, they are issues of justice, the classical issues of war. They are always limited issues. And limited war is the legal institution available as a last resort for their settlement. In its political and moral meaning war is man's ultimately resolute declaration of his fixed and firm purpose—that he will have peace indeed but only with justice. What then of our preparedness to wage war, in civilized fashion, for limited aims, by limited means?

A GAGE OF SOVIET INTENTIONS

Some people seem to grow nervous when the question is raised in this form, under reference to justice, reason, and the values of the civilized tradition. The trouble is, they say, that the free world faces an immoral enemy. Recently, for instance, Mr. Donald A. Quarles, now Deputy Secretary of Defense, gave warning that "* * * it would be unwise in planning for the security of our country to rely on the morality or even the rationality of potential enemies. We must still have security even if others resort to immoral and irrational acts. These have always been truisms but the stark facts of this air atomic age give them vastly greater force."

This distorts the whole military and moral question. Obviously it would be absurd to place any reliance on Soviet morality. But the problem is not whether we should rely on Soviet moral synicism but whether we can diagnose Soviet military intentions. From the fact that the Soviet Union is immoral does it follow that a massive air-nuclear attack upon the United States is likely? And how likely is it? And what would security mean, if the irrational event were to occur? In terms of the stark facts of the air-atomic age—especially the facts about radioactive fallout—would security be achieved by proportionately massive megation retaliation against the Soviet Union? There are the things we would like to know.

More pertinently, an appeal to the truism that the enemy is immoral will not justify an idolatrous worship of air-nuclear-retaliatory power based on greater numbers of megation bombs. Similarly, a war in outer space, waged by nuclear missiles, may be a technological possibility. Is it therefore a military likelihood? And is it more likely than a war on the Turkish border? We cannot aim to be secure against every possible contingency, but only against the more likely contingencies. The problem is to make a realistic calculation of what the immoral enemy is likely to do, and then to have on hand the measure and kind of force that will be militarily necessary or useful in stopping him from doing it. This is our military duty: It is likewise our moral duty. Between the two duties there is no divorce.

To assist in performing both duties we have the stark facts of the air-atomic age. We also have the fact that Soviet military policy has a Communist premise, and that Soviet leaders are capable of primitive logic. The premise was stated by Mr. Khrushchev when, speaking with all the seriousness of the Marxist-Leninist faith in the dialectic of history (a faith not born of alcohol nor blurred by it), he said. "We will bury you." I presume that he has no wish to spoil his own pleasure on the occasion by finding himself in the same grave. It is a fair conclusion that he does not intend to dig the grave with several thousand megatons of fission energy.

Do not Soviet scientists know as much as we do about radio-active hazards? Are not Soviet strategists using the criterion of contamination levels in order to test the validity of their strategies of nuclear attack, and also to test the realism of American threats of retaliation? If there are any doubts about affirmative answers to these questions, it would be greatly in our national interest to clear them up as soon as possible.

There is therefore a tenet of Communist ideology on which we can rely. The Communist revolution clearly wishes to put an end to the history of imperialist-reactionary-bourgeois capitalism. But it does not wish to put an end to all history—and therefore to the Communist revolution itself. If the Communist believes that the future belongs to him, can he wish to cancel it out? Unless indeed he be not only immoral but altogether mad. And in this case, how do you deter a madman, intent on chaos, by threatening him with the chaos that he wants?

The Communist norm of morality—the success of the revolution—is not civilized. But it affords us a realistic, and safe enough, premise of military policy. From it I would conclude that Communist invasions of the order of right and justice will be limited. The exchange of an unlimited megatonnage of fission energy occupies no visible place in the Communist strategy of world domination. A classless society of bone-cancer patients would hardly satisfy the dreams of Marxist messianism.

SMALL NUCLEAR WEAPONS NEEDED

Our central problem therefore is to deter limited aggressions and to retaliate by effective but limited force, if deterrence fails. The question is, what have we got in the way of small nuclear weapons to fulfill this limited military mission of deterernce and retaliation?

There is little public information on this subject. Perhaps, consequently, there is a considerable amount of public misapprehension. The extent to which our rigid security regulations have had the happy result of slowing down Soviet nuclear developments (which in any case they cannot stop) is a matter of conjecture. On the other hand it could be argued that they have had the unhappy result of rendering our nuclear armament program unmanageable by informed and responsible public opinion. Moreover, their enforcement at times goes to extremes even within high Government circles. For instance, some months ago, I wished to convey certain factual information about the present and future composition of our nuclear stockpile to certain members of the National Security Council. But it was ruled that they had no need to know the facts I wished to present.

However, some general information is on record in the press. On February 5, 1957, Senators SYMINGTON, KEFAUVER, and FLANDERS met as a task force of the Senate Armed Services Committee in public session. Frank H. Higgins, an Assistant Secretary of the Army, and Lt. Gen. Carter B. Magruder, Deputy Chief of Staff for Logistics, appeared before them.

As reported by Joseph L. Myler, in the Washington Daily News, Mr. Higgins said that the job of equipping the Army with small atomic weapons is progressing very nicely. But he added that it is largely a development program still. General Magruder is quoted as agreeing that it will be 3 to 5 years before the Army has enough tactical atomic weapons to reduce the use of conventional ammunition in war by as much as 25 percent.

The nuclear weapons spectrum in its fully sweep is the support of the four basic military missions of the American Armed Forces, defined by President Eisenhower in his budget message of January 1957. Only one of these missions, the first, necessarily calls for a stockpile of multimegaton weapons. This mission is "to maintain ready nuclear-air-retaliatory forces so strong that they will deter a potential aggressor from initiating an attack." The other three missions, for their highest efficiency, rest heavily on a vast arsenal of nuclear weapons in the smaller range. The tens of thousands of small weapons which I recommended as necessary or desirable (on April 12, 1956, in testimony before the Subcommittee on Control and Reduction of Armaments of the Senate Foreign Relations Committee) would not exceed the requirements of these three missions—the defense of the continental United States, the waging of ground war by the Army, and the control of the seas.

The Armed Forces cannot fulfill these three military missions with a development program. The immediate need, therefore, is to move the small-weapons program out of the development phase into the phase of large-scale production.

HIGH COST OF SMALL WEAPONS

This will be somewhat costly. The major requirement would be more fissionable materials. This in turn would require an expansion of our present industrial facilities. The size of the new investment in plants would depend upon the extent to which the output of our existent plants is directed away from large weapons into the needed small-weapons program. In any case, the money spent would be well spent if its amount were measured against the demands of military security and also against the amount now being spent on other defense programs.

If the small-weapons program is to be moved into the large-scale production phase, the first thing needed is some important change in the sequence and order of our interrelated policies. At present the order is inverted. Military policy has allowed itself to be too greatly determined by technology. And the factor of costs, in alliance with technological factors, has unduly determined the emphasis in the weapons program. But this is to turn the structure of policy upside down.

I do not underestimate the value of technology or the importance of costs. But I do not think that these things should come first in the order of value and importance. Military policy should come first. At present it requires an extensive production program of small weapons. Budgetary policy should be subordinated to effective execution of this military policy. And technology should be the servant and not the master in the military house. The structure of policy should be turned right side up.

The whole foregoing argument about weapons policies has been cast in pragmatic terms. I have been concerned to uncover policies that will work best for America's security and that of the free world. The problem is a practical one; but it does not therefore cease to be a moral problem. Morality is anchored in reality. Often before this I have argued for the governance of our weapons program by a moral norm ("what is right in terms of the civilized tradition of just warfare"). But the premise of this moral argument has always been a prior practical argument—that the program should be governed by military values ("what is necessary or useful in terms of the likely contingencies of actual warfare," within the supposition of responsible military theory—that military usefulness is not to be defined in terms of sheer slaughter, destruction, and terror).

The military duty of the United States is success in the face of international communism. But the moral duty of the United States is always justice in the sight of God. There need be no conflict between these two duties. One cannot, of course, say that whatever is just will be successful. But one can say that whatever is not just will somehow fail to succeed. In the matter of nuclear war the validity of the latter assertion is easily tested. The civilized tradition has always declared that an unlimited and indiscriminate use of force in warfare is unjust. The facts of the nuclear age now declare that such a use of force would be unsuccessful. The success it would achieve, the sheer destruction it would wreak, would be at best useless to the belligerent and at worst disastrous to humanity.

It is within the factual circumstances of the nuclear age, wherein justice is the duty as well as success, that I make my proposals for a program of rational nuclear armament. Will this program fulfill God's purpose for the world, to which America has pledged itself—in reverent participation—the building of peace with justice in a world where moral law prevails? That, I believe, is not the question. To the extent that it is Christian this Nation knows that it is not required to fulfill God's purposes on this earth. It is only required to be faithful to them.

Connecticut May 3 Observance

EXTENSION OF REMARKS
OF
HON. ANTONI N. SADLAK
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. SADLAK. Mr. Speaker, at Hartford, Conn., yesterday afternoon in the Bushnell Memorial Auditorium under the sponsorship of the Polish-American Congress, District of Connecticut, there assembled nearly 2,000 people in observance of the Polish Constitution of May 3. The diversified program was opened by Attorney Stanley Grudzinski, executive vice president, who extended greetings and made most appropriate opening remarks. This was followed by brilliant singing of our national anthem and the Polish anthem by Mr. L. J. Daum. The invocation was then intoned by Father Kukuc and then Rev. M. Karwacki, president of the Polish-American Congress addressed the large audience.

Many children, in native costumes of Poland, taught by Felician Sisters, then entranced the crowd with a stirring performance of dancing and drills. It was then my honor and privilege to address the assemblage in English and in Polish. These remarks were followed by outstanding vocal renditions by the Choir Polonia, a fine group of young ladies and young men as well as older ladies and men, all recent arrivals in the United States who, on May 19th will celebrate the fifth anniversary of their singing choir. The next action on the program was the reading of a resolution by Mr. Grudzinski, attached and made part of these remarks, which was loudly and unanimously endorsed and passed by the thousands in the hall.

For more than a half-hour movies taken in Poland during a recent visit by Mr. Joseph Alecks were shown to the appreciative audience. We were aghast at scenes of remnants of concentration camps and gas chambers where many valiant Poles were murdered. We particularly observed the obvious need of food and clothing in the pictures taken of curious crowds of youngsters and old folks who for the first time looked at an American. The primitive means of harvesting a hay crop impressed each viewer with the need of farm implements and equipment.

Mr. Speaker, during my address I stressed my opinion "that it would be the best investment of $100 million that our Government ever made if we granted economic aid to Poland to that amount in contrast to the billions that have been given in foreign aid since Poland was first blitzed in September 1939." The subsequent showing of the movies of which I had no previous knowledge though I know Mr. Alecks and the pictures he took at random following the Poznan uprisings were not made for any propaganda purposes, these emphasized the dire need for food, clothing, medicines and better and more effective farm equipment than scythes and sickles and old hand-rakes to make and harvest hay crops. I wish it would have been possible for all the Members of this House to have viewed these authentic movies of freedom-loving and freedom-seeking and freedom-determined Poles and I am convinced that each would join in an endorsement of the resolution adopted at the 166th anniversary of the Polish Constitution of May 3, 1791. The resolution follows:

RESOLUTION

We, the people, assembled on May 5, 1957, at the Bushnell Memorial Hall in Hartford, Conn., under the sponsorship of the Polish American Congress, District of Connecticut, observing solemnly the glorious anniversary of the Polish Constitution of the 3d of May and deeply conscious of the indelible imprint of this magnificent day upon all dedicated to the belief that life without liberty demands boundless sacrifice; now therefore,

We here assembled believing in this supreme principle bow in gratitude to the heroic people of Poznan and to the magnificent resurgence of the Polish Nation and to its courage in the face of hopeless odds; we congratulate them on this great day on their bloodless revolution; we call upon the free world and in particular the United States to further solidify the gains of liberty in Poland as follows:

1. By giving maximum economic aid to Poland and the Polish people now.

2. By insisting that the aid given must reach the Polish masses.

3. By insisting upon maximum concessions from the authorities in Poland to allow economic aid in all its forms, adequately supervised, free of burdensome duties, to reach the impoverished masses.

4. By recognizing the role of the Catholic Church in Poland and Cardinal Stefan Wyszynski in the Polish struggle for freedom.

5. By recognizing that Polish territories were ravaged and plundered through the centuries; that its rightful owners were re-

settled with the sword, the Nazi furnace and the concentration camps; that the lands now having reverted to its rightful owners, the world must spare the spectacle of a new resettlement by war, Nazi type furnaces and concentration camps.

6. By recognizing that the moral strength of the Polish people will be supported by guaranteeing the Polish people the undisturbed possession forever of traditional Polish territories.

Unanimously adopted at Hartford, Conn., this 5th day of May 1957.

Maple T. Harl

EXTENSION OF REMARKS
OF
HON. J. EDGAR CHENOWETH
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. CHENOWETH. Mr. Speaker, I wish to join my colleagues from Colorado, and the other Members of the House who have paid tribute to the memory of Maple T. Harl. I was indeed shocked and saddened when I learned of his untimely passing.

I knew Maple Harl for many years and valued his friendship most highly. He considered himself a constituent of mine, as he formerly lived in Canon City in my district. His father was pastor of the First Baptist Church of that city for many years, and an outstanding religious leader of Colorado.

I always enjoyed seeing Maple Harl. He was a delightful person with whom to visit. He had an unfailing sense of humor and had a cheerful outlook on life. He was widely and favorably known. His many business interests brought him into contact with people in every walk of life.

When he was called to Washington to become Chairman of the Federal Deposit Insurance Corporation, he achieved his greatest eminence. It was a popular appointment, and his abilities were immediately recognized. He did an outstanding job as Chairman and Director of FDIC, and enjoyed the confidence of everyone who did business with this important Agency.

Mrs. Chenoweth joins me in extending our sincere sympathy to Mrs. Harl and the other members of the family.

I include an editorial from the Denver Post on Maple Harl which expresses the sentiments of all who knew him:

MAPLE T. HARL

"Mape" Harl had a talent for lasting friendship and a passion for sound banks. The two qualities ennobled the man to many people; and his death at 64 leaves a void wider and deeper than general public familiarity with Mr. Harl's name and works would suggest.

Not only a good citizen and an effective director of the Federal Deposit Insurance Corporation, Mr. Harl was a canny and trusted politician. He was a confident of Harry S. Truman, in fact and not by legend. And he helped steer H. S. T. around some of the boobytraps planted in the path of the little man who was marked for political extinction in 1948 but who fooled 'em all.

Although long active in the Democratic Party of Colorado and of the Nation, President Eisenhower reappointed him to a 2-year term on the FDIC after Mr. Harl submitted his resignation as the agency's Chairman in 1953. And the lifelong Coloradan was kept on the FDIC board by a second reappointment in 1955—a further tribute to his integrity and fairness as an individual, and his devotion to a banking system free of taint and sound in character.

Maple Talbott Harl was an inconspicuous and still influential force for good in this country. His career added luster to the contributions that citizens of Colorado have made in the Nation's behalf.

Rules and Regulations of Federal Communications Commission Should Be Modernized To Better Serve the Public Interest

EXTENSION OF REMARKS
OF
HON. EDWARD H. REES
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. REES of Kansas. Mr. Speaker, under unanimous consent granted me by the House, I am including the testimony of Ralph L. Weir, Jr., delivered before the Senate Select Committee on Small Business where the question of daytime radio problems is under consideration. Mr. Weir is the owner and operator of radio station KJCK in Junction City, Kans.

Mr. Weir makes a convincing statement on behalf of the daytime radio broadcasters. I am sure Members will be interested in reading his testimony.

The testimony follows:

I am Ralph L. Weir, Jr., of Junction City, Kans. I am the owner and operator of KJCK, a 1,000-watt, daytime radio station operating on the regional frequency of 1,420 kilocycles. KJCK began broadcasting on May 15, 1949.

It is with extreme humility that I stand before you today. Being an electrical engineer by education and a small-business man by profession, I can only trust that the strength of my conviction and the sincerity of my testimony exceed my deficiency as a speaker.

First, let me relate a case history that will serve to illustrate how important local radio service can be to a community. This experience is by no means unique, it has been repeated literally hundreds of times in hundreds of communities, involving thousands—yes, even millions of people.

During the Kansas flood in July 1951 KJCK maintained continuous operation 24 hours a day for approximately 90 hours. We did this because rural telephones were inoperative. Farms throughout the whole area were isolated by floodwaters. Long-distance telephone service was discontinued. Several small communities near us were completely isolated. The rural electric power was off. Part of the time our local power was interrupted.

There was no radio entertainment during this period. KJCK was strictly a communication medium. Constant reports were given as to the scope of the floodwaters. The location of rainfall and the anticipated results were given. Areas were advised to evacuate; and how and where to accomplish this. Volunteer help was recruited for specific jobs at critical points as they arose. The military post of Fort Riley, Kans., adjacent to Junction City, depended on KJCK to communicate to their personnel throughout the area, and they were so informed.

Gentlemen, I mention this merely to emphasize the importance of the local aspect of radio; the immediate close touch of radio from mouth to ear, so vital to this age when time is so important.

Now, let's get squarely to this matter of fixed hours of operation. I prefer to say fixed adequate hours of operation. Last week, Junction City held its annual merchants exposition. As usual, the exposition opened with a parade. However, this year the parade was scheduled to begin at 6:30 p. m. It began about 6:40 p. m. Well, you guessed it, gentlemen, 7 p. m. found the parade half ended and my play-by-play announcer apologizing to our audience as he signed the station off the air. Can I build faith and dependability that way?

As you are familiar, the central part of the United States is all too often a victim of that meteorological phenomenon known as the tornado. Our State weather bureau is quite competent and immediately issues special weather warnings to us by telephone. These warnings are nearly always issued late in the afternoon. A radio station that signs off from 5 p. m. in January to 8 p. m. in July cannot establish definite, consistent listening habits. As a result, a daytime radio station's listeners are in a constant state of confusion as to how to receive these important weather bulletins. To me this becomes a serious disservice to the public, who have learned over a period of years that they cannot depend on their local radio station to be on the air at a given time day in and day out.

Many radio stations maintain auxiliary power supplies, extra studio program lines and other emergency operating equipment at a cost of thousands of dollars in order to insure dependable, consistent service under the most adverse circumstances. This is the very code of every broadcaster. But doesn't all of this sound ridiculous in the face of the daytime broadcast station who plays hop, skip, and jump every month of the year with his broadcast hours?

It does not matter what cross section of our community we analyze, they all live according to a fixed pattern. Day after day they wake up very nearly the same time, eat breakfast the same time, leave for work the same time. They want their local news the same time every morning. They want to know what the temperature is outside, if it will rain today, or snow, or freeze their crops or their children. Will the country school buses be running after last night's storm? They want to know this at 6 o'clock or 7 o'clock. Eight o'clock is too late. The children, 6 years old, or 7 or 8, are already out in the cold trudging down the road. Here are the signatures of over a thousand people who want their local radio station to have consistent broadcasting hours, so they can get information when they need it, from 5 in the morning until 7 at night. I did not go out and solicit these signatures; every one of them stopped by my headquarters and signed voluntarily, and during a 3-day period. This, from a town of 15,000 people. I also have four letters, each representing a different segment of our farm people in Kansas. They are as frustrated and confused as my local listeners from chasing KJCK's program schedule around the calendar. I could have had the signature of every responsible person in town. This story could be repeated in each one of the more than 700 communities whose local radio service consists of one daytime radio station.

I believe radio advertising is a vital and necessary tool to the successful operation of the small town business of today. During December, the very month when local radio advertising is needed the most by our local merchants, most daytime radio stations sign on the air at 8 o'clock in the morning or even

8:30. I submit, 8 o'clock is later than the workingman goes to work. These same radio stations must sign off the air at 5 o'clock or even 4:45 in the afternoon in December. Again the workingman is just finishing his day's work. And the same thing holds true for the large number of workingwomen. The fact is, the majority of the local merchant's customers cannot possibly hear a radio sales message in December. The same conditions prevail only to a slightly lesser degree in October and November, and in January and February. How long could any retailer stay in business if he changed his store hours 12 times every year?

What chance does a local merchant have to become familiar with, much less to utilize the powerful advertising value of radio under conditions like these? The cardinal rule in advertising is consistency. Gentlemen, consistency is an unknown word in a daytime radio station.

Our more powerful neighbors in the distant large cities are giving service from early morning until late at night on a consistent basis. It would seem logical that this constant pull centered about the big city would be no small factor in the tendency for small community buyers to commute to large cities to shop; the result, increased hardship on the small local merchant.

It has been said that radio is a technical medium, that certain conditions of ground conductivity and sky-wave reflections, etc., make it impossible to do anything for the daytimer. As a communication engineer, I am not totally ignorant of these terms. That it is a complicated problem I will readily agree, and a solution for which I will not presume to present. However, it has always seemed undemocratic and inconsistent with our great American heritage of equal opportunity for a few select radio stations, who are licensed to operate with maximum power, to have their giant radio signal protected five times as much as all the other radio stations. It is not the American way to have 2 standards governing different segments of 1 industry. Some immediate relief could be given by a reexamination of the true service rendered by all radio stations. Another avenue of approach which seems technically feasible would be 9 or even 8 kilocycles separation of broadcast stations, instead of the present 10 kilocycles separation. This proposal is consistent with the advancement of the modern radio receiver during the past 20 years.

Gentlemen, there is a practical, workable solution which will provide fixed, adequate hours of operation for daytime broadcast stations. I sincerely ask the Senate Select Committee on Small Business to take appropriate action to initiate provision for fixed hours of operation for daytime broadcast stations from 5 o'clock in the morning to 7 o'clock in the evening. Thank you.

Polish National Day

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. MULTER. Mr. Speaker, this year's observance of Polish Independence Day, May 3, 1957, was an occasion for considerable gratification. For the first time since the end of World War II, Poland has been able to wrest from the repressive Soviet Government a measure of autonomy. Difficult as it is for us to observe clearly through the fog of censorship still hampering free communications from behind the Soviet front, a few facts have emerged.

The Gomulka government, with a measure of support from the Polish people in the October uprising, seems firmly established. It is being treated by the Soviet Government, at least outwardly, more as an equal than any other nation among the Soviet satellites.

From the world's point of view, several other facts have become apparent. One is that the unrelenting pressure of propaganda and the constant emphasis upon military force have not produced in the Polish people the attitude of gullibility and fear that the Soviet Government expected. Another very important point to remember if we wish to understand the whole situation in the Soviet bloc is that the very people upon whom the success of the Communist philosophy depends—the working people and the peasants—are the people who are disillusioned about communism.

The granting of permission this year to celebrate the enactment of the Polish Constitution of May 3, 1791, may seem a small gesture, but it is a significant symbol of Poland's new hope. Poland's valiant and bloody struggle, over the past century and a half, for her place among the nations of Europe, the still fresh memory of the hundreds of thousands annihilated in World War II and in the postwar Soviet despotism, and the bitter economic lessons of hunger and deprivation, all these have left the Polish people more determined than ever to achieve a destiny of self-respect and self-determination.

This anniversary was not an occasion for loud and superficial merrymaking. It was, rather, a day for serious deliberation on the problems which Poland faces in her changing role. Americans congratulate the Polish people on their first steps since the Stalin era toward a better future. People of the free nations everywhere must earnestly consider Poland's pressing political and economic problems. We must decide how best to help the Polish people on the thorny road toward their place among us.

Foreign-Aid Perspective

EXTENSION OF REMARKS
OF
HON. CHESTER E. MERROW
OF NEW HAMPSHIRE
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. MERROW. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include therein an editorial from the New York Times, New York, N. Y., on Sunday, May 5, 1957, entitled "Foreign-Aid Perspective":

FOREIGN-AID PERSPECTIVE

It is a good thing to get an occasional change of emphasis in the discussion of our foreign-aid policies. We are always confronted with billion-dollar totals, percentage cuts, proposed or made, and what adds up to a sort of "numbers game" that characterizes budget debate.

A good example of such a shift was given, in one field, by Dr. Howard Rusk, of the New York University-Bellevue Medical Center, when he pointed out to the American Pharmaceutical Association last week that in the course of the past 15 years the point 4 projects in the field of worldwide health have cost Americans less than a penny a month per person. If we could just visualize that in some way, our perspective would be changed.

Suppose we could just drop in every month one penny designated for aid in the health field. And then suppose we could see what is being accomplished. Statistics are often cold-blooded things. But when we learn that infant mortality in a given area has been cut to one-half the previous rate we ought somehow to be able to realize that a given mother in a given village will see her children live instead of die. That makes a vast difference to her—that penny a month—and it ought to make a difference to us.

No aspect of our foreign aid program, Dr. Rusk declared, has bought so much for so little. And at no point can help be better given because it is instantly translated into human needs and the solution of human problems. Dr. Rusk noted the anomaly of a world in which really good health was enjoyed by a relatively few and stated that such a world could not be politically stable.

It is important to realize, however, that the techniques of public-health progress have been so greatly improved, the tools so sharpened, that the few have an opportunity now to render a unique service to the many. This is, after all, the real criterion for an aid program. How well does it serve? This goes deeper than the question of totals, percentages, and economies. It gets to the basis of how people in this world can live with each other and how those who are truly needy can be helped.

Devastating Effects of Hard Money, High Interest Policy

EXTENSION OF REMARKS
OF
HON. WRIGHT PATMAN
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. PATMAN. Mr. Speaker, over the past year in my encounters with represenatives of the administration and officials of the Federal Reserve Board I have tried to dissuade them from pursuing their harmful hard money policies. Time and time again I have tried to show them that their higher interest rates were increasing costs and hence prices, and that this was certainly not the way to fight inflation as they claimed they were doing. In support of my contention is the report of the Wall Street Journal of March 13, which reports that gas, electricity, and telephone bills are going up all across the country due to the fact that during 1955 and 1956 utilities had to offer higher and higher interest rates to borrow funds needed for expansion. This means that over the next 20 to 30 years, regardless of whether prices rise or fall, or whether money is cheap or dear consumers will be saddled with the higher electric, gas and telephone rates brought about by the hard money policy of 1955–56.

What would you think of a doctor who prescribed aspirin every day for 30 years to cure a 10-day cold?

Mr. Speaker, I have also tried to convince the hard money enthusiasts that their fire was hitting innocent bystanders who had little or nothing to do with the inflationary pressures that monetary curbs were supposed to be combating. I have yet to see a big corporation whose expansion plans have been affected by the rise in interest rates or by their inability to obtain credit. In contrast, however, is the picture of small businesses being squeezed out at an unprecedented rate. The Wall Street Journal, March 13, reports that small-business failures are at a 17-year high. For the past 4 weeks small-business failures have exceeded pre-World War II—that means depression—levels. The total number of failures for the week ended March 7 was the highest since April 10, 1940. Yet Chairman MARTIN continues to insist that come what may he will go on resisting inflation, because that as he sees it is the Nation's key problem. And Chairman MARTIN adds that small-business bankruptcies, the lack of schoolrooms and moderate priced housing notwithstanding, he will continue to rely on the open market as the most effective mechanism for allocating the restricted supply of credit that the Federal Reserve chooses to make available. How long will it be before these disastrous policies cause irreversible damage to the health and structure of our economy?

Mr. Speaker, under permission to extend my remarks, I include in the RECORD the two articles from Wall Street Journal which I cited above:

UTILITIES SEEK NEW RATE INCREASES AS BORROWING COSTS RISE—MOST REGULATORY COMMISSIONS ARE SYMPATHETIC—VERMONT SOUNDS A NOTE OF CAUTION

(By Carter Henderson)

The tight money market of the past 2 years is about to raise a little mischief with consumers' electricity, telephone, and gas bills.

That's the major finding of a Wall Street Journal survey of well over half of the Nation's public-service commissions, the agencies charged with regulating utility rates.

During 1955 and 1956, utilities had to offer steadily rising interest rates to borrow funds needed for expansion. Now interest rates generally are showing signs of leveling off. But utility borrowing costs still are holding at high levels—at times, even pushing slightly higher. Minnesota Power & Light Co. on Monday sold $12 million of bonds at an interest cost of 4.64 percent. Last week, Columbus & Southern Ohio Electric Co. sold $16 million of similarly rated securities at an interest rate of 4.465 percent.

A GROWING ROLE

If they are to expand to meet demand for service, utilities must continue to borrow. As higher borrowing costs play a growing role in utility financial statements, public service commissions are lending a more sympathetic ear to requests for higher electricity, gas, and telephone rates.

Down in the sunny Southwest, for example, L. W. Leibrand, chairman of the New Mexico Public Service Commission, says, "We are aware of the increasing cost utilities must pay for new money and realize it can have a most definite effect upon rate payers if the condition continues."

A few hundred miles due east, Ray C. Jones, chairman of the Corporation Commission of Oklahoma, says, "We give consideration to the cost of money in fixing rates, and although no utility has asked for a rate increase recently, we are anticipating them in view of the continued increased cost of money."

These comments mirror the sentiments of more than three-quarters of the 36 State and Federal commissions interviewed.

There can be little doubt that utilities will be a big factor in the money market for months and years to come. Frederick R. Kappel, president of American Telephone & Telegraph Co., says the giant Bell System will need an average of $125 million a month from investors this year to help finance its gigantic 1957 expansion program estimated at $2.5 billion. A. T. & T. already has announced it's hitting the market with $250 million of bonds on March 26.

TWO HUNDRED AND TEN MILLION DOLLARS A MONTH

As for the electric utilities, Donald S. Kennedy, president of the Edison Electric Institute, predicts they'll spend an average of $4 billion a year for the next decade and need some $2.5 billion a year or an average of $210 million a month in th form of fresh capital.

Utilities rely on a whole kitbag of economic crowbars when attempting to pry rate increases out of the commissions. But the unflagging rise in interst rates has given this single lever more prying power than it's had for quite some time.

Late last year, to mention one example, the Maryland Public Service Commission permitted Cumberland & Allegheny Gas Co., a subsidiary of Columbia Gas System, Inc., to raise its prices by 25 percent to yield between $98,329 and $120,854 in additional net return.

The commission's decision followed testimony by Morton Lewis, assistant treasurer of Columbia Gas, who spelled out how Cumberland & Allegheny's costs were climbing—including its borrowing costs which had risen by about 25 percent in 15 months.

A few weeks ago, Public Service Company of New Hampshire informed the State Utility Commission and its customers that it needed a $600,000 increase in annual revenues that would raise residential electricity bills by an average of about 20 cents a month. Avery R. Schiller, president, says the company wants the higher revenues because it "must earn at least 5.65 percent in order to have the reasonable credit standing in today's tight-money market needed to attract new capital for expansion without paying exorbitant interest and dividends."

INTEREST COSTS CITED

Federal Power Commission Chairman Jerome K. Kuykendall says, "We have several applications pending for rate increases in which current interest costs are cited." One of thse is a $24,300,000 increase requested by Tennessee Gas Transmission Co., headquartered in Houston and operator of the Nation's biggest pipeline system.

The company says the higher rates, which might eventually raise customer's gas bills in 13 States, are needed to offset increases in wages, taxes, depreciation, natural gas prices—and stiffer borrowing costs. Tennessee Gas told the FPC that from 1955 to late 1956 it had to increase the yield on new cumulative convertible second preferred stock from 4.65 to 5.17 percent, debenture rates went from 4.03 to 4.66 percent and bond interest fees spurted from 3.8 to 4.64 percent.

Luckily for consumers, the impact of a utility's higher borrowing costs is being softened—for the present, at least—by the fact that utilities sold big amounts of debt securities when interest rates were lower, and by tax considerations.

Utilities are continually in the money market and, over the years, have sold billions of dollars worth of securities at interest rates considerably lower than those prevailing today. These cheaper loans, that often run for decades, hold down a utility's overall borrowing costs.

Taxes are important, too. The interest a utility pays on borrowed money is an allowable tax deduction, so the Government, in effect, absorbs part of the impact of higher borrowing costs.

Public service commissions are overwhelmingly in favor of allowing utilities to pass on their higher borrowing expenses to consumers, to be sure. But one commission hints at what may happen if rates later decline.

P. M. Schuchart, director of the Florida commission's public utilities department says, "Whether borrowing costs go up or down, we will recognize them as a legitimate operating expense."

The Vermont Public Service Commission comes up with a word of caution to utilities. "It's the rate payer who must pay the freight when higher rates of return are granted," says Oscar L. Shepard, commission chairman, "and I believe it to be imperative for utility company officials to give serious thought before they embark upon a too ambitious program of plant expansion, expecting utility commissions to accede to demands for higher rates to pay for such programs."

BUSINESS FAILURES AT 17-YEAR HIGH

NEW YORK.—Commercial and industrial failure climbed in the week ended March 7 to a 17-year high, according to Dun and Bradstreet, Inc. The total of 327 was well ahead of the 284 reported for the preceeding week and far more than the 268 in the like week a year ago and the 258 in 1955. Failures have remained above pre-World War II levels for the past 4 weeks, and the latest weeks total was the highest since the period ended April 10, 1940.

Congressman Glen Lipscomb

EXTENSION OF REMARKS

OF

HON. PATRICK J. HILLINGS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1957

Mr. HILLINGS. Mr. Speaker, our distinguished colleague, the gentleman from California [Mr. LIPSCOMB] was praised by Columnist George Todt in the April 19, 1957, issue of the Valley Times of California's San Fernando Valley. As Mr. Todt's article points out, the gentleman from California has saved the taxpayers a considerable sum of money by his courageous and forthright action in ferreting out waste and inefficiency in the Federal Government.

The article follows:

GEORGE TODT'S OPINION

"If it is not true it is very well invented."—Giordano Bruno.

If this Nation had a few more courageous young Congressmen like GLEN LIPSCOMB, of California's 24th Congressional District—men who are not afraid to take on sancrosanct sacred cows when the occasion warrants doing so—we would all be considerably better off.

This quiet young man has just exploded the myth of the infallible public opinion poll. He didn't spar, feint, or dodge about his business. Just quietly collected his facts on an incredible foreign aid poll he had reason to be suspicious about. It seems the boys were putting out the information that 9 out of 10 taxpayers named Joe Doakes were

straining at the leash to continue foreign aid handouts around the globe. This notion didn't square with Mr. LIPSCOMB's mail count—which had been running 2 to 1 against giveaways.

It was the International Cooperation Administration, to be exact, which seemed to be the fountainhead of knowledge in this instance. Public support was at an all-time high they were saying in some inspired Washington newspaper accounts. Particularly after the terrific public relations impact on the American public of one Jawaharlal Nehru of India. This struck the young California legislator as perhaps spreading it on just a little too thick. His curiosity became aroused and he commenced to ask some direct questions at the horse's mouth.

After an appropriate amount of runaround—and incidental hogwash, gobbledygook, and mumbo-jumbo of varying descriptions—the truth finally came out. And what did the Congresman find? Lo and behold. Talk about embarrasment and red faces. Well, the dear old State Department was really in a tizzy about it all, because—you've guessed it—State had dipped into a secret hush-hush fund and paid for this little rodger-dodger all on their own. Only—curses—nobody was supposed to find the blamed thing out. Oh, well, keep a stiff upper lip and all that sort of thing, ole boy, ole boy. And better luck next time.

What makes this particular poll look so silly after the smoke was cleared away stems from the fact that it was based on only 1,300 people questioned. This is supposed to give an accurate account of the opinions of more than 100 millions of registered voters in our Nation. Could anything be more ludicrous than this? How come this little batch of 1,300 were found to be 90 percent in favor of foreign aid? Isn't it odd, though? Where can you really find figures like that anywhere in America today? How about asking the next 10 people you meet?

In Mr. LIPSCOMB's own district he found that 61 percent were against foreign aid in a questionnaire he supplied his constituents; only 39 percent were for overseas handouts. In Wisconsin Representative LAWRENCE SMITH, found 64 percent against foreign aid. Representative HARRISON, in West Virginia, reported 78 percent against. Representative MCGREGOR, of Ohio, came up with 57 percent nixing the controversial item. Compare this with the poll—bought and paid for by the State Department—which claims 90 percent of us are pleading to pay more taxes so that the British and others of our worldwide friends may be allowed to cut theirs. Ho hum, and what hot weather we're having in January these days.

Oh well, this poll conducted by the National Opinion Research Center in this particular instance is hardly more difficult to believe than the recent Gallup poll which insisted that 74 percent of those it questioned of the GOP were modern Republicans. Mr. Gallup allowed conservative Republicans a trifling 18 percent and guessed that 8 percent didn't know what they were supposed to be. It would be interesting to know if Mr. Gallup's cross section of the Republican population even included as many as 1,300 souls. What was his basis of determination as to just who should get his questionnaires? How was it done?

Here is another sacrosanct "sacred cow" which ought to be fully investigated by the Senate Investigating Committee in Washington. Not only the Gallup poll, but others like it. There is something fishy here. The American people are being increasingly asked to accept the Gallup poll, and others, as a basis for legislation in this Nation. If this Princeton product was completely devoid of political overtones, it might be a good thing—but dangerous, nevertheless. For you can prove anything by figures.

When we look behind the scenes, we find Dr. George Gallup, a confirmed liberal in his outlook, surrounded by fellow liberals—and he has yet to give a conservative finding in any of the readings I have ever looked at. Never a 50–50 break, as one might expect. Always the findings are heavily weighted toward the liberal left—and no exceptions.

How come this has turned into another "sacred cow," Senators? Couldn't we just check this one out for the record? How about a little look-see in this important propaganda area? Hmmm?

Legislative Oversight Subcommittee Outlines Scope of Its Work

EXTENSION OF REMARKS

OF

HON. OREN HARRIS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. HARRIS. Mr. Speaker, I wish to advise, for the information of the Members of the Congress, an outline of the scope of the work by the Subcommittee on Legislative Oversight of the House Committee on Interstate and Foreign Commerce by the committee, Thursday, April 18, 1957.

Pursuant to our suggestion, Mr. Speaker, at the time the resolution authorizing the work of our Committee on Interstate and Foreign Commerce was being considered, I announced the appointment of a special subcommittee for this work on March 6, 1957. I am enclosing herewith a copy of the announcement in order that we may have a continuity of the delopment of this program and the appointment of the committee.

The special subcommittee has functions as outlined in section 136 of the Legislative Reorganization Act of 1946. Each standing legislative committee of the House was given the responsibility of exercising continuous watchfulness and appraising the administration of the laws of the agencies of Government within the jurisdiction of the committee. The work was referred to in that act as "legislative oversight." The term, according to Webster's, means "watchful care or supervision."

I named our colleague, the Honorable MORGAN M. MOULDER, as chairman of the special subcommittee. Mr. MOULDER was the next Member in seniority on our committee whom I had not designated as a chairman of an important subcommittee and with important work to do. I, therefore, want to make it perfectly clear, Mr. Speaker, that he as an able member of our committee and in whom I and other members have utmost confidence was the logical and appropriate selection for the chairmanship of this important work.

We selected eight other members of our committee, whose names are included in the attached statement, all outstanding, able and experienced members.

In addition, our colleague, Mr. WOLVERTON, the ranking minority member of the committee, and I, as chairman of the committee, are active members and who will assist in this important undertaking. On April 18 the committee met and thoroughly discussed this program and a desire to do a good and objective job.

I agreed to the scope of its work that we should undertake. I include a copy of this outline as announced by Mr. MOULDER, chairman of the subcommittee, at this time:

MARCH 6, 1957.

OREN HARRIS, Democrat, Arkansas, chairman, House Committee on Interstate and Foreign Commerce, today announced the appointment of a special subcommittee to review, study, and examine the execution of the laws by the administrative and independent agencies of the Government within the jurisdiction of the committee.

Section 136 of the Legislative Reorganization Act of 1946, which is included in the rules of the House of Representatives, provides that to assist the Congress in appraising the administration of the laws each standing committee of the House of Representatives shall exercise continuous watchfulness of the execution of the laws by the administrative agencies of the Government within the jurisdiction of the committee.

In addition, House Resolution 99, 85th Congress, authorizes the committee to investigate and study the administration and enforcement by departments and agencies of the Government of provisions of law relating to subjects which are within the jurisdiction of such committee.

In the consideration of the resolution by the House of Representatives on February 5, 1957, Speaker RAYBURN, former chairman of the committee, stated: "I trust that the gentleman will set up a subcommittee, and I think under the broad authority of this resolution he has that authority, to go into the administration of each and every one of these laws to see whether or not the law as we intended it is being carried out or whether a great many of these laws are being repealed or revamped by those who administer them."

Chairman HARRIS and Mr. WOLVERTON will be ex officio members of the subcommittee, with voting privileges.

The membership of the subcommittee is as follows:

Special Subcommittee on Legislative Oversight: MORGAN M. MOULDER, Democrat, Missouri, chairman; JOHN BELL WILLIAMS, Democrat, Mississippi; PETER F. MACK, Democrat, Illinois; JOHN J. FLYNT, JR., Democrat, Georgia; JOHN E. MOSS, Democrat, California; JOSEPH P. O'HARA, Republican, Minnesota; ROBERT HALE, Republican, Maine; JOHN W. HESELTON, Republican, Massachusetts; JOHN B. BENNETT, Republican, Michigan.

APRIL 18, 1957.

Representative MORGAN M. MOULDER, chairman of the Subcommittee on Legislative Oversight of the House Committee on Interstate and Foreign Commerce, announced that in executive session today the subcommittee had adopted, with the approval of Committee Chairman OREN HARRIS, the following outline of the scope of the subcommittee's activities:

PURPOSES

To examine the execution of the laws by the administrative agencies, administering laws within the legislative jurisdiction of the committee, to see whether or not the law as Congress intended in its enactment has been and is being carried out or whether it has been and is being repealed or revamped by those who administer it.

DUAL APPROACH

1. Whether the law has been and is being faithfully executed by the agency in the public interest.

2. Whether the law and the statutory standards it contains have been and are be-

ing interpreted by rule, or internal procedures, to enlarge the area of regulation beyond that intended, and to administer it through procedures not intended by the Congress.

AGENCIES TO BE EXAMINED

1. Civil Aeronautics Administration, Civil Aeronautics Board, Federal Communications Commission, Federal Power Commission, Federal Trade Commission, Food and Drug Administration, Interstate Commerce Commission, Securities and Exchange Commission.

2. Bureau of Standards, National Institutes of Health, National Science Foundation, Weather Bureau.

3. Foreign Claims Settlement Commission, Office of Alien Property, Public Health Service, Railroad Retirement Board, and other agencies within legislative jurisdiction of the committee.

SUBJECTS TO BE CONSIDERED

1. Review and analysis of the law and amendments, and intent of the Congress when enacted.

2. Area of the field regulated by each law, changing circumstances and growth of the field since enactment.

3. Consideration of the legislative standards in the law to determine whether they can be drafted in more precise terms with the view of reducing administrative discretion.

4. Consideration of rules and regulations issued by the agency under the discretionary delegations, reconciliation with statutory standards and legislative intent, manner in which rules have been applied in practice.

5. Administrative interpretations and practices apart from formal rules and regulations, public notice of such interpretations and practices, extent to which in fact administration is by internal interpretations as distinct from published rules.

6. Judicial decisions on the administration of the law by the agency, the statutory standards, rules and regulations, and administrative interpretation; enlargement of area of regulation supported by the decisions.

7. Enforcement of statute, rules, and regulations.

8. Organization of agency.

(a) Independence and bipartisanship of Commission, as intended in its creation; identification of the regulators with the regulated.

(b) Personnel: Experience, relationship to agency policy, status under civil service.

(c) Workload, distribution of personnel as to statutory duties or on duties assumed through administrative interpretations, coordination with State and other regulatory agencies, trade or industry enforcement groups.

New Head of AVC Direct Descendant of Soldier Under Washington

EXTENSION OF REMARKS
OF
HON. BARRATT O'HARA
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. O'HARA of Illinois. Mr. Speaker, I am proud and happy to announce to the House the election of W. Robert Ming, Jr., a distinguished constituent in the second district of Illinois, as chairman of the American Veterans Committee. Mr. Ming is the first Negro in the United States to become the national head of an organization of the character of AVC, which has a membership of 27,000 and chapters both in the North and the South.

For myself as a member of AVC, and for all the men and women of the great and democratically integrated district that I have the honor to represent, I commend AVC for its action and congratulate this fine and dedicated organization on its good fortune in having as its national head a veteran of the high character and outstanding ability of Bob Ming.

I am extending my remarks to include excerpts from an article in the Chicago Tribune of May 4, 1957 by the brilliant Negro writer, Roi Ottley, as follows:

"My election demonstrates the fact that race is an irrelevancy in the organization," Ming said. "However, I believe the group was not unmindful of the impact the election of a Negro would have, particularly abroad.

"I hope this development will serve, if only in a small measure, to demonstrate further the real movement in the United States toward racial integration. I hope, too, it will encourage young Negroes to prepare and compete more and more in the mainstream of the American community."

Ming led the successful fight in 1949 to expel Communists from the veterans committee.

As chairman of the national board and executive committee, he will be the organization's spokesman. He also will supervise the executive offices and major commissions, and head fund raising drives and membership promotions.

"The organization will give close scrutiny to social and political problems in an effort to formulate positions which will be consistent with the ideals and aspirations of the American people," Ming said.

Ming, a former assistant attorney general of Illinois, was born in Chicago, May 7, 1911, the son of a municipal employee, now retired and a direct descendant of a Revolutionary War soldier. He attended Englewood High School, Crane Junior College, and in 1931 entered the University of Chicago Law School.

He was the first Negro elected to the Order of Coif, an honorary group at the university limited to 10 students of the top 10 percent of a class. He also was elected to the board of editors of the Law Review, the first Negro to achieve this distinction.

GETS DEGREE IN 1933

He graduated in 1933 with a doctor of laws degree. He taught at Howard University, Washington, D. C., and afterward joined the faculty of the University of Chicago Law School.

Ming, a member of the Chicago Bar Association and Cook County Bar Association, now is a senior member of the firm of Moore, Ming & Leighton.

He is married to the former Irvena Harvey, a social worker, and lives in the Kenwood-Hyde Park area.

Small Business Needs More Than Election Campaign Promises

EXTENSION OF REMARKS
OF
HON. WRIGHT PATMAN
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. PATMAN. Mr. Speaker, during the political campaigns of 1956 it was recognized that small business needed help. It was recognized that small business needed tax relief. It was recognized that small business needed help in securing credit and capital for survival and growth. Therefore, promises were made that the needed help would be forthcoming.

On May 16, 1956, I addressed the House and included in my statement on that occasion an abundance of statistics dramatizing the fact that the status of small business had been rapidly deteriorating. Some of these statistics were so shocking that many persons in responsible positions expressed concern about the situation. In fact, within 2 weeks President Eisenhower manifested a concern about the situation. On May 31, 1956, he appointed a Cabinet Committee on Small Business to investigate the economic conditions of small business enterprises and the policies of the Federal Government that could relate to the establishment and growth of small businesses. In that connection the President said that this newly established committee should keep the Federal Government "fully abreast of developments that affect small businesses. Its programs and policies aimed at assisting small business should be carefully reviewed at this time with the object of strengthening them where necessary, and of making recommendations for steps that will provide such enterprises with additional constructive assistance."

On August 7, 1956, the President's Cabinet Committee on Small Business made a report. In that period of national political campaigning that report was widely publicized. It contained statements looking with favor upon and recommending consideration of proposals providing tax relief for small business. The report contained a number of other proposals for helping small business. The President announced his favorable reaction to those proposals.

In the period of August, September, and October 1956, spokesmen for the administration of the Federal Government gave assurances that ways and means for providing tax relief and other helps to small business were under consideration and would be put forward at an early date.

I believe it is time to review and compare the administration's performances with those promises. When we do that we find that those promises have not been fulfilled. Perhaps they have been encased and stored away in the museums for safekeeping to be brought forth again in 1958 and in 1960 to be polished and held out to small business as new hopes on those occasions. However, I venture to predict that the administration and its helpers on Madison Avenue will find that the Barnum philosophy will not be successful when they attempt to apply it to small business. Small business is aware of what is happening to it. It is watching this administration. In 1958 and in 1960 it will not be fooled by the dusted-off, polished-up, promises that were used in 1956. Small business will know that those promises were not fulfilled. Indeed, "small business is up in arms these days" about the failure of this administration to live up to its

promises of 1956. In that connection I refer to an article by John Harriman which was published in the Boston Daily Globe Thursday, April 18, 1957. That article is entitled "Brushoff in Washington Angers Small Business." It is as follows:

BRUSHOFF IN WASHINGTON ANGERS SMALL BUSINESS

(By John Harriman)

Small business is up in arms these days.

It is bitter over the deal it has received in Washington. It is deeply concerned over its future, and worried enough about the present.

And it is more than a little sick of having to listen to political platitudes and the old malarky which, in the words of a Business Week article last summer "put small business on a pedestal along with motherhood and purity on Pennsylvania Avenue," while doing nothing to solve its problems.

PROFITS DOWN TO LESS THAN 3 PERCENT

The fears of the future of small businessmen arise from a few quite startling figures.

Last year corporations doing over $100 million in sales, showed an average net on sales of 7 percent.

Those with sales of $10 million earned 5 percent.

But companies doing less than $1 million showed only 2.7 percent, and those doing less than $250,000 earned only 2.3 percent.

It need hardly be pointed out how vulnerable these smaller companies with their low margin are to any decline. Indeed, it might be argued that the plight of these smaller concerns is a perhaps not generally recognized Achilles heel to the whole economy.

Back of this situation are several factors. The habit of big corporations in recent years of granting wage increases, and passing the cost along to the public in price boosts. Small business, selling as a rule in tight, price-competitive markets, must meet the wage increase without being able to boost its price.

The fact that smaller businesses as a rule do not have the wherewithal to put huge sums into new, laborsaving machines, which might help hold down their costs.

And because smaller businesses do not often control their own sources of raw material, and in buying raw materials must hence too often pay the big corporation piper.

HUMPHREY PLUS NAM AND CHAMBER OF COMMERCE

All during the last political campaign, small business listened to the most lovely promises. It listened, too, to a report to President Eisenhower by the Cabinet Committee on Small Business. And it read with interest the two-volume report on its problems by the Joint Economic Committee.

As a result, small business had expected that at least some of the recommendations by these various agencies would be adopted—most specifically that which would reduce the income tax rate on the first $25,000 of corporate income.

But Secretary of the Treasury Humphrey gave the coup de grace to this hope in testimony before the Senate Finance Committee last month when he asked the continuation of the present tax rate and added that the decision must be made in 10 days, leaving no time for "study" of the small business problem.

Mr. Humphrey, who works strong magic in Congress, was supported by the stand of the National Association of Manufacturers, and the United States Chamber of Commerce. These organizations took the position that they did not wish to see the rate on small business reduced until all taxes were reduced.

This, to small business, was the final straw, the most unkind cut of all. Particularly the action of the NAM. That organization has always maintained that it represented small business interests as well as that of the big corporations. But right now small-business men are saying, "maybe."

Some Views on Senator Joe McCarthy

EXTENSION OF REMARKS

OF

HON. LAWRENCE H. SMITH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. SMITH of Wisconsin. Mr. Speaker, George Sokolsky, one of the leading columnists in the United States knew Senator McCARTHY intimately. His appraisal of the man is set forth in his column for last Saturday:

[From the Washington Post of May 4, 1957]

Much has been written and said about Senator JOE MCCARTHY during the past several days while he lay dying and when he finally went to his Maker.

I knew JOE intimately and favorably. No matter how men may differ about him, I always knew that JOE MCCARTHY had no interest other than the welfare of his country. He firmly believed that all Communists had to be traitors and he set out to find them. He was successful in some measure, but he also suffered from a sense of failure because he knew that agencies of Government and high officials protected men and women whom they should have despised. He sought for motives and often reached the conclusion that many men were fearful that their own mistakes would be exposed; he felt that fear and vanity rather than ideological positions played a great part in determining men's attitudes toward him and his work.

We often discussed the brutal force of the opposition to him and this he never understood, because he could not believe that some of his opponents wanted to protect Communists. He never understood the Army fight upon him because he held that it was the Army's first duty to protect this country from Communists and traitors. I was present at the notorious luncheon in New York when MCCARTHY, Secretary of the Army Robert Stevens, and his counsel, John Adams, lunched and drank and cavorted throughout an afternoon. What came out at the McCARTHY-Army hearings was never the whole story nor had the various versions of the Cohn-Schine episodes anything to do with the situation at all. And I can say, from firsthand knowledge, that Bob Stevens had little or nothing to do with the effort to destroy MCCARTHY.

This was a political maneuver to eliminate MCCARTHY's importance, to kill his influence as an American citizen, to make his name abhorrent and to frighten off any Senator, journalist, or radio commentator who chose to support him or his cause. So far as JOE MCCARTHY was concerned the maneuver succeeded to a startling degree.

Those who engaged in it—and their names came out during the hearings—knew JOE's characteristics; they knew that he was gentle and aggressive; rough in the fight and forgiving immediately afterward; humble in his heart but giving the impression of cantankerousness. They also knew that while he appeared to be hale and even physically powerful, he was not a strong man, suffering physical pain, sometimes so much pain that he had to give way to it.

They knew all his weaknesses, for some of them had, since he came to the Senate, acted as though they were his close personal friends. They left him bitter, disillusioned, hurt. He was hounded to death by those who would not forget and could not forgive. He was a lonely man among his associates and he often wondered who were his friends.

He and Jeannie adopted a little girl and that brought JOE a happiness which he had not ever known before. There can be no question that he regarded the 1958 election as a problem because he realized the forces that would be pitted against him. He believed that he would ultimately win that election and he said that he did not fear his opponent, Walter Kohler, but there can be no question that he recognized that he would have to take on the entire Eisenhower administration, the modern Republicans, the Committee for an Effective Congress, the money that would be raised against him in New York by the mysterious Arthur Goldsmith, the Communists, their fellow travelers and dupes. It meant a fight—a terrific fight and his health was ebbing away.

It is often said that you can only really know a man if you live with him. I did not live with JOE under one roof, but there were times when we saw much of each other and when I was intimately concerned with his effort to drive the Communists from American life. As an American, as a Jew, as an anti-Communist, I can proudly say that JOE MCCARTHY was my friend and that I have never encountered an opponent of his who equaled him in patriotism and courage. God bless his soul and forgive those who sent him to his death.

[From the Boston Herald]

IMPOSSIBLE TO SEE HIM CLEAR

It is impossible to see JOSEPH RAYMOND MCCARTHY clear, for the smoke of his battlefields still hangs about him even in death. All we can know is that something extraordinary has passed from the American scene, and if it was a good thing or a bad thing those who come along after us will have to decide. None today, as we have said, can honestly balance that account with JOSEPH MCCARTHY. He was spectacularly great for something, and for what that was we must wait a time of greater objectivity.

[From the Philadelphia Bulletin]

WAR ON REDS TO GO ON

Death has removed from the American political scene one of its most picturesque and vehement actors. MCCARTHY was as able as he was active in his prime. He was astute, vigorous and relentless. Doubtless many share his view that to stamp out the termites who work secretly to undermine our Government it is necessary to deal harshly not only with the guilty but with the suspected. Despite the passing of the chief huntsman in political circles, the warfare on the Red underground will go on. It is regrettable that Senator MCCARTHY did not live to attend ultimately the funeral of the Communist Party in the United States.

[From the Daily News and the Daily Mirror]

ABSOLUTELY TOP-DRAWER

He was a complete patriot. He alerted the American people to the criminal Communist conspiracy to overthrow the Government of the United States. Though he made occasional mistakes, we think he was a great man, and that the Nation's loss is correspondingly great. A man is often measured by the enemies he makes. Judging from his choice assortment of characters, both here and abroad, who hated and feared Senator MCCARTHY, he was absolutely top-drawer.

[From the Daily Mirror]

MAN WHO DID NOT RETREAT

Senator JOSEPH R. MCCARTHY was a young giant of our times. Communists and leftists hated him because they feared him. Millions of patriotic Americans loved him. Many were puzzled by his tactics, but none by his purpose. He struck hard at a time when powerhouse punching was needed. Sometimes the swings were wild. We criticized him for his means, never for his ends. Perhaps he was unwise to take on the United States Army brass, but that battle, if it accomplished nothing else, ended any lingering, vestigial tolerance of communism in the Armed Forces. He was a man who did not retreat. He was fearless. America has lost a warrior. The war toward which he contributed so much goes on.

[From the Chicago Tribune]

TARGET OF SMEAR CAMPAIGN

Senator MCCARTHY was a patriotic American and a determined opponent of Communists. And because of that he was made the target of the greatest organized smear campaign of our day. Every "liberal" commentator and newspaper lost no opportunity to vilify him. The White House palace guard plotted his ruin. The President singled him out for studied insults. No man in public life was ever persecuted and maligned because of his beliefs as was Senator MCCARTHY. He took it all without a whimper and stuck to his guns. The Republic has lost a stalwart defender.

[From the Star-Ledger]

DEBATE MAY LAST FOR YEARS

The debate may go on for many years before a conclusive judgment of his value can be arrived at. While controversy rages over his political activity, there can be no questions of the man's unique spirit and courage, which knew no bounds. If some of his enemies thought of him as a would-be dictator, those who knew him were aware of a deep sense of humor that would not have permitted himself to accept blind adulation and the trappings of a dictatorship. He was not one-tenth as calculating in his methods as his enemies feared him to be.

[From the Free Press]

NEVER ANY GRAY TONES

There were never any gray tones where Senator JOSEPH R. MCCARTHY was concerned. Reaction to him was either sharply black or white, depending upon how people felt about the issues in which he became involved, and the methods he employed in connection with them. If we could distill the essence of his philosophy, and for the moment disregard reckless methods, we might find the purest patriotism. For the moment, we are willing to recognize that sincerity, letting time and history's perspective arrive at what judgments they may.

[From the Canadian Press, Toronto, Canada]

SMEAR ATTACK CHARGED

TORONTO, May 3 (Canadian Press).—Ronald Gostick, director of the Canadian Anti-Communist League, said in a statement today that the death of Senator MCCARTHY was attributable to a general breakdown in his health brought on by the smear attack launched against him by the leftwing and liberal press and propagandists in recent years.

In a telegram to Mrs. MCCARTHY, Mr. Gostick said the Senator's death had come as a great shock to anti-Communist and Christian patriots in Canada.

[From the Journal-American]

SABER-SLASHING WARRIOR

In the death of Senator JOSEPH R. MCCARTHY the forces of freedom in the United States have lost a fierce and valiant warrior. He was a saber-slashing warrior. Riding the steed of dedication he sounded the alarm and pressed the battle against Communists, fellow-travelers and anti-anti-Communists wherever it led. Neither prestige nor influence deterred JOE MCCARTHY, neither slander nor scorn swerved him. Where he saw his duty, he did not parry; he charged. In this era no other man was more admired or more vilified. There were times when his saber swings were misdirected. But these few occasions were inevitable. His enemies sought to pervert and disgrace his motives. The warrior from Wisconsin had only one motive and he never deviated from it. It was to smash the Communist conspiracy.

STATEMENTS BY SENATOR JAVITS AND SENATOR RUSSELL

Senator JACOB K. JAVITS, Republican of New York: The death of so young a Senator of such strong convictions is truly sad. It should be our hope and aim that in the national interest the warnings of Communist subtlety and duplicity uttered by Senator MCCARTHY will long survive the controversy about his methods of investigation. My deepest sympathy goes out to Mrs. McCarthy.

Senator RICHARD B. RUSSELL, Democrat of Georgia: I deplore the untimely passing of Senator MCCARTHY and extend my deepest sympathy to his family. He was a controversial figure and I often disagreed with him, but his word was as good as his bond and he could always be depended upon to do what he said he would do. He was forthright in expression and no one had trouble in knowing his views on any matter.

[From the Milwaukee Sentinel, May 3, 1957]

VALIANT WARRIOR

In the death of Senator JOSEPH R. MCCARTHY the forces of freedom in the United States have lost a fierce and valiant fighter.

He was a saber-slashing warrior. Riding the steed of dedication he sounded the alarm and pressed the battle against Communists, fellow-travelers and anti-anti-Communists wherever it led.

Neither prestige nor influence deterred JOE MCCARTHY, neither slander nor scorn swerved him. Where he saw his duty, he did not parry; he charged.

In this era no other man was more admired or more vilified. There were times when his saber swings were misdirected. But these few occasions were inevitable in a nature so intensely committed to the anti-Communist cause, and to a man of his burning patriotism.

His enemies coined the word "McCarthyism"—straight out of the Communist propaganda machine—as a brand name of disrepute. JOE MCCARTHY seized it and turned it against them.

His enemies sought to pervert and disgrace his motives. The warrior from Wisconsin had only one motive and he never deviated from it.

It was to smash the Communist conspiracy.

We on this newspaper have lost a friend. His country has lost a champion of liberty.

He served it well.

A TRIBUTE FROM THE WISCONSIN STATE LEGISLATURE—LEGISLATURE PAUSES TO PRAY

MADISON, WIS., May 3.—Both houses of the Wisconsin Legislature paused in prayer briefly today for Senator MCCARTHY.

The Rev. Donovan Palmquist, pastor of Central Lutheran Church here, delivered the prayer in both houses.

He asked God to "raise up from among the citizens of this State a God-fearing servant to serve as our Senator, one who will continue to protect and preserve the rights of this free country and who will serve as leader of the truth, equality, justice and peace for the world."

Mr. Palmquist continued:

We thank God for the life of Senator MCCARTHY and for his contribution to the American way of life. We thank Thee for him as a fighter of communism, defender of free speech, and as one who was concerned about the needs of people not only in Wisconsin but throughout the world.

[From the Kenosha (Wis.) Evening News]

JOE—COURAGEOUS, CONTROVERSIAL

The death of Senator JOSEPH RAYMOND MCCARTHY brings to an end one of the most flaming political careers in the history of this State and the Nation. His death, however will not end the controversy between those who charged him with opportunism and driving ambition and those who defended him as the outstanding champion of anticommunism.

JOE'S career was a strange one—from 1950 to 1954 at least half of the public rated him as one of the ablest men in Congress, one of the most courageous of public servants. Then came the Senate vote of condemnation in November 1954, and his virtual eclipse as a national political leader, no longer a man to be quoted on national issues of the day, as though he were identified forever with a lost cause.

Even during the peak of his career as a fervent apostle of American nationalism, Senator MCCARTHY often was not given his due. His method of approach to the problems of the military and communism split the country. Yet there were few men of his stature, few ready to stand up and fight, and among his supporters was the great conservative, Robert Taft.

It will long be remembered that Senator MCCARTHY was touched with greatness, for his influence was felt for a number of years in many political battles in many States and arenas. It was not odd that JOE in recent years was not in the good graces of President Eisenhower, for the military has a way of rapping the fingers of any person who makes a bare-knuckle attack upon its citadel. It is well to remember that it was Senator MCCARTHY who lambasted Gen. George E. Marshall, Eisenhower's patron in the Army.

What we all can be sure of in Senator MCCARTHY'S career is that he was a man with determination, patience, and courage such as possessed by few men in or out of public office. In the face of bitter newspaper and other criticism, he stuck to his guns. Though at times he was generally denounced, his resignation demanded, he kept right on wading in.

Someday the JOE MCCARTHY story will be told adequately, and it seems to us that it will show he was able to rise above self-interest when the national interest was at stake—when it counted the most.

There are a good many Kenoshans who are going to miss having Fighting JOE as their spokesman in Congress. There are others who will say he was not constructive, but friend and foe deplore his death at the comparatively young age 48. He may not rank with the highest statesmen, Clay, Webster, Calhoun, LA FOLLETTE, Taft, but he will not be soon forgotten, either.

Arab Torrent of Hate Keeps Rolling On

EXTENSION OF REMARKS

OF

HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 15, 1957

Mr. MULTER. Mr. Speaker, the following excerpts from press and radio further point up the necessity of a se-

curity pact with Israel. These excerpts appeared in the Israel Digest of April 8, 1957.

The excerpts follow:

ARAB TORRENT OF HATE KEEPS ROLLING ON

EGYPTIANS RETURNING TO GAZA

"Reliable sources report that preparations are now going forward for the return of the Egyptian Army to the Gaza strip. This move will be part of the Egyptian plan to restore the situation in the strip to what it was in October 1956." (Radio Beirut, March 20.)

"Official Egyptian circles refuse to comment on the various reports that have been circulated according to which the Egyptian Government proposed to Mr. Bunche that it would not send its army to Gaza * * * Egypt cannot possibly make such a promise; on the contrary, reports point to the preparations now being made to have the Palestinian Army of Egypt take over the positions it previously occupied in the Gaza strip." (Radio Beirut, March 21.)

ARABS MUST CRUSH ISRAEL

"The Arab people of Kuwait have started to move forward, to stand side by side with the Arabs of the gulf and to unite their struggle with the rest of the Arabs. The Arab States must triumph over imperialism and its underlings and crush Israel—and thus achieve their desired supreme unity." (Voice of the Arabs, Cairo, March 5.)

NO ISRAEL SHIP SHALL PASS

"Freedom of passage for Jewish vessels in the Gulf of Aqaba means a threat to the existence of the Arab nation. We have to be cautious and alert in the face of every attempt to transform UNEF into a conquering force, and against the internationalization of the Gulf of Aqaba and the Gaza strip. If such a thing were to occur, it would be similar to the disaster of Palestine." (Ikhsan el-Jabri, chairman of the Syrian Parliamentary Foreign Affairs Committee over Radio Ramallah, Jordan, March 5.)

"Saudi forces are being stationed on the island of Sanafir and, with heavy guns, are threatening any Israel vessel seeking to pass through the Straits of Tiran." (Radio Cairo, March 8.)

Suleiman el-Nabulsi, the Prime Minister of Jordan stated, as reported over Damascus Radio said: "The Arabs have the right to close the gulf or open it to shipping according to their own wishes * * *. No state has the right to send ships through the Aqaba Gulf without Arab permission." (Radio Cairo, March 7.)

WE ARE ISRAEL'S ENEMIES

"News of Egypt's announcement that she was reinstituting her administration in Gaza passed like a violent storm in the foreign press * * * It accused President Nasser of trying to restore the previous situation, allowing him to renew the war against Israel and to turn the Suez Canal into a bargaining point against the world. It also said that President Nasser is playing with dynamite and that he is determined to expose Israel to fedayeen raids. To all this we answer: We believe that Israel is the source of evil in the Middle East and in all the world, and, before the eyes and ears of the world we say openly, We are Israel's enemies." (Al-Jihad, Jordan Daily, March 17.)

"UNEF is bound to hand over the Gaza strip to the Arabs without any of the imaginary conditions envisaged by Israel. The Jewish dream of freedom of navigation is one thing—the existence of a state of war between the Arabs and Israel is another." (Falastin, Jordan Daily, March 6.)

TOMORROW WE WILL REGAIN PALESTINE

"Tomorrow, with the help of Allah, Palestine will be regained * * * and the unity of the Arab state will be completed." (Al Bilad, Jordan Daily, March 11.)

On the same day, the Jordan daily Al Bilad, also commemorating the revolt, said: "At this hour we recall in our blessing, King Hussein. We beseech God to watch over King Hussein as a treasure for the Arab world. May his hands and the hands of his brethren regain Palestine." (Al Bilad, Jordan daily, March 11.)

WE WILL SOLVE THE PALESTINE PROBLEM

"What can the world expect from a state of gangsters? * * * All we have said should be quite clear. Every conflict between the Arabs and Israel will be solved neither by East or West, but by the Arabs themselves." (Al Jihad, Jordan daily, March 3.)

"I was glad at the Israeli departure from the Gaza strip, and because of the disappearance of the heavy shadow from over the beloved city. But what hurt my soul was that the Jews left in fulfillment of the U. N. Assembly resolutions. My rejoicing would have been greater had their departure been the result of a decisive battle with the Arabs." (Al Dif'a, Jordan daily, March 10.)

NASSER TO JORDAN STUDENTS

In a speech to Jordan students who came to greet him in Cairo after Israel's withdrawal from Gaza, Col. Abdel Nasser said: "Arab nationalism is the ammunition * * * which we shall use against Zionist hopes * * * Arab nationalism is the main ammunition in our long battle against zionism and imperialism."

Before and after the speech, Nasser was greeted with cries of "Long live Nasser, long live Gaza, Israel must be destroyed." (Al Ahram and Al Dif'a, Cario and Jordan dailies, respectively, March 10.)

A Cargo-Handling Revolution

EXTENSION OF REMARKS

OF

HON. THOR C. TOLLEFSON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1957

Mr. TOLLEFSON. Mr. Speaker, the Marine Digest of April 27 published an excellent article by S. G. Hayman of the Alaska Steamship Co. which operates vessels between Alaska and the United States. The article describes one method by which this company is constantly improving its service to meet the transportation needs of Alaska. Under leave to extend my remarks in the Appendix of the RECORD, I include it herewith:

A CARGO-HANDLING REVOLUTION

(By S. G. Hayman)

SEATTLE.—Nearby, expansive Alaska, long vital in the development of the Northwest, is a force that is forging new forms in transportation. Here within a few short years the shackles of piece-by-piece cargo handling, practically unchallenged since ocean shipping began, have been broken. Another freedom from drudgery is realized by labor and shippers who receive a marked improvement in service.

Both the structure and variety of the Northland combine in formidable fashion to frustrate surface transport. Alaska's 590,000 square miles sweep from western Canada to the shores of Siberia and high into the frigid Arctic. While its 26,000-mile coastline would more than skirt the earth at the equator, vast areas are frozen up much of the year.

Population is scattered in small villages except for 2 cities of about 30,000 and 70,000 and a half-dozen towns up to 10,000. North of the Alaska Peninsula the shores recede so gradually, water depth within reasonable reach of land is insufficient for ship terminal construction. So cargoes must be lightered in and out. But with ice conditions making more than seasonal employment impossible, there's an almost general lack of lighterage equipment. This, with the severity of weather throughout the area, frequently forces interruptions in cargo operations. Elsewhere terminal facilities are largely inadequate for ocean vessels.

Even salmon behavior serves to complicate the picture. Much of the pack is caught and canned in waters outside of the regular southeastern and southwestern runs. A good season here, a bad one there or an overall good or bad year—is unpredictable for this major seafood product which develops the only substantial southbound cargo and then sufficient for volume movement only a couple months a year. When the run is heavy, prompt receipt of extra cans is necessary to pack the fish which then must be moved out readily to keep the canneries from becoming blocked. Of course when the natives can salmon, they can't work cargo, and that develops a tight labor situation.

A DIFFICULT SERVICE

Little wonder that over 60 steamship lines have come and gone from this trade since the United States picked up Alaska from Russia for a paltry $7,200,000 on March 30, 1867. There is only one oldtimer serving the territory, Alaska Steamship Co., whose grandfather rights go back to 1895, the year they staked their claim to southeastern Alaska service with the 136-foot 450-ton steamer *Willapa*.

However, grandfather rights and trade claims are of doubtful value here since certificates of convenience and necessity aren't necessary and anyone can get into the act if he can finance an operation. But there's no stampede to get in. Reference to congressional committee report on Alaska problems, part III, July 22, 24, and November 21, 1947, sheds more light on this. Mr. George Talmadge of the United States Maritime Commission, responding to a question from Congressman Willis W. Bradley, said, "Sir, I personally asked at least 25 principle steamship companies if they could possibly be induced, under any circumstances, to enter the Alaska trade. Replies ranged from a horse laugh to 'nuts'. That generally is considered one of the least desirable trades anyone would want to be in."

But the Alaska Line has stuck to it and for over 40 years has served all Alaska, but what now is even more significant, theirs is probably the most highly containerized ocean-going steamship operation today. It's in this field of containerization that Alaska Steamship, which serves Alaska exclusively, has made its mark. They have developed a highly versatile container program which has proved remarkably successful on this difficult run.

SKINNER AND EDDY BUY

Actually the trade has not always been so rigorous for Alaska Steamship. In 1908 it came under control of Kennecott Copper Corp., which had shortly before acquired extensive copper properties in the Prince William Sound area, principally at Latouche and inland at Kennecott. The output of these mines provided a constant backlog of tonnage from about 1910 to 1938, when the ore petered out. Then the one-way haul element began to bear heavily on the Alaska Line as it did on other carriers. Kennecott started looking for a purchaser of the steam-

ship company now no longer an integral part of its mining activity. In 1944, while the line was under the War Shipping Administration as was all United States ocean transport during World War II, the Skinner & Eddy Corp., of Seattle, acquired the capital stock.

By the time the Government returned the Alaskan operation to strictly private account in late 1948, other trades had been on that basis for 2 years. Maritime administrators were concerned about the ability of private Alaska carriers to carry on in the face of appalling wartime increases in operating costs. Four didn't: Santa Ana Steamship Co., Alaska Transportation Co., Alaska Freight Express Corp., and Northland Transportation Co.

LENGTHY RESEARCH PROGRAM

It was with this background that in 1949 Alaska Steamship Co. began its cargo-handling research program. Four years and much study and experimentation later, a decision was reached to initiate a container program. Already evolved was a basic container that would not overtax the limited facilities of most Alaskan ports and one that would stow readily aboard ship. Of 60-cubic-foot capacity this 3-foot-5-inch high crib or unit as it was dubbed is collapsible, of simple wood fabrication, structurally a buildup of a regular 4- by 6-foot cargo board with a plywood top which is strapped in place. This was designed for shipper loading for sealed movement to consignee. The initial order called for 1,500. They cost about $23 each.

To augment the crib a second container named gard of 144-cubic-foot capacity—6 feet 5¾ inches long, 4 feet 3⅝ inches wide, and 6 feet 9¾ inches high—was also developed. This corrugated iron carrier of weatherproof construction has legs for forklift handling and rings on top for sling hooks. It is now used for dock-to-dock transport of mail and highly pilferable and fragile cargo. Five hundred gards were ordered. They cost about $215 each.

SHIPPERS QUICK TO USE

The service was advertised and in May 1953 the first volume movement of container cargo sailed from Seattle on the motorship *Susitna*, a 6,000 headweight ton C1–MAV–1. Her trip to Ketchikan, Wrangell, Petersburg, Juneau, Haines, Skagway, and Sitka followed the route the Willapa had blazed for the line 58 years before.

"This new service caught on so fast, it has been nip and tuck keeping up with shipper demand for units," W. J. Manahan, company general traffic manager, relates. "We unload them from delivering carrier by forklift—20 tons in about 15 minutes."

The shipper saves equipment time. He benefits as does the steamship company from the nonbreak bulk feature which eliminates multiple manual individual handlings and cuts the potential for pilferage, loss, and damage. "A significant 45-percent reduction in claims on container cargo has resulted at the same time packaging and marking requirements were reduced," Manahan points out.

Another 1,500 cribs were ordered later in 1953. Today a crew of 10 men is required to keep the 17,000 cribs now employed in condition, and the service is still expanding. Although their use heretofore has been largely by Seattle shippers, this month through arrangements with the Northern Pacific Railway, the Alaska Line now also makes cribs available to Portland merchants at no extra cost. That suggests their possible use by a yet greater number of shippers from a wider geographical area.

This original Alaska Steamship Company service now reaches throughout Alaska from Ketchikan in the southeast to Nome in the northwest, including interior points served in connection with the Alaska Railroad and Alaska truckers.

With the expedited handling of cargo in containers, the physical impossibility of working more than two hatches at a time at most Alaska docks because of their size is no longer so serious a problem.

MANY ADAPTATIONS

The forklift truck is the muscles of the operation ashore as well as aboard ship where cribs and gards are intermingled because of their complementary size. These containers are lifted on and off the vessel by conventional ship's gear. Its waterproof construction makes the gard optional deck cargo; the crib is carried below. Ships' holds have been paved flush with cargo mats and other irregularities are squared off to facilitate stowage. On company Libertys this includes the installation of especially designed pontoon orlop decks over the shaft alleys in Nos. 4 and 5 holds.

An empty gard weighs about 1,300 pounds. Cribs, which take about 325 pounds, are carried collapsed in which form they are picked up by shippers.

Lack of forklift equipment does not deter merchants; their interest in crib service has lead them to improvise. Some skid them onto their trucks. Others use hand-pallet jacks. Still others may fill cribs while they are set up and in position on their delivering vehicles.

A brief tour of Pier 42, the Alaska Steamship Seattle terminal, reflects the cargo-handling revolution. Four-deep tiers of cribs line the two 900-foot transit buildings. Empties are stacked in the 5-acre open storage area. Actually piece-by-piece handling of packaged cargo for the major Alaskan ports is fast becoming a thing of the past. But considering the great variety of cargo handled and the number of whistlestops served by Alaska Steamship, you can count on it, they will never reach 100 percent containerization.

On any sailing an Alaska liner may tote 10 to 20 automobiles, a road grader, 2 or 3 tractors, a few to a few hundred thousand feet of lumber, a fishing boat and several pleasure craft. Dredge buckets or a dredge itself, mill and mine equipment, cannery machines or a herd of cattle, even a donkey or two are not uncommon. As yet they haven't found a way to crib these and they don't expect to. But they are well along on a second major container program that is just a few months younger than their crib operation.

TRAILER VAN SERVICE

In August 1953 under arrangements with Garrison Fast Freight, Inc., a motor carrier in Washington State and Alaska, Alaska Steamship Co. started a through trailer van service between Seattle and Fairbanks, the Territory's second largest city and a key interior defense center. Forty-foot dry and refrigerated cargo trailer vans of 2,000 cubic foot capacity were put to use.

To provide electricity for the refrigerator and heater equipment, necessary outlets were installed aboard ship as were permanent trailer rests at the after ends of No. 2 and 4 hatches and portable rests alongside these and No. 3. Thereafter on each Tuesday's Liberty sailing for Valdez, where over-the-highway haul to destination begins, up to 12 trailers were carried, 3 each on Nos. 2 and 4 hatch covers and 2 on either side of these and No. 3. The vans are lifted on and off by the ship's 50-ton and 30-ton heavy lift booms at Nos. 2 and 4, respectively. A tractor assists in positioning those carried alongside No. 3.

Increasing demand for this type transport suggested heavy-lift gear for No. 5. So in line with Alaska Line philosophy, "If you need something new, make it," they designed a new stayless, quadral pyramid-shaped mizzen mast and their repair division fabricated and installed 1 on each of the 3 Libertys maintaining weekly sailings to southwestern Alaska. This included a 30-ton heavy lift boom at No. 5 and essential trailer rests. That raised to 17 the 40-foot trailer van capacity of the Liberty.

DOUBLE DECKING

The next project was to add 24-foot dry and reefer cargo vans for on-deck transport on the eight company C1–MAV–1's. Before the first of this year Alaska Line officials could foresee further expansion beyond the then present capacity of their ships. With no other way out than up, that's where they went. Double decking of 24-foot vans of 1,200 cubic foot capacity began in December and an appreciably greater van carrying capacity for both C1–MAV–1's: and Libertys is indicated.

For the first few years this Alaska Steamship van service was geared to requirements for fast through transport of military cargo from Seattle to northern installations. The commercial cargo van service provided did not include pickup in Seattle although store-door delivery was uniform. Now pickup service has been added for perishable commodities through new Garrison tariffs, effective January 11, that include Anchorage and Fairbanks, Alaska's largest cities. This promises to further expand the demand for van transport, which now is routed to Seward for Alaska Railroad piggyback movement to destination. Final delivery continues to be by truck tractor.

Already identified as one of the most highly containerized operations under the American flag, the Alaska Line has shown what can be done with nonspecial purpose vessels. They attribute the overall success to flexibility. "We have containers capable of meeting the limitations indicated by the characteristics of the trade and size and facilities of all Alaskan cities," Manahan says.

A secondary reason for the growth and a product of the container program itself is the regularity of sailings. "While we lose about 40 percent in stowage we make up for that in faster turnaround," Manahan points out, "and we give regular service which attracts business."

PLANS FOR FUTURE

Two Alaska liners a week sail from Seattle for the southwestern Alaska rail belt and one a week for southeastern Alaska. Other areas receive service as cargo volume dictates and during open navigation. Vessels are scheduled for points as far north as Kotzebue, above the Arctic Circle. Altogether in 1956 the Alaska Line made 171 commercial voyages to the Northland. In addition they operated three ships in the distant early warning supply operation for the account of the Government.

In the August 17, 1956, issue of the Dispatcher, J. R. Robertson, vice president of the International Longshoremen's and Warehousemen's Union, said: "Top engineers point to Alaska Steamship Co.'s container program as the direction in which all cargo operations are going to move in the future."

Since the Alaska Line's container operation was instituted in 1953, the White Pass and Yukon Route and Union Steamships, Ltd., have set up container services. Other foreign and American lines are now closely studying Alaska's operation.

The next move for Alaska Steamship Co. is not now apparent, but the momentum their container service has already developed suggests expansion beyond the capabilities of their present fleet of 5 Libertys and 8 C1–MAV–1's. Anticipating this development, the company engaged a transportation expert, who for 3 years studied the merits of constructing special purpose trainships for the major traffic run between Seattle and the Alaska rail belt.

Plans were drawn, bids invited but all were rejected and the company turned from the trainship concept. In making this decision last December, D. E. Skinner, president of the line, confirmed that the company was con-

tinuing its research for a more satisfactory type of nonbreak bulk service.

Whatever they come up with, Alaska Line has already made some remarkable contributions to transportation technology and shippers are benefiting, not only from improved service, but from substantial savings from freight rate schedules that have not been materially changed since 1954.

LAWS RELATIVE TO THE PRINTING OF DOCUMENTS

Either House may order the printing of a document not already provided for by law, but only when the same shall be accompanied by an estimate from the Public Printer as to the probable cost thereof. Any executive department, bureau, board, or independent office of the Government submitting reports or documents in response to inquiries from Congress shall submit therewith an estimate of the probable cost of printing the usual number. Nothing in this section relating to estimates shall apply to reports or documents not exceeding 50 pages (U. S. Code, title 44, sec. 140, p. 1938).

Resolutions for printing extra copies, when presented to either House, shall be referred immediately to the Committee on House Administration of the House of Representatives or the Committee on Rules and Administration of the Senate, who, in making their report, shall give the probable cost of the proposed printing upon the estimate of the Public Printer, and no extra copies shall be printed before such committee has reported (U. S. Code, title 44, sec. 133, p. 1937).

GOVERNMENT PUBLICATIONS FOR SALE

Additional copies of Government publications are offered for sale to the public by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., at cost thereof as determined by the Public Printer plus 50 percent: *Provided*, That a discount of not to exceed 25 percent may be allowed to authorized bookdealers and quantity purchasers, but such printing shall not interfere with the prompt execution of work for the Government. The Superintendent of Documents shall prescribe the terms and conditions under which he may authorize the resale of Government publications by bookdealers, and he may designate any Government officer his agent for the sale of Government publications under such regulations as shall be agreed upon by the Superintendent of Documents and the head of the respective department or establishment of the Government (U. S. Code, title 44, sec. 72a, Supp. 2).

RECORD OFFICE AT THE CAPITOL

An office for the CONGRESSIONAL RECORD is located in Statuary Hall, House wing, where Mr. Frank Brodie is in attendance during the sessions of Congress to receive orders for subscriptions to the RECORD at $1.50 per month, and where single copies may also be purchased. Orders are also accepted for the printing of speeches in pamphlet form.

PRICE OF THE CONGRESSIONAL RECORD

The Public Printer is authorized to furnish to subscribers the daily RECORD at $1.50 per month, payable in advance.

Remit by money order payable to Superintendent of Documents, Government Printing Office, Washington 25, D. C.

CHANGE OF RESIDENCE

Senators, Representatives, and Delegates who have changed their residences will please give information thereof to the Government Printing Office, that their addresses may be correctly given in the RECORD.

LAWS AND RULES FOR PUBLICATION OF THE CONGRESSIONAL RECORD

CODE OF LAWS OF THE UNITED STATES

TITLE 44, SECTION 181. CONGRESSIONAL RECORD; ARRANGEMENT, STYLE, CONTENTS, AND INDEXES.—The Joint Committee on Printing shall have control of the arrangement and style of the CONGRESSIONAL RECORD, and while providing that it shall be substantially a verbatim report of proceedings shall take all needed action for the reduction of unnecessary bulk, and shall provide for the publication of an index of the CONGRESSIONAL RECORD semimonthly during the sessions of Congress and at the close thereof. (Jan. 12, 1895, c. 23, § 13, 28 Stat. 603.)

TITLE 44, SECTION 182b. SAME; ILLUSTRATIONS, MAPS, DIAGRAMS.—No maps, diagrams, or illustrations may be inserted in the RECORD without the approval of the Joint Committee on Printing. (June 20, 1936, c. 630, § 2, 49 Stat. 1546.)

Pursuant to the foregoing statute and in order to provide for the prompt publication and delivery of the CONGRESSIONAL RECORD the Joint Committee on Printing has adopted the following rules, to which the attention of Senators, Representatives, and Delegates is respectfully invited:

1. *Arrangement of the daily Record.*—The Public Printer will arrange the contents of the daily RECORD as follows: First, the Senate proceedings; second, the House proceedings; third, the Appendix: *Provided*, That when the proceedings of the Senate are not received in time to follow this arrangement, the Public Printer may begin the RECORD with the House proceedings. The proceedings of each House and the Appendix shall each begin a new page, with appropriate headings centered thereon.

2. *Type and style.*—The Public Printer shall print the report of the proceedings and debates of the Senate and House of Representatives, as furnished by the Official Reporters of the CONGRESSIONAL RECORD, in 7½-point type; and all matter included in the remarks or speeches of Members of Congress, other than their own words, and all reports, documents, and other matter authorized to be inserted in the RECORD shall be printed in 6½-point type; and all rollcalls shall be printed in 6-point type. No italic or black type nor words in capitals or small capitals shall be used for emphasis or prominence; nor will unusual indentions be permitted. These restrictions do not apply to the printing of or quotations from historical, official, or legal documents or papers of which a literal reproduction is necessary.

3. *Return of manuscript.*—When manuscript is submitted to Members for revision it should be returned to the Government Printing Office not later than 9 o'clock p. m. in order to insure publication in the RECORD issued on the following morning; and if all of said manuscript is not furnished at the time specified, the Public Printer is authorized to withhold it from the RECORD for 1 day. In no case will a speech be printed in the RECORD of the day of its delivery if the manuscript is furnished later than 12 o'clock midnight.

4. *Tabular matter.*—The manuscript of speeches containing tabular statements to be published in the RECORD shall be in the hands of the Public Printer not later than 7 o'clock p. m., to insure publication the following morning.

5. *Proof furnished.*—Proofs of "leave to print" and advance speeches will not be furnished the day the manuscript is received but will be submitted the following day, whenever possible to do so without causing delay in the publication of the regular proceedings of Congress. Advance speeches shall be set in the RECORD style of type, and not more than six sets of proofs may be furnished to Members without charge.

6. *Notation of withheld remarks.*—If manuscript or proofs have not been returned in time for publication in the proceedings, the Public Printer will insert the words "Mr. ——— addressed the Senate (House or Committee). His remarks will appear hereafter in the Appendix," and proceed with the printing of the RECORD.

7. *Thirty-day limit.*—The Public Printer shall not publish in the CONGRESSIONAL RECORD any speech or extension of remarks which has been withheld for a period exceeding 30 calendar days from the date when its printing was authorized: *Provided*, That at the expiration of each session of Congress the time limit herein fixed shall be 10 days, unless otherwise ordered by the committee.

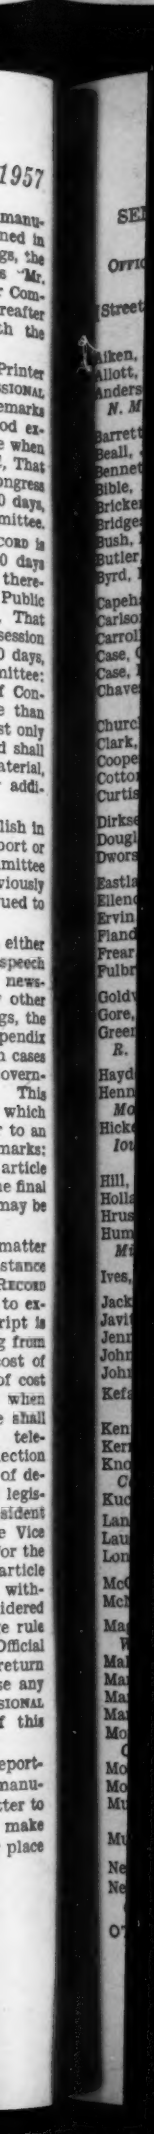
8. *Corrections.*—The permanent RECORD is made up for printing and binding 30 days after each daily publication is issued; therefore all corrections must be sent to the Public Printer within that time: *Provided*, That upon the final adjournment of each session of Congress the time limit shall be 10 days, unless otherwise ordered by the committee: *Provided further*, That no Member of Congress shall be entitled to make more than one revision. Any revision shall consist only of corrections of the original copy and shall not include deletions of correct material, substitutions for correct material, or additions of new subject matter.

9. The Public Printer shall not publish in the CONGRESSIONAL RECORD the full report or print of any committee or subcommittee when said report or print has been previously printed. This rule shall not be construed to apply to conference reports.

10. *Appendix to daily Record.*—When either House has granted leave to print (1) a speech not delivered in either House, (2) a newspaper or magazine article, or (3) any other matter not germane to the proceedings, the same shall be published in the Appendix except in cases of duplication. In such cases only the first item received in the Government Printing Office will be printed. This rule shall not apply to quotations which form part of a speech of a Member, or to an authorized extension of his own remarks: *Provided*, That no address, speech, or article delivered or released subsequently to the final adjournment of a session of Congress may be printed in the CONGRESSIONAL RECORD.

11. *Estimate of cost.*—No extraneous matter in excess of two pages in any one instance may be printed in the CONGRESSIONAL RECORD by a Member under leave to print or to extend his remarks unless the manuscript is accompanied by an estimate in writing from the Public Printer of the probable cost of publishing the same, which estimate of cost must be announced by the Member when such leave is requested; but this rule shall not apply to excerpts from letters, telegrams, or articles presented in connection with a speech delivered in the course of debate or to communications from State legislatures, addresses or articles by the President and the members of his Cabinet, the Vice President, or a Member of Congress. For the purposes of this regulation, any one article printed in two or more parts, with or without individual headings, shall be considered as a single extension and the two-page rule shall apply. The Public Printer or the Official Reporters of the House or Senate shall return to the Member of the respective House any matter submitted for the CONGRESSIONAL RECORD which is in contravention of this paragraph.

12. *Official Reporters.*—The Official Reporters of each House shall indicate on the manuscript and prepare headings for all matter to be printed in the Appendix, and shall make suitable reference thereto at the proper place in the proceedings.



Appendix

Cogitation, Inc.

EXTENSION OF REMARKS
OF

HON. DONALD L. JACKSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 1957

Mr. JACKSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article from the Wall Street Journal:

COGITATION, INC.—HOW A CALIFORNIA FIRM TAKES IN MILLIONS FOR FEET-ON-DESK THINKING—IT BROODS ABOUT BERYLLIUM, MOCK AIR BATTLES, CHINESE DIETS, AT YOUR EXPENSE—THE MATING OF THE MISSILES

(By Gordon McKibben)

SANTA MONICA, CALIF.—Checking in for a day's work, a young doctor of philosophy sporting a crewcut and a yellow sport shirt sits down, lights his pipe, props his feet on a desk, and shuts his eyes.

A normal working day has begun at RAND Corp. The man is thinking. Thinking fast and furious, and far into the future. And since you're paying his salary, you can hope he's outthinking the Russians.

In a search for America's strangest corporation, RAND would be a company to consider. Aside from one exotic project, instructing human and electronic brains how to intercept a Soviet air attack, the corporation is exclusively devoted to thinking. It thinks entirely at the taxpayers' expense, for its only customers are the Air Force and the Atomic Energy Commission. It is isolated from the harsh competitive world, where most companies can lose money as well as make it, by cost-plus-6-percent contracts. Yet it pays no dividends to anyone; the 6 percent is happily reinvested in more thinking.

"TECHNIQUE IN SYNTHESIS"

RAND's thought-production line calls upon a staff as diverse as you'll ever encounter outside a university. More than 800 political scientists, sociologists, economists, engineers, chemists, physicists, and assorted other braintrusters work for the corporation, pooling their talents in what H. Rowan Gaither, board chairman, calls a technique in synthesis. The company's contracts this year will amount to more than $23 million.

RAND's executives contend they'll save the taxpayers far more than that sum, for their principal business is to advise Air Force generals how to prepare for tomorrow's wars without bankrupting the Nation. As Brownlee Haydon, chief of technical communications, puts it: "Our job is to see that the Air Force gets the best possible weapons and uses the best methods of operations at the least possible cost."

They are considering fighters and bombers which may not be built for years; thinking up new ways to help the Infantry with planes and missiles; worrying about how to defend this Nation against sneak attack; pondering the nature of the enemy.

How well are they succeding? It's impossible to provide a complete answer, for the tests of their work will come in the future, and much of it is now wrapped in the darkest secrecy.

About all one can say for sure is that RAND Corp. is engaged in astonishingly varied studies—ranging from metallurgy to military tactics to the mood and muscle of Red China. And some of these may have eventual impact upon many a more orthodox United States business enterprise.

GROWTH OF TITANIUM

As the classic example of this, RAND officials cite titanium. Nearly a decade ago RAND thinkers decided this was a promising metal for stresses of a supersonic age, and sponsored research at Battelle Memorial Institute in Columbus, Ohio, which demonstrated they were right. In 1948, exactly 3 pounds of titanium sponge, primary form of the metal, were produced; this year industry sources estimate output will top 50 million pounds. Companies such as Du Pont, National Distillers Products Corp., and Titanium Metals Corporation of America have invested millions in the new industry.

Now along comes RAND with optimistic things to say about beryllium, a metal even lighter and in some ways stronger than titanium, sharing titanium's resistance to heat, and perhaps with even more spectacular possibilities for use in piloted aircraft and in missiles.

Right now beryllium, like titanium 10 years ago, is just another element on the atomic chart, a whitish metal, fearfully expensive, with little commercial use except in alloys with other metals. But the RAND research team headed by a structural engineer, Dr. George A. Hoffman, has decided it has a potentially spectacular future in aircraft. The team concluded a plane made mostly of beryllium would weigh about half as much as today's basically aluminum plane. Such a craft, carrying the same amount of fuel and the same payload, would fly 40 percent farther without refueling. Or, if the same distance were flown, 1 pound of payload could be added for every pound of beryllium used in the plane—because that pound of beryllium would substitute for 2 pounds of aluminum.

LONG-RUN SAVINGS

Economists on the team have calculated that the "worth in use" of such a substitution would, over the life of a plane, range up to $1,000 a pound. This would pay off, they contend, even though the initial cost of a beryllium airliner or warcraft is likely to remain extremely high. They figure that even after production of the metal is fully developed, beryllium may cost up to $200 per pound installed in aircraft structures. This compares to about $20 to $40 for the installed cost of aluminum in planes today. The long-run operational savings would make the metal particularly desirable for huge, long-distance aircraft, they contend.

Dr. Hoffman claims the RAND study punctures an old theory that beryllium's high cost dooms it forever as a practical metal. Skeptics have also said that the present scarcity of beryl ore, from which beryllium is extracted, is an insurmountable obstacle. But the team concluded that excellent deposits exist in this country, especially South Carolina, and in such foreign sources as South America. Dr. Hoffman declares that as demand develops sufficient ore will be discovered, as has happened with once scarce uranium ore.

It would be feasible to use beryllium in certain parts of a plane today, according to RAND. But they would have to be nonmoving parts which could be cast. To produce sheet, or extrusions, additional basic research is required to overcome the metal's lack of ductility. RAND is urging the Government and industry to step up the attack upon this problem. Still another hurdle, toxicity of the metal's dust, can be overcome by modern industrial safety measures, it predicts.

A WORLD OF PRETENSE

Some of RAND's best brains dwell in a world of pretense—a world of violence in which the casualities are often shocking but so far purely imaginary. They are conducting an endless series of mock air battles by feeding complex data into a huge, flashing analog computer. The object: To discover, by bloodless trial and error, the best combination of men, weapons, and tactics to crush an enemy.

Take this typical "battle." The scene and time: Around Greenland, 1970. An enemy striking force of 400 planes is flying over the North Pole on a line for Boston and New York. A United States force of 275 planes is put into the air immediately, and another 100 planes are held back as reserves. Thirty-six ground defense crews in the far North immediately swing into action. Visibility is excellent; a full moon and clear skies. These and many other factors are translated mathematically into terms the computer can digest. The speeds, range, and armaments of American and enemy craft of 1970, for instance, must be supplied—on the basis of Air Force data and intelligence reports. Once the battle terms are fed to the computer, it reveals in a few seconds how the fight came out.

If New York is wiped out, the scientists try again. Indeed, hundreds of versions of this same basic battle are fought out. Men in RAND's operations division jiggle the terms a bit each time, allowing a few more planes to the enemy here, a different combination of interceptors and ground fire there.

RAND's Dr. Willis H. Ware suggests business firms could well use the same sort of techniques to work out the best solutions for their risk-taking ventures of the future. "You could make a mathematical model of the economy—or at least that section of it you deal with in your business. Then you'd let your junior executives play with it. You could test them by feeding their ideas into the computer—without actually risking any money. It would even be possible to set things up so the junior executives wouldn't even realize it was a game instead of the real thing."

BOEING'S CONTRACT

A nasty idea, perhaps. But the fact is that RAND Corp. is not particularly intent on being nice to people; on the contrary, its officials often feel obligated to be exceedingly difficult. One of them cites this example: Not long after World War II ended, the Air Force awarded Boeing Airplane Co. the contract for this Nation's present heavy bomber, the B–52.

Exact diminesions of the sky giant had not been definitely fixed, however. Boeing submitted plans. RAND advised the Air Force the projected craft was too heavy. Boeing's engineers went back to their drawing boards and created a slenderized B–52 whose weight dropped nearly one-third. With fuel and load, it now weighs something above 400,000 pounds. And because weight is a fairly accurate determinant of cost, the price dropped about one-third, too; the price tag is now about $8 million, counting extras.

RAND boasts it saved taxpayers another tidy sum when two manufacturers gunning for Air Force contracts designed separate missiles. RAND researchers decided a single missile would do the job—and shocked all parties involved by recommending that the front end of one missile be mated to the back end of its competitor. The Air Force concurred.

How does it happen that the Air Force listens to such schemes suggested by economizing eggheads?

In the first place, they asked for it. RAND actually began life as an Army Air Force project in 1946, when Gen. H. H. "Hap" Arnold decided to gamble $10 million to retain a nucleus of top scientists for air warfare research.

RAND'S NAME

RAND gets its name, incidentally, from a contraction of the words "research and development," although the oldest story making the rounds at the company still insists that the letters actually mean "research and no development."

General Arnold, according to Mr. Haydon, listed one condition on the scientists' use of the $10 million: They were to get as far away as possible from Washington and its red tape.

The scientists moved into a tiny sealed-off corner of the huge Douglas Aircraft Corp. plant in Santa Monica, Calif., some 3,000 miles from the Nation's Capital. After about 3 years they got quarters of their own in downtown Santa Monica. Some of RAND's top officials, including F. R. Collbohm, president, are former Douglas officals.

RAND researchers are a young lot, averaging 34 or 35 years of age. They come to RAND for many reasons.

"Lots of variety here. There's something different to work on every day," says Gene Jacobs, 28, a mathematician who works as a programer in the computer area.

William Micks, a 38-year-old structural engineer from Texas, remarks: "I like the fact there are no laboratories here. You're not tempted to run around and test out an idea in labs every hour or so. Instead, you're forced to think things through and this tends to keep you from getting sidetracked."

Mr. Micks and most of his colleagues do their heavy thinking amid park-like surroundings at RAND's handsome Santa Monica headquarters building, a few hundred yards from famed "Muscle Beach" and its continuous display of "Mr. America" brawn. But the company also maintains offices in Washington, D. C., Dayton, Ohio, Lexington, Mass., and Weisbaden, Germany.

Working out of RAND's Washington office, a group of Chinese economists has reached some tentative conclusions on the Chinese economy.

Among these: China is producing less food today than it was in the prewar years, before 1937. Rice production has not increased significantly in recent years, and the Chinese Communist government may be forced to persuade the people to change ancient dietary habits and switch from rice to coarser, cheaper grains such as wheat.

The report compares China's first 5-year plan with neighbor India. China is spending about 44 percent of total investment upon industry, and only 8 percent on projects to raise food supply, housing, and clothing. In direct contrast, India is spending about 44 percent of her 5-year plan investment to increase production of food and other consumer welfare items, with only 14 percent going for industry.

Why should the Air Force care?

"Because the Air Force asks RAND to engage in long-range and broad research. After all, informed estimates of the state of China's economy in 1970 may be extremely useful in future military planning," Dr. Oleg Hoeffding, RAND economist, answers. While intensive study of China is new at RAND, the company's social scientists have for years studied Soviet Russia.

TRAINING TECHNICIANS

Beyond the realm of pure thought, RAND does have one down-to-earth problem—training technicians how to alert the Nation against enemy air attack. The company, under a $13 million Air Force contract, is helping to set up the SAGE (semiautomatic ground environment) air-defense program.

SAGE will replace present manual operations in which men at remote radar stations watch radar screens to establish speed, altitude, and direction of unidentified planes. When such planes are spotted, the radar operators must guide United States interceptor planes to contact with the potential enemy.

Under the SAGE system computers will watch the radar screens and report what they see. A human monitor must still decide whether the plane is friendly and whether to scramble, which means to send out the interceptors. If interceptors do go aloft, the computers instantly come up with all the information needed by the pilots. This is passed along by the human monitors whom RAND is training.

Coal Industry Week Might Be Better Than Month—But Let's Have One

EXTENSION OF REMARKS
OF
HON. WILLIAM H. NATCHER
OF KENTUCKY
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 1957

Mr. NATCHER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include herewith an editorial entitled "Coal Industry Week Might Be Better Than Month—But Let's Have One" which appeared in the April 28, 1957, issue of the Madisonville Messenger of Madisonville, Ky.

The editorial is as follows:

COAL INDUSTRY WEEK MIGHT BE BETTER THAN MONTH—BUT LET'S HAVE ONE

Appalachian Coals, Inc., the big Cincinnati marketing agency, has again called the industry's attention to the need for a national coal industry month. The idea, of course, would be to stage on such an occasion a full-scale promotion of the Black Diamond, and to remind the Nation of its great dependence upon this basic fuel in peacetime and wartime alike.

Ten months ago—in June 1956—ACI in its bulletin pointed out that in the memory of veteran coal people no such commemorative idea has ever been promoted to recognize publicly the importance of the coal industry to the welfare of the Nation. Yet there are more special days and weeks and months than the calendar has to offer. Of these, many have no more justification than can be accorded a publicity man's efforts to earn his pay.

The ACI Bulletin 10 months ago pressed its point like this:

"Yet here is a basic and indispensable commodity—coal—its uses and future unknown to millions of Americans, its problems frequently distorted in the public thinking, and its amazing and growing contribution to the world's highest material scale of living generally overlooked.

"So let's have a National Coal Industry Month proclaimed, perhaps by the President himself, and noted by a joint congressional resolution. Governors of the 22 coal-producing States will wish to make their contribution, and the dozen leading coal States will appropriately set aside a day of that month for recognition at the capital."

The big Cincinnati coal agency thinks the time may be appropriate now to reactivate the idea, for Bituminous Coal Institute has been revamped and is now operating full force throughout coal's territory.

It has been suggested, too, that it might be better to limit the annual celebration to a week, instead of a month. A lot of observance can be packed into a week, without a doubt, and the shorter time would permit greater concentration of publicity efforts.

As for the time for staging such a Bituminous Coal Industry Week or Month, mid-September has been suggested. It has been suggested, too, that the objectives of the special observance include the following:

To explain the contributions of the coal industry to daily life.

To tell America of the value of the coal industry to the country, and to encourage the proper use of solid fuels.

To enhance appreciation of coal and coal products, and of the contributions of the coal industry to the Nation's progress and economy.

To encourage all coal men to tell the story of the coal industry to their communities.

To publicize coal and coal products.

To promote international good will for the benefit of the coal industry, and to create a greater acceptance and use of, and broaden the markets for, coal products.

Draw national attention to the value of coal as the source of heat and power for our economy.

To promote further understanding of the positive values the coal industry brings the American family.

To call the attention of business enterprise, as well as the public, to the services performed by the coal industry.

To promote the proper use of coal.

Hopkins County, other coal-producing areas in Kentucky, and the Frankfort government could really do a fine job of coal promotion should the coal week or month idea be adopted. It seems to us the opportunity is too great to overlook—this chance to remind the Nation anew of its vast dependence upon this basic fuel.

The story of coal has features which in our opinion would catch the public imagination in a great way.

National Savings and Loan League Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, I would like to include in the RECORD a letter addressed to me on April 17, 1957, by the National Savings and Loan League, expressing opposition to any merger of the FHA and VA loan programs. These views are expressed in connection with H. R. 6659, the proposed Housing Act of 1957, which would create a veterans' preference program in FHA and use a portion of the national service life insurance trust fund for the purchase of FHA veterans' preference home loans.

The letter dated April 17, 1957, from the National Savings and Loan League follows:

NATIONAL SAVINGS AND LOAN LEAGUE,
Washington, D. C., April 17, 1957.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs, House of Representatives, Washington, D. C.

DEAR MR. TEAGUE: We appreciate your giving us the opportunity to express our views relative to the provisions of H. R. 5659 which affect veterans' housing.

As the record will show, we appeared before the Subcommittee on Housing earlier this year in opposition to use of the national service life insurance fund in the housing program, and in opposition to any merger of the FHA and VA loan program. We stated then that the VA loan program should be permitted to terminate upon a gradual basis rather than the abrupt termination as now provided, with the veteran whose eligibility has finally expired being treated the same as any other housing consumer.

I trust the above is adequately responsive to your communication of April 9.

Sincerely yours,
W. FRANKLIN MORRISON,
Chairman, Legislation Committee.

Hearings Before the Senate Rackets Committee

EXTENSION OF REMARKS
OF
HON. JOSEPH L. CARRIGG
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 7, 1957

Mr. CARRIGG. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by Charles Mercer of the Associated Press in connection with recent hearings before the Senate Rackets Committee:

(By Charles Mercer)

NEW YORK.—Newspapermen frequently upbraid television for failure to give extensive coverage to important news. Here at last is an opportunity to praise a work of fine initiative in TV reporting which should serve as a model to stations and viewers throughout the country.

The biggest news in Scranton, Pa., of this past fortnight has been the Senate Rackets Committee hearings on union violence. Thanks to the efforts of station WDAU–TV, an affiliate of CBS, Scranton television viewers should be thoroughly informed on the hearings.

On April 16, 17, and 18 station WDAU–TV presented 14,500 feet of sound film of the Washington hearings during 8 hours of preempted commercial program time. In other words, the station felt it was more important that its viewers be well informed on a vital local matter than that the station should harvest the financial returns of that time from advertisers.

Just as long as the Senate committee focuses on Scranton, WDAU–TV will continue to perform the same complete coverage, says Station General Manager Vance Eckersley.

It was a big project for a single television station, though it did have the hearty cooperation of the CBS news department in Washington. Here is how it worked under the direction of the station's news director, Tom Powell, with the cooperation of network Washington news chiefs:

A four-man WDAU–TV camera crew did a running sound film of the hearings in the Senate Office Building caucus room. The job of processing and editing the film was divided between laboratory facilities in Washington and the station laboratory in Scranton.

A WDAU courier was kept busy hurrying the reels of film to the airport where each of the five regular daily flights from Washington to Scranton was utilized to speed the reels to their destination. At Scranton Airport another courier rushed the film to the newsroom.

To handle the extensive footage two special daily shows were arranged—both in commercial time. The first was at 6:30 p. m. in the evening when there was a half-hour program of the day's highlights. At 11:30 p. m. commercial time of 2 hours was preempted to run the entire day's hearings. Throughout the day there were special bulletins and regular news telecasts.

Powell, in charge of the operation in Washington, capped the over-all coverage with an exclusive interview with Senator JOHN MCCLELLAN, committee chairman.

As far as can be learned from network sources, this is the most complete television coverage of a national news story ever achieved by a local station. WDAU–TV was aided, of course, in having reasonably convenient air transportation from the news source.

Here's an example for other stations if such an opportunity should present itself. WDAU–TV spokesmen say they feel rewarded for their efforts by the realization they have performed a public service. WDAU–TV viewers say they feel rewarded in the knowledge that they have a station which is on its toes and trying to meet the interests of its public.

Radioactive Fallout

EXTENSION OF REMARKS
OF
HON. CHET HOLIFIELD
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 7, 1957

Mr. HOLIFIELD. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the recent announcement regarding the forthcoming public hearings by a special subcommittee of the Joint Committee on Atomic Energy on the question of radioactive fallout from nuclear weapons explosions and its effects on man. The hearings are scheduled for May 27–29 and June 3–7, with the possibility of going over into the week of June 10 for public witnesses.

It is my hope that these hearings will lead to a better understanding of a problem that has become the subject of serious concern to the Congress and the people of this country. Such understanding is essential, in my opinion, to the development of sound national policies and to the maintenance of good relations with our friends and allies throughout the world.

I will announce in a few days a detailed agenda describing the subject areas to be covered and a list of witnesses who have been invited to testify before the special Subcommittee on Radiation.

The announcement follows:

A special subcommittee of the Joint Committee on Atomic Energy will hold public hearings on the problem of radioactive fallout from nuclear weapons explosions beginning May 27 and extending through June 7, it was announced today. Representative CHET HOLIFIELD, Democrat, California, has been named chairman of the subcommittee.

The hearings will cover in detail the whole fallout cycle from its inception in the detonation of nuclear weapons, through its dissemination in the atmosphere and descent to the earth, and finally to its uptake and effects on human beings, animals, and vegetation. Experts from the major scientific areas involved will be invited to present testimony before the committee. The hearings will also be open to public witnesses who wish to appear or submit a statement for the record.

Among the topics of particular interest to be discussed at the hearings are the questions of how much radioactive debris is being scattered throughout the atmosphere by nuclear weapons, the genetic effects of radiation and their meaning for future generations, the relationship of strontium 90 uptake in the human body to bone cancer and leukemia, and the effects of radiation on human longevity. Discussion will include the phenomenon of radiation damage, how it is measured, and how tolerance standards are established. Following discussion of these matters, an attempt will be made to see what projections can be made of the effects of continued testing of nuclear weapons at various rates.

In commenting on the forthcoming hearings, Representative HOLIFIELD stated:

"I am hopeful that the coming hearings will serve to give us all, both Congress and the public at large, a better understanding of the fallout question and will help clear up existing confusion over the character and dimensions of the problem. The joint committee has for some months been preparing for the hearings and has been consulting with experts from the major fields affected in order to develop a useful framework for the hearings. I believe this preparation will be useful in insuring that we cover the ground thoroughly and objectively.

"One of the major problems in previous discussions," he said, "has been that the Congress and the public have been snowed under by a welter of uncoordinated information and scientific terminology without having an adequate frame of reference for their guidance. Chief purpose of the hearings," he added, "is to provide such a frame of reference through presentation of scientific information in a form which is readily understandable to the layman as well as the scientist. We also wish to determine," he said, "what research work is being done in this field by the AEC and others, and whether the present level of this research effort is adequate."

Representative HOLIFIELD concluded by stating:

"I believe the forthcoming hearings should provide a valuable basis for future discussion of associated problems involving matters of the highest national importance, including proposals for cessation or limitation of our nuclear weapon tests. The hearings should also provide excellent background information for separate hearings being planned by the joint committee on radiation injuries to workers and workmen's compensation. Once a thorough base of understanding is laid," he added, "the Congress and the public should be in a much better position to evaluate the pertinent considerations and to develop sound national policies. It is toward this objective that the hearings are directed."

Those wishing to appear before the committee or to submit a statement for the record should contact the committee staff in room F–88, the Capitol, so that the necessary arrangements may be made.

Federal Housing Administration Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, during the next few days the House will vote on H. R. 6659, the Housing Act of 1957, which proposes to create an FHA veterans' preference program. I am including in the RECORD a letter dated April 16, 1957, addressed to me by Mr. Norman P. Mason, Commissioner of Federal Housing Administration, regarding the veterans' provisions of H. R. 6659. Mr. Mason has stated that the Federal Housing Administration opposes the proposed special-preference program for veterans and is vigorously opposed to the use of any portion of the national service life insurance reserves or any other Government trust fund for the purchase of real estate mortgages. Mr. Mason has also stated that the administration is opposed to the attempt to control discounts on FHA and VA guaranteed loans.

Mr. Mason's letter of April 16, 1957, follows:

FEDERAL HOUSING ADMINISTRATION,
Washington, D. C., April 16, 1957.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs, House of Representatives, Washington, D. C.

DEAR MR. TEAGUE: I appreciate your inquiry of April 9 on H. R. 6659, and the opportunity it gives us of discussing the creation of a veterans' preference housing program in FHA.

As you know, the administration's housing proposals are contained in H. R. 5611, upon which we testified before the House Banking and Currency Subcommittee on Housing in March. We proposed a liberalization of FHA's downpayment requirements in our home mortgage programs. We made this proposal in order to reduce the downpayment required for families purchasing homes in the moderately priced categories. Also, as Mr. Cole pointed out, we felt that this discretionary authority enabling the FHA Commissioner to reduce downpayments would allow the building industry to plan ahead toward the expiration of the veterans' home-loan guaranty program for World War II veterans, which terminates in July 1958. We feel that the availability of the more liberal terms would go far toward easing adjustments in the building and mortgage lending industries occasioned by the expiration of the veterans' program and toward offsetting any adverse impact on the economy which might occur.

We are opposed to a special preference program for veterans in FHA. Rather we believe the mortgage insurance programs in FHA should be available to all prospective home owners on equal terms.

We are also vigorously opposed to the use of any portion of the National Service Life Insurance Reserves, or any other Government trust fund, such as the civil-service retirement fund to which Federal employees contribute a part of their earnings, for the purchase of real-estate mortgages. Mr. Cole's statement setting forth the administration's position in this matter is contained on page 732 of the hearings before the Subcommittee on Houing of the House Committee on Banking and Currency. Also the minority views beginning on page 67 of the committee report on H. R. 6659 provide a forceful and complete statement as to why the National Service Life Insurance Reserves or any other Government trust fund should not be utilized for special purposes such as the purchase of home mortgages.

I would like to also point out that the administration is opposed to the attempted control of discounts on FHA insured and veterans' guaranteed loans. Our testimony beginning on page 733 of the Housing Subcommittee hearings of March 15, 1957, clearly set forth our experience with discount controls under the Housing Act of 1950 and points out our reasons for objecting to their reactment in legislation.

Sincerely yours,
NORMAN P. MASON, *Commissioner.*

Study of Hebrew Language by Foreign Service Officers

EXTENSION OF REMARKS
OF
HON. LEONARD FARBSTEIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. FARBSTEIN. Mr. Speaker, I have been informed by Deputy Under Secretary of State Loy W. Henderson that the Foreign Service Institute of the State Department will henceforth recognize Israel on a par with other nations in the Middle East as an area of specialized study for diplomatic and consular officers.

Officers of the State Department representing this country in the foreign capitals of the world, take specialized language courses and orientation courses in order to prepare them for the areas in which they are to serve. Such courses are given at the Foreign Service Institute in Washington and at appropriate universities here and abroad.

I learned that there was no provision for the study of Hebrew in the list of 18 foreign languages taught to Foreign Service officers and that Israel was not included as an area of specialization in the Middle East. By areas of specialization is meant those nations within an area considered sufficiently important in this country to be made the subject of intensive study of their history and traditions by candidates for foreign service. The present areas of specialization in the Middle East are Turkish, Greek, Persian, and Arabic.

Foreign Service officers specializing in the Israel area will now take their course of study at an appropriate institution in the United States. The Department will also recommend the study of Hebrew to its diplomatic and consular officers presently in Israel.

I learned that the Foreign Service officers who represent this country in Israel are required to take a year of orientation courses, under Arab teachers, at the branch school of the Foreign Service Institute attached to the University of Beirut, Lebanon.

I brought these matters to the attention of the State Department and they became the subject of several discussions which I held with Mr. Henderson. The discussions led to the receipt of the following letter incorporating these and other changes in the curriculum of the Foreign Service Institute:

DEPARTMENT OF STATE,
Washington, April 9, 1957.

DEAR MR. FARBSTEIN: You will recall the discussion which took place in my office on March 28, during the course of which you expressed certain views with respect to various programs of the Foreign Service Institute to representatives of the Institute and to myself.

Following that discussion a careful study has been made of the programs in which you displayed particular interest and I am pleased to outline the following specific actions which the Foreign Service Institute is initiating in order to make sure that Israeli aspirations and problems are given objective, adequate and balanced treatment and consideration in all seminars, lectures, and discussions relating to international affairs:

1. A review is being made of the segments of the orientation, basic and other Foreign Service Institute courses dealing with Near Eastern customs, institutions, and political philosophies and these segments will be modified and revised in case lack of objectivity or accuracy is found.

2. A program of intensive language training in Hebrew and Israeli area specialization will be offered to a limited number of Foreign Service officers so that there will be available to the Department and to the Foreign Service officers who have a deep cultural, historical, and political understanding of Israeli problems. Hebrew will thus become the fifth language of specialization in the Near Eastern area, the others being Greek, Turkish, Persian, and Arabic. It is the intention of the Institute that during the immediate future, at least, this language and area specialization work will be carried on in an appropriate institution in the United States.

3. Efforts will be intensified to encourage personnel attached to our embassy and consulates in Israel to study Hebrew under our field programs.

Sincerely,
LOY W. HENDERSON,
Deputy Under Secretary for Administration.

Ninth Anniversary of the Independence of Israel

SPEECH
OF
HON. GLENN CUNNINGHAM
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. CUNNINGHAM of Nebraska. Mr. Speaker, I am proud to join my colleagues in paying tribute to a courageous people on the ninth anniversary of the founding of Israel. There are so many who have contributed so much to the growth of this small nation, which represents a haven for the oppressed from throughout much of the world.

Nine years ago the victors in a great World War looked with horror on the results of an aberration which had cost the lives of 6 million Jews. Americans are proud to have had a part in the founding of a haven for these persecuted people, and in the growth of this small new nation which has come so far in a

short time. It is indeed a small nation by American standards, one with few resources except its people, and there are truly too many of these for the size of the land. But it has been the sweat and labor of these people which has gradually transformed the desert lands into fertile acres.

But in these 9 years the way has been hard. There have been wars and constant threats to Israel's independence. Only the strength of the people of this nation has allowed the country to stand in the fact of its sworn enemies. At times the path has been hard and discouraging but the people have persevered and progressed.

The country is virtually surrounded by enemies, but I hope that the friendship of Americans has been a ray of hope and encouragement through these hard years. I think it important that this anniversary of Israel's independence be marked with renewed assurances from this country of the friendship and hopes that stream from these shores to that small nation on the Mediterranean Sea. The world should know of the admiration and support from those who love and cherish freedom for the free State of Israel.

The way ahead is not free of shadows. The sworn enemies of this new land are not content to have this country continue to grow. But the people who are now passed on and many thousands more have made Israel grow from a desert to an oasis and there are hundreds of thousands more who will work for the preservation of this courageous nation.

I join my many fellow Americans in sending greetings to Israel and to its people who have the admiration, friendship, and hopes of freedom-loving peoples around the world. May this free state continue its progress and may its people—so long persecuted and attackled—find peace and prosperity for themselves and those to follow them.

Frank Todd Meacham, Chattanooga's Acting Postmaster

EXTENSION OF REMARKS
OF
HON. B. CARROLL REECE
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 7, 1957

Mr. REECE of Tennessee. Mr. Speaker, Mr. Frank Todd Meacham, the acting postmaster at Chattanooga, Tenn., may have been a spectacular official, but he also was an efficient official and I wish to include in my remarks a report in the Chattanooga Times commenting favorably on his services:

MEACHAM'S SECOND POSTER CLOSES 46-DAY REPUTATION

Frank Todd Meacham, Chattanooga's acting postmaster for the past 46 days, has acquired quite a reputation in that short time as a sign painter, but unknown to most, he has done quite a job also in coordinating post office activities.

This latter job has been so good, in fact, that Chattanooga now is considered the top post office for efficiency in the Tennessee-Alabama-Mississippi region, according to figures for the mail handled per man-hour.

And at least two delegations from other first-class offices in the area have visited here to see how he did it.

This is how:

Shortly after taking office, Meacham "organized" the postal staff. The staff members, or vice presidents, are assistant postmaster Leonard Shipley; Paul Igou, superintendent of mails; C. E. Coppinger, assistant superintendent of mails; L. G. Boydston, general foreman; L. R. Griffitts, superintendent of delivery and collections, and W. A. Gann, superintendent of window service.

These six men have a total of 212 years' experience in the post office and they were delegated authority and responsibility for its operation.

Meacham, who turns over the acting postmaster's job today to O. M. (Mickey) Spence, has acted as moderator over the staff meetings, which are held about once a week.

"Probably no other post office in the region operates this way," Meacham says.

In addition to the organizing, Meacham has filled a number of vacancies on the staff in the various substations and at the main office and this obviously has helped the efficiency of the organization.

These are the things for which he has received little publicity.

The signs are a different thing.

He put up his first sign some time ago criticizing a Democratic Congress, for failing to appropriate enough money to run the post offices. Postal service was curtailed for awhile for lack of funds.

Yesterday another poster went up and was in the lobby of the post office again today.

The latest one pictures a decapitated Meacham with the headchopping tool labeled the Hatch Axe, an obvious reference to the Hatch Act, which forbids Government workers such as postmasters to engage in politics.

This law is one of Meacham's pet hates. He long has been active in Republican Party patronage in this area.

Also on the poster is a poke at President Eisenhower. In a circle, apparently representing a campaign button, are the words: "I Like Edgar," an obvious reference to the criticism from the President's brother, Edgar Eisenhower, of the 1958 budget.

There also are some references to Congressmen J. B. FRAZIER, of Tennessee, and CARL ALBERT, of Oklahoma, both Democrats.

Spence has indicated he plans to continue Meacham's methods for the post office operations. Whether this includes the signs remains to be seen.

They Deserve It

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 7, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include a poem written by Mr. Henry Kravetz, formerly a constituent from Chelsea, Mass., which I know will be of interest to the postal employees, the Post Office Department, and the public:

THEY DESERVE IT

He may be your neighbor
He may be mine.
That man serves America
Rain or shine.
Pouch stooped his shoulders
While pacing the trail
Toil United States Postman!
Deliver your mail.

Uniform of gray resembles his day
Years a prey, to time and space—
Hours to assort, report,
Deliver and case.
Your messenger of progress
Does not grumble or sigh.
Yes sir, is the answer!
Your carriers reply—

In battle for an existence
Fall-in at dawn!
Discharge your duties
Soldier without a gun.
The day you retire
Junior will take your place.
Spare him from hardship!
Sunshine shall greet his days.

How meager is his compensation
To meet the requirements of the day.
Show him due consideration
By an increase in pay.
Who will come to his rescue?
Who will hear his muffled voice?
Generosity to your own America!
Destiny makes our choice.

—*Henry Kravetz.*

WEST PALM BEACH, FLA.

Today We Account for Another Year—And Look Ahead to More Crusading

EXTENSION OF REMARKS
OF
HON. J. CARLTON LOSER
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 7, 1957

Mr. LOSER. Mr. Speaker, I ask unanimous consent to extend my remarks in the CONGRESSIONAL RECORD and to include an editorial which appeared in the Nashville Tennessean on April 28, 1957. This great newspaper has passed another milestone of public responsibility and over the years has covered in great detail a number of events which were of particular interest to the State of Tennessee and the entire Nation.

The editorial mentions a number of news events for which this daily newspaper crusaded over the past year. I think it will be of interest to Members of this great body and I commend it to their attention.

The editorial follows:

TODAY WE ACCOUNT FOR ANOTHER YEAR—AND LOOK AHEAD TO MORE CRUSADING

The trouble with newspapers today, one of the grand old men of American journalism said recently, is that they "do not campaign for a cause."

The author of that complaint is Mr. Herbert Bayard Swope, who was editor of the late New York World when it passed from the scene as one of the great American papers of the last generation.

"Newspapers generally," he complained, "are forgetting that they are the public conscience. No one is on the job to crusade."

To that indictment the Nashville Tennessean respectfully demurs.

It may be that in this day and time crusading papers are the exception when they should be the rule. If so, this democratic Nation is the poorer for that.

But there are exceptions. Recall, for example, the brilliant work the Chicago Daily News did last year in exposing the fantastic frauds of State Auditor Orville Hodge. Or the brave and persevering undercover probe of teamsters and public officials by the Portland Oregonian. Or the skillful solution of the Mad Bomber case by the New York Journal-American.

AFTER 20 YEARS

It is not our purpose here today, however, to discuss the American press generally. We write, instead, out of a sense of public responsibility, of one newspaper—this one.

And we do so in keeping with a custom—inaugurated by the late Silliman Evans—of making an annual accounting to our readers. This we do in April because it was in this month—20 years ago—that the Nashville Tennessean came under its present ownership.

Whether this accounting establishes our newspaper as an exception to Mr. Swope's blanket criticism is for our readers to say. But candor compels us to say that it is our purpose to make the Tennessean a crusading newspaper.

THE PUBLIC CONSCIENCE

We do so because, contrary to Mr. Swope's view, and along with more than a few others, we find it impossible to forget that a newspaper is "the public conscience."

As we understand and play our role, it does not end with printing the bare, surface facts of events in this turbulent world.

It is our mission in democracy, we believe, to dig deeply for the underlying meaning, to reveal error and wrongdoing, deceit, and mischief. It is up to us not just to protect, but to assure the public's right to know about public matters. It is our responsibility to see that justice prevails over injustice and equity stands in place of privilege.

In the last year—as in those preceding it—that credo has led the Tennessean into championing many public causes. Some have been big ones and some extremely small. Some fights we have won and others we have lost.

ROTTEN BOROUGHS IN TENNESSEE

But more important, it seems to us, we have quit no cause—large or small—that we thought was worth fighting for. Nor will we now.

Today, for instance, we find ourselves embattled over an issue as great as any that has engaged us in the past—State legislative reapportionment.

With no reapportionment since 1901, Tennessee today has a situation as bad as the rotten boroughs of England, and threatening to become worse. A vote for a member of the State house of representatives from Moore County today counts 28 times as much as a vote from Anderson County, to cite just one example. What will happen to democracy if that trend continues is frighteningly obvious.

In this crusade, we find ourselves in the unhappy position of opposing the stanch supporters we have had for many years in the smaller counties. But, as in many other instances, we feel we must continue this fight for fair representation lest democracy be destroyed at its very base—the ballot box.

And too much progress has been made at the ballot box to grow fainthearted now. Though less dramatic than our long campaign against the poll tax, the subsequent efforts to encourage use of the free vote that had been won in that fight bore healthy fruit last year when more Tennesseans than ever before went to the ballot box.

CLOSE TO A MILLION

The 939,404 votes cast in the presidential election were not far short of the goal of 1 million we set when the poll tax was abolished. And particularly gratifying were the 96,302 votes cast in Davidson County—an increase of 150 percent over the 39,985 votes cast just 8 years earlier.

It was one of our disappointments, of course, that the Democratic candidates we supported in the presidential election were not victorious.

But we have no apologies to make for our failure to succumb to the strange spell that led many of our contemporaries of the American press to treat the Eisenhower administration as if it could do no wrong.

And there is no little satisfaction in the knowledge that at the same time the Republican President was increasing his 1952 majority in both Tennessee and the Nation, the Democratic ticket again outpolled the GOP's indispensable man and heir-apparent NIXON in the 3 congressional districts in our circulation area—and by 13,000 more votes than in 1952.

GOODBY, MR. ROSS

Just as our scrutiny of the Eisenhower administration did not begin with the election campaign, it did not end there.

It was early this year that we called for the resignation of Assistant Defense Secretary Robert Tripp Ross after a reporter for the Tennessean had found sworn records firmly establishing his connection with clothing companies holding large defense contracts.

Although protesting our findings as an error, Mr. Ross soon quit while under congressional investigation. That investigation continues. Meanwhile Comptroller General Joseph Campbell has blasted the contracts as repugnant to public policy.

A MESS EXPOSED

Another congressional investigation with a local flavor is that involving the corruption-ridden teamsters union.

Long before this scandal broke upon the national scene, stories and editorials in the Tennessean had exposed domination of the Nashville local by ex-convicts and had reported the indifference of Dave Beck and Jimmy Hoffa to the conditions here.

Now the Tennessean's accounts of what has gone on within the deep, dark, inner sanctum of the local here are in the hands of the Senate investigating committee and Senator MCCLELLAN has referred to a possible probe of conditions in Nashville.

Regardless of what the Senators do, this newspaper will continue its own probing, and will continue to give its support to courageous and law-abiding teamsters fighting to clean up the mess that has sickened them no less than it has the general public and the vast majority of all union members.

IN DEFENSE OF TVA

Before leaving the national scene in this account, we would call attention to the fight we have waged longest there—the campaign in behalf of TVA.

Although the TVA is now almost 25 years old, its enemies have never relented in their attacks upon it and today—with encouragement from the White House—feel nearer than ever to their cherished dream of wrecking it. Because we know their vicious propaganda to be false and their pressure on Congress to be selfishly motivated, we continue to crusade for this great democratic institution which has benefited the entire Nation.

Among Tennessee issues during the past year, none has been more important or more sensitive than that of school segregation and racial relations.

Here, we have fought for sanity. For respect for law and human rights.

We exposed John Kasper for what he is. A rabble-rousing racist who called upon the people of Clinton and the whole South to shed blood rather than accept the decree of the Supreme Court, he was shown to be an apostle of the mad Fascist poet, Ezra Pound. And contrary to his newfound hatred of other races, he was shown to have been their intimate associate for years in New York.

In finding the path of reason, Tennessee and the South deserve better leadership than Kasper and his kind offer. It is our aim not only to encourage that better leadership in others but to try to provide it ourselves.

FLIGHT FROM TENNESSEE

No less important to Tennessee's future is industrial progress. When the Chicago Tribune recently complained that Southern "hillbillies" were besmirching the fair name of its general "skid row," we sent a reporter there to cover the same ground. He found there was some justification for what the Tribune reported, though it had been twisted beyond recognition.

That, however, did not matter so much as the discovery that Chicago is attracting thousands of Tennesseans every year for the simple reason that there are no jobs for them at home. It is our hope that our continuing series of stories and editorials will awaken Tennessee to the losses it is sustaining this way and speed the concerted action needed if we are to keep our most valuable resource—our people—at home.

TOWARD ONE GOVERNMENT

Locally, the issue that transcends all others at the moment is the dramatic effort to unify our community under a single metropolitan government.

After years of urging fewer instead of more governmental units as the answer to our metropolitan problems, we have shared with others the gratification over progress achieved in recent months. Today, our community is within sight of one of the greatest urban advances in the history of American municipal government.

The fight is not going to be easy from here on in, but, for our part, we are in it to stay.

AND STILL OTHER CAUSES

And the same is true in respect to other causes in which we have been active:

The polio vaccination drive.

The struggle against politicians who would deny the people their right to know about how their own government is run.

The fight for more local support of education in Tennessee and for more equitable sharing of State school funds.

The campaign against highway-traffic deaths, which decreased 16 percent last year under a dynamic new safety commissioner who replaced a misfit whose ouster we had long urged.

The battle against the outdated and unworkable personalty tax.

There are other causes that have occupied our attention in the last year. And there are still others, we know, that will emerge during the next year, though now unforeseen.

From all of these come the crusades of one newspaper which through success and failure tries, in its own corner, to prove worthy of its role as the public conscience.

In this spirit, we present this report of accountability to those we would serve—our readers.

National Association of Home Builders Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, on April 11, 1957, I received a letter from the National Association of Home Builders expressing opposition to the provisions of H. R. 6659 affecting veterans. Specifically, the National Association of Home Builders has expressed opposition to the use of the reserves of the national service life insurance funds for the purchase of FHA veterans' preference loans. The National Association of Home Builders has also expressed concern regarding the section proposing to control discounts. In lieu of a veterans' preference program in Federal Housing Administration, the National Association of Home Builders urges a liberalized FHA program which will provide an opportunity for the purchase of a home to veterans and nonveterans alike.

The letter of the National Association of Home Builders dated April 11, 1957, follows:

NATIONAL ASSOCIATION OF HOME BUILDERS,
Washington, D. C., April 11, 1957.

The Honorable OLIN E. TEAGUE,
Chairman, House Veterans Affairs Committee, House Office Building, Washington, D. C.

DEAR MR. TEAGUE: This is in response to your request for our views on H. R. 6659.

As I advised the Subcommittee on Housing of the House Banking and Currency Committee in my testimony, we believe there should be a single downpayment system in the FHA for veterans and nonveterans alike. As the legislation authorizing guaranty of loans for World War II veterans comes to an end, it is, in our opinion, vitally important that a mortgage financing device be provided which would remove the distinction between veterans and nonveterans and provide to all an opportunity to acquire a home on practicable terms.

We strongly believe and urge that the required FHA downpayments should be reduced through adoption of a loan-to-value schedule of 98 percent of the first $10,000 of value; plus 92 percent of the next $5,000; plus 75 percent of the excess with a maximum mortgage of $25,000. Since the GI interest rate has not been adjusted so that the VA loan guaranty program can again become effective, then it seems to us that prompt action in this direction is of even greater importance.

H. R. 6659 recognizes the desirability of lowering FHA downpayments but does so effectively only for veterans for whom its downpayment schedule approximates that we have suggested for general use. We disagree with the proposal for preferential treatment for veterans as part of the revision of the FHA downpayment requirements. An overall amendment to the FHA part of the bill adopting our suggested schedule would remove all reason for introduction of any new program designed especially for veterans.

We believe that use of the established FNMA special assistance function is far preferable than resort to the reserve of the national service life insurance fund. Whether FNMA special assistance or NSLI reserves are used, the Treasury would have to sell bonds to raise the required funds and at rates above those presently carried by NSLI bonds. If the purpose of suggesting use of NSLI funds for mortgages is to obtain for the fund the higher rate of interest on mortgages, we suggest this can be better accomplished by issuing new bonds at today's higher rates.

On discounts, we cannot agree that they should be controlled because we do not believe there is any feasible way to control them. The Housing Subcommittee last year recognized that discounts in some degree are unavoidable. The proposal to require FHA and VA to prescribe limits will have the effect only (1) of placing impossible administrative burdens on these agencies, and (2) making adherence to the strict letter of regulations and the law extremely difficult for the average builder and lender conscientiously trying to use these financing systems.

Sincerely,
GEO. S. GOODYEAR, *President.*

Symbol of Resistance

EXTENSION OF REMARKS
OF
HON. LEONARD FARBSTEIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. FARBSTEIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article written by my good friend, Mr. Elmer A. Rogers, a sincere patriot and veteran, with whom I served in the United States Coast Guard Reserve:

SYMBOL OF RESISTANCE

What is more appropriate than to adopt a symbol for loyalty day, on this, its 10th anniversary?

We looked back through history and found that the American colonists widely used the rattlesnake symbol with appropriate slogans, in various forms and designs, as a warning to tyrants.

A flag with the rattlesnake theme, was the standard of the South Carolina navy. One of its variants was the emblem of the Culpepper minutemen of Virginia; and still another, the coiled rattlesnake superimposed on a plain yellow field, bearing at its base the words, "Don't Tread on Me," was known as the Gadsden flag, and was presented by Col. Christopher Gadsden of South Carolina to the Continental Congress on February 8, 1776, as a protest against Lord North's treatment of the colonists.

It was designated as the flag of the American Navy, and was flown by Commodore Esek Hopkins on the flagship *Alfred*, on its expedition to the Bahamas in 1776.

One writer of the time quaintly stated that as the rattlesnake's eye exceeded in brightness that of any other animal, and she had no eyelids, she might therefore be esteemed a symbol of vigilance; that inasmuch as she never began an attack, nor, when once engaged, ever surrendered, she was therefore an emblem of magnanimity and true courage.

Probably the deadly bite of the rattler, however, which was foremost in the minds of its designers, and the threatening slogan, "Don't Tread on Me," added further significance to the design.

This is an opportune time to revive the rattlesnake flag as—

A symbol:

A symbol of resistance against communism and all isms repugnant to our form of government;

A symbol of resistance against tyranny, autocracy and oppression;

A symbol of resistance against being pushed around, here and everywhere.

On this occasion, it gives me great pleasure to present to you, a miniature of the rattlesnake flag—it is an American heritage—do display it prominently.

ELMER A. ROGERS.

Loyalty parade breakfast, Veterans of Foreign Wars, the Savoy Plaza, April 27, 1957.

First United States Jet Engine Developed in Lynn

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 7, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include a very interesting article which appeared in the Boston Sunday Herald on May 5, 1957:

FIRST UNITED STATES JET ENGINE DEVELOPED IN LYNN—HIGH ALTITUDE FLIGHT BEGUN BY GE ALSO

Today, aviation is among the biggest and most dynamic segments of the New England economy. At least, there are substantial indications that this is the case. But the mere fact that no one can prove or disapprove this statement indicates that New Englanders have not identified and promoted their vital contributions to the Nation's top employer.

Nearby Lynn, Mass., which only last year adopted the slogan "Lynn—Birthplace of America's jet age" offers a good example of this tendency. Lynn has turned to aviation so quietly that its importance as an aviation center is not generally known.

It was in 1918—just 15 years after the Wright brothers' first flight—that a group of General Electric engineers from Lynn took the world's first supercharger to the top of Pikes Peak in Colorado where it was successfully tested. And so a new era in aviation was born in Lynn as this device, which makes possible high altitude flight in piston engine aircraft, became a reality.

Then, 16 years ago, Lynn actually became the birthplace of America's jet age when, in a secret corner of the River Works, America's first jet engine was developed by General Electric Co. These two historic aviation events, both of which took place in what was once the shoe center of the Nation, symbolizes New England's plight in the air age.

Because New England aviation products leave the area on flatcars rather than runways, there is a lack of identification with the aircraft industry.

Today, statistics which describe the aviation industry in New England are surprising in their magnitude. For example, aviation employs over 75,000 people in New England. This compares to 20,000 just 5 years ago. In addition, the total number of New England firms producing aircraft parts and products is over 2,600. This is one-eighth of the national total in an area only one-twentieth of the country.

Many companies which are making important aviation contributions suffer from a similar lack of identification with the industry. General Electric is a typical example having developed both the turbo super-

charger and the American jet engine. GE is not generally identified with the aircraft industry in New England, and yet over half of the 20,000 employees on its Lynn and Everett payroll earn their living from aviation.

GE's aircraft accessory turbine department, which is headquartered in Lynn, is a case in point. This department developed and now produces the revolutionary pneumatic equipment which supplies all electric and hydraulic power for the Boeing B–52 bomber. With over 2,600 employees and more than 500,000 square feet of floorspace, this department is nearing completion of the modernization of its facility, now evaluated at over $10 million in the historic River Works—once an important lighting and motor center.

The extremely high technical content of this department's product line, which also includes starters, fuel pumps, rocket and missile accessories (in addition to turbosuperchargers) makes New England an ideal locale for this business. But because these products leave the area by rail, and because they lack the glamor of the airframes themselves, the River Works operation is not identified with the aviation industry.

Aviation is a big business which is growing fast in New England, but it has developed so quietly that many have not noticed its size or its importance to the local economy. But New England's contribution to aviation demands a kind of ingenuity that is characteristic of the region as Yankee skills turn to the sky.

Advice on the Matter of Budget Cutting

EXTENSION OF REMARKS
OF
HON. E. Y. BERRY
OF SOUTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 18, 1957

Mr. BERRY. Mr. Speaker, I have asked permission to insert in the Appendix of the RECORD a letter which I have received from a constituent whose judgment I value very highly, John Knecht, of Rapid City, S. Dak.

Mr. Knecht has had many years of business experience, is a very successful businessman himself, and his concise manner in which he reviews the problem of taxes and spending is worth the time of every Member to read. His letter reads as follows:

I want to give you my advice on the matter of budget-cutting, which, as I see it, is a hot issue in Washington today. I thought a few opinions from the people you represent might help.

First of all, it seems to me, we have about reached our limit in taxation and also of any ways to tax anything more that can bring any additional revenue. It is my opinion that there is one place in particular that I am interested in. First, that is, we are forming too many new agencies that require additional expense in maintaining health problems, etc., making all kinds of records of things that are not necessary. At the same time they are interfering with business and nearly every avenue that you can think of, and every turn is built on an expensive basis and they are retiring programs in any ordinary manner. If we continue adding various agencies of all types to our country from Washington instead of the States, we are going to wind up with no free country.

I think the people of a State or a community should work out their own salvation, except in a few larger things that are impossible for the community to advance. When I go to any function in our city, we are always surrounded with a lot of Government employees that have been working up through Washington and then some of them on through the State. In other words, to make it simple, we are just getting too much regimentation to be good for the country. If we continue to use every tax dollar that we can find in any place, what will we do if we run into a few emergencies that have to be done in case of war or a severe depression?

I wish to say the State of South Dakota, in my opinion, has been handled more efficiently than any State in the Union, considering our population and income of any State in the Union. This should give you fellows quite an opportunity to point out a few things of economy which have been done in our own State and working out successfully in the end.

I am also trying to tell you that the people of this country are thinking in the same terms. They may not write you, but I meet a good many people and everyone's sentiment practically to the last man, only the Government employees exempt, agree with this idea that we must do something to reduce our budget and reduce our expenses. None of these people, as well as myself, are interested not so much in the immediate reduction of taxes, but to curtail the spending and build a little reserve for emergencies that may arise later on.

Bureau of the Budget Opposes Veterans' Provisions of Housing Bill, H. R. 6659

EXTENSION OF REMARKS
OF
HON. OLIN E. TEAGUE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, May 6, 1957

Mr. TEAGUE of Texas. Mr. Speaker, H. R. 6659, the proposed Housing Act of 1957, was drafted by the Banking and Currency Committee after that committee had held general hearings on housing problems. Hearings have not been held specifically on H. R. 6659. Since H. R. 6659 contains a number of provisions relating to veterans' housing, which is under the jurisdiction of the Veterans' Affairs Committee, I requested the Bureau of the Budget and other interested agencies and groups to comment on the specific provisions of H. R. 6659. In a letter dated April 17, 1957, the Director of the Bureau of the Budget has advised that enactment of H. R. 6659 would not be in accord with the program of the President. Specific objections have been raised to the proposed veterans' preference section under FHA and the proposal to use a portion of the national service life insurance trust fund for the purchase of FHA veterans' preference home mortgages.

The letter from the Bureau of the Budget dated April 17, 1957, follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
BUREAU OF THE BUDGET,
Washington, D. C., April 17, 1957.

Hon. OLIN D. TEAGUE,
Chairman, Committee on Veterans' Affairs, House of Representatives, Washington, D. C.

MY DEAR MR. CHAIRMAN: This is in response to your letter of April 9, 1957, requesting the views of the Bureau of the Budget on certain provisions of H. R. 6659, "To extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes," insofar as the bill relates to veterans' housing benefits.

Section 103 (c) of this bill would establish a veterans' preference system within the FHA mortgage insurance program. Downpayment requirements for veterans would be equal to half of the requirements for other home purchasers and the insurance premium (currently one-half of 1 percent) would be waived. Insurance claims on veterans' defaulted loans would be paid from a revolving fund maintained by appropriations and operating income. World War II veterans' preference entitlement would extend beyond the July 25, 1958, termination date according to the length of the veteran's service, but not more than 4 years.

By July 25, 1958, the World War II loan-guaranty program will have been in effect for 12 years. Since loan benefits beyond that date could have no important relation to the program's basic purpose of helping veterans readjust to civilian life, the Bureau of the Budget believes that the extension contemplated in H. R. 6659 is not warranted. The objective of the administration is rather to maintain an effective benefit program during the remainder of the designated readjustment period.

As you know, the current effectiveness of the Veterans' Administration loan-guaranty program is being seriously impaired by a scarcity of private mortgage funds at 4½ percent interest. Heavy competition for funds throughout the economy has resulted in generally higher rates of interest, while the rate on veterans' guaranteed loans is held at 4½ percent by law. To restore veterans to a better competitive position in the mortgage market, the President has recommended that the maximum interest on guaranteed loans be increased to 5 percent.

Section 103 (c) of H. R. 6659 is apparently intended in part as a substitute for the action proposed by the President. The Bureau of the Budget does not believe that the substitute would be of greater immediate benefit to veterans. The interest rate would be 5 percent in either case. While special downpayment requirements would apply to veterans under the proposed bill, the requirements under the current Veterans' Administration program are even more liberal. Veterans would receive no new benefit from the proposed waiver of insurance premiums since the Veterans' Administration currently makes no charge for its guaranty.

While section 103 (c) does not afford veterans any immediate advantages which would not result at least equally from a realistic interest rate on Veterans' Administration guaranteed loans, the proposal would involve serious disadvantages to the Government. It would not merely alter the existing veterans' housing benefit but would establish an entirely new program which would be administered simultaneously with the continuing Veterans' Administration program. Furthermore, by exempting veterans from payment of regular FHA insurance premiums, the bill would establish a precedent which could, by later extensions, gradually undermine the insurance system. In addition, the new veterans' benefit would be set up as an integral part of a permanent housing program and would accordingly intensify existing pressures for indefinite continuation of the veterans' benefit without regard to its basic readjustment purpose. This aspect of section 103 (c) is especially serious, since the same section would initiate the extension process by continuing World War II entitlement up to 4 years beyond the established readjustment period.

In the earlier years of the World War II loan-guaranty program, a strong case was

made by several commissions for administrative merger of the Veterans' Administration and FHA programs in order to promote greater efficiency and more effective coordination of activities affecting Government housing policy. At this date, little, if any, net gain would result for the World War II program. However, the proposal may be worth serious consideration for the Korean conflict veterans' program which continues until 1965, but even in this case consolidation should not be used as a device for unwarranted extension of veterans' benefits.

To increase the availability of FHA insurance benefits to prospective home buyers, both veterans and nonveterans, the President has recommended permanent authority to liberalize FHA loan terms. It is believed that this comprehensive approach will best serve the future needs of home purchasers, the housing industry, and the national economy in general.

Section 205 of the bill would provide for investment of $1 billion of national service life insurance trust fund reserves in mortgages insured by the FHA under the veterans' preference system. This provision would have the same basic effect as an equivalent expansion of the veterans' direct loan program. That program currently operates on a revolving fund basis with money borrowed from Treasury.

The ultimate source of loan funds would be the same under section 205 as under the present direct loan program. If trust fund reserves were withdrawn from their normal investment in Government securities, the Treasury would have to replace them by borrowing from the public. Thus, the economic effect and the impact on the Treasury's debt management problem would be substantially the same as if the money for loans came from the budget accounts, as it now does. The bill would merely require much more complex administrative procedures to obtain money from the Treasury. However, the volume of such funds and the related Treasury borrowing from the public would be multiplied. In addition, use of Federal credit resources on the proposed large scale for purchase of veterans' mortgages would involve the Government in heavy competition with the private money market.

Enactment of section 205 also would serve as a precedent for the similar use of other large trust funds such as the Railroad Retirement trust fund, the old-age and survivors' insurance trust fund, and the civil service retirement trust fund. The moneys in these trust funds are by law set aside for special purposes, and the Government has a heavy responsibility as trustee. Questions have been raised in the past about the handling of these funds even while they are invested in Treasury securities. The proposed use of trust fund reserves for housing loans to veterans would undoubtedly reopen discussion of this kind and tend to impair public confidence in the integrity of the fund.

The provisions of section 205 should also be considered in relation to the requirements of our national economy. The Government's contribution toward preserving a sound and stable economy must be made mainly through its fiscal and credit policies. As you no doubt know, there are many new programs which the Government is under heavy pressure to undertake and which must be reconciled with the Government's budgetary and fiscal policies. The budget for 1958 postpones various construction programs until a later date in order to avoid increasing competition for labor, materials, and equipment. In view of the general economic situation and the budget situation in particular, it is of utmost importance that the Government not undertake programs from either the budget or the trust accounts which involve further credit expansion unless they are clearly necessary.

In view of the above considerations and other undesirable features of the bill which are not related solely to veterans, enactment of H. R. 6659, in its present form, would not be in accord with the program of the President.

Sincerely yours,

PERCIVAL BRUNDAGE, *Director.*

Ready for Disaster?

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include a very interesting article on the progress made by the Business and Defense Services Administration in 3 years since its initiation, which appeared in the May 6, 1957, issue of Steel, the metalworking weekly.

The article follows:

READY FOR DISASTER?—MORE COMPANIES ARE MAKING PLANS FOR EMERGENCIES—HERE, 38 TOP EXECUTIVES TELL YOU HOW TO GET STARTED—PERSONNEL REPLACEMENTS, RECORD PROTECTION ARE BASIC

Has a flood ever cut off your plant from its suppliers? Are you in an earthquake area? Has your source of power ever been shut off? Have you ever had a major fire?

What would you do if your plant, a customer's or a supplier's, were partially destroyed by enemy attack?

Full report: In February, 38 top executives met in Washington to exchange ideas on how to continue production in the event of an enemy attack. Their conclusions are relevant to any disaster (accidental or man-made) which might strike your plant.

The full report is available from Commerce Department field offices. It represents the results of the industrial defense program initiated 3 years ago by the Business and Defense Services Administration.

Problems: Here are the areas you should consider if your plant (or company) is to be ready for any emergency: 1. Who's responsible for your planning? 2. Is your plan in writing? 3. How are you storing vital records? 4. Who takes over if key management personnel are not available? 5. Do you have an alternate company headquarters? 6. Can you quickly assess any damage? 7. Are emergency finances available? 8. How are your facilities protected? 9. Are they dispersed? 10. Are they underground?

Progress: H. B. McCoy, BDSA Administrator, believes much progress has been made. Large corporations in particular have been doing a good job. BDSA would like some of their thinking to filter down to smaller manufacturers.

Conference participants included: Aluminum Company of America, American Machine & Foundry Co., Boeing Airplane Co., Chrysler Corp., Cincinnati Milling Machine Co., Ford Motor Co., General Electric Co., Jones & Laughlin Steel Corp., Koppers Co., Inc., Mueller Brass Co., Raytheon Manufacturing Co., Reynolds Metals Co., Sperry Rand Corp., Stromberg-Carlson Co., Thompson Products, Inc., Timken Roller Bearing Co., United States Steel Corp., Western Electric Co., and Westinghouse Electric Corp.

Responsibility: Most of those firms have committees to coordinate emergency planning. In a typical setup, the production vice president is chairman. Department representatives report on their planning to an industrial defense coordinator. Multiplant corporations have members from each plant on such a committee.

Implementation: The plan must be in writing to provide a basis for periodic checks on progress. Warning: Avoid the tendency to sit back and relax once the plan is on paper. You may fail to implement it properly.

With the plan comes the safe storage of company records. United States Steel Corp.'s mine X is one answer. Other firms are using commercial bombproof shelters in nontarget areas.

Replacements: "When the captain is killed, the lieutenant steps in; when the lieutenant is killed, the sergeant • • •." Sixteen of the companies represented at the conference have set up replacement schedules for management personnel; some lines of succession extend through lower echelons to supervisory personnel.

Several of the firms are tying their management development programs to schemes for succession in an emergency. The lists are confidential and subject to review at least once a year. One firm has placed copies of its list in 4 widely scattered sections of the country; all top executives have been advised where they are, although only the chairman, the president and 1 vice president know its content.

Ten companies have established alternate headquarters. Some are locating them near record storage centers. One firm picked its president's home because it's in a nontarget area.

Damage? You can set up a center into which damage assessment can be done with electronic computer data. You might want to locate a company plane in a safe area to be used only in an emergency for aerial reconnaissance. People living near your plant might be asked to report to you on damage if your headquarters is in another city.

You may need to set up technical teams to survey damage on a moment's notice.

You and your employees need money, too. One firm has 16 reporting centers for employees. They are supplied with $25 and $100 checks. For its corporate needs, securities are ready in secret nontarget vaults.

Protection: The rehearsal of shutdown procedures is fundamental to plant protection. Some firms have built shelter stations for personnel near the plant.

Most of the firms at the conference are using dispersion of new plant facilities as a tool. The economics of plant dispersion is a subject in itself, say these experts, but the chance of locating in a target area is considered when expansion plans are made.

What It Means To Be an American

EXTENSION OF REMARKS
OF
HON. JOHN H. RAY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 1957

Mr. RAY. Mr. Speaker, a constituent of mine has sent me a somewhat unusual and, I think, valuable and timely statement of what it means to be an American. The statement is short, clear, and positive and will, I think, strike a responsive cord in many Members of the House. I am glad to present it in the RECORD:

WHAT IT MEANS TO BE AN AMERICAN

I do not choose to be a common man.
It is my right to be uncommon—if I can.
I seek opportunity—not security.
I do not wish to be a kept citizen, humbled and dulled by having the state look after me.
I want to take the calculated risk; to dream and to build; to fail and to succeed.
I refuse to barter incentive for dole.
I prefer the challenges of life to the guaranteed existence; the thrill of fulfillment to the stale calm of utopia.
I will not trade freedom for beneficence nor my dignity for a handout.
I will never cower before any master nor bend to any threat.
It is my heritage to stand erect, proud, and unafraid, to think and act for myself, enjoy the benefit of my creation and to face the world boldly and say, "This I have done."
All this is what it means to be an American.

Thomas E. Murray

EXTENSION OF REMARKS
OF
HON. CHET HOLIFIELD
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 7, 1957

Mr. HOLIFIELD. Mr. Speaker, under unanimous consent, I ask to have printed in the Appendix of the RECORD an editorial from the May 2 issue of the New York Journal-American. The same editorial was also carried by the Los Angeles Examiner.

This editorial from a great metropolitan newspaper indicates the concern which many people have regarding the reappointment of Atomic Energy Commissioner Thomas E. Murray.

The concept of the commission-type of administration for quasijudicial, quasilegislative agencies of Government can only remain valuable as long as men of strong and independent viewpoints are appointed to these important posts. The value of a commission is found in the fearless proposals and independent judgments finally being welded into a policy by majority decision. When this contribution of ideas and judgments from men of different backgrounds of education, experience, and wisdom becomes a nullity because of timidity, indifference, or fear of nonconformity to a dominant member of a commission, then indeed do we see the subversion of the original concept of multimember administrative method.

Congress in its wisdom has legislated a five-man Commission to direct the policy of the most important agency of Government to be formed in the past 100 years, the Atomic Energy Commission. During the past 5 years this Commission has gradually been destroyed by the resignation of capable men, the long-time sickness of one of its members and the failure of the President to fill vacancies with strong men and his failure to reappoint men with outstanding records such as we see in the case of Commissioner Thomas E. Murray.

Eleven members of the eighteen members of the Senate and House Joint Committee on Atomic Energy have publicly announced their confidence and appreciation of the great contribution of Commissioner Murray during the 7 years he has served as a Commissioner. These 11 members have not always agreed with Mr. Murray but they know of his great devotion and great contributions to the success of the atomic energy program. Because they believe that the reappointment of Mr. Murray is most important to the national interest, they have recommended to President Eisenhower by letter that he be reappointed. It is to be hoped that the President will weigh carefully the vital issues which are involved in this matter. Certainly the members of the joint committee will be greatly concerned with the decision.

THOMAS E. MURRAY

The Atomic Energy Commission is a supremely important agency. This being so, its members should be men of the highest integrity, intellectual courage, and specialized knowledge to direct this Nation's nuclear development both for security in war and its uses in peace.

In our opinion Thomas E. Murray fulfills all these conditions.

Nor are we alone in that belief.

A letter has just been made public urging President Eisenhower to reappoint Commissioner Murray, whose term expires June 30. The letter was signed by all 10 Democratic members of the Joint Congressional Atomic Energy Committee and 1 Republican, Representative JAMES P. PATTERSON, of Connecticut. We think it reflects the views of many Americans.

There is a growing feeling in Washington that Commissioner Murray will not be reappointed. The reasons for that opinion seem to be that he is a Democrat, that he is a holdover from the Truman administration, that he has become known as a dissenter and sometimes has opposed the policies of the present administration.

None of these reasons is valid.

As the letter signed by the Atomic Energy committeemen points out, Mr. Murray has never permitted political considerations to get in the way of the common good of the United States.

His dissenting has always been in the direction of what he believes the common good to be.

In this connection we offer an excerpt from the CONGRESSIONAL RECORD of April 18, this year. Mr. Murray was credited by Representatives JOHN W. MCCORMACK, of Massachusetts, and CHET HOLIFIELD, of California, as having been largely responsible for the development of the small A-weapons program, to which majority opinion was at first skeptical or indifferent.

We have not always been in agreement with Mr. Murray's views, nor have the Congressmen who support his reappointment. But we would like to ask: Is it not in the interest of the common good to have on the Atomic Energy Commission a man of his experience, brilliance, and honesty? Is not dissent by such a man often of more value than acquiescence?

It is our hope the prevailing feeling in Washington is wrong. It is our hope the President will reappoint Mr. Murray.

Are Jews Sympathetic to Communism?

EXTENSION OF REMARKS
OF
HON. DONALD L. JACKSON
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, May 7, 1957

Mr. JACKSON. Mr. Speaker, the attached article, Are Jews Sympathetic to Communism? written by Rabbi M. J. Merritt, executive director of the Los Angeles Chapter of the American Jewish League Against Communism, Inc., is submitted by request for insertion in the CONGRESSIONAL RECORD:

ARE JEWS SYMPATHETIC TO COMMUNISM?

With montonous frequency I am asked, "Why are so many men and women born in the Jewish fold active in and sympathetic to the Communist cause?" The question stems from the parade of witnesses called before the committee investigating infiltration in the Government, education, entertainment, communications, labor—in brief in almost every phase of American life and activity. The public has taken note of the published names of a preponderant number of these witnesses—names that plainly suggest a Jewish origin. That has led to the question posed.

It is a natural question and deserves an answer. But before the question can be answered intelligently it will not be going far afield to inquire into the causes that made for the rise of communism to strength and influence and the causes, too, that have contributed to its decline.

Communism stood at the peak of its popularity in the United States and counted its most numerous membership and generous financial support in the years that immediately followed the economic breakdown of 1929 and the simultaneous rise of Hitler to power. In the years of misery, privation, hopelessness, and distress that bore down so heavily on the lives of millions in America, communism seemed to stand out like a beacon in a world growing progressively darker. Thousands succumbed to the Communist propaganda that the cycle of boom and bust was implicit in the system of free enterprise to which the Western world was wedded and the Communist indictment that capitalism was bankrupt. Millions were ready to listen to the advocates of a system that brashly offered relief from unimaginable distress and proclaimed that it had the key to enonomic stability.

Communism made the most of that passionate, almost agonized yearning for relief. I remember well the eagerness with which people listened to the Communist claim that in the collective farm the problem of the tiller of the soil was solved and that in a controlled economy and the state-owned industry, communism had abolished the haunting dread of unemployment. Thousands of sensitive souls and bewildered visionaries were completely taken in and became members of the Communist Party. Among these thousands were a considerable number of men and women born in the Jewish fold.

Rarely in modern times have so many men and women been convinced that greed and selfishness were the villains that were blocking the path of human progress and that the greatest need of our day was a new order that would exorcise these evils from which society was suffering. They believed that a new order releasing human energies, would purge society of its ills and bring civilization to full flower. Communism claimed that it had the plan and held the key to that goldren future in the classless society that was a realization of the dream of brotherhood. Thousands of starry-eyed sentimentalists flocked to the party and gave it moral and financial support. A liberal number of men and women born in the Jewish fold were among them.

This, too, was the period when Hitler and nazism had come to power and imposed their will on the German people, reduced to poverty and privation by allied intransigence and uncontrolled inflation. While a shocked and nerveless world looked on Hitler proceeded to demonstrate that the doom he had publicly proclaimed for liberals as well as Jews was not an empty threat. The fury

of the storm troopers was unleashed. The shrieks of the victims of Hitler's savage and inhuman cruelties rose to Heaven as Hitler proceeded methodically to carry out his threat to exterminate Jews wherever he gained control. A shocked world spent its indignation in feeble protests that the Nazis studiously ignored.

Communism was the only disciplined force in the world that stood up to Hitler and declared open war to the end on nazism. Thousands of liberals and Jews in the Western World found that challenge and resistance good, became members of the party and gave it moral and financial support. And it would have been strange indeed if with the spectre of annihilation confronting them Jews had not joined the party in large numbers and put themselves wholeheartedly at its service.

These are the reasons that in a few short years brought communism out of the shadows into the sunlight, swelled its ranks to 100,000 members, with approximately 2 million fellow travelers willing to do the party's bidding and won for it an unnumbered host of sympathizers in the United States.

As circumstances brought communism in the United States to prestige and power, so circumstances have played an important part in depleting its membership and reducing its influence. First came the Hitler-Stalin pact that sparked the Second World War and exposed the shame of the Communist vow that it was committed to fight Hitler and nazism to the death. Thousands of liberals and Jews shocked at this change of line and disillusioned by this cynical alliance deserted the party, resentful at the deceit that had been practiced on them.

Then came the revelation that the paradise of the proletariat was a fraud. A ruthless dictator decreed the death of more than 6 million peasants who resisted the policy of collective farms and withheld their harvest quotas from the Communist masters. The urban toiler began to resent the gulf that stretched between the luxurious life of the ruling clique and the sweating masses. And the factory worker found himself denied every right that workers had fought and suffered to win in the Western World. Thousands who had flocked to the standards of communism in the delusion that communism had forged the key to a proletarian paradise could not stomach this revelation and defected. And along the defectors was the standard quota of men and women born in the Jewish fold.

There are always a goodly number of amateurs who rush to associate themselves with the new, novel and ballyhooed movement, persuaded that it represents the wave of the future. But amateurs learn by experience. When it became generally known that communism was not a panacea for social and economic ills, that its advocacy of peace was blatantly insincere, that to gain its evil ends, it not merely condoned but counseled deceit, cruelty, the breaking of every solemn covenant and contempt for every ethical principle and that it was nothing more or less than a criminal conspiracy directed to world conquest, the amateurs defected by the thousand, among them the standard number of Jews.

Today, according to the latest listing of the FBI, the roster of devoted, dedicated hard-core Communists in the United States has shrunk to a little more than 23,000 members. And if the tabulation of the FBI is correct, that for every dedicated and devoted Communist there are 10 fellow-travelers ready to do the Communist bidding, there are some 230,000 men and women in the United States at the beck and call of communism. In the ranks of the loyal, devoted, and dedicated Communists are to be found the usual quota of individuals, who are failures and frustrated. And of these, too, there are number of men and women born in the Jewish fold.

My point has been to show why Jews were drawn in numbers into communism and why in numbers they defected. And in the greatly diminished number of hard-core and dedicated Communists who remain, there is a relatively modest quota of men and women born in the Jewish fold. There are two things characteristic of Jews. In whatever field they enter they are intense, articulate, and conspicuous. To the ill-concealed disquiet of the rank and file of their coreligionists, these hard-core Communists, born in the Jewish fold, are not only intense, articulate, conspicuous but have demonstrated a talent for leadership that makes them stand out like a sore thumb. They have given the completely erroneous impression that a major number of Jews are Communists. As a matter of fact, these hard-core Communists, born in the Jewish fold, and their fellow-traveling reserves, represent less than one-half of 1 percent of the 5 million Jews of America. The unswerving loyalty of the vast and overwhelming majority of American Jews and their steadfast devotion to the American way of life is attested by their sacrifices in every war in which the United States has been engaged and the significant contributions they have made to a great and prosperous America.

It is a matter of record that followers of other faiths have proven equally susceptible to the Communist appeal and permitted themselves to be used as tools, dupes, and innocent collaborators of Communist projects and objectives. We have no better example of the readiness of men and women, irrespective of faith, to support causes favorable to communism, then the present desperate effort of American Communists to defeat the Internal Security Act of 1950. This is one of the most effective laws passed by the Congress to cripple the Communist conspiracy in the United States. This law makes it mandatory for the Communist Party in the United States and pro-Communist organizations, too, to register and file annual reports with the Attorney General of all Communist-action groups and all Communist-front organizations.

Communism senses in this law a threat to its very existence. It is marshalling every resource available to defeat it. It is appealing as never before to the ultra liberals, the starry eyed, and the dupes to join it in the effort to void this law. On September 14 there was filed with the Supreme Court of the United States a brief as amici curiae, signed by 360 individuals requesting the Supreme Court to void the Internal Security Act of 1950. This brief was signed by men and women representative of the clergy, education, medicine, politics, the arts, social service, and business. The great majority of the signers could not by any stretch of the imagination be called Communists or fellow travelers.

As in almost every instance when petitions favorable to communism have been drawn up, signed, and presented to the powers that be, the initiators are Communists and the rank and file of the signers are innocent collaborators. An analysis of the signers of this brief will show that the number of Jewish signers is negligible compared to the signers of other faiths. Ninety-four of the signers of the brief are men of the cloth. Six are rabbis and 88 are representatives of the several branches of protestantism—Unitarians, Methodists, Episcopalians, etc. Practically the same ratio applies to the doctors, educators, social workers, and the arts represented among the signers. It is clear that if non-Communist but poorly informed Jews have been led to support Communist projects and objectives the same is true to an equal or even greater extent of non-Jews.

I have already given the general reasons that, bound up with historic circumstances, brought non-Jews and Jews in appreciable numbers into communism. But with extraordinary cleverness communism found Jews susceptible to special appeals. If there is one dominant passion that has stamped itself on Jewish life and tradition, it has been the passion for social justice. From the days of the prophets Jews have been the pathbreakers in the cause of social justice, and they have never abated the ardent dream of the coming of a time when the practice of social justice would banish the ills of poverty and privilege and social and economic injustice from the world.

Here communism was ready with a honeyed appeal. "Look," said the Communist propagandist, "look about you in the world. Has your age-old dream of social justice been realized? Has economic and social injustice been banished? Two thousand years have passed, and these ills are still rampant in the world. When communism has come to power and is dominant in the world, it is fundamental to our policy to put your dream of social justice into practice." Jews fell for that appeal, and these devoted Communists and willing fellow travelers born in the Jewish fold refuse to admit the patent fraud manifest in the gulf that stretches between the privileged few at the top and at the bottom the toiler chained to his job and the tortured millions condemned to the living death of the concentration camps.

Again, no single group has for so many centuries been made the victim of persecution and discrimination as the Jew. For centuries the Jews of Eastern and Central Europe were treated as outcasts and pariahs, and even when Jews in the Western World were privileged to bask in the sunshine of equal political and economic opportunity they were still made to feel the smart of social and personal discrimination.

Communism made a clever and moving appeal to Jews. It set itself up as the sworn foe of every type of discrimination in the world—racial, social, color, and religious discrimination. Jews fell for that pose, too, and there are still many who accept the Communist ideology and are ranked among the fellow travelers who refuse to admit the patent fraud of discrimination practiced against the remnants of the Russian bourgeoisie, discrimination practiced against all who refuse to conform to the Communist mold.

Again the specious claims that communism made impressed and won a following among Jews. Communists have consistently claimed that they abolished the pale of settlement, that hated ghetto in which millions of Jews were crowded and where they were subjected to every hampering and humiliating restriction, a plight that stirred the sympathy of their coreligionists throughout the world, to say nothing of the burden it put on their generosity. Communism made the specious claim that it made all these restrictions null and void, that it put a summary end to the pogroms of the Black Hundreds and that it put the Jew on a par with every other Russian citizen. The truth is that it was the Duma of the Kerensky regime, the democratic regime destroyed by Lenin, that issued the decrees liberating the Jews of Russia. And there is positive evidence that far from rooting out prejudice and ill treatment of Jews as communism has boasted, communism still tolerates anti-Semitism in Soviet Russia and the satellites.

In the face of the documented evidence proving the fraud in the special appeal communism has made to Jews, it becomes difficult to explain the loyalty and devotion of those men and women born in the Jewish fold who still remain faithful to the Communist cause. Is it to be explained by that characteristic weakness in human nature that when individuals have once been per-

suaded to give themselves unreservedly to a cause and to make that cause part and parcel of their lives, that even when they have been deceived, they find that it is impossible to admit that they have been fooled?

By a vast majority American Jews have refused to be enmeshed in the spider web of communism. By a vast majority American Jews are familiar enough with the records to know that communism has broken every solemn agreement it has made with the free world and that it is basically untrustworthy. By a vast majority American Jews see the gulf that stretches between Communist promise and practice. By a vast majority American Jews condemn a cause that stands for slavery and atheism.

The American Jewish League Against Communism is the articulate voice of that impressive majority. The league insists that Jews in communism represent the very antithesis of what the Jewish people have stood for from the beginning of recorded history. For it may not be forgotten that religion as the world knows and values it, constitutes the Jew's supreme gift to humanity. As interpreters of God and goodness, from Moses to Jesus, we have been accorded a significant place in history as contributors to the world's spiritual wealth. The league holds that Jews would be recreant to what is best in their past if they did not take their place in the ranks of those determined that the ideals of truth, justice, mercy, faith, and freedom shall not be supplanted by communism's cynical concepts of falsehood, cruelty, injustice, double-dealing, and slavery.

The league is the articulate voice of the overwhelming majority of coreligionists who abominate these renegades as the rankest ingrates. For the Jews of America are wholeheartedly appreciative that here as in no other land or time or place do they share with fellow citizens the rich blessings of the fairest, happiest, most rewarding land under the sun.

They are appreciative of the fact that America has been for us a house through whose open windows has poured the sunshine of opportunity that only the free spirit can create—sunshine that some twisted Jewish individuals would exchange for the murky shadows of the police state. Here the human dignity that has added a quality of grace to rich achievement, some fuzzy-minded creatures in our midst would barter away for the deadening slavery of a robot regime. Here the full well-rounded serviceable life that democracy has made possible for our people, deluded and misguided creatures born in our fold would have us change for the lock-step existence that marks the life behind the Iron Curtain.

Relatively few as these renegades are the league does not ignore them. The league has taken the lead in condemning, repudiating and rooting them out whenever and wherever they are found. We believe that it is our duty to speak out frankly in detestation of these creatures at a time when not only for our country but for the free world there can be only one way for Americans. We believe that it is necessary that we publicly declare that Jews who speak and work for an atheistic and conspiratorial foreign power are enemies not only of their own people but also of their country.

And by tradition we are the bearers, too, of a heartening message to the free world. We are a people old in experience. We have been privileged to watch the waxing and the waning of many a formidable earthly power. Again and again we have witnessed power-mad dictatorships go down to destruction because of defiance of the eternal principles of right. And now that the free world stands at a fateful crossroads on the highway of history, we register the conviction that the cherished values and ideals of which our prophets were the champions will prevail against the powers of darkness.
